

1 – 6 August 2011

WHV – Lake Malawi

● Lake Malawi National Park, Mangochi, Malawi

The 4 workshops were organised to raise awareness among participants and surrounding communities on the importance of conserving Lake Malawi as a WH Site. Participants were able to understand what is WH and possible problems that site may confront in terms of tourism and environmental matters.

Moreover, the water bank at Environment Education Centre of Lake Malawi National Park was renovated. The importance of conserving Lake Malawi National Park as a WH site was highlighted by a campaign where Chembe villagers took part.
