## 3. Statement of Outstanding Universal Value

### 3.1 - Statement of Outstanding Universal Value for the property as adopted by the World Heritage Committee

#### Statement of Outstanding Universal Value

##### Brief synthesis

The inscribed site is a serial property comprising the Historic Centre of Prague situated on the territory of the self-governing administrative unit of the City of Prague, and of the Průhonice Park, located southeast of the city on the territory of the Central Bohemia.

Prague is one of the most beautiful cities in Europe in terms of its setting on both banks of the Vltava River, its townscape of burgher houses and palaces punctuated by towers, and its individual buildings. The historic centre represents a supreme manifestation of Medieval urbanism (the New Town of Emperor Charles IV built as the New Jerusalem). It has been saved from any large-scale urban renewal or massive demolitions and thus preserves its overall configuration, pattern and spatial composition. The Prague architectural works of the Gothic Period (14th and 15th centuries), of the High Baroque of the 1st half of the 18th century and of the rising modernism after the year 1900, influenced the development of Central European, perhaps even all European, architecture. The historic centre also represents one of the most prominent world centres of creative life in the field of urbanism and architecture across generations, human mentality and beliefs.

In the course of the 1100 years of its existence, Prague's development can be documented in the architectural expression of many historical periods and their styles. The city is rich in outstanding monuments from all periods of its history. Of particular importance are Prague Castle, the Cathedral of St Vitus, Hradčanský Square in front of the Castle, the Valdštejn Palace on the left bank of the river, the Gothic Charles Bridge, the Romanesque Rotunda of the Holy Rood, the Gothic arcaded houses with Romanesque cores around the Old Town Square, the Church of Our Lady in front of Týn, the High Gothic Minorite Church of St James in the Old Town (Staré Město), the Early Gothic so-called Old-New Synagogue in the Jewish Quarter (Josefov), the late 19th century buildings and the medieval town plan of the New Town (Nové Město).

As early as the Middle Ages, Prague became one of the leading cultural centres of Christian Europe. The Prague University, founded in 1348, is one of the earliest in Europe. The milieu of the University in the last quarter of the 14th century and the first years of the 15th century contributed among other things to the formation of ideas of the Hussite Movement which represented in fact the first steps of the European Reformation. As a metropolis of culture, Prague is connected with prominent names in art, science and politics, such as Charles IV, Petr Parléř, Jan Hus, Johannes Kepler, Wolfgang Amadeus Mozart, Franz Kafka, Antonín Dvořák, Albert Einstein, Edvard Beneš (co-founder of the League of Nations) and Václav Havel.

The Průhonice Park (the area of 211.42 ha) was founded in the year 1885 by the Count Arnošt Emanuel Silva-Tarouca. The result of his lifelong work is an original masterpiece of garden landscape architecture of worldwide importance. The park uses advantage of the miscellaneous valley of the Botič Stream and the unique combination of native and introduced exotic tree species. The Průhonice Park became in the time of its foundation the entrance gate to Bohemia (as well as to the whole Europe) for newly introduced plants. An integral part of the park is also a Neo-Renaissance country house. In the area there is also a small medieval church of the Nativity of the Virgin Mary.

**Criterion (ii):** The Historic Centre of Prague admirably illustrates the process of continuous urban growth from the Middle Ages to the present day. Its important role in the political, economic, social, and cultural evolution of Central Europe from the 14th century onwards and the richness of its architectural and artistic traditions meant that it served as a major model for urban development of much of Central and Eastern Europe.

**Criterion (iv):** Prague is an urban architectural ensemble of outstanding quality, in terms of both its individual monuments and its townscape, and one that is deservedly world-famous.

**Criterion (vi):** The role of Prague in the medieval development of Christianity in Central Europe was an outstanding one, as was its formative influence in the evolution of towns. By virtue of its political significance in the later Middle Ages and later, it attracted architects and artists from all over Europe, who contributed to its wealth of architectural and artistic treasures. The 14th century founding of the Charles University made it a renowned seat of learning, a reputation that it has preserved up to the present day. Since the reign of Charles IV, Prague has been intellectual and cultural centre of its region, and is indelibly associated with such world-famous names as Wolfgang Amadeus Mozart and Franz Kafka.

##### Integrity

All the key elements that convey the Outstanding Universal Value of this serial property are situated within the inscribed area. The boundaries and the areas of the two component parts of the serial property are adequate. At the national level, their buffer zones are defined in accordance with existing regulations. The two component parts have stabilized town-planning structures.

The integrity of the Historic Centre of Prague is threatened by the pressure of the developers wishing to build oversized new buildings in the historic centre and its buffer zone. For this reason, the height and volume of new buildings must be reviewed by competent authorities. The integrity of the Historic Centre of Prague is also threatened by an increasing development pressure on the roovescape and it might have a negative impact on the visual integrity of the city which has remained well-preserved so far. The integrity of the Průhonice Park is threatened by the pressure of urban development in its buffer zone. This fact is provoked by the location of Průhonice close to the capital city.

##### Authenticity

The Historic Centre of Prague is of high authenticity. It represents an organic urban development over more than a thousand years.

The degree of authenticity of single buildings or building complexes is also very high, especially in terms of preservation of their original plots, massing, structures, materials, decoration and architectural details, in spite of the fact that some adaptations and changes were made necessary to allow continued use. The present form and appearance of the Historic Centre of Prague reflect different stages of its centuries-long development, which also proves exceptionally valuable archaeological terrain, which is protected by law. The long tradition of conservation in Prague helps to keep the authenticity of the property. Restoration works are carried out in accordance with strict criteria and using historical materials and technological processes.

The Průhonice Park is of high authenticity concerning at its present form and appearance closely reflect an example of a uniquely preserved landscape park with its original combination of native and introduced tree species. This assertion is proved by the comparison of the present form with historical plans and other documents.

##### Protection and management requirements

The property is protected by Act No. 20/1987 Coll. on State Heritage Preservation, as amended. The historic city centre itself contains a number of buildings that are

designated cultural heritage or national cultural heritage sites and is protected as an urban heritage reservation under national legislation. Any actions that may affect it must be authorized by the appropriate state or local authorities. The Pr honice Park is a national cultural heritage site, thus enjoying the highest level of protection under the Act mentioned above.

With the exception of Prague Castle, heritage preservation on the whole territory of the Historic Centre of Prague is provided by the municipal authority of the City of Prague The Prague Castle is managed by a special organisation established specifically by the Office of the President of the Republic. The Prague Castle Management has a high level of professional competence in heritage preservation.

The historic centre is adequately protected by mobile flood barriers whose efficiency has been approved during the floods in June 2013. As regards the pressure of the developers on the territory of the historic centre, the enforcement of land use planning standards and of the relevant regulations is expected to keep this type of threat under control.

The Pr honice Park is managed by the Botanical Institute of the Academy of Sciences of the Czech Republic which is responsible for the maintenance, functioning and development of the Park. In this case, it is the regional authority of Central Bohemia which is responsible for state heritage preservation.

The buffer zone of the Historic Centre of Prague is identical to the protective zone of the urban heritage reservation under the current regulations. The height and volume of new buildings are reviewed by competent authorities. The development pressures in the buffer zone of the Pr honice Park are regulated by the Land Use Plan of Pr honice. The buffer zone is identical to a protective zone of the national cultural heritage site which has set out conditions of protection.

Due to the area of the property and the complicated ownership structure inside the property, maintenance and restoration of individually protected cultural heritage sites and ensembles are subject to individual programmes. Financial instruments for the conservation of the property mainly include grant schemes, funding through the programmes of the Ministry of Culture of the Czech Republic allocated to the maintenance and conservation of the immovable cultural heritage, and amounts allocated from other state budgets.

The management plan of both component parts, i.e. the Historic Centre of Prague and the Pr honice Park, is currently under preparation. In case of a part including the historic city itself, the management plan is coordinated by the steering group and prepared by the Municipal Authority of Prague, which also prepares the General Conception of Tourism in the Capital City of Prague. The management plan of the Pr honice Park is being worked out by the Institute of Botany of the Academy of Science of the Czech Republic.

In terms of heritage preservation, the condition of the property is good, and is subject to regular maintenance. Since 2000, annual monitoring reports have been prepared at the national level to serve World Heritage property managers, the Ministry of Culture, the National Heritage Institute and other agencies involved.

## 5. Protection and Management of the Property

### 5.1. Boundaries and Buffer Zones

#### 5.1.1 - Are the boundaries of the World Heritage property adequate to maintain the property's Outstanding Universal Value?

The boundaries are **adequate to maintain** the property's Outstanding Universal Value

#### 5.1.2 - Are the boundaries of the World Heritage property known and recognised?

The boundaries **are known by both** the management authority and local communities/landowners

#### 5.1.3 - Are the buffer zone(s) of the World Heritage property adequate to maintain the property's Outstanding Universal Value?

The buffer zones are **adequate** to maintain the property's Outstanding Universal Value

#### 5.1.4 - Are the boundaries of the buffer zones known and recognised?

The buffer zones of the World Heritage property **are known and recognised by both** the management authority and local communities/landowners

#### 5.1.5 - Comments, conclusions and/or recommendations related to boundaries and buffer zones of the World Heritage property

### 5.2. Protective Measures

#### 5.2.1 - Protective designation (legal, regulatory, contractual, planning, institutional and/or traditional).

- The draft of a new Law on National Heritage Conservation which should replace the existing Act No. 20 of 1987 Coll. has been finalized by the Czech Ministry of Culture. This proposal takes in account the World Heritage and defines principles and mechanisms in relation to it.
- On 20 July 2011 the government of the Czech Republic approved the "Concept of monument care in the Czech Republic for 2011-2016". The concept is based on a joint general conceptual material of the resort called "State Culture Policy", and it also follows up on conceptual materials about protection of other elements of cultural heritage, i.e. the "Concept of more effective care of movable cultural heritage in the Czech Republic for 2010-2014", which was acknowledged by the government of the Czech Republic on 1 December 2010, and the "Concept of more effective care of traditional folk culture in the Czech Republic for 2011 – 2015", which was approved by the government of the Czech Republic on 5 January 2011.
- Act No. 183/2006 Coll., on Land Use Planning and on the Building Procedure Code (the Building Act) ([Source: SOC report 2012, Periodic Reporting Cycle 1, Periodic Reporting Cycle 2](#))

#### Comment

In order to unify the terminology of some of the laws currently still in force, we use the opportunity to add the corrected translations to section 5.2.2.

#### 5.2.3 - Is the legal framework (i.e. legislation and/or regulation including spatial planning) adequate for maintaining the Outstanding Universal Value including conditions of Integrity and/or Authenticity of the property?

An **adequate legal framework** for maintaining of the Outstanding Universal Value including conditions of Authenticity and/or Integrity of the World Heritage property exists **but there are some deficiencies in implementation**

#### 5.2.4 - Is the legal framework (i.e. legislation and/or regulation) adequate in the buffer zone for maintaining the Outstanding Universal Value including conditions of Integrity and/or Authenticity of the property?

An **adequate legal framework** in the buffer zone for maintaining the Outstanding Universal Value including conditions of Authenticity and/or Integrity of the World Heritage property exists **but there are some deficiencies in implementation**

#### 5.2.5 - Is the legal framework (i.e. legislation and/or regulation) in the broader setting of the World Heritage property adequate for maintaining the Outstanding Universal Value including conditions of Integrity and/or Authenticity of the property?

An **adequate legal framework** exists for the broader setting of the World Heritage property, **but there are some deficiencies in implementation** which undermine the maintenance of the Outstanding Universal Value including conditions of Authenticity and/or Integrity of the property

### 5.2.6 - Can the legal framework (i.e. legislation and/or regulation) be enforced?

There is **acceptable capacity/resources** to enforce legislation and/or regulation in the World Heritage property but some deficiencies of enforcement remain

### 5.2.7 - Please provide a short summary of how the legislation, including spatial planning and other regulation, works in practice

None

## 12.2. Summary - Management Needs

## 12.2.1 - Summary - Management Needs

5.2	Protective Measures				
		Actions	Timeframe	Lead agency (and others involved)	More info / comment
5.2.3	An <b>adequate legal framework</b> for maintaining of the Outstanding Universal Value including conditions of Authenticity and/or Integrity of the World Heritage property exists <b>but there are some deficiencies in implementation</b>	Better conditions for preserving the authenticity and integrity of the property will be part of the new conceptual documents, the binding spatial plan of Prague - the Metropolitan Plan and the Prague Heritage Reservation Territorial Study.	Approval and the beginning of the effectiveness of the Metropolitan Plan is expected during 2023. The Prague Heritage Reservation Territorial Study should be completed in September 2023.	The City of Prague, The Prague Institute of Planning and Development, Ministry of Culture	The new spatial plan has been prepared in accordance with the principles of the Management Plan and commented on by the authorities of heritage protection (Ministry of Culture).
5.2.4	An <b>adequate legal framework</b> in the buffer zone for maintaining the Outstanding Universal Value including conditions of Authenticity and/or Integrity of the World Heritage property exists <b>but there are some deficiencies in implementation</b>	Better conditions for the protection of the authenticity and integrity of the WH property as a result of changes in the protection zone will be created by the approval of the new Metropolitan Plan and Prague Heritage Reservation Territorial Study.	Approval and the beginning of the effectiveness of the Metropolitan Plan is expected during 2023. The territorial study should be completed in September 2023.	The City of Prague, The Prague Institute of Planning and Development, Ministry of Culture	The new zoning plan has been prepared in accordance with the principles of the Management Plan and commented on by the heritage protection authorities (Ministry of Culture).
5.2.5	An <b>adequate legal framework</b> exists for the broader setting of the World Heritage property and the buffer zone, <b>but there are some deficiencies in implementation</b> which undermine the maintenance of the Outstanding Universal Value including conditions of Authenticity and/or Integrity of the property	Better conditions for the protection of the authenticity and integrity of the WH property as a result of changes in its wider area will be created by the approval of new conceptual document, the binding spatial plan of Prague - the Metropolitan Plan	Approval and the beginning of the effectiveness of the Metropolitan Plan is expected during 2023.	The City of Prague, The Prague Institute of Planning and Development, Ministry of Culture	The new zoning plan has been prepared in accordance with the principles of the Management Plan and commented on by the heritage protection authorities (Ministry of Culture).
5.2.6	There is <b>acceptable capacity/resources</b> to enforce legislation and/or regulation in the World Heritage property but some deficiencies of enforcement remain	To strengthen the existing instruments of heritage authorities (fines could be higher for example).	Continuous process	Based on the Heritage Law, Prague City Hall shall act within its competencies and capacities.	Improving of relevant heritage legislation and local regulation is a continuous procedure. Czech legal system corresponds to requirements and wording of Operational Guidelines and Convention.
5.3	Management System/Management Plan				
5.3.5	<b>Some use</b> has been made of the Historic Urban Landscape Recommendation to develop policies and best practices for the protection of the property	The Historic Urban Landscape Recommendation is reflected in the concepts for the PHR Territorial Plan and Territorial Study.	Approval and the entering into force of the Metropolitan Plan is expected over the course of 2023. The territorial study should be completed in September 2023.	City of Prague, Prague Institute of Planning and Development	The Historic Urban Landscape Recommendation was and is an important material for the teams that produced the conceptual materials for Prague. These materials are, however, still waiting for approval at present.

5.3.11	There is <b>coordination</b> between the range of administrative bodies involved in the management of the property, <b>but it could be improved</b>	Coordination and cooperation among all authorities concerned is and will continue to be improved upon and deepened in the form of commissions and joint working groups.	Continuous process	Primarily the City of Prague and other affected public administration bodies.	A significant shift in cooperation among the bodies involved has taken place in recent years.
5.3.13	The management system at the property is <b>only being partially implemented</b>	Management system will be implemented in accordance with the Management Plan.	Continuous process	Plenty of authorities and stakeholders according to the Management Plan.	No further comment

6.1	<b>Funding</b>				
6.1.3	The available <b>budget is acceptable</b> but <b>could be further improved</b> to fully meet the management needs of the World Heritage property	Increasing the budget for the maintenance and protection of the World Heritage Site is not possible due to the current socio-economic situation.	There are no plans to address this deficiency.	The City of Prague / Parliament of the Czech Republic	Due to current socio-economic situation, it is not possible to increase budget for needs of the World Heritage Site. However, site manager annually invests sufficient funds in restoration of historic buildings and preservation of OUV of the site.

8	<b>Education, Information and Awareness Building</b>				
8.2	There is a <b>limited and ad hoc education</b> and awareness programme for children and/or youth	Development and cooperation between schools and memory institutions in educating children and youth continues to take place.	Long-term	City of Prague, Ministry of Education, Youth and Sports, Prague City Tourism	General Education Programmes (for schools) have been being harmonised long-term with the offer of informal education offered by memory institutions so that all age categories have access to quality education on local history and the OUV of property.

9	<b>Visitor Management</b>				
9.9	Visitor use of the World Heritage property is managed but <b>improvements could be made</b>	At national level we have access to document: Czech Republic Tourism Development Strategy 2021–2030. For HCP: PCT Inbound Tourism Strategy. These documents determine direction for improving aspects of comfort of visitors to World Heritage property.	Long-term	City of Prague, PCT	The tourism industry has been developing dynamically in recent years, from addressing the issue of overtourism to the de facto, though temporary, cessation of tourism and greater concentration on domestic tourists.

## 14. Good Practice in the Implementation of the World Heritage Convention

### 14.1 - Example of good practice in World Heritage protection, identification, conservation or management at the property level

Within HCP, original medieval street network and block structure is successfully preserved on vast majority of historic urban lay-out. In terms of panorama towards centre of Part 001, authentic undisturbed harmonic whole fulfilling OUV criteria is successfully maintained. Strong aspect is preservation of diverse character of blocks. Significant proportion of green space has also been preserved in Part 001 and natural element of meandering river. Successful restoration and revitalisation of a number of important heritage buildings and complexes takes place. All structural changes and restoration plans, not just in Part 001 but also in the Buffer Zone, are assessed by heritage authorities at level of the City of Prague. These can also make use of opinion of state expert institution as basis for their decisions. Buffer Zone of Part 001 has been established to a sufficient extent, and its territory is also home to a number of areas with a stricter level of heritage protection. Prague public is extremely sensitive to inappropriate encroachment on historical building stock, and this societal interest is supported by critical media attention. In Pr honice Park, systematic and professional care works to maintain and restore concept of park's founder Count Silva-Tarouca in form of revitalising vegetation component in a compositional and taxonomical sense, repairing park's paths, and caring for watercourses and bodies of water. Spatial composition is successfully being rehabilitated and interesting parts of park restored. Also successful is care for extensive rock garden. A marked success was closing road that cut through parts I and II of park to public traffic, thus boosting and stabilising monument's integrity. Likewise, fencing around whole park is being successfully completed in order to ensure its protection. Minor structures in park and chateau are being repaired. Information regarding heritage care, buffer zone and interest of media is similar to with component 001.
