3. Statement of Outstanding Universal Value

3.1 - Statement of Outstanding Universal Value for the property as adopted by the World Heritage Committee

Statement of Outstanding Universal Value

Brief synthesis

Potosí is the example *par excellence* of a major silver mine of the modern era, reputed to be the world's largest industrial complex in the 16th century. A small pre-Hispanic-period hamlet perched at an altitude of 4,000 m in the icy solitude of the Bolivian Andes, Potosí became an "Imperial City" following the visit of Francisco de Toledo in 1572. It and its region prospered enormously following the discovery of the New World's biggest silver lodes in the Cerro de Potosí south of the city. The major colonial-era supplier of silver for Spain, Potosí was directly and tangibly associated with the massive import of precious metals to Seville, which precipitated a flood of Spanish currency and resulted in globally significant economic changes in the 16th century. The whole industrial production chain from the mines to the Royal Mint has been conserved, and the underlying social context is equally well illustrated, with quarters for the Spanish colonists and for the forced labourers separated from each other by an artificial river. Potosí also exerted a lasting influence on the development of architecture and monumental arts in the central region of the Andes by spreading the forms of a baroque style that incorporated native Indian influences.

By the 17th century there were 160,000 colonists living in Potosí along with 13,500 Indians who were forced to work in the mines under the system of *mita* (mandatory labour). The Cerro de Potosí reached full production capacity after 1580, when a Peruvian-developed mining technique known as *patio*, in which the extraction of silver ore relied on a series of hydraulic mills and mercury amalgamation, was implemented. The industrial infrastructure comprised 22 *lagunas* or reservoirs, from which a forced flow of water produced the hydraulic power to activate 140 *ingenios* or mills to grind silver ore. The ground ore was amalgamated with mercury in refractory earthen kilns, moulded into bars, stamped with the mark of the Royal Mint and taken to Spain.

The city and region retain evocative evidence of this activity, which slowed significantly after 1800 but still continues. This includes mines, notably the Royal mine complex, the biggest and best-conserved of the some 5,000 operations that riddled the high plateau and its valleys, dams that controlled the water that activated the ore-grinding mills, aqueducts, milling centres and kilns. Other evidence includes the superb monuments of the colonial city, among them 22 parish or monastic churches, the imposing *Compañía de Jesús* (Society of Jesus) tower and the Cathedral. The *Casa de la Moneda* (Royal Mint), reconstructed in 1759, as well as a number of patrician homes, whose luxury contrasted with the bareness of the *rancherías* of the native quarter, also remain. Many of these edifices are in an "Andean Baroque" style that incorporates Indian influences. This inventive architecture, which reflects the rich social and religious life of the time, had a lasting influence on the development of architecture and monumental arts in the central region of the Andes.

Criterion (ii): The "Imperial City" of Potosí, such as it became following the visit of Francisco de Toledo in 1572, exerted lasting influence on the development of architecture and monumental arts in the central region of the Andes by spreading the forms of a baroque style incorporating Indian influences.

Criterion (iv): Potosí is the one example *par excellence* of a major silver mine in modern times. The industrial infrastructure comprised 22 *lagunas* or reservoirs, from which a forced flow of water produced the hydraulic power to activate the 140 *ingenios* or mills to grind silver ore. The ground ore was then amalgamated with mercury in refractory earthen kilns called *huayras* or *guayras*. It was then molded into bars and stamped with the mark of the Royal Mint. From the mine to the Royal Mint (reconstructed in 1759), the whole production chain is conserved, along with the dams, aqueducts, milling centres and kilns. The social context is equally well represented: the Spanish zone, with its monuments, and the very poor native zone are separated by an artificial river.

Criterion (vi): Potosí is directly and tangibly associated with an event of outstanding universal significance: the economic change brought about in the 16th century by the flood of Spanish currency resulting from the massive import of precious metals in Seville.

Integrity

Within the boundaries of the property are located all the elements necessary to express the Outstanding Universal Value of the City of Potosí, including the ensemble's industrial mining and urban components such as the system of artificial lakes, the mines, the mineral processing mills, the architecture and urban form and the natural environment, all dominated by the majestic presence of Cerro de Potosí. No buffer zone for the property has been delimited.

Authenticity

The City of Potosí is authentic in terms of the ensemble's forms and designs, materials and substances, and location and setting. Still dominated by the majestic Cerro de Potosí, the "Imperial City" of Potosí's streets, squares, civic and religious buildings, parishes and churches remain as faithful witnesses of its great splendour and tell the important history of mining in the Americas.

The degradation of Cerro de Potosí (also called Cerro Rico [Rich Mountain] or Sumaj Orcko) by continuing mining operations has long been a concern, as hundreds of years of mining have left the mountain porous and unstable. The Bolivian Mining Corporation included the preservation of the form, topography and natural environment of the mountain as one of the objectives for its future exploitation. Nevertheless, recommendations by a World Heritage Centre/ICOMOS technical mission in 2005 to improve the security and stability of the property, as well as other conditions necessary to allow for sustainable mining activities, were not addressed and portions of the summit of the mountain have collapsed. The authenticity of the property is thus threatened, and urgent and appropriate action must be taken to protect human lives, to improve working conditions and to prevent further deterioration of this vulnerable component of the property.

Protection and management requirements

The City of Potosí is protected under the *Constitución Política del Estado* (Political Constitution of the State), Art. 191; *Ley del Monumento Nacional* (National Monument Act), 8/5/1927; *Normas Complementarias sobre patrimonio Artístico, Histórico, Arqueológico y Monumenta* (Complementary Standards on Artistic, Historical, Archaeological and Monumental Heritage), *Decreto Supremo* (D.S.) No. 05918 of 6/11/1961; *Créase la Comisión Nacional de Restauración y Puesta en Valor de Potosí* (Establishment of the National Commission for the Restoration and Revitalization of Potosí), D.S. No. 15616 of 11/7/1978; *Normas sobre defensa del Tesoro Cultural de la Nación* (Standards for the Protection of the National Cultural Treasure), *Decreto Ley* (D.L.) No. 15900 of 19/10/1978; and Act No. 600 of 23/2/1984 to finance the implementation of the designation of the City of Potosí as a "Monumental City of America" by the General Assembly of the Organization of American States in 1979. In addition the *Plan de Rehabilitación de las Áreas Históricas de Potosí* - PRAHP (Rehabilitation Plan of the Historic Areas of Potosí), its Regulations and several studies also encompass the protection of the property. There is no participatory conservation management plan for the property.

Restoration work is realized by international support from UNESCO, the Organization of American States and the governments of Spain and the Federal Republic of Germany. The Ministry of Culture of the Plurinational State of Bolivia is in charge of conservation and preservation work. The *Proyecto de la calle Quijarro* (Quijarro Street Project) was developed in 1981 to encourage rehabilitation of homes in the historic downtown areas; basic services are provided in collaboration with the Municipality - of Potosí. However, it should be noted that there is a strong economic downturn in the region. It is expected that cultural tourism will help provide social, economic and educational support.

Sustaining the Outstanding Universal Value of the property over time will require fully implementing the emergency and other measures identified by the 2011 technical mission; finalizing and implementing an approved Strategic Emergency Plan, including rationalization and planning of industrial exploitation in the area; developing and implementing approved measures to ensure the structural stability of the top of the mountain; modifying Article 6 of Supreme Decree 27787 to halt all exploration, extraction and any other interventions under and above ground between altitudes 4,400 m and 4,700 m; completing an analysis and modelling based on recent geophysical studies to further identify the anomalies affecting the mountain; putting in place a monitoring system; finalizing and submitting a participatory Management Plan for the property; and delimiting a buffer zone for the property.

3.3 - Comments, conclusions and/or recommendations related to Statement of Outstanding Universal Value

Un elemento que no se visibilizó en la etapa de elaboración del Plan de Manejo de la ciudad de Potosí, es la identidad y visión del pueblo indígena Qhara Qhara, que en los eventos de validación del Plan y Conformación del Comité de Gestión expresaron su preocupación por el estado del Cerro Rico y reclamando que en sus pueblos lo conciben como una waka. Es decir una deidad andina.

The Authenticity of the World Heritage property **has been seriously compromised** by factors described in this report

12.3.2 - Following the analysis undertaken for this report, what is the current state of Integrity of the World Heritage property?

The Integrity of the World Heritage property **has been seriously compromised** by factors described in this report

12.3.3 - Following the analysis undertaken for this report, what is the current state of the World Heritage property's Outstanding Universal Value?

The World Heritage property's Outstanding Universal Value **has been impacted by factors described in this report, but this situation is being addressed through effective management actions.**

12.3.4 - What is the current state of the property's other values?

Other important cultural and/or natural values **are being degraded and have had an impact on the state of conservation** of the World Heritage property

12.3.5 - Comments. conclusions and/or recommendations related to the state of conservation of the property.

En lo referido al patrimonio productivo minero, es el que con mayor intensidad se ha abordado, por lo sensible de la estructura del cerro rico que podría colapsar si no se toman medidas urgentes. Para el caso del patrimonio urbano arquitectónico, la rivera de los ingenios y las lagunas del Kari Kari, se ha iniciado el proceso de atención, sin embargo los impactos negativos han aminorado debido a que la declaración de patrimonio en peligro ha sentado conciencia en la población potosina.

13. Impact of World Heritage Status

13.1 - Please rate the impacts of World Heritage status of the property in relation to the following areas

Conservation	No impact
Research and monitoring	Positive

Other	Negative
If 'Other', please specify	Crisis política en el país y crisis sanitaria de la pandemia del COVID 19

13.2 - Comments, conclusions and/or recommendations related to World Heritage status and its impacts

Se esta impulsando el Plan de Gestión Integrado y Participativo de la ciudad de Potosí, aunque se está teniendo algunas dificultades de comprensión y por tanto de compromiso en algunas instituciones nacionales (Ministerios de Estado) Sin embargo el proceso va avanzando Se tiene una presión del Comité Cívico Potosinista, aunque la misma no siempre ayuda al desarrollo mas ágil del proceso. Es una presión exacerbada que no necesariamente es coherente con la importancia del desarrollo del Plan.

14. Good Practice in the Implementation of the World Heritage Convention

14.1 - Example of good practice in World Heritage protection, identification, conservation or management at the property level

- La reactivación de la coordinación entre los diferentes niveles de gobierno, que se ha dado a iniciativa del Ministerio de Autonomías, Descentralización y Despatriarcalización que pese a las ciertas muestras de desinterés, ha dinamizado el proceso de validación, aprobación e implementación del Plan. - Algunas entidades corporativas, como el Comité Cívico Potosinista, pese a su posición exacerbada respecto a la implementación del Plan, se convierte en un elemento que dinamiza el proceso. - Hay un interés positivo en entidades de investigación como la Universidad Tomas Frías y experiencias desarrolladas por el Gobierno Municipal de Potosí, para aportar en el desarrollo del Plan. - La emergencia del pueblo indígena "kara kara" de origen aymara-quechua, le ha dado otra tónica respecto a la visión del Cerro Rico, al que calificaron de ser su "Waka" (deidad andina), poniendo en cuestión de la visión de los mineros que laboran actualmente en el cerro y que la conciben como "yacimientos mineros".

14.2 - Define which topics are covered by this example of best practice at the property level

Sustainable Development
Synergies
State of Conservation
Governance

15. Assessment of the Periodic Reporting Exercise

15.1. Relevance of Periodic Reporting

15.1.1 - Has the Periodic Reporting process improved the understanding of the following?

The World Heritage Convention
The concept of Outstanding Universal Value
Management effectiveness to maintain the Outstanding Universal Value

15.1.2 - Please rate the follow-up to conclusions and recommendations from previous Periodic Reporting exercise by the following entities

State Party	Fair
Site Managers	Poor
UNESCO World Heritage Centre	Fair
Advisory Bodies (ICOMOS, IUCN, ICCROM)	Fair

15.2. Use of Data

15.2.1 - How do the authorities in charge of the property plan to use the data recorded from this cycle of Periodic Reporting?

Revision of priorities/strategies/policies for the protection, management and conservation of heritage
Update of management plans
Fundraising

15.2.2 - Comments on use of data from the Cycle of Periodic Reporting

Los datos van emergiendo de manera gradual. Respecto al cerro rico se viene avanzando desde el año pasado. Respecto al patrimonio del centro arquitectónico histórico, el patrimonio arqueológico y ambiental, se han generado el recojo de la información y sistematización de la misma desde inicios de este año.

15.3. Timing and resources

15.3.1 - Entities involved in the filling out of this online questionnaire (tick as many boxes as applicable)

15.3.5.2	Financial resources for organizing consultation meetings/ training	×	

15.4. Format and content of the Periodic Report

15.4.1 - How accessible was the information required to complete this questionnaire?

Little of the required information was accessible.

15.4.2 - Was the questionnaire easy to use and clear to understand?

		Very Difficult	Difficult	Easy	Very easy
15.4.2.1	Ease of use of questionnaire		×		
15.4.2.2	Clarity of questions			×	

15.4.3 - Please provide suggestions for improvement of the Periodic Reporting questionnaire

Es importante que los estados mantengan la estabilidad de los gestores de sitio. En el caso boliviano esta situación no será tan sencillo debido a la dinámica política que acompaña la historia de este país. Será necesario algunos eventos de fortalecimiento de capacidades a los gestores de sitio.

15.5.3 - Were the online training resources prepared by the World Heritage Centre regarding Periodic Reporting adequate for you to complete this questionnaire?

Not applicable (i.e. I did not use these resources)

15.5.4 - If you found that the online training resources were not adequate, what changes would you like to see implemented?

El cambio de personal especialmente en el Ministerio de Culturas, Descolonización y Despatriarcalización fue una limitante sustantiva, debido al cierre del mismo y su reapertura, lo que significó cambio de personal y extravío de información. Algo parecido ocurrió en las instancia subnacionales.

15.6. Actions that will require formal consideration by the World Heritage Committee

15.6.1 - Summary of actions that will require formal consideration by the World Heritage Committee

- Statement of Outstanding Universal Value for the property as adopted by the World Heritage Committee**

Reason for update: El texto está basado en la Constitución Política del Estado de 1994 de la República de Bolivia (abrogada) La actual Constitución Política del Estado Plurinacional de Bolivia de 7 de febrero de 2009, se refiere a la protección patrimonial en el Art. 99. Es necesario actualizar el marco normativo nacional. Una de las normas sustantivas del patrimonio cultural, como la Ley 530 Ley de Patrimonio Cultural Boliviano de 23 de mayo de 2014, no figura en las referencias.

Changes to these items will need to go through the proper processes.

15.7. Comments, conclusions and/or recommendations related to the Assessment of the Periodic Reporting Exercise

15.7.1 - Comments, conclusions and/or recommendations related to the Assessment of the Periodic Reporting Exercise

Se esta previendo desde el Ministerio de Culturas Descolonización y Despatriarcalización, un evento nacional para el segundo semestre de este año, de todos los patrimonios nacionales inscritos en la lista representativa. Será necesaria la presencia de expertos para el asesoramiento y principalmente, algunas pautas para el fortalecimiento de capacidades de los gestores de sitio.

15.7.2 - Thank you for having filled in all the questions. Please contact your National Focal Point for validation.
