# **Analysis of the World Heritage List** by Category of Monument and Period

(List at 1 January 2000)

#### Introduction

This analysis was carried out at the request of the Working Group on the Representativity of the World Heritage List, which met in February-April 2000.

Its format follows that of an earlier analysis carried out by ICOMOS for the Working Party on the Global Strategy in 1994. All the cultural and mixed properties on the List have been classified according to their cultural category and their period. The categories and periods have been chosen to represent broad groupings: the analysis is capable of considerable refinement, but this would necessitate extensive consultation that the present timetable did not allow.

The analysis retains the categories of monument used in the 1994 study:

A Archaeological site

B Group of buildings C Historic town (town centre)

D Christian monument

E Islamic monument

F Buddhist monument G Hindu monument

H Other religious monument

I Military site

J Landscape

K Palace/castle

L Industrial site M Tomb

N Architectural work

O Symbolic site

P Vernacular settlement

Seven periods are used in the analysis:

i Prehistory

ii Protohistory

iii Early Old World

civilizations

iv Classical Old World

civilizations

v Pre-columbian New World civilizations

vi Historical period

vii 20th century

The regions selected do not correspond with the UNESCO regions: for example, the Arab countries have been assigned to Africa or Asia according to their geographical location and Canada and the United States of America are treated, along with Mexico, as a separate North American region.
