C.	<u>Mixed Properties</u>	
455	Meteora	Greece
491	Epidaurus	Greece
485	Hierapolis-Pamukkale	Turkey

## II Nominations to the World Heritage List in Danger

### A. Bahla Fort (Oman)

Concerned by the degradation of the earth structures of the Bahla Fort that had just been inscribed on the World Heritage List, the Committee, at its last session, suggested that the Sultanate of Oman consider the possibility of nominating this property for inscription on the World Heritage List in Danger. Such a nomination was submitted by Oman on 8 February 1988.

B. Wieliczka Salt Mine (Poland)

In view of the serious degradation of this property inscribed on the World Heritage List in 1978, Poland, which anticipates restoration work over a period of thirty years, requested on 31 March 1988 that the Wieliczka Salt Mine be inscribed on the World Heritage List in Danger. Such a request had already been submitted by Poland in 1984, but at its eighth session, the Committee considered that there was insufficient geological information to evaluate the dangers facing this property.

Requests for technical co-operation have been received by the Secretariat for the above two properties (cf. document SC-88/CONF.007/9).
