Statement of Outstanding Universal Value

Brief synthesis

Begun in 1248, the building of this Gothic masterpiece took place in several stages and was not completed until 1880. Over seven centuries, its successive builders were inspired by the same faith and by a spirit of absolute fidelity to the original plans. Apart from its exceptional intrinsic value and the artistic masterpieces it contains, Cologne Cathedral bears witness to the strength and endurance of European Christianity. No other Cathedral is so perfectly conceived, so uniformly and uncompromisingly executed in all its parts.

Cologne Cathedral is a High Gothic five-aisled basilica (144.5 m long), with a projecting transept (86.25 m wide) and a tower façade (157.22 m high). The nave is 43.58 m high and the side-aisles 19.80 m. The western section, nave and transept begun in 1330, changes in style, but this is not perceptible in the overall building. The 19th century work follows the medieval forms and techniques faithfully, as can be seen by comparing it with the original medieval plan on parchment.

The original liturgical appointments of the choir are still extant to a considerable degree. These include the high altar with an enormous monolithic slab of black limestone, believed to be the largest in any Christian church, the carved oak choir stalls (1308-11), the painted choir screens (1332-40), the fourteen statues on the pillars in the choir (c. 1300), and the great cycle of stained-glass windows, the largest existent cycle of early 14th century windows in Europe. There is also an outstanding series of tombs of twelve archbishops between 976 and 1612.

Of the many works of art in the Cathedral, special mention should be made to the Gero Crucifix of the late 10th century, in the Chapel of the Holy Cross, which was transferred from the pre-Romanesque predecessor of the present Cathedral, and the Shrine of the Magi (1180-1225), in the choir, which is the largest reliquary shrine in Europe. Other artistic masterpieces are the altarpiece of St. Clare (c. 1350-1400) in the north aisle, brought here in 1811 from the destroyed cloister church of the Franciscan nuns, the altarpiece of the City Patrons by Stephan Lochner (c. 1445) in the Chapel of Our Lady, and the altarpiece of St. Agilolphus (c. 1520) in the south transept.

Criterion (i): Cologne Cathedral is an exceptional work of human creative genius.

Criterion (ii): Constructed over more than six centuries Cologne Cathedral marks the zenith of cathedral architecture and at the same time its culmination.

Criterion (iv): Cologne Cathedral is a powerful testimony to the strength and persistence of Christian belief in medieval and modern Europe.

Integrity

Cologne Cathedral contains all the elements necessary to express the Outstanding Universal Value and is of appropriate size. All features and structures to convey its significance as Gothic masterpiece are present.

Authenticity

Cologne Cathedral has lost its original architectural context, but in the nineteenth and twentieth century an urban ensemble has been created around it, of which the building of the new Wallraf-Richartz-Museum is the last element. Form and design, use and function of Cologne Cathedral have remained unchanged during the centuries of construction. All the work, from the 13th to the 19th century, was carried out with scrupulous respect for the original design, and this tradition was continued in the post-World War II reconstruction. In this respect, Cologne Cathedral may be considered to be *sui generis* and hence its authenticity is absolute.

Protection and management requirements

The laws and regulations of the Federal Republic of Germany and the State of North Rhine-Westphalia guarantee the consistent protection of the Cologne Cathedral and its surroundings: The Cathedral is a listed monument according to paragraphs 2 and 3 of the Act on the Protection and Conservation of Monuments in the State of North Rhine-Westphalia, dated 11March 1980 (Protection Law). Conservation and building activities within and outside the property and in the buffer zone are regulated by paragraph 9 (2) of the Protection Law and Local Building Plans in order to ensure the effective protection of the important views of the Cathedral.

A Steering Committee (the Cathedral Construction Commission or Dombaukommission), which was established in 1946 and consists of the Archbishop of Cologne, the Dean of the Cathedral, the Vicar General of the Archbiocese of Cologne, the Minister of the State North Rhine-Westphalia in charge of monument protection and the State Conservator of the Ministry, supervises the work of the Cathedral Workshop. The Cathedral Workshop – under the leadership of the Cathedral architect – is responsible for the maintenance, conservation and restoration in the medieval tradition and acts in concert with the regional and local historic monument conservation authorities.

The management system consists of a set of maintenance and conservation measures which is annually reviewed and updated when required by the Steering Committee.

| | | Total 100 % | Total 100 % |

6.1.2 - Please comment here on any other aspects of funding sources not covered in the table above

The current cost of maintaining the cathedral in 2023 is estimated at 7.86 million euros. Of this, the chapter of the High Cathedral Church is contributing \leq 300,000, the Archbishopric of Cologne \leq 1.53 million, the federal state of North Rhine-Westphalia \leq 1.113 million, the city of Cologne \leq 155,000 and the private Zentral-Dombauverein (www.zdv.de) \leq 3.85 million. The other subsidies are raised through donations.

6.1.3 - Is the current budget sufficient to manage the World Heritage property effectively?

The available budget is acceptable but could be further improved to fully meet the management needs

6.1.4 - Are the existing sources of funding secure and likely to remain so?

The existing sources of funding are secure over the medium-term and planning is underway to secure funding over the long-term

6.1.5 - Comments, conclusion, and/or recommendations related to finance and infrastructure

The running costs for the maintenance of Cologne Cathedral can currently still be met by the funding bodies. Rising material costs and personnel costs will require increased subsidies in the future.

6.1.6 - Estimate the distribution of men and women involved in the management, conservation, interpretation of the World Heritage properties and the extent to which they are drawn from local communities.

From local communities %

| 6.1.6.1 | Men | 50 % | 50 % |
|---------|-------|-------------|-------------|
| 6.1.6.2 | Women | 50 % | 50 % |
| | | Total 100 % | Total 100 % |

6.1.7 - Are available human resources adequate to manage the World Heritage property?

Human resources are **adequate** for management needs

6.1.8 - Considering the management needs of the World Heritage property, please rate the availability of professionals in the following disciplines

| Conservation | Good |
|--|------|
| Environmental sustainability | Fair |
| Community participation and inclusion | Good |
| Risk preparedness | Fair |

14. Good Practice in the Implementation of the World Heritage Convention

14.1 - Example of good practice in World Heritage protection, identification, conservation or management at the property level

http://www.cathedral-workshops.org/ http://www.koelner-dombauhuette.de/ On 17 December 2020, the UNESCO Intergovernmental Committee for the Safeguarding of Intangible Cultural Heritage inscribed the practices of construction workshops (Bauhütten) on its Register of Good Safeguarding Practices. The nomination was submitted by 18 construction workshops from five European countries. Cathedral and minster workshops (Bauhütten) are multidisciplinary in nature: such workshops employ a wide variety of people ranging from apprentices and journeypersons to workshop masters, minster architects, and cathedral architects. They transmit the knowledge and skills of a wide variety of trades, train people who are just starting out in these trades, keep festivals and rituals alive, document their work, and are ambassadors to the outside world. Some workshops also include archivists, art historians, communication officers, and commercial staff.
