AMENDMENT

Item of the Agenda	7 B State of Conservation
Amended Draft Decision	43 COM 7.B 3
Amendment submitted by the Delegation of....	Hungary
Date	2019. 07.03

TEXT

Draft Decision: 43 COM 7B.3

The World Heritage Committee,

1. Having examined Document WHC/19/43.COM/7B.Add,
2. Recalling Decision **41 COM 7B.25**, adopted at its 41st session (Krakow, 2017),
3. Welcomes the formation of an India-Bangladesh Joint Working Group (JWG) of the Sundarbans and requests the State Party of Bangladesh to keep the World Heritage Centre informed of the concrete actions and outcomes that arise from the JWG and how these will strengthen the long-term protection of the property's Outstanding Universal Value (OUV);
4. Appreciates the confirmation that any future dredging of the Pashur River will be subject to an Environmental Impact Assessment (EIA), reminds the State Party that EIAs should be conducted in line with the IUCN World Heritage Advice Note on Environmental Assessment and include a specific section on the potential impact of the project on the OUV of the property, and also requests the State Party to ensure that any dredging within the property is conducted in compliance with strict conditions that safeguard the property's OUV;
5. ~~Deeply regrets that the construction of the Maitree Super Thermal Power Plant (Rampal) is continuing,~~ [Notes with great concern reiterates its concern about](#) the likely environmental impacts of [current and future large scale industrial projects](#) ~~the Rampal power plant~~ on the property's OUV, and urges the State Party to take all necessary mitigation measures to address the concerns previously expressed by the Committee and the 2016 joint World Heritage Centre/IUCN Reactive Monitoring mission;

~~6.—Expresses concern that two coal-fired power plants (Taltoli and Kolapara) are being constructed on the Payra River, which flows into the same bay as the property, and that 154 industrial projects upstream of the property are currently active, despite the Committee’s request to ensure that any large-scale industrial and/or infrastructure developments would not be allowed to proceed before the Strategic Environmental Assessment (SEA) for the Southwest region of Bangladesh, including the property, has been completed, and **strongly urges** reiterates its request that the State Party to halt any such development activities, including for the Rampal power plant, until the SEA has been undertaken in conformity with international standards;~~

~~7.—Considers that the continued construction of the Rampal power plant, the construction of two additional power plants on the Payra River and the numerous other industrial projects in different stages of activity, together with their respective associated activities such as dredging and shipping, all taking place in the absence of the SEA, represent both an ascertained and potential danger to the hydrological and ecological dynamics which underpin the OUV of the property, in line with Paragraph 180 of the Operational Guidelines, and **decides to inscribe The Sundarbans (Bangladesh) on the List of World Heritage in Danger;**~~

~~6. Also Regrets that the National Oil Spill and Chemical Contingency Plan has still not been finalized, and also reiterates its requests that the State Party ensure adequate provision of funding and human resources for the implementation of the plan once it is adopted, and provide further information and data on the monitoring of long-term impacts from recent shipping incidents involving spills of hazardous materials in proximity to the property;~~

~~7. Further Rrequests that the State Party ~~to invite~~ invites a joint World Heritage Centre/IUCN Reactive Monitoring mission to the property to assess the state of conservation, in particular the level of threats to the hydrological and ecological dynamics which underpin the OUV of the property and recommends that this mission takes place by the end of 2019~~

~~8. develop, in consultation with the State Party, a set of corrective measures and a Desired state of conservation for the removal of the property from the List of World Heritage in Danger (DSOCR);~~

~~9.1. Also regrets that the National Oil Spill and Chemical Contingency Plan has still not been finalized, and also reiterates its requests that the State Party ensure adequate provision of funding and human resources for the implementation of the plan once it is adopted, and provide further information and data on the monitoring of long term impacts from recent shipping incidents involving spills of hazardous materials in proximity to the property;~~

~~10.8. Finally requests the State Party to submit to the World Heritage Centre, by 1 February 2020, an updated report on the state of conservation of the property and the implementation of the above, for examination by the World Heritage Committee at its 44th session in 2020 with a view to considering, in case of the confirmation of potential or ascertained danger to its Outstanding Universal Value, the possible inscription of the property on the List of World Heritage in Danger.~~
