1
 Estimonta is looking through a brochure on holiday destinations. He wants to go to a place that offers vast biodiversity. Finally, he finds the perfect place - Kinabalu Park in Sabah, Malaysia.

2
 He activates a portal that will bring him to any part of the world. He wishes to go to Kinabalu Park.

3
 He steps through and finds himself in a forest. Not far off are some bikers preparing to go up the famous Mount Kinabalu. He joins them.

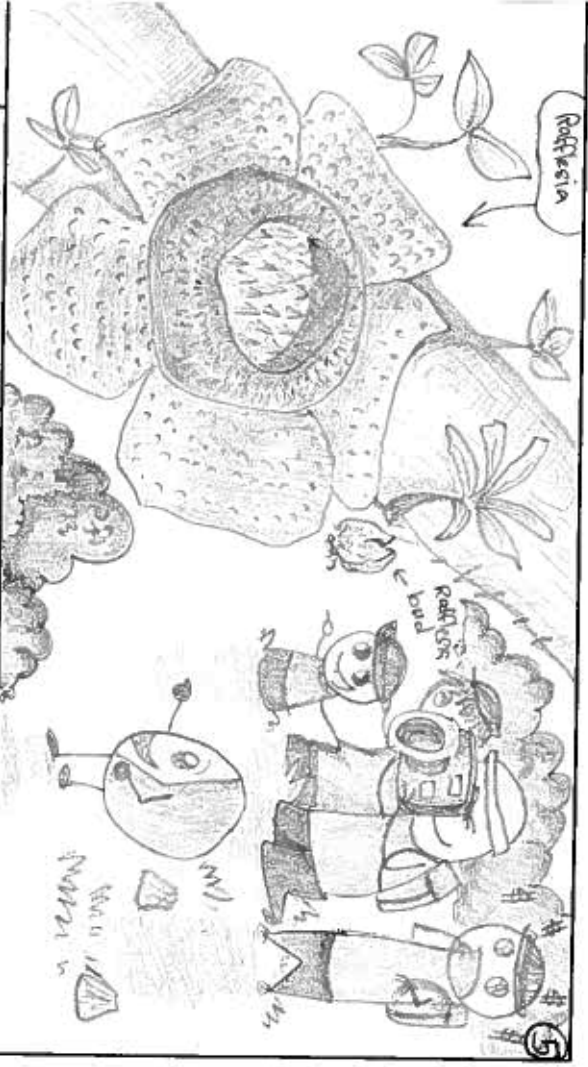

4
 Everyone is suddenly attracted to a foul smell, reminiscent of rotten meat. The stench attracts flies and insects that pollinate the flower.

4

A rafflesia perches on a fallen branch. The hikers eagerly rush over and start to take photos of the parasitic flower.

4

A hiker is about to pick a rafflesia bud to bring home. Patmonito stops him, explaining that the rafflesia is a tree flower that takes 16 months to bloom but only lives for a week. The hiker realizes his mistake.

4

Patmonito hears the distinctive call of the rhinoceros hornbill. This hornbill is one of the largest hornbills and is black and white and has a big crest on its head and mainly white neck.

4

Patmonito spots a small siff on a tree. Suddenly, a bark pops out the hornbill from earlier on drops a few berries into them and flies off for more.

4 A young heronfisher catches a songbird and brings it to the heronbill. Raimonite notices his action and stops him. Raimonite explains why he should not do it.

4 The male heronbill is feeding its mate. Heronbills depend on each other for survival. The female will lay her eggs in a tree hole. She will not go out until the chicks get old enough. Thus, she will depend on her mate for food.

4 Raimonite sees a dandelion and plucks it out. He continues plucking them, making the birds feel curious. They ask Raimonite why he is destroying the dandelions.

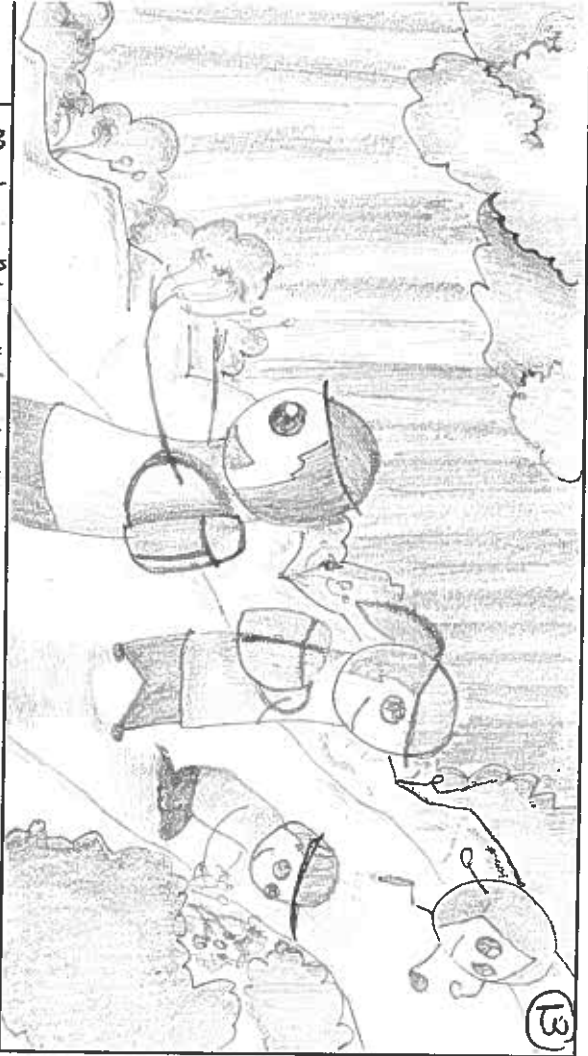

4 Raimonite says that dandelions upset the balance of nature as it cut down the native species in Kinohall. It can even kill them eventually.

4 After hearing Hammonte's explanation, everyone starts to pick up any dandelions that they see on their way.

4 Hammonte quickly stops the hiker and said, "No don't kill it. You have nothing to be afraid of. It will only attack and eat the kinabalu Giant Earth worm, not your blood."

4 A hiker suddenly screams out, "There's a LEECH! Run me the safe!" Hammonte is horrified when he sees that the leech is not any ordinary leech. It is the endemic kinabalu Giant Red Leech.

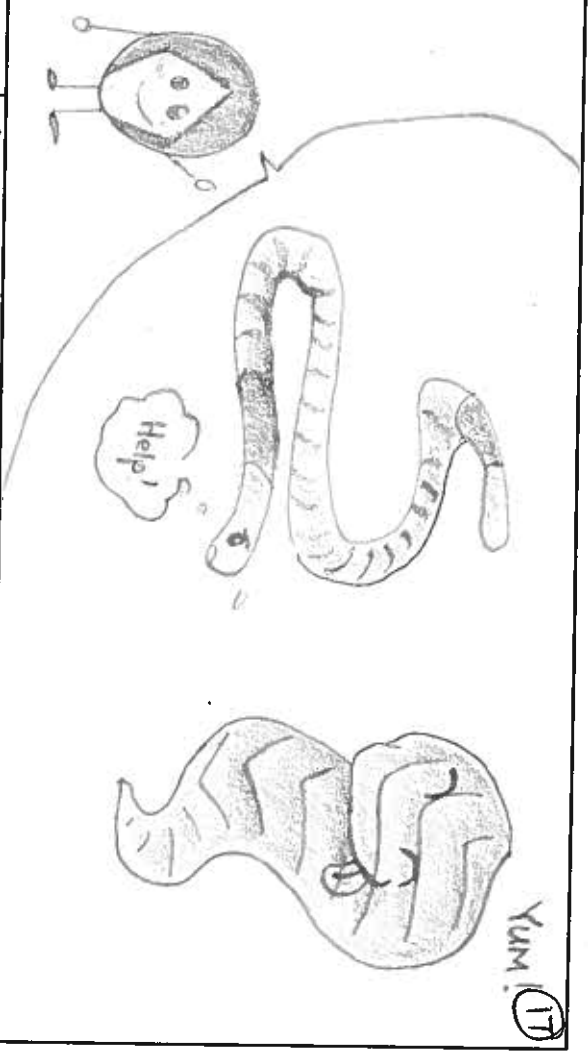

4 The hikers relax then panic again as a Toen long earthworm appears. The leech immediately attacks the poor worm and eats it.
