**3. Statement of Outstanding Universal Value**

3.1 - Statement of Outstanding Universal Value for the property as adopted by the World Heritage Committee

Statement of Outstanding Universal Value

Brief synthesis

Engelsberg Ironworks, situated in the mining area of Norberg in central Sweden, is an outstanding example of an influential European industrial complex of the 17th to 19th centuries. It is the best preserved and most complete example of a Swedish iron-working estate (*järnbruk*) of the type which produced superior grades of iron. This made Sweden an economic leader in this field for two centuries and significantly contributed to the country's prosperity during that period. Important examples of the technological equipment of this era as well as associated administrative and residential buildings are preserved within the property.

Local inhabitants began mining ore and smelting in the 12th century as a supplement to agricultural activities. The introduction of the waterwheel for powering the blast furnace, bellows, and forge to refine iron ore led to the rapid development of the Swedish iron industry. The first iron forge at Engelsberg was in operation during the last years of the 16th century; substantial operations were in place by the mid-17th century. In 1681, a nobleman built a blast furnace at Engelsberg in order to produce pig iron. The present blast furnace, built in 1778-1779 along with an ore crusher and a large charcoal store, incorporated a number of then-contemporary technological innovations. The introduction of a new blowing engine in 1836 resulted in a significant increase in production. A gas-fired ore-roasting kiln was added in 1848. The forge, which was rebuilt in the later 18th century, was re-equipped with French hearths in the 1850s. Axel Ax:son Johnson bought the Engelsberg ironworks in 1916, but found the older works increasingly uneconomical, and closed it down in 1919.

Most of the technological, administrative, and residential buildings at Engelsberg Ironworks have been conserved in their original condition. The 18th-century smelting house, together with its associated installations from later periods, still remains intact. Collectively, they provide a very complete picture of the technological equipment of a traditional Swedish *järnbruk*. The complex also contains a range of administrative and residential buildings for managers and workers, as well as for those who worked on the associated farm. These include the main building (erected about 1750), office building, inspector's house, smiths' cottages, coach-house, stables, brewery, master gardener's house (1790), and a monumental barn of slag stone (1872). Over 50 buildings of various ages and functions have been preserved here, making Engelsberg one of the most important iron-making complexes from this era in the world.

**Criterion (iv):** Engelsberg is an outstanding example of an influential European industrial complex of the 17th-19th centuries, with important technological remains and the associated administrative and residential buildings intact.

Integrity

Within the boundaries of the 9.596ha property are located all the elements necessary to express the Outstanding Universal Value of Engelsberg Ironworks, including technological, administrative, and residential buildings. Its boundaries adequately ensure the complete representation of the features and processes that convey the property's significance. There is no buffer zone for the property. The property does not suffer unduly from adverse effects of development and/or neglect.

According to the detailed comprehensive plan for Ångelsberg Municipality, developmental pressure constitutes a constant potential risk to the integrity of this property. Due to structural changes affecting traditional industries and the closing of factories, the population of Ångelsberg Municipality decreased significantly during the 20th century, from 700 to 150 inhabitants. The Swedish authorities believe that this trend may also affect the management of the property: if not addressed, there may be a negative impact on the level of service facilities, especially for tourists. The authorities likewise believe a low increase in visitors to be of vital importance for maintaining the Outstanding Universal Value of the property. They also consider it vitally important that private ownership of the property not be restricted.

Authenticity

Engelsberg Ironworks is authentic in its location and setting, forms and designs, and materials and substances. Despite having ceased operations in 1919, most of the technological, administrative, and residential buildings have been conserved in their original condition, and the restoration works have been of the highest quality in terms of techniques and materials.

Protection and management requirements

The attributes that sustain the Outstanding Universal Value of Engelsberg Ironworks are protected under the comprehensive, interlocking Swedish legislation for cultural and environmental protection. The property enjoys strong legal protection under the *Cultural Heritage Act* (1988) as a national monument (1974). Swedish law effectively forbids developers from compromising the environmental values of Engelsberg. The entire area of Engelsberg Ironworks is explicitly included in the Area of National Interest for Strömsholm Canal established under the federal *Environmental Code*.

The relevant regional authority for Engelsberg Ironworks is the Västmanland County Administrative Board. Overall national supervision of all cultural properties is exercised by the Swedish National Heritage Board. Building permits are granted by Fagersta Municipality. Engelsberg Ironworks is owned and maintained by a private company, Nordstjärnan AB. A Management Council is responsible for the inspection of the buildings, ensuring that maintenance measures are undertaken by experts and, when necessary, by external specialists. The goal of the Management Council is the continued protection and development of this World Heritage property. It maintains contact with relevant authorities, and ensures that Engelsberg Ironworks is protected and accessible. The management plan, prepared in 2005, is continuously updated, and the houses are kept and restored accordingly. Engelsberg Ironworks is open and accessible to the public at specific times.

Sustaining the Outstanding Universal Value of the property over time will require managing, to the degree possible, the ongoing developmental pressure and the population decline related to structural changes affecting traditional industries and the closing of factories.

3.2 - Please list the key attributes of Outstanding Universal Value of your property and give an assessment of their condition. As a guideline, it is suggested to focus on approximately five key attributes (no more than 15 overall).

#### 5. Protection and Management of the Property

##### 5.1. Boundaries and Buffer Zones

**5.1.1 - Are the boundaries of the World Heritage property adequate to maintain the property's Outstanding Universal Value?**

The boundaries are **adequate to maintain** the property's Outstanding Universal Value

**5.1.2 - Are the boundaries of the World Heritage property known and recognised?**

The boundaries **are known by both** the management authority and local communities/landowners

**5.1.3 - Are the buffer zone(s) of the World Heritage property adequate to maintain the property's Outstanding Universal Value?**

The property has **no buffer zone** and **does not need one**

**5.1.4 - Are the boundaries of the buffer zones known and recognised?**

The property has **no known and recognised** buffer zone

**5.1.5 - Comments, conclusions and/or recommendations related to boundaries and buffer zones of the World Heritage property**

##### 5.2. Protective Measures

**5.2.1 - Protective designation (legal, regulatory, contractual, planning, institutional and/or traditional).**

Engelsberg Ironworks is protected under the comprehensive, interlocking Swedish legislation for cultural and environmental protection.

The site enjoys strong legal support as a National Heritage monument. Swedish law effectively forbids developers to compromise the environmental values of Engelsberg.

Its status as a place of national importance is independent of the World Heritage Convention. This further strengthens the protection of Engelsberg.

Source: Periodic Reporting Cycle 2

**5.2.2 - Please list any legislation and other measures (regulatory -including spatial planning- contractual, institutional or traditional) not included in 5.2.1 and indicate the category**

**5.2.3 - Is the legal framework (i.e. legislation and/or regulation including spatial planning) adequate for maintaining the Outstanding Universal Value including conditions of Integrity and/or Authenticity of the property?**

The **legal framework** for maintaining of the Outstanding Universal Value including conditions of Authenticity and/or Integrity of the World Heritage property provides an **adequate basis for effective management and protection**

**5.2.4 - Is the legal framework (i.e. legislation and/or regulation) adequate in the buffer zone for maintaining the Outstanding Universal Value including conditions of Integrity and/or Authenticity of the property?**

The property has **no buffer zone**

**5.2.5 - Is the legal framework (i.e. legislation and/or regulation) in the broader setting of the World Heritage property adequate for maintaining the Outstanding Universal Value including conditions of Integrity and/or Authenticity of the property?**

The **legal framework** for the broader setting of the World Heritage property provides an **adequate basis for** effective management and protection of the property, contributing to the maintenance of its Outstanding Universal Value including conditions of Authenticity and/or Integrity

#### 5.2.6 - Can the legal framework (i.e. legislation and/or regulation) be enforced?

There is **adequate capacity/resources** to enforce legislation and/or regulation in the World Heritage property

#### 5.2.7 - Please provide a short summary of how the legislation, including spatial planning and other regulation, works in practice

#### 5.2.8 - Comments, conclusions and/or recommendations about the information related to the measures taken to protect the World Heritage property

### 5.3. Management System/Management Plan

#### 5.3.1 - Please check the box which most closely match the character of the governance and management system of the property

Private ownership/management

If 'Other', please specify

#### 5.3.2 - Management System: Please indicate which of the various management tools listed below are used to help protect the property.

Governance mechanisms that foster and respect traditional practices, knowledge and uses of the property

A management plan

An annual work plan or business plan

#### 5.3.3 - Please give a brief description of the management system currently in place at your property

The management system of the heritage has an administrative council. They produce a management plan including an annual business plan, concerning both investment and maintenance. A planning group with adequate skills (for example owner, architect, archivist, site manager, specialists) are responsible for the overall planning and management of the site and meets on a monthly basis. Each project has its own project team.

#### 5.3.4 - Management Documents

#### 5.3.8 - If the Climate Change policy has been used, please briefly describe what has been done along with any research on the impacts of Climate Change on the property:

#### 5.3.9 - Has any use been made of the Strategy for Reducing Risks from Disasters at World Heritage Properties at the property ?

**No use** has been made of the Strategy for Reducing Risks from Disasters at World Heritage Properties

#### 5.3.10 - If the Strategy for Reducing Risks from Disasters at World Heritage Properties has been used, please briefly describe what has been done

#### 5.3.11 - Rate the coordination between the various levels of administration (i.e. national/federal; regional/provincial/state; local/municipal etc.) involved in the management of the World Heritage property

There is **adequate coordination** between all bodies/levels involved in the management of the property

#### 5.3.12 - Is the management system/plan adequate to maintain the property's Outstanding Universal Value?

The management system/plan is **fully adequate** to maintain the property's Outstanding Universal Value

#### 5.3.13 - Is the management system being implemented?

The management system is being **fully implemented and monitored**

#### 5.3.14 - Is there an annual work/action plan and is it being implemented?

An annual work/action plan **exists** and all of its activities are being implemented and monitored

#### 5.3.15 - Does the management system include formal mechanisms and procedures that ensure participation and contribution of the following groups, living within or near the World Heritage property and/or buffer zone in management decisions that maintain the Outstanding Universal Value of the property?

		Not applicable	No mechanisms for participation	Some participation	Direct participation	Transformative participation in all relevant decision processes
5.3.15.1	Local communities	✗				
5.3.15.2	Local authorities			✗		

**5.3.16 - Please rate the cooperation/relationship between the World Heritage property managers/coordinators/staff and the following groups**

**5.3.17 - Please rate the extent to which the management system of your property contributes towards achieving the objectives of the World Heritage Committee's Policy for the Integration of a Sustainable Development Perspective into the Processes of the *World Heritage Convention***

**5.3.18 - Please provide further details on the ratings of the management system given in the table above**

Question 5.3.16. These groups are included in our daily work.

**5.3.19 - Comments, conclusions and/or recommendations related to the management system/plan**

## 6. Financial and Human Resources

## 6.1. Funding

**6.1.1 - If your funding sources do not exactly fit those shown, put the relevant amounts against the funding type that most closely represents your situation, and use the comment box below to provide more details.**

		Project costs	Running costs
6.1.1.1	Multilateral funding (GEF, World Bank, etc.)	%	%

## 12. Summary and Conclusions

### 12.1. Summary - Factors affecting the Property

#### 12.1.1 - Summary - Factors affecting the Property

4.7	<b>Local conditions affecting physical fabric</b>
-----	---

4.7.2	Relative humidity	The frosty period during the winter is shorter than it used to be, therefore the climate is more humid during a larger part of the year. A humid climate has a negative impact on wooden buildings.	Regular monitoring of all buildings at the heritage site and actions if necessary.	Regular monitoring.	Ongoing. Follow up at regular meetings.	The owner in consultation with the Administrative council and the County Administration Board if necessary.	No comments.
4.9	Other human activities						
4.9.2	Deliberate destruction of heritage	There has been some deliberate destruction of the blast furnace in the ironworks due to vandalism.	The owner has taken actions to prevent further vandalism. It is now more complicated to reach parts of the blast furnace which are out of sight.	There is always on-site staff who are monitoring the heritage site and the buildings.	It was an one-time action of vandalism. There has not been any further deliberate destructions of the site since the owner has taken actions.	The owner in consultation with the Administrative council and the County Administration Board if necessary.	No comments.
4.10	Climate change and severe weather events						
4.10.6	Temperature change	See question 4.7 relative humidity.	See question 4.7 relative humidity.	See question 4.7 relative humidity.	See question 4.7 relative humidity.	See question 4.7 relative humidity.	No comments.
4.11	Sudden ecological or geological events						
4.11.6	Fire (wildfire)	There was a wildfire very close to the world heritage in the summer of 2014. The heritage property was not damaged in the wildfire and the wildfire has not visibly affected the landscape seen from the heritage.	During the wildfire the surroundings of the heritage property were water bombed.	At a national level there has been improvement in forestry, which is also positive for the heritage site surrounded by forest.	Regular improvements and raising awareness. Experience from the wildfire in 2014.	During the wildfire in the summer of 2014 it was the owner of the heritage property who water bombed the surroundings of the site. The owner also helped with the availability of water, lodging and extinguishing work. Experience from the wildfire.	No comments.
