

And with tourists littering & damaging

It bleached the reef! It's natural beauty was gone.

This made Patrimonito really, really, really angry!

He went back in time & told all of his friends

Patrimonito rows into Queensland, Australia.

He watches people switching electrical appliances on,

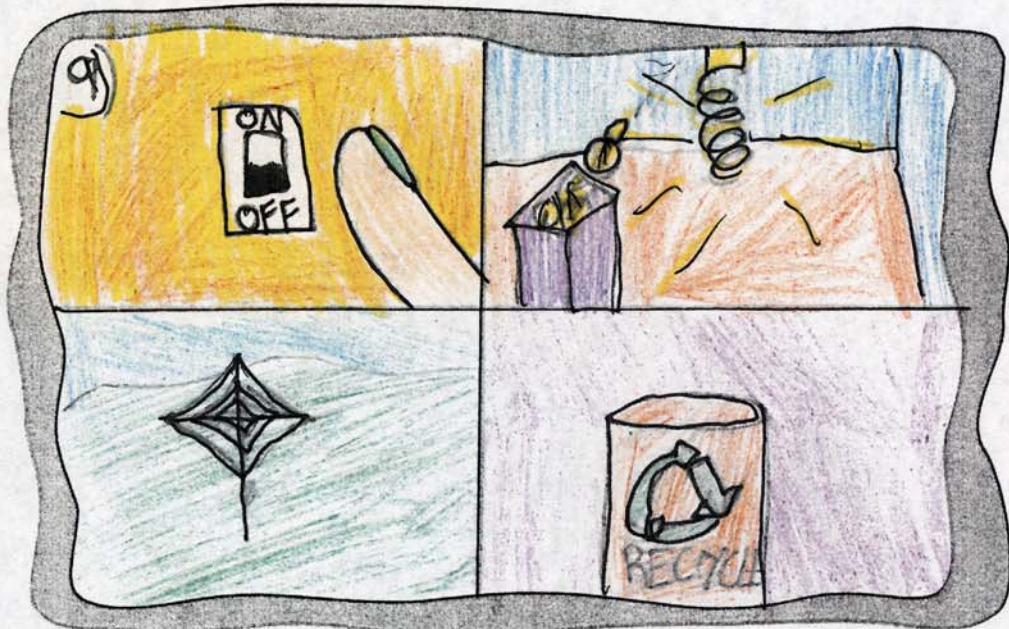

& trees being cut down.

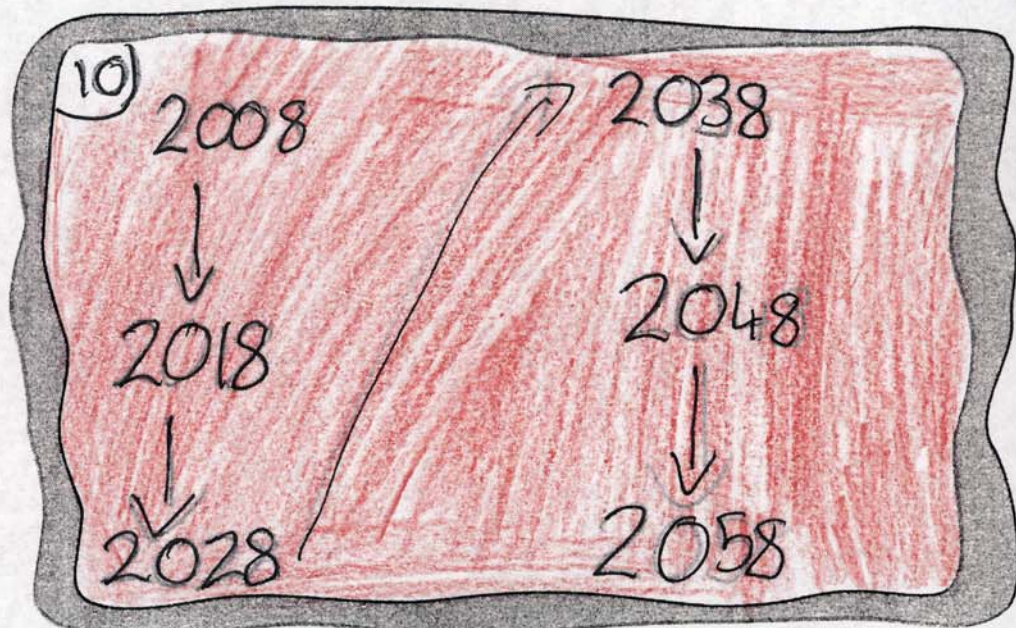

Resulting in too much carbon dioxide.

To change their ways...

In a few decades...

The reef got its colour back!

Trees also got re-planted & the earth stayed healthy & cleaner for longer.
