11.0		DP Remarks/ Perceived Threats
		Plot demarcated as Open Spaces in DP
12.0		Additional Notes/ References/ Documents available
		<p>Additional Notes: After the demolition of the Fort in the mid-1860s, many new building plots and roads were laid out on the freed space. The single stretch of open space known as the Esplanade, which lay to the west of the Fort, was thus subdivided into four distinct sections comprising the Cross and Azad maidans in the north, the central portion of the Oval maidan, and the Cooperage maidan in the south. The open greensward of the Oval maidan provides a counterpoint for the row of 1930s Art Deco residential houses at its western periphery, valiantly facing the imposing 19th century Gothic edifices on the eastern edge. Trees that line the maidan where dozens of cricket pitches are set up during the day. In addition to its use as a cricket ground, the Oval is also used as a shortcut by thousands of commuters. The Oval, which once had a riding track on the periphery known as Rotten Row, was restored and re-fenced by the OVAL Trust in 1997.</p> <p>References: SHARADA DWIVEDI and RAHUL MEHROTRA (2001) <i>Fort Walks</i>, Bombay : Eminence Designs Pvt. 4.2	Past	Offices of the Government of Bombay, Secretariat.	
4.3	Usage	Institutional - Court of Law	
5.0		Significance and value Classification	
5.1	Townscape (manmade)	Long prominent building facing the oval maidan to its west, placed alongside High Court, University, PWD offices. The building is built in the same period and with similar architectural language, has been consciously conceived as an urban design gesture, forming an interesting skyline along the eastern edge of Oval maidan. Accessed through the central porch along the long western front and also from the rear eastern side.	
5.2	Architectural Description	Planning Long symmetrical building planned along the central staircase with slightly projecting wings splayed at the corners. Large floor heights provide increase the overall scale of the building with a high pyramidal roof tower above the central staircase. A continuous verandah along the long eastern side connecting all activities varying from first floor offices to courtrooms on the second and third floors. Toilets and other ancillary facilities are attached to the long eastern	

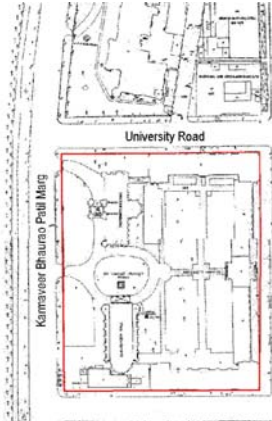

V1 City Civil & Sessions Court (Old Secretariat)			074
		<p>verandah.</p> <p>Ground floor has PWD and Sheriff's office. Library is placed in the central wing on the first floor. Registrars and staff activities are accommodated along the long length of first floor. Courtrooms along with the judge's chambers are placed on the second and third floor. Western side verandahs accommodate varied staff areas and judges chamber.</p> <p>An annex building has been added parallel to the long rear side and is connected by floor level passages.</p> <p>Features</p> <p>Large pointed recessed arch opening in the projecting gable end at the front and a high pyramidal roof tower in the centre of the long west façade.</p> <p>Polychromatic arched openings, alternate grey basalt with buff porbander pointed arches on ground and red basalt with buff porbander on smaller shallow arches on upper floors. Decorative terrace cornice band, continuous along the entire length of the building and central tower base.</p> <p>Large iron brackets supporting deep awnings on the front façade.</p> <p>Intricately carved floral relief panel in arched openings with medallions at the main porch entrance.</p> <p>Stone carved lion head in column capitals below the central staircase landing.</p> <p>Highly intricate wooden tracery ventilator panels within pointed arch openings.</p> <p>Style</p> <p>The building derives influence from Venetian Gothic style of architecture</p>	
5.3	Intrinsic	Porte-cochere (porch) bears Governor Frere's coat of arms, a lasting tribute to his vision for Bombay and its Governance.	
5.4	Value Classification	A(arc), A(his), B(per), B(des), B(uu), C(seh), D(bio), E, F, I(sce)	Recommended grade: I
6.0		Topography	
6.1	Floors	G+3	
7.0		Construction	
7.1	Plinth	Normal height plinth dressed in Malad ashlar stone course with grey basalt plinth protection.	
7.2	Walls	Load bearing rubble masonry stonewalls.	
7.3	Floor	Shahabad stone slabs on wooden supports and steel girders in case of large spans.	
7.4	Stairs	<p>Central C- shaped cantilevered stone staircase with an open well accommodating lift block. Wooden spiral stairs supported from the walls, at both the ends of the long front facade.</p> <p>Two narrow spiral service stairs centrally supported on the rear long side.</p>	
7.5	Openings	<p>High and shallow pointed arch openings on circular columns in verandahs. Multi foil ventilator in the arch portion of openings. Double door window with outer louvered and inner diamond sash glazed paneled shutters. Wooden tracery works in the ventilator panels.</p> <p>Dormer roof windows at regular intervals along the long roof.</p>	
7.6	Roofing	Steep sloping Mangalore tile roof, high pyramidal tower at center and	

V1 City Civil & Sessions Court (Old Secretariat)		074
		corner blocks, supported on intricate wooden truss work.
7.7	Articulation	Continuous cornice band at terrace level and base of pyramidal roof over high central tower, recessed arch opening, large metal bracket supporting sloping awnings on the western verandah fronts. Ornate column capitals supporting arches over circular columns.
7.8	Finishes	Yellow Kurla stone external dressed facades and basalt dressing to inside of verandah walls. Plaster painted internal wall surfaces. Wood paneled ceiling in major courtrooms. Original Minton tiles on the ground floor and also in some courtrooms on the upper floors. Varied floor finishes in the rest of the building.
7.9	Interiors (Movable and Immovable)	Movable Neo Gothic scheme included John Adam's furniture design in teak inlaid with blackwood, few courtrooms. Immovable -
7.10	Compound/ Fence/ Gate	Low parapet wall upto 1 M with iron railing above. Two iron gates on the front western side and also a gate on the rear eastern side.
7.11	Curtilage/ Unbuilt space/ Out Buildings/ Landscape	Large plot with various ancillary structures. G+5 annex building parallel to the rear east side. G+5 N.C.C building to the southern side. Long single storied structure at the rear side, houses emergency staff quarters. P.W.D barrack buildings abut the front boundary wall. Paved space at the rear and side spaces serve as vehicular accesses.
8.0		Services and Utilities
8.1	Lighting	Adequate natural light except for some areas including central staircase, thus supplemented by artificial light.
8.2	Ventilation	Adequate natural ventilation supplemented by artificial means.
8.3	Electricity	BEST
8.4	Water Supply	MCGM

12.0		Additional Notes/ References/ Documents available
		<p><u>Additional Notes:</u></p> <p>The building, with a frontage of around 450 feet, was designed in a Venetian Gothic style by Colonel Wilkins of the Royal Engineers and completed in 1874. It now houses a number of courts and government departments. Constructed in rubble and stone, the walls are faced with Kurla stone. The corridor arches on the ground floor are of alternate Porebunder stone and blue basalt while those on the first floor level are alternate red basalt and Porebunder stone. The pillars are moulded Kurla cut-stone, corridor shafts, capitals and cornices of milky white Hemnagar sandstone. There are two wings to the east, the ends of which form three sides of an octagon. The main staircase is illuminated by shafted windows, contained in a lofty arch rising through the building and culminating in a large gable at the top. The arcaded verandahs facing the westerly breezes are designed to provide ventilation and light to the building. The main doors are of beautifully carved wood and were designed by George Twigge Molecey.</p> <p>Frontage of about 450 Ft. and the central tower rises about 170 Ft high. Designed by Colonel H St Clair Wilkins of the Royal Engineers and executed by PWD from its own funds and became a Paradigm of subsequent work in Bombay.</p>

5.1	Townscape (Manmade)	The library and Rajabai Tower lies along Bhavrao Patil Marg in front of Oval maidan and between the Old Secretariat and High Court. Main access to the building is through Bhavrao Patil Marg. The building forms part of an important avenue of impressive Gothic buildings planned as an imposing urban design gesture during colonial rule along the Oval maidan front. The Rajabai clock tower is an important landmark symbolizing for many years, the city of Mumbai. Annex building is located at the east side of the plot facing the street on three sides.				
5.2	Architectural Description	Planning Convocation Hall:				

V2 b-c University Library and Annexe building	076(b)
	<p>Library building is placed alongside the Convocation Hall at the western edge of the large university campus with an ample front lawn. Entrance is through a <i>porte-cochere</i> formed by Rajabai tower and an arcade at the ground floor.</p> <p>It is rectangular in plan with the Rajabai clock tower in the center of the front façade behind which is a half octagonal projection of the main staircase block.</p> <p>The building is a ground plus one structure. The Rajabai tower is 280 feet high.</p> <p>The two storey University Library has Rajabai tower abutting the center of the main building, with large pointed arch openings at the base to provide the Library's <i>porte-cochere</i>.</p> <p>The ground floor has a huge groin-vaulted entrance hall with a large reception counter on right.</p> <p>Two lecture rooms are separated from this hall by wooden screens, each with stained glass inserted within.</p> <p>The front two corners have spiral staircases terminating in conical feather cut patterned roofs. The central staircase is placed to the left of the reception desk. Walking up from the ground floor, where two cross arches spring from a capital, we can see carved heads of Homer and Shakespeare.</p> <p>The staircase also has a vaulted ceiling lit by large lancet stained glass windows. At first floor the landing leads to the large reading room with a teak wood vaulted roof above it.</p> <p>The reading room has a 32-foot high ceiling, and is lit from the north and south by large stone Early English bar-tracery windows, and from east and west through a series of large pointed arch windows, shaded by an arcade on west.</p> <p>The clock tower consists of seven storeys; the fourth floor of the tower contains clock's mechanism. The opal glass dials can be illuminated at night, originally by gas jets placed behind them.</p> <p>The corner balconies below the dial were intended as viewing points. It forms decorative pinnacles at the top of the tower; the canopies support the buttress holding the octagonal crocketed lantern that terminates the composition.</p> <p>Annex building:</p> <p>Annex building is a 'C' shaped building enclosing courtyards and central access paved road.</p> <p>The building is symmetrical with a central wing and north and south wing similar wings. Each wing has a central staircase higher than the rest. The verandahs of the East and South wing face the street. The rooms are accessed through verandahs overlooking the internal courtyard.</p> <p>North wing occupies the library extension and Record room on the ground floor, the Vice chancellors wing on the first floor with verandahs overlooking the internal courtyard. The south and east wings occupy administration offices, library, canteen etc</p> <p>Features</p> <p>Two intricately carved spiral staircase shafts at the two ends and centrally with Rajabai tower mark the building front façade.</p> <p>The main building is divided into four bays on each side at ground floor and eight bays on first floor level forming an arcade at both first and ground floor levels.</p> <p>The elevations show an interesting composition using Malad,</p>

V2 b-c University Library and Annexe building				076(b)
		<p>Porbander, Coorla, red sandstone and gray basalt stone.</p> <p>An arabesque patterned cornice band marks each floor with floral and animal motif in it.</p> <p>All openings are huge pointed arched openings with two lancet window and multifoil rose window within it forming a high gothic characteristic.</p> <p>The arches are marked with ornate intrados and extrados with decorative floral and motif bands. The arch ends are marked by mask or floral motif. The entrance arch has ornate tracery at the base of Rajabai clock tower. The ground floor arcade is marked with decorative column capitals and ribbed-groined vault. The first floor arcade is formed by multifoil arch with multifoil rose window above it with decorative spandrel and cornice band above which railing is present.</p> <p>On the Rajabai clock tower there are projecting balconies supported on decorative brackets and have ornately carved railing with sculptures on it - four sides representing 24 castes of western India, standing within niches or sitting under canopies of crocketed pinnacle forms of varying Neo-Gothic designs.</p> <p>Beautiful stained glass in arched window openings and ornamentation elements such as grotesque flying gargoyles, buttresses, floral motifs, medallions, impost bands, crocketed pinnacles and finials.</p> <p>Annex building is clad with buff stone, with central staircase higher bay, arched openings, projecting columns externally like pilasters in stone</p> <p>Style</p> <p>The building displays characteristics of Neo Gothic style.</p>		
5.3	Intrinsic	<p>The library building, houses a fine collection of rare manuscripts, maps and books.</p> <p>Marble busts of Homer and Shakespeare are present on the cross arches underneath the landing to the staircase.</p> <p>On the stone steps at the entrance to the library is a benchmark similar to those at the Town Hall and the PWD building.</p>		
5.4	Value Classification	A(arc), A(his), B(per), B(des), B(uu), C(seh), D(bio), E, F, I(sce)	Recommended grade	I Annex bldg: IIA

		<p>Additional Notes: The Fort University complex comprises the Library, the Senate or Convocation Hall and administrative offices. The Library with the Rajabai clock tower were both designed by the eminent British architect, Sir Gilbert Scott. The library building, housing a fine collection of rare manuscripts, maps and books was commenced in 1869 and completed in 1878. Premchand Roychand, a well-known banker of the last century, funded the library and the 280 feet high Rajabai Clock tower. The ornamentation on the Rajabai Tower includes immense 8 feet tall statues representing the many communities that form the population of cosmopolitan Bombay, modelled by a local engineer, Rao Bahadur Mukund Ramchandra. Inside, the ground floor has two side rooms, a central hall and a staircase vestibule. The upper floor is approached by a stone spiral stairway, along which are lovely stained glass windows. The library reading room on the first floor is embellished with stained glass windows and a remarkable arched teakwood ceiling. The Rajabai Tower clock chimes on the Westminster pattern. The carillon or joy-bells, which can play 16 different tunes including God Save the Queen, has unfortunately been in disrepair for several years. The restful gardens of the University complex have some unusual, old and beautiful trees and statues.</p> <p>References: INTACH (1990) <i>Preliminary unedited listing of Unprotected Monuments, Buildings and Structures listed for Conservation</i>. 4.0		Use	
4.1	Present	Judiciary, Court of Law	
4.2	Past	Judiciary, Court of Law	
4.3	Usage	Daily	
5.0		Significance & Value Classification	
5.1	Townscape (Natural/ Manmade)	High Court forms one of the major buildings, which were planned on the Esplanade after the demolition of the fort walls. The main feature that strikes is the impressive scale of the building. High Court, the University, the PWD offices and the Secretariat built in the same period and with a similar architectural language, were consciously conceived as an urban design gesture, which forms an interesting skyline. High Court, which forms a part of the entire streetscape of eastern edge of Oval Maidan, bears a strong visual character and line of sight from across the Maidan.	
5.2	Architectural Description	Planning It's a U-shaped building with a central courtyard on the rear side. Northern and southern ends of the building, overlooking the open court are specifically planned for administrative purposes and the longer side caters to the Court activities, and Judges chambers.	

V3 Bombay High Court		077		
		<p>Verandahs and corridors form the major circulation spaces as also the transition between the interiors and exteriors.</p> <p>The main western side entrance has been planned with a porch for Judges and a driveway.</p> <p>Spiral staircases have been strategically planned at the corners of the building, which form the special feature of the facade.</p> <p>Features</p> <p>The Facade is punctuated with arches and columns supporting the verandahs and corridors that run through the complete length of each floor. The front facade is flanked by four octagonal towers enclosing spiral staircases with steep spires on the top.</p> <p>On either side of the main (western) entrance is a 120 feet high octagonal tower with life-size statues. One is a blindfolded "Goddess of Justice" holding a sword of justice in one hand with equally balanced scales in the other and the second spirelet with "Goddess of Mercy" with hands folded in supplication.</p> <p>Dormer windows punctuate the steep roof slopes.</p> <p>Groined corridor forms the welcoming feature at the central entrance on western side.</p> <p>Style</p> <p>It derives a strong influence from Neo-Gothic style, English Gothic style and also has certain local influences.</p> <p>Neo-Gothic elements are predominantly observed like spires, pointed arches, traceries etc. that form coherent part of the building facade.</p>		
5.3	Intrinsic	<p>The High Court was associated with the National freedom movement of India.</p> <p>High Court forms an important court of archives and records.</p> <p>Prominent freedom fighters, leaders of Independence movement and luminaries have been associated with the High Court.</p> <p>The Historic trial of Lokmanya Balgangadhar Tilak in 1908, was conducted in the imposing Criminal Court, later known as 'The Central Court'.</p> <p>In terms of the features two life-sized stone statues, one of a blindfolded "Goddess of Justice" holding a sword of justice in one hand with equally balanced scales in the other and the second spirelet with "Goddess of Mercy" with hands folded in supplication, surmount octagonal tower on the either side of the western entrance of the High Court.</p> <p>The carved stone detailing found on walls, atop columns, on the springing point of corridor arches, and at many nooks & corners, comprise of botanical motifs and a menagerie of animals, reptiles and birds.</p> <p>The western side corridor arch column capitals are carved in porbandar stone, depicting the heads of different communities in Bombay</p>

6.1	Floors	<p>G + 3, Mezzanine floors have been added in the corridors of 2nd and 3rd floor.</p> <p>Central file store is accommodated in the central roof.</p> <p>Housing is provided for the Court keeper in the north and the south wing.</p> <p>Accommodation was been provided for several Court officers and employees within the apartments in the wings that rise above the roof of third floor.</p>		

V3 Bombay High Court		077
7.0		Construction
7.1	Plinth	The plinth marginally varies in height from east to west, as the site is sloping along seaside. Two types of stones have been used as different courses namely grey basalt and buff basalt.
7.2	Walls	The walls are constructed in rubble, with lime mortar joints. The lintels of the openings are of the arched/ flat stone courses and the stone sills of the windows project into a sloped coping.
7.3	Floor	Plate iron girders and timber joists support the upper concrete floors with tongue and grooved narrow planking on fillets. Floor finish consists of clay based and Italian mosaic tiles. In many places decorated Minton tiles have been used. Some courtrooms have raised platforms, finished with wooden flooring.
7.4	Stairs	Main Eastern side staircase is an open well staircase constructed in stone. It has a decorative cast iron railing and teak wood handrail. Two pairs of spiral private staircases constructed in stone are enclosed in octagonal towers. Two elliptical staircases on eastern side are constructed in stone, cantilevered from the wall. These are provided with decorative cast iron railing with carved wooden handrail. Nine single flight wooden staircases ascend from third floor to the mezzanine and attics. These are provided with wooden balustrades and handrail. Seven spiral wooden staircases lead to judges' chambers from third floor. These have decorative wreath pieces, balustrades and teakwood handrails. Six narrow spiral enclosed stone staircases ascend from the first to the third floor.
7.5	Openings	The facade is punctuated with a series of arches supported on columns. The door and window openings are also arched with intricately carved wooden tracteries. The teak wood double doors consist of an inner teakwood double leaf fixed louvered paneled shutter and an outer teakwood double leaf, glazed paneled shutter with diamond shaped sashes. Original iron grided double leaf doors, lead to spiral staircases. Windows consist of teakwood single/ double leaf glazed shutters, with diamond shaped sashes. High vertical openable windows serve as Clerestory to the Central Courtroom. Gable Dormer windows are located within the roof slopes.
7.6	Roofing	The High court has a hipped roof with terracotta tiles over tongue and grooved teak planking supported over teak wood trusses. Gable Dormer windows punctuate the roof slopes at regular intervals. The central portion has a high pyramidal roof with stone turrets at the four corners. The roof of the octagonal towers end in steep stone decorated spires.
7.7	Articulation	Extensive detailed ornamentation is seen more in interiors than the exteriors. Animals, plant life and mythological characters have been depicted through the bands, cornices, column capitals, column bases, mouldings and springing point of arches. All along the corridors are stone carved balustrades and handrails.

V3 Bombay High Court		077
		Carved stone water fountains are positioned at various places on each floor. Each floor is accentuated by the porbunder projecting stone bands supported by carved stone brackets.
7.8	Finishes	<p>The walls are finished with hammer dressed grey Sewree basalt stone in shallow courses (approximately 10 cm) on exterior face, and finished with lime plaster from inside.</p> <p>The lighter bands of Porbunder limestone used in the column capitals and balustrades relieve the grey exterior facade.</p> <p>The buff basalt and red sandstone in the columns, arches and other decorative elements give Polychromatic effect to the exteriors.</p> <p>The floor in the courtrooms and corridors were originally paved with Minton and Italian Mosaic tiles.</p>
7.9	Interiors (Movable & Immovable)	<p>Movable</p> <p>Each of the judges' chambers is equipped with a round table, chairs, a couch, carved cabinets and bookcases.</p> <p>A unique piece of furniture, served as a miniature pantry resembling size, shape and appearance to a baptismal font. Wooden furniture like benches, chairs form a significant part of the interiors.</p> <p>There are various portraits of former judges in the courtrooms and the library</p> <p>Immovable</p> <p>Statue of M C Chagala, First Indian Chief Justice of Bombay is kept in a niche of the second floor corridor.</p> <p>Commemorative marble plaque with decorative stone border, describing the title of the building, date of completion and details of people involved in the construction, is inscribed in the wall at the first floor landing of the main staircase.</p> <p>There is an ornamental wooden canopy above judge's seat in the main courtroom.</p> <p>Viewing gallery on the three sides of main courtroom are finished with teakwood floor, heavily carved teakwood railings and supporting brackets.</p>
7.10	Compound/ Fence/ Gate	<p>The Compound wall is made in the grey basalt stone upto an approximate height of 2'6", above which is an iron Railing with decorative motif at the top.</p> <p>The annexe building and other ancillary structures form the eastern edge of the premises.</p> <p>The original Iron entrance gates still stand in their places.</p>
7.11	Curtilage/ Unbuilt space/ Out Buildings/ Landscape	<p>The eastern side open court forms as a pedestrian and vehicular entrance to the all the buildings of the premises.</p> <p>Ancillary structures for the garages, a canteen and support services such as police chowky, pump rooms etc. are located on the east side along the annexe building.</p> <p>The western and southern side has a soft landscaped garden with some rare cannonball trees. Statue of Sir D F Mulla and Sir Lawrence Jenkins, distinguished counsel and Judge respectively, represented Bombay High Court on the judicial committee, are located in the front lawns along the driveway.</p> <p>The northern side is shared with the PWD building.</p>
8.0		Services & Utilities
8.1	Lighting	Natural daylight through verandahs and skylights together with electrical lighting fixtures suspended from high ceiling.
8.2	Ventilation	Verandahs act as wind catchers allowing natural ventilation through traceries and openings. Dormer windows supplement the ventilation

V3 Bombay High Court		077
		process. Electrical fans have been suspended from high ceiling and few courtrooms are provided with forced ventilation like Air- conditioners.
8.3	Electricity	BEST
8.4	Water Supply	MCGM
8.5	Drainage (Plumbing & Sanitation)	MCGM
8.6	Fire Precaution	Initial fire fighting and a few additional equipments like, hosepipes and hose taps are installed on each floor.
8.7	Other (HVAC/BMS/Security Systems)	Security guards posted.
9.0		Condition
9.1	Plinth	Good.
9.2	Walls	Good
9.3	Floor	Good.
9.4	Stairs	Good
9.5	Openings	Good
9.6	Roofing	Good
9.7	Articulation & Finishes	Good
9.8	Services	Good
9.9	Out Buildings	Good
9.10	Overall Conditions	Good Maintenance level : Good
10.0		Transformation
	Form	The insensitive installation of lift shafts has destroyed the integrity of the aesthetics of the building. Asbestos sheet chajjas have been used to serve as weather shading devices at certain windows. Some of the functions of the high court have been transferred to PWD building, which is now connected by a covered walkway.
	Structure	The main staircase is strengthened by adding I-section. Additions of mezzanine floors supported on I-sections in the corridors of the 2nd and 3rd floor alter the interior space Original carved stone water fountain juxtaposed with modern water cooler. Corridors have been encroached where the records are stacked haphazardly.
	Articulation & Finishes	Oil painting (black) to column shaft at the western side entrance corridor. The original floor tiles have been insensitively replaced by ceramic and mosaic tiles in the corridors, Judge's chambers and courtrooms.

12.0		Additional Notes/ References/ Documents available
		<u>Additional Notes:</u> Commenced in 1871 and completed in 1878 at a cost of Rs 16.5 lakhs, the High Court is next to the Victoria Terminus, the second largest Gothic building in the city. The length of the building is an enormous 562 feet, the breadth 187 feet and the height to the eaves, 90 feet. The architect, Colonel Fuller of the Royal Engineers, is believed to have designed the building from a sketch taken by him of magnificent castle on the River Rhine while touring

V3 Bombay High Court	077
	<p>around Germany. The imposing turrets, the massive central tower and the black local stone used in the construction, give the High Court the appearance of a massive fortress. The building has galleries open to the westerly breezes, a grand central staircase, beautiful Minton tiling, well appointed court rooms and a library room with portraits of distinguished judges and eminent lawyers. There is beautifully carved detailing atop the many pillars and arches, comprising human heads, birds and beasts with several, including a monkey judge wearing an eye-patch, holding aloft tilted scales of justice and foxes wearing lawyers' neck bands, lampooning the legal profession. All the interior fittings were executed to the designs of John Adams. Outside the Court is a well which provides water for orthodox Hindus who will not drink tap water. Until a number of lakes were created in the suburbs from the 1850s, Bombay's water supply came from such wells that once dotted the entire city.</p> <p>Height of central tower to eaves 90 feet and that of central tower is 178 feet. The actual cost of the project was Rs 16,44,528, were as the sanctioned estimate was Rs. 16,47,196.</p> <p>References: INTACH (1990) <i>Preliminary unedited listing of Unprotected Monuments, Buildings and Structures listed for Conservation</i>. 		Additional Notes: The oldest building at the Kala Ghoda Circle, located at the corner site next to the Army & Navy Building, was once the grand Watson's Esplanade Hotel, erected between 1867-69 by John Watson, a wealthy city draper, who imported all the building materials from England. While still under construction, the building, with its unique cast iron frame imported from England, was described by one writer as a 'huge birdcage'. The spacious arcade at street level displays the original cast iron pillars. History was created here in 1896 when the foundations of the Indian Cinema industry – now the largest in the

7.3	Floor	<p>Concrete floor with tongue and grooved narrow planking on the underside of the floor.</p> <p>Terrace slab is an RCC beam structure with IPS waterproof finishing. Vaulted floor over reading room in the verandah.</p>	
7.4	Stairs	<p>Main open well staircase with stone risers and treads and cast iron balustrade with floral pattern and teakwood handrail.</p> <p>Narrow spiral staircase from the verandah to the terrace with risers, treads and railing in wood.</p> <p>A teakwood steep ladder leading from terrace to the clock tower.</p>	
7.5	Openings	<p>Doors and Openings</p> <p>The main porch is a gothic pointed arch opening with trefoil and tracery work. The arch springs from Corinthian capitals. The arch is extended into a pediment with a pinnacle above.</p> <p>The grand main entrance wooden doors have single panel double shutters with a post box integrated in the shutter, loose stone stoppers. The ventilator of the door is an intricate tracery work of cast iron painted in black and gold.</p> <p>The administrative room doors have thick wooden frames of the wall thickness, with double paneled double leaf wooden shutters.</p> <p>Terrace doors are teakwood, flushed doors with an arched ventilator opening above.</p> <p>The reading room door openings are in the form of pointed arch, with radiating type stained glass fixed in the ventilators above. The double leaf double paneled wooden folding louvered shutter doors are fixed to a wooden frame.</p> <p>A row of arched openings in the verandah run through the entire width of the building. They spring from polished slender black column with Corinthian capitals.</p> <p>The internal arches in the verandah are joined to the array of smaller similar arched openings by the capital band.</p> <p>Windows</p> <p>Mid-landing consist of French windows with the height divided into two</p>	

V6 David Sassoon Library & Reading Room		166
		<p>parts. The upper and lower part are wooden paneled double shutter, with the lower shutters protected with cast iron railing.</p> <p>The small independent reading room windows have long French windows, with the height divided into two parts. The outside upper and lower windows are wooden paneled double shutter. The upper inside shutters are double shutter hinged louvered shutters. The lower shutters are protected with cast iron railing.</p> <p>Windows at the main reading room entrance have wooden openable glazed shutters with grills inside.</p> <p>Windows along the longer sides of the reading room have full height arch shaped wooden long glazed openable sash window shutters with teakwood transoms on the outside and teakwood louvered shutters on the inside.</p> <p>Main reading room consists of ventilators above windows with radiating wooden members and coloured glass panels.</p> <p>Windows along the smaller sides of the reading room consist of long French windows with glazed openable shutters.</p> <p>Terrace consists of arch shaped wooden glazed openable sash window shutter with circular glazed fixed ventilator.</p>
7.6	Roofing	<p>Main staircase block has a unique wooden collar braced roof with teakwood planks and framing members.</p> <p>Pitched Mangalore tiled roof over administrative block.</p> <p>RCC slab and beam structure over main library hall.</p> <p>Verandah has wooden planks roof cladding over concrete slab in the center and vaulted concrete and steel section roofing over side sections.</p> <p>Clock room has Mangalore tile roof with wooden framework below.</p>
7.7	Articulation	<p>Coursed buff basalt stone cladding with alternate black and white stone bands along the arched openings forms the main feature of the building. Bands of alternate black and white limestone over arch openings</p>
7.8	Finishes	<p>Walls are finished with coarse buff basalt with thin mortar pointing externally, and plastered and painted internally.</p> <p>Minton tile having different patterns segregate each area.</p> <p>Wooden flooring in independent reading rooms and with teak wood joists and rafters in clock tower.</p> <p>Verandah and mezzanine floor have cast iron railing with floral pattern.</p>
7.9	Interiors (Movable & Immovable)	<p>Movable</p> <p>Large teak wood reading tables, a grand reception table, librarian's table and other working table form furniture having antiquity value along with wooden chairs, chaises and benches.</p> <p>A clock along with various photo frames adorns the interior.</p> <p>Donors list exhibited at the entrance foyer.</p> <p>Marble plaque at the library entrance.</p> <p>Statue of David Sassoon in the entrance lobby.</p> <p>A marble sculpture on granite pedestal of James Berkley has been installed in the mid-landing of the staircase.</p> <p>Another marble plaque has been installed at the entrance of the main reading room stating the fund provider, earlier purpose of the library, its cost, and year of completion.</p> <p>Immovable</p> <p>Wooden paneling within the entrance foyer.</p>
7.10	Compound/ Fence/ Gate	<p>Compound wall on two sides, upto 2'-0", with fencing and chain link</p>

V6 David Sassoon Library & Reading Room			166
		above. Narrow alley between David Sassoon Library and Army Navy Building, which is not in use. Original iron-gate on the rear side.	
7.11	Curtilage/ Unbuilt space/ Out Buildings/ Landscape	Garden serves as a reading area. Old trees in the garden create an ambience for reading. Paved pathways, benches, tables, lampposts, form a part of the landscaped garden.	
8.0		Services & Utilities	
8.1	Lighting	Adequate natural daylight through long openable windows from the verandah of first floor and garden area. Adequate artificial lighting through electrical light fixtures such as old chandeliers in the lobby area, and suspended tube lights in the reading room.	
8.2	Ventilation	Verandah, long windows, doors act as the natural ventilation. Electrical fans have been suspended from high ceiling.	
8.3	Electricity	BEST	
8.4	Water Supply	MCGM	
8.5	Drainage (Plumbing & Sanitation)	MCGM	
8.6	Fire Precaution	Sprinkler system has been installed in the main library and reading room.

4.3	Usage	Daily.	
5.0		Significance & Value Classification	
5.1	Townscape (manmade)	Landmark building close to the historic Kala Ghoda square alongside important institutional buildings with a mandatory pedestrian arcade along the road front forming one of the most important avenues within the Fort area.	
5.2	Architectural Description	Planning Rectangular building with a central open quadrangle around which continuous verandah passages provide access to all rooms arranged around it. Main entrance from the arcaded east side leads to a spacious entrance lobby leading to wide stone stair. Subsidiary staircases are also provided in the three corners except the northeast. East front also has narrow veranda bays on upper two floors above the pedestrian arcade. Ground and west side of first floor is occupied by Department of Archives to serve as storage facilities. Rest of the first, second and upper floors are occupied by the college. Administrative areas and classrooms are located on first floor whereas library, teacher's room, cultural hall and laboratories are all located in the pitched roofed second floor. Grand spaces in the part third and	

V7 Elphinstone College			165
		fourth floor were planned to be Principal's residence but presently lie vacant. It is connected to an annex building to the west side through a bridge at second floor. Features Well-composed long symmetrical front façade with the high central portion topped by a steep pyramidal roof. Raised central and edge portions are marked by decorative stone spires at all the four corners. Pedimented central porch has the carved head of Sir Cowasjee Jehangir above the ornamentally treated front arch. Entire long façade is marked by alternate red and Porbunder stone arch openings, semicircular on ground arcade level and pointed arch on upper two floors. Central Arch openings are supported on finely carved capitals with floral and animal motifs. Finely carved stone relief cornice band at the second floor level. Projecting stone balconies with decorative brackets and stone relief parapet at both ends of the front façade. Highly ornate iron railing in staircase parapet. Style The building displays Victorian Gothic style features.	
5.3	Intrinsic	Eminent nationalist personalities have received education in this institution.	
5.4	Value Classification	A(arc), B(per), B(des), B(uu), E, F, I(sce)	Recommended grade I
6.0		Topography	
6.1	Floors	G + 3	
7.0		Construction	
7.1	Plinth	Low Plinth height about 0.3 m. dressed in Malad stone ashlar course.	
7.2	Walls	Load bearing rubble stone masonry walls supported on steel girders, brick load bearing walls on the third and fourth part floor.	
7.3	Floor	Shahabad stone slabs on wooden supports & heavy steel girders support large floor spans.	
7.4	Stairs	Overall four staircases. Central C- shaped stone stair supported on decorative brackets. Two of the corner stairs are steel C- shaped with decorative railing and wooden handrail.	
7.5	Openings	Semis circular and pointed arch openings on the front and rear facades, also tracery within arch portions.	
7.6	Roofing	Sloping Mangalore tile roof on the three sides and steep pyramidal sloping roof supported on slender steel trusses. Central portion is also steep pyramidal roof.	
7.7	Articulation	High central bay with a projecting porch and stone spires at all the four corners and a semicircular projecting balcony with large ornamental corbel feature; intricately carved frieze band at the second floor level of the long façade; projecting balcony and supporting corbels, alternate buff and porbunder stone arches supported on richly carved capitals and circular columns. Stone parapet with trefoil and quatrefoil opening feature.	
7.8	Finishes	Buff basalt stone dressed external wall finishes and grey basalt stone in verandah walls and soft Porbunder stone for ornamental features. Brick faced arches in inner verandahs. Plastered painted internal wall surfaces. Minton floor tiling in ground floor and wooden floorboard finishing on upper floors.	
7.9	Interiors (Movable & Immovable)	Movable Carved wooden furniture – benches and wall paneling have decorative

5.1	Townscape (Manmade)	Prominent corner building located at the Shyamaprasad Mukherjee chowk at the junction of Shahid Bhagat Singh road and Chhatrapati Shivaji Marg. The building is located on a plot with huge front and side setbacks and is accessed from the west side from Shahid Bhagat Singh Marg and an exit can be found on the south side to Chhatrapati Shivaji Marg. The building is juxtaposed with other important buildings of different styles and period, like Majestic Hostel, Indian Mercantile Mansion, Regal cinema, Prince of Wales museum and Cowasji Jehangir Hall (NGMA) around the circle.		
5.2	Architectural Description	Planning		

V8 Maharashtra State Police Headquarters (Sailor's Home)			095
		<p>Main building is rectangular in shape with its longer side facing west. The building is planned with a central projecting entrance lobby leading to the main staircase connecting both the side wings.</p> <p>The building has a central projecting wing, and side twin towers with conical roof, standing taller than the rest of the wings, with lower terrace spaces in between.</p> <p>The office rooms (initially planned as Sailors rooms) are planned in the east side, connected with passages and verandahs on the west side and projecting balconies on the east side.</p> <p>Features</p> <p>The rough stone dressed grey clad stone building has a central projecting wing with an extended porch accessed through side pointed and front three semicircular arched openings with alternate buff and grey voussoir pieces. The springing point of the arches is adorned with animal motifs and round motif with Sailors Home symbol engraved below. The arches are supported on corner double columns and flying buttress. The columns have projecting capital bands and wide base. The porch has a terrace above with stone balustrade and corner finials with gargoyles below. The entrance porch displays a marble bas-relief of Baroda's Khanderao Gaekwad Sayaji Rao II.</p> <p>The central wing ends into a pediment decorated with stone crocketing, finial and bands of floral motif below. The tympanum is highly decorative with the figures of Neptune surrounded by nymphs and sea horses. To the left and right, two griffins bear shields that display coats of arms.</p> <p>The ground floor openings have pointed double arched openings with alternate buff and grey voussoir pieces supported on square columns with bands at the column capital level.</p> <p>The first floor has double pointed arched openings, supported on short columns with decorative capitals and round floral motifs above with stone-carved balustrade below. Cornice bands define the floor levels.</p> <p>The second floor and the third floor of the central wing have a row of four arched openings and round windows above with alternate buff and red stone voussoirs and double side short columns with decorative capitals.</p> <p>The middle wings have terrace spaces with quatrefoil stone balustrade.</p> <p>The side towers have ground floor double arches with smaller arches within the bigger.</p> <p>The tower has receding floors supported in the corners with flying buttress, corner stone scroll motif with topmost level with round arched openings above with cast iron jali, depicting sailing and other names inscribed within. The tower roof flares outward and is supported on timber brackets to create deep shade to the stonework below. Bands define the floor levels.</p> <p>Internally the openings are arched and are supported on columns with decorative capitals with floral motifs, intricately carved cast iron ventilator <i>jalīs</i>, symbols and monograms of sailor anchors, name engraved at places.</p> <p>Style</p> <p>Gothic style</p>	
5.3	Intrinsic	<p>The bands, mouldings and carved corners in buff-coloured Porbunder stone with the caps and finer carvings in Hemnagar stone, were crafted by students of the JJ School of Art under the supervision of Professor John Lockwood Kipling (father of the famous writer, Rudyard Kipling).</p> <p>The funds for this building were donated by Maharaja Khanderao Gaekwad of Baroda.</p>

		Plot has been demarcated for Government Office in DP			
12.0		Additional Notes/ References/ Documents available			
		<u>Additional Notes:</u> Police Commissioner's Office (Formerly Royal Alfred Sailors' Home and Old Council Hall) This is the oldest and perhaps historically the most important building constructed in the city after the demolition of the Fort walls in the 1860s. The sprawling Royal Alfred Sailor's Home, which in later years functioned as the Council Hall, is now the Maharashtra State Police headquarters. It was built on the site of Mendham's Point, the oldest English cemetery in the city – Mendham being the first Englishman to be buried here. The main building, designed in the Gothic style by the renowned architect, Frederick William Stevens, is 270 feet long and 58 feet wide and was completed in 1876. Important features include the sculpture of Neptune in bas-relief in the pediment at the top and the ingenious use of different coloured natural stones in the building, which is faced with blue basalt. The bands, mouldings and carved corners in buff-coloured Porebunder stone with the caps and finer carvings in Hemnagar stone, were crafted by students of the JJ School of Art under the supervision of Professor John Lockwood Kipling (father of the famous writer, Rudyard Kipling). The arches are of Hemnagar stone mixed with Kurla and basalt. The aesthetic combination of the various local stones gives the building a striking appearance. The renowned British writer, Joseph Conrad, once stayed in the 1880s in the Sailors' Home and his visit and experiences here inspired the story of the sailing ship, <i>The Nigger of the Narcissus</i> , which he finished writing in 1897. In 1928, the Bombay Government took over the building for use by the Bombay Legislative Council. A new Council Hall was built behind the Sailor's Home and connected by a corridor to the main building. Designed by the Consulting Architect to the Government, J Mercer, the walls of the Council Hall were built of stone with a yellow basalt facing. A unique feature incorporated in the building was the flooring of the main Chamber in rubber asbestos. The Council Hall was probably the first building in Bombay – and perhaps in the country to be equipped with an air-

1.2	Earlier Name	Wellington Fountain		
1.3	Built in:	1865	Extension Date:	-
2.0		Access		
2.1	Main	Shyamaprasad P. Mukherjee Chowk (Junction of Chatrapati Shivaji Marg, Shahid Bhagat Singh Marg, Madam Cama Road, Nathalal Parekh Road)		
2.2	Subsidiary	-		
3.0		Ownership pattern		
3.1	Present	Municipal Corporation of Greater Mumbai		
3.2	Past	Municipal Corporation of Greater Mumbai		
3.3	Status	Owner		
4.0		Use		
4.1	Present	Fountain		
4.2	Past	Fountain		
4.3	Usage	Daily		
5.0		Significance & Value Classification		
5.1	Townscape (Manmade)	The Fountain is located in an important urban node at Shyamaprasad Mukherjee Chowk bound by an array of buildings of varied architectural styles and periods, with Mercantile building, Majestic Hostel, Maharashtra Headquarters, Prince Of Wales Museum, Metro Cinema and Cowasji Jehangir Hall.		
5.2	Architectural Description	Planning & Features Octagonal water basin with stone parapet wall, housing water supply and drainage system. The fountain is placed at the center of this basin. The base is octagonal capped with two tiers of shallow troughs spouting water. On the base is a wide trough with geometric patterns inscribed on it. The cylindrical final level of the fountain has floral pattern. Bas-reliefs at the bottom level, depicting Dukes victories in war.		

F. Wellington Fountain		219		
		The levels are demarcated by bands, floral friezes and inscriptions in geometric pattern. Style -		
5.3	Intrinsic	The fountain was erected in commemoration of the arrival of Duke of Wellington.		
5.4	Value Classification	A(his), B(per), B(des), B(uu), E, I(sce)	Recommended grade	I
6.0		Topography		
6.1	Floors	-

8.6	Fire Precaution	-		
8.7	Other (HVAC/BMS/Security Systems)	-		
9.0		Condition		
9.1	Plinth	All the parts of the fountain are insensitively finished with oil paint. There are numerous layers of oil paint of different colors, resulting in clogging of pores. Growth of plants and algae is visible at many sections.		
9.2	Walls	-		
9.3	Floor	-		
9.4	Stairs	-		

F. Wellington Fountain				219
9.5	Openings	-		
9.6	Roofing	-		
9.7	Articulation & Finishes	Multiple layers of paint are applied on the fountain. The original material and finish cannot be identified.		
9.8	Services	-		
9.9	Out Buildings	-		
9.10	Overall Conditions	Fair	Maintenance level	Low
10.0		Transformation		
	Form	-		
	Structure	Fencing around the fountain, surrounding area is occupied by parking lot. Signage board obstructs the vision of the fountain from the Gateway of India end.		
	Articulation & Finishes	All the features are insensitively painted. The original material and finish cannot be identified.		
11.0		DP Remarks/ Perceived Threats		
		It has been demarcated for transport and area demarcated as Open Spaces.		
12.0		Additional Notes/ References/ Documents available		
		<p>Additional Notes: The fountain was erected by public subscription around 1865 to commemorate the visits of the Duke of Wellington to Bombay in 1801 and 1804. There are eight bas-reliefs on the pedestal, illustrating the Duke's many victories in battle. Sadly, this fountain, which was one of the earliest to be installed in Bombay, has been painted like other fountains in the city – a 'beautifying' effort that actually damages porous stone with the permeation of synthetic paint through its natural crevices. The parking around the fountain and the double layer of enclosing fencing have also significantly altered the pivotal quality that such monuments exert on traffic intersections.</p> <p>References: INTACH (1990) <i>Preliminary unedited listing of Unprotected Monuments, Buildings and Structures listed for Conservation</i>. 4.1	Present	Residential	
4.2	Past	Residential	
4.3	Usage	Regular in residential use	
5.0		SIGNIFICANCE & VALUE CLASSIFICATION	
5.1	Townscape(Natural/Manmade)	Part of Maharshi Karve road front, which is one of the major North-South arterial roads.	
5.2	Architectural Description	<p>Planning: It is a large building in modest Art Deco style with adequate light and ventilation. It has a void where the interior windows of the buildings open into.</p> <p>The Building rounded along the left corner, the balconies facing the main road are large rounded and project out. The balconies on the rear end of the building are projecting out and are smaller. The front gate and most of the grills of the building are still the original Art Deco style grills. The structure has a spiral service staircase.</p>	
5.3	Intrinsic	<p>Art Deco building representing its era. The various Art Deco style buildings on the newly reclaimed lands created a cohesive image. Like the Gothic buildings in their time represented the new face of the city and an expression of power, so did the Art Deco buildings and precincts symbolized the shift in expression to represent contemporary aspirations.</p>

A11		WINDSOR HOUSE	
	Common Ref no: A11 (Reviewed in 2013)		
	Card No.: A-35		
	Ward (Part) : A		
	CS No.: 1542		
	Plot Area: 988.29 sq.m.		
	B U Area: 3913.62 sq.m.		
	Date: September, 2005		
	Record by: Gauri J, Ambika K		
	Review by: Neera Adarkar		
	Int: As above Ext: As above		
	Photo Ref: A11 WINDSOR HOUSE a-c		
	1.0		
1.1	Name of Premises	Windsor House	
1.2	Earlier Name	Not applicable	
1.3	Built In: 1930s	Extension Date(if any): Not applicable	
2.0		ACCESS ROADS	
2.1	Main	Maharshi Karve Marg (Queen's Road)	
2.2	Subsidiary	Not applicable	
3.0		OWNERSHIP PATTERN	
3.1	Present	Windsor House Co-operative Housing Society	
3.2	Past	The Governor of Maharashtra (lessor)	
3.3	Status	Co-operative Society	
4.0		USE	
4.1	Present	Residential	
4.2	Past	Residential	
4.3	Usage	Regular residential use	
5.0		SIGNIFICANCE & VALUE CLASSIFICATION	
5.1	Townscape(Natural/Manmade)	Facing Oval Maidan, this precinct has buildings of same scale and foot prints. Forms part of Fort Precinct.	
5.2	Architectural Description	Belongs to the typology of Art deco building with plain facades highlighted only by a series of balconies, curved on the corners of the building, and with projecting bands/chajjas at all floor levels.	
5.3	Intrinsic	The various Art Deco style buildings on the newly reclaimed lands created a cohesive image. Like the Gothic buildings in their time represented the new face of the city and an expression of power, so too the Art Deco buildings and precincts symbolized the shift in expression to represent contemporary aspirations.	
5.4	Value Classification	Existing Grade: NA Recommended Grade: III A(arc), G(grp), I(sce)

4.0	USE
4.1	Present Entertainment and commercial
4.2	Past Entertainment and commercial
4.3	Usage Regular public use
5.0	SIGNIFICANCE & VALUE CLASSIFICATION
5.1	Townscape(Natural/Manmade) A landmark theatre building situated on the commanding junction of Maharshi Karve Marg, Jamshetji Tata Road and Veer Nariman Road opposite Churchgate Railway Terminal . Forms a part of Fort Precinct.
5.2	Architectural Description The V shaped Art Deco structure represents an excellent example of urban response to a prominent public square surrounded by the public amenities like the Oval ground, the Churchgate Railway station and the back bay Art Deco precinct. It incorporates the two wings which unite and round off at the main entrance to the theatre. The corner rising up in stepped circular profile gives the commanding character to the theatre. It is partially faced with Red Agra sandstone and the same shed of red colour is used for the finish of the mouldings and ornamental details while the rest of the structure was painted in light cream. The visual interlocking of these colours creates an illusion of height making the building seem larger.

THE VICTORIAN & ART DECO ENSEMBLE OF MUMBAI- BUILDING INVENTORY

A18	EROS CINEMA	
5.3	Intrinsic	This building was designed by Sohrabji Bhedwar and its foundations were laid in 1935. The Art Deco movement had reached its pinnacle in February, 1938 with the opening of a grand luxury cinema, the Eros is the only non-residential building to be constructed on the new plots fronting the Oval in the Back Bay Reclamation scheme.
5.4	Value Classification	Existing Grade: NA Recommended Grade: IIA A(arc), B(des), I(sce), C(seh) Under Oval Precinct, part of Fort Precinct and also under Marine Drive Heritage Precinct

7.4	Stairs	Three marble staircases with chromium handrails laid to the auditorium and balcony
7.5	Openings	Rectangular openings with wooden frames and glazed shutters
7.6	Roofing	Flat roof terrace
7.7	Articulation	The building is partially faced with Red Agra sandstone and the same shed of red colour is used for the finish of the mouldings and ornamental details while the rest of the structure was painted in light cream. The visual interlocking of these colours creates an illusion of height making the building seem larger.
7.8	Finishes	Internally and externally cement plastered and painted except for the few parts on the façade which partially faced Red Agra sandstone.
7.9	Interiors(Movable & Immovable)	The interiors are imposing with a magnificent foyer of gleaming white and jet black marble, relieved with streak of gold. There are murals on the walls painted in soft tones symbolizing India with its tropical vegetation, the dim outline of Taj Mahal and temples of south.
7.10	Compound/Fence/Gate	Not provided

5.0	SIGNIFICANCE & VALUE CLASSIFICATION
5.1	Townscape (Natural/Manmade) Part of the road front of Kum. Jethi.T.Sipahimalani Marg in the Back Bay Reclamation area.
5.2	Architectural Description A modest Art Deco building with no articulation but, except the balconies with a small band of intricate concrete railings. Represents the streetscape. The projecting balconies are curved at all the corners of the building. One of the few simple Art Deco buildings where only couple of balconies is enclosed with aluminium sliding windows that destroy the Art Deco character.
5.3	Intrinsic The Back Bay Reclamation was complete in 1929, after which tenanted residential buildings mostly in Art Deco style with a large foot print and G + 5 height were constructed on the organized plots. The various Art Deco style buildings on the newly reclaimed lands created a cohesive image. Like the Gothic buildings in their time represented the new face of the city and an expression of

4.0	USE
4.1	Present Mixed
4.2	Past Residential
4.3	Usage Regular in mixed use
5.0	SIGNIFICANCE & VALUE CLASSIFICATION
5.1	Townscape(Natural/Manmade) Part of Kum. Jethi.T.Sipahimalani road front.
5.2	Architectural Description <p>Planning: It is a large building in modest Art Deco style with adequate light and ventilation. It has a void where the interior windows of the buildings open into.</p> <p>Stylistic Classification: The front façade of the building shows rectangular projecting balconies that curve around the edges. The side façade shows balconies and small windows next to them. The windows show few original chajja. The rear side of the building shows an M.S. spiral staircase which is used for services.</p>
5.3	Intrinsic <p>Art Deco building representing its era. The various Art Deco style buildings on the newly reclaimed lands created a cohesive image. Like the Gothic buildings in their time represented the new face of the city and an expression of power, so did the Art Deco buildings and precincts symbolized the shift in expression to represent contemporary aspirations.</p>

4.1	Present	Mixed Use	
4.2	Past	Residential	
4.3	Usage	Regular residential and commercial use	
5.0		SIGNIFICANCE & VALUE CLASSIFICATION	
5.1	Townscape(Natural/Manmade)	Located on a rectangular corner plot at junction of Jamshedji Tata Road, which is one of the major North-South arterial roads and Dinshaw Wachha Road.	
5.2	Architectural Description	One of the fine examples of Art Deco corner building having a circular central staircase block and rounded corners accentuated With linear curved chajjas on the facade. Unlike the other Art Deco buildings its corner has a visually interesting concave form, a feature which sets it apart from the other Art deco buildings in its Vicinity.	

THE VICTORIAN & ART DECO ENSEMBLE OF MUMBAI- BUILDING INVENTORY

A 29	RAM MAHAL	
5.3	Intrinsic	The various Art Deco style buildings on the newly reclaimed lands created a cohesive image. Like the Gothic buildings in their time represented the new face of the city and an expression of power, so too the Art Deco buildings and precincts symbolized the shift in expression to represent contemporary aspirations.
5.4	Value Classification	Existing Grade: NA Recommended Grade: III A(arc), B(des), G(grp), E, I(sce)

THE VICTORIAN & ART DECO ENSEMBLE OF MUMBAI- BUILDING INVENTORY

A35	CRICKET CLUB OF INDIA	
5.2	Architectural Description	Low rise building in moderate Art Deco character. Rounded balconies and curved corners, simple rectangular windows with chajjas compound wall and gate with Art Déco elements all painted in pastel shades of grey and white, its modest interior attribute on sophisticated class identity of 1940s.
5.3	Intrinsic	Designed by architects Gregson, Batley and King, the CCI Complex including the 40,000 capacity, Brabourne stadium was inaugurated by the Governor Lord Brabourne. This was the prime Cricket Stadium till it lost its importance to Wankhede Stadium, built in the close vicinity in 1970s. The CCI Club is still one of the elite clubs of the city. The various Art Deco style buildings on the newly reclaimed lands created a cohesive image. Like the Gothic buildings in their time represented the new face of the city and an expression of power, so too the Art Deco buildings and precincts symbolized the shift in expression to represent contemporary aspirations.

5.0			Significance & Value Classification	
5.1	Townscape (Manmade)	The building stands on Mahatma Gandhi Road facing east. It has a central main access from an arcade at ground level. It has a massive rectangular front elevation with a central void forming a small terrace at first floor level, defined by tall tapering octagonal columns on either side spanning the height from the first floor to third floor.		
5.2	Architectural Description	Planning It has a wedge shaped, roughly rectangular plan with central access from eastern side through an arcade. Different floors cater to the various departments of the bank. Parking, electric substation and AHU are located in the basement. Staircases and service areas are located on rear (western) side of the building. The building has symmetrical front (eastern) façade with an arcade on		

A40 Bank of India building		173
		<p>ground floor level. A central entrance bay defined by recessed, corbelled arches.</p> <p>Above is a high ceiling terrace at first floor level having two massive, three storey high circular columns resting on projecting cornices supported by two stone brackets.</p> <p>Central bay extends a floor higher.</p> <p>Features</p> <p>Corbelled pendant bracketed cornices above rectangular window opening at topmost floor level.</p> <p>Recessed, corbelled arches, at the central arched opening.</p> <p>Style</p> <p>It displays no specific style. Has influence of art deco, classical and vernacular styles of architecture.</p>
5.3	Intrinsic	-
5.4	Value Classification	A(arc), B (per), B (des), B (uu), E, F, G(grp) Recommended grade II A.
6.0		Topography
6.1	Floors	G + 5 with basement
7.0		Construction
7.1	Plinth	High plinth in grey ashlar masonry to accommodate ventilators for basement.
7.2	Walls	Thick load bearing external walls. Internal non-structural brick walls with RCC columns to support RCC floors.
7.3	Floor	RCC slabs with deep RCC beams.
7.4	Stairs	Five staircases totally. Two of them open well RCC staircases on north and south end of the building. Other two doglegged RCC staircases in the rear part of the building.
7.5	Openings	On either side of the central bay are rectangular windows at all floor levels recessed within the six engaged columns, which has a broad projecting cornice like the <i>chhajja</i> above.
7.6	Roofing	Partly sloping hipped roof with timber trusses. Overhangs supported by wooden brackets. Partly slightly sloping RCC slab at fourth floor level.
7.7	Articulation	Corbelled pendant brackets supporting projecting cornices.
7.8	Finishes	Exposed grey ashlar masonry externally on eastern facade. Western façade is clad with glass mosaic tiles. Internally walls are plastered and painted. Marble mosaic dado in stairwells. Flooring is of marble mosaic tiles in most of the areas.
7.9	Interiors (Movable & Immovable)	<p>Movable</p> <p>-</p> <p>Immovable</p> <p>-</p>
7.10	Compound/ Fence/ Gate	The building covers the entire plot.
7.11	Curtilage/ Unbuilt space/ Out Buildings/ Landscape	Cooling towers at terrace level. Water storage tanks for fire fighting equipment. Basement houses parking, BEST substation and Air Handling Unit of central AC system.
8.0		Services & Utilities

4.1	Present	Entertainment and commercial	
4.2	Past	Entertainment and commercial	
4.3	Usage	Regular public use	
5.0		SIGNIFICANCE & VALUE CLASSIFICATION	
5.1	Townscape(Natural/Manmade)	Prominent junction on way to the Gateway of India and facing a large public space enclosed by heritage public buildings like the Old Secretariat, the Museum and the Royal Institute of Science (now also housing National gallery of Modern Art). Forms a part of Fort Precinct.	
5.2	Architectural Description	Regal Cinema a Art Deco style building responds sensitively like Eros Cinema (which was built after Regal) to the open space surrounded by very imposing Neo classical and Neo Gothic buildings. Its outer façade occupies the entire site to create continuity of the street edge as the building turns at the corner. The façade has simple features like stepped planes highlighted by Bas - Relief work.	
5.3	Intrinsic	Regal Cinema was formerly inaugurated by Governor of Bombay in	

THE VICTORIAN & ART DECO ENSEMBLE OF MUMBAI- BUILDING INVENTORY

A41	REGAL CINEMA	
		1933. The site for the Regal Cinema was occupied by old saluting battery and lay vacant for many years after government abandoned George Wittet's plan to include the battery as a part of an imposing ceremonial avenue. The plot was finally leased to K. A. Kooka and F.H. Sidhwa. (who also owned the Capitol Cinema)

5.0		Significance & Value Classification		
5.1	Townscape (Manmade)	The building is located on a corner plot having roads on three sides. Main customer access is from Mahatma Gandhi Road on the eastern side through a wide arcade on ground level. There are two subsidiary entrances one from University Road on southern side and other one from Dr. Kane Road on western side. The West and South entries are reserved for staff.		
5.2	Architectural Description	Planning Rectangular plan with an arcade on the east side through which the building is accessed. Ground floor serves as a grand banking lobby. Staff entrances from north side staircase lead to offices on upper floors and the western entrance leads to the parking in basement. Services and toilet facilities are placed along the sides & rear. A.C. plant is located in the basement.		

N1 Standard Chartered Bank building (Grindlay's Bank)			172
		<p>Floor layout seems complicated due to internal subdivisions for functional and security concerns.</p> <p>Features Symmetrical main façade with central pediment. Yellow stone ashlar masonry with quoins, rusticated masonry. The front façade has an impressive large, plain pediment supported on six fluted circular Corinthian columns spanning first and second floor height with two square engaged columns at ends. Ground floor has rectangular simple openings and upper floors have semicircular arched openings. Ground floor has semicircular arched arcade with decorative band above. The side façade has Corinthian pilasters with predominantly semicircular arched, balustrade openings. The building has two prominent cornice bands, one at the pediment level and the second above arches. The interiors have fluted tall Corinthian columns.</p> <p>Style Influence of Neo-Classical and Baroque styles.</p>	
5.3	Intrinsic	-	
5.4	Value Classification	A(arc), B (per), B (des), B (uu), E, F, G(grp)	Recommended grade II A.

1.0		Denomination		
1.1	Name of Premises	Army and Navy Building		
1.2	Earlier Name	Army and Navy Store.		
1.3	Built in:	Commenced 1897, Completed 1904.	Extension Date: -	
2.0		Access		
2.1	Main	Mahatma Gandhi Road – Vehicular and pedestrian		
2.2	Subsidiary	A. S. D' Mello Road. – Service entry.		
3.0		Ownership pattern		
3.1	Present	Private, owned by Tata Sons.		
3.2	Past	Private, Army Navy store		
3.3	Status	Ownership with multi tenanted premises.		
4.0		Use		
4.1	Present	Departmental store on ground floor, several private offices and Department of Fisheries located on the higher floors		
4.2	Past	Exclusive Departmental store selling naval merchandise.		
4.3	Usage	Daily.		
5.0		Significance & Value Classification		
5.1	Townscape (Manmade)	Prominent building along a row of buildings facing Kala Ghoda square. Accessed from east side front façade and also subsidiary entry from west side narrow lane. Conceived as a unifying street façade and continuous pedestrian arcade with adjoining buildings in the prominent intersection of Kala Ghoda.		
5.2	Architectural Description	Planning The building occupies the entire plot leaving marginal open space with David Sassoon Library to the south and Esplanade Mansion to the North. Probably conceived as open plan departmental store. The structure is supported on a steel column grid. The building originally had a central courtyard, which was covered during major renovation work in 1950's. The arcade on the front stretches up to the street line with the central portion forming a projecting porch. Staircases are placed each to the front and rear side		

N2 Army and Navy Building			167
		<p>of the building. The rear side has two entries at either end meant to serve as service as well as subsidiary access. The top floor cantilevers out beyond the building line on the rear side and is supported on decorative brackets.</p> <p>Features Symmetrical stone dressed front façade with rich ornamental features and topped by a distinct pediment feature. Projecting central bay Various decorative elements like arched openings, cornice bands, columns, pilasters, and stone balustrades.</p> <p>Style Neo Classical with rich ornamentation on the front facade.</p>	
5.3	Intrinsic	<p>Amongst the earliest buildings to have an RCC slab construction resting on steel girders.</p> <p>Amongst the earliest to have a basement. Structural column - girder detail seems an innovative construction technique.</p>	
5.4	Value Classification	A(arc), B(per), B(des), E, F, I(sce)	Recommended grade: II A
6.0		Topography	
6.1	Floors	G + 3 upper floors with partial mezzanine to the rear side on the first and second floors. Mezzanines have been added. Presence of an elevated overhead water tank at a considerable height from the terrace level	
7.0		Construction	
7.1	Plinth	<p>The plinth rises unto two feet, constructed in dressed buff basalt. The two side facades are constructed in rough black basalt.</p> <p>A large portion of the building has a basement.</p>	
7.2	Walls	<p>External load bearing brick walls with local sandstone ashlar masonry and lime plastered internally.</p> <p>The front façade is in dressed buff basalt and light colored, porbander stone forming the projecting features and ornamentation.</p> <p>The side and rear walls are in black basalt with light colored porbander stone for projecting features.</p>	
7.3	Floor	The floors are constructed in RCC, one of the earliest examples of this type of construction, supported on steel girders. The girders rest on round plain cast iron columns.	
7.4	Stairs	Both the staircases are open well, constructed in stone slab supported (cantilevered) from the load bearing walls. Wooden members strengthen it from below. The side to the open well has wooden handrail and decorative iron railing.	
7.5	Openings	-	
7.6	Roofing	Series of pitched roof supported on teakwood trusses and covered with mangalore tiles. The central portion has an asbestos cement sheet roof being a later addition.	
7.7	Articulation	The detailing has been sculpted on stone and finished with plaster	
7.8	Finishes	<p>Dressed buff basalt and soft porbander stone as projecting features form the exterior finishing to the front façade.</p> <p>Two sides and rear façade are in black basalt along with plastered surfaces. Internally the surfaces are plastered and painted. Extensive modifications have led to various different kind of paint and texture finishes.</p>	

N2 Army and Navy Building		167
7.9	Interiors (Movable & Immovable)	Movable: - Immovable: Multiple decorative cast iron objects e.g. spiral staircase, brackets, etc.
7.10	Compound/ Fence/ Gate	External wall of the building forms the compound on the front and rear side. The sides along the north and south have low stone compound with iron railing above.
7.11	Curtilage/ Unbuilt space/ Out Buildings/ Landscape	-
8.0		Services & Utilities
8.1	Lighting	Large door and window openings provide ample daylight, certain portion of corridor and staircase seems inadequately lit, supplemented with electric lighting.
8.2	Ventilation	Natural ventilation through large windows, forced ventilation using air conditioners. Internal passages are inadequately lit.
8.3	Electricity	BEST
8.4	Water Supply	MCGM
8.5	Drainage (Plumbing & Sanitation)	MCGM
8.6	Fire Precaution	Absence of integrated fire fighting system though individual tenanted offices have installed smoke detectors, fire alarms, etc.
8.7	Other (HVAC/BMS/Security Systems)	Presence of central air-conditioning system for the departmental store at the ground floor. Several offices have installed window and split unit air-conditioners. Absence of integrated security system for the whole building. Installation of the air conditioning plant on the terrace of the first floor.
9.0		Condition
9.1	Plinth	Good
9.2	Walls	Good
9.3	Floor	Good- The floor seems to be stable in most places.
9.4	Stairs	Good
9.5	Openings	Good
9.6	Roofing	Good
9.7	Articulation & Finishes	Good
9.8	Services	Good
9.9	Out Buildings	Good
9.10	Overall Conditions	Good Maintenance level: Good
10.0		Transformation
	Form	No change
	Structure	Mezzanine floors have been added. The building originally had a central courtyard, which was closed during major renovation work in 1950's
	Articulation & Finishes	Detailing has been insensitively painted.

5.0		Significance & Value Classification					
5.1	Townscape (Manmade)	Prominent corner building located at the S. P. Mukherji Chowk, with its wings on the Madam Cama Road, and Mahatma Gandhi Road The building is placed along a row of buildings with uniform scale on Madam Cama Road and is surrounded with buildings of different styles and periods including the YWCA, St. Annes School on the south and Wellington fountain to the east. The curvilinear building form is a site response, with its main entrance from south side of Madam Cama Road. It forms the vertex to the two wings of the Institute of Science. The curved building with its dominating entrance dome forms an important landmark in the urban scape.					
5.2	Architectural Description	Planning The building is circular in plan with an extended porch at the intersection facing the Wellington fountain.					

N4 Sir Cawasji Jahangir Hall- NGMA		156
		<p>The circular built space has a continuous verandah around with staircases on both sides beyond which Institute of Science building continues.</p> <p>The present renovation to turn it into a museum has semi circular galleries on split-levels with a central void.</p> <p>The portion below the topmost gallery is designed as a lecture hall with an inbuilt projector room.</p> <p>The space below the shallow dome forms a large circular gallery. Central air conditioning unit, store and offices are placed below the gallery on the rear side.</p> <p>Features</p> <p>The front has a large magnificent opening framed by two large ornate stone piers with a pair of ionic columns supporting entablature. Semi-circular arched openings with ornate keystone all around the ground floor verandah. Double storied colonnades punctuate the upper portion, with horizontal lintel stone openings and carved balusters and projecting cornice bands.</p> <p>The front porch with double colonnaded front and side piers support arched openings on the two sides.</p> <p>The two projecting blocks enclosing staircases are well composed in stone masonry punctuated with large openings and a projecting balcony at the first floor supported on highly ornate brackets.</p> <p>Style</p> <p>The building displays features of the Renaissance Revival style of architecture</p>
5.3	Intrinsic	This was the first cultural hall dedicated to the people of Bombay.
5.4	Value Classification	A(arc), A(his), A(cul), B(per), B (des), B (uu), D(bio), E, F, G(grp), I(sce)
		Recommended grade: I
6.0		Topography
6.1	Floors	G+3
7.0		Construction
7.1	Plinth	The plinth is very low, constructed in buff basalt in regular courses.
7.2	Walls	The walls are stone load bearing masonry, including arches, piers, etc. The verandah walls are in shallow dressed courses.
7.3	Floor	The original flooring in verandahs and lobbies is supported on stone arches. The renovated art gallery has ribbed floors supported on additional columns and shear walls.
7.4	Stairs	Two Staircases. Both the staircases are open well, constructed in stone slab supported (cantilevered) from the side load bearing walls with a wooden handrail and decorative cast-iron railing.
7.5	Openings	Ground floor verandah has semicircular arched openings, upper levels have flat stone lintels. The curvilinear verandah wall has openings with teakwood doors and windows. The projecting staircase block has openable glazed paneled windows. Small circular fixed glass panels at the upper part of the shallow dome.
7.6	Roofing	Circular shallow dome in concrete, central portion raised to accommodate openings for light. The surrounding verandah and staircase slab has a flat roof with terrace.

N4 Sir Cawasji Jahangir Hall- NGMA			156
7.7	Articulation	Ornate key stone detail of the semicircular arched opening. Cantilevered projecting balcony supported on ornate stone brackets at the staircase entry. The overlapping stone courses spanning the horizontal lintel opening indicate sound construction technique.	
7.8	Finishes	External building facade and verandahs are dressed in buff basalt, internally the surfaces are plastered and finished in Plaster of Paris. Gypsum board panels used within the galleries. Verandah and lobby areas have marble flooring whereas the renovated galleries have wooden flooring.	
7.9	Interiors (Movable & Immovable)	Movable - Immovable Marble statue of Sir Cowasji Jehangir at the entrance lobby.	
7.10	Compound/ Fence/ Gate	Originally very low stone verticals with iron chain connectors served as compound fence. Presently a stone wall with high iron railing is built in between the original stone verticals. High iron gates with decorative motif atop on both sides of the porch.	
7.11	Curtilage/ Unbuilt space/ Out Buildings/ Landscape	Underground water tank and an electrical transformer in the open space to the south of the entry. Plant and shrub growth around the entrance porch.	
8.0		Services & Utilities	
8.1	Lighting	Artificial lighting throughout the building as it serves as an enclosed gallery space.	
8.2	Ventilation	Large central air conditioning system for the gallery spaces.	
8.3	Electricity	BEST	
8.4	Water Supply	MCGM	
8.5	Drainage (Plumbing & Sanitation)	MCGM	
8.6	Fire Precaution	Smoke detector and fire alarm system with fire fighting equipment has been installed.	
8.7	Other (HVAC/BMS/Security Systems)	Audio-visual camera surveillance system, private and state security guards Large central air conditioning plant	
9.0		Condition	
9.1	Plinth	Good- organic growth and weathering has deteriorated the stone courses.	
9.2	Walls	good - rainwater seepage has led to deterioration of stone masonry in the staircase block. The interior is modified with gypsum board panel for exhibition.	
9.3	Floor	Fair - original upper floor dismantled and redesigned	
9.4	Stairs	Good	
9.5	Openings	Good	
9.6	Roofing	Good	
9.7	Articulation & Finishes	Good	
9.8	Services	Fair	
9.9	Out Buildings	-	
9.10	Overall Conditions	Good	Maintenance level Good

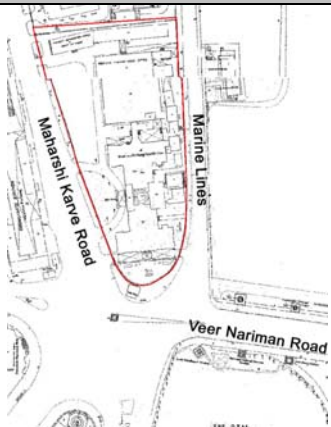

N4 Sir Cawasji Jahangir Hall- NGMA		156

5.0		Significance & value Classification			
5.1	Townscape (Manmade)	Prominent building located at the junction of Maharshi Karve Road and Veer Nariman Road The building is a city landmark on an important and busy junction, dominating the skyline of the Churchgate area. The building is juxtaposed between buildings of different styles and periods of Architecture, forming an important nature of the townscape of the city. The building overlooks Oval Maidan in front with, row of Art Deco buildings and Victorian Neo-Gothic buildings like University building, Secretariat building, High Court and on its either side. The structure stands on the site of an old gate within bastions of Fort and is thus integral to the history of Bombay.			
5.2	Architectural Description	Planning Indeterminable Features			

I1 Western Railway Headquarters		163		
		<p>The building is constructed in grey basalt stone with a central dome rising above.</p> <p>The unique central tower has been designed to be square from the base up to 100 feet in height, then becoming an octagon that gradually diminished into a smaller octagon culminating in a circular masonry dome.</p> <p>Multiple smaller domes form the skyline with finial like features at the top.</p> <p>Window openings have semicircular and pointed arches in various sizes with ventilators above</p> <p>Narrow smaller acoupled arched openings with the arches supported on yellow stone circular column with corinthian capitals form one of the significant features of the facades.</p> <p>Continuous bands at each floor level, decorative bands, dentils, quatrefoil arched openings, lion carved in stone atop the gable ends, gable ends with large rose window are some of the integral features displayed on facades.</p> <p>The two porches on the western and southern facades provide additional strength and character to the building.</p> <p>Stevens placed the representation of 'Engineering' in Bath stone atop the central gable. The group comprised a lady accompanied by two children on either side, with her holding a locomotive engine in her right hand and supporting herself on a wheel to her left. Seven other carved figures in Porbunder stone of griffins holding the BB&CI monogrammed shield were placed on the smaller gables.</p> <p>The central statue was commissioned from the studio of Roscoe Mullins of London together with two carved medallion portraits of Colonels French and Kennedy, the pioneers of the Company, which were placed in circular panels between the arches of the carriage porch on the west.</p> <p>Style The building shows evident influence of Indo Saracenic style of Architecture</p>

		Additional Notes: Frederick William Stevens designed the building on simple lines, with the total effect determined by the outline and massing. The building, with a length of 276 feet along the western façade and a central tower rising to 160 feet, has a facing of coursed blue basalt stone with the domes, mouldings, capitals, columns, cornices and carved enrichments in Porbunder stone, white Kurla and Dhrangadhra red sandstone. Later, when these weathered badly, they were replaced with facsimiles in bronze, crafted by C Burns. The embellishments were prepared by Mr Gomez and students of the School of Art under the supervision of the Principal, Mr Greenwood. The contractors for the foundations were Gamajee Balajee and Company and those for the superstructure Jagooji Hanmantrao and Company. The coloured	

I1 Western Railway Headquarters	163
	<p>Maw's tiles, marble and coloured glasswork were executed by Sorabji Warden & Company while the contractors for the drainage and water supply and fittings were Richardson and Cruddas. The entire open ground both in front and behind the main building was laid out as a garden, separated from the road by ornamental railings and gates. The total cost of the building including drainage and water supply was exactly that estimated by Stevens – Rs 750,000.</p> <p>References: INTACH (1990) <i>Preliminary unedited listing of Unprotected Monuments, Buildings and Structures listed for Conservation</i>. 5.0		Significance & Value Classification	
5.1	Townscape (manmade)	The building is situated on the crescent shaped site in front of S.P. Mukherjee Chowk and the National Gallery of Modern Art with Mahatma Gandhi road forming the main access road. The main access to the building is from Mahatma Gandhi Road. The imposing presence of the building forms an important landmark of the city in the Indo-Saracenic style.	
5.2	Architectural Description	Planning The building is situated on crescent site with the rectangular building at the rear with longer façade along the Mahatma Gandhi Road. The building is ground plus two storied high with the central dome giving an additional floor height to the volume of the building. The building is made up of Kurla and basalt stone. Entrance of the building is from the center of the main building through	

12 Chhatrapati Shivaji Vastu Sangrahalaya (Prince of Wales Museum)	164
	<p>a porch, which leads to an entrance lobby which houses reception, museum shop and audio guidance area, adjacent to which is huge central atrium below the dome with projecting galleries on first floor and second floor level. On the left and right of the central atrium are the verandahs which house sculptural exhibits, flanked by Coomarswamy Hall and Indian Sculpture exhibition area respectively. From atrium main staircase leads to the first floor, behind which is the Indian Pre and Proto History section; toilets are at the left of the main staircase. At the end of right side verandah one enters the annex building, which has the museum library and Natural history section. On the first floor towards the left is the Miniature painting, decorative art, bronze, and office area, behind staircase is the exhibition area of painting, on right is exhibition gallery for Nepal and Tibet area, over the annex building there is the Maritime history section and Premchand Roychand gallery. On second floor both left and right wings have collections of European painting, with Far Eastern art behind staircase and Arms and Armour exhibit above porch area. There are two part terraces on second floor.</p> <p>Features</p> <p>It is a symmetrical building, with ends and center being emphasized by projecting bays. The central bay is huge equivalent to four regular bays; each side of central bay consists of six bays with the end bays projecting out.</p> <p>The end bays are emphasized by having onion shaped dome arising from lotus leaf and having minarets on four corners of these domes at top; the parapet along the four minarets bear floral motif and openings with <i>jalis</i>. There are two small projecting terraces at the two corners of the end bay. Ground floor has Mughal arch openings while the first floor has a projecting balcony supported on decorative Gujarat style stone brackets and having a backdrop of two minarets with <i>jali</i> parapet supported on columns around the balcony's Mughal arch opening.</p> <p>The regular bays are separated by columns. On the ground floor a huge Mughal arch opening is present above which three trefoil Mughal arch vents are present with a cornice band to mark the floor differences. First floor has a composition of three Mughal arch windows with <i>jali</i> ventilators below and <i>chajjas</i> above supported on intricately carved decorative Gujarat style stone brackets, above which part terrace is formed in second floor front which has trefoil Mughal arch high parapet with columns ending in onion shaped dome arising from lotus petals pilasters.</p> <p>The central bay projects well ahead of end bays and having an entrance porch at the center which is formed of pendentive dome topped by <i>amlaka</i> and <i>kalash</i>, supported on Mughal arch openings and colonnette which is formed at the junction of two arches. Two intricately carved minarets mark the front of the porch. Central bay is further divided into three parts where the two flanking ones are identical and center bay is more ornate. The two side bays are slightly recessed from the central bay and are half the width of central bay. At the ground floor one sees small Mughal arch openings within rectangular buff stone frame; first floor has Rajput <i>jharokha</i>, second floor has <i>jalis</i> within Mughal arch openings above which Venetian dentil band is present and above which <i>chajjas</i> is supported on intricately carved decorative Gujarat style stone brackets. Above this a part terrace is formed in the third floor front side, which has high</p>

12 Chhatrapati Shivaji Vastu Sangrahalaya (Prince of Wales Museum)				164
		<p>parapet with columns ending in onion shaped domes arising from lotus petals pilasters. The center portion at ground floor has a pendentive-domed porch, first floor has a series of three Mughal arch openings and second floor has one huge Mughal arch opening. The entire central bay is recessed at third floor level and has a square base made of a series of Mughal arch openings over which the main central onion shaped dome arises from lotus petal. Surrounding the central dome there are series of minarets.</p> <p>The building uses different buff and blue basalt stone, Curla stone, limestone and gray stone. It has decorative column capitals inside and wooden galleries in central atrium. All the openings are largely Mughal arch openings but few at the rear are segmental arch openings.</p> <p>Style Building represents influences of the Indo Saracenic style.</p>		
5.3	Intrinsic	<p>The acquisition in 1915 of the collections of Sir Purshottam Mavji, the magnificent gift in 1921 by Sir Ratan Tata, and in 1933 by Sir Dorab Tata, of their valuable art collections, formed the nucleus of the museum's art section. The transfer of sculptures and coins of the defunct Poona Museum, of the collection of the Bombay Branch of Royal Asiatic society, consisting of valuable sculptures and epigraphs, and the co-operation between the board of trustees and the Bombay Natural History Society, helped in setting up the archaeological and Natural history sections.</p> <p>Currently it houses elite collection of sculptures from Gupta period, Mirpurkhas, Buddhist images, Aihole, Pauni, Pitalkhora, beside that varied collection from Indus Valley Civilization, best collection of paintings and illustrated manuscripts, Maritime heritage, Natural history has various habitat and species in display, vivid collection of decorative art in jade, wood, ivory, metal and other medium, fascinating panorama of the religious and artistic world of Nepal – Tibet, varied typology of Indian weaponry of which the main attraction is of Allauddin Khilji's <i>Khanda</i> and Akbar's cuirass with shield, has a major section on Far Eastern Art which has an iron snake of rare workmanship made by renowned Armour maker, Muni Yoshi, is today National Treasure of Japan, and exquisite collection from early collectors of European oil paintings.</p>

6.0		Topography		
6.1	Floors	G + 2		
7.0		Construction		
7.1	Plinth	High gray stone plinth with buff basalt stone edging for plinth protection.		
7.2	Walls	External wall is load bearing made of stone, buff and blue basalt stone and Curla stone ashlar masonry. Inside the walls are plastered and painted, some walls were paneled by wooden planks to avoid seepage.		
7.3	Floor	In some areas timber flooring is observed, but largely, it is in RCC supported over beams and finished with tiling.		
7.4	Stairs	Six staircases are present. Main staircase is made up of two L-shaped with common mid landing,		

I2 Chhatrapati Shivaji Vastu Sangrahalaya (Prince of Wales Museum)			164
		secondary staircase is a C-shaped staircase with open well, has an elliptical staircase in annex building and spiral staircase for terrace. Primarily all staircases are made of stone with wooden handrail and baluster. The terrace spiral staircase is decorative in cast iron. On second floor wooden railing has lamppost placed at regular intervals.	
7.5	Openings	All doors, windows and openings are Mughal arched openings but few are semicircular arched and rectangular openings. Many ventilators are present above and below of window and door, which are either done in <i>jali</i> work or glazed frame or mild steel grill. The windows are double, triple and fourth leaf with ventilators above and below the lintel and sill respectively. All windows are glazed panels in wooden frame.	
7.6	Roofing	The roof is a composition of domes, flat terraces, vaults, minarets and <i>chattris</i> . The dome is covered with ceramic mosaic chips, pendentive vaulted arches support the domes and sloping roof above the side wings.	
7.7	Articulation	All the features are in buff basalt stone especially carved stone brackets, <i>jalis</i> , Rajput <i>jharokas</i> , onion shaped or bulbous dome arising from lotus petals seen in all minarets, decorative cornice and corbels, floral motif and decorative column capital.	
7.8	Finishes	External walls are in exposed stone ashlar masonry and many places have alternate buff and blue basalt masonry specifically observed in arches and certain areas in walls. Internal walls are plastered and painted. Flooring is varied from marble pattern flooring, wooden, china mosaic on terrace, kotah and ceramic tiles. Has false ceiling done in the entire exhibition and display area.	
7.9	Interiors (Movable & Immovable)	Movable Old furniture, panels, racks, display board, showcases, benches, artifacts, prehistoric anthropological objects, weaponry, paintings, statuary, bronze gallery, ivory carvings, and all the other exhibits. Immovable Wooden columns and balusters, handrail, light fixtures.	
7.10	Compound/ Fence/ Gate	The compound wall comprises of a stone wall over which a stone baluster and railing is present over which cast iron grill work is present. Cast iron decorative entrance gate and side gates. Has carved stone gateposts.	
7.11	Curtilage/ Unbuilt space/ Out Buildings/ Landscape	Rear and side has open spaces. Many outbuildings are present like two small sheds used as storage, fountain, pump room, entrance office, ticket counter, substation, guesthouse, residence building, Jehangir art gallery, Max Muller Bhavan, and chawl type houses. The site has a well-planned landscape layout with huge garden with a beautifully sculpted statue of King George V in naval uniform by George Wade fronting the museum. On the pedestal are bas-reliefs of the foundation stone laying ceremony and the reading of the address of welcome by members of the Municipal Corporation, weaponry, statues, fountain and carved stone relief work. Presence of many old trees which forms the main feature of the garden and site.

12.0		Additional Notes/ References/ Documents available	
		<p>Additional Notes:</p> <p>The seed of this museum were sown in 1892 resolution adopted by the government of India for promotion of trade and industries, but in 1894, Lord Harris had referred to this resolution in opening address at Bombay Fine Art Exhibition. The idea remained dormant till 1904; meanwhile a representative committee was set up for the purpose. Its principal recommendation was to set up museum with an educational bias combined with a public reading room and a library. The 'Crescent Site' was recommended as an ideal site for locating the Museum. The idea got impetus in 1905, when the people of Bombay decided to commemorate the visit of the Prince of Wales of England by setting up a Museum.</p> <p>During WWII the museum was threatened the safety of the museum exhibits, and thus the major collection had to be removed out of the museum and away of Bombay. Subsequently in 1946, the task of resetting the galleries was taken up.</p>	

12 Chhatrapati Shivaji Vastu Sangrahalaya (Prince of Wales Museum)	164
	<p>Designed by George Wittet in the Indo-Saracenic style, the Museum is situated in a vast crescent-shaped compound with beautiful gardens. Yellow and blue basalt stone quarried in the Bombay region has been extensively but sensitively used in the building. The Prince of Wales laid the foundation stone in 1905 during his first visit to the city and the building was completed in 1914. During World War I the Museum was used as a military hospital and was formally opened by Lady Lloyd, the Governor's wife, only in 1923. The dome bears a striking resemblance to that of the Gol Gumbuz at Bijapur. Elements of traditional architecture have been blended extensively and aesthetically in the facade, including small bulbous cupolas on the towers, <i>jalis</i> used as infills for the Saracenic arches, Rajput style <i>jharokas</i>, brackets of Hindu temples and semi open veranda spaces incorporated in response to the climate. In short, the building is an assembly of elements from diverse sources. In 1936, an extension new wing designed by Gregson, Batley & King was added to house an amazing collection of exhibits of Natural History.</p> <p>The contents of the Museum form a crucial part of the city's cultural heritage. A large portion of the Art collection was a gift of Sir Ratan Tata, comprising paintings, Oriental arms, a unique collection of jade, china and porcelain, Indian silver and bronzes and other objets d'art. Sir Dorab Tata also presented to the Museum a collection of paintings, statuary and a collection of Mughal miniatures and several Maratha relics. The Museum also houses a fine collection of Rajput miniature paintings. A recent addition has been the collection of the legal luminary, Karl Khandalawala who was a Trustee of the Museum for several years. In the gardens can be seen a variety of Oriental bronze sculptures. There is a beautifully sculpted statue of King George V in naval uniform by George Wade fronting the museum. On the pedestal are bas-reliefs of the foundation stone laying ceremony and the reading of the address of welcome by members of the Municipal Corporation.</p> <p>References: INTACH (1990) <i>Preliminary unedited listing of Unprotected Monuments, Buildings and Structures listed for Conservation</i>. 3.3	Status	Owner - Tenant			
4.0			Use		
4.1	Present	MLA Hostel, Commercial – Shops, Offices, Restaurants.			
4.2	Past	MLA Hostel, Commercial.			
4.3	Usage	Daily			
5.0			Significance & value Classification		
5.1	Townscape (Manmade)	Prominent corner building located at the S.P.Mukherjee chowk at the junction of Shahid Bhagat Singh Marg and Nathlalal Parekh Marg. The Hostel entrance is from the east side and the other shop and restaurant entrances are from north and west side. The building form is a response to the corner site context. The building is juxtaposed with other important buildings of different styles and period, like Police Headquarters, Indian Mercantile Mansion, Regal cinema, Prince of Wales museum and Cowasji Jehangir Hall (NGMA).			
5.2	Architectural Description	Planning The building derives the 'V' shape from the shape of the site, with its two wings aligned to the access roads, enclosing an internal court. The building is accessed from three sides; East, West and North side. The north side entrance is through an elaborate extended porch. The circulating functions are located in the center, opening into an			

I3 Majestic Aamdar Nivas (Majestic Hotel)			227
		<p>atrium space with skylight above, and rear extended wings on either side. The atrium opens into terrace spaces in the front on the north side.</p> <p>The building is one single mass with taller and emphasized north side façade with tall minarets and central façade feature in front and side bays with decorative features.</p> <p>The ground floor houses some famous and old shops, and restaurants. The basement is occupied by storage area for 'Sahakari Bhandar'. The top floors are occupied by common triangular atrium space from the first floor, with extended terraces on each floor to the north side and double loaded corridors in the wings occupying offices, MLA rooms etc.</p> <p>The servants' quarters are added at the rear of the building in the service area.</p> <p>Features</p> <p>Prominent grey stone clad building with white bands defining floor levels and highly ornamented façade features.</p> <p>The North side entrance façade has an extended porch with Islamic arched openings with decorative intrados and <i>jali</i> work in the spandrels, supported on columns with decorative base and capitals. The porch has two octagonal minarets on either side with marginally projecting cornice bands, geometric pattern friezes. The porch has a terrace above with stone balustrade parapet. The other floors are setback overlooking the terrace of porch. The second and third floors have double height Islamic arched openings with triple arches within, <i>jali</i> work and turrets on either side, with terrace above. The topmost floor has its central portion has turrets on either side with fortified balustrade, flanked with two octagonal minarets on either side. The minarets are adorned with projecting corbel bands, geometric pattern friezes with star shaped opening, and chatris as watch towers on top. The side facades have a taller central wing with ground entrance with decorative arched opening with decorative intrados, projecting <i>jharokhas</i> with brackets, with the bay ending into turrets and balustrade. The recessed lined with a row of pointed arched windows recessed marginally in. The projecting bays have projecting balconies with decorative brackets. The windows have curved projecting wooden chajjas.</p> <p>Internally the triangular atrium is lined with cast iron columns with decorative brackets. Lift well walls are adorned with decorative <i>jali</i> work and floral pattern motifs. The overlooking balconies with decorative cast iron railing. The skylight is supported on steel trusses. The passage and lobby openings have arches supported on columns with decorative capitals with intricately carved intrados. The projecting bay has intricately carved ceiling and wall space with bands, friezes, and architrave.</p> <p>Style</p> <p>The building derives influence from Indo Saracenic style of architecture.</p>

4.1	Present	Mixed(the ground floor along the subsidiary road taken over by Srinivas Motors)
4.2	Past	Residential
4.3	Usage	Regular in mixed used
5.0		SIGNIFICANCE & VALUE CLASSIFICATION
5.1	Townscape(Natural/Manmade)	Part of Netaji Subhash Chandra Bose road front.
5.2	Architectural Description	<p>Planning: It is a large building in modest Art Deco style with adequate light and ventilation.</p> <p>Stylistic Classification: The building is hexagonal around the junction of the main and subsidiary road. The front façade shows no balconies but long continuous chajjas over the windows. The structure shows small rectangular balconies on the side and rear façade of the building; Small Chajjas over the windows on these facades.</p>
5.3	Intrinsic	Art Deco building representing its era. The various Art Deco style buildings on the newly reclaimed lands created a cohesive image. Like the Gothic buildings in their time represented the new face of the city and an expression of power, so did the Art Deco buildings and precincts symbolized the shift in expression to represent contemporary aspirations.

5.0		SIGNIFICANCE & VALUE CLASSIFICATION	
5.1	Townscape(Natural/Manmade)	Part of Netaji Subhash Chandra Bose road front, which is one of the major North-South road	
5.2	Architectural Description	Planning: It is a large building in modest Art Deco style with adequate light and ventilation. Stylistic Classification: The building is curved along the junction of the main and subsidiary road. The building was demolished and constructed again but it follows the Art Deco heights and few articulation styles. The facades facing the roads show glass cladding on them. Balconies on the facades facing the roads and along the curved corner are seen.	
5.3	Intrinsic	The building complements the Art Deco buildings in the area.

AD 25	MATRUCHHAYA	
4.0		USE
4.1	Present	Residential
4.2	Past	Residential
4.3	Usage	Regular in residential use
5.0		SIGNIFICANCE & VALUE CLASSIFICATION
5.1	Townscape(Natural/Manmade)	Part of Netaji Subhash Chandra Bose road front, which is one of the major North-South arterial roads.
5.2	Architectural Description	Planning: It is a large building in modest Art Deco style with adequate light and ventilation. It has a void where the interior windows of the buildings open into. Stylistic Classification: The building shows curved balconies on both corners at the front façade. The front façade shows rectangular balconies projecting out the slab of the balconies becomes the chajja for the windows. The corner small windows have independent chajjas. The side facades have small rectangular balconies which project out. The rear facades show balconies similar to the front facade. The window grills are original. The chajjas, window grills, name plates and some of the garage doors are original.
5.3	Intrinsic	Art Deco building representing its era. The various Art Deco style buildings on the newly reclaimed lands created a cohesive image. Like the Gothic buildings in their time represented the new face of the city and an expression of power, so did the Art Deco buildings and precincts symbolized the shift in expression to represent contemporary aspirations.
5.4	Value Classification	Under Marine Drive Heritage Precinct

5.1	Townscape(Natural/Manmade)	Located on a corner plot facing Netaji Subhash Chandra Road, which is one of the major North-South arterial roads.	
5.2	Architectural Description	Follows the typology of Art Deco corner building. The Chamfered corner façade enclosing the staircase block with glass windows is highlighted by vertical plaster bands rising through first to fifth floor. The balconies with rounded corners emerge from the Chamfered façade and continue on both the sides façade. The parapet walls of	

THE VICTORIAN & ART DECO ENSEMBLE OF MUMBAI- BUILDING INVENTORY

AD29	SEKSARIA	
		balconies have their plaster bands and light wooden / metal railing. However the balconies which are enclosed destroy the Art Deco character.
5.3	Intrinsic	Owned by Marwaris, a wealthy business community. The various Art Deco style buildings on the newly reclaimed lands created a cohesive image. Like the Gothic buildings in their time represented the new face of the city and an expression of power, so too the Art Deco buildings and precincts symbolized the shift in expression to represent contemporary aspirations.

3.1	Present	Shreeniwas Co-Operative Hosuing Society Limited
3.2	Past	The Governor Of Bombay, Nanalal Haridas
3.3	Status	Co-operative Housing Society
4.0		USE
4.1	Present	Residential
4.2	Past	Residential
4.3	Usage	Regular in residential use
5.0		SIGNIFICANCE & VALUE CLASSIFICATION
5.1	Townscape(Natural/Manmade)	Part of Netaji Subhash Chandra Bose road front, which is one of the major North-South arterial roads.
5.2	Architectural Description	Planning: It is a large building in modest Art Deco style with adequate light and ventilation. It has voids where the interior windows of the buildings open into. Stylistic Classification: The front façade of the building shows curved balconies which project out. The small windows next to the balconies show original chajjas over them. The side façade show small windows with original chajja. The rear façade show no balconies only windows with some original chajjas and some new chajjas. The building shows few old grills maintained in the windows.
5.3	Intrinsic	Art Deco building representing its era. The various Art Deco style buildings on the newly reclaimed lands created a cohesive image. Like the Gothic buildings in their time represented the new face of the city and an expression of power, so did the Art Deco buildings and precincts symbolized the shift in expression to represent
