ÉVALUATION DE LA PROPOSITION D'INSCRIPTION DU SITE : La cathédrale de Naumburg et le paysage des rivières la Saale et de l'Unstrut – Territoires de pouvoir au Moyen Âge classique

Page, colonne, ligne de l'évaluation de l'Organisati on consultative	Phrase incluant l'erreur factuelle (l'erreur factuelle devrait figurer en gras)	Correction proposée par l'Etat partie	Commentaire (s'il y en a) de l'Organisation consultative et/ou du Centre du patrimoine mondial
Page 200, left column, line 23-26	"Evidence of the medieval past of the region survive in religious and defensive structures, relict stretches of ancient routes, remains of hydraulic arrangements,	"Evidence of the medieval past of the region survives in ensembles of monuments, which are for the most part interrelated through the visual axis and further religious and defensive structures, settlement layouts, relict stretches of ancient routes, remains of	The wording religious and defensive structures does not exclude monuments. ICOMOS considers the integration as a clarification ICOMOS notes that settlement layouts and terraced fields are
	buried traces of agrarian land organization and land use forms, toponyms."	hydraulic arrangements, still existent and visible elements and buried traces of agrarian land organization and land use forms, toponyms."	mentioned as at p. 201, left column, line 43 - 44 of the ICOMOS evaluation: "in only a relatively few cases their remains persist as tangible and visible evidence, i.e., settlement layouts, terraced fields"
Page 201, left column, line 35	"(e.g. Wenzerdorfer Brücke)."	"(e.g. Wenzendorfer Brücke)."	ICOMOS acknowledges this typing error
Page 201, left column, line 49-51	"Ancient evidence of terraced vinyards can still be well recogniced in limited areas, as the Schweigenberge vineyard, or at Klöppelberg."	"Ancient evidence of terraced vineyards can still be recognised in many areas, such as the Schweigenberge vineyard, Dechantenberg vineyard, Steinmeister vineyard and the former terraced vineyards in the south of the Köppelberg, which now belong to the forestal area of Mordtal/ Platten."	The use of the term limited concerns the size and proportion of historic vineyard areas compared to the overall size of the nominated property and to the extent of vineyards in the relevant period for this nomination (at p. 147 it is said that only the Pforte monastery "At the end of the 13th century, it was operating a total of 77 vineyards". As it is indicated in other pages of the dossier, also other monasteries and seigneurs owned vineyards so they should have been many more at the end of the relevant period.

			ICOMOS in its evaluation has pointed out the Schweigenberge vineyards as the nomination dossier highlights them as they "are among the most significant vineyards in terms of the cultural
			landscape in the whole of Germany" (p.616) and the Köppelberg vineyard, as in the nomination dossier it is said to be proven as the oldest in the application region and "still in use today for producing wine" (p. 616) However, indeed Dechantenberg, Steinmeister vineyards are mentioned in the nomination dossier as surviving ancient
			vineyards.
			ICOMOS considers that this (change from 'limited' to 'many') reflects a difference of opinion, as vineyard areas remain limited compared to the 11-13 th century extension (as described in the nomination dossier).
			ICOMOS acknowledges the typing error (Klöppelberg instead of Köppelberg)
			ICOMOS acknowledges the final additional phrase as a clarification.
Page 201, left column, line 53-right column, line 1	"In most cases, following the plagues that hit European vines in the 19th and 20th centuries, former farming patterns were largely replaced by wider plots where new vines were planted."	"In most cases, following the plagues that hit European vines in the 19th and 20th centuries, the cultivation of the new grafted vines did not lead to a widening of small plots of land, as this was not possible on the steep slopes for technical reasons."	The nomination dossier (p. 83) states that "New vines were planted after World War I and World War II, and the main portion of new vines was planted during the 60s of the 20th century. In addition to the traditional terraced vineyards which are difficult to cultivate, large-area complexes were created as well". ICOMOS phrase combines the information from the nomination dossier and from the mission and mainly refers to changes occurred to the landscape after the vines' plagues. ICOMOS however acknowledges this clarification
Page 201, right column, line 9-10	"The Kleine Saale River, a 10km-long artificial channel built in the 13th century to supply water to the	"The Kleine Saale River, a 10km-long artificial channel built around 1180 to supply water to the Cistercian monastery of Pforte,"	At p. 91 of the dossier is stated that "a weir was built in the Saale River in Wenzendorf/Kösen around the year 1180 from where a water channel was created which was ten

Page 201, right column, line 26-27	"Only four castles, built in the period relevant to the nomination, still contain structures from the 12th-13th centuries:"	"Only four castles, built in the period relevant to the nomination, still contain structures from the 11th-13th centuries:"	kilometres long and running towards Altenburg/Almrich. Since the 13th century, that channel has been known as the Kleine Saale" the name of the monastery is indeed Pforte ICOMOS accepts this correction as a factual error. ICOMOS acknowledges this typing error.
Page 201, right column, line 29-30	"forms today a rather large complex;"	"forms still today a rather large complex with walls, double-chapel, remains of the Romanesque palace and the "Dicker Wilhelm" keep;"	ICOMOS considers this corrections to be an editorial change and an integration which does not modify the meaning of the sentence.
Page 201, right column, line 34-37	"Schönburg Castle retains its original layout and some elements, such as the keep from the 13 th century."	"Schönburg Castle retains its original layout and such essential elements as the ring walls and the Romanesque keep from the 13 th century with its exceptionally carved fireplace."	ICOMOS considers this corrections to be an editorial change and an integration which does not modify the meaning of the sentence.
Page 201, right column, line 39-41	"Goseck Castle was substantially remodelled into a monastery very early and further again into an castle, so that no structure from the High Middle Age survives."	"Goseck Castle from the 9th-11th centuries was substantially remodelled into a monastery very early and then again into a castle, but the surviving archaeological evidence document the structure from the High Middle Ages."	'Archaeological evidence' is not a synonym of 'structure' ICOMOS considers this correction to be an editorial change which does not modify the meaning of the sentence.
Page 201, right column, line 45-50	"Monastic complexes were also numerous and a few still survive, although they have been modified through the centuries."	"Monastic complexes were also numerous and all – instead of the Benedictine monastery St George in Naumburg - still survive, although they have been modified through the centuries." Of the important Benedictine monastery Goseck constructed after 1041 the eastern part of the monastery church remains. Goseck belongs to the most magnificent examples of Salian church building in the	This integration by the SP refers only to the eastern part of the monastery church in Goseck and not to the monastery as a complex. This sentence is an integration that does not modify the meaning of the ICOMOS sentence The following sentence contains advocacy for the proposals made in the nomination dossier.
	"One of the most relevant is the Cistercian Monastery of Pforta, where only a few structures dating back to the High Middle Ages persist in their materiality, including the impressive minster, erected between 1251 and 1268 AD".	"One of the most relevant is the Cistercian Monastery of Pforte, where highly important structures dating back to the High Middle Ages persist in their materiality: the complete stone enclosure of the monastery grounds, important remains of individual functional buildings, the infirmary with Abbot'chapel, the monastery cemetery with stone lantern of	At p. 218 a map of the Pforte monastery, out of 26 listed, identifies two buildings, the cemetery and structures from other two buildings as dating back to the relevant period for the present nomination (11th- 13 th century). These may be considered 'a few structures' compared to 26. ICOMOS considers that 'highly important' implies advocacy for proposals made in the nomination

		the Dead, the monastery church and large sections of the enclosure. The church dates essentially from the middle of the 12th century and was modernised between 1251 and 1268. Of the unique furnishings of that time remain the liturgical furniture, a Croce dipinta, which is one of the two oldest preserved monumental Cistercian crosses in Europe from the High Middle	dossier. At p. 220 the nomination dossier states "Due to the continuously growing significance of the monastery [], the Cistercians decided soon after to implement an ambitious new building project. [] unusually concrete information is available about the beginnings and the end of that large-scale building site in the 13th century." ICOMOS considers that this
		Ages, and the oldest rose window with Grisaille painting in Europe.	sentence is not equivalent to say that the church was modernised. The following sentence is an integration to the text and does not indicate an error in the ICOMOS
Page 201, right column, line 50-53	"Another monastic ensemble is the Benedictine nun convent in Zscheiplitz, with its 13th century minster, architectural details of which parallel those in Naumburg Cathedral."	"Another monastic ensemble is the Benedictine nun convent in Zscheiplitz. Around 1100 a church was there constructed, on which around 1200 a Benedictine nun convent was established and the church was remodeled into a convent church, architectural details of which parallel those in Naumburg Cathedral, St Giles chapel in Naumburg, parish church St Mary in Freyburg and double-chapel of Neuenburg castle."	text. At. p. 239 of the nomination dossier the paragraph is titled "The minster of the Benedictine nuns of Zscheiplitz" ICOMOS considers that the editorial change from minster to 'convent church' does not change the meaning of the sentence in the same page the text reads "Benedictine convent of nuns was established in Zscheiplitz in 1203 at the latest. [] the church in Zscheiplitz was likely completed during the term of Landgrave Louis IV (1217 – 1227)." indeed in the following lines the existence of a previous church is mentioned. ICOMOS considers this a clarification the last part the sentence is an integration to the ICOMOS sentence and does not indicate an error.
Page 202, left column, line 1-2	"and Freyburg an imperial commercial centre of new foundation."	" and Freyburg is a new systematic strategic foundation of the Landgraves of Thuringia at the turn of the 12th to the 13th century."	ICOMOS accepts this as a factual error
Page 202, left column, line 10-15	"However, not much survives from the High Middle Ages beyond the cathedral and the religious architecture: only the Haus zu Hohen	"However, not much survives from the High Middle Ages beyond the cathedral and the religious architecture: only the "Haus zur Hohen Lilie" is preserved, under the layers of subsequent	At p. 419 of the nomination dossier is stated "a basement register has been kept since 1995, in which 114 late and post-medieval basements under the existing plots of land are documented alone in the western

	Lilien preserves, under the layers of subsequent modifications, the walls of a romanesque tower and portions of the town fortifications and gates date back to the 14th-15th century."	modifications, the walls of a Romanesque tower, portions of the town fortifications, several Romanesque basements and gates, that date back to the 14th-15th century."	part of the city" and also "Basements from the Romanesque times [] have been retained in individual cases only (Hohe Lilie, Jakobstraße 5)." In ICOMOS view "late and postmedieval" does not correspond to high medieval and "individual cases" does not correspond to several.
Page 202, left column, line 16-26	"Freyburg was a newly founded fortified town, with a regular layout and grid-based road network with the market place at its centre, dating back to	"Freyburg was a newly founded fortified town with a regular layout and a grid-based road network with the market place at its centre and the great parish church of St Mary in the eastern part dating back to the Romanesque period"	ICOMOS considers the first an integration that does not indicate an error
	the Romanesque period." Evidence of the building layout can be gained from the analysis of building cellars. Expansion of the town outside its walls started as early as the beginning of the 15th century. Remains of buildings from the 11th-13th centuries are very limited and consist mainly of vestiges incorporated in cellar walls. The town walls and gates mainly date to the 14th-	Evidence of the settlement layout - "planned city" - and the building layout can be gained from the analysis of building cellars. The surviving Romanesque cellars with their portals are valuable examples of early town development. Expansion of the town outside its walls started as early as the beginning of the 15th century. Remains of buildings from the 12th-13th centuries are consist in the Romanesque parish church St Mary and many Romanesque cellar walls and portals. The town walls and gates, whose course corresponds to the Romanesque town fortifications, mainly date	ICOMOS considers the second a clarification At p. 280 nomination dossier "While at least the rounded barrel vaults of the cellars at Markt.2 and 14 and/or Oberstraße 1 were built during the Romanesque/Late Romanesque period, most of the other vaults were probably built in at a later point in time." At p. 283 of the dossier there is a map indicating the romanesque cellar structures. ICOMOS wishes to point out that the description was meant to highlight the residential/ secular built fabric and not on the religious
Page 202, left column, line 27-31	"Some surviving examples of typical blind alley settlement forms are said to date to prior to the High Middle Ages; these are complemented by linear and radial settlement forms	from the 14th-15th centuries." "In the outlines of the villages there are, alongside different smaller types in line form (Fränkenau), blind alley form (e.g. Eulau, Weischütz, Punschrau) or in the form of a group of farms (Lengefeld), villages with large linear (Flemmingen) and radial planed forms (Großwilsdorf) or	buildings ICOMOS considers the first sentence as a clarification.
	(Grosswilsdorf, Punschrau is in the buffer zone), apparently evolved from blind alley layouts."	combinations thereof. They reflect today vividly the development of the High Middle Age colonisation in the German-Slavonic "contact zone" and were at the same time a center of gravity under the new settlement areas."	ICOMOS considers the second sentence as an integration containing advocacy for the proposals made in the nomination dossier.
Page 202, left column, line 32-33	"Several churches survive within the area and the most important	"Several churches survive within the area and the most important is the Naumburg Cathedral, the only	ICOMOS considers that this integration does not point out any error.

	is the Naumburg	church in the world with two choir	
	Cathedral."	screens from the 13 th century."	
Page 202, left column, line 36-39	"crypt, the choir, the three-bay transept with its portal, the choir screens and, more importantly, the 13 th century glass paintings, and the sculptures of the founders, associated with"	"crypt, the western choir and parts of the eastern choir, the three-bay nave, the transept with its portal, the main parts of the eastern towers and the north western tower and the first two floors of the south-western tower, the choir screens. Of outstanding value are the concept and layout of the western choir with the 13th	At p. 146 of the nomination dossier it is written "Apart from the hall crypt and the choir, the three-bay transept is one of the oldest parts of the new cathedral building" at p. 152 the nomination dossier mentions "Two nearly completely preserved choir screen structures from the first half of the 13th
		century glass paintings, and the twelve sculptures of the founders and the western rood screen, associated with"	century". ICOMOS considers this correction on choir screens a clarification
			ICOMOS considers that the sentence "of outstanding value are the concept and the layout of the western choir" contains advocacy for the proposals made in the nomination dossier
			as for the rood screen, see ICOMOS response above.
Page 202, left column, line 45-48	"The former immunity precinct can only be reconstructed through historical records and the structure of cadastral parcels although the bishop's and the capitular curiae still exist."	"The former immunity precinct is for the most part visibly preserved in its medieval extent, through settlement layout, structure of cadastral parcels, Romanesque cellars and remains of the precinct walls. Outstanding high medieval monuments are the Romanesque residential tower of the Bishop's curia, the St Giles curia with its two-storey chapel and the episcopal St John's chapel at the Cathedral cemetery."	At p. 192 of the nomination dossier it is stated "Based on the gates of the cathedral precincts recorded in the written sources and on the course of particular parcel boundaries, the boundary of the immunity as it had formed in the High Middle Ages can be reconstructed." therefore ICOMOS considers this integration as a clarification ICOMOS considers that the word "Outstanding" implies advocacy
20016			ICOMOS considers the integration as a clarification.
Page 202, left column, line 49-54	"Other important churches are the minster of the Benedictines in Goseck, and the minster of St Maurice's monastery of the Augustinian canons, which was remodelled into gothic forms in the 15 th century. 		patronage of the arts and church foundations.	
Page 203, left column, line 16-17	"The region then came under the control of the Wettin family, where it remained until 1815."	Through the dying out of the Ludowingers (1247) the region came under the control of the Wettin family, where it remained until 1815."	ICOMOS considers that this integration does not modify the meaning of the sentence
Page 203, left column, line 18	"It was with the Wettins that the Naumburg cathedral was founded and that lost its condition as frontier land, as this dynasty provided long-lasting stability in the wider central German region."	"It was with the Ekkehardiner family and emperor Conrad II and pope Johannes XIX that the episcopal seat was moved from Zeitz to Naumburg and the Naumburg cathedral was founded in 1028 AD.	At p. 302 of the nomination dossier it is written that in 1028 AD the bishop's seat was moved, not that the cathedral (as a building) was founded. At p. 321 of the nomination dossier is written "the Wettin family – who were closely related to the Ekkehardines" and then "As early as the late 11 th century, there was a Wettin bishop of Naumburg – Bishop Günther (1079 – 1090). Together with his mother, Countess Berchta, and his brothers, Counts Dietrich of Brehna and Wilhelm of Camburg and the latter's wife, Countess Gepa, he was one of the revered first founders of Naumburg Cathedral, who are portrayed [] by the founder statues and in the glass windows of the Naumburg west
		As a result of further developments the Saale-Unstrut region lost its condition as a frontier land in the 12th century. Since the beginning of the 14th century the Wettin dynasty provided long-lasting stability in the wider central German region."	ICOMOS therefore notes that even according to the nomination dossier the Wettins played a role in the foundation of the Cathedral at p. 325 of the nomination dossier it is stated "Upon political unification of the Central German region after 1247, initiated from the margraviate of Meissen, [] the foundations were laid for further development of the Saale-Unstrut area as part of the larger political unit of the Wettin state with its estates of the realm. Thus the Saale-Unstrut region had lost its specific character as an area for which numerous rulers had battled as well as its special status as an independent transfer and bridging landscape." ICOMOS acknowledges this correction as a clarification.
Page 203, left column, line	" private tenants."	" state, municipal and private tenants."	ICOMOS acknowledges this clarification

ICOMOS considers that this integration does not indicate an error but it reflects a difference of opinion on the extent of the
			similarities between the two cultural landscapes and areas.
Page 204, left column, line 39	"experimental character of elements of the cathedral."	"experimental character of elements of the cathedral." However, in Naumburg there is no comparable secular castle as in Durham. Furthermore, in Durham there are no connections established with the fortified and religious buildings of competing rulers of the High Middle Ages available within view or interdependence with the surrounding cultural landscape.	ICOMOS considers that this integration does not indicate an error, but it reflects a difference of opinion on the extent of the similarities between Durham and Naumburg areas.
Page 204, left column, line 48-51	Other European territories, from England to France and Italy, exhibit a similar concentration in small enough areas, of towns, monasteries, castles with seigneurial functions.	Other European territories, from England to France and Italy, have had a similar concentration in small enough areas, of towns, monasteries, castles with seigneurial functions. However, there is no region in an extension from approximately 10 km from the north to the south and from the west to the east, where all this monuments and elements in such a density and high quality are still visible existing like at the Saale-Unstrut region.	ICOMOS considers that this reflect a difference of opinion ICOMOS considers that the corrections re-iterate arguments/ justification put forward in the nomination dossier that have been fully considered. It also reflects a difference of opinion
Page 204, right column, line 31	"castles, etc."	"castles, etc." However, it should be to observe that the Cathedral of Brixen underwent a completely new construction in the 18 th century and the Old Town is characterized too by Baroque. Bolzano first became an episcopal seat in 1964, Klausen exhibits almost no visible substance from the High Middle Ages, which, with the exception of the pilgrim's hospice Klösterle also applies to Neumark. Compared with the landscape at Saale and Unstrut the period of the High Middles	The comparison was made between two territories and their pattern of development and not between two cathedrals. Bolzano has been mentioned in the ICOMOS evaluation as a market town and not as an episcopal seat. ICOMOS considers that this integration does not indicate an error but it reflects a difference of opinion on the extent of the similarities between the two

		Ages does not dominate the landscape.	areas.
Page 204, right column, line 35	"fortifications linked to the need for territorial control"	"fortifications linked to the need for territorial control" However, it should be observed that here it concerns a transport link from Roman times, which established itself as one of the most important Alpine passes from the Middle Ages until the 19th century. This is why most of the monasteries and other monuments found here, have not preserved the layout of the High Middle Ages. Furthermore, no Bishop's church exists from this period.	ICOMOS considers that this integration does not indicate an error.
Page 204, right column, line 39	"mean to acquire territorial control and attract population."	"mean to acquire territorial control and attract population." However, there is nothing to compare with the situation found at Saale and Unstrut with its density of two High Middle Ages cities, episcopal seat, Cistercian monastery, castle of landgraves etc. within a small area in preserved condition.	ICOMOS considers that the corrections re-iterate arguments/ justification put forward in the nomination dossier that have been fully considered.
Page 204 right column, line 44	"of villages, towns, castles, abbeys and cathedrals;"	"of villages, towns, castles, abbeys and cathedrals." However, despite all comparable appearances it have to be stated that Narbonne and Carcassonne were both elevated to bishoprics in Roman times and therefore entirely different structures and circumstances are present compared with the landscape at Saale and Unstrut, which was not significantly characterized until the High Middle Ages. Authentic High Middle Ages architecture, sculpture and furnishings as can be seen at the Naumburg Cathedral, the Cistercian church Pforte or Neuenburg Castle is not present within a comparable small area there.	ICOMOS considers that this integration does not indicate an error.
Page 204, right column line 48	"devoted to vineyards."	"devoted to vineyards." However, it should be to observe that from the period of the High Middle Ages in the Bishop's city of Macon neither the cathedral nor any other notable monuments are preserved. Many monasteries as Cluny or Citeaux were destroyed during the French Revolution. Furthermore, no comparable	ICOMOS considers that this integration does not indicate an error.

	1	density of	
		density of monuments and cultural landscape elements from this period exist in the surrounding area of Macon.	
Page 204 right column, line 54	"this history"	"this history" However, it must be stated that Canterbury and Rochester are the oldest episcopal seats in England from the beginning of the 7 th century and in the case of Canterbury it is able to look back on extensive classical traditions. Due to these very different starting points there seems little point in a comparison with the dominant cultural landscape of Saale and Unstrut characterized in the 11 th – 13 th centuries."	ICOMOS considers that this integration does not indicate an error.
Page 205, left column, line 19	"communication and trade routes in Germany".	"communication and trade routes in Germany although in the decision of the 26 th session of the World heritage Committee about the OUV of the Upper Middle Rhine Valley is nothing mentioned about its relevance for the High Middle Ages. The confirmed OUV for the world heritage properties of Old Town of Regensburg with Stadtamhof and the Town of Bamberg is limited of their urban importance for Europe but contains nothing about the cultural landscape around the both towns.	ICOMOS considers that this integration does not indicate an error.
Page 205, Left column, Line 28	"Reichenau."	"Reichenau", but a cultural landscape for the period of the High Middle Ages is up to now not listed.	ICOMOS considers that this correction contains advocacy for the proposals made in the nomination dossier.
Page 205, Left column, Line 29-36	"In the case of this nominated property, the comparative analysis itself demonstrates that the power and borderland exchange dynamics and their tangible manifestations in the High MiddleAges were commonplace throughout Europe are already represented on the World Heritage List through a variety of properties, particularly from Germany, and including cultural	"In the case of this nominated property, the comparative analysis itself demonstrates that the power and borderland exchange dynamics and their tangible manifestations in the High Middle Ages were commonplace throughout Europe but there is no other region where the variety of this tangible manifestations are so well preserved still today as in the region on the rivers Saale and Unstrut. No cultural landscape of this theme is already represented on the World Heritage List neither in Germany nor elsewhere. No map with a wider scope on the surrounding region has been provided so as to compare the target area with other ones in the vicinity.
			ICOMOS considers that what was expected was different
Page 210, right column, line 14-23	"For the cultural landscape to be appropriately protected, the property should be declared under the Monument Protection Law of the state of Saxony-Anhaltbut these protection will only come into being if the property is inscribed on the World Heritage List. This will only apply to the nominated area, leaving the buffer zone unprotected from a	"For the cultural landscape to be appropriately protected, the property is already declared under the Monument Protection Law of the state of Saxony-Anhalt so that all cultural monuments and their surroundings are protected. In addition the nominated historical cultural landscape is recognized as a memorial area as soon as it is placed on the world heritage list. This will only apply to the nominated area, in turn the buffer zone is protected from a cultural landscape perspective via the protection of the cultural monuments shown there."	ICOMOS notes that the correction provided by the State Party states that the protection granted by existing declaration cover the monuments and their surroundings. The correction confirms that the nominated cultural landscape is not currently protected. The cultural landscape framework plan — the key instrument for the protection and management of the property — was yet to be developed at the time this evaluation was finalised. ICOMOS considers this a clarification.
	cultural landscape perspective."		
Page 210, right column, line 25-31	"the nominated property includes many other items (abbeys, castles, churches) and some of these are protected as isolated monuments, archaeological sites or historic urban centres."	"the nominated property includes many other items (abbeys, castles, churches) and all of these are protected as historical monuments, archaeological cultural monuments or historic urban centres and village centres as historical sites."	At p. 453-54 of the nomination dossier it is stated "Numerous cultural monuments and archaeological site monuments in the area nominated for the World Heritage along the Saale and Unstrut rivers are already registered in the monument list of the Federal State of Saxony-Anhalt." Numerous is not all.
			ICOMOS considers this is new information that cannot be taken account of at this stage.
Page 210, right column, line 53-57 Page 211, left column, line 1	"that the current legal protection ensures the protection of individual monumentsbut is not adequate to protect the overall cultural landscape and its related features."	"that the current legal protection ensures the protection of individual monumentsbut is adequate to protect the overall cultural landscape and its related features." 	1720-26, and a wooden banqueting house was built at the highest point of the Jægersborg Dyrehave, subsequently replaced in brick by the Eremitageslottet (Hermitage Palace) in 1734-36.	Gribskov in 1720-26. A wooden banqueting house in Jægersborg Dyrehave from c. 1690 was replaced in brick by the Eremitageslottet (Hermitage Palace), built at the highest point of the park in 1734-36.	
Page 151; Column 2; Line 46	Programmes to reintroduce deer since the early 20 th century have made possible the reactivation of regulated hunting.	Programmes to reintroduce deer from the park into the surrounding landscape have since the early 20 th century made possible the reactivation of regulated hunting even outside the park.	ICOMOS ackowledges this clarification.
Page 152; Column 2; Line 24	For instance, considering hunting landscapes as a prerogative of absolute monarchs is not grounded in the evidence attested to by the comparative analysis itself (e.g., the Bois de Tillet was owned by and designed for the Dukes of Orléans, the Forêt de Chantilly was designed for hunting under the Prince of Condé, and the hunting park of Gatchina was created for Count Orlov, long before the property passed to Grand Duke Paul's ownership).	(e.g., the Bois de Tillet was owned by and designed for the Dukes of Orléans, the Forêt de Chantilly was designed for hunting under the Prince of Condé, and the hunting park of Gatchina, which was laid out by Grand Duke Paul before he was crowned as an emperor).	ICOMOS notes that there are divergent opinions on this point.
Page 156; Column 1; Line 51	Currently the relevant legal instruments include: the Danish Forest Act (LBK 945/2009), which also includes concerns for landscape and cultural history, and establishes the 300m 'forest protection zone', which covers unbuilt areas encircling forests; the	Currently the relevant legal instruments include: the Danish Forest Act (LBK 945/2009), which also includes concerns for landscape and cultural history; the Nature Protection Act (LBK 933/2009), protecting natural habitats and ensuring that	ICOMOS acknowledges this error.

Page 5 (305)	"the work has not been undertaken on the basis of evidence of what existed before it became a ruin"	The rehabilitation design was based on the archaeological investigation results as well as art historical research. The rehabilitation project design was preceded by the arthistorical research. One of the factual evidences, leading to the decision on the shape of the roof, apart from the existing building structure with the preserved gables, was an historical engraving by the Swiss traveler Diubua De Monpere from 1833 that gives detailed view of the Academy building before the collapse of the roof. Furthermore, the detailed archaeological investigations of the interior of the Academy did not reveal any evidence, e.g. column basements, arched stones, etc., that would suggest the different shape of the roof. Therefore, taking into account the need for preservation of the building and restoring its public function, it was decided to install the light and reversible wooden roof structure, with the ceramic tile cover. The tiles were discovered during the archaeological works and therefore were suggested as most appropriate roof cover	ICOMOS considers that this reflects a difference of opinion.
Page 5 (305)	"ICOMOS considers that	based on factual evidence. The academy:	ICOMOS considers that the

for its management are proposed in the Management Plan for the Gelati Monastery WHS. The national legislation (law on Cultural Heritage, 2007 art. 36¹) sets the regulations for visual and physical protection of the listed buildings. The current buffer zone of the property has been based on the enlargement of the standard 1 km Visual Protection Area by the Decree of the Minister of Culture and Monuments protection #03/5 09.01.2014. The further improvement of the legal protection on the territory of the buffer zone will be provided following the adoption of the Management Plan of the property approved.

¹Article 36. Determination of an Individual Protection Zone of a Monument, its Comprising Areas and Regime

- 1. An individual protection zone of a monument shall be the area around an immoveable monument, which contains physical and visual protection areas and is established for the purposes of physical and visual protection of a monument.
- 2. The area of physical protection of a monument shall be the area around an immoveable monument, in which any act may inflict physical damages on the monument or its surrounding area. The physical protection area shall be determined as the height of the monument multiplied by two but not within fifty metres radii.
- 3. Any activity in the area of physical protection which damages or creates a threat of damage or worsens its interpretation and use shall be prohibited, including:
- 4. such acts that will cause significant land vibration or deformation;
- 5. storage of chemical, easily inflammable and explosive materials;
- 6. the erection of such structures, which do not serve the protection of a monument and its environment:
- 7. planting of those species and in such fashion which may inflict damages on a monument.
- 8. The area of visual protection of a monument shall be the area beyond the area of physical protection, the change of which may have impact on the historically set environment or/and high-quality interpretation of a

future actions which cannot be assessed at this stage.

		monument. An area of visual	
		protection shall be determined as:	
		9. 300 metres radii for	
		monuments;	
		10. 500 metres radii for	
		monuments of national significance;	
		11. 1000 metres radii for	
		monuments inscribed on the World	
		Heritage List. 12. If a monument is located	
		within the city, the distance indicated	
		in sub-paragraphgraphs a and b of	
		paragraph 4 of this article shall be	
		reduced by two.	
		13. Activities in an area of visual	
		protection that will inflict damages on	
		a historically set environment of a	
		monument and impair its optimal	
		vision, its high-quality interpretation or diminish its significance are prohibited.	
		For the determination of the height of a	
		monument for the areas indicated in this	
		article shall be considered its maximum	
		elevation, while the distance from the	
		monument to the boundaries of a	
		protection area shall be counted from the	
		external contour of a monument towards the radius from the centre of the	
		monument.

Page 3, Column 1, Paragraph 3, Line 12	123 units are intact but only around 40 still inhabited. Other <i>Kiches</i> are used as a management centre, guest house, restaurant, handicraft shop, workshops, child centre, etc.	11 quarters and about 400 <i>Kiches</i> have been recognized which most of them are still inhabited. Some <i>Kiches</i> are used as a management centre, guest house, restaurant, handicraft shop, workshops, child centre, etc.	ICOMOS acknowledges this clarification
Page 3, Column 1, Paragraph 11, Line 46	This nomination is based on the agro-pastoral transhumance system of moving flocks of sheep and herds of cattle to different pastures following the new grass and other plants as they emerge in the spring and summer months. Near the summer pastures, terraced fields grow crops of wheat and barley.	In this type of lands, gardening is prevalent. But in terraced fields fruit trees are planted and it should be noted that terraces allocated to the cultivation of wheat and barley are different from gardening terraces. Only in years with abundant precipitation, dry farming is carried out in these fields.	ICOMOS acknowledges this clarification
Page 3, Column 1, Paragraph 8, Line 32	Although no detailed information has been provided in the nomination dossier on the layout, or construction of the 51 qanats mentioned in the nomination dossier, a research project has identified the qanats, and well and set out remedial proposals for their problems. It is understood that currently only two are still working.	Despite the report sent on behalf of Iran regarding the number of running qanats, unfortunately it has been mentioned again that only two qanats are still operating. Actually the mistake might be related to the two qanats of the troglodyte village which are still in use but it should be noted that within the whole cultural landscape the number of	ICOMOS accepts this correction as a factual error.

		running qanats is considerably	
		more.	
Page 6, Column 1, Paragraph 2, Line 4	ICOMOS considers that as a landscape that reflects transhumance Maymand is interesting for the way it is connected with troglodytic winter quarters. The overall system of transhumance and troglodytic structures is found in one small valley and is sustained by a very small community of some fifty families. It is difficult to say that this highly specialized adaptation to agropastoralism in a very small area can be considered as a reflection of a cultural tradition or civilization.	Some two hundred families are living in cultural landscape of Maymand.	ICOMOS accepts this correction as a factual error.

The Nature Conservancy, Jamaica Intellectual Property Office, Ministry of Foreign Affairs and Foreign Trade (MFAFT). (NRCA is the Board that governs the activities of NEPA, no consultations were held with NRCA)	IUCN accepts this correction as a factual error. Proposed text edit should delete Natural Resources Conservation Authority (NRCA).
Page 73; column 1; paragraph 3;	Threatened plant species include Podocarpus urbanii (CR), Eugenia kellyana (CR), Psychotria danceri (CR), Schefflera stearnii (EN), Miconia pseudorigida (EN), Ardisia brittonii (EN), Carica jamaicensis (VU), Cinnamodendron crticosum (VU), Dendropanax blakeanus (VU), Hernandia catalpifolia (VU), Ilex puberula Proctor (VU), Ilex vaccinoides Loes (VU), Lunania polydactyla (VU), Rondeletra elegans (VU), Wallenia fawcettii (VU), Samyda glabrata (VU), and Ternstroemia (VU), and Ternstroemia Howardiana (VU). Native mammals are poorly represented in Jamaica with only one non-flying native species (a rodent known as Coney or Hutia) and a few bat species.	Threatened plant species include Podocarpus urbanii (CR), Eugenia kellyana (CR), Psychotria danceri (CR), Schefflera stearnii (EN), Miconia pseudorigida (EN), Ardisia brittonii (EN), Carica jamaicensis (VU), Cinnamodendron corticosum (VU), Dendropanax blakeanus (VU), Hernandia catalpifolia (VU), Ilex puberula Proctor (VU), Lunania polydactyla (VU), Rondeletia elegans (VU), Wallenia fawcettii (VU), Samyda glabrata (VU), and Ternstroemia howardiana (VU). Native mammals are represented in Jamaica with one non-flying native species (a rodent known as Coney or Hutia) and 21 bat species.	IUCN considers this to be a clarification although accepts that "a few" is not the best word for 21 species of bats. We do not particularly object to the proposed rewording, since this is not a central point in the evaluation, but we consider that it is

			factual that there is relatively low mammal
			diversity, in common with many islands.
Page 74; column 2; paragraph 1	Key pieces of legislation applicable today include the Natural Resources (National Park) Act (1993) and its regulations; the Forestry Act	Key pieces of legislation applicable today include Natural Resources Conservation Authority Act (1991) and its National Parks	IUCN acknowledges this clarification and accepts this correction as a factual error.
	(1996); the Natural Resources Conservation Authority Act (1991) and the Protected National Heritage under Jamaica National Heritage Trust Act (1985).	(1993 and 2003) Regulations; the Forestry Act (1996); the Natural Resources Conservation Authority Act (1991) and Protected National Heritage under the Jamaica National Heritage Trust Act (1985).	We would propose a slightly different text edit to that put forward by the SP as it repeats the Natural Resources Conservation Authority Act (1991):
		The majority of the existing Forest Reserve was first protected in 1928 under the Afforestation Law of 1928.	"Key pieces of legislation applicable today include Natural Resources Conservation Authority Act (1991) and its National Parks (1993 and 2003) Regulations; the Forestry Act (1996); and Protected National Heritage under the Jamaica National Heritage Trust Act (1985).
Page 75; Column 2, Paragraph 4	Whilst the NGO led management system provides a strong foundation for participative planning and management, community-based groups or local cooperatives in support of environmental management and sustainable agricultural practices are absent or appear to have a low degree of formal organization. The management and decision-making referring to the (uninhabited) nominated area does not recognizably involve local residents with the exception of the Maroon.	Whilst the NGO led management system provides a strong foundation for participative planning and management community-based groups or local cooperatives in support of environmental management and sustainable agricultural practices appear to have a low degree of formal organization however community outreach, education and training are scheduled for implementation to increase their capacity. The management and decision-making referring to the (uninhabited) nominated area (which is the Preservation Zone of the National Park) is captured within management of the wider National Park. It involves through an Advisory Committee both local and Maroon residents. The Maroons are also involved at the	IUCN acknowledges this clarification and considers this correction to be an editorial change which does not modify the meaning of the sentence. We do not object to this wording, which is consistent with the IUCN evaluation. The point being made is that more needs to be done to engage and empower local communities.

ÉVALUATION DE LA PROPOSITION D'INSCRIPTION DU SITE : Montagnes Bleues et monts John Crow

Page, colonne, ligne de l'évaluation de l'Organisation consultative	Phrase incluant l'erreur factuelle (l'erreur factuelle devrait figurer en gras)	Correction proposée par l'Etat partie	Commentaire (s'il y en a) de l'Organisation consultative et/ou du Centre du patrimoine mondial
Page 21; line 4	The Cultural and Natural Heritage of the Blue and John Crow Mountains encompasses a rugged and densely-wooded mountainous region in south-east Jamaica that offered refuge to Maroons (escaped slaves) and the tangible cultural heritage associated with the maroon story	The Cultural and Natural Heritage of the Blue and John Crow Mountains encompasses a rugged and densely-wooded mountainous region in south-east Jamaica that offered refuge to Maroons (former enslaved Africans) and the tangible cultural heritage associated with the Maroon story	ICOMOS notes that the nomination dossier mentions the fact that the phenomenon of Maroonage was not limited to Africans but also to the Taino indigenised population who was enslaved by the Spaniards before Africans deportation. Therefore the formulation 'former enslaved' encompasses human groups of different origins and not only Africans. However, the proposed locution 'former enslaved' better reflect the condition of maronage. ICOMOS acknowledges this as a clarification.
Page 23, column 1, paragraph 3; line 3	The tangible Windward Maroon cultural heritage revolves around the routes and places associated with the fighting and the signing of the Nanny Town Treaty with the British in 1739, and form the cultural core of the nominated property, in combination with the rich natural heritage which provided refuge to the Maroons and made possible their fight against colonial oppression.	The tangible Windward Maroon cultural heritage revolves around the routes and places associated with the fighting and the signing of the Peace Treaty with the British in 1739, and form the cultural core of the nominated property, in combination with the rich natural heritage which provided refuge to the Maroons and made possible their fight against colonial oppression.	Nanny Town Treaty is a locution which was found used in the additional information provided by the SP in November 2014 (p. 21 of the document 'Jamaica's response). ICOMOS considers that this correction provides information that contradicts information provided at earlier stages of the evaluation procedure.

However, the most important among these places, namely Charles Town, Scots Hall and Hayfield, have all been declared protected national heritage and will be treated as 'satellite sites' related to the nominated property.	ICOMOS acknowledges this typing error
Page 30, column 2; paragraph 4, line 2	The nominated property is managed by a pool of bodies: the Jamaican Conservation and Development Trust (JCDT), the Forest Department, and the National Environment and Planning Agency (NEPA).	The nominated property is managed by a pool of bodies: the Jamaica Conservation and Development Trust (JCDT), the Forestry Department, and the National Environment and Planning Agency (NEPA). The management structure includes the Jamaica National Heritage Trust	ICOMOS acknowledges these typing errors
Page 32; column 1, paragraph 2, line 3-4	ICOMOS observes that building a sensible monitoring system for the tangible cultural heritage of the nominated property requires baseline data, which does not seem to be currently available.	Baseline data, does exist and is available, but is continually updated as more information is gathered.	ICOMOS assessment on the lack of baseline data is based on the documentation presented in the nomination dossier and on the findings of the mission and refers specifically to the immovable tangible attributes relevant for the cultural significance of the property. ICOMOS considers that this either reflects a difference of opinion or provides new information that cannot be taken account of at this stage.
Page 32; column 1, paragraph 2, line 3-4	As for intangible heritage, ICOMOS considers that any monitoring and monitoring indicators	The ACIJ/JMB is continuing its collaboration with the Maroon communities (which began over forty years ago) through initiatives	ICOMOS' statement is restricted to monitoring and monitoring indicators for intangible heritage within the

should be set up in conjunction with the Maroon communities that hold the necessary knowledge of its manifestations.

currently being pursued as part of the action plan coordinated by the organisation under the aegis of the UNESCO funded Intangible Cultural Heritage Project. This is included in the current and future work plans of the ACIJ/JMB as outlined in its Corporate and Operational plans and is subject to continuous review.

Another major action is the expansion and updating of existing inventories of Intangible Cultural Heritage. It is envisaged that as part of this action, the database of Maroon ICH will be further expanded utilizing the Audio Visual Information Data Access (AVIDA) database. Workshops have already been held with community members on the use of this technology and plans are in train to continue the process so as to:

86, continue to encourage the systematic documentation, cataloguing and archiving of ICH elements of the Windward Maroons; and 87, enhance the technical capacity of members of the community to actively engage in the process of inventory building.

The intention is for the database to provide both access to the bibliographic data about the collection as well as links to digitized items. It will enable researchers within and external to the community to search and retrieve information from files in the digital repository both on site at the Maroon Cultural Centre in Moore Town, the ACIJ/JMB library as well as on line.

The ACIJ/JMB will also, through periodic field visits, monitor and evaluate the state of the traditional cultural practices of the Maroon communities, using indicators developed in conjunction with them.

overall management and monitoring system for the nominated property, which did not appear to have been developed yet during the evaluation period. The recommendation is meant to sustain the involvement of maroon communities in this specific task.

ICOMOS nevertheless welcomes the new information that cannot be taken into account at this stage concerning the ACIJ/JMB that will also, through periodic field visits, monitor and evaluate the state of the traditional cultural practices of the Maroon communities, using developed indicators conjunction with them.

The ACIJ/JMB has also been instrumental in assisting the Charles Town Maroons to receive funding for its 2015 conference	
set to take place in June.

need to be re-drawn to boundaries of this sacred mountain landscape made in	-
reflect recognizable should be drawn to ensure the full expression of nominat	ion
natural features; and the Outstanding Universal Value and the integrity dossier.	
that the rationale for and authenticity of the property. Therefore, they	
the scope of the buffer tried to include in the boundaries of the proposed	
zone needs to be clearly property not only natural features but aspects of	
defined. the property that reflect tangible and intangible	
values of OUV.	
The boundary of the Great BurkhanKhaldun	
Mountain landscape includes such natural	
features as the sources of the Onon and Kherlen	
rivers, sacred Onon hot springs, the areas which	
are a home to rare and endangered animals and	
plants, sacred mountains, lakes, rivers, and as well	
as such cultural attributes as the sacred ovoos,	
pilgrimage route, some burial sites and so on	
which embody intangible expressions of the site.	
In nomadic culture the visual dimension of the	
sacred mountain is important. However, in the	
nomadic cultural space sacred mountains in	
Mongolia traditionally do not have the precisely	
delineated protection boundaries. Sacred	
mountain usually belongs to the certain group of	
people who have been living around and sometimes in far distances from this mountain.	
Most of the nomadic herders come to the sacred	
mountain riding horses, providing their offerings	
and saying prayers. Other people worship sacred	
mountain at a distance, from their localities or	
households. In these nomadic senses the visual	
dimension of sacred mountain is not so closely	
linked to the boundaries of protected areas and	
the boundary usually unrelated to the contours	
and natural features of the property. In such case,	
specialists consider to draw the boundaries of the	
nominated property and its buffer zone in exact	
following every contour, relief and natural	
features is not necessary and even such the	

		delineation is more complicated in some	
		situations. As mentioned before, because there	
		are not original and precisely delineated	
		boundaries of sacred mountain specialists have	
		drawn the boundaries of proposed property by	
		straight linesconnecting the tops of the highest	
		mountains and hills located around the nominated	
		area.	
		Therefore, State party considers that the	
		boundaries of the nominated property and of its	
		buffer zone are rational and suited to the	
		adequate management activities in specific	
		sacred landscape environments.	
		On these rationale and argument the State party	
		asks to consider the nominated boundaries as	
		same as proposed in the nomination dossier.

p.32, left column, 16 line from bottom	The nomination dossier is titled "The First Property of the Serial Transnational Nomination - Landscapes of the Dauria". IUCN notes, however, that the subject of this nomination is not a serial property as the areas comprising the nomination are contiguous, albeit transnational".	The Parties do not agree with the experts' conclusions because the purpose of the title was emphasizing the very prospect for the nomination development with the help of including new areas into it in future (attached figure 1). Presently the first cluster is included into the nomination, which is most appropriate individually not only to the understanding of the point of the World Heritage property but to the requirements of the Operational Guidelines for the Convention implementation. Particularly, to the requirements of management and integrity (Paragraph 137 c) of the Guidelines). Besides, this very presentation of serial nominations given by the State Parties is described in Paragraph 139 of the	IUCN considers this correction to be a clarification, and not a factual error. IUCN's statement is factually correct pertaining to the nomination before 39COM. It does not comment upon the longer term intention to progressively add to this site, and only at that point would this be a serial nomination.
p. 32, right column, 19 line from bottom	"While the nominated property is said to represent the "steppe compartment" of the Daurian ecoregion, the	Guidelines. The statement about the ecoregion's position between boreal taiga and droughty steppes refers right to the entire	IUCN considers that this reflects a difference of opinion, and not a factual error.
	nomination states that the outstanding attribute of the Daurian ecoregion is that it is the only region in the world where the transition from	ecoregion that has the total area approximately equal to one tenth of the area of the European continent. And the forest steppe as it is described by the experts	The nomination dossier states that "The Daurian ecoregion is the only region in the world where

circumboreal taiga forest biome to temperate continental grassland biome remains under completely natural conditions. While grasslands and wetlands are well-represented in the nomination. the transition from forest to steppe, and the presence of Daurian "forest steppe" (particularly hills on which the northern side is forested and the southern side just is grassland) are very poorly represented within the nominated area".

occupies a relatively small part of the ecoregion. The nomination is not aimed to represent absolutely all landscapes in the region but only the most valuable ones, which correspond to criteria ix and x. Most intensely the cyclic changes of the climate and their impact on the biota, which are the grounds for criterion ix, are revealed exactly in the nominated part of the ecoregion and especially vividly - in the closed drainage basin of the Torey lakes. The nominated site includes elements of all the landscapes, although represented not proportionally. Among them is expositional forest steppe with tree vegetation and a complex of flora and fauna species characteristic of a certain type of steppe. Besides, the forest nomination is presented as serial suggesting inclusion of other landscapes further on, forest steppe ones among those. The division of the nomination in some stages is determined by the necessity, among others, of the complicated work on observing the requirements of the Guidelines about ioint management of the property. At present only the site presented in the nomination meets this requirement, the site is, in our opinion, of its own global value.

the transition of the ecosystem complex from the circumboreal taiga forest biom (sic) to the temperate continental grassland biom remained completely under natural conditions."

The evaluation concludes the nominated property does not contain sufficient attributes to demonstrate this transition in its own right. IUCN has evaluated the nomination submitted. The ลร evaluation highlights a number of other areas which could be considered to strengthen the case for this aspect: notably Onon-Balj National Park, possibly Ugtan Nature Reserve and Toson Khulstai Nature Reserve in Mongolia, and Sokhondinsky National Park in Russia.

p.33, left column, 21 line from top It is difficult to identify the most significant area for the Mongolian Gazelle, especially movements of these animals do not appear to follow a specific pattern and do not show fidelity to any given range. The Daursky SNBR and the Valley of Dzeren, located at the edge of this species' range, is reported as the only place where this species breeds in the Russian Federation. The species also breeds in China but has been much reduced in numbers, migration has been blocked by the border and the fenced **Ulaanbaatar-Beijing**

Long-term research shows that Mongolian gazelles have permanent routes of migration (Fig. 10 of the dossier, p. 56), which can change constrainedly under unfavorable conditions.

It is necessary to note that the emphasis in grounding criterion x (section 3) was made on the fact that the nominated area includes the main **transboundary** migration routes of the dzeren, which remain in the whole of the species range (page 55-56, 65 of the nomination dossier). Only there (westward of Lake Barun-Torey) migrations between the two countries remain annual and significant (tens of thousands

IUCN considers this correction to be a clarification and that it reflects a difference of opinion, not a factual error.

All this information was taken into consideration in evaluation. Statements here support the IUCN position that the site is not optimally configured to support Gazelle migratory routes and that such а nomination would look very different.

IUCN concluded only a minor part of the Gazelle

railway line. The main breeding grounds for the gazelle are now in Mongolia.

heads). In the other parts of the Russian-Mongolian border migrations are either limited by artificial obstacles or historically insignificant and not annual. In all parts of the Mongolian-Chinese border by the present time all migrations have ceased due to the construction of the line of engineering technical structures in 1994-97. That, together with the other anthropogenic factors, has led to almost complete disappearance of the species in China. By 2014 in China only some heads lived (as reported by Liu Songtao - deputy director of Dalai Nor **Biosphere** the Reserve).

The nominated site does not comprise most of the important habitats of the dzeren in Mongolia but there was not such a task. The species home range occupies too vast a territory and stretches far beyond Daurian ecoregion. Nevertheless, with the further expansion of the serial nomination "Landscapes Dauria" some key ranges of the North Kherlen population of the dzeren (attached fig.1) will fall under protection. Among those will be important migration routes of permanent character, and maternity houses of this population, which will provide its long-term conservation.

The regimes of the buffer zones are set by legislative acts of different levels. For Mongolia - by the law about buffer zones of SPNAs, for Russia – by the federal law on SPNAs and by individual regulations on buffer zones (Annex B4 and B6). The regime set within the buffer zone of the Daursky reserve in its strictness corresponds to the protection regime of such official category of SPNAs, as zakaznik or refuge (IUCN category IV). There is a certain regime of restrictions providing observance of the ecosystems integrity the Mongolian buffer zone too. Besides, in the world there are

migration routes is included. This is the statement that was provided by the States **Parties** in material field provided to the and then evaluators. submitted later to IUCN: "Most of area of local dzeren grouping of concentrated near Torey hollow is included into the Property and its buffer zone. But key habitats of North-Kherlen population of dzeren are really out of the nominated territory. So the nominated territory secures the Torey grouping during all the year and seasonal migrations North-Kherlen population. As the "Landscapes of Dauria" is the first part of the planned serial nomination key the (breeding) summer habitats of North-Kherlen population can be included into the nomination in the future." It also does not appear to

It also does not appear to be a factual error with respect to the statement on Gazelle in China. No evidence is presented to suggest it does not still breed in China.

IUCN considers this correction to be a clarification and that it reflects a difference of opinion, not a factual error.

The IUCN evaluation is not suggesting that the Operational Guidelines require areas to equate to IUCN PA categories. The assessment, however, is that the current level of protection does not meet the requirements set out in the OG. This is because over 70% of the nominated property is designated as

p.34, right column, 5 line before the table 2.

p.35, left column, 19 line from bottom As shown in Table 2, different protected areas are categorised as different IUCN management categories and the buffer zones are uncategorised, in fact they would not comply with the IUCN definition of a protected area.

A significant percentage of the nominated property comprises the designated buffer zones of protected areas and these areas are subject to relatively weak levels of legal protection. IUCN considers the protection status does not meet the requirements of the

The reserve gave fire-fighting equipment to the surrounding villages, seminars are held on training in fighting steppe fires.	that "the States Parties report that between 4-18% of steppe burnt each year, in the period 2012-14" as per the figures provided. As there is agreement that this is a serious issue, then these figures do not greatly impact the analysis of this issue. The field evaluation also notes: "While fires used to occur once in several years, nowadays they occur once, twice or even more times in one year,
			and they are mainly caused by human activity, e.g. careless spring agricultural burning and inappropriate handling of fire".
p.37, left column, 5 line from bottom.	Poaching is another issue that threatens species such as Mongolian Gazelle, Swan Goose and Grey Wolf. While poaching is a major threat in the Russian Federation, in recent years it has expanded to Mongolia as well.	But within the nominated area there is no this threat in Russia altogether and there is almost no in Mongolia (birds are not hunted in Mongolia traditionally). On the contrary, elimination of this factor in the course of the last 15 years, which demanded a lot of efforts, enabled to restore the dzeren in the Daursky reserve and in the other parts. In Mongolia within the Mongol Daguur protected area the factor of poaching has been eliminated too. In the buffer zone little threat still remains but it is much lower than in the surrounding areas. One of the wolves marked with a satellite collar within the property moves freely from one country to the other using the regime of the SPNA; all his pack successfully survives (figure 2 attached). Totally not less than 15-20 packs of wolves live within the property. However, the Parties agree with the IUCN remark about the necessity to rise the budget and the staff of the protection service of the protected area "Mongol Daguur"	IUCN considers that this reflects a clarification. IUCN would maintain that poaching is a relevant threat to mention in the evaluation. IUCN considers that this suggested correction contains new information that cannot be taken account of at this stage. The conclusion on poaching is based on evidence gathered from the field evaluation.

them is insignificant but they will also be equipped in 2016. Besides, 2 dangerous lines outside the property have already been equipped, and further on this work will be done in the vast territory outside the property and its buffer zone. However, the configuration According to Paragraph 94 of the IUCN considers that this p.38, left column, 20 line Guidelines integrity of the area reflects a difference of of the property does not include adequate areas of opinion, not a factual from top referred to criterion ix means that forest steppe to the area should provide natural error, and IUCN stands by demonstrate the transition occurrence of all evolutional its evaluation on the point from the boreal taiga forest processes forming the nominated raised. biome to the temperate phenomenon. The nominated continental grassland biome area comprises all the key As per the point above, the which is also deemed as a elements that demonstrate the nomination is clearly not, central aspect of its change of the ecosystems as a at this stage, presented as Outstanding Universal result of climatic cycles and serial. It states a future Value. providing unimpeded natural intent to become a serial course of these processes, and it nomination. is this but not the presence of all the transitional landscapes from taiga to desert that is a ground for OUV of the area. In the 3) these nomination (part features of the selected area are described in detail. Absence of larger forest compartments in the nomination at present does not influence the course of these processes. We remark once more that the position between the zones of taiga and semi-desert refers to all of Dauria ecoregion. The phenomenon of the area designated as a property consists in the fact that it is right there but not northward or southward where the most remarkable reformation of the ecosystems in the course of climatic cycles revealed in the change of the exterior appearance of the ecosystems occurs and in the species usage of wonderful adaptations for survival in different climatic conditions. the nomination is Besides. presented as serial, which assumes inclusion of both forest steppe and steppe compartments in future that will supplement the presented area. The set regime of management and protection of the area provides natural course of these processes.

p.38, left column, 22 line from bottom

again refers to forest steppe which is hardly represented in the nomination. Botanically there are areas of grassland with a different species composition which might be termed forest forest steppe, although steppe should include trees, particularly the phenomenon where trees grow on the northern sides of hills and grassland on the southern slopes. In this sense, forest steppe does not appear to be present in the nominated property.

...justification for criterion (x)

p.38, left column, 5 line from bottom

p.38, right

from top

column, 18 line

The property's boundaries are not configured to include the summer territories and only very little of the autumn migration routes of the dzeren.

In addition the protection management and requirements are not met in relation to this criterion.

The main argument grounding criterion x is the key ornithological importance of the area (which is reflected in the recommendations of determined by its location in the narrowing of the birds global significant part importance. provided

IUCN considers that the suggested amendments reiterate arguments put forward in the nomination dossier that have been fully considered, and are not factual errors.

for

IUCN)

IUCN also considers that this reflects a difference of opinion.

The relevant points are also discussed above, and IUCN considers that its evaluation is justified on this point.

migration routes (including the of the populations not less than 15 species, 6 globally rare among those) and by habitation of more than 10 globally rare bird species, for whom it is steppes and wetlands that are of key Preservation of ornithological value of the area is by the proposed boundaries of the property. The importance of the area for preservation of transboundary migrations of the dzeren, as well as restoration of the northern boundaries of the historic range of the dzeren is a significant but additional argument. The experts say about absence of true forest steppe compartments in the nominated area. That is not so. Expositional forest steppe is present in the Adon-Chelon **sector**, it is supposed to include new parts of forest steppe, as well as the parts important for conservation of the North Kherlen population of the dzeren with the expansion of the nomination presented as serial. However, even now within the property there are the sites of not only fall migrations but also of summer habitation of the northern groupings of the dzeren, which was noted by the experts themselves above. The nominated area comprises all main types of grass ecosystems of north Dauria. The set regime of protection and management of fully provides the area preservation of the species inhabiting it, facilitates the increase in their numbers, which proved by the fact of restoration of the habitation of dzeren and Siberian marmot in the border zone of the Russian

part of the area, as well as by	
permanent habitation of globally	
rare species of birds. Besides, as it	
was noted by the experts, the	
work is under way on expanding	
the protected areas, which will	
enable to make the activity on	
biodiversity conservation even	
more effective.

	archaeological and natural sites within	Urbanism)	
	the property and buffer zone.		
Page 329, column 1, line 15	The Neolithic settlement of Cukurici Hoyuk marks the southern edge of the former estuary, now well inland.	Mound	ICOMOS considers this correction to be an editorial change which does not modify the meaning of the sentence.
		and the Great Theatre (its	
Page 329, column 1, line 21	Excavations and conservation over the past 150 years have revealed grand monuments of the Roman Imperial period lining the old processional way through the ancient city including the Library of Celsus and the Great Theatre.	construction goes back to Hellenistic period, it is not solely a Roman architecture. The present day appearance is due largely to renovation in Roman Imperial times.)	ICOMOS acknowledges this clarification.
Page 329, column 1, lines 29-34	Criterion (iii): The Ancient City of Ephesus is exceptional testimony to the cultural traditions of the Roman Imperial period as reflected in the monuments in the centre of the Ancient City and in Terrace House 2, with its wall paintings, mosaics and marble panelling showing the style of living of the upper levels of society at that time. (The draft statement of criterion (iii) covers only Component 2 and does not reflect the site's values in terms of its long settlement history as it is also recognized by the ICOMOS report – reference to the page 323, column 1, lines 3-8 and page 324, column 2, lines 22-24.	Criterion (iii): The Ancient City of Ephesus is exceptional testimony to the cultural traditions of the Hellenistic, Roman Imperial and Early Christian period as reflected in the monuments in the center of the Ancient City and Ayasuluk. Hellenistic monuments can be seen in the 9 km long defensive wall on the mountain sides as well as the planimetric design of the city grid according to the principles of Hippodamus. A settlement structure developed in the Hellenistic period that shaped the region until the late middle ages. The cultural traditions of the Roman imperial period are reflected in the outstanding representative buildings of the city center including Celsus Library, Hadrian Temple, Serapeion and in-Terrace House 2, with its wall paintings, mosaics and marble paneling showing the style of living of the upper levels of society at that timeIts surrounding is an outstanding witness of the Christian heritage and tradition of this region. Church of St. Mary, Byzantine Palace, Grotto of	ICOMOS considers that the corrections re-iterate arguments/ justification put forward in the nomination dossier that have been fully considered. In the interests of brevity ICOMOS has focused on the key attributes for each criterion. The site's values in terms of its long settlement history are covered in the brief description. The proposed detailed description is too long for a Statement of OUV. However ICOMOS suggests that the draft statement be expanded to read as follows: Criterion (iii): Ephesus is exceptional testimony to the cultural traditions of the Roman Imperial period as reflected in the monuments in the centre of the Ancient City of Ephesus and in Terrace House 2, with its wall paintings, mosaics and marble

		St. Paul and St. John	panelling showing the
		Basilica are still standing	style of living of the
		witnesses of this period.	upper levels of society
			at that time. The
			property testifies to
			the long history of
			civilisation at the site,
			bearing witness to
			many cultural
			traditions in addition
			to the Neolithic and
			Roman including
			Greek, Hellenistic,
			Byzantine and Turkish.
			But this essentially
			repeats what is
			already in the brief
			description and is not
			considered necessary.

ÉVALUATION DE LA PROPOSITION D'INSCRIPTION DU SITE : Parc national de Phong Nha - Ke Bang

ÉVALUATION DE L'ORGANISATION CONSULTATIVE CONCERNÉE : UICN

Page, colonne, ligne de l'évaluation de l'Organisation consultative	Phrase incluant l'erreur factuelle (l'erreur factuelle devrait figurer en gras)	Correction proposée par l'Etat partie	Commentaire (s'il y en a) de l'Organisation consultative et/ou du Centre du patrimoine mondial
Page 55, line 19 in background note	In the July 2013, the national park was expanded to 126,236 ha	In the July 2013, the national park was expanded to 123,326 ha	IUCN considers that this change needs clarification in detail with the State Party. The area of 126,236 ha reported by IUCN was taken from the State Party nomination dossier. Whilst not impacting the evaluation, this issue should be reconfirmed with the State Party and the World Heritage Centre.
Page 56, column 2, line 28,29,30	A variety of arthropods have been observed but not fully inventoried such as butterflies (20% of Vietnam's 270 species)	A variety of arthropods have been observed but not fully inventoried such as butterflies (270 species)	IUCN accepts this change as a factual error. The information was mistranscribed from the nomination dossier, where the statement is correct - p9.
Page 59, column 1, line 20,21,22	Few people live within the nominated area, whilst the surrounding buffer zone has a population estimated at 54,000. Several minority ethnic groups are present in the region and two Arem villages are within the boundaries of the existing property	Few people live within the nominated area whilst the surrounding buffer zone has a population estimated at 64,544. Several minority ethnic groups are present in the region and an Arem village and Dong village are within the boundaries of the existing property	IUCN considers this correction to be a clarification, but notes that it adds already inconsistent information in the nomination dossier. The nomination dossier notes 64,544 people living within the buffer zone (p51) then 54,143 people (p 84). The nomination dossier also notes only the Arem village (p.79) with no mention of a Dong Village. IUCN will clarify this information with the State Party at the Committee meeting to ensure that there is a consistent understanding. The amends do not materially impact the evaluation that has been made.

Page 59,	Dalbergia	Dalbergia tonkinensis	IUCN accepts this correction as a
