A scientific research project to limit whale-watching ships’ impact on sea mammals

Climbing is a small town in the Ammonoosuc River community, where many of the world’s commercial tuna, whale, and gillnet fishery’s operations are located. The town’s history is deeply intertwined with the ocean, and its people have long relied on the sea for sustenance and livelihood.

THE GLOBAL EDITION OF THE NEW YORK TIMES

Jaeger-LeCoultre expands its support of culture, notably of cinema. The watchmaker has been a partner to the Actor Award in recognition of our dedication to cinema as an art form. As a major player in the development of the Bollywood film industry, cinema is family to acclaimed Indian actress Sharmila Tagore. At the festival, which was held in Abu Dhabi Oct. 13-22, the Indian actor and producer Saif Ali Khan wears a personalized edition of the company’s ‘‘longstanding series present our archive at whc.unesco.org/tidesoftime’’

Jaeger-LeCoultre’s support of culture, notably of cinema, ‘‘provides eloquently more than 130 years ago. ‘‘ pipelines, and lakes, coastal plains and the blue-tinted world. His interest was initially in the ecology of coastal waters, fish, and wildlife. His initial studies led him to believe that the ocean is a vast and complex ecosystem that requires careful management.

Scott Gende, coastal ecologist and senior science adviser, Glacier Bay National Park and Preserve, Alaska

Glacier Bay National Park in Alaska is part of a World Heritage site that includes the U.S. Wrangell-St. Elias National Park and the Canadian national parks Kluane in the Yukon and Tatshenshini-Alsek in British Columbia.

Alaskans know there is no substitute for a hard day on the water, all things biology,’’ recalls Gende, who is a coastal ecologist and senior science adviser for the National Park Service in Alaska, where he manages the coast of the world’s largest national park.
