**Item 8 of the Provisional Agenda: Establishment of the World Heritage List
and of the List of World Heritage in Danger**

**8D: Clarifications of Property Boundaries and Areas by States Parties in
response to the Retrospective Inventory**

SUMMARY

This document presents a Draft Decision concerning the adoption of thirty-seven “boundary clarifications”, i.e. clarifications of the delimitation of properties at the time of their inscription on the World Heritage List, received from seventeen States Parties.

The boundary clarifications have been prepared in the framework of the Retrospective Inventory of nomination files of properties inscribed on the World Heritage List in the period 1978 - 1998.

Draft Decision: 38 COM 8D, see Point IV.

I. RETROSPECTIVE INVENTORY

1. The Retrospective Inventory, an in-depth examination of the nomination dossiers available at the World Heritage Centre, ICOMOS and IUCN, was initiated in 2004 and endorsed by the World Heritage Committee at its 7th Extraordinary Session (UNESCO, 2004; see Decision **7 EXT.COM 7.1**).
2. The objective of the Retrospective Inventory is the identification and collection of data such information on boundaries, serial components and area of properties in hectares for early inscribed World Heritage properties, where the available information is not adequate. This data plays a key role in different processes, such as reactive monitoring, modification of boundaries and the review of Periodic Reports for World Heritage properties.
3. Therefore, the Retrospective Inventory was initiated to gather important data on the early inscribed properties from 1978 until 1998. All documentation available at the archives of the World Heritage Centre, ICOMOS and IUCN was analysed and inventoried.

II. BOUNDARY CLARIFICATIONS

4. In the framework of the Retrospective Inventory, all maps in the nomination files and the evaluations of the Advisory Bodies were examined to identify whether they included the delimitations of the World Heritage property as inscribed. Problematic cases were subsequently presented to the States Parties concerned, which were requested to produce the missing information on the delimitation of the properties at the time of inscription.
5. Since 2004 this process has involved more than four hundred properties inscribed on the World Heritage List during the period 1978-1998.
 - 2004-2005: Nomination files of European World Heritage properties were reviewed;
 - 2006: Nomination files of Arab World Heritage properties were reviewed;
 - 2009: Nomination files of African World Heritage properties were reviewed;
 - 2010-2011: Nomination files of Asian and Pacific World Heritage properties were reviewed;
 - 2011-2012: Nomination files of properties in Latin America and the Caribbean were reviewed;
 - 2012-2013: Nomination files of properties in North America were reviewed.
6. Boundary clarifications are considered satisfactory (and are therefore presented in this document) only if they are consistent with the nomination, the evaluation of the concerned Advisory Body(ies) and the decision of the World Heritage Committee at the time of inscription and if they meet the technical requirements, i.e.:
 - are topographic or cadastral maps at the largest available scale (the choice between a topographic or cadastral map depends on the size of the property);
 - show a clearly labeled coordinate grid (or coordinate references for at least four points on the map);

- present a bar scale;
- display a legend in English or French clearly referring to the “boundaries of the World Heritage property” and/or to the “buffer zone of the World Heritage property”, if applicable.

III. BOUNDARY CLARIFICATIONS IN 2013-2014

7. At its 37th session (Phnom Penh, 2013), the World Heritage Committee requested States Parties concerned to submit all requested boundary clarifications by 1 December 2013 (see Decision **37 COM 8D**). Following this decision, letters were addressed to the States Parties concerned, asking for the missing information. Of the total of 101 clarifications received, 37 were considered satisfactory and are therefore being presented to the World Heritage Committee in this document.
8. In the annexes, clarifications are presented in alphabetical order by region (Africa, Arab States, Asia and the Pacific, Europe and North America, Latin America and the Caribbean) and by State Party. For each World Heritage property, the following elements are provided:
 - a table providing the name of the property, its date of inscription, its identification number and its area in hectares as well as the area in hectares of its buffer zone, whenever applicable;
 - a technical summary providing further details and explanations;
 - if the property is serial, a table listing the serial components and their area in hectares as well as the area in hectares of their buffer zones, whenever applicable;
 - the respective maps are available at the the following website <http://whc.unesco.org/en/sessions/38COM/documents/>
9. Boundary clarifications are presented for the following properties:
 ASIA AND THE PACIFIC:
 - China: Mogao Caves; Mausoleum of the First Qin Emperor; Lushan National Park; Wulingyuan Scenic and Historic Interest Area; Jiuzhaigou Valley Scenic and Historic Interest Area;
 - Japan: Historic Monuments of Ancient Kyoto (Kyoto, Uji and Otsu Cities);
