### 1.3 - Geographic information table

This table records information on the geographic coordinates of the area which enables an accurate location to be recorded on global maps for all properties. The format for coordinates should be latitude (i.e. degrees, minutes, seconds) and longitude (i.e. degrees, minutes, seconds). If the area of the inscribed property or of its buffer zone is

greater than 100 ha, the figure should be rounded to the nearest whole hectare. This table will record details for each part of the property in the case of serial sites.

**Please note that any change to this information needs to be reviewed by the relevant Advisory Body and approved by the World Heritage Committee.** The procedure and the deadline to submit this change is indicated in par. 163-165 of the *Operational Guidelines for the Implementation of the World Heritage Convention*:

"163. a minor modification is one which has not a significant impact on the extent of the property nor affects its Outstanding Universal Value.

164. If a State Party wishes to request a minor modification to the boundaries of a property already on the World Heritage List, it shall submit this by **1 February** to the Committee through the Secretariat, which will seek the advice of the relevant Advisory Bodies. The Committee can approve such modification, or it may consider that the modification to the boundary is sufficiently important to constitute an extension of the property, in which case the procedure for new nominations will apply.

165. If a State Party wishes to significantly modify the boundary of a property already on the World Heritage List, the State Party shall submit this proposal as if it were a new nomination. This re-nomination shall be presented by **1 February** and will be evaluated in the full year and a half cycle of evaluation according to the procedures and timetable outlined in paragraph 168. This provision applies to extensions, as well as reductions".

Maps should include:

- a legend in english or french referring to the "Boundary of the World Heritage Property" and "Buffer zone of the World Heritage Property";
- a clearly labeled coordinate grid;
- a bar scale;
- the orientation (i.e. "north" must be indicated);
- the date the map was produced.

The preferred formats for digital maps are .tif, .jpg, .pdf.

## **2.Statement of Outstanding Universal Value**

---

**2.1 -**

**Statement of Outstanding Universal Value/Statement of Significance**

This question allows respondents to check if the information on the Outstanding Universal Value held by the World Heritage Centre is correct (i.e. includes no spelling or grammatical errors); question 2.4 below provides the opportunity to comment on whether the Statement of Outstanding Universal Value adequately reflects the property's values. The term 'Outstanding Universal Value' (OUV) is the fundamental cornerstone of World Heritage (including nominations, periodic reporting, etc) and is the basis for the protection and management of the property.

Outstanding Universal Value is defined in paragraph 49 of the *Operational Guidelines for the Implementation of the World Heritage Convention* as the "cultural and/or natural significance which is so exceptional as to transcend national boundaries and to be of common importance for present and future generations of all humanity. As such, the permanent protection of this heritage is of the highest importance to the international community as a whole". Interpreting the Outstanding Universal Value and applying it in practice is often difficult, but it remains at the heart of the philosophy of World Heritage.

This re-nomination shall be presented by **1 February** and will be evaluated in the full year and a half cycle of evaluation according to the procedures and timetable outlined in paragraph 168. ## 2.3 -

### **Attributes expressing the Outstanding Universal Value per criterion**

Please describe the attributes for each criterion.

## 2.4 -

### **If needed, please provide details of why the Statement of Outstanding Universal Value should be revised**

This question provides the opportunity to comment on whether the statement of Outstanding Universal Value (see question 2.1) adequately reflects the value of the property. The term 'Outstanding Universal Value' is the fundamental cornerstone of World Heritage (including nominations, periodic reporting, etc) and is the basis for the protection and management of the property. Outstanding Universal Value is defined in paragraph 49 (and further elaborated upon in paragraph 155) of the Operational Guidelines as the cultural and/or natural significance which is so exceptional as to transcend national boundaries and to be of common importance for present and future generations of all humanity. as such, the permanent protection of this heritage is of the highest importance to the international community as a whole. Please note that any change to the statement of Outstanding Universal Value needs to be reviewed by the relevant Advisory Body and approved by the World Heritage Committee. The procedure and deadlines to submit change are indicated in par. 166 of the Operational Guidelines.

### Comments, conclusions and/or recommendations related to Statement of Outstanding Universal Value

Please use this box to make any comments, i.e. explanations of the answers provided, sources of information used, and/or conclusions or recommendations about the information related to the Statement of Outstanding Universal Value above. Please note this text box has a limit on the number of characters used, which will appear as you type in your response.

## 3. Factors Affecting the Property

This section asks you to provide information on the range of factors which are affecting (either **currently** affecting or which have a **strong possibility** of affecting) the property, both **positively** and **negatively**. This generic list has been developed to identify factors which could affect any type of World Heritage property. The factors are grouped into 13 headings, which are then briefly explained. Beneath each heading a list of factors appears.

The first stage in the assessment is to click the box below each factor to indicate if this factor is **relevant** or not **relevant** to the property. Please note this assessment is not only about negative factors. Factors may be currently having an impact or there may be a strong likelihood of them affecting the property in the near future – if either is the case you should click the box marked relevant.

If the factor is not relevant then move on to the next factor; if the factor is relevant then a second line of assessment questions will appear.

This assessment will ask you about the impact and origin of factor. The first box asks whether the impact is **positive** or **negative**; the second whether it is **current** or **potential** and the third whether the origin of the factor is **inside** the property or **outside** of the property. In each of these three subsections at least one box must be clicked on.

At the end of the list of factors there is an opportunity (question 3.14) to add any additional factors which affect the property but which have not been covered in sections 3.1 to 3.13.

## 3.16. Assessment of current negative factors

An automated table will appear when you open this page containing all the negative impacts identified. For each factor a five part assessment then follows which looks at:

**Spatial scale.** which asks if the area affected by the factor is **restricted** (i.e. over less than 10% of the properties area at anyone time); **localised** (i.e. between affecting between 11 and 50%); **extensive** (i.e. 51-90%) or **widespread** (i.e. 91-100%).

**Temporal scale.** which asks about the occurrence of the impact, and whether it is **one off or rare; intermittent or sporadic; frequent or on-going.**

**Impact.** which assesses if the impact on the attributes (see question 2.3) that express the Outstanding Universal Value are **insignificant; minor; significant or catastrophic.**

**Management response.** which assesses the capacity (i.e. staff time, resources, budget, knowledge) of management to respond to the negative factors as being of either: **high capacity; medium capacity; low capacity or no capacity and/or resources.**

**Trend.** which asks how the trend has developed over the last 6 years and whether the overall impact of the negative factor is **decreasing; static or increasing.**
