

application and admission

Only students holding either a four or five-year degree (corresponding to 240/300 credits) are eligible. Profiles have to be evaluated according to the rules of the Bologna Process. The evaluation requires: university grades (depending on degrees obtained), curriculum vitae, personal statement of interest, good knowledge of written and spoken English

Admission and recognition of education for enrolment to University of Nova Gorica from this year:

Admission www.ung.si/en/study/admissions/third-level-admissions/

On-line application will be possible from June 1, 2016 until August 31, 2016
portal.evs.gov.si/prijava/?locale=en

Foreign students whose first language is not English need to have a good command of their written and spoken English language skills.

beginning of courses

End of October 2016

application deadline

1st round of application: deadline 31st August 2016

2nd round of application: deadline 30th September 2016

on-line enrollment

About

The ETCAEH program is one of the initiators of the post-graduate education in the field of integrated heritage protection both at national and European level. Since its establishment in 2005, a group of leading international experts from different universities and institutions have been implementing innovative forms of education to respond to various global cultural contexts and provenances of students. The program is based on an interdisciplinary integration of basic scientific disciplines to provide knowledge in the field of protection, planning and management of built environment, cultural landscapes, ecosystems and related areas. The aim is to investigate existing and new theoretical and methodological fundamentals that ensure the understanding of the complexity of heritage values and are essential in the research and professional practice, also through innovative and sustainable solutions. The program is carried out in close cooperation with ICCROM (International Centre for the Study of the Preservation and Restoration of Cultural Property) and other international organizations that guarantee a transdisciplinary educational context.

Within the 3-year doctoral study programme (180 ECTS), students may complete a 1-year second level Master (60 ECTS). The specific feature of the master is the joint diploma issued by both ETCAEH founders, namely University of Nova Gorica (UNG) and Università Iuav di Venezia. Lectures are held in English.

Description of specializations

The first year of the program includes three educational periods.

- > The 1st period (30 ECTS) is compulsory for the two specializations and focuses on theoretic-methodological issues and the knowledge of architectural and environmental heritage;
- > the 2nd period (9 ECTS) is divided into two specialisations:
 - Techniques and Materials in Conservation of the Architectural Heritage
 - Management and Economics of Cultural Heritage;
- > the 3rd period (21 ECTS) includes research work, tutoring and thesis writing (if requested).

Academic Partnerships

University of Nova Gorica
Università Iuav di Venezia

with the participation of

Università degli Studi di Napoli Federico II (Italy), Università di Roma La Sapienza, (Italy), Panthéon-Sorbonne, Université de Paris 1 (France), Ecole Nationale Supérieure d'Architecture de Paris – Belleville (France), Università degli Studi di Trieste (Italy), Universidade Federal de Santa Catarina (Brasil), Fuzhou University (China) and the scientific support of ICCROM

COURSES

> fundamental compulsory courses

- History and Theory of the Conservation of the Built Heritage: Principles and Approaches;
- Fundamentals of Preservation of Historic Urban and Cultural Landscape;
- Selected Topics in Sustainability of Heritage: Preservation, Planning and Management;
- Economics of Cultural Heritage and Creativity;
- Contemporary trends in Cultural Heritage Protection, Planning and Management
- Integrated Project work
- Research work

> General elective

- Cultural Heritage, Common Goods and the Law
- Realizing Values of Built Environment: Fundamentals of Socio Economic Approach
- Methodologies of Historic Research for Heritage Interpretation

Specific elective courses

for the specialization – "Techniques and Materials"

- Selected Topics in History of Building Techniques and Materials
- Selected Topics in Conservation and Restoration Practice
- Advanced Topics in Building Techniques
- Selected Topics in Real Estate Valuation and Investments

Specific elective courses

for the specialization – "Economics and Management"

- The Economic Valuation of Culture: Methods, Management and Policy
- Cultural Heritage Tourism: a Territorial Management Perspective
- Cultural Policy Design: Principles and Cases
- Markets for Culture and Public Policy
