### 3. Statement of Outstanding Universal Value

**3.1 - Statement of Outstanding Universal Value for the property as adopted by the World Heritage Committee**

Statement of Outstanding Universal Value

Brief synthesis

The Holašovice Historical Village is situated in the South Bohemian Region of the Czech Republic, 17 km west of Česká Budějovice and 24 km north of Český Krumlov.

The village includes twenty-three farmsteads which are placed around a rectangular village green, with the chapel of St. John of Nepomuk, a cross, a forge and a small fish-pond

Holašovice is an exceptionally complete and well preserved example of a traditional central European village, containing a number of high-quality vernacular buildings from the 18th and 19th centuries.

Almost all the farms are built according to the same pattern; usually, they are U-shaped with a farmyard in the middle. The gables facing the village green and their stucco decoration are in a style known as South Bohemian "Folk Baroque". Almost always, they feature the year of foundation of the house as well as some decorative elements; all of it is painted in a variety of colours. In fact, on the facades, Holašovice master-builders replicated decorations inspired by manorial buildings of Bohemia and Austria. In addition to large farmsteads, the Holašovice Historic Village includes several farming houses which are much smaller.

The small chapel of St. John of Nepomuk features a high bell-shaped facade. It has a gable roof and a hip roof on one side, as well as a lantern-turret on four pillars with a bell. The interior is vaulted and closed by two lunettes. The village forge and the blacksmith's house are single-storey buildings with a gable roof. The forge features a typical arched opening overlooking the village green (now closed since the building is presently inhabited).

**Criterion (ii):** Holašovice is of special significance in that it represents the fusion of two vernacular building traditions to create an exceptional and enduring style, known as South Bohemian "Folk Baroque".

**Criterion (iv):** The exceptional completeness and excellent preservation of Holašovice and its buildings make it an outstanding example of traditional rural settlement in central Europe.

Integrity

All the key elements which the Outstanding Universal Value of the Holašovice Historic Village is based upon are situated within its boundaries. The boundaries and the size of the property are appropriate. The historic village has a stabilised structure inside which no change is planned. Partial improvements that have been made in various buildings have had only small impact on them. As regards to the volumes and details of the new buildings, there was a consistent respect for tradition. No planned pressure exists concerning new constructions that could jeopardize the visual integrity of the conservation area, within its boundaries. The buffer zone is delimited but subject to threats coming from potential urban development that might have a serious impact on the visual context of the property and that could also jeopardize the visual integrity of the protected area as a whole.

Authenticity

The village of Holašovice is a perfectly preserved and exceptionally complete example of a central European village built on a traditional ground that includes a large number of 18th and 19th century highly valuable vernacular buildings. The village has kept its original medieval layout, land parcelling and its historical appearance. Hence, the authenticity of the layout and of the land parcelling of the village, which have been stabilized in the 19th century, is very high. This assertion is documented by the early maps produced by cadastral surveys.

A number of the individual farmsteads have preserved a substantial measure of authenticity in their internal layouts and external features. However, others have undergone radical changes, especially to their interiors, which have severely reduced their overall authenticity; this is especially applicable to the buildings used as retirement homes.

Protection and management requirements

The Holašovice Historic Village is designated a village heritage reservation under Act No. 20/1987 Coll. on State Heritage Preservation as amended. Twenty-one farmsteads around the central village green and the forge and the blacksmith's house in the centre of the village green are designated cultural heritage assets and protected under the Act mentioned above.

Most buildings that are part of the property are privately owned. In municipal ownership there are: farmstead No 18 (village pub), the forge and the blacksmith's house No 23 and house No 43), the chapel and other religious objects (crosses, sanctuaries).

The management plan of the property is in effect and is updated regularly. The property management is a responsibility of the municipality of Jankov whose administrative powers cover Holašovice. This municipality provides the maintenance, functioning and development of the property. Because of the size of the site and of the complex structure of the properties, individual maintenance schedules have been set.

The buffer zone has been defined in accordance with applicable regulations. It is identical to the protective zone of the village heritage reservation. However, the potential urban development might have an impact on the visual context of the property with the surrounding landscape. Several measures, which are integrated in the actual development plan, were taken to mitigate this risk. Precondition for new construction in major development areas is the establishment of regulatory plans, zoning plans and studies, which will determine detailed regulations in these localities.

Financial instruments for the conservation of the property namely include grant schemes and funding through the programme of the Ministry of Culture of the Czech Republic allocated to the maintenance and conservation of the immovable cultural heritage, as well as financial resources allocated from other public budgets.

Since 2000, annual monitoring reports have been prepared at the national level to serve World Heritage property manager, the Ministry of Culture, the National Heritage Institute and other agencies involved.

#### 5. Protection and Management of the Property

##### 5.1. Boundaries and Buffer Zones

**5.1.1 - Are the boundaries of the World Heritage property adequate to maintain the property's Outstanding Universal Value?**

The boundaries are **adequate to maintain** the property's Outstanding Universal Value

**5.1.2 - Are the boundaries of the World Heritage property known and recognised?**

The boundaries are **known by both** the management authority and local communities/landowners

**5.1.3 - Are the buffer zone(s) of the World Heritage property adequate to maintain the property's Outstanding Universal Value?**

The buffer zones are **adequate** to maintain the property's Outstanding Universal Value

#### 5.1.4 - Are the boundaries of the buffer zones known and recognised?

The buffer zones of the World Heritage property **are known and recognised by both** the management authority and local communities/landowners

#### 5.1.5 - Comments, conclusions and/or recommendations related to boundaries and buffer zones of the World Heritage property

### 5.2. Protective Measures

#### 5.2.1 - Protective designation (legal, regulatory, contractual, planning, institutional and/or traditional).

- Under the provisions of Law No 20/87 on State Care of Historical Monuments, implemented by Decree No 66 of the Ministry of Culture of 26 April 1988, 23 buildings around the village square of Holasovice are designated as protected monuments. The whole village was designated by State Decree No 127/1995 as an historic preservation site, in accordance with Article 5 of the 1987 Law. All interventions must be authorized by the relevant authority. The District Committee in České Budejovice declared the area round the village a conservation zone in September 1996. This means that all proposals for building, reconstruction, or other forms of intervention must be submitted to the District authorities for approval.
- On 20 July 2011 the government of the Czech Republic approved the "Concept of monument care in the Czech Republic for 2011-2016". The concept is based on a joint general conceptual material of the resort called "State Culture Policy", and it also follows up on conceptual materials about protection of other elements of cultural heritage, i.e. the "Concept of more effective care of movable cultural heritage in the Czech Republic for 2010-2014", which was acknowledged by the government of the Czech Republic on 1 December 2010, and the "Concept of more effective care of traditional folk culture in the Czech Republic for 2011 – 2015", which was approved by the government of the Czech Republic on 5 January 2011
- Decree of the Ministry of Culture No. 420/2008 Coll. stipulating the essential elements and content of the heritage reservation and heritage zone protection plans
- Act No. 183/2006 Coll., on Land Use Planning and on the Building Procedure Code
- Decree of the Ministry of Regional Development No. 500/2006 Coll., on supporting analytical zoning data
- Decree of the Ministry of Culture No. 187/2007 Coll., stipulating the content and essential elements of zoning plans for areas with archaeological finds

## 12. Summary and Conclusions

### 12.1. Summary - Factors affecting the Property

#### 12.1.1 - Summary - Factors affecting the Property

4.1	Buildings and Development						
4.1.1	Housing	(ii), (iv) Attributes: • urban structure • preserved layout and architectural structure of farmsteads • specific decorations of facades • materials and historic structures	heritage preservation	continuously	continuously	The National Heritage Institute, Regional Office , Site Manager	It is a matter of the Local Development Plan to find agreement on the development areas of the municipality. It is necessary to conserve and preserve the existing built-up area of the municipality to maintain the maximum values.
4.2	Transportation Infrastructure						
4.2.1	Ground transport infrastructure	This factor does not apply to the monuments themselves or is very marginal. However, this factor has impacts on public spaces, furniture, services, greenery, and vegetation.	additional P+R for tourists, traffic signs, information panels	continuously	continuously	Site Manager, municipality	none

4.3		Services Infrastructures						
4.3.2	Renewable energy facilities	(iv) Panoramic, visual values	A community photovoltaic project is being prepared.	continuously	Project work begins in 2023. The end of the project's realization is open.	Site Manager, municipality	The aim is to cover the roof of a building outside the WHS with photovoltaic devices. For general methodology by the NHI see <a href="https://www.npu.cz/cs/pamatkova-pece/o-pamatkove-peci/metodicke-materialy/fotovoltaika">https://www.npu.cz/cs/pamatkova-pece/o-pamatkove-peci/metodicke-materialy/fotovoltaika</a> (ENG version).	
4.7		Local conditions affecting physical fabric						
4.7.1	Wind	(ii), (iv) Attributes: • materials and historic structures	maintenance of the property in the best possible condition	continuously	continuously	Site Manager, Institutions of the heritage care	In the context of climate change, this topic will still be a very closely controlled criterion - placement and fastening of roof coverings to the buildings, secondary property damage caused by wind gusts (damage to cars, furniture, deterioration)	
4.7.6	Water (rain/water table)	(ii), (iv) Attributes: • materials and historic structures	measures against water from torrential rains - water drains into separate sewers, anti-flood measures - drainage, etc.	continuously	continuously, partial realization in 2023	Site Manager, National Heritage Institute	In the context of climate change, this topic will still be a closely observed criterion - water retention in the landscape, torrential rains, the retention capacity of the soil around the monument, etc.	
4.8		Social/Cultural uses of heritage						
4.8.6	Impacts of tourism/Visitation/Recreation	This factor does not apply to the monuments themselves or is very marginal. The impacts of this factor are on public spaces, furniture, services, greenery, and vegetation,	parking lots (P+R), traffic signs, tourist information panels, active management and strategy of tourism	continuously	continuously	Municipality, Regional Office	Optimal way how to deal with this issue has been sought. Tourism does not have an impact on the site as such but the behavior of some tourists is inappropriate (for example: they destroy the newly installed furniture)	
4.10		Climate change and severe weather events						
4.10.3	Drought	(ii), (iv) Real estate (groundwater as a binder of historical building materials), deterioration of buildings, the life of local residents, for more informations see the comment.	Connection to the water supply system (high-quality and abundant sources of water for supplying the population with drinking water), water retention in the landscape - construction of ponds, wetlands, maintenance of natural floodplain forests	continuously	continuously (connection to the water system until 2025)	Site Manager, water managers, urban planners, and landscape architects	Holašovice is connected to its own water sources (spring pits and a well) and for these reasons, fluctuating levels occur throughout the year.	
4.11		Sudden ecological or geological events						
4.11.6	Fire (wildfire)	(ii) Attributes: • preserved layout and architectural structure of farmsteads • specific decorations of facades • materials and historic structures	to follow safety rules, prevention There is a general crisis plan for the South Bohemia Region and a fire regulation of the municipality from 2019.	continuously	continuously	Site Manager, owners of the monuments, fire brigade of Holašovice, fire brigade of the South Bohemia Region, Integrated Rescue System	It is exceptional but is very important to pay attention to the prevention and fire protection of the site.
