Figure 3: Map showing significant cultural heritage sites within NCA

3. Description

3.1 Description of the Property

Ngorongoro Conservation Area (NCA) is situated in Ngorongoro District, Arusha Region in the northern part of Tanzania. It covers an area of 19,300 km² and is renowned for its biodiversity, including the famous Ngorongoro Crater, which is a UNESCO World Heritage site. The area is rich in archaeological remains and natural values, including lakes, rivers, forests, and diverse wildlife habitats. The area has been recognized for its cultural and natural heritage, leading to the granting of UNESCO World Heritage status to include the many unique and authentic cultural heritage sites.
