The Galápagos Islands: Safeguarding an archipelago of 19 major islands and a marine reserve

The Galápagos Islands, which lie off the coast of Ecuador, are a unique collection of volcanic islands stretching 1,000 kilometers (620 miles) along the Equator. The archipelago is home to a diverse array of species found nowhere else on Earth, including the famous giant tortoises, marine iguanas, and sea lions. The islands are part of the Galápagos National Park and Marine Reserve, which is one of the largest marine reserves in the world. The reserve covers 19 major islands and more than 30 smaller islets, providing a sanctuary for over 1,500 species of plants and animals. The Galápagos is also a UNESCO World Heritage Site, recognized for its exceptional biodiversity and unique ecological systems.

Tides of time
A UNESCO World Heritage marine site, the Galápagos Islands in Ecuador is known for its unique marine iguanas, penguins, and a population boom. Now regulations have been put in place to protect the islands' resources.

Ecuador's commitment to helping protect this unique place, which is home to some of the world's most fascinating and rare species, is embodied in the Galápagos National Park and Marine Reserve. The park covers an area of 19 major islands and more than 30 smaller islets, providing a sanctuary for over 1,500 species of plants and animals.

Why a Swiss luxury watchmaker wants to protect the sea
Jaeger-LeCoultre’s participation in the “Tides of Time” program is part of the company’s commitment to environmental protection. The watchmaker has a long history of supporting marine conservation efforts, and this partnership is a natural extension of their commitment. The “Tides of Time” project is a global initiative that brings together world-renowned watchmakers and environmental organizations to raise awareness about the importance of protecting the oceans.

Close encounters with marine iguanas, eels and penguins
Beneath the surface of the Galápagos, marine life thrives in an ecosystem unlike any other on earth. The area is home to a variety of species, including marine iguanas, penguins, and pinnipeds. The islands are also a popular destination for divers, who come to experience the unique underwater environment.
