3. Statement of Outstanding Universal Value

3.1 - Statement of Outstanding Universal Value for the property as adopted by the World Heritage Committee

Statement of Outstanding Universal Value

San Miguel de Allende is an early example of a rational territorial and urban development in the Americas, related to the protection of one of the main Spanish inland roads. The town flourished in the 18th century with the construction of significant religious and civil architecture, which exhibits the evolution of different trends and styles, from Baroque to late 19th century Neo-Gothic. Urban mansions are exceptionally large and rich for a medium-size Latin American town and constitute an example of the transition from Baroque to Neo-Classic. The Sanctuary of Atotonilco is a remarkable architectural complex that illustrates a specific response, inspired by the doctrine of Saint Ignacio de Loyola. Its interior decoration, especially mural painting, makes the Sanctuary a masterpiece of Mexican Baroque. Both the town and the Sanctuary, intimately linked, played a significant role in the process of Mexican independence, with impacts throughout Latin America.

Criterion (ii): San Miguel de Allende constitutes an exceptional example of the interchange of human values; due to its location and functions, the town acted as a melting pot where Spaniards, Creoles and Amerindians exchanged cultural influences, something reflected in the tangible and intangible heritage. The Sanctuary of Jesús Nazareno de Atotonilco constitutes an exceptional example of the cultural exchange between European and Latin American cultures; the architectural disposition and interior decoration testify to the interpretation and adaptation of the doctrine of Saint Ignacio de Loyola to this specific regional context.

Criterion (iv): San Miguel de Allende is an exceptional example of the integration of different architectural trends and styles on the basis of a 16th century urban layout. Religious and civil architecture exhibit the evolution of different styles, well integrated into a homogeneous urban landscape. Urban mansions are exceptionally large and rich for a medium-size Latin American town. The Sanctuary of Atotonilco is an outstanding example of a specific religious settlement, containing exceptional decoration that makes it a masterpiece of Mexican Baroque.

The required conditions of integrity and authenticity have been met; both the town and Sanctuary have been subject to few significant alterations over time, urban changes have been adapted to the town's features and scale, and restoration works have been carried out according to appropriate theoretical and technical principles.

The legal system in place ensures the adequate protection of the property and the town and the Sanctuary exhibit an acceptable state of conservation. Management policies, structures and plans in place are adequate to ensure the preservation of the property's values, integrity and authenticity.

3.2 - Please list the key attributes of Outstanding Universal Value of your property and give an assessment of their condition. As a guideline, it is suggested to focus on approximately five key attributes (no more than 15 overall).

The infrastructure of the land communication routes are the only means to reach the Site, since there are four road accesses, through which the bridge to the airports and main cities is established. There are no lakes, dams or seas nearby, so maritime transport is not relevant, since it is non-existent. There is no underground infrastructure network, so this non-existent means of communication is not relevant.

The historic centre of San Miguel de Allende is protected at federal level by a 1982 executive order, in the framework of the 1972 Federal Law on Archaeological, Artistic and Historic Zones and Monuments. According to the Mexican Law, the area has been declared "Historic Monuments Zone". The Sanctuary of Jesus Nazareno de Atotonilco in protected in the framework of the 1972 Federal Law on Archaeological, Artistic and Historic Zones and Monuments. At State level, the Law of Urban Development of the State of Guanajuato (September 1997) declares the public utility of the conservation and protection of the natural surroundings and the cultural heritage of the population centres.

Several articles of this Law establish obligations of local governments to implement urban planning and protection of cultural heritage. Article 37 establishes that conservation policies will be applied to, among others, natural and cultural values. Article 41 establishes that owners of buildings located in areas where conservation policies are applied are bound to obligations derived from urban development regulations. The Municipal Statutory Law of the State of Guanajuato (July 2001) establishes, among the responsibilities of local governments, the protection the cultural heritage.

12.2. Summary - Management Needs

12.2.1 - Summary - Management Needs

5.1	Boundaries and Buffer Zones				
		Actions	Timeframe	Lead agency (and others involved)	More info / comment
5.1.2	The boundaries of the World Heritage property are known by the management authority but are not known by local communities/landowners	Work is carried out through the municipal government through the Directorate of the Historic Center and Heritage in educational documents for the population.	In process	Municipal government Directorate of the Historic Center and Heritage	Monitoring activities are carried out to analyze the state of their heritage, thus linking the population to participate from society.
5.3	Management System/Management Plan				
5.3.5	Some use has been made of the Historic Urban Landscape Recommendation to develop policies and best practices for the protection of the property	The coordination of the municipal and federal governments work together on the recommendations of the Historical Urban Landscape, achieving a good state of conservation, inside and outside. Land speculation with real estate has been controlled .	It is carried out permanently, transcends public administrations.	The municipal government and the federal government implement surveillance actions permanently, inside and outside the site, inspections are carried out in the Monument Zone, Heritage Zone and in the Zone demarcated as the Historic Center.	The Management Plan is a regulatory instrument that is updated so that its validity is permanent.

5.3.7	No use has been made of the Policy Document on the Impacts of Climate Change on World Heritage Properties at the property	Climate change has generated some phenomena indirectly, these cause water runoff in the rainy season.	Preventive measures are taken permanently by the Civil Protection bodies of the Municipal Government	The Municipal Government, through the direction of Civil Protection, carries out monitoring activities to take preventive actions related to meteorological phenomena in rainy seasons.	The rainy seasons represent the risk factor for the area, since the site is located in an arid zone.
5.3.9	No use has been made of the Strategy for Reducing Risks from Disasters at World Heritage Properties at the property	No actions have been implemented regarding this issue, because it does not represent a risk factor.	It is not implemented yet.	The municipal public administration is aware of the issue, but no action has yet been taken in this regard.	There are no actions at the moment.
5.3.14	An annual work/action plan exists for the property but few of the activities are being implemented	Activities are carried out that are focused on conservation, preservation through the maintenance of material heritage, however its dissemination is limited.	On a permanent basis, annual investment programs are carried out for the activities.	The Municipal Government, through the Historical Center Directorate, in coordination with the Association of Mexican World Heritage Cities, presents the investment projects for the approval of the normative instances.
