3. Statement of Outstanding Universal Value

3.1 - Statement of Outstanding Universal Value for the property as adopted by the World Heritage Committee

Statement of Outstanding Universal Value

Brief synthesis

The town of Telč is located near the southwestern border between Moravia and Bohemia, in the Vysočina Region of the Czech Republic. It is situated in a region which was thickly forested until the 13th century. The property consists of the historic town centre, with the castle situated in the middle, and of two bodies of water, originally having a defensive function.

The origins of the settlement are unclear: there was an early medieval settlement at Staré Město to the south-east of the present town, but there is no mention of Telč in documentary records before 1333-1335, when reference is made to the existence there of an important castle (and presumably also a church and settlement). The town of Telč, whose area covers 36 ha, was probably founded in the mid 14th century. The town itself is of special importance since it was founded on purpose to gain political and economic control over an area where there were deep forests in the 13th and 14th centuries.

The outstanding nature of Telč, in terms of the quality and authenticity of its cultural elements, the tangible evidence of its origins and evolution represented by its original layout and architecture, and its picturesque setting is unquestionable. The Renaissance castle forms the centre of the city. It is a major component of the urban townscape and it retains obvious traces of its Gothic precursor. The castle represents a unique authentic complex with its original material substance and decorations. Its original interior is imbued with Italian art.

The Historic Centre of Telč features a triangular market square surrounded by Renaissance and Baroque burgher houses (but whose origins are medieval). These houses are linked by a continuous arcade. Their facades are characterized by a great diversity as regards the choice of decorative elements. In the middle of the market square, there is a fountain and a plague column. A little further, there is the town hall, the Church of the Holy Spirit, the Jesuit College and the Gothic St. James parish church. Finally, the evidence of the origins and historical development of the city is provided by the city walls built of stone whose functioning was enhanced by a system of fishponds originally built for its strategic security.

**Criterion (i):** Telč is an architectural and artistic ensemble of outstanding quality. Its triangular market place possesses great beauty and harmony as well as great cultural importance surrounded as it is by intact and well preserved Renaissance buildings with a dazzling variety of facades.

**Criterion (iv):** The later Middle Ages in Central Europe saw the “plantation” of planned settlements in areas of virgin forest for reasons of political control and economic expansion. Telč is the best surviving example.

**Integrity**

All the key elements necessary to convey the Outstanding Universal Value of the property are situated inside the inscribed area. Its delimitation and size are appropriate. The buffer zone of the Historic Centre of Telč is delimited too; its boundaries are identical to the boundaries of the protective zone of the urban heritage reservation. The urban fabric of the property and its buffer zone is dense, and its spatial organization is stabilised. No change is expected in the spatial development of the territory. So far, minor improvements of the buildings that have been carried out had no important negative impact either on their character or on the overall layout of the town. Nevertheless, the increasing development pressure on the roofscape might have a negative impact on the visual integrity of the town, which is very well preserved. However, these risks are kept under proper control by heritage preservation authorities and by the fact that the seat of the Regional Department of the National Heritage Institute is situated specifically in Telč.

**Authenticity**

The Historic Centre of Telč is of high authenticity because it escaped the mania for over-restoration of the 19th century. So, both the individual buildings and the townscape have been preserved; the same applies to the authenticity of materials and designs in their historical evolution. Restoration work is carried out in compliance with the international standards for heritage preservation and historical materials and techniques are used.

**Protection and management requirements**

The property is protected by Act No. 20/1987 Coll. on State Heritage Preservation as amended and is designated as urban heritage reservation. The castle has been designated a national cultural heritage site, hence it enjoys the highest degree of legal protection with regard to heritage preservation. A number of other buildings situated within the boundaries of the property are designated cultural heritage sites. The buffer zone of the property is identical to the protective zone of the urban heritage reservation. In the long term, risks related to the development will have to be taken into account and building regulations will need to be strengthened. There is increased pressure for transforming attic spaces (loft) into living spaces. Therefore it is necessary to correct any loft, not to disturb the roofscape. Loft conversions are not permitted in the event that the truss structure is historically valuable and worthwhile to be preserved. In the case of authorized loft, a concerned authority has control over the number, size, location and shape of roof lights.

The property Management Plan is currently in the process of finalisation. The responsibility for the property management is shared by the National Heritage Institute, a state-funded institution which is responsible for maintenance, conservation, functioning and development of the Renaissance castle, and of the Municipality of Telč which is in charge of the maintenance, conservation, functioning and development of the remaining part of the property. Due to the extent of the property and its complicated ownership structure, maintenance and restoration of the various properties are subject to individual programmes that are coherent with the Programme for the Regeneration of Urban Heritage Reservations and Zones. Financial instruments for the conservation of the property mainly include grant schemes, funding through the programme of the Ministry of Culture of the Czech Republic allocated to the maintenance and conservation regeneration of the immovable cultural heritage and of areas under heritage preservation, as well as financial resources allocated from other public budgets.

The property is in good condition and is subject to regular maintenance. Since 2000, annual monitoring reports have been prepared at the national level to serve the World Heritage property manager, the Ministry of Culture, the National Heritage Institute and other agencies involved.

### 5. Protection and Management of the Property

#### 5.1. Boundaries and Buffer Zones

**5.1.1 - Are the boundaries of the World Heritage property adequate to maintain the property's Outstanding Universal Value?**

The boundaries are **adequate to maintain** the property's Outstanding Universal Value

**5.1.2 - Are the boundaries of the World Heritage property known and recognised?**

The boundaries are **known by both** the management authority and local communities/landowners

**5.1.3 - Are the buffer zone(s) of the World Heritage property adequate to maintain the property's Outstanding Universal Value?**

The buffer zones are **adequate** to maintain the property's Outstanding Universal Value

**5.1.4 - Are the boundaries of the buffer zones known and recognised?**

The buffer zones of the World Heritage property are **known and recognised by both** the management authority and local communities/landowners

**5.1.5 - Comments, conclusions and/or recommendations related to boundaries and buffer zones of the World Heritage property**

#### 5.2. Protective Measures

**5.2.1 - Protective designation (legal, regulatory, contractual, planning, institutional and/or traditional).**

- Law No.20/1987 Coll., on the state monuments care that codifies the care for cultural monuments and protected conservation territories
- Historic centre of the town (the area of the estate) declared Municipal Conservation Area by the Decree of the Ministry of Culture (ref. No. 7419/70-II/2)

of April 27, 1970)

- Buffer zone established in 1985 (by the decision of the department of culture of the District National Committee in Jihlava ref. No. kult. 39/85 of January 22, 1985)
- Government Order No. 262/1995 Coll., the chateau of Telč was declared national cultural monument and by Order of the government No. 336 of June 19, 2002 that national cultural monument was declared again in compliance with the current cadastral layout
- Development plan of the town of Telč approved by the authorities of the town on November 12, 2001 and its change was approved on October 30, 2002
- Programme of regeneration of the Municipal Conservation Area was approved by the town representatives on October 20, 2002
- Strategic plan of the micro-region of the area of Telč was approved on May 10, 2002
- The protection arrangements are considered highly effective.
- The draft of a new Law on National Heritage Conservation which should replace the existing Act No. 20 of 1987 Coll. has been finalized by the Czech Ministry of Culture. This proposal takes in account the World Heritage and defines principles and mechanisms in relation to it.

On 20 July 2011 the government of the Czech Republic approved the "Concept of monument care in the Czech Republic for 2011-2016". The concept is based on a joint general conceptual material of the resort called "State Culture Policy", and it also follows up on conceptual materials about protection of other elements of cultural heritage, i.e. the "Concept of more effective care of movable cultural heritage in the Czech Republic for 2010-2014", which was acknowledged by the government of the Czech Republic on 1 December 2010, and the "Concept of more effective care of traditional folk culture in the Czech Republic for 2011 – 2015", which was approved by the government of the Czech Republic on 5 January 2011.

The material is divided into two main parts. Firstly, it analyzes outputs of monument care in the previous years and in the second part it proposes relevant precautions. The proposal part stresses mainly the necessity for legislative changes in the monument care domain, putting great emphasis on improving the descriptive qualities of the Central Register of Cultural Monuments established by the law and simplifying and improving the quality of performance of the public administration in monument care sector. The concept reflects the current trends of electronization of state administration and digitization of analogue data, including documentation registers.

- Decree of the Ministry of Culture No. 420/2008 Coll. stipulating the essential elements and content of the heritage reservation and heritage zone protection plans
- Act No. 183/2006 Coll., on Land Use Planning and on the Building Procedure Code
- Decree of the Ministry of Regional Development No. 500/2006 Coll., on supporting analytical zoning data, zoning documentation and zoning records
- Decree of the Ministry of Culture No. 187/2007 Coll.
- The new development plan approved on October 4, 2011.
