“World Heritage Volunteers - "Patrimonito Voluntary Action 2011"

WHV – Victoria Falls, ZAMBIA
30 July – 13 August 2011

Victoria Falls /Mosi-oa-Tunya, Zambia
Natural site inscribed in 1989

The Victoria Falls are among the most spectacular waterfalls in the world. The Zambezi River, which is more than 2 km wide at this point, plunges down a series of basalt gorges and raises an iridescent mist that can be seen more than 20 km away. The fragile ecosystem of the riverine rainforest within the waterfalls’ splash zone is also of particular interest.

**Project objectives:** The main aim of the project is to raise awareness of the importance of site preservation and to promote a sense of responsibilities among the cross boarder and the population living around the site.

**Project activities:** The volunteers will carry out awareness raising activities such as painting, putting sign posts, clearing pathway and putting edge barriers.

**Partners:** The project will be mainly supported by National Heritage Conservation who will provide shovels, paint mixing, expert painting, gloves and truck.
