How to prepare a map in answer to the Retrospective Inventory?
What is the Retrospective Inventory?

• A project aiming at clarifying the original delimitation of World Heritage properties inscribed between 1978 and 1998

• All States Parties in Europe have been requested to submit good quality maps showing the boundaries of their properties as inscribed on the World Heritage List (States Parties in North America will receive a similar request by the end of 2012)

• The expected result is improving the protection and management of early inscribed WH properties
Possible boundary issues at the time of the inscription: 1) properties with a clear delimitation, but without a good map.
Possible boundary issues at the time of the inscription: 2) Properties with an unclear delimitation
Possible boundary issues at the time of the inscription: 3) Properties without a delimitation
Requirements for complete maps

- The appropriate typology
- A clear delimitation of the property as inscribed
- A bar scale
- References to geographical coordinates
- The orientation
- A legend referring to the boundary of the World Heritage property
- The language
- The area in hectares
Requirements for complete maps: the appropriate typology
Requirements for complete maps: a clear delimitation of the property as inscribed
Requirements for complete maps: a clear delimitation of the property as inscribed.
Requirements for complete maps: a clear delimitation of the property as inscribed
Requirements for complete maps: a bar scale

1:2000
Requirements for complete maps: references to geographical coordinates → coordinate grid and/or coordinate ticks
Requirements for complete maps: the orientation
Requirements for complete maps:
a legend referring to the boundary of the World Heritage property
Requirements for complete maps: the language
