I am not aware of any

## 3. Statement of Outstanding Universal Value

### 3.1 - Statement of Outstanding Universal Value for the property as adopted by the World Heritage Committee

#### Statement of Outstanding Universal Value

## Brief synthesis

El Tajín, Prehispanic City is a site with great significance for Mesoamerican archaeology because it is one of the best preserved and most thoroughly excavated examples of a pre-Hispanic town from the Epiclassic and early Post Classic period, the time between the fall of Teotihuacan and the rise of the Aztec empire. It is crucial to an understanding of the artistic and socio-economic development in these intervening centuries.

It was previously thought that occupation of the El Tajín pre-Hispanic settlement took place in three phases, between 100 B.C. and 1200 A.D. However, recent research has shown that there was only one phase of occupation lasting from 800 to 1200 A.D. El Tajín was abandoned and partly destroyed after 1200 A.D., when the region came under the rule of the powerful Aztec empire. The most important attributes of El Tajín are the buildings with the rich decoration of key-patterns, fretworks, niches, cornices, wall paintings and low reliefs. The reliefs and paintings discovered at the site contain important information on ritual and daily life. The site is furthermore exceptional in that its urban layout is based on the form of the Xicalcolihqui (the schematic representation of the cross section of a marine shell) and uses the different levels of the terrain to differentiate access to certain areas. The architecture mirrors the skyline of the surrounding hills. A further exceptional element is the large quantity of ball courts (17) at the site and the building in the form of a Xicalcolihqui that is unique in Mesoamerica.

The settlement has a calculated population of 15.000 - 20.000 inhabitants, distributed over three areas, each constructed around a number of open spaces. The Tajín complex, defined by two streams and a wall to the east, is the lowest lying of the three. One of the most impressive monuments is the Pyramid of the Niches, recorded in 1785.

The Tajín complex communicates directly with Tajín Chico, which is constructed on an artificial mound 7 m high. The Tajín Chico complex has not been fully excavated but has revealed some interesting details of this part of the site. Especially noteworthy is Building A, which represents smaller ball courts at each of its four corners, and has a Mayan style arch at the southern access. It is the most richly decorated building in El Tajín, with vertical bands of relief and key-pattern friezes. In Tajín, the plazas are rectangular while in Tajín Chico they are either trapezoidal or in the form of a Greek fret.

The third area, which is linked with and lies above Tajín Chico, is known as the Group of Columns. The name is due to the fact that the larger of the two pyramidal structures has a portico supported by columns, which themselves are richly decorated with relief sculptures.

**Criterion (iii):** El Tajín supplies unique information on Epiclassic and early Post Classic Mesoamerica and it is the most important site on the Gulf Coast of Mexico in that epoch. The artistic, architectural, and historical values of El Tajín combine to make this a highly significant site. The reliefs and paintings discovered at the site contain important information on society, ritual and daily life. Although there is still uncertainty concerning the origin of this culture, it has been attributed to the huastecos and totonacos, the latter being the indigenous people that are currently living in the area.

**Criterion (iv):** The site is furthermore exceptional in that its urban layout is based on the form of the Xicalcolihqui (the schematic representation of the cross section of a marine shell) and uses the different levels of the terrain to differentiate access to certain areas. Other exceptional elements are the large quantity of ball courts (17), public buildings (168), temples (27), residences (58), altars (3), and domestic houses (46).

## Integrity

All the monuments at El Tajín, including their surrounding landscape, with which they make up an indivisible unit in a harmonious relationship that has survived virtually unaltered over the centuries, have been preserved. All attributes that express the Outstanding Universal Value of the pre-Hispanic City of El Tajín are duly protected within the boundaries of the inscribed property, an area of 1221 hectares including the buffer zone, allowing for the highest level of conservation.

However, there are threats to the integrity and the conservation of the site, derived from development pressure, and the staging of the annual festival "Cumbre Tajín". The festival activities can result in excessive or inadequate use of the site and will require constant control and monitoring in order to avoid negative impacts.

## Authenticity

The site had been undisturbed for over 500 years when investigations began there, and only minor additions or reconstructions have been made since.

## Protection and management requirements

El Tajín is a site that is under the custody of the National Institute of Anthropology and History (INAH). It is legally protected by the Mexican Federal Law on Monuments and Archaeological, Artistic and Historical Zones of 1972. In 2001 the site was declared *Archaeological Monument Zone* by a presidential decree, with a polygon of 1221 hectares, including the archaeological area declared *World Heritage*.

In order to avoid future deterioration of the site, caused by natural and anthropogenic factors, a multidisciplinary team of experts is monitoring the state of conservation of the monuments and the surrounding landscape since 1984. The conservation of the site is also promoted in order to highlight the importance of its preservation for the use and enjoyment of future generations.

In 2009 a *Management plan* for the site was approved by the INAH. The plan promotes a sustainable vision of integral conservation and protection of the material and immaterial values of the site. The plan includes the aspects of protection, conservation, investigation, interpretation, creation of public awareness, participation and use, as well as the administration of the site and defines short, medium and long term actions.

Strict application of the existing legislation and the sustainable implementation of the defined planning tools as well as the allocation of resources to conservation and management are necessary means to ensure the conservation of the Outstanding Universal Value of the property in the long term.

## 3.2 - Please list the key attributes of Outstanding Universal Value of your property and give an assessment of their condition. As a guideline, it is suggested to focus on approximately five key attributes (no more than 15 overall).

### 3.3 - Comments, conclusions and/or recommendations related to Statement of Outstanding Universal Value

We are outreaching different levels of Government seeking for funding for ameliorating preservation. I highly recommend to UNESCO to request to the Government of the State of Veracruz to establish a plan for formalization of legal documents in order that INAH could protect effectively El Tajín

## 5. Protection and Management of the Property

### 5.1. Boundaries and Buffer Zones

#### 5.1.1 - Are the boundaries of the World Heritage property adequate to maintain the property's Outstanding Universal Value?

The boundaries **do not limit the ability to maintain** the property's Outstanding Universal Value but they **could be improved**

#### 5.1.2 - Are the boundaries of the World Heritage property known and recognised?

The boundaries **are known by both** the management authority and local communities/landowners

#### 5.1.3 - Are the buffer zone(s) of the World Heritage property adequate to maintain the property's Outstanding Universal Value?

The buffer zones **do not limit** the ability to maintain the property's Outstanding Universal Value but they could be improved

#### 5.1.4 - Are the boundaries of the buffer zones known and recognised?

The buffer zones of the World Heritage property **are known and recognised by both** the management authority and local communities/landowners

#### 5.1.5 - Comments, conclusions and/or recommendations related to boundaries and buffer zones of the World Heritage property

In our case, we need to improve legal documents recognized by the Statate Government of Veracruz

### 5.2. Protective Measures

#### 5.2.1 - Protective designation (legal, regulatory, contractual, planning, institutional and/or traditional).

La Loi Fédérale du 6 mai 1972 sur les Monuments et zones archéologiques, artistiques et historiques s'applique à l'ensemble des terres communales de la «congregación de Tajín», dans lesquelles se trouvent les parties sud et nord ainsi que les abords du site.

#### 5.2.2 - Please list any legislation and other measures (regulatory -including spatial planning- contractual, institutional or traditional) not included in 5.2.1 and indicate the category

2001 / Declaratoria de la Zona de Monumentos Arqueológicos El Tajín / Federal Law /

#### 5.2.3 - Is the legal framework (i.e. legislation and/or regulation including spatial planning) adequate for maintaining the Outstanding Universal Value including conditions of Integrity and/or Authenticity of the property?

The **legal framework** for maintaining of the Outstanding Universal Value including conditions of Authenticity and/or Integrity of the World Heritage property provides an **adequate basis for effective management and protection**

#### 5.2.4 - Is the legal framework (i.e. legislation and/or regulation) adequate in the buffer zone for maintaining the Outstanding Universal Value including conditions of Integrity and/or Authenticity of the property?

An **adequate legal framework** in the buffer zone for maintaining the Outstanding Universal Value including conditions of Authenticity and/or Integrity of the World Heritage property exists **but there are some deficiencies in implementation**

#### 5.2.5 - Is the legal framework (i.e. legislation and/or regulation) in the broader setting of the World Heritage property adequate for maintaining the Outstanding Universal Value including conditions of Integrity and/or Authenticity of the property?

An **adequate legal framework** exists for the broader setting of the World Heritage property, **but there are some deficiencies in implementation** which undermine the maintenance of the Outstanding Universal Value including conditions of Authenticity and/or Integrity of the property

#### 5.2.6 - Can the legal framework (i.e. legislation and/or regulation) be enforced?

There is **acceptable capacity/resources** to enforce legislation and/or regulation in the World Heritage property but some deficiencies of enforcement remain

#### 5.2.7 - Please provide a short summary of how the legislation, including spatial planning and other regulation, works in practice

There is a legal framework but its effects are limited because the State Government of Veracruz needs to sign an agreement with INAH

#### 5.2.8 - Comments, conclusions and/or recommendations about the information related to the measures taken to protect the World Heritage property

I highly recommend that the World Heritage Center calls to the Government of Veracruz to sign agreements with Federal Government of Mexico (INAH) for a better conservancy of El Tajín

### 5.3. Management System/Management Plan

#### 5.3.1 - Please check the box which most closely match the character of the governance and management system of the property

Public management system at national level

If 'Other', please specify

#### 6.1.10 - Has any use been made of the World Heritage Strategy for Capacity Building at the property?

Some use has been made of the World Heritage Strategy for Capacity Building

#### 6.1.11 - If the World Heritage Strategy for Capacity Building has been used, please briefly describe what has been done.

We are taking into consideration the basic guidelines

#### 6.1.12 - Are there site-specific capacity building plans or programmes that develop local expertise and that contribute to the transfer of skills for the conservation and management of the World Heritage property?

A site-based capacity building plan or programme is in place and partially implemented; some technical skills are being transferred to those managing the property locally, but most technical work is carried out by external staff

#### 6.1.13 - Comments, conclusions and/or recommendations related to human resources, expertise and training

More human resources are needed, but it depends of funding

### 7. Scientific Studies and Research Projects

#### 7.1 - Is there adequate knowledge (scientific or traditional) about the values and attributes of the World Heritage property to support planning, management and decision-making to ensure that Outstanding Universal Value is maintained?

Knowledge about the values and attributes of the World Heritage property is adequate

#### 7.2 - Is there a planned programme of research at the property which is directed towards management needs and/or improving understanding of Outstanding Universal Value?

There is no research taking place in the World Heritage property despite an identified need

#### 7.3 - Are results from research programmes publicly available and disseminated?

Research results are not shared at any level

#### 7.4 - Comments, conclusions and/or recommendations related to scientific studies and research projects

More research projects are needed, but it is required transparency with the use of funding
