ANNEXES 1 À 3
An Act respecting the protection of wildlife species at risk in Canada

[Assented to 12th December, 2002]

Recognizing that
Canada’s natural heritage is an integral part of our national identity and history,
wildlife, in all its forms, has value in and of itself and is valued by Canadians for aesthetic, cultural, spiritual, recreational, educational, historical, economic, medical, ecological and scientific reasons,
Canadian wildlife species and ecosystems are also part of the world’s heritage and the Government of Canada has ratified the United Nations Convention on the Conservation of Biological Diversity,

providing legal protection for species at risk will complement existing legislation and will, in part, meet Canada’s commitments under that Convention,

the Government of Canada is committed to conserving biological diversity and to the principle that, if there are threats of serious or irreversible damage to a wildlife species, cost-effective measures to prevent the reduction or loss of the species should not be postponed for a lack of full scientific certainty,

responsibility for the conservation of wildlife in Canada is shared among the governments in this country and that it is important for them to work cooperatively to pursue the establishment of complementary legislation and programs for the protection and recovery of species at risk in Canada,

it is important that there be cooperation between the governments in this country to maintain and strengthen national standards of environmental conservation and that the Government of Canada is committed to the principles set out in intergovernmental

Préambule

Attendu :
que le patrimoine naturel du Canada fait partie intégrante de notre identité nationale et de notre histoire;
que les espèces sauvages, sous toutes leurs formes, ont leur valeur intrinsèque et sont appréciées des Canadiens pour des raisons esthétiques, culturelles, spirituelles, récréatives, éducatives, historiques, économiques, médicales, écologiques et scientifiques;
que les espèces sauvages et les écosystèmes du Canada font aussi partie du patrimoine mondial et que le gouvernement du Canada a ratifié la Convention des Nations Unies sur la diversité biologique;
que l’attribution d’une protection juridique aux espèces en péril complétera les textes législatifs existants et permettra au Canada de respecter une partie des engagements qu’il a pris aux termes de cette convention;
que le gouvernement du Canada s’est engagé à conserver la diversité biologique et à respecter le principe voulant que, s’il existe une menace d’atteinte grave ou irréversible à une espèce sauvage, le manque de certitude scientifique ne soit pas prétexte à retarder la prise de mesures efficaces pour prévenir sa disparition ou sa décroissance;
que la conservation des espèces sauvages au Canada est une responsabilité partagée par les gouvernements du pays et que la collaboration entre eux est importante en vue d’établir des lois et des programmes complémentaires pouvant assurer la protection et le rétablissement des espèces en péril au Canada;
agreements respecting environmental conservation,
the Canadian Endangered Species Conservation Council is to provide national leadership for the protection of species at risk, including the provision of general direction to the Committee on the Status of Endangered Wildlife in Canada in respect of that Committee’s activities and general directions in respect of the development, coordination and implementation of recovery efforts,
the roles of the aboriginal peoples of Canada and of wildlife management boards established under land claims agreements in the conservation of wildlife in this country are essential,
all Canadians have a role to play in the conservation of wildlife in this country, including the prevention of wildlife species from becoming extirpated or extinct,
there will be circumstances under which the cost of conserving species at risk should be shared,
the conservation efforts of individual Canadians and communities should be encouraged and supported,
stewardship activities contributing to the conservation of wildlife species and their habitat should be supported to prevent species from becoming at risk,
community knowledge and interests, including socio-economic interests, should be considered in developing and implementing recovery measures,
the traditional knowledge of the aboriginal peoples of Canada should be considered in the assessment of which species may be at risk and in developing and implementing recovery measures,
knowledge of wildlife species and ecosystems is critical to their conservation,
the habitat of species at risk is key to their conservation, and
Canada’s protected areas, especially national parks, are vital to the protection and recovery of species at risk,
que la coopération entre les gouvernements du pays pour le maintien et le renforcement des normes nationales de conservation de l’environnement est importante et que le gouvernement du Canada est attaché aux principes énoncés dans les accords intergouvernementaux en matière de conservation de l’environnement;
que le Conseil canadien pour la conservation des espèces en péril a la responsabilité d’établir les orientations pour l’ensemble du pays en matière de protection des espèces en péril, notamment en ce qui concerne les activités du Comité sur la situation des espèces en péril au Canada et l’élaboration et la coordination des mesures de protection et de rétablissement de ces espèces;
qu’est essentiel le rôle que peuvent jouer les peuples autochtones du Canada et les conseils de gestion des ressources fauniques établis en application d’accords sur des revendications territoriales dans la conservation des espèces sauvages dans ce pays;
que tous les Canadiens ont un rôle à jouer dans la conservation des espèces sauvages, notamment en ce qui a trait à la prévention de leur disparition du pays ou de la planète;
que, dans certains cas, les frais de la conservation des espèces en péril devraient être partagés;
que les efforts de conservation des Canadiens et des collectivités devraient être encouragés et appuyés;
que les activités d’intendance visant la conservation des espèces sauvages et de leur habitat devraient bénéficier de l’appui voulu pour éviter que celles-ci deviennent des espèces en péril;
que la connaissance et les intérêts — notamment socioéconomiques — des collectivités devraient être pris en compte lors de l’élaboration et de la mise en oeuvre des mesures de rétablissement;
que les connaissances traditionnelles des peuples autochtones du Canada devraient
NOW, THEREFORE, Her Majesty, by and with the advice and consent of the Senate and House of Commons of Canada, enacts as follows:

être prises en compte pour découvrir quelles espèces sauvages peuvent être en péril et pour l’élaboration et la mise en œuvre des mesures de rétablissement;

que la connaissance des espèces sauvages et des écosystèmes est essentielle à leur conservation;

que l’habitat des espèces en péril est important pour leur conservation;

que les aires protégées au Canada, plus particulièrement les parcs nationaux, sont importants pour la protection et le rétablissement des espèces en péril,

Sa Majesté, sur l’avis et avec le consentement du Sénat et de la Chambre des communes du Canada, édicte :

1. This Act may be cited as the Species at Risk Act.

1. Loi sur les espèces en péril.

2. (1) The definitions in this subsection apply in this Act.

« action plan » means an action plan included in the public registry under subsection 50(3) and includes any amendment to it included in the public registry under section 52.

« alternative measures » means measures, other than judicial proceedings, that are used to deal with a person who is alleged to have committed an offence.

« aquatic species » means a wildlife species that is a fish, as defined in section 2 of the Fisheries Act, or a marine plant, as defined in section 47 of that Act.

« Attorney General » means the Attorney General of Canada or, for the purposes of sections 108 to 113, an agent of the Attorney General of Canada.

« Canadian Endangered Species Conservation Council » means the Council referred to in subsection 7(1).

« Conseil canadien pour la conservation des espèces en péril » Le conseil visé au paragraphe 7(1).

« Conseil de gestion des ressources fauniques » Tout organisme, notamment un conseil, constitué en application d’un accord sur des revendications territoriales qui est habilité à exercer des attributions à l’égard d’espèces sauvages.

“competent minister” means
(a) the Minister of Canadian Heritage with respect to individuals in or on federal lands that are administered by that Minister and that are national parks, national historic sites or other protected heritage areas as those expressions are defined in subsection 2(1) of the Parks Canada Agency Act;
(b) the Minister of Fisheries and Oceans with respect to aquatic species, other than individuals mentioned in paragraph (a); and
(c) the Minister of the Environment with respect to all other individuals.

“conveyance” means a vehicle, aircraft or water-borne craft or any other contrivance that is used to move persons or goods.

“COSEWIC” means the Committee on the Status of Endangered Wildlife in Canada established by section 14.

“critical habitat” means the habitat that is necessary for the survival or recovery of a listed wildlife species and that is identified as the species’ critical habitat in the recovery strategy or in an action plan for the species.

“emergency order” means an order made under section 80.

“endangered species” means a wildlife species that is facing imminent extirpation or extinction.

“extirpated species” means a wildlife species that no longer exists in the wild in Canada, but exists elsewhere in the wild.

“federal land” means

“décret d’urgence” Décret pris au titre de l’article 80.

“espèce aquatique” Espèce sauvage de poissons, ou de la Loi sur les pêches, ou de plantes marines, au sens de l’article 47 de cette loi.

“espèce disparue du pays” Espèce sauvage qu’on ne trouve plus à l’état sauvage au Canada, mais qu’on trouve ailleurs à l’état sauvage.

“espèce en péril” Espèce sauvage disparue du pays, en voie de disparition, menacée ou préoccupante.

“espèce en voie de disparition” Espèce sauvage qui, de façon imminente, risque de disparaître du pays ou de la planète.

“espèce menacée” Espèce sauvage susceptible de devenir une espèce en voie de disparition si rien n’est fait pour contrer les facteurs menaçant de la faire disparaître.

“espèce préoccupante” Espèce sauvage qui peut devenir une espèce menacée ou une espèce en voie de disparition par l’effet cumulatif de ses caractéristiques biologiques et des menaces signalées à son égard.

“espèce sauvage” Espèce, sous-espèce, variété ou population géographiquement ou génétiquement distincte d’animaux, de végétaux ou d’autres organismes d’origine sauvage, sauf une bactérie ou un virus, qui, selon le cas :

a) est indigène du Canada;

b) s’est propagée au Canada sans intervention humaine et y est présente depuis au moins cinquante ans.

“habitat”

a) S’agissant d’une espèce aquatique, les frayères, aires d’alevinage, de croissance et d’alimentation et routes migratoires dont sa survie dépend, directement ou indirectement, ou aires où elle s’est déjà trouvée et où il est possible de la réintroduire;
Espèces en péril

ch. 29

2002

(a) land that belongs to Her Majesty in right of Canada, or that Her Majesty in right of Canada has the power to dispose of, and all waters on and airspace above that land;

(b) the internal waters of Canada and the territorial sea of Canada; and

(c) reserves and any other lands that are set apart for the use and benefit of a band under the Indian Act, and all waters on and airspace above those reserves and lands.

"habitat" means

(a) in respect of aquatic species, spawning grounds and nursery, rearing, food supply, migration and any other areas on which aquatic species depend directly or indirectly in order to carry out their life processes, or areas where aquatic species formerly occurred and have the potential to be reintroduced; and

(b) in respect of other wildlife species, the area or type of site where an individual or wildlife species naturally occurs or depends on directly or indirectly in order to carry out its life processes or formerly occurred and has the potential to be reintroduced.

"individual" means an individual of a wildlife species, whether living or dead, at any developmental stage and includes larvae, embryos, eggs, sperm, seeds, pollen, spores and asexual propagules.

"land claims agreement" means a land claims agreement within the meaning of section 35 of the Constitution Act, 1982.

"List" means the List of Wildlife Species at Risk set out in Schedule 1.

"listed" means listed on the List.

"Minister" means the Minister of the Environment.

"offence" means an offence under this Act.

"provincial minister" means any minister of the government of a province who is responsible for the conservation and management of a wildlife species in that province.

« habitat essentiel » L’habitat nécessaire à la survie ou au rétablissement d’une espèce sauvage inscrite, qui est désigné comme tel dans un programme de rétablissement ou un plan d’action élaboré à l’égard de l’espèce.

« individu » Individu d’une espèce sauvage, vivant ou mort, à toute étape de son développement. La présente définition vise également les larves, le sperme, les œufs, les embryons, les semences, le pollen, les spores et les propagules asexuées.

« infraction » Infraction à la présente loi.

« inscrite » Se dit de toute espèce sauvage qui est inscrite sur la liste.

« liste » La Liste des espèces en péril figurant à l’annexe 1.

« mesures de rechange » Mesures — autres que le recours aux procédures judiciaires — prises contre une personne à qui une infraction est imputée.

« ministre » Le ministre de l’Environnement.

« ministre compétent »

a) En ce qui concerne les individus présents dans les parcs nationaux, les lieux historiques nationaux et les autres lieux patrimoniaux protégés, au sens du paragraphe 2(1) de la Loi sur l’Agence Parcs Canada, qui sont des terres domaniales dont la gestion relève du ministre du Patrimoine canadien, ce ministre;

b) en ce qui concerne les espèces aquatiques dont les individus ne sont pas visés par l’alinéa a), le ministre des Pêches et des Océans;

c) en ce qui concerne tout autre individu, le ministre de l’Environnement.

« ministre provincial » Tout ministre d’une province chargé de la conservation et de la
“public registry” means the registry established under section 120.

“recovery strategy” means a recovery strategy included in the public registry under subsection 43(2), and includes any amendment to it included in the public registry under section 45.

“residence” means a dwelling-place, such as a den, nest or other similar area or place, that is occupied or habitually occupied by one or more individuals during all or part of their life cycles, including breeding, rearing, staging, wintering, feeding or hibernating.

“sell” includes to offer for sale or lease, have in possession for sale or lease or deliver for sale or lease.

“species at risk” means an extirpated, endangered or threatened species or a species of special concern.

“species of special concern” means a wildlife species that may become a threatened or an endangered species because of a combination of biological characteristics and identified threats.

“status report” means a report, prepared in accordance with the requirements of regulations made under subsection 21(2), that contains a summary of the best available information on the status of a wildlife species, including scientific knowledge, community knowledge and aboriginal traditional knowledge.

“territorial minister” means any minister of the government of a territory who is responsible for the conservation and management of a wildlife species in that territory.

“threatened species” means a wildlife species that is likely to become an endangered species if nothing is done to reverse the factors leading to its extirpation or extinction.

“treaty” means a treaty within the meaning of section 35 of the Constitution Act, 1982.

“wildlife management board” means any board or other body established under a land claims agreement that is authorized by the agreement to perform functions in respect of wildlife species.

gestion d’une espèce sauvage dans la province.

« ministre territorial » Tout ministre d’un territoire chargé de la conservation et de la gestion d’une espèce sauvage dans le territoire.

« moyen de transport » Tout véhicule, aéronef, bateau ou autre moyen servant au transport des personnes ou des biens.

« plan d’action » Plan d’action mis dans le registre en application du paragraphe 43(2), y compris ses modifications qui sont mises dans celui-ci en application de l’article 52.

« procureur général » Le procureur général du Canada ou, pour l’application des articles 108 à 113, le procureur général du Canada ou son représentant.

« programme de rétablissement » Programme de rétablissement mis dans le registre en application du paragraphe 43(2), y compris ses modifications qui sont mises dans celui-ci en application de l’article 45.

« rapport de situation » Sommaire de la meilleure information accessible sur la situation d’une espèce sauvage, notamment les données scientifiques ainsi que les connaissances des collectivités et les connaissances traditionnelles des peuples autochtones, dont la forme et le contenu sont conformes aux exigences réglementaires prévues en application du paragraphe 21(2).

« registre » Le registre public dont l’établissement est prévu à l’article 120.

« résidence » Gîte — terrier, nid ou autre aire occupé ou habituellement occupé par un ou plusieurs individus pendant tout ou partie de leur vie, notamment pendant la reproduction, l’élevage, les haltes migratoires, l’hivernage, l’alimentation ou l’hibernation.

a) Les terres qui appartiennent à Sa Majesté du chef du Canada ou qu’elle a le pouvoir d’aliéner, ainsi que leurs eaux et leur espace aérien;
“wildlife species” means a species, subspecies, variety or geographically or genetically distinct population of animal, plant or other organism, other than a bacterium or virus, that is wild by nature and

(a) is native to Canada; or

(b) has extended its range into Canada without human intervention and has been present in Canada for at least 50 years.

(2) For the purposes of the definition “wildlife species” in subsection (1), a species, subspecies, variety or geographically or genetically distinct population is, in the absence of evidence to the contrary, presumed to have been present in Canada for at least 50 years.

(3) A reference to a competent minister in any provision of this Act is to be read as a reference to the competent minister in respect of the wildlife species, or the individuals of the wildlife species, to which the provision relates.

3. For greater certainty, nothing in this Act shall be construed so as to abrogate or derogate from the protection provided for existing aboriginal or treaty rights of the aboriginal peoples of Canada by the recognition and affirmation of those rights in section 35 of the Constitution Act, 1982.

4. (1) This Act also applies to sedentary living organisms on or under the continental shelf of Canada outside the exclusive economic zone.

(2) For the purpose of subsection (1), a living organism is sedentary if it is, at the harvestable stage, either immobile on or under the seabed or is unable to move except in constant physical contact with the seabed or subsoil.
5. This Act is binding on Her Majesty in right of Canada or a province.

5. La présente loi lie Sa Majesté du chef du Canada ou d’une province.

PURPOSES

6. The purposes of this Act are to prevent wildlife species from being extirpated or becoming extinct, to provide for the recovery of wildlife species that are extirpated, endangered or threatened as a result of human activity and to manage species of special concern to prevent them from becoming endangered or threatened.

6. La présente loi vise à prévenir la disparition — de la planète ou du Canada seulement — des espèces sauvages, à permettre le rétablissement de celles qui, par suite de l’activité humaine, sont devenues des espèces disparues du pays, en voie de disparition ou menacées et à favoriser la gestion des espèces préoccupantes pour éviter qu’elles ne deviennent des espèces en voie de disparition ou menacées.

CANADIAN ENDANGERED SPECIES CONSERVATION COUNCIL

7. (1) The Canadian Endangered Species Conservation Council consists of the Minister of the Environment, the Minister of Fisheries and Oceans, the Minister of Canadian Heritage and ministers of the government of a province or a territory who are responsible for the conservation and management of a wildlife species in that province or territory.

7. (1) Le Conseil canadien pour la conservation des espèces en péril se compose du ministre de l’Environnement, du ministre des Pêches et des Océans et du ministre du Patrimoine canadien ainsi que des ministres d’une province ou d’un territoire chargés de la conservation et de la gestion d’une espèce sauvage dans la province ou dans le territoire.

(2) The role of the Canadian Endangered Species Conservation Council is to

(a) provide general direction on the activities of COSEWIC, the preparation of recovery strategies and the preparation and implementation of action plans; and

(b) coordinate the activities of the various governments represented on the Council relating to the protection of species at risk.

(2) Le Conseil canadien pour la conservation des espèces en péril a pour mission :

a) de diriger d’une façon générale les activités du COSEPAC, l’élaboration des programmes de rétablissement et l’élaboration et la mise en œuvre des plans d’action; et

b) de coordonner les activités de protection des espèces en péril exercées par les divers gouvernements représentés au conseil.

ADMINISTRATION OF ACT

8. (1) The Minister is responsible for the administration of this Act, except in so far as this Act gives responsibility to another minister.

8. (1) Sous réserve des dispositions de la présente loi conférant une responsabilité particulière à un autre ministre, le ministre est responsable de l’application de la présente loi.

(2) The Minister, the Minister of Canadian Heritage or the Minister of Fisheries and Oceans may, after consultation with the other two ministers, delegate to any minister of the Crown in right of Canada or of a province or to any person who is employed by the Government of Canada, the government of a province or any other government in Canada

(2) Le ministre, le ministre du Patrimoine canadien ou le ministre des Pêches et des Océans peut, après consultation des deux autres ministres, déléguer à un ministre fédéral ou provincial ou à quiconque est à l’emploi du gouvernement du Canada, d’une province ou de tout autre gouvernement au Canada telle de ses attributions prévues par la présente loi.
any of that Minister’s powers or functions under this Act, relating to its enforcement.

(3) The delegation must be the subject of an agreement between the delegating minister and the delegate and the agreement must provide that the delegate is to prepare an annual report for the delegating minister on the activities undertaken under the agreement. A copy of the agreement must be included in the public registry within 45 days after it is entered into, and a copy of every annual report must be included in the public registry within 45 days after it is received by the delegating minister.

**8.1** The Minister shall establish a Council, to be known as the National Aboriginal Council on Species at Risk, consisting of six representatives of the aboriginal peoples of Canada selected by the Minister based upon recommendations from aboriginal organizations that the Minister considers appropriate. The role of the Council is to

(a) advise the Minister on the administration of this Act; and

(b) provide advice and recommendations to the Canadian Endangered Species Conservation Council.

**9.** (1) The Minister may, after consultation with the Minister of Canadian Heritage and the Minister of Fisheries and Oceans, establish one or more committees to advise the Minister on the administration of this Act.

(2) The Minister may, after consultation with the Minister of Canadian Heritage, the Minister of Fisheries and Oceans and the Canadian Endangered Species Conservation Council, establish one or more committees to advise the Council on matters related to the Council’s role.

**10.** A competent minister may, after consultation with every other competent minister, enter into an agreement with any government in Canada, organization or wildlife management board with respect to the administration of any provision of this Act for which that competent minister has responsibility, including the preparation and implementation of recovery strategies, action plans and management plans.
10.1 The Minister, after consultation with the Canadian Endangered Species Conservation Council, may establish a stewardship action plan that creates incentives and other measures to support voluntary stewardship actions taken by any government in Canada, organization or person. A copy of the stewardship action plan must be included in the public registry.

10.2 The stewardship action plan must include, but is not limited to, commitments to
(a) regularly examine incentives and programs that support actions taken by persons to protect species at risk;
(b) provide information and increase public awareness about species at risk;
(c) methods for sharing information about species at risk, including community and aboriginal traditional knowledge, that respect, preserve and maintain knowledge and promote their wider application with the approval of the holders of such knowledge, with other governments and persons;
(d) create awards and recognition programs;
(e) provide information respecting programs related to stewardship agreements, land conservation easements and other such agreements; and
(f) provide information relating to the technical and scientific support available to persons engaged in stewardship activities.

11. (1) A competent minister may, after consultation with every other competent minister, and with the Canadian Endangered Species Conservation Council or any of its
members if he or she considers it appropriate to do so, enter into a conservation agreement with any government in Canada, organization or person to benefit a species at risk or enhance its survival in the wild.

(2) The agreement must provide for the taking of conservation measures and any other measures consistent with the purposes of this Act, and may include measures with respect to

(a) monitoring the status of the species;
(b) developing and implementing education and public awareness programs;
(c) developing and implementing recovery strategies, action plans and management plans;
(d) protecting the species’ habitat, including its critical habitat; or
(e) undertaking research projects in support of recovery efforts for the species.

12. (1) A competent minister may, after consultation with every other competent minister, and with the Canadian Endangered Species Conservation Council or any of its members if he or she considers it appropriate to do so, enter into an agreement with any government in Canada, organization or person to provide for the conservation of a wildlife species that is not a species at risk.

(2) The agreement may provide for the taking of conservation measures and any other measures consistent with the purposes of this Act, including measures with respect to

(a) monitoring the status of the species;
(b) developing and implementing education and public awareness programs;
(c) protecting the species’ habitat; and
(d) preventing the species from becoming a species at risk.

13. (1) A competent minister may enter into an agreement with any government in Canada, organization or person to provide for the payment of contributions towards the costs of

12. (1) Après consultation de tout autre ministre compétent et, s’il l’estime indiqué, du Conseil canadien pour la conservation des espèces en péril ou de tout membre de celui-ci, le ministre compétent peut conclure avec un gouvernement au Canada, une organisation ou une personne un accord de conservation qui est bénéfique pour une espèce en péril ou qui améliore ses chances de survie à l’état sauvage.

(2) L’accord doit prévoir des mesures de conservation et d’autres mesures compatibles avec l’objet de la présente loi, et peut prévoir des mesures en ce qui concerne :

a) le suivi de la situation de l’espèce;

b) l’élaboration et la mise en œuvre de programmes d’éducation et de sensibilisation du public;

c) l’élaboration et la mise en œuvre de programmes de rétablissement, de plans d’action et de plans de gestion;

d) la protection de l’habitat de l’espèce, notamment son habitat essentiel;

e) la mise sur pied de projets de recherche visant à favoriser le rétablissement de l’espèce.

13. (1) Le ministre compétent peut conclure avec un gouvernement au Canada, une organisation ou une personne un accord prévoyant le partage des coûts de la mise en œuvre de
programs and measures for the conservation of wildlife species, including programs and measures under an agreement entered into under subsection 11(1) or 12(1).

(2) The agreement must specify
(a) the contribution towards the cost of the program or measure that is payable by any party and the time or times at which any amounts under the agreement will be paid;
(b) the authority or person who will be responsible for operating and maintaining the program or measure or any part of it;
(c) the proportions of any revenue from the program or measure that is payable to the parties; and
(d) the terms and conditions governing the operation and maintenance of the program or measure.

WILDLIFE SPECIES LISTING PROCESS

Committee on the Status of Endangered Wildlife in Canada

14. The Committee on the Status of Endangered Wildlife in Canada is hereby established.

15. (1) The functions of COSEWIC are to
(a) assess the status of each wildlife species considered by COSEWIC to be at risk and, as part of the assessment, identify existing and potential threats to the species and
(i) classify the species as extinct, extirpated, endangered, threatened or of special concern,
(ii) indicate that COSEWIC does not have sufficient information to classify the species, or
(iii) indicate that the species is not currently at risk;
(b) determine when wildlife species are to be assessed, with priority given to those more likely to become extinct;
(c) conduct a new assessment of the status of species at risk and, if appropriate, reclassify or declassify them;

mesures et de programmes en matière de conservation des espèces sauvages, notamment des mesures et des programmes prévus dans un accord conclu au titre des paragraphes 11(1) ou 12(1).

(2) L’accord doit préciser les points suivants :
(a) la quote-part des parties à l’accord, ainsi que la date du ou des versements correspondants;
(b) l’autorité ou la personne qui sera responsable de l’exécution de tout ou partie des mesures ou des programmes;
(c) la répartition entre les parties à l’accord des éventuelles recettes d’exploitation relatives aux mesures ou aux programmes;
(d) les modalités d’exécution des mesures ou des programmes.

PROCESSUS D’INSCRIPTION DES ESPÈCES SAUVAGES

Comité sur la situation des espèces en péril au Canada

15. (1) Le COSEPAC a pour mission :
(a) d’évaluer la situation de toute espèce sauvage qu’il estime en péril ainsi que, dans le cadre de l’évaluation, de signaler les menaces réelles ou potentielles à son égard et d’établir, selon le cas :
(i) que l’espèce est disparue, disparue du pays, en voie de disparition, menacée ou préoccupante,
(ii) qu’il ne dispose pas de l’information voulue pour la classifier,
(iii) que l’espèce n’est pas actuellement en péril;
(b) de déterminer le moment auquel doit être effectuée l’évaluation des espèces sauvages, la priorité étant donnée à celles dont la probabilité d’extinction est la plus grande;
(c.1) indicate in the assessment whether the wildlife species migrates across Canada’s boundary or has a range extending across Canada’s boundary;

(d) develop and periodically review criteria for assessing the status of wildlife species and for classifying them and recommend the criteria to the Minister and the Canadian Endangered Species Conservation Council; and

(e) provide advice to the Minister and the Canadian Endangered Species Conservation Council and perform any other functions that the Minister, after consultation with that Council, may assign.

(2) COSEWIC must carry out its functions on the basis of the best available information on the biological status of a species, including scientific knowledge, community knowledge and aboriginal traditional knowledge.

(3) COSEWIC must take into account any applicable provisions of treaty and land claims agreements when carrying out its functions.

16. (1) COSEWIC is to be composed of members appointed by the Minister after consultation with the Canadian Endangered Species Conservation Council and with any experts and expert bodies, such as the Royal Society of Canada, that the Minister considers to have relevant expertise.

(2) Each member must have expertise drawn from a discipline such as conservation biology, population dynamics, taxonomy, systematics or genetics or from community knowledge or aboriginal traditional knowledge of the conservation of wildlife species.

(2) Chaque membre du COSEPAC possède une expertise liée soit à une discipline telle que la biologie de la conservation, la dynamique des populations, la taxinomie, la systématique ou la génétique, soit aux connaissances des collectivités ou aux connaissances traditionnelles des peuples autochtones en matière de conservation des espèces sauvages.
Term of appointment

(3) The members are to be appointed to hold office for renewable terms of not more than four years.

Mandat

(3) Les membres sont nommés pour des mandats renouvelables d’au plus quatre ans.

Not part of the public service of Canada

(4) The members are not, because of being a member, part of the public service of Canada.

Statut

(4) Ils ne font pas, en cette qualité, partie de l’administration publique fédérale.

Remuneration and expenses

(5) The members may be paid remuneration and expenses for their services in amounts that the Minister may set.

Rémunération et indemnités

(5) Ils peuvent recevoir la rémunération et les indemnités que fixe le ministre.

Discretion

(6) Each member of COSEWIC shall exercise his or her discretion in an independent manner.

Fonctions

(6) Chaque membre du COSEPAC exerce ses fonctions de façon indépendante.

Regulations and guidelines

17. The Minister may, after consultation with the Canadian Endangered Species Conservation Council and COSEWIC, establish regulations or guidelines respecting the appointment of members and the carrying out of COSEWIC’s functions.

Règlement et directives

17. Après consultation du Conseil canadien pour la conservation des espèces en péril et du COSEPAC, le ministre peut prendre des règlements et élaborer des directives en ce qui concerne la nomination des membres et l’exécution de la mission du COSEPAC.

Subcommittees

18. (1) COSEWIC must establish subcommittees of specialists to assist in the preparation and review of status reports on wildlife species considered to be at risk, including subcommittees specializing in groups of wildlife species and a subcommittee specializing in aboriginal traditional knowledge, and it may establish other subcommittees to advise it or to exercise or perform any of its functions.

Membership

(2) Each subcommittee must be presided over by a member of COSEWIC, but the subcommittee may include persons who are not members of COSEWIC.

Membres

(2) Les sous-comités sont présidés par un membre du COSEPAC et peuvent être composés de personnes qui n’en sont pas membres.

Aboriginal traditional knowledge subcommittee

(3) Subject to subsection (2), the chairperson and members of the aboriginal traditional knowledge subcommittee must be appointed by the Minister after consultation with any aboriginal organization he or she considers appropriate.

Sous-comité compétent en matière de connaissances traditionnelles des peuples autochtones

(3) Sous réserve du paragraphe (2), le président et les membres du sous-comité compétent en matière de connaissances traditionnelles des peuples autochtones sont nommés par le ministre après consultation de toute organisation autochtone qu’il estime indiquée.

Rules

19. COSEWIC may make rules respecting the holding of meetings and the general conduct of its activities, including rules respecting

(4) the selection of persons to chair its meetings; and

Règles

19. Le COSEPAC peut établir des règles régissant la tenue de ses réunions et la conduite de ses activités en général, notamment :

(a) le choix des personnes devant présider ses réunions;
(b) the meetings and activities of any of its subcommittees.

20. The Minister must provide COSEWIC with any professional, technical, secretarial, clerical and other assistance, and any facilities and supplies, that, in his or her opinion, are necessary to carry out its functions.

21. (1) COSEWIC’s assessment of the status of a wildlife species must be based on a status report on the species that COSEWIC either has had prepared or has received with an application.

(2) The Minister may, after consultation with COSEWIC, the Minister of Canadian Heritage and the Minister of Fisheries and Oceans, make regulations establishing the content of status reports.

22. (1) Any person may apply to COSEWIC for an assessment of the status of a wildlife species.

(2) The Minister may, after consultation with COSEWIC, the Minister of Canadian Heritage and the Minister of Fisheries and Oceans, make regulations respecting the making of applications to COSEWIC under subsection (1) and the dealing with of those applications by COSEWIC.

23. (1) COSEWIC must assess the status of a wildlife species within one year after it receives a status report on the species, and it must provide reasons for its assessment.

(2) If the assessment results from an application, COSEWIC must notify the applicant of the assessment and the reasons.

24. COSEWIC must review the classification of each species at risk at least once every 10 years, or at any time if it has reason to believe that the status of the species has changed significantly.

25. (1) When COSEWIC completes an assessment of the status of a wildlife species, it must provide the Minister and the Canadian Endangered Species Conservation Council with a copy of the assessment and the reasons.
for it. A copy of the assessment and the reasons must also be included in the public registry.

(2) COSEWIC must annually prepare a complete list of every wildlife species it has assessed since the coming into force of this section and a copy of that list must be included in the public registry.

(3) On receiving a copy of an assessment of the status of a wildlife species from COSEWIC under subsection (1), the Minister must, within 90 days, include in the public registry a report on how the Minister intends to respond to the assessment and, to the extent possible, provide time lines for action.

26. COSEWIC must annually provide a report on its activities to the Canadian Endangered Species Conservation Council and a copy of that report must be included in the public registry.

27. (1) The Governor in Council may, on the recommendation of the Minister, by order amend the List in accordance with subsections (1.1) and (1.2) by adding a wildlife species, by reclassifying a listed wildlife species or by removing a listed wildlife species, and the Minister may, by order, amend the List in a similar fashion in accordance with subsection (3).

(1.1) Subject to subsection (3), the Governor in Council, within nine months after receiving an assessment of the status of a species by COSEWIC, may review that assessment and may, on the recommendation of the Minister,

(a) accept the assessment and add the species to the List;
(b) decide not to add the species to the List; or
(c) refer the matter back to COSEWIC for further information or consideration.
Statement of reasons

(1.2) Where the Governor in Council takes a course of action under paragraph (1.1)(b) or (c), the Minister shall, after the approval of the Governor in Council, include a statement in the public registry setting out the reasons.

Ministre

Pre-conditions for recommendation

(2) Before making a recommendation in respect of a wildlife species or a species at risk, the Minister must

(a) take into account the assessment of COSEWIC in respect of the species;
(b) consult the competent minister or ministers; and
(c) if the species is found in an area in respect of which a wildlife management board is authorized by a land claims agreement to perform functions in respect of a wildlife species, consult the wildlife management board.

Conditions préalables à la recommandation

(2) Avant de faire une recommandation à l’égard d’une espèce sauvage ou d’une espèce en péril, le ministre :

a) prend en compte l’évaluation de la situation de l’espèce faite par le COSEPAC;
b) consulte tout ministre compétent; 
c) si l’espèce se trouve dans une aire à l’égard de laquelle un conseil de gestion des ressources fauniques est habilité par un accord sur des revendications territoriales à exercer des attributions à l’égard d’espèces sauvages, consulte le conseil.

Amendment of List by Minister

(3) Where the Governor in Council has not taken a course of action under subsection (1.1) within nine months after receiving an assessment of the status of a species by COSEWIC, the Minister shall, by order, amend the List in accordance with COSEWIC’s assessment.

Modification de la liste

(3) Si, dans les neuf mois après avoir reçu l’évaluation de la situation de l’espèce faite par le COSEPAC, le gouverneur en conseil n’a pas pris de mesures aux termes du paragraphe (1.1), le ministre modifie, par arrêté, la liste en conformité avec cette évaluation.

Applications for assessment of imminent threat

28. (1) Any person who considers that there is an imminent threat to the survival of a wildlife species may apply to COSEWIC for an assessment of the threat for the purpose of having the species listed on an emergency basis under subsection 29(1) as an endangered species.

Demandes d’évaluation : menace imminente

(2) The application must include relevant information indicating that there is an imminent threat to the survival of the species.

Renseignements joints à la demande

(2) La demande doit comporter les renseignements pertinents indiquant que la survie de l’espèce est menacée de façon imminente.

Information to be included in application

(3) The Minister may, after consultation with the Minister of Canadian Heritage, the Minister of Fisheries and Oceans and the Canadian Endangered Species Conservation Council, make regulations respecting the making of applications to COSEWIC under subsection (1) and the dealing with of those applications by COSEWIC.

Règlements

(3) Le ministre, après consultation du ministre du Patrimoine canadien, du ministre des Pêches et des Océans et du Conseil canadien pour la conservation des espèces en péril, peut prendre des règlements concernant la présentation des demandes au COSEPAC en vertu du paragraphe (1) et le traitement des demandes par celui-ci.
(4) COSEWIC must provide the applicant, the Minister and the Canadian Endangered Species Conservation Council with a copy of its assessment. A copy of the assessment must be included in the public registry.

29. (1) If the Minister is of the opinion that there is an imminent threat to the survival of a wildlife species, the Minister must, on an emergency basis, after consultation with every other competent minister, make a recommendation to the Governor in Council that the List be amended to list the species as an endangered species.

(2) The Minister may arrive at that opinion on the basis of his or her own information or on the basis of COSEWIC’s assessment.

(3) If a recommendation is made under subsection (1), subsection 27(2) does not apply to any order that is made under subsection 27(1) on the basis of that recommendation, and the order is exempt from the application of section 3 of the Statutory Instruments Act.

30. (1) As soon as possible after an order is made on the basis of a recommendation referred to in subsection 29(1), COSEWIC must have a status report on the wildlife species prepared and, within one year after the making of the order, COSEWIC must, in a report in writing to the Minister,

(a) confirm the classification of the species;
(b) recommend to the Minister that the species be reclassified; or
(c) recommend to the Minister that the species be removed from the List.

(2) Within 30 days after the report is received by the Minister, a copy of the report must be included in the public registry.

31. If COSEWIC makes a recommendation under paragraph 30(1)(b) or (c), the Minister may make a recommendation to the Governor in Council with respect to amending the List.
MEASURES TO PROTECT LISTED WILDLIFE SPECIES

32. (1) No person shall kill, harm, harass, capture or take an individual of a wildlife species that is listed as an extirpated species, an endangered species or a threatened species.

(2) No person shall possess, collect, buy, sell or trade an individual of a wildlife species that is listed as an extirpated species, an endangered species or a threatened species, or any part or derivative of such an individual.

(3) For the purposes of subsection (2), any animal, plant or thing that is represented to be an individual, or a part or derivative of an individual, of a wildlife species that is listed as an extirpated species, an endangered species or a threatened species is deemed, in the absence of evidence to the contrary, to be such an individual or a part or derivative of such an individual.

33. No person shall damage or destroy the residence of one or more individuals of a wildlife species that is listed as an endangered species or a threatened species, or that is listed as an extirpated species if a recovery strategy has recommended the reintroduction of the species into the wild in Canada.

34. (1) With respect to individuals of a listed wildlife species that is not an aquatic species or a species of birds that are migratory birds protected by the Migratory Birds Convention Act, 1994, sections 32 and 33 do not apply in lands in a province that are not federal lands unless an order is made under subsection (2) to provide that they apply.

(2) The Governor in Council may, on the recommendation of the Minister, by order, provide that sections 32 and 33, or either of them, apply in lands in a province that are not federal lands with respect to individuals of a listed wildlife species that is not an aquatic species or a species of birds that are migratory birds protected by the Migratory Birds Convention Act, 1994.

MESURES DE PROTECTION DES ESPÈCES SAUVAGES INSCRITES

32. (1) Il est interdit de tuer un individu d’une espèce sauvage inscrite comme espèce disparue du pays, en voie de disparition ou menacée, de lui nuire, de le harceler, de le capturer ou de le prendre.

(2) Il est interdit de posséder, de collectionner, d’acheter, de vendre ou d’échanger un individu — notamment partie d’un individu ou produit qui en provient — d’une espèce sauvage inscrite comme espèce disparue du pays, en voie de disparition ou menacée.

(3) Pour l’application du paragraphe (2), tout animal, toute plante ou toute chose présentée comme un individu — notamment partie d’un individu ou produit qui en provient — d’une espèce sauvage inscrite comme espèce disparue du pays, en voie de disparition ou menacée est réputée, sauf preuve contraire, être tel individu, telle partie ou tel produit.

33. Il est interdit d’endommager ou de détruire la résidence d’un ou de plusieurs individus d’une espèce sauvage inscrite comme espèce en voie de disparition ou menacée, soit d’une espèce sauvage inscrite comme espèce disparue du pays dont un programme de rétablissement a recommandé la réinsertion à l’état sauvage au Canada.

34. (1) S’agissant des individus d’une espèce sauvage inscrite, autre qu’une espèce aquatique ou une espèce d’oiseau migrateur protégée par la Loi de 1994 sur la convention concernant les oiseaux migrateurs, les articles 32 et 33 ne s’appliquent dans une province, ailleurs que sur le territoire domanial, que si un décret prévu au paragraphe (2) prévoit une telle application.

(2) Sur recommandation du ministre, le gouverneur en conseil peut prévoir, par décret, l’application des articles 32 et 33, ou de l’un de ceux-ci, dans une province, ailleurs que sur le territoire domanial, à l’égard des individus d’une espèce sauvage inscrite, autre qu’une espèce aquatique ou une espèce d’oiseau migrateur protégée par la Loi de 1994 sur la
(3) The Minister must recommend that the order be made if the Minister is of the opinion that the laws of the province do not effectively protect the species or the residences of its individuals.

(3) S’il estime que le droit de la province ne protège pas efficacement l’espèce ou la résidence de ses individus, le ministre est tenu de recommander au gouverneur en conseil la prise du décret.

(4) Before recommending that the Governor in Council make an order under subsection (2), the Minister must consult

(4) Le ministre ne recommande la prise du décret :

(a) the appropriate provincial minister; and
(b) if the species is found in an area in respect of which a wildlife management board is authorized by a land claims agreement to perform functions in respect of wildlife species, the wildlife management board.

(4) Le ministre ne recommande la prise du décret :

(a) qu’après avoir consulté le ministre provincial compétent;
(b) si l’espèce se trouve dans une aire à l’égard de laquelle un conseil de gestion des ressources fauniques est habilité par un accord sur des revendications territoriales à exercer des attributions à l’égard d’espèces sauvages, qu’après avoir consulté le conseil.

35. (1) Sections 32 and 33 apply in each of the territories in respect of a listed wildlife species only to the extent that the Governor in Council, on the recommendation of the Minister, makes an order providing that they, or any of them, apply.

35. (1) Les articles 32 et 33 ne s’appliquent dans un territoire à l’égard d’une espèce sauvage inscrite que si le gouverneur en conseil, sur recommandation du ministre, prend un décret prévoyant l’application de ces articles ou de l’un de ceux-ci.

(2) Subsection (1) does not apply

(2) Le paragraphe (1) ne s’applique pas :

(a) in respect of individuals of aquatic species and their habitat or species of birds that are migratory birds protected by the Migratory Birds Convention Act, 1994; or
(b) on land under the authority of the Minister or the Parks Canada Agency.

(3) S’il estime que le droit du territoire ne protège pas efficacement cette espèce ou la résidence de ses individus, le ministre est tenu de recommander au gouverneur en conseil la prise du décret.

(4) Before recommending that an order be made under subsection (1), the Minister must

(a) consult the appropriate territorial minister; and
(b) if the species is found in an area in respect of which a wildlife management board is authorized by a land claims agreement to perform functions in respect

(a) qu’après avoir consulté le ministre territorial compétent;
(b) si l’espèce se trouve dans une aire à l’égard de laquelle un conseil de gestion des ressources fauniques est habilité par un accord sur des revendications territoriales à exercer des attributions à l’égard d’espèces
of wildlife species, consult the wildlife management board.

36. (1) If a wildlife species that is not listed has been classified as an endangered species or a threatened species by a provincial or territorial minister, no person shall

(a) kill, harm, harass, capture or take an individual of that species that is on federal lands in the province or territory;

(b) possess, collect, buy, sell or trade an individual of that species that is on federal lands in the province or territory, or any part or derivative of such an individual; or

(c) damage or destroy the residence of one or more individuals of that species that is on federal lands in the province or territory.

Applying

(2) Subsection (1) applies only in respect of the portions of the federal lands that the Governor in Council may, on the recommendation of the competent minister, by order, specify.

Recovery of Endangered, Threatened and Extirpated Species

37. (1) If a wildlife species is listed as an extirpated species, an endangered species or a threatened species, the competent minister must prepare a strategy for its recovery.

(2) If there is more than one competent minister with respect to the wildlife species, they must prepare the strategy together and every reference to competent minister in sections 38 to 46 is to be read as a reference to the competent ministers.

38. In preparing a recovery strategy, action plan or management plan, the competent minister must consider the commitment of the Government of Canada to conserving biological diversity and to the principle that, if there are threats of serious or irreversible damage to the listed wildlife species, cost-effective mea-

sauvages, qu’après avoir consulté le conseil.

36. (1) Si une espèce sauvage non inscrite est classée par un ministre provincial ou territorial comme espèce en voie de disparition ou menacée, il est interdit :

(a) de tuer un individu de cette espèce se trouvant sur le territoire domanial situé dans la province ou le territoire, de lui nuire, de le harceler, de le capturer ou de le prendre;

(b) de posséder, de collectionner, d’acheter, de vendre ou d’échanger un individu — notamment partie d’un individu ou produit qui en provient — de cette espèce se trouvant sur le territoire domanial situé dans la province ou le territoire;

(c) d’endommager ou de détruire la résidence d’un ou de plusieurs individus de cette espèce se trouvant sur le territoire domanial situé dans la province ou le territoire.

37. (1) Si une espèce sauvage est inscrite comme espèce disparue du pays, en voie de disparition ou menacée, le ministre compétent est tenu d’élaborer un programme de rétablissement à son égard.

(2) Si plusieurs ministres compétents sont responsables de l’espèce sauvage, le programme de rétablissement est élaboré conjointement par eux. Le cas échéant, la mention du ministre compétent aux articles 38 à 46 vaut mention des ministres compétents.

38. Pour l’élaboration d’un programme de rétablissement, d’un plan d’action ou d’un plan de gestion, le ministre compétent tient compte de l’engagement qu’a pris le gouvernement du Canada de conserver la diversité biologique et de respecter le principe selon lequel, s’il existe une menace d’atteinte grave
sures to prevent the reduction or loss of the species should not be postponed for a lack of full scientific certainty.

Cooperation with others

39. (1) To the extent possible, the recovery strategy must be prepared in cooperation with (a) the appropriate provincial and territorial minister for each province and territory in which the listed wildlife species is found; (b) every minister of the Government of Canada who has authority over federal land or other areas on which the species is found; (c) if the species is found in an area in respect of which a wildlife management board is authorized by a land claims agreement to perform functions in respect of wildlife species, the wildlife management board; (d) every aboriginal organization that the competent minister considers will be directly affected by the recovery strategy; and (e) any other person or organization that the competent minister considers appropriate.

Land claims agreement

(2) If the listed wildlife species is found in an area in respect of which a wildlife management board is authorized by a land claims agreement to perform functions in respect of wildlife species, the recovery strategy must be prepared, to the extent that it will apply to that area, in accordance with the provisions of the agreement.

Consultation

(3) To the extent possible, the recovery strategy must be prepared in consultation with any landowners and other persons whom the competent minister considers to be directly affected by the strategy, including the government of any other country in which the species is found.

Determination of feasibility

40. In preparing the recovery strategy, the competent minister must determine whether the recovery of the listed wildlife species is technically and biologically feasible. The determination must be based on the best available information, including information provided by COSEWIC.

Collaboration

39. (1) Dans la mesure du possible, le ministre compétent élabore le programme de rétablissement en collaboration avec : 

a) le ministre provincial ou territorial compétent dans la province ou le territoire où se trouve l’espèce sauvage inscrite; b) tout ministre fédéral dont relèvent le territoire domanial ou les autres aires où se trouve l’espèce; c) si l’espèce se trouve dans une aire à l’égard de laquelle un conseil de gestion des ressources fauniques est habilité par un accord sur des revendications territoriales à exercer des attributions à l’égard d’espèces sauvages, le conseil; d) toute organisation autochtone qu’il croit directement touchée par le programme de rétablissement; e) toute autre personne ou organisation qu’il estime compétente.

Accord sur des revendications territoriales

(2) Si l’espèce sauvage inscrite se trouve dans une aire à l’égard de laquelle un conseil de gestion des ressources fauniques est habilité par un accord sur des revendications territoriales à exercer des attributions à l’égard d’espèces sauvages, le programme de rétablissement est élaboré, dans la mesure où il s’applique à cette aire, en conformité avec les dispositions de cet accord.

Consultation

(3) Le programme de rétablissement est élaboré, dans la mesure du possible, en consultation avec les propriétaires fonciers et les autres personnes que le ministre compétent croit directement touchés par le programme, notamment le gouvernement de tout autre pays où se trouve l’espèce.

Caractère réalisable du rétablissement

40. Pour l’élaboration du programme de rétablissement, le ministre compétent vérifie si le rétablissement de l’espèce sauvage inscrite est réalisable au point de vue technique et biologique. Il fonde sa conclusion sur la meilleure information accessible, notamment les renseignements fournis par le COSEPAC.
41. (1) If the competent minister determines that the recovery of the listed wildlife species is feasible, the recovery strategy must address the threats to the survival of the species identified by COSEWIC, including any loss of habitat, and must include

(а) a description of the species and its needs that is consistent with information provided by COSEWIC;

(b) an identification of the threats to the survival of the species and threats to its habitat that is consistent with information provided by COSEWIC and a description of the broad strategy to be taken to address those threats;

(c) an identification of the species’ critical habitat, to the extent possible, based on the best available information, including the information provided by COSEWIC, and examples of activities that are likely to result in its destruction;

(c.1) a schedule of studies to identify critical habitat, where available information is inadequate;

(d) a statement of the population and distribution objectives that will assist the recovery and survival of the species, and a general description of the research and management activities needed to meet those objectives;

(e) any other matters that are prescribed by the regulations;

(f) a statement about whether additional information is required about the species; and

(g) a statement of when one or more action plans in relation to the recovery strategy will be completed.

(2) If the competent minister determines that the recovery of the listed wildlife species is not feasible, the recovery strategy must include a description of the species and its needs, an identification of the species’ critical habitat to the extent possible, and the reasons why its recovery is not feasible.

41. (1) Si le ministre compétent conclut que le rétablissement de l’espèce sauvage inscrite est réalisable, le programme de rétablissement doit traiter des menaces à la survie de l’espèce — notamment de toute perte de son habitat — précisées par le COSEPAC et doit comporter notamment :

(a) une description de l’espèce et de ses besoins qui soit compatible avec les renseignements fournis par le COSEPAC;

(b) une désignation des menaces à la survie de l’espèce et des menaces à son habitat qui soit compatible avec les renseignements fournis par le COSEPAC, et des grandes lignes du plan à suivre pour y faire face;

(c) la désignation de l’habitat essentiel de l’espèce dans la mesure du possible, en se fondant sur la meilleure information accessible, notamment les informations fournies par le COSEPAC, et des exemples d’activités susceptibles d’entraîner sa destruction;

(c.1) un calendrier des études visant à désigner l’habitat essentiel lorsque l’information accessible est insuffisante;

(d) un énoncé des objectifs en matière de population et de dissémination visant à favoriser la survie et le rétablissement de l’espèce, ainsi qu’une description générale des activités de recherche et de gestion nécessaires à l’atteinte de ces objectifs;

(e) tout autre élément prévu par règlement;

(f) un énoncé sur l’opportunité de fournir des renseignements supplémentaires concernant l’espèce;

(g) un exposé de l’échéancier prévu pour l’élaboration d’un ou de plusieurs plans d’action relatifs au programme de rétablissement.

(2) Si le ministre compétent conclut que le rétablissement de l’espèce sauvage inscrite est irréalisable, le programme de rétablissement doit comporter une description de l’espèce et de ses besoins, dans la mesure du possible, et la désignation de son habitat essentiel, ainsi que les motifs de la conclusion.
(3) The competent minister may adopt a multi-species or an ecosystem approach when preparing the recovery strategy if he or she considers it appropriate to do so.

(4) The Governor in Council may, on the recommendation of the Minister after consultation with the Minister of Canadian Heritage and the Minister of Fisheries and Oceans, make regulations for the purpose of paragraph (1)(e) prescribing matters to be included in a recovery strategy.

42. (1) Subject to subsection (2), the competent minister must include a proposed recovery strategy in the public registry within one year after the wildlife species is listed, in the case of a wildlife species listed as an endangered species, and within two years after the species is listed, in the case of a wildlife species listed as a threatened species or an extirpated species.

(2) With respect to wildlife species that are set out in Schedule 1 on the day section 27 comes into force, the competent minister must include a proposed recovery strategy in the public registry within three years after that day, in the case of a wildlife species listed as an endangered species, and within four years after that day, in the case of a wildlife species listed as a threatened species or an extirpated species.

43. (1) Within 60 days after the proposed recovery strategy is included in the public registry, any person may file written comments with the competent minister.

(2) Within 30 days after the expiry of the period referred to in subsection (1), the competent minister must consider any comments received, make any changes to the proposed recovery strategy that he or she considers appropriate and finalize the recovery strategy by including a copy of it in the public registry.

44. (1) If the competent minister is of the opinion that an existing plan relating to a wildlife species meets the requirements of subsection 41(1) or (2), and the plan is adopted

(3) Pour l’élaboration du programme de rétablissement, le ministre compétent peut, s’il l’estime indiqué, traiter de plusieurs espèces simultanément ou de tout un écosystème.

(4) Sur recommandation faite par le ministre après consultation du ministre du Patrimoine canadien et du ministre des Pêches et des Océans, le gouverneur en conseil peut prévoir par règlement, pour l’application de l’alinéa (1)(e), les éléments additionnels à inclure dans un programme de rétablissement.

42. (1) Sous réserve du paragraphe (2), le ministre compétent met le projet de programme de rétablissement dans le registre dans l’année suivant l’inscription de l’espèce sauvage comme espèce en voie de disparition ou dans les deux ans suivant l’inscription de telle espèce comme espèce menacée ou disparue du pays.

(2) En ce qui concerne les espèces sauvages inscrites à l’annexe 1 à l’entrée en vigueur de l’article 27, le ministre compétent met le projet de programme de rétablissement dans le registre dans les trois ans suivant cette date dans le cas de l’espèce sauvage inscrite comme espèce en voie de disparition ou dans les quatre ans suivant cette date dans le cas de l’espèce sauvage inscrite comme espèce menacée ou disparue du pays.

43. (1) Dans les soixante jours suivant la mise du projet dans le registre, toute personne peut déposer par écrit auprès du ministre compétent des observations relativement au projet.

(2) Dans les trente jours suivant la fin du délai prévu au paragraphe (1), le ministre compétent étudie les observations qui lui ont été présentées, apporte au projet les modifications qu’il estime indiquées et met le texte définitif du programme de rétablissement dans le registre.

44. (1) Si le ministre compétent estime qu’un plan existant s’applique à l’égard d’une espèce sauvage et est conforme aux exigences des paragraphes 41(1) ou (2), et qu’il l’adopte
by the competent minister as the proposed
recovery strategy, he or she must include it in
the public registry as the proposed recovery
strategy in relation to the species.

Incorporation of existing plans

(2) The competent minister may incorpo-
rate any part of an existing plan relating to a
wildlife species into a proposed recovery
strategy for the species.

Amendments

45. (1) The competent minister may at any
time amend the recovery strategy. A copy of
the amendment must be included in the public
registry.

(2) If the amendment relates to the time for
completing an action plan, the competent
minister must provide reasons for the amend-
ment and include a copy of the reasons in the
public registry.

Amendments relating to time for completing
action plan

(3) Sections 39 and 43 apply to amendments
to a recovery strategy, with any modifications
that the circumstances require.

Amendment procedure

(4) Subsection (3) does not apply if the
competent minister considers the amendment
to be minor.

Exception

46. The competent minister must report on
the implementation of the recovery strategy,
and the progress towards meeting its objec-
tives, within five years after it is included in
the public registry and in every subsequent
five-year period, until its objectives have been
achieved or the species’ recovery is no longer
feasible. The report must be included in the
public registry.

Reporting

47. The competent minister in respect of a
recovery strategy must prepare one or more
action plans based on the recovery strategy. If
there is more than one competent minister
with respect to the recovery strategy, they may
prepare the action plan or plans together.

Preparation

48. (1) To the extent possible, an action plan
must be prepared in cooperation with
(a) the appropriate provincial and territorial
minister of each province and territory in
which the listed wildlife species is found;

Action Plan

47. Le ministre compétent responsable d’un
programme de rétablissement est tenu d’élabo-
er un ou plusieurs plans d’action sur le
fondement de celui-ci. Si plusieurs ministres
compétents sont responsables du programme,
les plans d’action peuvent être élaborés
conjointement par eux.

Plan d’action

48. (1) Dans la mesure du possible, le plan
d’action est élaboré en collaboration avec :
a) le ministre provincial ou territorial
compétent dans la province ou le territoire
où se trouve l’espèce sauvage inscrite;
(b) every minister of the Government of Canada who has authority over federal land or other areas on which the species is found;
(c) if the species is found in an area in respect of which a wildlife management board is authorized by a land claims agreement to perform functions in respect of wildlife species, the wildlife management board;
(d) every aboriginal organization that the competent minister considers will be directly affected by the action plan; and
(e) any other person or organization that the competent minister considers appropriate.

Land claims agreement

(2) If the listed wildlife species is found in an area in respect of which a wildlife management board is authorized by a land claims agreement to perform functions in respect of wildlife species, an action plan must be prepared, to the extent that it will apply to that area, in accordance with the provisions of the agreement.

Consultation

(3) To the extent possible, an action plan must be prepared in consultation with any landowners, lessees and other persons whom the competent minister considers to be directly affected by, or interested in, the action plan, including the government of any other country in which the species is found.

Contents

49. (1) An action plan must include, with respect to the area to which the action plan relates,

(a) an identification of the species’ critical habitat, to the extent possible, based on the best available information and consistent with the recovery strategy, and examples of activities that are likely to result in its destruction;

(b) a statement of the measures that are proposed to be taken to protect the species’ critical habitat, including the entering into of agreements under section 11;

(c) an identification of any portions of the species’ critical habitat that have not been protected;

b) tout ministre fédéral dont relèvent le territoire domanial ou les autres aires où se trouve l’espèce;

c) si l’espèce se trouve dans une aire à l’égard de laquelle un conseil de gestion des ressources fauniques est habilité par un accord sur des revendications territoriales à exercer des attributions à l’égard d’espèces sauvages, le conseil;

(d) toute organisation autochtone que le ministre compétent croit directement touchée par le plan d’action;

e) toute autre personne ou organisation qu’il estime compétente.

Accord sur des revendications territoriales

(2) Si l’espèce sauvage inscrite se trouve dans une aire à l’égard de laquelle un conseil de gestion des ressources fauniques est habilité par un accord sur des revendications territoriales à exercer des attributions à l’égard d’espèces sauvages, le plan d’action est élaboré, dans la mesure où il s’applique à cette aire, en conformité avec les dispositions de cet accord.

Consultation

(3) Le plan d’action est élaboré, dans la mesure du possible, en consultation avec les propriétaires fonciers, les locataires et les autres personnes que le ministre compétent croit directement touchés ou intéressés, notamment le gouvernement de tout autre pays où se trouve l’espèce.

Contenu du plan d’action

49. (1) Le plan d’action comporte notamment, en ce qui concerne l’aire à laquelle il s’applique :

a) la désignation de l’habitat essentiel de l’espèce dans la mesure du possible, en se fondant sur la meilleure information accessible et d’une façon compatible avec le programme de rétablissement, et des exemples d’activités susceptibles d’entraîner sa destruction;

b) un exposé des mesures envisagées pour protéger l’habitat essentiel de l’espèce, notamment la conclusion d’accords en application de l’article 11;

c) la désignation de toute partie de l’habitat essentiel de l’espèce qui n’est pas protégée;
(d) a statement of the measures that are to be taken to implement the recovery strategy, including those that address the threats to the species and those that help to achieve the population and distribution objectives, as well as an indication as to when these measures are to take place;

(d.1) the methods to be used to monitor the recovery of the species and its long-term viability;

(e) an evaluation of the socio-economic costs of the action plan and the benefits to be derived from its implementation; and

(f) any other matters that are prescribed by the regulations.

Regulations

(2) The Governor in Council may, on the recommendation of the Minister after consultation with the Minister of Canadian Heritage and the Minister of Fisheries and Oceans, make regulations for the purpose of paragraph (1)(f) prescribing matters to be included in an action plan.

Proposed action plan

50. (1) The competent minister must include a proposed action plan in the public registry.

Comments

(2) Within 60 days after the proposed action plan is included in the public registry, any person may file written comments with the competent minister.

Finalization of action plan

(3) Within 30 days after the expiry of the period referred to in subsection (2), the competent minister must consider any comments received, make any changes to the proposed action plan that he or she considers appropriate and finalize the action plan by including a copy of it in the public registry.

(4) If an action plan is not finalized in the time set out in the recovery strategy, the competent minister must include in the public registry a summary of what has been prepared with respect to the plan.

Summary if action plan not completed in time

51. (1) If the competent minister is of the opinion that an existing plan relating to a wildlife species meets the requirements of section 49, and the plan is adopted by the competent minister as a proposed action plan, he or she must include it in the public registry

Existing plans

(d) un exposé des mesures à prendre pour mettre en oeuvre le programme de rétablissement, notamment celles qui traitent des menaces à la survie de l’espèce et celles qui aident à atteindre les objectifs en matière de population et de désemination, ainsi qu’une indication du moment prévu pour leur exécution;

(d.1) les méthodes à utiliser pour surveiller le rétablissement de l’espèce et sa viabilité à long terme;

(e) l’évaluation des répercussions socioéconomiques de sa mise en oeuvre et des avantages en découlant;

(f) tout autre élément prévu par règlement.

Règlement

(2) Sur recommandation faite par le ministre après consultation du ministre du Patrimoine canadien et du ministre des Pêches et des Océans, le gouverneur en conseil peut prévoir par règlement, pour l’application de l’alinéa (1)f), les éléments additionnels à inclure dans un plan d’action.

Projet de plan d’action

50. (1) Le ministre compétent met le projet de plan d’action dans le registre.

Observations

(2) Dans les soixante jours suivant la mise du projet dans le registre, toute personne peut déposer par écrit auprès du ministre compétent des observations relativement au projet.

Texte définitif du plan d’action

(3) Dans les trente jours suivant la fin du délai prévu au paragraphe (2), le ministre compétent étudie les observations qui lui ont été présentées, apporte au projet les modifications qu’il estime indiquées et met le texte définitif du plan d’action dans le registre.

Sommaire en cas de retard

(4) Si le plan d’action n’est pas terminé dans le délai prévu par le programme de rétablissement, le ministre compétent est tenu de mettre dans le registre un sommaire des éléments du plan qui sont élaborés.

Plans existants

51. (1) Si le ministre compétent estime qu’un plan existant s’applique à l’égard d’une espèce sauvage et est conforme aux exigences de l’article 49, et qu’il l’adopte à titre de projet de plan d’action, il en met une copie dans le registre pour tenir lieu de projet de plan d’action à l’égard de l’espèce.
as a proposed action plan in relation to the species.

Incorporation of existing plans

(2) The competent minister may incorporate any part of an existing plan relating to a wildlife species into a proposed action plan for the species.

(2) Il peut incorporer toute partie d’un plan existant relatif à une espèce sauvage dans un projet de plan d’action portant sur celle-ci.

Amendments

52. (1) The competent minister may at any time amend an action plan. A copy of the amendment must be included in the public registry.

(2) Section 48 applies to amendments to an action plan, with any modifications that the circumstances require.

(2) L’article 48 s’applique, avec les adaptations nécessaires, à la modification du plan d’action.

Exception

(3) Subsection (2) does not apply if the competent minister considers the amendment to be minor.

(3) Le paragraphe (2) ne s’applique pas si le ministre compétent estime que la modification est mineure.

Regulations

53. (1) The competent minister must, with respect to aquatic species, species of birds that are migratory birds protected by the Migratory Birds Convention Act, 1994, regardless of where they are located, or with respect to any other wildlife species on federal lands, make any regulations that are necessary in the opinion of the competent minister for the purpose of implementing the measures included in an action plan, but, if the measures relate to the protection of critical habitat on federal lands, the regulations must be made under section 59.

(2) If the competent minister is of the opinion that a regulation would affect a reserve or any other lands that are set apart for the use and benefit of a band under the Indian Act, he or she must consult the Minister of Indian Affairs and Northern Development and the band before making the regulation.

(2) Si le ministre compétent estime que le règlement touchera une réserve ou une autre terre qui a été mise de côté à l’usage et au profit d’une bande en application de la Loi sur les Indiens, il est tenu de consulter le ministre des Affaires indiennes et du Nord canadien et la bande avant de le prendre.

Consultation

(3) If the competent minister is of the opinion that a regulation would affect an area in respect of which a wildlife management board is authorized by a land claims agreement to perform functions in respect of wildlife species, he or she must consult the wildlife management board before making the regulation.

(3) Si le ministre compétent estime que le règlement touchera une aire à l’égard de laquelle un conseil de gestion des ressources fauniques est habilité par un accord sur des revendications territoriales à exercer des attributions à l’égard d’espèces sauvages, il est tenu de consulter le conseil avant de le prendre.
4. The regulations may incorporate by reference any legislation of a province or territory, as amended from time to time, insofar as the regulations apply in that province or territory.

(4) Les règlements peuvent incorporer par renvoi, dans la mesure où ils s’appliquent à une province ou à un territoire, toute mesure législative de la province ou du territoire, avec ses modifications successives.

5. If the competent minister is of the opinion that a regulation would affect land in a territory, he or she must consult the territorial minister before making the regulation.

(5) Si le ministre compétent estime que le règlement touchera des terres dans un territoire, il est tenu de consulter le ministre territorial avant de le prendre.

(6) Subsection (5) does not apply

(a) in respect of individuals of aquatic species and their habitat or species of birds that are migratory birds protected by the Migratory Birds Convention Act, 1994 and their habitat; or

(b) in respect of land under the authority of the Minister or the Parks Canada Agency.

6. For the purpose of implementing the measures included in an action plan, the competent minister may use any powers that he or she has under any other Act of Parliament.

54. Le ministre compétent peut, en vue de la mise en oeuvre d’un plan d’action, exercer tout pouvoir qui lui est conféré au titre d’une autre loi fédérale.

55. The competent minister must monitor the implementation of an action plan and the progress towards meeting its objectives and assess and report on its implementation and its ecological and socio-economic impacts five years after the plan comes into effect. A copy of the report must be included in the public registry.

55. Cinq ans après la mise du plan d’action dans le registre, il incombe au ministre compétent d’assurer le suivi de sa mise en oeuvre et des progrès réalisés en vue de l’atteinte de ses objectifs. Il l’évalue et établit un rapport, notamment sur ses répercussions écologiques et socioéconomiques. Il met une copie de son rapport dans le registre.

Protection of Critical Habitat

56. The competent minister may, after consultation with the Canadian Endangered Species Conservation Council and any person whom he or she considers appropriate, establish codes of practice, national standards or guidelines with respect to the protection of critical habitat.

56. Le ministre compétent peut, après consultation du Conseil canadien pour la conservation des espèces en péril et de toute personne qu’il estime compétente, élaborer des codes de pratique et des normes ou directives nationales en matière de protection de l’habitat essentiel.

57. The purpose of section 58 is to ensure that, within 180 days after the recovery strategy or action plan that identified the critical habitat referred to in subsection 58(1) is included in the public registry, all of the critical habitat is protected by

(a) provisions in, or measures under, this or any other Act of Parliament, including agreements under section 11; or

57. L’article 58 a pour objet de faire en sorte que, dans les cent quatre-vingts jours suivant la mise dans le registre du programme de rétablissement ou du plan d’action ayant défini l’habitat essentiel visé au paragraphe 58(1), tout l’habitat essentiel soit protégé :

a) soit par des dispositions de la présente loi ou de toute autre loi fédérale, ou une mesure prise sous leur régime, notamment les accords conclus au titre de l’article 11;
58. (1) Subject to this section, no person shall destroy any part of the critical habitat of any listed endangered species or of any listed threatened species — or of any listed extirpated species if a recovery strategy has recommended the reintroduction of the species into the wild in Canada — if

(a) the critical habitat is on federal land, in the exclusive economic zone of Canada or on the continental shelf of Canada;

(b) the listed species is an aquatic species; or

(c) the listed species is a species of migratory birds protected by the *Migratory Birds Convention Act, 1994*.

(2) If the critical habitat or a portion of the critical habitat is in a national park of Canada named and described in Schedule 1 to the *Canada National Parks Act*, a marine protected area under the *Oceans Act*, a migratory bird sanctuary under the *Migratory Birds Convention Act, 1994* or a national wildlife area under the *Canada Wildlife Act*, the competent Minister must, within 90 days after the recovery strategy or action plan that identified the critical habitat is included in the public registry, publish in the *Canada Gazette* a description of the critical habitat or portion that is in that park, area or sanctuary.

(3) If subsection (2) applies, subsection (1) applies to the critical habitat or the portion of the critical habitat described in the *Canada Gazette* under subsection (2) 90 days after the description is published in the *Canada Gazette*.

(4) If all of the critical habitat or any portion of the critical habitat is not in a place referred to in subsection (2), subsection (1) applies in respect of the critical habitat or portion of the critical habitat.

58. (1) Sous réserve des autres dispositions du présent article, il est interdit de détruire un élément de l’habitat essentiel d’une espèce sauvage inscrite comme espèce en voie de disparition ou menacée — ou comme espèce disparue du pays dont un programme de rétablissement a recommandé la réinsertion à l’état sauvage au Canada :

(a) si l’habitat essentiel se trouve soit sur le territoire domanial, soit dans la zone économique exclusive ou sur le plateau continental du Canada;

(b) si l’espèce inscrite est une espèce aquatique;

(c) si l’espèce inscrite est une espèce d’oiseau migrateur protégée par la *Loi de 1994 sur la convention concernant les oiseaux migrateurs*.

(2) Si l’habitat essentiel ou une partie de celui-ci se trouve dans un parc national du Canada dénommé et décrit à l’annexe I de la *Loi sur les parcs nationaux du Canada*, une zone de protection marine sous le régime de la *Loi sur les océans*, un refuge d’oiseaux migrateurs sous le régime de la *Loi de 1994 sur la convention concernant les oiseaux migrateurs* ou une réserve nationale de la faune sous le régime de la *Loi sur les espèces sauvages du Canada*, le ministre compétent est tenu, dans les quatre-vingt-dix jours suivant la mise dans le registre du programme de rétablissement ou du plan d’action ayant défini l’habitat essentiel, de publier dans la *Gazette du Canada* une description de l’habitat essentiel ou de la partie de celui-ci qui se trouve dans le parc, la zone, le refuge ou la réserve.

(3) Le paragraphe (1) s’applique à l’habitat essentiel ou à la partie de celui-ci visés au paragraphe (2) après les quatre-vingt-dix jours suivant la publication de sa description dans la *Gazette du Canada* en application de ce paragraphe.

(4) Le paragraphe (1) s’applique à l’habitat essentiel ou à la partie de celui-ci qui ne se trouve pas dans un lieu visé au paragraphe (2), selon ce que précise un arrêté pris par le ministre compétent.
critical habitat, as the case may be, specified in an order made by the competent minister.

(5) Within 180 days after the recovery strategy or action plan that identified the critical habitat is included in the public registry, the competent minister must, after consultation with every other competent minister, with respect to all of the critical habitat or any portion of the critical habitat that is not in a place referred to in subsection (2),

(a) make the order referred to in subsection (4) if the critical habitat or any portion of the critical habitat is not legally protected by provisions in, or measures under, this or any other Act of Parliament, including agreements under section 11; or

(b) if the competent minister does not make the order, he or she must include in the public registry a statement setting out how the critical habitat or portions of it, as the case may be, are legally protected.

(5.1) Despite subsection (4), with respect to the critical habitat of a species of bird that is a migratory bird protected by the *Migratory Birds Convention Act, 1994* that is not on federal land, in the exclusive economic zone of Canada, on the continental shelf of Canada or in a migratory bird sanctuary referred to in subsection (2), subsection (1) applies only to those portions of the critical habitat that are habitat to which that Act applies and that the Governor in Council may, by order, specify on the recommendation of the competent minister.

(5.2) The competent minister must, within 180 days after the recovery strategy or action plan that identified the critical habitat that includes habitat to which the *Migratory Birds Convention Act, 1994* applies is included in the public registry, and after consultation with every other competent minister,

(a) make the recommendation if he or she is of the opinion there are no provisions in, or other measures under, this or any other Act of Parliament, including agreements under section 11, that legally protect any portion

(5) Dans les cent quatre-vingts jours suivant la mise dans le registre du programme de rétablissement ou du plan d’action ayant défini l’habitat essentiel, le ministre compétent est tenu, après consultation de tout autre ministre compétent, à l’égard de l’habitat essentiel ou de la partie de celui-ci qui ne se trouve pas dans un lieu visé au paragraphe (2):

a) de prendre l’arrêté visé au paragraphe (4), si l’habitat essentiel ou la partie de celui-ci ne sont pas protégés légalement par des dispositions de la présente loi ou de toute autre loi fédérale, ou une mesure prise sous leur régime, notamment les accords conclus au titre de l’article 11;

b) s’il ne prend pas l’arrêté, de mettre dans le registre une déclaration énonçant comment l’habitat essentiel ou la partie de celui-ci sont protégés légalement.

(5.1) Par dérogation au paragraphe (4), en ce qui concerne l’habitat essentiel d’une espèce d’oiseaux migrateurs protégée par la *Loi de 1994 sur la convention concernant les oiseaux migrateurs* situé hors du territoire domanial, de la zone économique exclusive ou du plateau continental du Canada ou d’un refuge d’oiseaux migrateurs visé au paragraphe (2), le paragraphe (1) ne s’applique qu’aux parties de cet habitat essentiel — constituées de tout ou partie de l’habitat auquel cette loi s’applique — précisées par le gouverneur en conseil par décret pris sur recommandation du ministre compétent.

(5.2) Dans les cent quatre-vingts jours suivant la mise dans le registre du programme de rétablissement ou du plan d’action ayant défini l’habitat essentiel qui comporte tout ou partie de l’habitat auquel la *Loi de 1994 sur la convention concernant les oiseaux migrateurs* s’applique, le ministre compétent est tenu, après consultation de tout autre ministre compétent :

a) de faire la recommandation si, à son avis, aucune disposition de la présente loi ou de toute autre loi fédérale, ni aucune mesure
or portions of the habitat to which that Act applies; or

(b) if the competent minister does not make the recommendation, he or she must include in the public registry a statement setting out how the critical habitat that is habitat to which that Act applies, or portions of it, as the case may be, are legally protected.

(6) If the competent minister is of the opinion that an order under subsection (4) or (5.1) would affect land in a territory that is not under the authority of the Minister or the Parks Canada Agency, he or she must consult the territorial minister before making the order under subsection (4) or the recommendation under subsection (5.2).

(6) Si le ministre compétent estime que l’arrêté visé au paragraphe (4) ou le décret visé au paragraphe (5.1) touchera des terres dans un territoire qui ne relèvent pas du ministre ou de l’Agence Parcs Canada, il est tenu de consulter le ministre territorial avant de prendre l’arrêté au titre du paragraphe (4) ou de faire la recommandation au titre du paragraphe (5.2).

(7) If the competent minister is of the opinion that an order under subsection (4) or (5.1) would affect a reserve or any other lands that are set apart for the use and benefit of a band under the Indian Act, he or she must consult the Minister of Indian Affairs and Northern Development and the band before making the order under subsection (4) or the recommendation under subsection (5.2).

(7) Si le ministre compétent estime que l’arrêté visé au paragraphe (4) ou le décret visé au paragraphe (5.1) touchera une réserve ou une autre terre qui a été mise de côté à l’usage et au profit d’une bande en application de la Loi sur les Indiens, il est tenu de consulter le ministre des Affaires indiennes et du Nord canadien et la bande avant de prendre l’arrêté au titre du paragraphe (4) ou de faire la recommandation au titre du paragraphe (5.2).

(8) If the competent minister is of the opinion that an order under subsection (4) or (5.1) would affect an area in respect of which a wildlife management board is authorized by a land claims agreement to perform functions in respect of wildlife species, he or she must consult the wildlife management board before making the order under subsection (4) or the recommendation under subsection (5.2).

(8) Si le ministre compétent estime que l’arrêté visé au paragraphe (4) ou le décret visé au paragraphe (5.1) touchera une aire à l’égard de laquelle un conseil de gestion des ressources faunique est habilité par un accord sur des revendications territoriales à exercer des attributions à l’égard d’espèces sauvages, il est tenu de consulter le conseil avant de prendre l’arrêté au titre du paragraphe (4) ou de faire la recommandation au titre du paragraphe (5.2).

(9) If the competent minister is of the opinion that an order under subsection (4) or (5.1) would affect land that is under the authority of another federal minister, other than a competent minister, he or she must consult the other federal minister before making the order under subsection (4) or the recommendation under subsection (5.2).

(9) Si le ministre compétent estime que l’arrêté visé au paragraphe (4) ou le décret visé au paragraphe (5.1) touchera des terres relevant d’un autre ministre fédéral, sauf un ministre compétent, il est tenu de consulter cet autre ministre fédéral avant de prendre l’arrêté au titre du paragraphe (4) ou de faire la recommandation au titre du paragraphe (5.2).
59. (1) The Governor in Council may, on the recommendation of the competent minister after consultation with every other competent minister, make regulations to protect critical habitat on federal lands.

59. (1) Sur recommandation faite par le ministre compétent après consultation de tout autre ministre compétent, le gouverneur en conseil peut, par règlement, prendre des mesures de protection de l’habitat essentiel sur le territoire domanial.

(2) The competent minister must make the recommendation if the recovery strategy or an action plan identifies a portion of the critical habitat as being unprotected and the competent minister is of the opinion that the portion requires protection.

(2) Le ministre compétent est tenu de faire la recommandation si, d’une part, un programme de rétablissement ou un plan d’action désigne une partie de l’habitat essentiel comme non protégée et, d’autre part, il estime qu’il est nécessaire de la protéger.

(3) The regulations may include provisions requiring the doing of things that protect the critical habitat and provisions prohibiting activities that may adversely affect the critical habitat.

(3) Les règlements peuvent comporter des mesures visant à protéger l’habitat essentiel et d’autres interdisant les activités susceptibles de lui nuire.

(4) If the competent minister is of the opinion that a regulation would affect land in a territory that is not under the authority of the Minister or the Parks Canada Agency, he or she must consult the territorial minister before recommending the making of the regulation.

(4) Si le ministre compétent estime que le règlement touchera des terres dans un territoire qui ne relèvent pas du ministre ou de l’Agence Parcs Canada, il est tenu de consulter le ministre territorial avant d’en recommander la prise.

(5) If the competent minister is of the opinion that a regulation would affect a reserve or any other lands that are set apart for the use and benefit of a band under the Indian Act, he or she must consult the Minister of Indian Affairs and Northern Development and the band before recommending the making of the regulation.

(5) Si le ministre compétent estime que le règlement touchera une réserve ou une autre terre qui a été mise de côté à l’usage et au profit d’une bande en application de la Loi sur les Indiens, il est tenu de consulter le ministre des Affaires indiennes et du Nord canadien et la bande avant d’en recommander la prise.

(6) If the competent minister is of the opinion that a regulation would affect an area in respect of which a wildlife management board is authorized by a land claims agreement to perform functions in respect of wildlife species, he or she must consult the wildlife management board before recommending the making of the regulation.

(6) Si le ministre compétent estime que le règlement touchera une aire à l’égard de laquelle un conseil de gestion des ressources fauniques est habilité par un accord sur des revendications territoriales à exercer des attributions à l’égard d’espèces sauvages, il est tenu de consulter le conseil avant d’en recommander la prise.

60. (1) If a wildlife species has been classified as an endangered species or a threatened species by a provincial or territorial minister, no person shall destroy any part of the habitat of that species that the provincial or territorial minister has identified as essential to the survival or recovery of the species and that is on federal lands in the province or territory.

60. (1) Si une espèce sauvage est classée comme espèce en voie de disparition ou menacée par un ministre provincial ou territorial, il est interdit de détruire un élément de l’habitat de cette espèce se trouvant sur le territoire domanial situé dans la province ou le territoire et désigné par le ministre provincial ou territorial comme nécessaire à la survie ou au rétablissement de l’espèce.
Application (2) Subsection (1) applies only to the portions of the habitat that the Governor in Council may, on the recommendation of the competent minister, by order, specify.

Destruction of critical habitat

61. (1) No person shall destroy any part of the critical habitat of a listed endangered species or a listed threatened species that is in a province or territory and that is not part of federal lands.

Exception

(1.1) Subsection (1) does not apply in respect of

(a) an aquatic species; or

(b) the critical habitat of a species of bird that is a migratory bird protected by the Migratory Birds Convention Act, 1994 that is habitat referred to in subsection 58(5.1).

Application (2) Subsection (1) applies only to the portions of the habitat that the Governor in Council may, on the recommendation of the competent minister, by order, specify.

Power to make recommendation

(3) The Minister may make a recommendation if

(a) a provincial minister or territorial minister has requested that the recommendation be made; or

(b) the Canadian Endangered Species Conservation Council has recommended that the recommendation be made.

Obligation to make recommendation

(4) The Minister must make a recommendation if he or she is of the opinion, after consultation with the appropriate provincial or territorial minister, that

(a) there are no provisions in, or other measures under, this or any other Act of Parliament that protect the particular portion of the critical habitat, including agreements under section 11; and

(b) the laws of the province or territory do not effectively protect the critical habitat.

Expiry and renewal of order

(5) An order made under subsection (2) expires five years after the day on which it is made or renewed, unless the Governor in Council, by order, renews it.
6. If the Minister is of the opinion that an order made under subsection (2) is no longer necessary to protect the portion of the critical habitat to which the order relates or that the province or territory has brought into force laws that protect the portion, the Minister must recommend that the order be repealed.

(6) Le ministre est tenu de recommander l’abrogation du décret visé au paragraphe (2) s’il estime soit que son application n’est plus nécessaire pour la protection de la partie de l’habitat essentiel visée par le décret, soit que la province ou le territoire a pris les mesures législatives voulues pour protéger la partie visée.

62. A competent minister may enter into an agreement with any government in Canada, organization or person to acquire any lands or interests in land for the purpose of protecting the critical habitat of any species at risk.

62. Le ministre compétent peut conclure avec un gouvernement au Canada, une organisation ou une personne un accord pour l’acquisition de terres ou de droits sur des terres en vue de la protection de l’habitat essentiel d’une espèce en péril.

63. If in the opinion of the Minister any portion of the critical habitat of a listed wildlife species remains unprotected 180 days after the recovery strategy or action plan that identified the critical habitat was included in the public registry, the Minister must include in that registry a report on the steps taken to protect the critical habitat. The Minister must continue to report with respect to every subsequent period of 180 days until the portion is protected or is no longer identified as critical habitat.

63. Si le ministre estime qu’une partie de l’habitat essentiel d’une espèce sauvage inscrite n’est pas encore protégée à l’expiration d’un délai de cent quatre-vingts jours suivant la mise dans le registre du programme de rétablissement ou du plan d’action dans lequel cet habitat a été désigné, il est tenu de mettre dans le registre un rapport sur les mesures prises pour le protéger à cette date et à des intervalles de cent quatre-vingts jours par la suite jusqu’à ce que la partie visée soit protégée ou que sa désignation soit révoquée.

64. (1) The Minister may, in accordance with the regulations, provide fair and reasonable compensation to any person for losses suffered as a result of any extraordinary impact of the application of

(a) section 58, 60 or 61; or

(b) an emergency order in respect of habitat identified in the emergency order that is necessary for the survival or recovery of a wildlife species.

(1) Le ministre peut, en conformité avec les règlements, verser à toute personne une indemnité juste et raisonnable pour les pertes subies en raison des conséquences extraordinaires que pourrait avoir l’application :

a) des articles 58, 60 ou 61;

b) d’un décret d’urgence en ce qui concerne l’habitat qui y est désigné comme nécessaire à la survie ou au rétablissement d’une espèce sauvage.

(2) The Governor in Council shall make regulations that the Governor in Council considers necessary for carrying out the purposes and provisions of subsection (1), including regulations prescribing

(a) the procedures to be followed in claiming compensation;

(b) the methods to be used in determining the eligibility of a person for compensation, the amount of loss suffered by a person and the amount of compensation in respect of any loss; and

(2) Le gouverneur en conseil doit, par règlement, prendre toute mesure qu’il juge nécessaire à l’application du paragraphe (1), notamment fixer :

a) la marche à suivre pour réclamer une indemnité;

b) le mode de détermination du droit à indemnité, de la valeur de la perte subie et du montant de l’indemnité pour cette perte;

c) les modalités de l’indemnisation.
Management of Species of Special Concern

65. If a wildlife species is listed as a species of special concern, the competent minister must prepare a management plan for the species and its habitat. The plan must include measures for the conservation of the species that the competent minister considers appropriate and it may apply with respect to more than one wildlife species.

66. (1) To the extent possible, the management plan must be prepared in cooperation with

(a) the appropriate provincial and territorial minister of each province and territory in which the listed wildlife species is found;

(b) every minister of the Government of Canada who has authority over federal land or other areas on which the species is found;

(c) if the species is found in an area in respect of which a wildlife management board is authorized by a land claims agreement to perform functions in respect of wildlife species, the wildlife management board;

(d) every aboriginal organization that the competent minister considers will be directly affected by the management plan; and

(e) any other person or organization that the competent minister considers appropriate.

(2) If the listed wildlife species is found in an area in respect of which a wildlife management board is authorized by a land claims agreement to perform functions in respect of wildlife species, the management plan must be prepared, to the extent that it will apply to that area, in accordance with the provisions of the agreement.

(3) To the extent possible, the management plan must be prepared in consultation with any landowners, lessees and other persons whom the competent minister considers to be directly affected by, or interested in, the management plan, including the government of any other country in which the species is found.

Gestion des espèces préoccupantes

65. Dans le cas où une espèce sauvage est inscrite comme espèce préoccupante, le ministre compétent est tenu d’élaborer un plan de gestion comportant les mesures qu’il estime indiquées pour la conservation de l’espèce et celle de son habitat. Le plan peut s’appliquer à plus d’une espèce.

66. (1) Dans la mesure du possible, le plan de gestion est élaboré en collaboration avec :

a) le ministre provincial ou territorial compétent dans la province ou le territoire où se trouve l’espèce sauvage inscrite;

b) tout ministre fédéral dont relèvent le territoire domanial ou les autres aires où se trouve l’espèce;

c) si l’espèce se trouve dans une aire à l’égard de laquelle un conseil de gestion des ressources fauniques est habilité par un accord sur des revendications territoriales à exercer des attributions à l’égard d’espèces sauvages, le conseil;

d) toute organisation autochtone que le ministre compétent croit directement touchée par le plan de gestion;

e) toute autre personne ou organisation qu’il estime compétente.

(2) Si l’espèce sauvage inscrite se trouve dans une aire à l’égard de laquelle un conseil de gestion des ressources fauniques est habilité par un accord sur des revendications territoriales à exercer des attributions à l’égard d’espèces sauvages, le plan de gestion est élaboré, dans la mesure où il s’applique à cette aire, en conformité avec les dispositions de cet accord.

(3) Le plan de gestion est élaboré, dans la mesure du possible, en consultation avec les propriétaires fonciers, les locataires et les autres personnes que le ministre compétent croit directement touchés ou intéressés, notamment le gouvernement de tout autre pays où se trouve l’espèce.
67. The competent minister may adopt a multi-species or an ecosystem approach when preparing the management plan if he or she considers it appropriate to do so.

68. (1) Subject to subsection (2), the competent minister must include a proposed management plan in the public registry within three years after the wildlife species is listed as a species of special concern.

(2) With respect to a wildlife species that is set out in Schedule 1 as a species of special concern on the day section 27 comes into force, the competent minister must include a proposed management plan in the public registry within five years after that day.

69. (1) If the competent minister is of the opinion that an existing plan relating to a wildlife species includes adequate measures for the conservation of the species and the competent minister adopts the existing plan as the proposed management plan, he or she must include a copy of it in the public registry as the proposed management plan in relation to the species.

(2) The competent minister may incorporate any part of an existing plan relating to a wildlife species into a proposed management plan for the species.

70. (1) The competent minister may at any time amend a management plan. A copy of the amendment must be included in the public registry.
(2) Section 66 applies to amendments to the management plan, with any modifications that the circumstances require.

(3) Subsection (2) does not apply if the competent minister considers the amendment to be minor.

71. (1) The Governor in Council may, on the recommendation of the competent minister, make any regulations with respect to aquatic species or species of birds that are migratory birds protected by the Migratory Birds Convention Act, 1994, regardless of where they are located, or with respect to any other wildlife species on federal lands, that the Governor in Council considers appropriate for the purpose of implementing the measures included in the management plan.

(2) If the competent minister is of the opinion that a regulation would affect a reserve or any other lands that are set apart for the use and benefit of a band under the Indian Act, he or she must consult the Minister of Indian Affairs and Northern Development and the band before recommending the making of the regulation.

(3) If the competent minister is of the opinion that a regulation would affect an area in respect of which a wildlife management board is authorized by a land claims agreement to perform functions in respect of wildlife species, he or she must consult the wildlife management board before recommending the making of the regulation.

(4) The regulations may incorporate by reference any legislation of a province or territory, as amended from time to time, insofar as the regulations apply in that province or territory.

(5) If the competent minister is of the opinion that a regulation would affect land in a territory, he or she must consult the territorial minister before recommending the making of the regulation.

(6) Subsection (5) does not apply

(a) in respect of individuals of aquatic species and their habitat or species of birds that are migratory birds protected by the Migratory Birds Convention Act, 1994 and their habitat; or

(2) L’article 66 s’applique, avec les adaptations nécessaires, à la modification du plan de gestion.

(3) Le paragraphe (2) ne s’applique pas si le ministre compétent estime que la modification est mineure.

71. (1) Sur recommandation du ministre compétent, le gouverneur en conseil peut, à l’égard des espèces aquatiques ou des espèces d’oiseaux migrateurs protégées par la Loi de 1994 sur la convention concernant les oiseaux migrateurs, où qu’elles se trouvent, ou à l’égard de toute autre espèce sauvage se trouvant sur le territoire domanial, prendre les règlements qu’il estime indiqués pour la mise en œuvre du plan de gestion.

(2) Si le ministre compétent estime que le règlement touchera une réserve ou une autre terre qui a été mise de côté à l’usage et au profit d’une bande en application de la Loi sur les Indiens, il est tenu de consulter le ministre des Affaires indiennes et du Nord canadien et la bande avant d’en recommander la prise.

(3) Si le ministre compétent estime que le règlement proposé touche une aire à l’égard de laquelle un conseil de gestion des ressources fauniques est habilité par un accord sur des revendications territoriales à exercer des attributions à l’égard d’espèces sauvages, il est tenu de consulter le conseil avant d’en recommander la prise.

(4) Les règlements peuvent incorporer par renvoi, dans la mesure où ils s’appliquent à une province ou à un territoire, toute mesure législative de la province ou du territoire, avec ses modifications successives.

(5) Si le ministre compétent estime que le règlement touchera des terres dans un territoire, il est tenu de consulter le ministre territorial avant d’en recommander la prise.

(6) Le paragraphe (5) ne s’applique pas :

(a) à l’égard des individus d’une espèce aquatique ou d’une espèce d’oiseau migrateur protégée par la Loi de 1994 sur la convention concernant les oiseaux migrateurs, et de leur habitat;
(b) in respect of land under the authority of the Minister or the Parks Canada Agency.

72. The competent minister must monitor the implementation of the management plan and must assess its implementation five years after the plan is included in the public registry, and in every subsequent five-year period, until its objectives have been achieved. The report must be included in the public registry.

72. Il incombe au ministre compétent d’assurer le suivi de la mise en œuvre du plan de gestion et d’évaluer celle-ci cinq ans après sa mise dans le registre et à intervalles de cinq ans par la suite, jusqu’à ce que ses objectifs soient atteints. Il doit également verser au registre un rapport de chaque évaluation.

Agreements and Permits

73. (1) The competent minister may enter into an agreement with a person, or issue a permit to a person, authorizing the person to engage in an activity affecting a listed wildlife species, any part of its critical habitat or the residences of its individuals.

73. (1) Le ministre compétent peut conclure avec une personne un accord l’autorisant à exercer une activité touchant une espèce sauvage inscrite, tout élément de son habitat essentiel ou la résidence de ses individus, ou lui délivrer un permis à cet effet.

(2) The agreement may be entered into, or the permit issued, only if the competent minister is of the opinion that

(a) the activity is scientific research relating to the conservation of the species and conducted by qualified persons;

(b) the activity benefits the species or is required to enhance its chance of survival in the wild; or

(c) affecting the species is incidental to the carrying out of the activity.

(2) Cette activité ne peut faire l’objet de l’accord ou du permis que si le ministre compétent estime qu’il s’agit d’une des activités suivantes :

(a) des recherches scientifiques sur la conservation des espèces menées par des personnes compétentes;

(b) une activité qui profite à l’espèce ou qui est nécessaire à l’augmentation des chances de survie de l’espèce à l’état sauvage;

(c) une activité qui ne touche l’espèce que de façon incidente.

(3) The agreement may be entered into, or the permit issued, only if the competent minister is of the opinion that

(a) all reasonable alternatives to the activity that would reduce the impact on the species have been considered and the best solution has been adopted;

(b) all feasible measures will be taken to minimize the impact of the activity on the species or its critical habitat or the residences of its individuals; and

(c) the activity will not jeopardize the survival or recovery of the species.

(3) Le ministre compétent ne conclut l’accord ou ne délivre le permis que s’il estime que :

(a) toutes les solutions de rechange susceptibles de minimiser les conséquences négatives de l’activité pour l’espèce ont été envisagées et la meilleure solution retenue;

(b) toutes les mesures possibles seront prises afin de minimiser les conséquences négatives de l’activité pour l’espèce, son habitat essentiel ou la résidence de ses individus;

(c) l’activité ne mettra pas en péril la survie ou le rétablissement de l’espèce.

(3.1) If an agreement is entered into or a permit is issued, the competent minister must include in the public registry an explanation of why it was entered into or issued, taking into account the matters referred to in paragraphs (3)(a), (b) and (c).

(3.1) Si un accord est conclu ou un permis délivré, le ministre compétent met dans le registre les raisons pour lesquelles l’accord a été conclu ou le permis délivré, compte tenu des considérations mentionnées aux alinéas (3)(a) à (c).
(4) If the species is found in an area in respect of which a wildlife management board is authorized by a land claims agreement to perform functions in respect of wildlife species, the competent minister must consult the wildlife management board before entering into an agreement or issuing a permit concerning that species in that area.

(5) If the species is found in a reserve or any other lands that are set apart for the use and benefit of a band under the Indian Act, the competent minister must consult the band before entering into an agreement or issuing a permit concerning that species in that reserve or those other lands.

(6) The agreement or permit must contain any terms and conditions governing the activity that the competent minister considers necessary for protecting the species, minimizing the impact of the authorized activity on the species or providing for its recovery.

(7) The competent minister must review the agreement or permit if an emergency order is made with respect to the species.

(8) The competent minister may revoke or amend an agreement or a permit to ensure the survival or recovery of a species.

(9) No agreement may be entered into for a term longer than five years and no permit may be issued for a term longer than three years.

(10) The Minister may, after consultation with the Minister of Canadian Heritage and the Minister of Fisheries and Oceans, make regulations respecting the entering into of agreements, the issuance of permits and the renewal, revocation, amendment and suspension of agreements and permits.

74. An agreement, permit, licence, order or other similar document authorizing a person or organization to engage in an activity affecting a listed wildlife species, any part of its critical habitat or the residences of its individuals that is entered into, issued or made by the competent minister under another Act of Parliament has the same effect as an agreement or permit under subsection 73(1) if
(a) before it is entered into, issued or made, the competent minister is of the opinion that the requirements of subsections 73(2) to (6) and (9) are met; and

(b) after it is entered into, issued or made, the competent minister complies with the requirements of subsection 73(7).

75. (1) A competent minister may add terms and conditions to protect a listed wildlife species, any part of its critical habitat or the residences of its individuals to any agreement, permit, licence, order or other similar document authorizing a person to engage in an activity affecting the species, any part of its critical habitat or the residences of its individuals that is entered into, issued or made by the competent minister under another Act of Parliament.

(2) A competent minister may also revoke or amend any term or condition in any of those documents to protect a listed wildlife species, any part of its critical habitat or the residences of its individuals.

(3) The competent minister must take into account any applicable provisions of treaty and land claims agreements when carrying out his or her powers under this section.

76. The Governor in Council may, on the recommendation of a competent minister, by order, provide that section 32, 33, 36, 58, 60 or 61, or any regulation made under section 53, 59 or 71, does not apply, for a period of up to one year from the date of listing of a wildlife species, to agreements, permits, licences, orders or other similar documents authorizing persons to engage in an activity affecting the listed wildlife species, any part of its critical habitat or the residences of its individuals that were entered into, issued or made under another Act of Parliament before the species was listed.
77. (1) Despite any other Act of Parliament, any person or body, other than a competent minister, authorized under any Act of Parliament, other than this Act, to issue or approve a licence, a permit or any other authorization that authorizes an activity that may result in the destruction of any part of the critical habitat of a listed wildlife species may enter into, issue, approve or make the authorization only if the person or body has consulted with the competent minister, has considered the impact on the species’ critical habitat and is of the opinion that

(a) all reasonable alternatives to the activity that would reduce the impact on the species’ critical habitat have been considered and the best solution has been adopted; and

(b) all feasible measures will be taken to minimize the impact of the activity on the species’ critical habitat.

77. (1) Malgré toute autre loi fédérale, toute personne ou tout organisme, autre qu’un ministre compétent, habilité par une loi fédérale, à l’exception de la présente loi, à délivrer un permis ou une autre autorisation, ou à y donner son agrément, visant la mise à exécution d’une activité susceptible d’entraîner la destruction d’un élément de l’habitat essentiel d’une espèce sauvage inscrite ne peut le faire que s’il a consulté le ministre compétent, s’il a envisagé les conséquences négatives de l’activité pour l’habitat essentiel de l’espèce et s’il estime, à la fois :

a) que toutes les solutions de rechange susceptibles de minimiser les conséquences négatives de l’activité pour l’habitat essentiel de l’espèce ont été envisagées, et la meilleure solution retenue;

b) que toutes les mesures possibles seront prises afin de minimiser les conséquences négatives de l’activité pour l’habitat essentiel de l’espèce.

(2) For greater certainty, section 58 applies even though a licence, a permit or any other authorization has been issued in accordance with subsection (1).

78. (1) An agreement, permit, licence, order or other similar document authorizing a person to engage in an activity affecting a listed wildlife species, any part of its critical habitat or the residences of its individuals that is entered into, issued or made under an Act of the legislature of a province or a territory by a provincial or territorial minister with whom a competent minister has entered into an agreement under section 10 has the same effect as an agreement or permit under subsection 73(1) if

(a) before it is entered into, issued or made, the provincial or territorial minister determines that the requirements of subsections 73(2), (3), (6) and (9) are met; and

(b) after it is entered into, issued or made, the provincial or territorial minister complies with the requirements of subsection 73(7).

78. (1) A le même effet qu’un accord ou permis visé au paragraphe 73(1) tout accord, tout permis, toute licence ou tout arrêté — ou autre document semblable — conclu, délivré ou pris en application d’une loi provinciale ou territoriale par un ministre provincial ou territorial avec lequel le ministre compétent a conclu un accord au titre de l’article 10 et ayant pour objet d’autoriser l’exercice d’une activité touchant une espèce sauvage inscrite, tout élément de son habitat essentiel ou la résidence de ses individus, si :

a) avant la conclusion, la délivrance ou la prise, le ministre provincial ou territorial s’assure que les exigences des paragraphes 73(2), (3), (6) et (9) sont remplies;

b) après la conclusion, la délivrance ou la prise, le ministre provincial ou territorial se conforme aux exigences du paragraphe 73(7).
(2) For the purpose of subsection (1), the references to “competent minister” in subsections 73(2), (3), (6) and (7) are to be read as references to “provincial minister” or “territorial minister”, as the case may be.

Project Review

79. (1) Every person who is required by or under an Act of Parliament to ensure that an assessment of the environmental effects of a project is conducted must, without delay, notify the competent minister or ministers in writing of the project if it is likely to affect a listed wildlife species or its critical habitat.

(2) The person must identify the adverse effects of the project on the listed wildlife species and its critical habitat and, if the project is carried out, must ensure that measures are taken to avoid or lessen those effects and to monitor them. The measures must be taken in a way that is consistent with any applicable recovery strategy and action plans.

Definitions

“person” includes an association or organization, and a responsible authority as defined in subsection 2(1) of the Canadian Environmental Assessment Act.

“project” means a project as defined in subsection 2(1) of the Canadian Environmental Assessment Act.

Emergency Orders

80. (1) The Governor in Council may, on the recommendation of the competent minister, make an emergency order to provide for the protection of a listed wildlife species.

(2) The competent minister must make the recommendation if he or she is of the opinion that the species faces imminent threats to its survival or recovery.

(3) Before making a recommendation, the competent minister must consult every other competent minister.

Emergency order

Obligation to make recommendation

Consultation

Décrets d’urgence

80. (1) Sur recommandation du ministre compétent, le gouverneur en conseil peut prendre un décret d’urgence visant la protection d’une espèce sauvage inscrite.

(2) Le ministre compétent est tenu de faire la recommandation s’il estime que l’espèce est exposée à des menaces imminentes pour sa survie ou son rétablissement.

(3) Avant de faire la recommandation, il consulte tout autre ministre compétent.

Décrets d’urgence obligatoire
(4) The emergency order may

(a) in the case of an aquatic species,

(i) identify habitat that is necessary for
the survival or recovery of the species in
the area to which the emergency order
relates, and

(ii) include provisions requiring the do-
ing of things that protect the species and
that habitat and provisions prohibiting
activities that may adversely affect the
species and that habitat;

(b) in the case of a species that is a species
of migratory birds protected by the Migrat-
ory Birds Convention Act, 1994,

(i) on federal land or in the exclusive
economic zone of Canada,

(A) identify habitat that is necessary
for the survival or recovery of the
species in the area to which the
emergency order relates, and

(B) include provisions requiring the
doing of things that protect the species
and that habitat and provisions prohib-
iting activities that may adversely
affect the species and that habitat, and

(ii) on land other than land referred to in
subparagraph (i),

(A) identify habitat that is necessary
for the survival or recovery of the
species in the area to which the
emergency order relates, and

(B) include provisions requiring the
doing of things that protect the species
and provisions prohibiting activities
that may adversely affect the species
and that habitat; and

(c) with respect to any other species,

(i) on federal land, in the exclusive
economic zone of Canada or on the
continental shelf of Canada,

(A) identify habitat that is necessary
for the survival or recovery of the
species in the area to which the
emergency order relates, and

(4) Le décret peut :

a) dans le cas d’une espèce aquatique :

(i) désigner l’habitat qui est nécessaire à
la survie ou au rétablissement de l’espèce
dans l’aire visée par le décret,

(ii) imposer des mesures de protection de
l’espèce et de cet habitat, et comporter
des dispositions interdisant les activités
susceptibles de leur nuire;

b) dans le cas d’une espèce d’oiseau
migrateur protégée par la Loi de 1994 sur la
Convention concernant les oiseaux migra-
teurs se trouvant :

(i) sur le territoire domanial ou dans la
zone économique exclusive du Canada :

(A) désigner l’habitat qui est nécessa-
ire à la survie ou au rétablissement de
l’espèce dans l’aire visée par le décret,

(B) imposer des mesures de protection
de l’espèce et de cet habitat, et com-
porter des dispositions interdisant les
activités susceptibles de leur nuire,

(ii) ailleurs que sur le territoire visé au
sous-alinéa (i) :

(A) désigner l’habitat qui est nécessei-
re à la survie ou au rétablissement de
l’espèce dans l’aire visée par le décret,

(B) imposer des mesures de protection
de l’espèce, et comporter des disposi-
tions interdisant les activités suscepti-
bles de nuire à l’espèce et à cet habitat;

c) dans le cas de toute autre espèce se
trouvant :

(i) sur le territoire domanial, dans la zone
économique exclusive ou sur le plateau
continental du Canada :

(A) désigner l’habitat qui est nécessai-
re à la survie ou au rétablissement de
l’espèce dans l’aire visée par le décret,

(B) imposer des mesures de protection
de l’espèce et de cet habitat, et com-
porter des dispositions interdisant les
activités susceptibles de leur nuire,

(ii) ailleurs que sur le territoire visé au
sous-alinéa (i) :

Contenu du décret
(B) include provisions requiring the doing of things that protect the species and that habitat and provisions prohibiting activities that may adversely affect the species and that habitat, and

(ii) on land other than land referred to in subparagraph (i),

(A) identify habitat that is necessary for the survival or recovery of the species in the area to which the emergency order relates, and

(B) include provisions prohibiting activities that may adversely affect the species and that habitat.

(5) An emergency order is exempt from the application of section 3 of the Statutory Instruments Act.

81. Despite subsection 80(2), the competent minister is not required to make a recommendation for an emergency order if he or she is of the opinion that equivalent measures have been taken under another Act of Parliament to protect the wildlife species.

82. If the competent minister is of the opinion that the species to which the emergency order relates would no longer face imminent threats to its survival or recovery even if the order were repealed, he or she must make a recommendation to the Governor in Council that the emergency order be repealed.

Exceptions

83. (1) Subsections 32(1) and (2), section 33, subsections 36(1), 58(1), 60(1) and 61(1), regulations made under section 53, 59 or 71 and emergency orders do not apply to a person who is engaging in

(a) activities related to public safety, health or national security, that are authorized by or under any other Act of Parliament or activities under the Health of Animals Act and the Plant Protection Act for the health of animals and plants; or

(b) activities authorized under section 73, 74 or 78 by an agreement, permit, licence, order or similar document.

(5) Les décrets d’urgence sont soustraits à l’application de l’article 3 de la Loi sur les textes réglementaires.

81. Malgré le paragraphe 80(2), le ministre compétent n’est pas tenu de recommander la prise d’un décret d’urgence s’il estime que des mesures équivalentes ont été prises en vertu d’une autre loi fédérale pour protéger l’espèce sauvage.

82. Si le ministre compétent estime que l’espèce sauvage visée par un décret d’urgence ne serait plus exposée à des menaces imminentes pour sa survie ou son rétablissement si le décret était abrogé, il est tenu de recommander au gouverneur en conseil de l’abroger.

Exceptions générales

83. (1) Les paragraphes 32(1) et (2), l’article 33, les paragraphes 36(1), 58(1), 60(1) et 61(1), les règlements pris en vertu des articles 53, 59 ou 71 et les décrets d’urgence ne s’appliquent pas à une personne exerçant des activités :

a) en matière soit de sécurité ou de santé publiques ou de sécurité nationale autorisées sous le régime de toute autre loi fédérale, soit de santé des animaux et des végétaux autorisées sous le régime de la Loi sur la santé des animaux et la Loi sur la protection des végétaux;

b) autorisées par un accord, un permis, une licence, un arrêté ou un autre document visé aux articles 73, 74 ou 78.
(2) A power under an Act described in paragraph (1)(a) may be used to authorize an activity prohibited by subsection 32(1) or (2), section 33, subsection 36(1), 58(1), 60(1) or 61(1), a regulation made under section 53, 59 or 71 or an emergency order only if the person exercising the power

(a) determines that the activity is necessary for the protection of public safety, health, including animal and plant health, or national security; and

(b) respects the purposes of this Act to the greatest extent possible.

(3) Subsections 32(1) and (2), section 33, subsections 36(1), 58(1), 60(1) and 61(1) and regulations made under section 53, 59 or 71 do not apply to a person who is engaging in activities in accordance with conservation measures for wildlife species under a land claims agreement.

(4) Subsections 32(1) and (2), section 33 and subsections 36(1), 58(1), 60(1) and 61(1) do not apply to a person who is engaging in activities that are permitted by a recovery strategy, an action plan or a management plan and who is also authorized under an Act of Parliament to engage in that activity, including a regulation made under section 53, 59 or 71.

(5) Subsection 32(2) and paragraph 36(1)(b) do not apply to a person who possesses an individual of a listed extirpated, endangered or threatened species, or any part or derivative of such an individual, if

(a) it was in the person’s possession when the species was listed;

(b) it is used by an aboriginal person for ceremonial or medicinal purposes, or it is part of ceremonial dress used for ceremonial or cultural purposes by an aboriginal person;

(c) the person acquired it legally in another country and imported it legally into Canada;

(2) Toute activité interdite aux termes des paragraphes 32(1) ou (2), de l’article 33, des paragraphes 36(1), 58(1), 60(1) ou 61(1), des règlements pris en vertu des articles 53, 59 ou 71 ou d’un décret d’urgence peut être autorisée au titre d’une loi visée à l’alinéa (1)a) si la personne qui l’autorise :

a) conclut qu’elle est nécessaire à la protection de la sécurité ou de la santé publiques — notamment celle des animaux et des végétaux — ou de la sécurité nationale;

b) respecte, dans la mesure du possible, l’objet de la présente loi.

(3) Les paragraphes 32(1) et (2), l’article 33, les paragraphes 36(1), 58(1), 60(1) et 61(1) et les règlements pris en vertu des articles 53, 59 ou 71 ne s’appliquent pas à une personne exerçant des activités conformes aux régimes de conservation des espèces sauvages dans le cadre d’un accord sur des revendications territoriales.

(4) Les paragraphes 32(1) et (2), l’article 33, les paragraphes 36(1), 58(1), 60(1) et 61(1) ne s’appliquent pas à une personne exerçant des activités autorisées, d’une part, par un programme de rétablissement, un plan d’action ou un plan de gestion et, d’autre part, sous le régime d’une loi fédérale, notamment au titre d’un règlement pris en vertu des articles 53, 59 ou 71.

(5) Le paragraphe 32(2) et l’alinéa 36(1)b) ne s’appliquent pas à une personne qui possède un individu — notamment partie d’un individu ou produit qui en provient — d’une espèce sauvage inscrite comme espèce disparue du pays, en voie de disparition ou menacée si, selon le cas :

a) la personne l’avait en sa possession au moment de l’inscription de l’espèce;

b) l’individu ou l’article est utilisé par une personne autochtone à des fins cérémonielles ou médicinales, ou fait partie d’un habit cérémonial utilisé à des fins cérémonielles ou culturelles par une personne autochtone;

c) la personne l’a légalement acquis à l’extérieur du Canada, puis l’y a importé légalement;
(d) the person acquired it by succession from someone who was entitled to possess it under this Act;

(e) the person acquired it under circumstances that would afford them a defence under section 100 and the person possesses it only for as long as is necessary to donate it to a museum, a zoo, an educational institution, a scientific society or a government;

(f) the person is, or is acting on behalf of, a museum, zoo, educational institution, scientific society or government and the person acquired it from someone who was entitled to possess it under this Act; or

(g) it or the person is otherwise exempt by the regulations.

84. The Governor in Council may, on the recommendation of the Minister after consultation with the Minister of Canadian Heritage and the Minister of Fisheries and Oceans, make regulations for the purpose of paragraph 83(5)(g).

ENFORCEMENT MEASURES

Enforcement Officers

85. (1) A competent minister may designate any person or person of a class of persons to act as enforcement officers for the purposes of this Act.

(2) The competent minister may not designate any person or person of a class of persons employed by the government of a province or a territory unless that government agrees.

(3) An enforcement officer must be provided with a certificate of designation as an enforcement officer in a form approved by the competent minister and, on entering any place under this Act, the officer must, if so requested, show the certificate to the occupant or person in charge of the place.

84. Sur recommandation faite par le ministre après consultation du ministre du Patrimoine canadien et du ministre des Pêches et des Océans, le gouverneur en conseil peut, par règlement, prendre des mesures d’application de l’alinéa 83(5)g.

CONTRÔLE D’APPLICATION

Agents de l’autorité

85. (1) Le ministre compétent peut désigner, individuellement ou par catégorie, les agents de l’autorité chargés de contrôler l’application de la présente loi.

(2) La désignation de fonctionnaires provinciaux ou territoriaux est toutefois subordonnée à l’agrément du gouvernement provincial ou territorial intéressé.

(3) Les agents sont munis d’un certificat de désignation en la forme approuvée par le ministre compétent qu’ils présentent, sur demande, au responsable ou à l’occupant du lieu visité.
(4) For the purposes of this Act, enforcement officers have all the powers of a peace officer, but the competent minister may specify limits on those powers when designating any person or person of a class of persons to act as enforcement officers.

(5) For the purpose of investigations and other law enforcement activities under this Act, a competent minister may, on any terms and conditions that he or she considers necessary, exempt from the application of any provision of this Act, the regulations or an emergency order enforcement officers whom the competent minister has designated and who are carrying out duties or functions under this Act and persons acting under the direction and control of such enforcement officers.

**Inspections**

86. (1) For the purpose of ensuring compliance with any provision of this Act, the regulations or an emergency order, an enforcement officer may, subject to subsection (3), at any reasonable time enter and inspect any place in which the enforcement officer believes, on reasonable grounds, there is anything to which the provision applies or any document relating to its administration, and the enforcement officer may

(a) open or cause to be opened any container that the enforcement officer believes, on reasonable grounds, contains that thing or document;

(b) inspect the thing and take samples free of charge;

(c) require any person to produce the document for inspection or copying, in whole or in part; and

(d) seize any thing by means of or in relation to which the enforcement officer believes, on reasonable grounds, the provision has been contravened or that the enforcement officer believes, on reasonable grounds, will provide evidence of a contravention.

(2) For the purposes of carrying out the inspection, the enforcement officer may stop a conveyance or direct that it be moved to a place where the inspection can be carried out.

**Conveyance**

(2) For the purposes of carrying out the inspection, the enforcement officer may stop a conveyance or direct that it be moved to a place where the inspection can be carried out.
Dwelling-place

(3) The enforcement officer may not enter a dwelling-place except with the consent of the occupant or person in charge of the dwelling-place or under the authority of a warrant.

(4) On an ex parte application, a justice, as defined in section 2 of the Criminal Code, may issue a warrant, subject to any conditions specified in it, authorizing an enforcement officer to enter a dwelling-place, if the justice is satisfied by information on oath that

(a) the conditions for entry described in subsection (1) exist in relation to the dwelling-place;

(b) entry to the dwelling-place is necessary for the purposes of the administration of this Act, the regulations or an emergency order; and

(c) entry to the dwelling-place has been refused or there are reasonable grounds for believing that entry will be refused.

(5) On an ex parte application, a justice, as defined in section 2 of the Criminal Code, may issue a warrant, subject to any conditions specified in it, authorizing an enforcement officer to enter a place other than a dwelling-place, if the justice is satisfied by information on oath that

(a) the conditions for entry described in subsection (1) exist in relation to that place;

(b) entry to that place is necessary for the purposes of the administration of this Act, the regulations or an emergency order;

(c) entry to that place has been refused, the enforcement officer is not able to enter without the use of force or the place was abandoned; and

(d) subject to subsection (6), all reasonable attempts were made to notify the owner, operator or person in charge of the place.

(6) The justice may waive the requirement to give notice referred to in subsection (5) if the justice is satisfied that attempts to give the notice would be unsuccessful because the owner, operator or person in charge is absent from the jurisdiction of the justice or that it is not in the public interest to give the notice.

Waiving notice

Authority to issue warrant for inspection of non-dwellings

(3) Dans le cas d’une maison d’habitation, l’agent ne peut procéder à la visite sans l’autorisation du responsable ou de l’occupant que s’il est muni d’un mandat.

(4) Sur demande ex parte, le juge de paix — au sens de l’article 2 du Code criminel — peut décerner un mandat autorisant, sous réserve des conditions éventuellement fixées, l’agent à procéder à la visite d’une maison d’habitation s’il est convaincu, sur la foi d’une dénonciation faite sous serment, que sont réunis les éléments suivants :

a) les circonstances prévues au paragraphe (1) existent;

b) la visite est nécessaire pour l’application de la présente loi, des règlements ou des décrets d’urgence;

c) un refus a été opposé à la visite ou il y a des motifs raisonnables de croire que tel sera le cas.

(5) Sur demande ex parte, le juge de paix — au sens de l’article 2 du Code criminel — peut décerner un mandat autorisant, sous réserve des conditions éventuellement fixées, l’agent à procéder à la visite d’un lieu autre qu’une maison d’habitation, s’il est convaincu, sur la foi d’une dénonciation faite sous serment, que sont réunis les éléments suivants :

a) les circonstances prévues au paragraphe (1) existent;

b) la visite est nécessaire pour l’application de la présente loi, des règlements ou des décrets d’urgence;

c) un refus a été opposé à la visite, l’agent ne peut y procéder sans recourir à la force ou le lieu est abandonné;

d) sous réserve du paragraphe (6), le nécessaire a été fait pour aviser le propriétaire, l’exploitant ou le responsable du lieu.

(6) Le juge de paix peut supprimer l’obligation d’aviser le propriétaire, l’exploitant ou le responsable du lieu s’il est convaincu soit qu’on ne peut les joindre parce qu’ils se trouvent hors de son ressort, soit qu’il n’est pas dans l’intérêt public de le faire.

Authority to issue warrant for inspection of dwelling-place

Mandat de perquisition

Mandat autorisant la visite d’un lieu autre qu’une maison d’habitation

Avis non requis

Waiving notice
Use of force

(7) In executing a warrant issued under subsection (4) or (5), an enforcement officer may not use force unless the use of force has been specifically authorized in the warrant.

Usage de la force

(7) L’agent ne peut recourir à la force dans l’exécution du mandat que si celui-ci en autorise expressément l’usage.

Operation of computer system and copying equipment

(8) In carrying out an inspection of a place under this section, an enforcement officer may

(a) use or cause to be used any computer system at the place to examine any data contained in or available to the computer system;

(b) reproduce any record or cause it to be reproduced from the data in the form of a printout or other intelligible output;

(c) take a printout or other output for examination or copying; and

(d) use or cause to be used any copying equipment at the place to make copies of the record.

Usage d’un système informatique

(8) Au cours de la visite, l’agent peut, pour l’application de la présente loi :

a) utiliser ou faire utiliser tout ordinateur se trouvant dans le lieu visité pour vérifier les données que celui-ci contient ou auxquelles il donne accès;

b) à partir de ces données, reproduire ou faire reproduire un document sous forme d’imprimé ou toute autre forme intelligible;

c) emporter tout imprimé ou sortie de données pour examen ou reproduction;

d) utiliser ou faire utiliser le matériel de reproduction pour faire des copies du document.

Duty of person in possession or control

(9) Every person who is in possession or control of a place being inspected under this section must permit the enforcement officer to do anything referred to in subsection (8).

Obligation du responsable

(9) Le responsable du lieu visité doit faire en sorte que l’agent puisse procéder aux opérations mentionnées au paragraphe (8).

Disposition of Things Seized

87. (1) Subject to subsections (2) to (4), if an enforcement officer seizes a thing under this Act or under a warrant issued under the Criminal Code,

(a) sections 489.1 and 490 of the Criminal Code apply; and

(b) the enforcement officer, or any person that the officer may designate, must retain custody of the thing subject to any order made under section 490 of the Criminal Code.

Garde

87. (1) Sous réserve des paragraphes (2) à (4) :

a) les articles 489.1 et 490 du Code criminel s’appliquent en cas de saisie d’objets effectuée par l’agent de l’autorité en vertu de la présente loi ou d’un mandat délivré au titre du Code criminel;

b) la garde de ces objets incombe, sous réserve d’une ordonnance rendue en application de l’article 490 du Code criminel, à l’agent ou à la personne qu’il désigne.

Forfeiture if ownership not ascertainable

(2) If the lawful ownership of or entitlement to the seized thing cannot be ascertained within 30 days after its seizure, the thing or any proceeds of its disposition are forfeited to Her Majesty in right of Canada, if the thing was seized by an enforcement officer employed in the public service of Canada or by the government of a territory, or to Her Majesty in right of a province, if the thing was seized by an enforcement officer employed by the government of that province.

Confiscation de plein droit

(2) Dans le cas où leur propriétaire légitime — ou la personne qui a légitimement droit à leur possession — ne peut être identifié dans les trente jours suivant la saisie, les objets, ou le produit de leur aliénation, sont confisqués au profit de Sa Majesté du chef du Canada ou d’une province, selon que l’agent saisissant est un fonctionnaire de l’administration publique fédérale ou d’un territoire ou un fonctionnaire de la province en question.
(3) If the seized thing is perishable, the enforcement officer may dispose of it or destroy it, and any proceeds of its disposition must be paid to the lawful owner or person lawfully entitled to possession of the thing, unless proceedings under this Act are commenced within 90 days after its seizure, in which case the proceeds must be retained by the enforcement officer pending the outcome of the proceedings.

(4) An enforcement officer who seizes an individual of a species at risk may, at the time of the seizure, return the individual to the wild if the enforcement officer believes the individual to be alive.

(5) The owner of the seized thing may abandon it to Her Majesty in right of Canada or a province.

88. Any thing that has been forfeited or abandoned under this Act is to be dealt with and disposed of as the competent minister may direct.

89. The lawful owner and any person lawfully entitled to possession of any thing seized, forfeited or abandoned under this Act and who has been convicted of an offence under this Act in relation to that thing, are jointly and severally, or solidarily, liable for all the costs of inspection, seizure, abandonment, forfeiture or disposition incurred by Her Majesty in excess of any proceeds of disposition of the thing that have been forfeited to Her Majesty under this Act.

Aide à donner aux agents de l’autorité

90. L’agent de l’autorité peut, dans l’exercice des fonctions que lui confère la présente loi, pénétrer dans une propriété privée et y circuler sans encourir de poursuites pour violation du droit de propriété.

91. Le propriétaire ou le responsable du lieu visité en vertu de l’article 86, ainsi que quiconque s’y trouve, sont tenus :

(a) de prêter à l’agent de l’autorité toute l’assistance possible dans l’exercice de ses fonctions;
officer to carry out duties and functions under this Act; and

(b) provide the enforcement officer with any information in relation to the administration of this Act, the regulations or an emergency order that the enforcement officer may reasonably require.

92. While an enforcement officer is exercising powers or carrying out duties or functions under this Act, no person shall

(a) knowingly make any false or misleading statement, either orally or in writing, to the enforcement officer; or

(b) otherwise obstruct or hinder the enforcement officer.

Investigations

93. (1) A person who is a resident of Canada and at least 18 years of age may apply to the competent minister for an investigation of whether an alleged offence has been committed or whether anything directed towards its commission has been done.

(2) The application must be in a form approved by the competent minister and must include a solemn affirmation or declaration containing

(a) the name and address of the applicant;

(b) a statement that the applicant is at least 18 years old and a resident of Canada;

(c) a statement of the nature of the alleged offence and the name of each person alleged to be involved;

(d) a summary of the evidence supporting the allegations;

(e) the name and address of each person who might be able to give evidence about the alleged offence, together with a summary of the evidence that the person might give, to the extent that information is available to the applicant;

(f) a description of any document or other material that the applicant believes should be considered in the investigation and, if possible, a copy of the document; and

(b) de donner à l’agent les renseignements qu’il peut valablement exiger quant à l’exécution de la présente loi, des règlements ou des décrets d’urgence.

92. Lorsque l’agent de l’autorité agit dans l’exercice des fonctions que lui confère la présente loi, il est interdit :

a) de lui faire sciemment, oralement ou par écrit, une déclaration fausse ou trompeuse;

b) d’une façon générale, d’entraver son action.

Enquêtes

93. (1) Toute personne âgée d’au moins dix-huit ans et résidant au Canada peut demander au ministre compétent l’ouverture d’une enquête visant à vérifier si une infraction a été perpétrée ou si un acte concourant à la perpétration d’une infraction a été commis.

(2) La demande, établie en la forme approuvée par le ministre compétent, est accompagnée d’une affirmation ou déclaration solennelle qui énonce :

a) les nom et adresse de l’auteur de la demande;

b) le fait que l’auteur de la demande a au moins dix-huit ans et réside au Canada;

c) la nature de l’infraction reprochée et le nom des personnes à qui elle est imputée;

d) les éléments de preuve à l’appui de la demande, sous forme de bref exposé;

e) les nom et adresse de chaque personne qui pourrait être en mesure de témoigner au sujet de l’infraction imputée, ainsi que les éléments de preuve, sous forme de bref exposé, qu’elle pourrait fournir, dans la mesure où ces renseignements sont connus de l’auteur de la demande;

f) une description de tout document ou autre pièce dont, selon l’auteur de la demande, il faudrait tenir compte dans le cadre de l’enquête de même que, si possible, une copie de tel document;
94. (1) The competent minister must acknowledge receipt of the application within 20 days after receiving it and, subject to subsections (2) and (3), investigate all matters that he or she considers necessary to determine the facts relating to the alleged offence.

(2) No investigation is required if the competent minister decides that the application is frivolous or vexatious.

(3) If the competent minister decides not to conduct an investigation, he or she must, within 60 days after the application for investigation is received, give notice of the decision, with reasons, to the applicant.

95. At any stage of the investigation, the competent minister may send any documents or other evidence to the Attorney General for a consideration of whether an offence has been or is about to be committed, and for any action that the Attorney General may wish to take.

96. (1) The competent minister may suspend or conclude the investigation if he or she is of the opinion that the alleged offence does not require further investigation or the investigation does not substantiate the alleged offence or any other offence.

(2) If the investigation is suspended, the competent minister must prepare a written report describing the information obtained during the investigation and stating the reasons for its suspension and the action, if any, that the competent minister has taken or proposes to take and send a copy of the report to the applicant. The competent minister must notify the applicant if the investigation is subsequently resumed.
(3) When the investigation is concluded, the competent minister must prepare a written report describing the information obtained during the investigation and stating the reasons for its conclusion and the action, if any, that the competent minister has taken or proposes to take and send a copy of the report to the applicant and to each person whose conduct was investigated.

(4) A copy of the report sent to a person whose conduct was investigated must not disclose the name or address of the applicant or any other personal information about him or her.

(5) If another investigation in relation to the alleged offence is ongoing apart from the application, the competent minister need not send copies of a report described in subsection (2) or (3) until the other investigation is suspended or concluded.

OFFENCES AND PUNISHMENT

97. (1) Every person who contravenes subsection 32(1) or (2), section 33, subsection 36(1), 58(1), 60(1) or 61(1) or section 91 or 92 or any prescribed provision of a regulation or an emergency order, or who fails to comply with an alternative measures agreement the person has entered into under this Act,

(a) is guilty of an offence punishable on summary conviction and is liable

(i) in the case of a corporation, other than a non-profit corporation, to a fine of not more than $300,000,

(ii) in the case of a non-profit corporation, to a fine of not more than $50,000, and

(iii) in the case of any other person, to a fine of not more than $50,000 or to imprisonment for a term of not more than one year, or to both; or

(b) is guilty of an indictable offence and is liable

(i) in the case of a corporation, other than a non-profit corporation, to a fine of not more than $1,000,000,
(ii) in the case of a non-profit corporation, to a fine of not more than $250,000, and
(iii) in the case of any other person, to a fine of not more than $250,000 or to imprisonment for a term of not more than five years, or to both.

(ii) dans le cas d’une personne morale sans but lucratif, une amende maximale de 250 000 $,
(iii) dans le cas d’une personne physique, une amende maximale de 250 000 $ et un emprisonnement maximal de cinq ans, ou l’une de ces peines.

Prescription of provisions
(2) A regulation or emergency order may prescribe which of its provisions may give rise to an offence.
(2) Le règlement ou le décret d’urgence peut préciser lesquelles de ses dispositions créent une infraction.

Subsequent offence
(3) If a person is convicted of an offence a subsequent time, the amount of the fine for the subsequent offence may, despite subsection (1), be double the amount set out in that subsection.
(3) Le montant des amendes prévues au paragraphe (1) peut être doublé en cas de récidive.

Continuing offence
(4) A person who commits or continues an offence on more than one day is liable to be convicted for a separate offence for each day on which the offence is committed or continued.
(4) Il est compté une infraction distincte pour chacun des jours au cours desquels se commet ou se continue l’infraction.

Fines cumulative
(5) A fine imposed for an offence involving more than one animal, plant or other organism may be calculated in respect of each one as though it had been the subject of a separate information and the fine then imposed is the total of that calculation.
(5) En cas de déclaration de culpabilité pour une infraction visant plusieurs animaux, végétaux ou autres organismes, l’amende peut être calculée pour chacun d’eux, comme s’ils avaient fait l’objet de dénonciations distinctes; l’amende finale infligée est alors la somme totale obtenue.

Additional fine
(6) If a person is convicted of an offence and the court is satisfied that monetary benefits accrued to the person as a result of the commission of the offence, the court may order the person to pay an additional fine in an amount equal to the court’s estimation of the amount of the monetary benefits, which additional fine may exceed the maximum amount of any fine that may otherwise be imposed under this Act.
(6) Le tribunal peut, s’il constate que le contrevenant a tiré des avantages financiers de la perpétration de l’infraction, lui infliger, en sus de l’amende maximale prévue par la présente loi, une amende supplémentaire correspondant à son évaluation de ces avantages.

Meaning of “non-profit corporation”
(7) For the purposes of subparagraphs (1)(a)(i), (ii) and (iii) and (b)(i), (ii) and (iii), “non-profit corporation” means a corporation, no part of the income of which is payable to, or is otherwise available for, the personal benefit of any proprietor, member or shareholder of the corporation.
(7) Pour l’application des sous-alinéas (1)a)(i), (ii) et (iii) et b)(i), (ii) et (iii), « personne morale sans but lucratif » s’entend d’une personne morale dont aucune partie du revenu n’est payable à un propriétaire, membre ou actionnaire de celle-ci, ou ne peut par ailleurs servir au profit personnel de ceux-ci.
98. If a corporation commits an offence, any officer, director, agent or mandatory of the corporation who directed, authorized, assented to, or acquiesced or participated in, the commission of the offence is a party to and guilty of the offence and is liable on conviction to the punishment provided for the offence, whether or not the corporation has been prosecuted or convicted.

99. In any prosecution for an offence, the accused may be convicted of the offence if it is established that it was committed by an employee, agent or mandatory of the accused, whether or not the employee, agent or mandatory has been prosecuted for the offence.

100. Due diligence is a defence in a prosecution for an offence.

101. A prosecution for an offence may be instituted, heard and determined in the place where the offence was committed, the subject-matter of the prosecution arose, the accused was apprehended or the accused happens to be or is carrying on business.

102. A court that imposes a sentence shall take into account, in addition to any other principles that it is required to consider, the following factors:

(a) the harm or risk of harm caused by the commission of the offence;

(b) whether the offender was found to have committed the offence intentionally, recklessly or inadvertently;

(c) whether the offender was found by the court to have been negligent or incompetent or to have shown a lack of concern with respect to the commission of the offence;

(d) any property, benefit or advantage received or receivable by the offender to which, but for the commission of the offence, the offender would not have been entitled;

(e) any evidence from which the court may reasonably conclude that the offender has a history of non-compliance with legislation designed to protect wildlife species; and

98. En cas de perpétation d’une infraction par une personne morale, ceux de ses dirigeants, administrateurs, agents ou mandataires qui l’ont ordonnée ou autorisée, ou qui y ont consenti ou participé, sont considérés comme des coauteurs de l’infraction et encouruent, sur déclaration de culpabilité, la peine prévue, que la personne morale ait été ou non poursuivie ou déclarée coupable.

99. Dans les poursuites pour infraction, il suffit, pour établir la culpabilité de l’accusé, de prouver que l’infraction a été commise par son agent ou mandataire, que celui-ci ait ou non été poursuivi.

100. La prise de précautions voulues peut être opposée en défense à toute accusation portée au titre de la présente loi.

101. La poursuite d’une infraction peut être intentée, entendue et jugée soit au lieu de la perpétration, soit au lieu où a pris naissance l’objet de la poursuite, soit encore au lieu où l’accusé est appréhendé, se trouve ou exerce ses activités.

102. Le tribunal détermine la peine à infliger compte tenu — en plus des principes qu’il doit prendre en considération — des facteurs suivants :

a) le dommage ou le risque de dommage que cause l’infraction;

b) le caractère intentionnel, imprudent ou fortuit de l’infraction;

c) la conclusion du tribunal selon laquelle le contrevenant a fait preuve d’incompétence, de négligence ou d’insouciance;

d) tout avantage procuré par la perpétration de l’infraction;

e) tout élément de preuve l’incitant raisonnablement à croire que le contrevenant a, dans le passé, accompli des actes contraires aux lois portant protection des espèces sauvages;

f) l’examen de toutes les sanctions applicables qui sont justifiées dans les circonstances, plus particulièrement en ce qui concerne les délinquants autochtones.
(f) all available sanctions that are reason- able in the circumstances, with particular attention to the circumstances of aboriginal offenders.

103. (1) If a person is convicted of an offence, the convicting court may, in addition to any punishment imposed, order that any seized thing by means of or in relation to which the offence was committed, or any proceeds of its disposition, be forfeited to Her Majesty.

103. (1) Sur déclaration de culpabilité du contrevenant, le tribunal peut prononcer, en sus de toute autre peine, la confiscation au profit de Sa Majesté des objets saisis ou du produit de leur aliénation.

(2) If the convicting court does not order the forfeiture, the seized thing, or the proceeds of its disposition, must be returned to its lawful owner or the person lawfully entitled to it.

(2) S’il ne prononce pas la confiscation, les objets saisis, ou le produit de leur aliénation, sont restitués au propriétaire légitime ou à la personne qui a légitimement droit à leur possession.

104. If a fine is imposed on a person convicted of an offence, any seized thing, or any proceeds of its disposition, may be retained until the fine is paid or the thing may be sold in satisfaction of the fine and the proceeds applied, in whole or in part, in payment of the fine.

104. En cas de déclaration de culpabilité, les objets saisis, ou le produit de leur aliénation, peuvent être retenus jusqu’au paiement de l’amende; ces objets peuvent être vendus, s’ils ne l’ont pas déjà été, et le produit de leur aliénation peut être affecté en tout ou en partie au paiement de l’amende.

105. If a person is convicted of an offence, the court may, in addition to any punishment imposed and having regard to the nature of the offence and the circumstances surrounding its commission, make an order having any or all of the following effects:

(a) prohibiting the person from doing any act or engaging in any activity that could, in the opinion of the court, result in the continuation or repetition of the offence;
(b) directing the person to take any action that the court considers appropriate to remedy or avoid any harm to any wildlife species that resulted or may result from the commission of the offence;
(c) directing the person to have an environmental audit conducted by a person of a class and at the times specified by the court and directing the person to remedy any deficiencies revealed during the audit;
(d) directing the person to publish, in any manner that the court considers appropriate, the facts relating to the commission of the offence;

105. En sus de toute autre peine et compte tenu de la nature de l’infraction ainsi que des circonstances de sa perpétration, le tribunal peut rendre une ordonnance imposant au contrevenant tout ou partie des obligations suivantes :

a) s’abstenir de tout acte ou activité risquant d’entraîner, selon le tribunal, la continuation de l’infraction ou la récidive;
(b) prendre les mesures que le tribunal juge indiquées pour réparer ou éviter toute atteinte aux espèces sauvages résultant ou pouvant résulter de la perpétration de l’infraction;
c) faire effectuer, à des moments déterminés, une vérification environnementale par une personne appartenant à la catégorie de personnes désignée, et prendre les mesures appropriées pour remédier aux défauts constatés;
d) publier, de la façon que le tribunal juge indiquée, les faits liés à la perpétration de l’infraction;
(e) directing the person to perform community service in accordance with any conditions that the court considers reasonable;

(f) directing the person to submit to the competent minister, on application to the court by the competent minister within three years after the conviction, any information about the activities of the person that the court considers appropriate;

(g) directing the person to pay a competent minister or the government of a province or a territory an amount for all or any of the cost of remedial or preventive action taken, or to be taken, by or on behalf of the competent minister or that government as a result of the commission of the offence;

(h) directing the person to pay, in the manner prescribed by the court, an amount for the purpose of conducting research into the protection of the wildlife species in respect of which the offence was committed;

(i) directing the person to pay, in the manner prescribed by the court, an amount to an educational institution for scholarships for students enrolled in environmental studies;

(j) directing the person to post a bond or pay to the court an amount that the court considers appropriate for the purpose of ensuring compliance with any prohibition, direction or requirement under this section; and

(k) requiring the person to comply with any other conditions that the court considers appropriate for securing the person’s good conduct and for preventing the person from repeating the offence or committing other offences.

106. (1) If a person is convicted of an offence and the court suspends the passing of sentence under paragraph 731(1)(a) of the Criminal Code, the court may, in addition to any probation order made under that Act, make an order containing one or more of the prohibitions, directions or requirements mentioned in section 105.

106. (1) Lorsque, en vertu de l’alinéa 731(1)a) du Code criminel, il sursoit au prononcé de la peine, le tribunal, en plus de toute ordonnance de probation rendue au titre de cette loi, peut, par ordonnance, enjoindre au contrevenant de se conformer à l’une ou plusieurs des obligations visées à l’article 105.
(2) If the person does not comply with the order or is convicted of another offence, within three years after the order is made, the court may, on the application of the prosecution, impose any sentence that could have been imposed if the passing of sentence had not been suspended.

107. (1) Proceedings by way of summary conviction in respect of an offence may be commenced at any time within, but not later than, two years after the day on which the subject-matter of the proceedings became known to the competent minister.

(2) A document appearing to have been issued by the competent minister, certifying the day on which the subject-matter of any proceedings became known to the competent minister, is admissible in evidence without proof of the signature or official character of the person appearing to have signed the document and is proof of the matter asserted in it.

(3) A reference to the competent minister in this section includes a provincial or territorial minister if the competent minister has delegated responsibility for the enforcement of this Act, the regulations or an emergency order in the province or territory to the provincial or territorial minister and the offence is alleged to have been committed in the province or territory.

108. (1) Alternative measures may be used to deal with a person who is alleged to have committed an offence, but only if it is not inconsistent with the purposes of this Act to do so and the following conditions are met:

(a) the measures are part of a program of alternative measures authorized by the Attorney General, after consultation with the competent minister;
(b) an information has been laid in respect of the offence;
(c) the Attorney General, after consultation with the competent minister, is satisfied that the alternative measures would be appropriate, having regard to the nature of the offence.

2) Sur demande de la poursuite, le tribunal peut, lorsque la personne visée par l’ordonnance ne se conforme pas aux modalités de celle-ci ou est déclarée coupable d’une autre infraction dans les trois ans qui suivent la date de l’ordonnance, prononcer la peine qui aurait pu lui être infligée s’il n’y avait pas eu sursis.

107. (1) Les poursuites visant une infraction punissable sur déclaration de culpabilité par procédure sommaire se prescrivent par deux ans à compter de la date où les éléments constitutifs de l’infraction sont venus à la connaissance du ministre compétent.

(2) Le document paraissant délivré par le ministre compétent et attestant la date où les éléments sont venus à sa connaissance est admissible en preuve et fait foi de son contenu sans qu’il soit nécessaire de prouver l’authenticité de la signature qui y est apposée ou la qualité officielle du signataire.

(3) Au présent article, toute mention du ministre compétent vise également le ministre provincial ou le ministre territorial si le ministre compétent lui a délégué ses attributions relativement aux mesures d’application de la présente loi, des règlements ou des décrets d’urgence dans la province ou le territoire où l’infraction aurait été commise.

108. (1) Le recours à des mesures de rechange à l’égard d’une personne accusée d’une infraction n’est possible, compte tenu de l’objet de la présente loi, que si les conditions suivantes sont réunies :

a) les mesures font partie d’un programme autorisé par le procureur général après consultation du ministre compétent;

b) une dénonciation a été déposée à l’égard de l’infraction;

c) le procureur général, après consultation du ministre compétent, est convaincu que les mesures de rechange sont indiquées, compte tenu de la nature de l’infraction, des circonstances de sa perpétration et des éléments suivants :
offence, the circumstances surrounding its commission and the following factors, namely,

(i) the protection of species at risk,
(ii) the person’s history of compliance with this Act,
(iii) whether the offence is a repeated occurrence,
(iv) any allegation that information is being or was concealed or other attempts to subvert the purposes and requirements of this Act are being or have been made, and
(v) whether any remedial or preventive action has been taken by or on behalf of the person in relation to the offence;

(d) the person applies, in accordance with regulations made under paragraph 119(a), to participate in the alternative measures after having been informed of them;

(e) the person and the Attorney General have concluded an agreement respecting the alternative measures within 180 days after the person has, with respect to the offence, been served with a summons, been issued an appearance notice or entered into a promise to appear or a recognizance;

(f) before consenting to participate in the alternative measures, the person has been advised of the right to be represented by counsel;

(g) the person accepts responsibility for the act or omission that forms the basis of the offence;

(h) there is, in the opinion of the Attorney General, sufficient evidence to proceed with the prosecution of the offence; and

(i) the prosecution of the offence is not barred at law.

(2) Alternative measures may not be used to deal with a person who

(a) denies participation or involvement in the commission of the alleged offence; or

(b) expresses the wish to have any charge against them dealt with by the court.

(2) Il ne peut y avoir de mesures de rechange lorsque le suspect :

a) nie toute participation à la perpétration de l’infraction reprochée;

b) manifeste le désir de voir déférer au tribunal toute accusation portée contre lui.
Admissions not admissible in evidence

(3) No admission, confession or statement accepting responsibility for a given act or omission made by a person as a condition of being dealt with by alternative measures is admissible in evidence against the person in any civil or criminal proceedings.

Dismissal of charge

(4) A court must dismiss a charge laid against a person in respect of an offence if alternative measures have been used to deal with the person in respect of the alleged offence and

(a) the court is satisfied on a balance of probabilities that the person has totally complied with the agreement; or

(b) the court is satisfied on a balance of probabilities that the person has partially complied with the agreement and, in the opinion of the court, the prosecution of the charge would be unfair, having regard to the circumstances and the person’s performance with respect to the agreement.

No bar to proceedings

(5) The use of alternative measures in respect of a person who is alleged to have committed an offence is not a bar to any proceedings against the person under this Act.

Laying of information, etc.

(6) This section does not prevent any person from laying an information, obtaining the issue or confirmation of any process, or proceeding with the prosecution of any offence, in accordance with law.

Terms and conditions in agreement

109. (1) An alternative measures agreement may contain any terms and conditions, including

(a) terms and conditions having any or all of the effects set out in section 105 or any other terms and conditions having any of the effects prescribed by regulations that the Attorney General, after consultation with the competent minister, considers appropriate; and

(b) terms and conditions relating to the costs associated with ensuring compliance with the agreement.

(2) Any governmental organization may supervise compliance with the agreement.

Supervision of compliance

(2) Tout organisme gouvernemental peut contrôler le respect de l’accord.
110. An alternative measures agreement comes into effect on the day on which it is concluded or on any later day that is specified in the agreement and continues in effect for a period of not more than three years.

111. (1) The Attorney General must consult the competent minister before concluding an alternative measures agreement and, subject to subsection (5), must have the agreement filed with the court in which the information was laid within 30 days after the agreement is concluded. The agreement is to be filed as part of the court record of the proceedings to which the public has access.

(2) A report relating to the administration of, and compliance with, the agreement must be filed with the same court by the Attorney General immediately after all the terms and conditions of the agreement have been complied with or the charges in respect of which the agreement was entered into have been dismissed.

(3) Subject to subsection (4), if any of the following information is to be part of the agreement or the report, it must be set out in a schedule to the agreement or to the report:

(a) trade secrets of any person;
(b) financial, commercial, scientific or technical information that is confidential information and is treated consistently in a confidential manner by any person;
(c) information the disclosure of which could reasonably be expected to result in material financial loss or gain to any person, or could reasonably be expected to prejudice the competitive position of any person; or
(d) information the disclosure of which could reasonably be expected to interfere with contractual or other negotiations of any person.

(4) The parties to the agreement must agree on which information that is to be part of the agreement or the report is information that meets the requirements of paragraphs (3)(a) to (d).

110. L’accord entre en vigueur à la date de sa conclusion ou à la date ultérieure qui y est fixée et demeure en vigueur pendant la période — d’au plus trois ans — qui y est fixée.

111. (1) Le procureur général consulte le ministre compétent avant de conclure un accord et, sous réserve du paragraphe (5) et dans les trente jours suivant la conclusion de l’accord, fait déposer celui-ci auprès du tribunal saisi de la dénonciation, comme partie du dossier judiciaire de la procédure auquel le public a accès.

(2) Un rapport relatif à l’application et au respect de l’accord est déposé auprès du même tribunal par le procureur général dès que les conditions dont il est assorti sont exécutées ou que les accusations ayant occasionné sa conclusion sont rejetées.

(3) Sous réserve du paragraphe (4), les renseignements suivants sont énoncés en annexe de l’accord ou du rapport :

a) les secrets industriels de toute personne;

b) les renseignements financiers, commerciaux, scientifiques ou techniques qui sont de nature confidentielle et qui sont traités comme tels de façon constante par toute personne;

c) les renseignements dont la communication risquerait vraisemblablement de causer des pertes ou de faire réaliser des profits financiers appréciables à toute personne ou de nuire à sa compétitivité;

(d) les renseignements dont la communication risquerait vraisemblablement d’entraver des négociations menées par toute personne en vue de la conclusion de contrats ou à d’autres fins.

(4) Les parties à l’accord s’entendent sur la question de savoir quels renseignements correspondent aux catégories précisées par les alinéas (3)a à d).
How schedule is to be kept secret

(5) The schedule is confidential and must not be filed with the court.

Prohibition of disclosure

(6) The competent minister must not disclose any information set out in a schedule to the agreement or to the report, except as authorized by section 117 or the Access to Information Act.

Stay of proceedings

112. (1) Despite section 579 of the Criminal Code, the Attorney General must, on filing an alternative measures agreement, stay the proceedings in respect of the alleged offence, or apply to the court for an adjournment of the proceedings, for a period of not more than one year after the expiry of the agreement.

(2) Proceedings stayed under subsection (1) may be recommenced without laying a new information or preferring a new indictment, as the case may be, by the Attorney General giving notice of the recommencement to the clerk of the court in which the stay of the proceedings was entered. If no such notice is given within one year after the expiry of the agreement, the proceedings are deemed to have never been commenced.

Recommencement of proceedings

Application to vary agreement

113. (1) Subject to subsections 111(2) and (3), the Attorney General may vary the terms and conditions of an alternative measures agreement on application by the person bound by the agreement and after consultation with the competent minister. The Attorney General must be of the opinion that the variation is desirable because of a material change in the circumstances since the agreement was concluded or last varied. The variation may include

(a) decreasing the period for which the agreement is to remain in force; and

(b) relieving the person of compliance with any condition that is specified in the agreement, either absolutely or partially or for any period that the Attorney General considers desirable.

(2) An agreement that has been varied must be filed in accordance with section 111 with the court in which the original agreement was filed.

Filing varied agreement

113. (1) Sur demande de la personne liée par un accord, le procureur général peut, sous réserve des paragraphes 111(2) et (3) et après consultation du ministre compétent, modifier les conditions de l’accord dans le sens qui lui paraît justifié par tout changement important en l’espèce depuis la conclusion ou la dernière modification de l’accord :

a) soit en raccourcissant sa période de validité;

b) soit en dégageant la personne, absolument, partiellement ou pour une durée limitée, de l’obligation de se conformer à telle de ses conditions.

(2) L’accord modifié est déposé en conformation avec l’article 111 auprès du tribunal devant lequel il a initialement été déposé.
114. Sections 115 to 117 apply only in respect of persons who have entered into an alternative measures agreement, regardless of the degree of their compliance with the terms and conditions of the agreement.

115. Where it is necessary in the conduct of an investigation of an offence, a peace officer or enforcement officer may disclose to a department or agency of a government in Canada any information in a record relating to an offence alleged to have been committed by a person, including the original or a copy of any fingerprints or photographs of the person.

116. (1) The competent minister, any enforcement officer and any department or agency of a government in Canada with which the competent minister has entered into an agreement under section 10 may keep records and use information obtained as a result of the use of alternative measures to deal with a person

(a) for the purposes of an inspection under this Act or an investigation of an offence alleged to have been committed by a person;

(b) in proceedings against a person under this Act;

(c) for the purpose of the administration of alternative measures programs; or

(d) otherwise for the administration of this Act.

(2) Any person or organization may keep records of information obtained by them as a result of supervising compliance with an alternative measures agreement and use the information for the purpose of supervising such compliance.

117. (1) A record or information referred to in section 115 or 116 may be made available to

(a) any judge or court for any purpose with respect to proceedings relating to offences under this or any other Act committed or alleged to have been committed by the person to whom the record relates;
(b) any peace officer, enforcement officer or prosecutor

(i) for the purpose of investigating an offence under this Act or any other Act that the person is suspected of having committed, or in respect of which the person has been arrested or charged, or

(ii) for any purpose related to the administration of the case to which the record relates;

(c) any member of a department or agency of a government in Canada, or any agent of such a government, that is

(i) engaged in the administration of alternative measures in respect of the person, or

(ii) preparing a report in respect of the person under this Act; or

(d) any other person who is deemed, or any person within a class of persons that is deemed, by a judge of a court to have a valid interest in the record, to the extent directed by the judge, if

(i) the judge is satisfied that the disclosure is desirable in the public interest for research or statistical purposes or in the interest of the proper administration of justice, and

(ii) the person gives a written undertaking not to subsequently disclose the information except in accordance with subsection (2).

(2) If a record is made available for inspection to any person under paragraph (1)(d) for research or statistical purposes, that person may subsequently disclose information contained in the record, but may not disclose the information in any form that would reasonably be expected to identify the person to whom it relates.

(3) A person to whom a record is authorized to be made available under this section may be given any information contained in the record and may be given a copy of any part of the record.

Subsequent disclosure for research or statistical purposes

(2) Quiconque ayant, aux termes de l’alinéa (1)d), accès à un dossier peut postérieurement communiquer l’information qui y est contenue, mais seulement d’une manière qui, normalement, ne permet pas d’identifier la personne en cause.

Révélation postérieure

(3) Les personnes qui peuvent, en vertu du présent article, avoir accès à un dossier ont le droit d’obtenir tout extrait de celui-ci ou toute l’information s’y trouvant.

Communication d’information et de copies
Evidence
(4) This section does not authorize the introduction into evidence of any part of a record that would not otherwise be admissible in evidence.

Exception for public access to court record
(5) For greater certainty, this section does not apply in respect of an alternative measures agreement, a varied alternative measures agreement or a report that is filed with the court in accordance with section 111.

Information exchange agreements
118. The competent minister may enter into an agreement with a department or agency of a government in Canada respecting the exchange of information for the purpose of administering alternative measures or preparing a report in respect of a person’s compliance with an alternative measures agreement.

Regulations
119. The competent minister may make regulations respecting the alternative measures that may be used for the purposes of this Act including regulations respecting

(a) the form and manner in which and the period within which an application to participate in the alternative measures is to be made, and the information that must be contained in or accompany the application;

(b) the manner of preparing and filing reports relating to the administration of and compliance with alternative measures agreements;

(c) the types of costs, and the manner of paying the costs, associated with ensuring compliance with alternative measures agreements; and

(d) the terms and conditions that may be included in an alternative measures agreement and the effects of those terms and conditions.

Public registry
120. The Minister must establish a public registry for the purpose of facilitating access to documents relating to matters under this Act.

Regulations
121. The Governor in Council may, on the recommendation of the Minister after consultation with the Minister of Canadian Heritage and the Minister of Fisheries and Oceans,
make regulations respecting the form of the public registry, the keeping of the public registry and access to it.

122. Despite any other Act of Parliament, no civil or criminal proceedings may be brought against Her Majesty in right of Canada, the Minister, the Minister of Canadian Heritage, the Minister of Fisheries and Oceans or any person acting on behalf of or under the direction of any of them for the full or partial disclosure in good faith of any notice or other document through the public registry or any consequences of its disclosure.

123. The public registry shall contain every document required to be included in the public registry by this Act and the following documents, or a copy of the following documents:

(a) regulations and orders made under this Act;
(b) agreements entered into under section 10;
(c) COSEWIC’s criteria for the classification of wildlife species;
(d) status reports on wildlife species that COSEWIC has had prepared or has received with an application;
(e) the List of Wildlife Species at Risk;
(f) codes of practice, national standards or guidelines established under this Act;
(g) agreements and reports filed under section 111 or subsection 113(2) or notices that those agreements or reports have been filed in court and are available to the public; and
(h) every report made under sections 126 and 128.

124. The Minister, on the advice of COSEWIC, may restrict the release of any information required to be included in the public registry if that information relates to the location of a wildlife species or its habitat and restricting its release would be in the best interests of the species.

122. Malgré toute autre loi fédérale, Sa Majesté du chef du Canada de même que le ministre, le ministre du Patrimoine canadien et le ministre des Pêches et des Océans ainsi que les personnes qui agissent en leur nom ou sous leurs ordres bénéficient de l’immunité en matière civile ou pénale pour la communication totale ou partielle d’un avis ou autre document faite de bonne foi par la voie du registre ainsi que pour les conséquences qui en découlent.

123. Le registre comporte les documents qui doivent y être mis en application de la présente loi et une copie des documents suivants :

a) les règlements, décrets et arrêtés pris en vertu de la présente loi;
b) les accords conclus en application de l’article 10;
c) les critères établis par le COSEPAC pour la classification des espèces sauvages;
d) les rapports de situation relatifs aux espèces sauvages que le COSEPAC a soit fait rédiger, soit reçu à l’appui d’une demande;
e) la Liste des espèces en péril;
f) les codes de pratique et les normes ou directives nationales élaborés sous le régime de la présente loi;
g) soit les accords — dans leurs versions successives — et les rapports visés à l’article 111 ou au paragraphe 113(2), soit un avis portant que ces accords ou rapports ont été déposés auprès du tribunal et sont donc accessibles au public;
h) tout rapport établi aux termes des articles 126 et 128.

124. Sur l’avis du COSEPAC, le ministre peut limiter la communication de tout renseignement mis dans le registre si ce renseignement concerne l’aire où se trouve une espèce sauvage ou son habitat et si la limitation de sa divulgation est à l’avantage de cette espèce.
Regulations

125. (1) The Governor in Council may, on the recommendation of the Minister and the President of the Treasury Board, after the Minister has consulted the Minister of Canadian Heritage and the Minister of Fisheries and Oceans, make regulations

(a) prescribing the fees and charges, or the manner of determining them, that may be charged for agreements or permits under section 73, for amendments to or for the renewal of such agreements or permits, for copies of documents in the public registry and for the inclusion of a document in the public registry;

(b) exempting any person or class of persons from the requirement to pay any of those fees or charges; and

(c) generally, in respect of any condition or any other matter in relation to the payment of those fees or charges.

(2) A fee or charge required by the regulations to be paid constitutes a debt due to Her Majesty in right of Canada and may be recovered in any court of competent jurisdiction.

Recovery of fees

125. (1) Sur recommandation du ministre et du président du Conseil du Trésor, faite après consultation par le ministre du ministre du Patrimoine canadien et du ministre des Pêches et des Océans, le gouverneur en conseil peut prendre des règlements :

a) prévoyant les frais et droits, ou leur mode de calcul, qui peuvent être imposés pour les accords et les permis visés à l’article 73, notamment pour leur renouvellement ou modification, de même que pour la mise de tout document dans le registre ou l’obtention d’une copie d’un document qui s’y trouve;

b) exemptant certaines personnes ou catégories de personnes de l’obligation de paiement;

c) concernant toute condition ou autre question se rapportant au paiement des frais ou des droits.

(2) Les frais et droits réglementaires constituent des créances de Sa Majesté du chef du Canada dont le recouvrement peut être poursuivi à ce titre devant tout tribunal compétent.

Reports and review of act

126. The Minister must annually prepare a report on the administration of this Act during the preceding calendar year and must have a copy of the report tabled in each House of Parliament within the first 15 days that it is sitting after the completion of the report. The report must include a summary addressing the following matters:

(a) COSEWIC’s assessments and the Minister’s response to each of them;

(b) the preparation and implementation of recovery strategies, action plans and management plans;

(c) all agreements made under sections 10 to 13;

(d) all agreements entered into and permits issued under section 73 and all agreements and permits amended under section 75 or exempted under section 76;

126. Le ministre établit chaque année un rapport sur l’application de la présente loi au cours de la précédente année civile. Il le fait déposer devant chaque chambre du Parlement dans les quinze premiers jours de séance de celle-ci suivant son achèvement. Ce rapport comporte un sommaire relativement aux objets suivants :

a) les évaluations faites par le COSEPAC et la réponse du ministre à chacune de ces évaluations;

b) l’élaboration et la mise en œuvre des programmes de rétablissement, des plans d’action et des plans de gestion;

c) les accords conclus en vertu des articles 10 à 13;

d) les accords conclus et les permis délivrés en vertu de l’article 73, modifiés en vertu de l’article 75, et les exonérations prévues à l’article 76;
(e) enforcement and compliance actions taken, including the response to any requests for investigation;

(f) regulations and emergency orders made under this Act; and

(g) any other matters that the Minister considers relevant.

127. (1) The Minister must, at least once every two years, convene a round table of persons interested in matters respecting the protection of wildlife species at risk in Canada to advise the Minister on those matters.

(2) Any written recommendations from the round table must be included in the public registry.

(3) The Minister must respond to any written recommendations from the round table within 180 days after receiving them and a copy of the Minister’s response must be included in the public registry.

128. Five years after this section comes into force and at the end of each subsequent period of five years, the Minister must prepare a general report on the status of wildlife species. The Minister must have the report tabled in each House of Parliament within the first 15 days that it is sitting after the completion of the report.

129. Five years after this section comes into force, a committee of the House of Commons, of the Senate or of both Houses of Parliament is to be designated or established for the purpose of reviewing this Act.

ASSESSMENT OF WILDLIFE SPECIES MENTIONED IN THE SCHEDULES

130. (1) COSEWIC must assess the status of each wildlife species set out in Schedule 2 or 3, and, as part of the assessment, identify existing and potential threats to the species and

(a) classify the species as extinct, extirpated, endangered, threatened or of special concern;

(b) indicate that COSEWIC does not have sufficient information to classify the species; or

e) les activités d’application et d’observation de la présente loi, y compris la suite donnée aux demandes d’enquête;

f) les règlements, décrets et arrêtés d’urgence pris en vertu de la présente loi;

g) tout autre sujet que le ministre juge pertinent.

127. (1) Le ministre organise au moins tous les deux ans une table ronde réunissant des personnes concernées par les questions de protection des espèces sauvages en péril au Canada et chargée de l’aviser sur ces questions.

(2) Les recommandations faites par écrit par la table ronde et présentées au ministre sont mises dans le registre.

(3) Le ministre répond aux recommandations dans les cent quatre-vingts jours suivant leur réception. Une copie de sa réponse est mise dans le registre.

129. Cinq ans après l’entrée en vigueur du présent article, le comité de la Chambre des communes, du Sénat ou des deux chambres désigné ou constitué à cette fin entreprend l’examen de l’application de la présente loi.

ÉVALUATION DES ESPÈCES SAUVAGES FIGURANT AUX ANNEXES

130. (1) Le COSEPAC évalue la situation de chaque espèce sauvage visée aux annexes 2 ou 3 ainsi que, dans le cadre de l’évaluation, signale les menaces réelles ou potentielles à son égard et établit, selon le cas :

(a) que l’espèce est disparue, disparue du pays, en voie de disparition, menacée ou préoccupante;

(b) qu’il ne dispose pas de l’information voulue pour la classifier;
(c) indicate that the species is not currently at risk.

(2) In the case of a species set out in Schedule 2, the assessment must be completed within 30 days after section 14 comes into force.

(3) If an assessment of a wildlife species set out in Schedule 2 is not completed within the required time or, if there has been an extension, within the extended time, COSEWIC is deemed to have classified the species as indicated in Schedule 2.

(4) In the case of a species set out in Schedule 3, the assessment must be completed within one year after the competent minister requests the assessment. If there is more than one competent minister with respect to the species, they must make the request jointly.

(5) The Governor in Council may, on the recommendation of the Minister after consultation with the competent minister or ministers, by order, extend the time provided for the assessment of any species set out in Schedule 2 or 3. The Minister must include a statement in the public registry setting out the reasons for the extension.

(6) Subsections 15(2) and (3) and 21(1) and section 25 apply with respect to assessments under subsection (1).

(7) In making its assessment of a wildlife species, COSEWIC may take into account and rely on any report on the species that was prepared in the two-year period before this Act receives royal assent.

131. Section 27 applies in respect of a wildlife species referred to in section 130 that COSEWIC classifies as extinct, extirpated, endangered, threatened or of special concern or that is deemed to have been so classified.

132. If a wildlife species is added to the List by the Governor in Council as the result of an assessment under section 130, the recovery strategy for the species must be prepared within three years after the listing in the case of an endangered species, and within four years in the case of a threatened species.
133. If a wildlife species is added to the List by the Governor in Council as a species of special concern as the result of an assessment under section 130, the management plan for the species must be prepared within five years after the listing.

133. Si l’inscription d’une espèce sauvage comme espèce préoccupante par le gouverneur en conseil découle d’une évaluation faite par le COSEPAC en application de l’article 130, le plan de gestion est élaboré dans les cinq ans suivant l’inscription.

RELATED AMENDMENTS

Canada Wildlife Act

134. Section 4 of the Canada Wildlife Act is amended by adding the following after subsection (2):

(3) If public lands under the administration of a minister of the Crown other than the Minister are, in the opinion of the Minister and the other minister, required for wildlife research, conservation or interpretation, the Governor in Council may, on the recommendation of both ministers, by order, authorize the Minister to exercise, with the concurrence of the other minister, the powers referred to in subsection (2) in relation to those lands or any portion of them specified in the order.

134. L’article 4 de la Loi sur les espèces sauvages du Canada est modifié par adjonction, après le paragraphe (2), de ce qui suit :

(3) Si des terres domaniales dont la gestion est confiée à un ministre fédéral autre que le ministre sont, de l’avis des deux ministres, nécessaires aux activités de recherche, de conservation ou d’information concernant les espèces sauvages, le gouverneur en conseil peut, sur leur recommandation, prendre un décret autorisant le ministre à exercer, avec l’assentiment de l’autre ministre, les pouvoirs prévus au paragraphe (2) à l’égard de tout ou partie des terres spécifiées.

135. The Act is amended by adding the following after section 4.1:

4.2 (1) The Minister may delegate to any minister of the Crown in right of Canada any power conferred on the Minister under this Act. The other minister may then exercise the power subject to any terms and conditions that the Minister specifies.

(2) The other minister may delegate any power delegated under subsection (1) to any person employed in any department for which that other minister is responsible.

135. La même loi est modifiée par adjonction, après l’article 4.1, de ce qui suit :

4.2 (1) Le ministre peut déléguer à tout autre ministre fédéral tel de ses pouvoirs prévus par la présente loi. Le mandat est à exécuter en conformité avec la délégation.

(2) Le ministre délégataire au titre du paragraphe (1) peut déléguer les pouvoirs qui lui ont été délégués à une personne employée dans un ministère qui relève de lui.

136. (1) Paragraph 12(a) of the Act is replaced by the following:

(a) prohibiting entry, generally or for any specified period or purpose, of any person on lands under the administration of the Minister, or on public lands referred to in an order made under subsection 4(3), or on any part of those lands;

(2) Paragraphs 12(i) and (j) of the Act are replaced by the following:

136. (1) L’alinéa 12a) de la même loi est remplacé par ce qui suit :

a) interdire, de manière générale ou pour une période ou un objet déterminés, l’accès à la totalité ou à une partie des terres dont la gestion est confiée au ministre ou des terres domaniales visées par un décret pris au titre du paragraphe 4(3);

(2) Les alinéas 12i) et j) de la même loi sont remplacés par ce qui suit :
(i) prescribing measures for the conservation of wildlife

(i) on public lands the administration of which has been assigned to the Minister pursuant to any federal law,

(ii) on public lands referred to in an order made under subsection 4(3), or

(iii) in any protected marine areas established pursuant to subsection 4.1(1); and

(j) respecting the establishment of facilities or the construction, maintenance and operation of works for wildlife research, conservation and interpretation

(i) on public lands the administration of which has been assigned to the Minister pursuant to any federal law,

(ii) on public lands referred to in an order made under subsection 4(3), or

(iii) in any protected marine areas established pursuant to subsection 4.1(1).

1992, c. 37

Canadian Environmental Assessment Act

137. The definition “environmental effect” in subsection 2(1) of the Canadian Environmental Assessment Act is replaced by the following:

“environmental effect” means, in respect of a project,

(a) any change that the project may cause in the environment, including any change it may cause to a listed wildlife species, its critical habitat or the residences of individuals of that species, as those terms are defined in subsection 2(1) of the Species at Risk Act,

(b) any effect of any change referred to in paragraph (a) on

(i) health and socio-economic conditions,

(ii) physical and cultural heritage,

(iii) the current use of lands and resources for traditional purposes by aboriginal persons, or

1992, ch. 37

Loi canadienne sur l’évaluation environnementale

137. La définition de « effets environnementaux », au paragraphe 2(1) de la Loi canadienne sur l’évaluation environnementale, est remplacée par ce qui suit :

« effets environnementaux » Que ce soit au Canada ou à l’étranger, les changements que la réalisation d’un projet risque de causer à l’environnement — notamment à une espèce sauvage inscrite, à son habitat essentiel ou à la résidence des individus de cette espèce, au sens du paragraphe 2(1) de la Loi sur les espèces en péril — les répercussions de ces changements soient en matière sanitaire et socioéconomique, soit sur l’usage courant de terres et de ressources à des fins traditionnelles par les autochtones, soit sur une construction, un emplacement ou une chose d’importance en matière historique, archéologique, paléontologique ou architecturale, ainsi que les changements susceptibles d’être apportés au projet du fait de l’environnement.
(iv) any structure, site or thing that is
of historical, archaeological, paleontological or architectural significance, or

(c) any change to the project that may be caused by the environment,

whether any such change or effect occurs within or outside Canada;

138. The Migratory Birds Convention Act, 1994 is amended by adding the following after section 11:

11.1 The Minister may delegate to any minister of the Crown in right of Canada or of a province or to any person who is employed by the Government of Canada, the government of a province or any other government in Canada any power conferred on the Minister under this Act relating to its enforcement or the issuance, renewal, revocation and suspension of permits. The minister or other person to whom the power is delegated may then exercise the power subject to any terms and conditions that the Minister specifies.

139. Section 10 of the Wild Animal and Plant Protection and Regulation of International and Interprovincial Trade Act is amended by adding the following after subsection (3):

(4) The Minister may delegate to any minister of the Crown in right of Canada or of a province or to any person who is employed by the Government of Canada, the government of a province or any other government in Canada any power conferred on the Minister under this section relating to permits. The minister or other person to whom the power is delegated may then exercise the power subject to any terms and conditions that the Minister specifies.
140. Paragraph 21(1)(c) of the Act is amended by striking out the word “and” at the end of subparagraph (iii), by adding the word “and” at the end of subparagraph (iv) and by adding the following after subparagraph (iv):

(v) for the purposes of section 8;

141. The Act is amended by adding the following after section 21:

21.1 (1) The Governor in Council may, on the recommendation of the Minister, by order, amend the definition “animal” or “plant” in section 2 for the purposes of subsection 6(2).

Recommendation
(2) If the Minister is of the opinion that the import of any specimen, living or dead, would be harmful to Canadian ecosystems or to any species in Canada and that urgent action is needed, the Minister may recommend that an order be made under subsection (1).

Duration of amendment
(3) The amendment made by the order applies for the period specified in the order, which period may not be longer than one year from the day the order is made.

Exemption
(4) The order is exempt from the application of section 3 of the Statutory Instruments Act.

COORDINATING AMENDMENT

141.1 If Bill C-10, introduced in the 1st Session of the 37th Parliament and entitled the Canada National Marine Conservation Areas Act, receives royal assent, then, on the later of the coming into force of subsection 34(2) of that Act and the definition “competent minister” in subsection 2(1) of this Act, paragraph (a) of the definition “competent minister” in subsection 2(1) of this Act is replaced by the following:

(a) the Minister of Canadian Heritage with respect to individuals in or on federal lands that are administered by that Minister and that are national parks, national historic sites, national marine conservation areas or other protected heritage areas as those expressions are defined in subsection 2(1) of the Parks Canada Agency Act.
142. Except for section 141.1, the provisions of this Act come into force on a day or days to be fixed by order of the Governor in Council.

142. Les dispositions de la présente loi, à l’exception de l’article 141.1, entrent en vigueur à la date ou aux dates fixées par décret.
SCHEDULE 1
(Subsections 2(1), 42(2) and 68(2))

LIST OF WILDLIFE SPECIES AT RISK
PART 1

EXTIRPATED SPECIES

MAMMALS

Bear, Grizzly (*Ursus arctos*) Prairie population
Ours grizzli population des Prairies

Ferret, Black-footed (*Mustela nigripes*)
**Putois d’Amérique**

Walrus, Atlantic (*Odobenus rosmarus rosmarus*) Northwest Atlantic population
*Morse de l’Atlantique* population de l’Atlantique Nord-Ouest

Whale, Grey (*Eschrichtius robustus*) Atlantic population
Baleine grise de Californie population de l’Atlantique

BIRDS

Grouse, Sage (*Centrocercus urophasianus phaios*) British Columbia population
**Tétras des armoises** population de la Colombie-Britannique

Prairie-Chicken, Greater (*Tympanuchus cupido*)
**Tétras des prairies**

AMPHIBIANS

Salamander, Tiger (*Ambystoma tigrinum*) Great Lakes population
**Salamandre tigrée** population des Grands Lacs

REPTILES

Lizard, Pygmy Short-horned (*Phrynosoma douglassii douglassii*) British Columbia population
**Iguane pygmée à cornes courtes** population de la Colombie-Britannique

Rattlesnake, Timber (*Crotalus horridus*)
**Crotale des bois**

FISH

Chub, Gravel (*Erimystax x-punctatus*)
**Gravelier**

Paddlefish (*Polyodon spathula*)
**Spatulaire**

MOLLUSCS

Wedgemussel, Dwarf (*Alasmidonta heterodon*)
**Alasmidonte naine**
LEPIDOPTERANS
Blue, Karner (Lycaeides melissa samuelis)
Mélissa bleu
Elfin, Frosted (Callophrys irus, Incisalia irus)
Lutin givré
Marble, Island (Euchloe auronides)
Marbré insulaire

PLANTS
Mary, Spring Blue-eyed (Collinsia verna)
Collinsie printanière
Tick-trefoil, Illinois (Desmodium illinoense)
Desmodie d’Illinois

MAMMALS
Badger jacksoni subspecies, American (Taxidea taxus jacksoni)
Blaireau d’Amérique, jacksoni
Badger jeffersonii subspecies, American (Taxidea taxus jeffersonii)
Blaireau d’Amérique, jeffersonii
Caribou, Woodland (Rangifer tarandus caribou) Atlantic — Gaspésie population
Caribou des bois population de la Gaspésie — Atlantique
Fox, Swift (Vulpes velox)
Renard véloce
Marmot, Vancouver Island (Marmota vancouverensis)
Marmotte de l’île Vancouver
Marten, American (Martes americana atrata) Newfoundland population
Marteau d’Amérique population de Terre-Neuve
Whale, Killer (Orcinus orca) Northeast Pacific southern resident population
Épaulard population résidente du Sud du Pacifique Nord-Est

BIRDS
Chat, Western Yellow-breasted (Icteria virens auricollis) British Columbia population
Paruline polyglotte de l’Ouest population de la Colombie-Britannique
Crane, Whooping (Grus americana)
Grue blanche
Curlew, Eskimo (Numenius borealis)
Courlis esquimaux
Flycatcher, Acadian (Empidonax virescens)
Moucherolle vert

LÉPIDOPTÈRES
Lutin givré (Callophrys irus, Incisalia irus)
Elfin, Frosted
Marbré insulaire (Euchloe auronides)
Marble, Island
Mélissa bleu (Lycaeides melissa samuelis)
Blue, Karner

PLANTES
Collinsie printanière (Collinsia verna)
Mary, Spring Blue-eyed
Desmodie d’Illinois (Desmodium illinoense)
Tick-trefoil, Illinois

MAMMIFÈRES
Blaireau d’Amérique, jacksoni (Taxidea taxus jacksoni)
Blaireau d’Amérique, jacksoni subspecies, American
Blaireau d’Amérique, jeffersonii (Taxidea taxus jeffersonii)
Blaireau d’Amérique, jeffersonii subspecies, American
Caribou des bois (Rangifer tarandus caribou) population de la Gaspésie — Atlantique
Caribou des bois population de la Gaspésie — Atlantique
Épaulard (Orcinus orca) population résidente du Sud du Pacifique Nord-Est
Marmotte de l’île Vancouver (Marmota vancouverensis)
Marmot, Vancouver Island
Marteau d’Amérique (Martes americana atrata) population de Terre-Neuve
Marteau d’Amérique population de Terre-Neuve
Renard véloce (Vulpes velox)
Fox, Swift

OISEAUX
Bruant de Henslow (Ammodramus henslowii)
Sparrow, Henslow’s
Chevêche des terriers (Speotyto cunicularia)
Owl, Burrowing
Chouette tachetée du Nord (Strix occidentalis caurina)
Owl, Northern Spotted
Courlis esquimaux (Numenius borealis)
Curlew, Eskimo
Effraie des clochers (Tyto alba) population de l’Est
Owl, Barn Eastern population
Grouse, Sage (Centrocercus urophasianus urophasianus) Prairie population
Tétras des armoises population des Prairies

Owl, Barn (Tyto alba) Eastern population
Effraie des clochers population de l’Est

Owl, Burrowing (Speotyto cunicularia)
Chevêche des terriers

Owl, Northern Spotted (Strix occidentalis caurina) Chouette tachetée du Nord

Plover, Mountain (Charadrius montanus) Pluvier montagnard

Plover circumcinctus subspecies, Piping (Charadrius melodus circumcinctus) Pluvier siffleur, circumcinctus

Plover melodus subspecies, Piping (Charadrius melodus melodus) Pluvier siffleur, melodus

Plover circumcinctus subspecies, Piping (Charadrius melodus circumcinctus) Pluvier siffleur, circumcinctus

Plover melodus subspecies, Piping (Charadrius melodus melodus) Pluvier siffleur, melodus

Rail, King (Rallus elegans) Râle élégant

Shrike, Eastern Loggerhead (Lanius ludovicianus migrans) Pie-grièche migratrice de l’Est

Sparrow, Henslow’s (Ammomanus henslowii) Bruant de Henslow

Tern, Roseate (Sterna dougallii) Sterne de Dougall

Thrasher, Sage (Oreoscoptes montanus) Moqueur des armoises

Warbler, Kirtland’s (Dendroica kirtlandii) Paruline de Kirtland

Warbler, Prothonotary (Protonotaria citrea) Paruline orangée

Woodpecker, White-headed (Picoides albolarvatus) Pic à tête blanche

AMPHIBIANS

Frog, Northern Cricket (Acris crepitans) Rainette grillon

Frog, Northern Leopard (Rana pipiens) Southern Mountain population Grenouille léopard population des montagnes du Sud

Frog, Oregon Spotted (Rana pretiosa) Grenouille maculée de l’Oregon

Frog, Rocky Mountain Tailed (Ascaphus montanus) Grenouille-à-queue des Rocheuses

Salamander, Tiger (Ambystoma tigrinum) Southern Mountain population Salamandre tigrée population des montagnes du Sud

Grue blanche (Grus americana) Crane, Whooping

Moqueur des armoises (Oreoscoptes montanus) Thrasher, Sage

Moucherolle vert (Empidonax virescens) Flycatcher, Acadian

Paruline de Kirtland (Dendroica kirtlandii) Warbler, Kirtland’s

Paruline orangée (Protonotaria citrea) Warbler, Prothonotary

Paruline polyglotte de l’Ouest (Icteria virens auricollis) population de la Colombie-Britannique Chat, Western Yellow-breasted British Columbia population

Pic à tête blanche (Picoides albolarvatus) Woodpecker, White-headed

**Species at Risk — Schedule 1**

**PART 3**

**THREATENED SPECIES**

**MAMMALS**

Bat, Pallid (*Antrozous pallidus*)  
*Chauve-souris blonde*

Bison, Wood (*Bison bison athabascae*)  
*Bison, Bois*

Caribou, Woodland (*Rangifer tarandus caribou*) Boreal population  
*Caribou, Boisland population boréale*

Caribou, Woodland (*Rangifer tarandus caribou*) Southern Mountain population  
*Caribou, Boisland population des montagnes du Sud*

Ermine haiderum subspecies (*Mustela erminea haiderum*)  
*Hermine, Haiderum*

**lichens**

Seaside Centipede (*Heterodermia sitchensis*)  
*Hétérodermie maritime*

**MOSSES**

Moss, Poor Pocket (*Fissidens pauperculus*)  
*Fissident appauvri*

Moss, Rigid Apple (*Bartramia stricta*)  
*Bartramie à feuilles dressées*

Woolly-heads, Tall (*Psilocarphus elatior*) Pacific population  
*Psilocarphe élevé population du Pacifique*

Part 3

**ESPRÈCES MENACÉES**

**MAMMIFÈRES**

Bison des bois (*Bison bison athabascae*)  
*Bison, Bois*

Caribou des bois (*Rangifer tarandus caribou*) population boréale  
*Caribou, Boisland Boreal population*

Caribou des bois (*Rangifer tarandus caribou*) population des montagnes du Sud  
*Caribou, Boisland Southern Mountain population*

Chauve-souris blonde (*Antrozous pallidus*)  
*Bat, Pallid*

Épaulard (*Orcinus Orca*) population migratrice du Pacifique Nord-Est
Espèces en péril — Annexe 1

BIRDS

Otter, Sea (Enhydra lutris)  
*Loutre de mer*

Shrew, Pacific Water (Sorex bendirii)  
*Musaraigne de Bendire*

Whale, Killer (Orcinus orca) Northeast Pacific northern resident population  
*Épaulard population résidente du Nord du Pacifique Nord-Est*

Whale, Killer (Orcinus orca) Northeast Pacific transient population  
*Épaulard population migratrice du Pacifique Nord-Est*

OISEAUX

Bittern, Least (Ixobrychus exilis)  
*Petit Blongios*

Falcon, Anatum Peregrine (Falco peregrinus anatum)  
*Faucon pèlerin, anatum*

Goshawk, Queen Charlotte (Accipiter gentilis laingi)  
*Autour des palombes des îles de la Reine-Charlotte*

Gull, Ross’s (Rhodostethia rosea)  
*Mouette rosée*

Murrelet, Marbled (Brachyramphus marmoratus)  
*Guillemot marbré*

Pipit, Sprague’s (Anthus spragueii)  
*Pipit de Sprague*

Warbler, Hooded (Wilsonia citrina)  
*Paruline à capuchon*

AMPHIBIENS

Great Basin Spadefoot (Spea intermontana)  
*Crapaud de Grand Bassin*

Salamander, Allegheny Mountain Dusky (Desmognathus ochrophaeus)  
*Salamandre sombre des montagnes*

Salamander, Jefferson (Ambystoma jeffersonianum)  
*Salamandre de Jefferson*

Salamander, Pacific Giant (Dicamptodon tenebrosus)  
*Grande salamandre*

Toad, Fowler’s (Bufo fowleri)  
*Crapaud de Fowler*

REPTILES

Gartersnake, Butler’s (Thamnophis butleri)  
*Couleuvre à petite tête*

Snake, Black Rat (Elaphe obsoleta obsoleta)  
*Couleuvre obscure*

Snake, Eastern Fox (Elaphe vulpina gloydi)  
*Couleuvre fauve de l’Est*
Snake, Eastern Hog-nosed (Heterodon platirhinos)
   Couleuvre à nez plat
Snake, Queen (Regina septemvittata)
   Couleuvre royale

**FISH**
Chubsucker, Lake (Erimyzon sucetta)
   Sucet de lac
Darter, Eastern Sand (Ammocrypta pellucida)
   Dard de sable
Gar, Spotted (Lepisosteus oculatus)
   Lépisosté tacheté
Lamprey, Cowichan Lake (Lampetra macrostoma)
   Lamproie du lac Cowichan
Minnow, Western Silvery (Hybognathus argyrurus)
   Méné d’argent de l’Ouest
Sculpin, Cultus Pygmy (Cottus sp.)
   Chabot pygmé
Sculpin, Shorthead (Cottus confusus)
   Chabot à tête courte
Shiner, Rosyface (Notropis rubellus) Eastern population
   Tête rose population de l’Est
Smelt, Lake Utopia Dwarf (Osmerus sp.)
   Éperlan nain du lac Utopia
Wolffish, Northern (Anarhichas denticulatus)
   Loup à tête large
Spotted Wolffish (Anarhichas minor)
   Loup tacheté

**MOLLUSCS**
Abalone, Northern (Haliotis kamtschatkana)
   Haliotide pie

**LEPIDOPTERANS**
Hairstreak, Behr’s (Columbia) (Satyrium behrii columbia)
   Porte-queue de Colombie-Britannique
Skipper, Dun (Euphyes vestris) Western population
   Hespérie rurale population de l’Ouest

**PLANTS**
Aster, Anticosti (Symphyotrichum anticostense)
   Aster d’Anticosti
Aster, Western Silver-leaved (Symphyotrichum sericeum)
   Aster soyeux
Aster, White-top (Sericocarpus rigidus)
   Aster rigide
Blue-Flag, Western (Iris missouriensis)

MOSSES
Moss, Haller’s Apple (Bartramia halleriana)

Bartramia de Haller

MAMMALS
Beaver, Mountain (Aplodontia rufa)

Castor de montagne

Mole, Eastern (Scalopus aquaticus)

Taupe à queue glabre

Prairie Dog, Black-tailed (Cynomys ludovicianus)

Chien de prairie

Vole, Woodland (Microtus pinetorum)

Campagnol sylvestre

Whale, Killer (Orcinus orca) Northeast Pacific offshore population

Épaulard population au large du Pacifique Nord-Est

Wolf, Eastern (Canis lupus lycaon)

Loup de l’Est

BIRDS
Chat, Eastern Yellow-breasted (Icteria virens virens)

Paruline polyglotte de l’Est

Duck, Harlequin (Histrionicus histrionicus) Eastern population

Arlequin plongeur population de l’Est

Falcon, Peale’s Peregrine (Falco peregrinus pealei)

Faucon pèlerin, pealei

Goldeneye, Barrow’s (Bucephala islandica) Eastern population

Garrot d’Islande population de l’Est

Gull, Ivory (Pagophila eburnea)

Mouette blanche

Owl, Barn (Tyto alba) Western population

Effraie des clochers population de l’Ouest

Owl, Flammulated (Otus flammeolus)

Petit-duc nain

Rail, Yellow (Coturnicops noveboracensis)

Râle jaune

Greenbrier, Round-leaved Great Lakes Plains population

Violette jaune des monts (Viola praemorsa ssp. praemorsa)

Violet, Yellow Montane

Yucca glauque (Yucca glauca)

Soapweed

MOUSSES
Bartramie de Haller (Bartramia halleriana)

Moss, Haller’s Apple

OISEAUX
Arlequin plongeur (Histrionicus histrionicus) population de l’Est

Duck, Harlequin Eastern population

Bruant des prés, princeps (Passerculus sandwichensis princeps)

Sparrow, “Ipswich” Savannah

Effraie des clochers (Tyto alba) population de l’Ouest

Owl, Barn Western population

Faucon pèlerin, pealei (Falco peregrinus pealei)

Faucon, Peale’s Peregrine

Garrot d’Islande (Bucephala islandica) population de l’Est

Goldeneye, Barrow’s Eastern population

Mouette blanche (Pagophila eburnea)

Gull, Ivory

Paruline polyglotte de l’Est (Icteria virens virens)

Chat, Eastern Yellow-breasted

Petit-duc nain (Otus flammeolus)

Owl, Flammulated
Sparrow, “Ipswich” Savannah (Passerculus sandwichensis princeps)
Bruant des prés, princeps
Woodpecker, Lewis’s (Melanerpes lewis)
Pic de Lewis

AMPHIBIANS
Frog, Coast Tailed (Ascaphus truei)
Grenouille-à-queue côtière
Salamander, Coeur d’Alène (Plethodon idahoensis)
Salamandre Coeur d’Alène

FISH
Chub, Silver (Macrhybopsis storeriana)
Méné à grandes écailles
Minnow, Pugnose (Opsopoeodus emiliae)
Petit-bec
Sculpin, Columbia Mottled (Cottus bairdi hubbsi)
Chabot tacheté de Columbia
Shiner, Bridle (Notropis bifrenatus)
Méné d’herbe
Sucker, Spotted (Minytrema melanops)
Meunier tacheté
Topminnow, Blackstripe (Fundulus notatus)
Fondale rayé
Warmouth (Lepomis gulosus)
Crapet sac-à-lait
Wolfish, Atlantic (Anarhichas lupus)
Loup Atlantique
Méné à grandes écailles (Macrhybopsis storeriana)
Chub, Silver
Méné d’herbe (Notropis bifrenatus)
Shiner, Bridle
Meunier tacheté (Minytrema melanops)
Sucker, Spotted
Petit-bec (Opsopoeodus emiliae)
Minnow, Pugnose

MOLLUSCS
Oyster, Olympia (Ostrea conchaphila)
Huître plate du Pacifique

LEPIDOPTERANS
Admiral, Weidemeyer’s (Limenitis weidemeyerii)
Amiral de Weidemeyer
Monarch (Danaux plexippus)
Monarque

PLANTS
Ash, Blue (Fraxinus quadrangulata)
Frêne bleu
Beggarticks, Vancouver Island (Bidens amplissimá)
Grand bident
Fern, American Hart’s-tongue (Asplenium scolopendrium var. americanum)
Scolopendre d’Amérique
Fern, Coastal Wood (Dryopteris arguta)

Pic de Lewis (Melanerpes lewis)
Woodpecker, Lewis’s
Râle jaune (Coturnicops noveboracensis)
Rail, Yellow

AMPHIBIENS
Grenouille-à-queue côtière (Ascaphus truei)
Frog, Coast Tailed
Salamandre Coeur d’Alène (Plethodon idahoensis)
Salamander, Coeur d’Alène

POISSONS
Chabot tacheté de Columbia (Cottus bairdi hubbsi)
Sculpin, Columbia Mottled
Crapet sac-à-lait (Lepomis gulosus)
Warmouth
Fondale rayé (Fundulus notatus)
Topminnow, Blackstripe
Loup Atlantique (Anarhichas lupus)
Wolfish, Atlantic
Méné à grandes écailles (Macrhybopsis storeriana)
Chub, Silver
Méné d’herbe (Notropis bifrenatus)
Shiner, Bridle
Meunier tacheté (Minytrema melanops)
Sucker, Spotted
Petit-bec (Opsopoeodus emiliae)
Minnow, Pugnose

MOLLUSQUES
Huître plate du Pacifique (Ostrea conchaphila)
Oyster, Olympia

LÉPIDOPTÈRES
Amiral de Weidemeyer (Limenitis weidemeyerii)
Amiral de Weidemeyer’s
Monarque (Danaux plexippus)
Monarch

PLANTES
Achillée à gros capitules (Achillea millefolium var. megacephalum)
Yarrow, Large-headed Woolly
Astragale de Fernald (Astragalus robbinsii var. fernaldii)
Milk-vetch, Fernald’s
Clèthre à feuilles d’aulne (Clethra alnifolia)
Pepperbush, Sweet
Deschampsie du bassin du Mackenzie (Deschampsia mackenzieana)
Species at Risk — Schedule 1

51 E

C. 29

Dryoptéride côtière
Goldenrod, Riddell’s (Solidago riddellii)
Verge d’or de Riddell

Hairgrass, Mackenzie (Deschampsia mackenzieana)
Deschampsie du bassin du Mackenzie

Milk-vetch, Fernald’s (Astragalus robbinsii var. fernaldii)
Astragale de Fernald

Pepperbush, Sweet (Clethra alnifolia)
Cléthre à feuilles d’aulne

Tansy, Floccose (Tanacetum huronense var. floccosum)
Tanaisie floconneuse

Willow, Felt-leaf (Salix silicicola)
Saule silicicole

Willow, Sand-dune Short-capsuled (Salix brachycarpa var. psammophila)
Saule psammophile

Willow, Turnor’s (Salix turnorii)
Saule de Turnor

Woolly-heads, Tall (Psilocarphus elatior) Prairie population
Psilocarphe élevé population des Prairies

Yarrow, Large-headed Woolly (Achillea millefolium var. megacephalum)
Achillée à gros capitules

Hairgrass, Mackenzie
Dryoptéride côtière (Dryopteris arguta)
Fern, Coastal Wood

Frêne bleu (Fraxinus quadrangulata)
Ash, Blue

Grand bident (Bidens amplissima)
Beggarticks, Vancouver Island

Psilocarphe élevé (Psilocarphus elatior) population des Prairies
Woolly-heads, Tall Prairie population

Saule de Turnor (Salix turnorii)
Willow, Turnor’s

Saule psammophile (Salix brachycarpa var. psammophila)
Willow, Sand-dune Short-capsuled

Saule silicicole (Salix silicicola)
Willow, Felt-leaf

Scolopendre d’Amérique (Asplenium scolopendrium var. americanum)
Fern, American Hart’s-tongue

Tanaisie floconneuse (Tanacetum huronense var. floccosum)
Tansy, Floccose

Verge d’or de Riddell (Solidago riddellii)
Goldenrod, Riddell’s
MAMMALS

Caribou, Peary (Rangifer tarandus pearyi) Banks Island population
Caribou de Peary population de l’île Banks

Caribou, Peary (Rangifer tarandus pearyi) High Arctic population
Caribou de Peary population du haut Arctique

Whale, Beluga (Delphinapterus leucas) St. Lawrence River population
Beluga population du fleuve St-Laurent

Whale, Beluga (Delphinapterus leucas) Ungava Bay population
Beluga population de la baie d’Ungava

Whale, Beluga (Delphinapterus leucas) Southeast Baffin Island - Cumberland Sound population
Beluga population du sud-est de l’île de Baffin et de la baie Cumberland

Whale, Bowhead (Balaena mysticetus) Eastern Arctic population

Agricultural Marshland Conservation Act

CHAPTER 22

OF THE

ACTS OF 2000

amended 2001, c. 1, ss. 2, 3; 2001, c. 6, s. 96; 2004, c. 38, s. 26

NOTE - This electronic version of this statute is provided by the Office of the Legislative Counsel for your convenience and personal use only and may not be copied for the purpose of resale in this or any other form. Formatting of this electronic version may differ from the official, printed version. Where accuracy is critical, please consult official sources.

An Act for the Conservation of Agricultural Marshland

Short title

1 This Act may be cited as the Agricultural Marshland Conservation Act. 2000, c. 22, s. 1.

Interpretation

2 In this Act,

(a) "Commission" means the Agricultural Marshlands Conservation Commission;

(b) "development" includes the erection, construction, alteration, placement, location, replacement or relocation of, or addition to, a structure or a change or alteration in the use made of lands or structures;

(c) "marsh body" means a marsh body incorporated pursuant to this Act or continued by this Act;

(d) "marshland" means land that is
(i) subject to periodic tidal flooding, and

(ii) designated by the Minister as marshland pursuant to this Act or Chapter 274 of the Revised Statutes, 1989, the Marshland Reclamation Act;

(e) "Marshland Administrator" means the Marshland Administrator appointed pursuant to this Act and includes a person acting under the supervision and direction of the Marshland Administrator;

(f) "marshland section" means an area of marshland that may be effectively dealt with as a unit in the construction and maintenance of works;

(g) "Minister" means the Minister of Agriculture and Fisheries;

(h) "rates" means rates levied pursuant this Act, including interest on rates;

(i) "works" includes dykes, aboiteaux, breakwaters, canals, ditches, drains, roads and other structures, excavations and facilities for the conservation, development, improvement or protection of marshland to a standard appropriate for agricultural purposes. 2000, c. 22, s. 2.

Supervision and management

3 The Minister has the general supervision and management of this Act. 2000, c. 22, s. 3.

Powers of Minister

4 (1) Subject to the approval of the Governor in Council, the Minister may construct works to develop marshland for agricultural purposes.

(2) The Minister may reconstruct, repair, operate and maintain any works for the protection, drainage and improvement of marshland for agricultural purposes.

(3) The costs and expenses incurred as a result of the activities carried out pursuant to subsections (1) and (2) shall be paid from moneys appropriated annually by the Legislature.

(4) For the purpose of carrying out the activities authorized by this Section, the Minister may

(a) enter into agreements with the Government of Canada, the government of any other province of Canada, any department, body or person;

(b) purchase, dispose of or rent real and personal property;

(c) engage all necessary employees, consultants, contractors or other persons;

(d) take or authorize any person to take any action that may be necessary for carrying out the purpose of this Act. 2000, c. 22, s. 4.
Designations

5 (1) The Minister may, by order, designate and fix the boundaries of any marshland section for the purpose of carrying out any works or projects pursuant to this Act.

(2) A marshland section designated pursuant to subsection (1) may include any lands adjacent to the marshland that the Minister considers necessary for the construction and maintenance of any works.

(3) Where the designation of a marshland section has been made pursuant to this Section, the Minister shall

(a) publish a notice containing a description of the marshland section in the Royal Gazette;

(b) deposit a description of the marshland section in the office of the registrar of deeds for the registration district in which the marshland section is situate or where the marshland section is located in one or more parcels of land registered pursuant to the Land Registration Act, record the legal description in the register or registers established for that parcel or those parcels pursuant to that Act ; and

(c) give notice of the designation and a description of the marshland section to the owner of the marshland section. 2000, c. 22, s. 5; 2001, c. 6, s. 96; 2004, c. 38, s. 26.

Effect of designation

6 Any area designated by the Minister as a marshland section pursuant to Section 5 is marshland for the purpose of this Act. 2000, c. 22, s. 6.

AGRICULTURAL MARSHLAND CONSERVATION COMMISSION

Composition, remuneration and staff

7 (1) The Governor in Council may appoint an Agricultural Marshland Conservation Commission consisting of not more than five members.

(2) The Governor in Council shall appoint one member to be the Chair of the Commission.

(3) The Governor in Council shall appoint, from the public service of the Province, a suitable person to be the Secretary of the Commission.

(4) A majority of members of the Commission constitutes a quorum.

(5) Each member of the Commission shall be paid such remuneration as determined by the Governor in Council.
(6) Each member of the Commission shall be reimbursed as determined by the Governor in Council for reasonable travel and other expenses incurred by that member in carrying out the duties of a member of the Commission.

(7) Each member of the Commission holds office for a period of up to three years unless the appointment is revoked and is eligible for re-appointment.

(8) A vacancy on the Commission does not impair the ability of the Commission to act. 2000, c. 22, s. 7.

**Duties of Commission**

8 The Commission shall

(a) advise the Minister on matters related to the conservation and protection of marshland and its development and maintenance;

(b) hear appeals pursuant to this Act;

(c) study and examine proposals for the construction, reconstruction, recondition, repair, maintenance, conduct or operation of works and make recommendations to the Minister;

(d) approve rules made by a marsh body respecting works and land within a marshland section; and

(e) perform such further or other duties as may be assigned to it by this Act or the regulations. 2000, c. 22, s. 8.

**Expenses**

9 The administration expenses of the Commission are administration expenses of the Department of Agriculture and Fisheries. 2000, c. 22, s. 9.

**MARSHLAND ADMINISTRATOR**

**Appointment and duties**

10 The Minister shall appoint from the public service of the Province a suitable person to be the Marshland Administrator who shall perform such duties as are imposed by this Act or the regulations. 2000, c. 22, s. 10.

**MARSH BODIES**

**Incorporation of marsh bodies**
11 (1) The owners of marshland in any marshland section may petition the Commission requesting that they be incorporated as a marsh body for that marshland section.

(2) The petition shall set forth

(a) the boundaries and size of the marshland section;

(b) the names and addresses of all persons believed to be, after due inquiry, the owners of marshland within the marshland section;

(c) the approximate amount of marshland owned by each owner within the marshland section;

(d) the proposed name of the marsh body; and

(e) the names of not more than nine persons to be the provisional executive committee of the marsh body.

(3) Subject to subsection (4), where the Minister is satisfied that

(a) the petition is signed by not less than two thirds of the owners of marshland within the marshland section;

(b) the persons signing the petition are the owners of not less than one half of the marshland within the marshland section; and

(c) the Commission recommends that the owners be constituted as a marsh body,

the Minister may, by issuing a certificate in a form prescribed by the regulations, constitute the owners of land within the marshland section as a body corporate under the name set out in the certificate.

(4) Except in exceptional circumstances, a marsh body may not be incorporated for any marshland other than a marshland section, but in such circumstances a certificate of incorporation may be issued for marshland that comprises less than a marshland section or that comprises more than one marshland section.

(5) A certificate of incorporation issued pursuant to this Act shall be published in the Royal Gazette.

(6) Each marsh body incorporated pursuant to Chapter 274 of the Revised Statutes, 1989, the Marshland Reclamation Act, and in existence immediately before the coming into force of this Act is continued as a body corporate with the same powers and functions as a marsh body incorporated pursuant to this Act. 2000, c. 22, s. 11.

Membership of bodies
12 (1) Every person who is an owner of marshland in a marshland section is a voting member of the marsh body incorporated for the marshland.

(2) A member of a marsh body may, by instrument in writing filed with the secretary of the marsh body, nominate another person who is a tenant, occupant or manager of the marshland owned by the member to represent the member at meetings of members of the marsh body.

(3) A person nominated is, until the nomination is rescinded, a member of the marsh body and, without restricting the generality of the foregoing, has, at meetings of members of the marsh body, all the rights and privileges of the member represented and is eligible for election to and to serve as a member of the executive committee of the marsh body.

(4) At any meeting of the marsh body, a member that is a corporation may vote in the manner prescribed by the by-laws of the marsh body. 2000, c. 22, s. 12.

**Variation of boundaries**

13 (1) The Minister may vary the boundaries of a marshland section for which a marsh body is incorporated by adding marshland to the section or excluding marshland from the section where

(a) the Commission recommends that the Minister make the variation; and

(b) the Minister is satisfied that

   (i) a resolution requesting the variation has been passed at a general or special meeting of the members of the marsh body by a vote of not fewer than two thirds of the members of the marsh body present at the meeting, and

   (ii) the owners of not less than two thirds of the marshland proposed to be added or excluded favour the variation.

(2) Where the Minister varies the boundaries of a marshland section for which a marsh body was incorporated,

(a) each owner of marshland added to the marshland section is a member of the marsh body;

(b) any marshland added to the marshland section is subject to this Act;

(c) each owner of marshland excluded from the marshland section ceases to be a member of the marsh body if, as a result of the variation, the owner ceases to own any land in the marshland section; and

(d) any marshland excluded from the marshland section ceases to be subject to this Act.

(3) Where a variation is made pursuant to this Section, the Minister shall insert a notice containing a description of the area in of the Royal Gazette. 2000, c. 22, s. 13.
Powers of marsh bodies

14 A marsh body may

(a) acquire, use, sell and lease real and personal property;

(b) construct, reconstruct, recondition, repair, maintain, conduct and operate works;

(c) enter into agreements with the Minister or other persons for the construction, reconstruction, reconditioning, repairing, maintenance, conduct or operation of works;

(d) make by-laws not inconsistent with this Act for the regulation of its business and affairs;

(e) subject to the approval of the Commission, make rules respecting works and land within or affecting the marshland section;

(f) raise money for its purposes by borrowing or by the levying of rates pursuant to this Act;

(g) prepare a mission or an objectives statement;

(h) do and perform all other acts and things incidental or conducive to the attainment of its objects. 2000, c. 22, s. 14.

Executive Committee

15 (1) Each marsh body shall have an executive committee.

(2) The executive committee consists of such number of members of the marsh body as are prescribed by the by-laws of the marsh body.

(3) The executive committee has the management and direction of the business and affairs of the marsh body. 2000, c. 22, s. 15.

Execution of document

16 All documents to which a marsh body is a party shall be executed on behalf of the marsh body by the chair and the secretary of the executive committee of the marsh body or by such members of the executive committee as the executive committee may authorize. 2000, c. 22, s. 16.

Provisional executive committee

17 (1) Those persons who are, in a petition requesting the incorporation of a marsh body, named as the provisional executive committee of the marsh body constitute the provisional executive committee of the marsh body and are the first executive committee of the marsh body.
(2) The members of the provisional executive committee hold office and are the executive committee of the marsh body until their successors are elected pursuant to the by-laws of the marsh body.

(3) The provisional executive committee shall elect from their number a chair and a secretary.

(4) The provisional executive committee shall call an organization meeting of the members of the marsh body, not later than three months from the date of publication of the certificate of incorporation.

(5) At the organization meeting, by-laws of the marsh body shall be adopted and an executive committee consisting of the number of persons prescribed by the by-laws shall be elected.

(6) A member of the executive committee elected at a general meeting of the marsh body holds office for a term as prescribed by the by-laws and may be re-elected. 2000, c. 22, s. 17.

Chair and secretary of executive committee

18 (1) The members of the executive committee of a marsh body shall, at their first meeting after the organization meeting of the marsh body and, after each general meeting, elect one of their number to be chair of the executive committee.

(2) The chair of the executive committee is also the chair of the marsh body and shall preside over meetings of the executive committee and the marsh body.

(3) At the same meeting, the executive committee of a marsh body shall elect a secretary.

(4) The secretary of the executive committee is also the secretary of the marsh body. 2000, c. 22, s. 18.

Filling of vacancies

19 When a vacancy occurs on the executive committee of a marsh body, the remaining members may appoint a successor to the member whose office becomes vacant, and the person appointed holds office until the next general meeting of the marsh body, when the vacancy shall be filled for the unexpired portion of the term. 2000, c. 22, s. 19.

Frequency of meetings

20 The executive committee of a marsh body shall meet as frequently as may be necessary to attend to the business and affairs of the marsh body, and shall be convened by the chair of the executive committee at any time when at least two members of the marsh body request the meeting in writing. 2000, c. 22, s. 20.

Quorum
21 A majority of the members of the executive committee of a marsh body constitutes a quorum. 2000, c. 22, s. 21.

**Fiscal year**

22 The financial year of a marsh body shall be fixed by the by-laws of the marsh body. 2000, c. 22, s. 22.

**Meetings of members of body**

23 (1) There shall be general meetings of the members of a marsh body as prescribed by the by-laws of the marsh body and at a time and place determined by the executive committee of the marsh body.

(2) A special meeting of the members of the marsh body may be called and held in the manner prescribed by the by-laws of the marsh body. 2000, c. 22, s. 23.

**Voting rights**

24 (1) At an organization meeting and at any other meeting of a marsh body within one year after its incorporation each member of the marsh body may vote.

(2) Notwithstanding subsection (1), a member may not vote at a meeting of the marsh body if, after one year from the date of its incorporation, all rates levied upon the member's land, pursuant to this Act, prior to one year before the date of the meeting have not been paid. 2000, c. 22, s. 24.

**Notice of time and place of meeting**

25 The chair or secretary of the executive committee of a marsh body shall give notice of the time and place of each general or special meeting of the marsh body by mailing a notice to each owner at the owner's last known address at least ten days before the date of the meeting. 2000, c. 22, s. 25.

**Report of executive committee**

26 The executive committee of a marsh body shall, at each general meeting of the marsh body, present a report of its administration of the affairs of the marsh body and an audited financial statement covering its administration since the last general meeting. 2000, c. 22, s. 26.

**Auditor**

27 (1) The members of a marsh body shall, at the organization meeting and at each general meeting of the marsh body, appoint an auditor or auditors who shall examine the accounts of the marsh body.
(2) The auditor shall have free access at all times to the books, accounts and vouchers of the marsh body and may require from the officers and secretary of the marsh body any information and explanation necessary for the performance of the duties of the auditor.

(3) The auditor may be paid for services such compensation as the executive committee of the marsh body determines.

(4) The executive committee of the marsh body shall publish the auditor's report and provide each member with a copy of the report. 2000, c. 22, s. 27.

Estimates and reserve fund

28 (1) The executive committee of a marsh body shall annually prepare estimates of the amount required for the purposes of the marsh body for the ensuing year, making allowances for losses and expenses that may occur in the collection of rates pursuant to this Act and for rates that may not be collected or collectable, and shall present the estimates to a general meeting of the marsh body for approval of the marsh body.

(2) In preparing its estimates, the executive committee may make provision for the raising of an amount that is not less than one per cent of the value at which all marshland within the marshland section is assessed for the purpose of levying rates pursuant to this Act to be placed in a special reserve fund.

(3) The executive committee may invest the special reserve fund in investments authorized by the Trustee Act.

(4) The special reserve fund may be used only for the payment of the cost of extraordinary work and no withdrawals shall be made from it without the approval in writing of the Commission. 2000, c. 22, s. 28.

ASSESSMENT AND RATING

Preparation of lists and valuations

29 The executive committee of a marsh body shall

(a) in such manner as is prescribed by the regulations, prepare and make available for inspection by the owners an assessment list containing the name of each person who is, the owner of marshland for which the marsh body was incorporated, the owner's address, the number of hectares owned by the owner; and

(b) establish the value at which the land is assessed by the executive committee for the purpose of levying rates pursuant to this Act. 2000, c. 22, s. 29.

Right to appeal
30 (1) Any person complaining of being wrongfully inserted or omitted in an assessment list may appeal to the executive committee of the marsh body.

(2) An appeal may be taken by giving notice of the appeal to the secretary of the executive committee within thirty days after the assessment list was made available for inspection.

(3) The executive committee, for the purpose of an appeal, may examine witnesses on oath or affirmation, administered by the chair of the committee, and the person appealing or any person interested in the appeal may call and examine witnesses on oath.

(4) The executive committee may, on an appeal or on its own motion,

(a) confirm or vary the number of hectares owned by any person;

(b) confirm or vary the value per hectare at which the land is assessed;

(c) add to the assessment list the name and assessment of any person improperly left off the assessment list if the person has been given notice of the addition and has had a reasonable opportunity to be heard; or

(d) strike off the assessment list the name and assessment of any person improperly entered. 2000, c. 22, s. 30.

Certification of lists

31 (1) The secretary of the executive committee of a marsh body shall certify that the assessment list was approved by the executive committee, and it shall be open to inspection at the office of the secretary by any owner of land within the marshland section.

(2) The assessment list after being certified binds all owners assessed on the list. 2000, c. 22, s. 31.

Rates

32 (1) The executive committee of a marsh body may, no later than April 15th in each year, levy a rate on each owner of land included in the marsh section for which the marsh body was incorporated in such an amount that the aggregate of all rates so levied is sufficient to raise the amount estimated by the executive committee as the amount of money required for the purposes of the marsh body for the ensuing year.

(2) The rate shall be

(a) based on the area of the land and expressed as so much per hectare of land; or

(b) based on the value of the land as established for the purpose of levying a rate pursuant to this Act and expressed as so much on each dollar of the value of the land.
(3) In subsection (2), "land" does not include

(a) buildings;

(b) utility poles;

(c) structures to be used for the generation of power; and

(d) such structures as the regulations may designate.

(4) A rate based on the value of the land may not be levied without the approval of the Commission.

(5) When the rate is fixed, the secretary of the executive committee shall have every owner rated in the assessment list served with a notice either personally or by mail showing the amount of the rate assessed for the current year as well as all arrears of the rate unpaid. 2000, c. 22, s. 32.

Recovery of rate

33 The amount due by any owner for a rate is a charge on the land and is a debt due to the marsh body and may be sued for and recovered as an ordinary debt in any court of competent jurisdiction. 2000, c. 22, s. 33.

Certificate as proof

34 In any action or proceeding for the recovery of a rate, a certificate appearing to be signed by the secretary of the executive committee of a marsh body is prima facie proof of the amount of the rate due and of the liability of the owner named in the certificate without proof of the signature or appointment of the secretary. 2000, c. 22, s. 34.

Collection of arrears

35 (1) Where an owner does not pay the rate assessed against that owner by July 1st in the year in which the rate has been levied, the secretary of the executive committee of the marsh body may issue a warrant for collection of the rate and of any arrears of the rate unpaid by the owner directed to any officer having jurisdiction in the place where the marshland section is situated.

(2) The officer shall, under the warrant, levy the amount mentioned in the warrant with costs and expenses of the collection by distress and sale of the goods and chattels of the owner named in the warrant.

(3) When the officer distrains upon goods or chattels, the officer shall advertise the sale for ten days in advance of the sale in a conspicuous place and, where the rate and the costs and expenses are not paid at or before the time appointed for the sale, or any adjournment of the sale, the goods and chattels shall be sold at public auction.
(4) The officer shall apply the proceeds of the sale toward payment of the rate and the costs and expenses incurred in the issue of the warrant, the making of the levy and the holding of the sale and, where any balance remains, it shall be paid to the owner assessed for the rate. 2000, c. 22, s. 35.

**Power of sale**

36 (1) In addition to the other remedies provided in this Act for the collection of rates, the secretary of the executive committee of a marsh body may, in the manner provided by the Municipal Government Act for the sale of land for rates and taxes, sell or cause to be sold any marshland with respect to which rates are in arrears for a period of one year or more.

2) For the purpose of a sale of land pursuant to this Section, the chair and the secretary of the executive committee have all the powers, privileges and authority of the mayor and treasurer, respectively, of a town.

3) The secretary shall apply the proceeds of any sale in the following order:

(a) first, in payment of the costs and expenses of the sale;

(b) second, in payment of the rate and interest due the marsh body; and

(c) third, in payment of municipal taxes and interest on the land sold,

and the balance, if any, shall be paid to the prothonotary of the Supreme Court of Nova Scotia of the justice centre area in which the land is situate to be paid out by the prothonotary as directed by an order of the Supreme Court. 2000, c. 22, s. 36.

**Manner of pursuing remedies**

37 The remedies provided in this Act for the collection of rates may be pursued consecutively and in the order the executive committee of a marsh body deems best, but no land shall be sold in the manner provided for arrears of rates for which a judgment has been obtained. 2000, c. 22, s. 37.

**BORROWING POWERS**

**Powers of executive committee**

38 With the approval of the Commission, the executive committee of a marsh body may, in the name of the marsh body, borrow money for the purpose of defraying expenditures of the marsh body. 2000, c. 22, s. 38.

**ENTRY AND DEVELOPMENT**

**Power of entry**
39 Where the executive committee of a marsh body considers it is necessary for any purpose relating to the construction, maintenance or repair of works it may, without the consent of the owner, enter on any lands within the marshland section for which the marsh body was incorporated and do any work the executive committee considers necessary for its purposes. 2000, c. 22, s. 39.

Expropriation

40 A marsh body may expropriate an easement in, over or relating to land for any purpose relating to the construction, maintenance or repair of works. 2000, c. 22, s. 40.

Requirement for permit

41 (1) Notwithstanding the Municipal Government Act or any other provision of this Act, no development shall, on and after November 7, 2000, be carried out in a marshland section unless

(a) a permit for variance authorizing the development is granted by the Marshland Administrator; or

(b) the development

(i) conforms with generally accepted farming practices that do not require structures to be built,

(ii) is necessary for the protection of the marshland section,

(iii) was lawfully commenced before November 7, 2000,

(iv) was not commenced before November 7, 2000, but could have been lawfully commenced before November 7, 2000, or

(v) has been exempted from the application of this Section pursuant to subsection (2).

(2) The Governor in Council may exempt a development from the application of this Section where

(a) the development consists of the construction of roads, the installation of utility poles or the installation or construction of structures to be used for the generation of power; and

(b) the Governor in Council considers that it is in the public interest to grant the exemption.

(3) Within ten working days after receiving an application for a permit for variance, the Marshland Administrator shall

(a) determine if the application is complete; and
(b) where the application is incomplete, notify the applicant in writing advising what is required to complete the application.

(4) Within fifteen working days after receiving a completed application for a permit for variance, the Marshland Administrator shall either grant the permit or inform the applicant of the reasons for not granting the permit.

(5) The applicant may appeal the refusal of a permit for variance to the Commission who, within sixty working days of receiving the appeal, shall

(a) confirm the decision of the Marshland Administrator; or

(b) allow the appeal and order that the permit for variance be granted.

(6) Subsection (1) does not apply to non-agricultural uses existing on the coming into force of this Act on lands specified in the regulations. 2000, c. 22, s. 41.

Offence and remedies

42 (1) Everyone who violates subsection 41(1) is guilty of an offence.

(2) Where there is an offence under subsection (1), the Minister may apply to the Supreme Court of Nova Scotia for any or all of the remedies provided by this Section.

(3) The Supreme Court of Nova Scotia may hear and determine the matter at any time and, in addition to any other remedy or relief, may make an order

(a) restraining the continuance or repetition of the offence with respect to the same property;

(b) directing the removal or destruction of any structure or part of a structure that was constructed in violation of subsection 41(1) and authorizing the Minister, where an order is not complied with, to enter upon the land and premises with necessary workers and equipment and remove and destroy the structure, or part of it, at the expense of the owner;

(c) as to the recovery of the expense of removal and destruction and for the enforcement of this Section and for costs as is deemed proper,

and an order may be interlocutory, interim or final.

(4) Where, after the proceeding is commenced,

(a) the offence that was the subject of the proceeding may have been done or committed by a person other than the defendant;
(b) the title to the property, or part or any interest in it, that vested or was vested at the time of
the commencement of the proceeding in the defendant, has since become vested in a person other
than the defendant; or

(c) there has been a fresh offence by the same person or by another person with respect to the
same property,

it is not necessary to bring another application and the original application may be amended from
time to time and at any time before final judgment to include all parties and all offences and the
whole matter of the offences shall be heard, dealt with and determined.

(5) Where the owner of any property where an offence under subsection (1) is taking place or has
taken place cannot be found, the Minister may post a notice of the offence and upon the
application upon the property, and the posting of the notice and the application is deemed to be
personal service of the notice and the application on that owner. 2000, c. 22, s. 42.

Liability to repair

43 Marshland or works damaged as a result of use authorized by a permit granted to a person
pursuant to Section 41 or exempted from the application of Section 41 pursuant to subsection
41(2), shall be repaired by the person and, where necessary repairs are not carried out within
thirty days of being brought to the attention of the person by the marsh body, the marsh body
may make the repairs and may recover the cost of repairs by an action in debt against the person
in any court and the court may make such orders as to cost it may determine. 2000, c. 22, s. 43.

Supervision of executive committee

44 (1) Where at any time a marsh body defaults in the performance of any of the terms of an
agreement with the Minister for the construction, reconstruction, reconditioning, repairing,
maintaining or operating of any work or works and it appears to the Governor in Council that
permanent damage or injury may result to any marshland, the Governor in Council may, by order
published in the Royal Gazette, suspend the powers and authority of the executive committee of
the marsh body from a date set out in the order whereupon the powers and authority of the
executive committee are suspended and are vested in and may be exercised by the Commission
or its nominee or nominees.

(2) The Governor in Council may revoke an order made pursuant to subsection (1) and, upon
such revocation, the powers and authorities of the executive committee revert to and may be
exercised by the executive committee. 2000, c. 22, s. 44.

SURRENDER AND
REVOCATION OF CERTIFICATE

Effect of surrender or revocation

45 (1) A marsh body may surrender to the Minister its certificate of incorporation if
(a) the Commission approves of the surrender;

(b) no debts or liabilities of the marsh body are outstanding;

(c) a resolution authorizing the surrender of the certificate is passed at a general or special meeting of the marsh body by a vote of not fewer than two thirds of the members of the marsh body who own not less than half of the marshland section for which the marsh body was incorporated; and

(d) at least thirty days before the meeting a notice has been given to all members of the marsh body stating

   (i) the time and place of the meeting, and

   (ii) that such a resolution will be considered by the meeting.

(2) Where the Minister is satisfied that the marsh body has surrendered its certificate of incorporation in accordance with subsection (1), the Minister may, by order, accept the surrender and thereupon the marsh body is dissolved on and from such date as is set out in the order.

(3) Where a marsh body fails to comply with this Act or defaults on any agreement it has with the Minister, the Minister, after having given the members of the marsh body notice that the Minister intends to revoke the marsh body's certificate of incorporation, may, by order, revoke the certificate of incorporation, if

(a) the Minister is satisfied that

   (i) the Commission approves of the revocation, and

   (ii) no debts or liabilities of the marsh body are outstanding;

and

(b) the Minister has, at least thirty days before revoking the certificate, given notice of intention to revoke the certificate to each member of the marsh body.

(4) Where an order is made pursuant to subsection (3) revoking the certificate of incorporation of a marsh body, the marsh body is dissolved on and after such date as is set out in the order.

(5) Acceptance of the surrender or the revocation of the certificate of incorporation by the Minister and of the dissolution of the marsh body shall be published in the Royal Gazette. 2000, c. 22, s. 45.

Effect of surrender or revocation
46 Where a certificate of incorporation of a marsh body is surrendered or revoked and sixty days public notice is given, the Minister may, with the approval of Governor in Council, cease to maintain works for the marshland section for which the marsh body was incorporated. 2000, c. 22, s. 46.

GENERAL

Penalty and separate offences

47 (1) Any person who contravenes this Act or the regulations is liable on summary conviction to a penalty of not more than three thousand dollars and in default of payment to imprisonment for a term of not more than two years less a day.

(2) Where a person violates this Act on more than one day, each day constitutes a separate offence. 2000, c. 22, s. 47.

Conveyance of land

48 When lands that have been conveyed to Her Majesty in right of the Province pursuant to an agreement between the Minister and a person are required by the agreement to be reconveyed to the marsh body or the person, the Governor in Council may grant and convey the lands to the person and may authorize a member of the Executive Council to execute and deliver the necessary deed or deeds of conveyance in the name of Her Majesty in right of the Province. 2000, c. 22, s. 48.

Conflict

49 Where there is a conflict between any provision of this Act or the regulations and a more stringent provision of any other enactment, the more stringent provision prevails. 2000, c. 22, s. 49.

Immunity from liability

50 Neither Her Majesty in right of the Province nor any marsh body is liable to pay compensation for any damages caused by flooding as a result of activities undertaken pursuant to this Act. 2000, c. 22, s. 50.

Regulations

51 (1) The Minister may make regulations

(a) prescribing accounting and bookkeeping methods and systems to be adopted by marsh bodies;

(b) requiring marsh bodies to make reports and returns to the Commission;
(c) prescribing and amending forms and agreements;

(d) prescribing the terms and conditions for the issuing of permits for variance;

(e) prescribing the procedures for hearing appeals by the Commission;

(f) prescribing the manner in which the names and addresses of owners and the area of land is to be determined pursuant to Section 29;

(g) providing for the examination and audit of accounts of marsh bodies and for the inspection and examination of works;

(h) prescribing further or other or additional functions, duties or powers of the Commission;

(i) designating structures that are not included within the meaning of "land" for the purpose of subsections 32(2) and (3);

(ia) specifying land for the purpose of subsection 41(6);

(j) respecting any other matter or thing that the Minister considers necessary or advisable to carry out effectively the intent and purpose of this Act.

(2) In making a regulation pursuant to clauses (1)(d) or (e), the Minister shall consult with each marsh body affected by the regulation and with each municipality in which lands affected by the regulation are located.

(3) Where there is a conflict between a regulation made by the Minister pursuant to this Act and a rule made by a marsh body pursuant to this Act, the regulation prevails.

(4) The exercise by the Minister of the authority contained in subsection (1) is regulations within the meaning of the Regulations Act. 2000, c. 22, s. 51; 2001, c. 1, s. 2.

**By-laws**

52 (1) A marsh body may make by-laws

(a) prescribing the number of members on the executive committee of the marsh body and their terms of office;

(b) providing for the manner of calling meetings of members of the marsh body and of the executive committee and the procedure at such meetings;

(c) fixing the financial year of the marsh body;

(d) prescribing the frequency of general meetings of the marsh body;
(e) prescribing the frequency of reports and estimates;

(f) providing for the manner of voting at meetings of the marsh body;

(g) prescribing the procedures respecting the assessment list inspection and appeals;

(h) imposing an interest charge at the rate fixed by the by-law upon rates that are unpaid on July 1st or such later date in any year as is fixed by the by-law;

(i) repealed 2001, c. 1, s. 3.

(j) generally for the management and conduct of its business and affairs.

(2) The secretary of a marsh body shall file with the Commission a copy of by-laws and amendments made by the marsh body.

(3) The secretary of the Commission shall file with the Registrar of Regulations a copy of each rule made by a marsh body pursuant to clause 14(e) and publication in the Royal Gazette is proof of approval by the Commission. 2000, c. 22, s. 52; 2001, c. 1, s. 3.

Continuation of agreements

53 Each agreement made pursuant to the Marsh Act or the Marshland Reclamation Act and in effect immediately before the coming into force of this Act is hereby continued. 2000, c. 22, s. 53.

Designation not injurious affection

54 Property is deemed not to be injuriously affected by any designation referred to in clause 2(d). 2000, c. 22, s. 54.

Repeal

55 (1) Chapter 273 of the Revised Statutes, 1989, the Marsh Act, is repealed.

(2) Chapter 274 of the Revised Statutes, 1989, the Marshland Reclamation Act is repealed. 2000, c. 22, s. 55.

Effective dates

56 Sections 41, 42 and 43 have effect on and after November 7, 2000. 2000, c. 22, s. 56.
An Act to Preserve and Protect the Beaches of Nova Scotia

Short title

1 This Act may be cited as the *Beaches Act*. R.S., c. 32, s. 1.

Dedication of beaches

2 (1) The beaches of Nova Scotia are dedicated in perpetuity for the benefit, education and enjoyment of present and future generations of Nova Scotians.

Purpose of Act

(2) The purpose of this Act is to
(a) provide for the protection of beaches and associated dune systems as significant and sensitive environmental and recreational resources;

(b) provide for the regulation and enforcement of the full range of land-use activities on beaches, including aggregate removal, so as to leave them unimpaired for the benefit and enjoyment of future generations;

(c) control recreational and other uses of beaches that may cause undesirable impacts on beach and associated dune systems. R.S., c. 32, s. 2.

**Interpretation**

3 In this Act,

(a) "beach" means that area of land on the coastline lying to the seaward of the mean high water mark and that area of land to landward immediately adjacent thereto to the distance determined by the Governor in Council, and includes any lakeshore area declared by the Governor in Council to be a beach;

(b) "Minister" means the Minister of Lands and Forests;

(c) "peace officer" includes a member of the Royal Canadian Mounted Police, a police officer appointed by a city, incorporated town or municipality of a county or district and a conservation officer as defined in the *Crown Lands Act*, *Forests Act* and *Wildlife Act*;

(d) "vehicle" means a vehicle propelled or driven otherwise than by muscular power, whether or not the vehicle is registered pursuant to the *Motor Vehicle Act*, and includes an airplane;

(e) "vessel" means a means of conveyance of a kind used on water and includes an accessory to the vessel. R.S., c. 32, s. 3.

**Administration**

4 (1) The administration, management and control of beaches shall be under the direction of the Minister.

**Natural Resources Advisory Council**

(2) The Minister may refer matters relating to beaches to the Natural Resources Advisory Council established pursuant to the *Natural Resources Advisory Council Act* and the Council shall advise the Minister on such matters.

**Other services**
(3) The Minister may utilize, upon such terms and conditions as the Minister deems fit, the services of such persons as the Minister considers necessary for the efficient carrying out of the purpose of this Act and the regulations.

Agreements

(4) The Minister may, for the effective management of beaches, enter into agreements with the Government of Canada or an agency thereof, with a provincial or municipal government or an agency thereof or with a person for the purposes of this Act or the regulations.

Agreements to manage or preserve land

(5) Without restricting the generality of subsection (4), the Minister may enter into an agreement with the owner or occupier of land adjacent to a beach to manage or preserve that land so that it complements the beach.

Acquisition of land

(6) The Minister, with the consent of the Governor in Council, may acquire land or an interest in land to provide public access to and from a beach and to provide facilities there.

Authorized services

(7) The Minister may authorize lifeguard and other services on a beach.

Studies and research

(8) The Minister may undertake studies and carry out research on beaches in the Province.

Educational programs

(9) In an effort to create greater public awareness and understanding of the beaches in the Province, the Minister may promote educational programs that emphasize the importance of conserving beaches and using them for recreational and other purposes in such a manner as to maintain their environmental integrity. R.S., c. 32, s. 4; 1993, c. 9, s. 9.

Determination of beach area

5 (1) The Governor in Council, on the recommendation of the Minister, may determine what area of land to the landward of mean high watermark and immediately adjacent thereto and what lakeshore area is a beach within the meaning of this Act.

Notice of beach area

(2) When the Governor in Council determines pursuant to subsection (1) that an area of land to the landward of mean high watermark is a beach, the Minister shall
(a) publish a notice containing a description of the beach in the Royal Gazette and in a newspaper circulated in the county or counties to which the beach is contiguous;

(b) deposit a description and plan of the beach in the office of the registrar of deeds for the registration district in which the beach is situate, signed either by him or the Deputy Minister of Lands and Forests or by a Nova Scotia Land Surveyor;

(c) give notice to the owner of the beach if the owner is known, by serving upon him or by mailing by registered post addressed to him at his last known place of abode, a notice containing a description of the beach and notifying him that the beach is a beach under this Act; and

(d) post signs about the beach indicating that it is a beach and that no sand, gravel, stone or other material may be removed from it without the consent of the Minister.

Evidence of sign as prima facie proof

(3) Evidence that a sign has been posted is prima facie proof that the sign has been posted pursuant to clause (d) of subsection (2).

Certified description as prima facie proof

(4) A description and plan of a beach, appearing to be certified by the Minister or the Registrar of Crown Lands appointed pursuant to the Crown Lands Act, shall be received as evidence without proof of the signature of the Minister or Registrar of Crown Lands and the designation of any lands on the plan as a beach is prima facie proof that the lands so designated are a beach. R.S., c. 32, s. 5.

Prohibited removal of sand

6 (1) No person shall wilfully take or remove any sand, gravel, stone or other material from a beach without the permission of the Minister.

Ballast for lobster pot

(2) Nothing in this Section shall prevent or restrict a fisherman from removing from a beach rocks for ballast for his lobster pots. R.S., c. 32, s. 6.

Powers of peace officer

7 (1) A peace officer may

(a) search without a warrant and seize a vehicle including an off-highway vehicle, vessel or other property where the peace officer has reasonable and probable grounds to believe that an offence has been committed pursuant to this Act or any other enactment, if the offence is committed on a beach, and may detain the same for a period not exceeding twenty-four hours where the peace
officer has reasonable and probable grounds to believe the seizure and detention is necessary to prevent the continuation or repetition of the offence;

(b) order a person removing or displacing sand, gravel, stone or other material from a beach without a permit or lawful authorization to return it to the general area from where it was removed;

(c) arrest without warrant a person a peace officer finds committing an offence pursuant to this Act or the regulations or any other enactment if the offence is committed on a beach;

(d) exercise all the powers of a peace officer as defined in the Criminal Code (Canada).

Costs of impounding and storing

(2) Where a vehicle, vessel or other property is seized and detained pursuant to this Act, the costs of impounding and storing it shall be paid by the person to whom the seized property is to be released before it is released.

Duty of registered owner to identify operator

(3) Where the registered owner of the seized property wilfully fails to identify the person in charge of the vehicle or vessel at the time at which it is operated in violation of a provision of this Act or the regulations within forty-eight hours of a demand by a peace officer, the registered owner is guilty of an offence.

Liability of registered owner

(4) The registered owner of a vehicle or vessel is liable to incur the penalties provided for a violation of this Act or the regulations unless, at the time of the violation, the vehicle or vessel was in the possession of a person without the registered owners consent, either expressed or implied.

Presence of registered owner

(5) Where the registered owner of a vehicle or vessel is present on or in the vehicle or vessel at the time of the violation of a provision of this Act or the regulations by another person operating that vehicle or vessel, the registered owner, as well as the operator, is guilty of the offence.

Summary Proceedings Act

(6) Where not inconsistent with this Act, the Summary Proceedings Act and forms authorized thereunder applies mutatis mutandis to all prosecutions and proceedings pursuant to this Act.

Offence
(7) Any person who fails to comply with an order made pursuant to clause (b) of subsection (1) is guilty of an offence. R.S., c. 32, s. 7.

Prohibited activities

8 (1) No person shall, while on a beach,

(a) be impaired by alcohol or drugs;

(b) act in a noisy or disorderly manner;

(c) create a disturbance;

(d) pursue a course of conduct that is detrimental to the safety of other beach users or their enjoyment of the beach and its facilities;

(e) wilfully destroy property and other natural resources found on or adjacent to a beach;

(f) dump or deposit garbage or other material on a beach other than in a receptacle so provided;

(g) engage in any other activity prohibited by regulation.

Order by Minister

(2) Where there is reasonable and probable grounds to believe that a person has violated or is about to violate any provision of this Act or the regulations, or that the entry upon or remaining within a beach by any person may be detrimental to the safety of other beach users or their enjoyment of the beach, the Minister or a person authorized to act on the Ministers behalf may, without notice or hearing, issue a verbal or written order prohibiting that person from entering upon or being within a beach specified in the order for a period specified therein.

Duty to observe order

(3) Any person having knowledge of an order made pursuant to subsection (2) shall observe that order, and in the event the person is within a beach when the order is made, shall leave forthwith. R.S., c. 32, s. 8.

Offence

9 Every person contravening any provision of this Act or of the regulations shall be guilty of an offence, and every violation in connection with a separate taking or removing of sand, gravel, stone or other material from a beach shall be a separate offence. R.S., c. 32, s. 9.

Penalty
10 (1) Any person who violates this Act is liable upon summary conviction to a penalty of not more than two thousand dollars and in default of payment thereof to imprisonment for not more than ninety days.

Additional orders

(2) In addition to any penalty imposed, the court may order a person convicted of an offence pursuant to this Act to restore the beach as nearly as possible to the condition it was in before the offence was committed and pay an amount equal to twice the market value of any aggregate or other property, damaged or removed. R.S., c. 32, s. 10.

Permission for removal of sand

11 The Minister, upon such terms and conditions as the Governor in Council from time to time prescribes, may grant permission for the removal of sand, gravel, stone or other material from a beach. R.S., c. 32, s. 11.

No compensation entitlement

12 No person affected by this Act shall be entitled to compensation for any restriction, encumbrance or use or lack of use, of any nature or kind whatsoever, of a beach that may result or results from the enacting of this Act. R.S., c. 32, s. 12.

Regulations

13 The Governor in Council may make regulations

(a) for the preservation, control and management of beaches;

(b) for the granting of leases, licences and permits authorizing the removal of sand, gravel, stone or other material from beaches and determining the fees and charges for such leases, licences and permits;

(c) providing for the removal from a beach, by specified persons or persons in specified trades or occupations, of quantities of sand, gravel, stone or other material in such amount as he determines;

(d) exempting any beach from the operation of this Act and the regulations hereto;

(e) to preserve and protect flora and fauna located on a beach;

(f) to restrict or regulate traffic by vehicles, vessels or pedestrians on a beach;

(g) to restrict or regulate certain activities on a beach;

(h) to prevent the disposal of garbage on a beach;
(i) prescribing a minimum penalty of not less than fifty dollars and a maximum penalty of not more than two thousand dollars for offences contrary to the regulations;

(j) respecting the management or preservation of lands adjacent to a beach in accordance with an agreement made pursuant to Section 4 or where the lands are owned or occupied by Her Majesty in right of the Province;

(k) defining any word or expression used in this Act but not defined herein;

(l) respecting such other matters as he deems necessary for the carrying out of the intent and purposes of this Act. R.S., c. 32, s. 13.

Regulations Act

14 The exercise by the Governor in Council of the authority set forth in Section 13 shall be regulations within the meaning of the Regulations Act. R.S., c. 32, s. 14.
Cemeteries Protection Act

CHAPTER 9

OF THE

ACTS OF 1998

amended 2001, c. 6, s. 99

NOTE - This electronic version of this statute is provided by the Office of the Legislative Counsel for your convenience and personal use only and may not be copied for the purpose of resale in this or any other form. Formatting of this electronic version may differ from the official, printed version. Where accuracy is critical, please consult official sources.

An Act to Provide for
the Protection of Cemeteries

Short title

1 This Act may be cited as the Cemeteries Protection Act. 1998, c. 9, s. 1.

Interpretation

2 In this Act,

(a) "abandoned cemetery" means a cemetery that is declared to be an abandoned cemetery pursuant to this Act;

(b) "cemetery" means land that is set apart or used as a place for the burial of human remains and, for greater certainty, includes all tombstones, gravemarkers and other monuments located thereon and any buildings or structures located thereon for the permanent placement of human remains;

(c) "Minister" means the Minister of Education and Culture. 1998, c. 9, s. 2.
Supervision and management of Act

3 The Minister has the general supervision and management of this Act. 1998, c. 9, s. 3.

Declaration

4 (1) Where the Governor in Council is satisfied that

(a) a cemetery is no longer being used for the burial or permanent placement of human remains;

(b) the owner of the cemetery is unknown, cannot be found or is unable to maintain the cemetery; and

(c) the cemetery is not subject to active management,

the Governor in Council may, by order, declare the cemetery to be an abandoned cemetery and permit persons to enter the cemetery and carry out such work as the Governor in Council thinks necessary to restore, preserve and protect the cemetery.

(2) An order made pursuant to subsection (1) is ineffective unless and until the order is deposited in the manner prescribed by the regulations in the registry of deeds for the registration district in which the cemetery is located.

(2A) Where real property has been registered pursuant to the Land Registration Act, an order made pursuant to subsection (1) is ineffective unless and until the order is recorded in the register for the parcel established pursuant to that Act in which the real property is located in the manner prescribed by the Land Registration Act for the registration district in which the cemetery is located.

(3) No action lies against a person by reason only of acting in accordance with an order made pursuant to this Section. 1998, c. 9, s. 4; 2001, c. 6, s. 99.

Right to pass

5 Any person may go on foot upon and across any uncultivated lands or Crown lands for the purpose of visiting a cemetery during daylight hours for purposes usually associated with cemetery visits. 1998, c. 9, s. 5.

Power to grant right-of-way

6 (1) Notwithstanding the Private Ways Act, any person may present a petition to the Governor in Council pursuant to that Act for an order in council declaring that the person is entitled to acquire under Part I of that Act a right to pass and repass over lands for the purpose of gaining access to an abandoned cemetery from a public street or road and egress from the abandoned cemetery to a public street or road, and the Private Ways Act applies to the petition as if the
petition were a petition referred to in subsection 2(1) of that Act, except that clause 2(2)(a) of that Act does not apply to the petition.

(2) An order in council pursuant to subsection (1) is ineffective unless and until it is registered in accordance with Section 13 of the *Private Ways Act* 1998, c. 9, s. 6.

**Limitation on use of cemetery**

7 (1) No person may use a cemetery for any purpose other than for the burial or permanent placement of human remains or memorialization.

(2) Subsection (1) does not apply to a person who, for valuable consideration, acquires an interest in property without notice that the property is set apart or used as a place for the burial or permanent placement of human remains, unless at the time of the acquisition, an order relating to the property, made pursuant to Section 4, is on deposit in a registry of deeds in accordance with Section 4.

(3) Where real property is registered pursuant to the *Land Registration Act*, subsection (1) does not apply to a person who, for valuable consideration, acquires an interest in property without notice that the property is set apart or used as a place for the burial or permanent placement of human remains, unless at the time of the acquisition, an order relating to the property, made pursuant to Section 4, is recorded in accordance with Section 4 in the register for the parcel established pursuant to that Act. 1998, c. 9, s. 7; 2001, c. 6, s. 99.

**Consequences of discovery of human remains**

8 (1) Where there is no evidence on the surface of land that the land is a cemetery, but a person discovers, under the surface, human remains, that person shall

(a) immediately report the discovery to the Minister; and

(b) except to the extent permitted by the Minister, not carry out any activity that would result in disturbing the remains.

(2) Every person who violates subsection (1) is guilty of an offence against this Act. 1998, c. 9, s. 8.

**Offence**

9 Every person who desecrates, damages or destroys a cemetery is guilty of an offence against this Act. 1998, c. 9, s. 9.

**Preservation of existing powers of court**
10 Nothing in this Act shall be construed as limiting or modifying the power or authority of a
court to order the disinterment and removal of remains from a cemetery and interment of those
remains in a suitable location. *1998, c. 9, s. 10.*

**Penalty**

11 Every person who is guilty of an offence against this Act is liable, on summary conviction, to
a fine not exceeding two thousand dollars or, on default of payment, imprisonment for a period
not exceeding six months. *1998, c. 9, s. 11.*

**Regulations**

12 (1) The Governor in Council may make regulations

(a) prescribing the manner in which an order made pursuant to this Act shall be deposited and
preserved in a registry of deeds;

(b) defining any word or expression used but not defined in this Act;

(c) respecting any matter deemed necessary or advisable to carry out effectively the intent and
purpose of this Act.

(2) The exercise by the Governor in Council of the authority contained in subsection (1) is
regulations within the meaning of the *Regulations Act. 1998, c. 9, s. 12.*
Emergency Management Act

CHAPTER 8

OF THE

ACTS OF 1990

amended 2005, c. 48, ss. 1-6; 2007, c. 10, s. 2; 2009, c. 12

NOTE - This electronic version of this statute is provided by the Office of the Legislative Counsel for your convenience and personal use only and may not be copied for the purpose of resale in this or any other form. Formatting of this electronic version may differ from the official, printed version. Where accuracy is critical, please consult official sources.

An Act to Provide for a Prompt and Co-ordinated Response to a State of Emergency

Short title

1 This Act may be cited as the Emergency Management Act. 1990, c. 8, s. 1; 2005, c. 48, s. 1.

Interpretation

2 In this Act,

(a) repealed 2005, c. 48, s. 2.

(b) "emergency" means a present or imminent event in respect of which the Minister or a municipality, as the case may be, believes prompt co-ordination of action or regulation of persons or property must be undertaken to protect property or the health, safety or welfare of people in the Province;
(c) "Emergency Management Office" means the Emergency Management Office established pursuant to the Public Service Act;

(d) "emergency management plan" means any plan, program or procedure prepared by the Province or a municipality, as the case may be, that is intended to mitigate the effects of an emergency or disaster and to provide for the safety, health or welfare of the civil population and the protection of property in the event of such an occurrence;

(e) "Fire Marshal" means the Fire Marshal appointed pursuant to the Fire Prevention Act;

(f) "mayor or warden" includes an alderman or councillor acting in the stead of the mayor or warden, as the case may be;

(g) "Minister" means the Minister of Emergency Management;

(h) "municipality" means a city, an incorporated town or a municipality of a county or district;

(i) "police officer" means a member of the Royal Canadian Mounted Police and a police officer of a municipality;

(j) "state of emergency" means a state of emergency declared by the Minister or renewed by the Minister pursuant to this Act;

(k) "state of local emergency" means a state of local emergency declared by a municipality or renewed by it pursuant to this Act. 1990, c. 8, s. 2; 2005, c. 48, ss. 2, 6.

**Act prevails and Minister's authority**

3 (1) Where there is a conflict or inconsistency between this Act or the regulations and any other enactment respecting emergencies, this Act and the regulations prevail.

(2) The Minister has authority over all matters respecting emergency planning, preparedness, response, mitigation, recovery and emergencies in the Province.

(3) The Minister's authority under subsection (2) includes

(a) the general supervision and management of this Act;

(b) the co-ordination of emergency management plans within the Province; and

(c) authority to delegate powers vested in the Minister by or pursuant to this Act. 2009, c. 12, s. 1.

**Emergency Management Office**
4 The Emergency Management Office has and shall exercise and perform such powers and duties as are vested in it by or under this Act and those assigned to it by the Minister. 2005, c. 48, s. 3.

Advisory committee appointed by Governor in Council

5 The Governor in Council may appoint, from among the members of the Executive Council, a committee to advise the Governor in Council on matters relating to emergencies. 1990, c. 8, s. 5.

Executive Emergency Management Committee

5A (1) There shall be an Executive Emergency Management Committee consisting of

(a) the Minister, who is the Chair;
(b) the Deputy Minister of Treasury Board;
(c) the Deputy Minister of the Office of the Premier;
(d) the Deputy Minister of Justice;
(e) the Chief Executive Officer of the Emergency Management Office;
(f) such experts as appointed by the Minister.

(2) The Executive Emergency Management Committee shall provide oversight and direction to the Minister regarding emergency preparedness, response, mitigation and recovery. 2009, c. 12, s. 2.

Advisory committees appointed by Emergency Management Office

6 (1) The Emergency Management Office may appoint such committees as it considers necessary or desirable to advise or assist the Emergency Management Office, the Minister or the Governor in Council.

(2) A member of a committee appointed pursuant to subsection (1) may, if the member is not an employee of Her Majesty or an agency thereof, be paid such remuneration and expenses as the Governor in Council determines. 1990, c. 8, s. 6; 2005, c. 48, s. 6.

Agreements and acquisition of property

7 (1) Subject to the approval of the Governor in Council, the Minister may, on behalf of the Province,
(a) enter into agreements with the Government of Canada, a province or a municipality, a state of the United States of America, or an agent of any of them, in respect of emergency management plans or provision of emergency services;

(b) enter into agreements with a board, commission, agency or Crown corporation of the Government of Canada, of a province or of a municipality, or an agent of any of them, in respect of emergency management plans;

(c) enter into agreements with the Government of Canada and the Workers' Compensation Board for the administration and payment of compensation benefits to persons engaged in training or carrying out duties related to a state of emergency or a state of local emergency;

(d) acquire, by purchase or lease, real and personal property for the purpose of administering the Emergency Management Office.

(1A) Subject to the regulations, a person sent to the Province under an agreement entered into under clause (a) of subsection (1), who holds a licence, certificate or permit respecting the person's profession, trade or other qualifications from a jurisdiction that is a party to the agreement is deemed to be similarly qualified in the Province when providing assistance during a state of emergency or a state of local emergency.

(2) The Workers' Compensation Board may execute and administer an agreement referred to in this Section. 1990, c. 8, s. 7; 2005, c. 48, ss. 4, 6.

**Powers of Emergency Management Office**

8 The Emergency Management Office may, subject to the approval of the Minister,

(a) review and approve, or require modification to Provincial and municipal emergency management plans;

(b) make surveys and studies to identify and record actual and potential hazards that may cause an emergency;

(c) make surveys and studies of resources and facilities to provide information for the effective preparation of emergency management plans;

(d) conduct public information programs related to the prevention and mitigation of damage during an emergency;

(e) conduct training and training exercises for the effective implementation of emergency management plans;

(f) procure food, clothing, medicines, equipment and goods of any nature or kind for the purposes of emergencies;
(g) authorize or require the implementation of any emergency management plan;

(h) enter into agreements with any persons, organizations or associations in respect of emergency management plans. *1990, c. 8, s. 8; 2005, c. 48, s. 6.*

**Powers of Minister**

9 The Minister may

(a) divide the Province into districts and subdistricts for the purpose of this Act;

(b) after consultation with the municipalities concerned, designate a combination of municipalities or parts thereof as a municipality for the purpose of this Act and determine the respective responsibilities of municipalities in the designated area;

(c) require municipalities to prepare emergency management plans, including mutual aid programs, and to submit such plans to the Emergency Management Office for review for adequacy and integration with the Provincial emergency management plans;

(d) establish procedures for the prompt and efficient implementation of emergency management plans;

(e) require any person to develop emergency management plans in conjunction with the Emergency Management Office or the municipalities to remedy or alleviate any hazard to persons or property that is or may be created by

(i) a condition that exists or may exist on that person's property,

(ii) that person's use of property,

(iii) an operation in which that person is or may be engaged, or

(iv) a process that that person is or may be utilizing,

except where an enactment of the Province or a municipal by-law provides a procedure for dealing with the hazard. *1990, c. 8, s. 9; 2005, c. 48, s. 6.*

**Medal for long service**

9A (1) In recognition of a significant contribution to the protection of persons and property by a member of a ground search and rescue crew or other person involved in the provision of emergency services, the Minister or a person designated by the Minister, on the recommendation of the Emergency Management Office, may issue a medal for long service.
(2) Where the Minister or the Minister's designate has issued a medal for long service, the Minister or the designate, on the recommendation of the Emergency Management Office, may issue a bar for further service to accompany the medal. 2007, c. 10, s. 2.

Powers and duties of municipalities

10 (1) Within one year after the coming into force of this Act, each municipality shall

(a) subject to the approval of the Minister, establish and maintain a municipal emergency by-law;

(b) establish and maintain a municipal emergency management organization;

(c) appoint a co-ordinator of the municipal emergency management organization and prescribe the duties of the co-ordinator which shall include the preparation and co-ordination of emergency management plans for the municipality;

(d) appoint a committee consisting of members of the municipal council to advise it on the development of emergency management plans; and

(e) prepare and approve emergency management plans.

(2) The municipality may

(a) pay the reasonable expenses of members of the organization or members of the committee appointed pursuant to clause (b) or (d) of subsection (1);

(b) enter into agreements with and make payments to persons and organizations for the provision of services in the development and implementation of emergency management plans;

(c) enter into an arrangement or agreement with any other municipality respecting a common organization, plan or program;

(d) appropriate and expend sums approved by it for the purpose of this Section. 1990, c. 8, s. 10; 2005, c. 48, s. 6.

Municipality to report emergency

10A Every municipality shall, immediately upon becoming aware of it, inform the Emergency Management Office of any real or anticipated event or emergency that could impact the health, safety or welfare of Nova Scotians, their property or the environment. 2009, c. 12, s. 3.

Police

11 (1) The Minister may appoint persons trained for police duties as auxiliary police officers for the purpose of this Act.
(2) Police officers and auxiliary police officers have such powers, duties and responsibilities as
the regulations prescribe and shall be organized and operate in accordance with the regulations.

(3) A police officer or auxiliary police officer, in carrying out duties pursuant to this Act and the
regulations, has and may exercise in any part of the Province all the powers, authorities and
immunities of a peace officer as defined in the Criminal Code (Canada).

(4) The protection afforded by this Act and any other enactment to a police officer or auxiliary
police officer extends to any other person while and to the extent that that person is in the course
of assisting a police officer or auxiliary police officer under the police officer's or auxiliary
police officer's direction. 1990, c. 8, s. 11.

State of emergency or state of local emergency

12 (1) The Minister, after consulting, if it is practical to do so, with a majority of the members of
a committee established pursuant to Section 5 or a quorum of the Executive Council and, if the
Minister is satisfied that an emergency exists or may exist, may declare a state of emergency in
respect of all or any district, subdistrict or area of the Province.

(2) A municipal council may, when satisfied that an emergency exists or may exist in all or any
area of that municipality, declare a state of local emergency in respect of that municipality or
area thereof.

(3) If a municipal council is unable to act promptly, the mayor or warden may exercise the
authority of the municipal council contained in subsection (2) after consulting, if it is practical to
do so, with a majority of the members of the council's committee to advise on the development
of emergency management plans.

(4) A declaration pursuant to this Section shall identify the nature of the emergency and the area
in which it exists.

(5) Nothing in this Section prevents the Minister from declaring a state of emergency whether a
state of local emergency has been declared or not. 1990, c. 8, s. 12; 2005, c. 48, s. 6.

Publication of declaration or termination

13 When a state of emergency or a state of local emergency has been declared or terminated
pursuant to this Act, the Minister or the municipality, as the case may be, shall immediately
cause the details of the declaration or termination to be communicated or published by such
means as the Minister or the municipality, respectively, considers the most likely to make the
contents of the declaration or termination known to the people of the area affected. 1990, c. 8, s.
13.

Protection of property and health or safety
14 Upon a state of emergency being declared in respect to the Province or an area thereof, or upon a state of local emergency being declared in respect to a municipality or an area thereof, the Minister may, during the state of emergency, in respect of the Province or an area thereof, or the mayor or warden, as the case may be, may, during the state of local emergency, in respect of such municipality or an area thereof, as the case may be, do everything necessary for the protection of property and the health or safety of persons therein and, without restricting the generality of the foregoing, may

(a) cause an emergency management plan or any part thereof to be implemented;

(b) acquire or utilize or cause the acquisition or utilization of personal property by confiscation or any means considered necessary;

(c) authorize or require a qualified person to render aid of such type as that person may be qualified to provide;

(d) control or prohibit travel to or from an area or on a road, street or highway;

(e) provide for the maintenance and restoration of essential facilities, the distribution of essential supplies and the maintenance and co-ordination of emergency medical, social and other essential services;

(f) cause or order the evacuation of persons and the removal of livestock and personal property threatened by an emergency and make arrangements for the adequate care and protection thereof;

(g) authorize the entry by a person into any building or upon land without warrant;

(h) cause or order the demolition or removal of any thing where the demolition or removal is necessary or advisable for the purpose of reaching the scene of an emergency, of attempting to forestall its occurrence or of combating its progress;

(i) order the assistance of persons needed to carry out the provisions mentioned in this Section;

(j) regulate the distribution and availability of essential goods, services and resources;

(k) authorize and make emergency payments;

(l) assess damage to any works, property or undertaking and the costs to repair, replace or restore the same;

(m) assess damage to the environment and the costs and methods to eliminate or alleviate the damage. 1990, c. 8, s. 14; 2005, c. 48, s. 6.

**Duty of mayor or warden and delegation of Section 14 powers**

15 (1) Upon declaring a state of local emergency, a mayor or warden, as the case may be,
(a) shall immediately forward a copy of the declaration to the Minister; and

(b) may authorize any person or committee to exercise any power vested in the mayor or warden, respectively, by Section 14.

(2) Upon declaring a state of emergency, the Minister may authorize any person or committee to exercise any power vested in the Minister by Section 14. *1990, c. 8, s. 15.*

**Prices**

16 (1) During a state of emergency or a state of local emergency, no person in the Province may charge higher prices for food, clothing, fuel, equipment, medical or other essential supplies or for the use of property, services, resources or equipment than the fair market value of the same thing immediately before the emergency.

(2) A contract that is contrary to subsection (1) is voidable at the option of the purchaser if the purchaser repudiates the contract within one month after the termination of the state of emergency or state of local emergency. *1990, c. 8, s. 16.*

**Fires and law enforcement**

17 During a state of emergency,

(a) the Fire Marshal is the co-ordinator of all efforts in relation to the suppression and prevention of fires, and every fire brigade, fire department and firefighter in the area in which the state of emergency exists is subject to the direction and control of the Fire Marshal; and

(b) a peace officer designated for this purpose by the Solicitor General is the co-ordinator of all efforts in relation to law enforcement and every police officer and auxiliary police officer in the area in which the state of emergency exists is subject to the direction and control of that officer. *1990, c. 8, s. 17.*

**Termination of state of emergency or state of local emergency**

18 (1) The Minister may

(a) terminate a state of emergency with respect to an area identified by the Minister in a declaration of a state of emergency when, in the Minister's opinion, an emergency no longer exists in such area; and

(b) terminate a state of local emergency with respect to an area identified by a municipality in its declaration of a state of local emergency when, in the Minister's opinion, an emergency no longer exists in such area.
(2) A municipality may terminate a state of local emergency with respect to an area identified by it in its declaration of a state of local emergency when, in its opinion, an emergency no longer exists in such area. 1990, c. 8, s. 18.

**Termination within fourteen days and renewal**

19 (1) A state of emergency terminates fourteen days after the day on which it was declared unless it is renewed or terminated by the Minister.

(2) A state of emergency may be renewed by the Minister with the approval of the Governor in Council.

(3) The provisions of this Act respecting a state of emergency and the declaration thereof apply, with the necessary changes, to a renewal of a state of emergency. 1990, c. 8, s. 19.

**Termination of state of local emergency and renewal**

20 (1) A state of local emergency terminates

(a) when the area identified by the municipality in its declaration of a state of local emergency is included in an area identified by the Minister in a declaration of a state of emergency;

(b) when it is terminated by the Minister or by the municipality;

(c) seven days after the day on which it was declared unless it is renewed in accordance with this Act.

(2) A state of local emergency may be renewed by the municipality with the approval of the Minister.

(3) The provisions of this Act respecting a state of local emergency or the declaration thereof apply, with the necessary changes, to a renewal of a state of local emergency. 1990, c. 8, s. 20.

**No liability**

21 The Minister, a mayor or warden, a municipality, the Emergency Management Office, a committee established pursuant to this Act or a member thereof, or any other person

(a) is not liable for any damage arising out of any action taken pursuant to this Act or the regulations; and

(b) is not subject to any proceedings by prohibition, certiorari, mandamus or injunction with respect to any action taken pursuant to this Act or the regulations. 1990, c. 8, s. 21; 2005, c. 48, s. 6.

**Entry upon property**
22 Any person in the course of implementing an emergency management plan pursuant to this Act or the regulations may, at any time, enter upon any property. 1990, c. 8, s. 22; 2005, c. 48, s. 6.

**Offence of obstruction**

23 Any person who obstructs the Minister, a municipality, the Emergency Management Office, a committee established pursuant to this Act or any person in the performance of any action, matter or thing authorized by this Act or who contravenes or fails to comply

(a) with any provision of this Act or any regulation; or

(b) with any direction, order or requirement made pursuant to this Act or the regulations,

is guilty of an offence and liable on summary conviction

(c) in the case of an individual, to a fine not exceeding ten thousand dollars; or

(d) in the case of a corporation, to a fine not exceeding one hundred thousand dollars,

or to imprisonment of not more than six months or both. 1990, c. 8, s. 23; 2005, c. 48, s. 6; 2009, c. 12, s. 4.

**Additional penalty**

23A In addition to any penalty imposed under Section 23, a court may increase the fine imposed on a person by an amount equal to the financial benefit that was acquired by or that accrued to the person as a result of the commission of the offence. 2009, c. 12, s. 5.

**Absence from employment**

24 Every person who with proper authority is absent from that person's accustomed employment and is on duty authorized by the Minister or by the council of a municipality for the purpose of this Act shall, while so absent, for all purposes relative to retention of employment, of seniority rights and of superannuation benefits, be deemed to have been in that person's accustomed employment during the period of absence. 1990, c. 8, s. 24.

**Regulations**

25 (1) The Governor in Council may make regulations

(a) respecting emergency planning for the continuity of functions of departments, boards, commissions, corporations and other agencies of the Province;
(b) respecting the vesting of special powers and duties in various departments and agencies of the Province for the purposes of emergency planning and the implementation of emergency management plans;

(ba) respecting the recognition of the professional, trade or other qualifications of persons sent to the Province by another jurisdiction under an agreement entered into under clause (a) of subsection (1) of Section 7 during a state of emergency or state of local emergency;

(bb) requiring municipalities to assess their level of preparedness and report their findings to the Emergency Management Office;

(bc) respecting the emergency planning, evaluation, and level of preparedness required of municipalities;

(bd) respecting emergency plans to be submitted by municipalities to the Emergency Management Office;

(c) respecting the organization, responsibilities, powers, duties and operation of police officers and auxiliary police officers throughout the Province or any part thereof for the purpose of this Act;

(ca) respecting emergency planning, evaluation and reporting for non-governmental entities;

(d) respecting authority to be delegated pursuant to this Act;

(e) prescribing the forms to be used for a declaration of a state of emergency and renewals and [termination] of the same;

(f) respecting the establishment, operation, liability and responsibilities of ground search and rescue organizations;

(g) prescribing renewal periods for states of emergency;

(h) defining any word or expression used in this Act but not defined herein;

(i) respecting any matter or thing that the Governor in Council deems necessary for the administration of this Act.

(2) The exercise by the Governor in Council of the authority contained in subsection (1) shall be regulations within the meaning of the Regulations Act.

(3) An order or regulation made under this Act may be made retroactive to the date in the order or regulation.

(4) Notwithstanding the Regulations Act, an order or regulation made under this Act during a state of emergency or a state of local emergency comes into force immediately on the signing by
the Governor in Council or by the person who makes it, unless some other time is stated as being
the time when it comes into force. 1990, c. 8, s. 25; 2005, c. 48, ss. 5, 6; 2009, c. 12, s. 6.

Repeal

26 Chapter 145 of the Revised Statutes, 1989, the Emergency Measures Act, is repealed. 1990, c.
8, s. 26.

Proclamation

27 This Act comes into force on and not before such day as the Governor in Council orders and
declares by proclamation. 1990, c. 8, s. 27.

Proclaimed - July 31, 1990
In force - November 1, 1990
Municipal Government Act

An Act Respecting
Municipal Government

WHEREAS the Province recognizes that municipalities have legislative authority and responsibility with respect to the matters dealt with in this Act;

AND WHEREAS municipalities are a responsible order of government accountable to the people:

Short title

1 This Act may be cited as the Municipal Government Act. 1998, c. 18, s. 1.

Purpose of Act
2 The purpose of this Act is to

(a) give broad authority to councils, including broad authority to pass by-laws, and to respect their right to govern municipalities in whatever ways the councils consider appropriate within the jurisdiction given to them;

(b) enhance the ability of councils to respond to present and future issues in their municipalities; and

(c) recognize that the functions of the municipality are to

(i) provide good government,

(ii) provide services, facilities and other things that, in the opinion of the council, are necessary or desirable for all or part of the municipality, and

(iii) develop and maintain safe and viable communities. 1998, c. 18, s. 2.

Interpretation

3 In this Act,

(a) "administrator" means the employee of a municipality or other person designated by the chief administrative officer to be responsible for the provisions of this Act respecting dangerous or unsightly premises, except where the context otherwise requires, and includes a person acting under the supervision and direction of the administrator;

(b) "assessment appeal region" means an assessment appeal region designated pursuant to the Assessment Act;

(c) "assessment roll" means the assessment roll required to be prepared pursuant to the Assessment Act;

(d) "auditor" means the auditor appointed for the municipality pursuant to this Act, except where the context otherwise requires;

(e) "automatic machine" means a mechanical or electronic device that is operated by the introduction of a coin, counter or slug, and includes a vending machine but does not include automatic scales, telephone apparatus or a machine that is licensed by the Province or an agency of the Province;

(f) "Board" means the Nova Scotia Utility and Review Board;

(g) "building service connection" means a piping system that conveys sewage, liquid waste, stormwater or surface runoff from a property to a municipal sewer;
(h) "business occupancy assessment" has the same meaning as in the Assessment Act;

(i) "chief administrative officer" means the chief administrative officer of a municipality;

(j) "clerk" means the clerk of a municipality;

(k) "combined sewer" means a sewer intended to function simultaneously as a storm sewer and a sanitary sewer;

(l) "commercial property" has the same meaning as in the Assessment Act;

(m) "community" means an area in a regional municipality entitled to elect a community council pursuant to this Act;

(n) "community council" means the council of a community established pursuant to this Act;

(na) "conservation property" has the same meaning as in the Assessment Act;

(o) "council" means the council of a municipality, except as otherwise defined in this Act;

(p) "councillor" means a council member other than the mayor;

(q) "county or district municipality" means a municipality incorporated as a municipality of a county or district pursuant to Chapter 295 of the Revised Statutes, 1989, the Municipal Act;

(r) "dangerous or unsightly" means partly demolished, decayed, deteriorated or in a state of disrepair so as to be dangerous, unsightly or unhealthy, and includes property containing

(i) ashes, junk, cleanings of yards or other rubbish or refuse or a derelict vehicle, vessel, item of equipment or machinery, or bodies of these or parts thereof,

(ii) an accumulation of wood shavings, paper, sawdust, dry and inflammable grass or weeds or other combustible material, or

(iii) any other thing that is dangerous, unsightly, unhealthy or offensive to a person,

and includes property, a building or structure

(iv) that is in a ruinous or dilapidated condition,

(v) the condition of which seriously depreciates the value of land or buildings in the vicinity,

(vi) that is in such a state of non-repair as to be no longer suitable for human habitation or business purposes,

(vii) that is an allurement to children who may play there to their danger,
(viii) constituting a hazard to the health or safety of the public,

(ix) that is unsightly in relation to neighbouring properties because the exterior finish of the building or structure or the landscaping is not maintained,

(x) that is a fire hazard to itself or to surrounding lands or buildings, or

(xi) that has been excavated or had fill placed on it in a manner that results in a hazard;

(s) "debenture" includes any financial instrument approved by the Nova Scotia Municipal Finance Corporation;

(t) "deed" means an instrument by which land is conveyed, transferred, assigned or vested in a person, but does not include a will, mortgage, agreement of sale or lease for a term of less than twenty-one years;

(u) "Deputy Minister" means the Deputy Minister of the Department of Housing and Municipal Affairs;

(v) "derelict vehicle, vessel, item of equipment or machinery " includes a vehicle, vessel, item of equipment or machinery that

(i) is left on property, with or without lawful authority, and

(ii) appears to the administrator to be disused or abandoned by reason of its age, appearance, mechanical condition or, where required by law to be licensed or registered, by its lack of licence plates or current vehicle registration;

(w) "Director of Assessment" means the Director of Assessment appointed pursuant to the Assessment Act, and includes a person acting under the supervision and direction of the Director;

(x) "dog" means a dog, male or female, or an animal that is the result of the breeding of a dog and any other animal;

(y) "drainage master plan" means a detailed plan of stormwater runoff and the courses and channels of it, including floodplains, for an entire area of drainage;

(z) "drainage plan" means a detailed plan of stormwater runoff and the courses and channels of it, including floodplains, for one or more parts of an area of drainage for all lands tributary to, or carrying drainage from, land that is proposed to be subdivided;

(aa) "dwelling unit" means living quarters that

(i) are accessible from a private entrance, either outside the building or in a common area within the building,
(ii) are occupied or, if unoccupied, are reasonably fit for occupancy,

(iii) contain kitchen facilities within the unit, and

(iv) have toilet facilities that are not shared with the occupants of other dwelling units;

(ab) "elector" means elector as defined in the Municipal Elections Act;

(ac) "emergency services" means services related to the provision of emergency services, including fire services, emergency medical services, search and rescue, water rescue and assistance and protection for people and property in the event of disasters including, but not limited to, floods, hurricanes, motor vehicle accidents and chemical spills;

(ad) "engineer" means the engineer of the municipality or the village and includes a person acting under the supervision and direction of the engineer;

(ae) "farm property" has the same meaning as in the Assessment Act;

(af) "fire department" means an incorporated body that provides fire services and that may, at its option, provide one or more other emergency services, and includes a fire or emergency services department of a municipality, village, fire protection district or other body corporate;

(ag) "fire protection district" has the same meaning as in the Rural Fire District Act;

(ah) "fire services" means services related to the prevention and suppression of fires;

(ai) "fiscal year" means the period from April 1st in one year to March 31st in the following year, including both dates;

(aj) "forest property" has the same meaning as in the Assessment Act;

(ak) "grading" means the alteration of land levels, including the addition or removal of topsoil or other material of any kind, and includes a change in land that alters the permeability of the soil;

(al) "improve" includes lay out, open, construct, repair and maintain;

(am) "incorporation date" means the date prescribed by the Governor in Council on which a regional municipality is established;

(an) "mayor" means the council member elected at large to be the chair of the council;

(ao) "Minister" means the Minister of Housing and Municipal Affairs;

(ap) "mobile canteen" means a vehicle used for the display, storage, transportation or sale of food or beverages by a mobile vendor;
(aq) "mobile vendor" means a person who vends from a mobile canteen or a stand;

(ar) "municipal government" means a municipal unit, village or service commission in the area to be incorporated as a regional municipality, and includes every authority, board, commission, corporation or other entity of that municipal unit, village or service commission and every joint authority, board, commission, committee or other entity involving that municipal unit, village or service commission;

(as) "municipal highway" means a highway owned by a municipality, pursuant to this Act, the Public Highways Act or otherwise;

(at) "municipal sewer" means a sewer controlled by a municipality or a village;

(au) "municipal unit" means a city, a town or a county or district municipality in the area to be incorporated as a regional municipality;

(av) "municipal water utility" means a utility owned, operated or managed by a municipality, village or service commission either directly or through a board or commission, for the purpose of producing, transmitting, delivering or furnishing water directly or indirectly to or for the public;

(aw) "municipality" means a regional municipality, town or county or district municipality, except where the context otherwise requires or as otherwise defined in this Act;

(ax) "oversized sewer" means a sewer that is designed to benefit lands that are in addition to lands that will benefit from the sewer immediately upon its completion;

(ay) "owner" includes

(i) as it refers to the owner of a dog, any person who possesses, has the care of, has the control of, or harbours a dog and, where the person is a minor, includes a person responsible for the custody of the minor,

(ii) as it refers to the owner of property

(A) a part owner, joint owner, tenant in common or joint tenant of the whole or any part of land or a building,

(B) in the case of the absence or incapacity of the person having title to the land or building, a trustee, an executor, a guardian, an agent, a mortgagee in possession or a person having the care or control of the land or building,

(C) a person who occupies shores, beaches or shoals, and

(D) in the absence of proof to the contrary, the person assessed for the property;
(az) "policy" means a resolution of the council that is required, pursuant to this Act, to be recorded in the by-law records of a municipality, except where the context otherwise requires;

(ba) "private on-site sewage disposal system" means a private system for sewage disposal serving one lot;

(bb) "private wastewater facilities" means wastewater facilities that are privately owned and serving two or more properties;

(bc) "public place" includes streets, parks and entrances, halls, corridors, washrooms, parking areas, driveways, roads, streets, sidewalks and alleys of a shopping centre, shopping mall or other shopping complex, recreation centre, restaurant and retail store;

(bd) "regional assessment appeal court" means a regional assessment appeal court appointed pursuant to the Assessment Act;

(be) "regional municipality" means a regional municipality established by, or continued pursuant to, this Act and includes the Cape Breton Regional Municipality, the Halifax Regional Municipality and the Region of Queens Municipality and the area over which each of those bodies corporate has jurisdiction;

(bf) "registered Canadian charitable organization" means a charitable organization registered pursuant to the Income Tax Act (Canada) and the regulations made pursuant to that Act;

(bg) "registrar of deeds" means a registrar of deeds appointed pursuant to the Registry Act and, in the case of an interest registered pursuant to the Land Registration Act, means a registrar appointed pursuant to that Act;

(bh) "registry" means the office of the registrar of deeds for the registration district in which the land is situate and, in the case of an interest registered pursuant to the Land Registration Act, means the appropriate land registration office established pursuant to that Act;

(bi) "residential property" has the same meaning as in the Assessment Act;

(bj) "resource property" has the same meaning as in the Assessment Act;

(bk) "sale price" or "value" means the entire consideration for the sale of the property and, without restricting the generality of the foregoing, includes

(i) money consideration paid together with the par or face value of promissory notes, cheques, bills of exchange, agreements and securities forming part of the consideration,

(ii) the gross value of real or personal property given in exchange, in whole or in part, including mortgages made by the grantee in favour of the grantor or any person on behalf of the grantor,
(iii) outstanding obligations or accounts canceled, assumed or satisfied, and

(iv) taxes, liens, mortgages and encumbrances, including interest and expenses, assumed by the grantee;

(bl) "sanitary sewer" means a sewer receiving and carrying liquid and water-carried wastes and to which storm, surface or groundwaters are not intentionally admitted;

(bm) "school board" means a school board as defined in the Education Act that, from time to time, may be responsible for the provision of schools in a municipality;

(bn) "service commission" means a board, commission or corporation created by, or under the authority of, an enactment that may

    (i) provide services for an area, or the residents of an area, that are similar to one or more of those that may be provided by a municipality for its residents, and

    (ii) levy rates and taxes, or require a municipality to levy rates and taxes, other than, or in addition to, water or electric rates fixed or approved pursuant to the Public Utilities Act, but does not include a municipality, committee created by an intermunicipal services agreement, village or school board;

(bo) "sewage" means the combination of liquid and water-carried wastes from buildings, containing animal, vegetable or mineral matter in suspension or solution, together with such groundwater, surface water or stormwater as might be present;

(bp) "sewer" means a pipe or conduit for carrying sewage, groundwater, stormwater or surface runoff, and includes all sewer drains, storm sewers, clearwater sewers, storm drains and combined sewers vested in, or under the control of, a municipality or village;

(bq) "solid-waste management facility" means a sanitary landfill licensed pursuant to the Environment Act or a location not required to be licensed pursuant to that Act, a recycling facility, a transfer station, a waste separation facility, a household hazardous waste facility, an incinerator, a composting site or any other facility for the management of solid waste including collection, recycling, treatment and disposal;

(br) "special purpose tax" means a tax that the council, by resolution, declares to be a special purpose tax;

(bs) "special purpose tax account" means the account to which the proceeds of a special purpose tax are credited;

(bt) "special sewer connection" means a connection from a building on a property to a sewer that is not situate in the portion of the street on which the property immediately abuts;
(bu) "stand" includes a table, showcase, bench, rack, pushcart, wagon or wheeled vehicle or device that can be moved without the assistance of a motor and is used for the display, storage, transportation or sale of food, beverages or other merchandise by a mobile vendor;

(bv) "stormwater" means water from precipitation of all kinds, and includes water from the melting of snow and ice, groundwater discharge and surface water;

(bw) "stormwater system" means a method or means of carrying stormwater, including ditches, swales, sewers, drains, canals, ravines, gullies, pumping stations, retention ponds, streams, watercourses, floodplains, ponds, springs, creeks, streets or private roads, roadways or driveways;

(bx) "storm sewer" means a sewer that carries stormwater and surface runoff water, excluding sewage;

(by) "street" means a public street, highway, road, lane, sidewalk, thoroughfare, bridge, square and the curbs, gutters, culverts and retaining walls in connection therewith, except as otherwise defined in this Act;

(bz) "taxes" includes municipal rates, area rates, change in use tax, forest property tax, recreational property tax, capital charges, one-time charges, local improvement charges and any rates, charges or debts prescribed, by the enactment authorizing them, to be a lien on the property;

(ca) "tax sale" includes a sale by public auction or a sale by tender, for the purpose of collecting taxes;

(caa) "transit facilities" includes a bus, a bus terminal, a bus shelter, a bus bay, a parking lot, a ferry, a ferry terminal and a ferry dock;

(cb) "treasurer" means the treasurer of a municipality, and includes a person acting under the supervision and direction of the treasurer;

(cc) "tree" includes a bush, shrub and hedge;

(cd) "vending" means the sale, or offering for sale, of

(i) food, beverages or other merchandise, unless they are immediately delivered to a residence or shop by the person selling them,

(ii) services, unless they are provided in a building;

(ce) "vending machine" means a mechanical or electronic device that

(i) is operated by the introduction of a coin, counter or slug, and
(ii) dispenses food, beverages, goods, wares or services, including newspapers and other publications;

(cf) "village" means a village continued or incorporated pursuant to this Act;

(CG) "village commissioner" means a commissioner of a village;

(ch) "warden" means the council member chosen by the council of a county or district municipality to be the chair of the council;

(ci) "wastewater facilities" means the structures, pipes, devices, equipment, processes or other things used, or intended, for the collection, transportation, pumping or treatment of sewage and disposal of the effluent;

(cj) "water system" means the source, structures, pipes, hydrants, meters, devices, equipment or other things used, or intended, for the collection, transportation, pumping or treatment of water.

1998, c. 18, s. 3; 2000, c. 9, s. 32; 2001, c. 35, s. 2; 2001, c. 6, s. 119; 2003, c. 9, s. 49; 2006, c. 40, s. 1; 2008, c. 36, s. 4.

PART I

THE MUNICIPALITY

Every municipality subject to Act

4 Every municipality incorporated at the date this Act comes into force is subject to this Act. 1998, c. 18, s. 4.

Regional municipalities continued

5 (1) The inhabitants of the County of Cape Breton are, and continue to be, a body corporate under the name "Cape Breton Regional Municipality".

(2) repealed 2008, c. 39, s. 387.

(3) The inhabitants of the County of Queens are, and continue to be, a body corporate under the name "Region of Queens Municipality". 1998, c. 18, s. 5; 2008, c. 39, s. 387.

References to regional municipalities

6 (1) A reference in an enactment to a municipality pursuant to the Municipal Act, city, town, municipality of a county or district or rural municipality includes a regional municipality.

(2) A reference in an enactment to the

(a) mayor of a city or town; or
(b) warden of a municipality of a county or district, a rural municipality or a municipality pursuant to the Municipal Act,

includes the mayor of a regional municipality. *1998, c. 18, s. 6.*

**Municipalities of counties and districts continued**

7 (1) The inhabitants, other than the inhabitants of an incorporated town, of each of

(a) the counties of Annapolis, Antigonish, Colchester, Cumberland, Inverness, Kings, Pictou, Richmond and Victoria; and

(b) the districts of Argyle, Barrington, Chester, Clare, Digby, East Hants, Guysborough, Lunenburg, Shelburne, St. Mary's, West Hants and Yarmouth,

are and continue to be bodies corporate under the name of the "Municipality of the (County or District) of .......".

(2) A municipality continued pursuant to this Section is a county or district municipality.

(3) A reference in an enactment to a municipality of a county or district, rural municipality or municipality pursuant to the Municipal Act is a reference to a county or district municipality.

(4) A reference in an enactment to the warden of a municipality of a county or district, rural municipality or municipality pursuant to the Municipal Act is a reference to the mayor or warden of a county or district municipality.

(5) The powers and jurisdiction of a county or district municipality do not include an incorporated town within the boundaries of the county or district municipality. *1998, c. 18, s. 7.*

**Towns continued**

8 The inhabitants of an incorporated town are and continue to be a body corporate under the name of the "Town of .......". *1998, c. 18, s. 8.*

**Municipal name change**

9 The Governor in Council may, on the request of the council of a municipality, change the name of the municipality to a name chosen by the council. *1998, c. 18, s. 9.*

**Government of municipality**

10 (1) A municipality is governed by a council consisting of at least three members.

(2) One councillor shall be elected for each polling district in a county or district municipality and in a regional municipality.
(3) No more than two councillors shall be elected for each polling district in a town. 1998, c. 18, s. 10; 2000, c. 9, s. 33.

**Election of mayor for towns and regional municipalities**

11 (1) The mayor of a town or regional municipality shall be elected at large.

(2) Every person eligible to vote for a councillor of a town or regional municipality is eligible to vote for the mayor. 1998, c. 18, s. 11.

**Selection of mayor for county or district municipalities**

12 (1) The warden of a county or district municipality shall be chosen by the council members from among themselves.

(2) The term of office of the warden expires when the term of office of the council expires, unless prior to the selection of a warden, the council adopts a shorter term of office for the warden.

(3) The warden shall be chosen

(a) at the first meeting of the council in a regular election year after the time for applying for a recount has expired; or

(b) at the first meeting of the council after the expiration of the term of a warden or when the office of warden otherwise becomes vacant.

(4) The clerk shall preside at the meeting of the council at which the warden is to be elected, until the warden is elected.

(5) If a majority of the council members are unable to agree upon the choice of a warden, the clerk shall determine the warden from the two leading candidates by lot as provided in the Municipal Elections Act.

(6) The council of a county or district municipality may, by policy, adopt rules governing the election of a warden by the council members.

(7) The council of a county or district municipality may

(a) by a vote of two thirds of the council members; and

(b) on twenty days notice in writing to the clerk, the warden and the councillors, remove a warden from office as warden and proceed to elect a new warden.
(8) The council of a county or district municipality may, at any time not less than nine months prior to a regular municipal election, decide that the chair of the council be elected at large, in which case

(a) commencing at the next regular municipal election, a mayor shall be elected at large for the municipality;

(b) every person eligible to vote for a councillor of the municipality is eligible to vote for the mayor;

(c) the total number of council members is increased by one unless the municipality has applied to the Board and the Board has determined otherwise;

(d) subsections (1) to (7) do not apply to the municipality.

(9) A decision made pursuant to subsection (8) may not be reversed after February 15 in the year in which the first mayor is to be elected, or subsequently. 1998, c. 18, s. 12; 2006, c. 40, s. 2.

Perpetual succession and seal

13 (1) A municipality has perpetual succession and shall have a common seal.

(2) The seal shall be kept by the clerk.

(3) The mayor or warden and clerk or the persons designated by the council by policy may sign a deed or other document to which the municipality is a party on behalf of the municipality. 1998, c. 18, s. 13.

Powers of council

14 (1) The powers of a municipality are exercised by the council.

(2) In the general exercise of its powers, the council shall take into account the principle of accessibility for its citizens with disabilities.

(3) Each council member, while in office, may administer oaths and take and receive affidavits, declarations and affirmations within the Province for use within the Province. 1998, c. 18, s. 14.

Mayor or warden

15 (1) The mayor or warden shall preside at all meetings of the council.

(2) During the temporary absence of the mayor or warden, the deputy mayor or deputy warden shall preside and, if neither is present, the council may appoint a person to preside from among the council members present.
(3) The mayor or warden may

(a) monitor the administration and government of the municipality; and

(b) communicate such information and recommend such measures to the council as will improve the finances, administration and government of the municipality. *1998, c. 18, s. 15.*

**Deputy mayor or deputy warden**

16 (1) The council shall select one of its council members to be the deputy mayor or deputy warden of the council.

(2) Prior to the selection of a deputy mayor or deputy warden, the council shall determine the term of office of the deputy mayor or deputy warden.

(3) The deputy mayor or deputy warden shall act in the absence or inability of the mayor or warden or in the event of the office of mayor or warden being vacant.

(4) The council may prescribe, by policy, additional duties and responsibilities of the deputy mayor or deputy warden.

(5) The deputy mayor or deputy warden has all the power and authority and shall perform all the duties of the mayor or warden when the deputy mayor or warden is notified that

(a) the mayor or warden is absent or unable to fulfil the duties of mayor or warden; or

(b) the office of mayor or warden is vacant. *1998, c. 18, s. 16; 2006, c. 40, s. 3.*

**Mayor or councillor resignation**

17 (1) The mayor or a councillor may resign from office at any time by delivering to the clerk a signed resignation and such a resignation is effective on delivery by the clerk to the next meeting of the council.

(2) A resignation may not be withdrawn once it has been delivered to the clerk.

(3) A mayor or councillor who ceases to be ordinarily resident in the municipality ceases to be qualified to serve as mayor or as councillor.

(4) A mayor or councillor who, without leave of the council, is absent from three consecutive regular meetings of the council, ceases to be qualified to serve as mayor or as a councillor.

(5) When a seat on the council becomes vacant, the clerk shall report the facts to the council.
(6) Notwithstanding subsection (3), where a mayor or councillor has the approval of the council, a mayor or councillor may be ordinarily resident outside the municipality but within the Province for one period of not more than six months in a term. 1998, c. 18, s. 17; 2004, c. 7, s. 2.

**Employment restriction for former council member**

18 No council member may be employed by the municipality while a council member or for a period of six months after ceasing to be a council member. 1998, c. 18, s. 18.

**Council meetings**

19 (1) Notice of regular council meetings is not required.

(2) In addition to regular meetings, the council may hold such other meetings as may be necessary or expedient for the dispatch of business at such time and place as the council determines, if each council member is notified at least three days in advance and the clerk gives at least two days public notice of the meeting.

(3) Where the mayor or warden determines that there is an emergency, the council may meet without notice or with such notice as is possible in the circumstances.

(4) The clerk shall call a meeting of the council when required to do so by the mayor or warden or upon presentation of a written request signed by a majority of the councillors.

(5) When calling a meeting pursuant to subsection (4), the clerk shall give at least two days public notice of the meeting.

(6) Where the council fails to meet at any time determined by law, it is not dissolved, but may hold future meetings as if there had been no failure.

(7) A meeting of the council is not an illegal or invalid meeting by reason only of

(a) a failure to give notice; or

(b) meeting elsewhere than provided in the by-laws, a policy or a notice of meeting. 1998, c. 18, s. 19; 2004, c. 7, s. 3.

**Quorum of council**

20 (1) A majority of the maximum number of persons that may be elected to the council is a quorum for every meeting of the council.

(2) Where there is a vacancy in a council's numbers, the council may make a decision if a quorum is present at a meeting.
(3) Where the number of council members is reduced due to vacancies in a council's numbers below the number required for a quorum, the remaining council members may make a decision at a meeting of council if

(a) there are at least three remaining council members; and

(b) a majority of the remaining council members is present at the meeting,

but the council may not pass a by-law or policy, borrow money, set a tax rate, acquire or sell property or make any other decision that has effect after, or for a term extending beyond, the date for the election to fill the vacancies in council membership.

(4) Where the number of council members is reduced below

(a) three, for a council consisting of more than three members; or

(b) two, for a council consisting of three members,

due to vacancies in the council's numbers, the council may not make a decision except to take such steps as may be required to fill the vacancies. 1998, c. 18, s. 20.

Voting at a council meeting

21 (1) Unless otherwise prescribed by statute, a question arising at a council meeting shall be decided by a majority of votes.

(2) Subject to the Municipal Conflict of Interest Act, all council members present, including the person presiding, shall vote on a question.

(3) Unless otherwise specified in a policy, a member of the council who fails or refuses to vote on a question before the council is deemed to have voted in the negative.

(4) In the event of a tie in a vote on a question, the question is determined in the negative.

(5) The person presiding at a meeting of the council may cause to be expelled and excluded any person, including a council member, who is disrupting the proceedings of the council. 1998, c. 18, s. 21.

Open meetings and exceptions

22 (1) Except as otherwise provided in this Section, council meetings and meetings of committees appointed by council are open to the public.

(2) The council or any committee appointed by the council may meet in closed session to discuss matters relating to
(a) acquisition, sale, lease and security of municipal property;

(b) setting a minimum price to be accepted by the municipality at a tax sale;

(c) personnel matters;

(d) labour relations;

(e) contract negotiations;

(f) litigation or potential litigation;

(g) legal advice eligible for solicitor-client privilege;

(h) public security.

(3) No decision shall be made at a private council meeting except a decision concerning procedural matters or to give direction to staff of, or solicitors for, the municipality.

(4) A record which is open to the public shall be made, noting the fact that council met in private, the type of matter that was discussed, as set out in subsection (2) and the date, but no other information.

(5) Subsections (3) and (4) apply to committee meetings or parts of them that are not public.

(6) Any councillor or employee of a municipality who discloses any report submitted to, or details of matters discussed at, a private meeting of the council or committee, as a result of which the municipality has lost financially or the councillor or employee of a municipality has gained financially, is liable in damages to the municipality for the amount of the loss or gain.

(7) Subsection (6) does not apply to information disclosed pursuant to subsection (4) or subsection 473(2). 1998, c. 18, s. 22; 2000, c. 9, s. 34; 2003, c. 9, s. 50.

**Council may make policies**

23 (1) The council may make policies

(a) respecting the date, hour and place of the meetings of the council and the notice to be given for them;

(b) regulating its own proceedings and preserving order at meetings of the council;

(c) providing for committees and conferring powers and duties upon them, except the power to expend funds;

(d) providing for and fixing
(i) the annual remuneration to be paid to the mayor or warden,

(ii) the annual remuneration to be paid to the deputy mayor or deputy warden,

(iii) the annual remuneration to be paid to councillors,

(iv) that part of the salary or remuneration that is an allowance for expenses incidental to
    the discharge of the duties of such persons as elected officers of the municipality,

(v) the deduction to be made from the remuneration of such persons for missing more
    than three council or committee meetings in a year, and

(vi) the rate per kilometre as a travelling allowance for such persons for actual distance
    travelled once each day to go to, and return from, every daily session of a meeting of the
    council or of a committee.

(2) The council may, by policy, require that where a council member is nominated or appointed
    by the council to a board, commission or other position or is otherwise appointed as a
    representative of the municipality, any remuneration from that position, excluding
    reimbursement of expenses, to which that council member is entitled shall be paid to the
    municipality.

(3) Where

(a) an expense by a council member is authorized by an expense policy adopted by the council;

or

(b) no expense policy has been adopted by the council but the expense is supported by proof that
    it has actually been incurred,

the expense may be reimbursed to the council member. *1998, c. 18, s. 23.*

**Standing, special and advisory committees**

24 (1) The council may establish standing, special and advisory committees.

(2) Each committee shall perform the duties conferred on it by this Act, any other Act of the
    Legislature or the by-laws or policies of the municipality.

(3) The council may appoint persons who are not members of the council to a committee and
    may establish a procedure for doing so.

(4) A committee shall operate in accordance with the procedures provided in this Act and the
    procedural policy for the council applies to committees unless the council, by policy, decides
    otherwise.
(5) A member of a committee established by the council who is a council member is not entitled to additional remuneration for serving on the committee but may be reimbursed for expenses incurred as a committee member.

(6) A committee member who is not a council member may be

(a) paid an annual honorarium for serving on the committee, as determined by the council by policy, and an honorarium may be a different amount if the person is chair of a committee and honorariums may differ for different committees; and

(b) reimbursed for expenses incurred as a committee member.

(7) Where a council member is appointed to a committee, board or commission as a representative of the council, the council member's appointment ceases if and when person ceases to be a council member. *1998, c. 18, s. 24.*

**Vacancy on board, commission or committee**

25 (1) A person appointed by the council as a member of a board, commission or committee pursuant to this or any other Act of the Legislature who, without leave of the board, commission or committee, is absent from three consecutive regular meetings, ceases to be a member.

(2) The secretary of the board, commission or committee shall immediately notify the council of a vacancy, and the council shall fill the vacancy. *1998, c. 18, s. 25.*

**Citizen advisory committees**

26 The council may establish, by policy, citizen advisory committees which shall advise the council, as directed by the council. *1998, c. 18, s. 26.*

**Community committees**

27 (1) The council may establish, by policy, a community committee for an area.

(2) A policy establishing a community committee shall

(a) define the boundaries of the area for which the committee is responsible and set out the duties of the committee; and

(b) include such other matters as the council deems advisable.

(3) The powers and duties of a community committee may include

(a) monitoring the provision of services to the area for which the committee is responsible and recommending the appropriate level of services, areas where additional services are required and ways in which the provision of services can be improved;
(b) the establishment of one or more advisory subcommittees;

(c) making recommendations to the council respecting any matter intended to improve conditions in the area for which the committee is responsible including, but not limited to, recommendations respecting

(i) inadequacies in existing services provided to the area and the manner in which they might be resolved, additional services that might be required and the manner in which the costs of funding these services might be raised,

(ii) by-laws or regulations, including those regarding planning, that are required, and

(iii) the adoption of policies that would allow the people of the area to participate more effectively in the governance of the area. 1998, c. 18, s. 27.

PART II

ADMINISTRATION

Chief administrative officer

28 (1) Subject to subsection (2), the council may employ a person to be the chief administrative officer for the municipality.

(2) The council of a regional municipality shall employ a person to be the chief administrative officer for the regional municipality. 1998, c. 18, s. 28.

No chief administrative officer appointed

29 Where the council does not appoint a chief administrative officer, the council

(a) shall fulfil the responsibilities, and may exercise the powers, given to the chief administrative officer by this Act; and

(b) may delegate any of the responsibilities and powers of the chief administrative officer to an employee of the municipality. 1998, c. 18, s. 29.

Council and chief administrative officer relationship

30 (1) The chief administrative officer is the head of the administrative branch of the government of the municipality and is responsible to the council for the proper administration of the affairs of the municipality in accordance with the by-laws of the municipality and the policies adopted by the council.
(2) The council shall communicate with the employees of the municipality solely through the
chief administrative officer, except that the council may communicate directly with employees of
the municipality to obtain or provide information.

(3) The council shall provide direction on the administration, plans, policies and programs of the
municipality to the chief administrative officer.

(4) No council member, committee or member of a committee established by the council shall
instruct or give direction to, either publicly or privately, an employee of the municipality. 1998,
c. 18, s. 30.

Responsibilities of chief administrative officer

31 (1) The chief administrative officer shall

(a) coordinate and direct the preparation of plans and programs to be submitted to the council for
the construction, rehabilitation and maintenance of all municipal property and facilities;

(b) ensure that the annual budget is prepared and submitted to the council;

(c) be responsible for the administration of the budget after adoption;

(d) review the drafts of all proposed by-laws and policies and make recommendations to the
council with respect to them;

(e) carry out such additional duties and exercise such additional responsibilities as the council
may, from time to time, direct.

(2) The chief administrative officer may

(a) attend all meetings of the council and any board, committee, commission or corporation of
the municipality and make observations and suggestions on any subject under discussion;

(b) appoint, suspend and remove all employees of the municipality, with power to further
delegate this authority;

(c) act, or appoint a person to act, as bargaining agent for the municipality in the negotiation of
contracts between the municipality and any trade union or employee association and recommend
to the council agreements with respect to them;

(d) subject to policies adopted by the council

   (i) make or authorize expenditures, and enter into contracts on behalf of the municipality,
   for anything required for the municipality where the amount of the expenditure is
   budgeted or within the amount determined by the council by policy, and may delegate
   this authority to employees of the municipality,
(ii) sell personal property belonging to the municipality that, in the opinion of the chief administrative officer, is obsolete, unsuitable for use, surplus to requirements of, or no longer needed by, the municipality, and may delegate this authority to employees of the municipality,

(iii) personally, or by an agent, negotiate and execute leases of real property owned by the municipality that are for a term not exceeding one year, including renewals,

(iv) establish departments of the municipal administration,

(v) adopt a system of classification of positions of municipal officers and employees and specify offices that may not be filled by the same person,

(vi) determine the salaries, wages and emoluments to be paid to municipal officers and employees, including payment pursuant to a classification system,

(vii) where not otherwise provided for, fix the amount in which security is to be given by municipal officers and employees, the form of security, the manner in which security is to be given and approved and the nature of the security to be given;

(e) authorize, in the name of the municipality, the commencement or defence of a legal action or proceedings before a court, board or tribunal, including reporting the commencement of the legal action, defence or proceeding to the council at the next meeting and may, if the council so provides by policy, delegate this authority to employees of the municipality;

(f) where the council so provides by policy, settle a legal action or proceeding in accordance with the policy.

(3) A lease executed by the chief administrative officer is as binding on the municipality as if it had been specifically authorized by the council and executed by the mayor or warden and clerk on behalf of the municipality.

(4) Notwithstanding subsections 33(1), 37(1), 39(1) and Section 41, the chief administrative officer may, with the consent of council, perform the duties of the clerk, treasurer, engineer and administrator, or any of them, pursuant to this Act.

(5) The chief administrative officer may from time to time appoint an employee of the municipality to act in the place of the chief administrative officer when the chief administrative officer is absent or unable to act. 1998, c. 18, s. 31.

**Reporting and accountability requirements**

32 (1) The directors of departments of the municipality

(a) are accountable to the chief administrative officer for the performance of their duties; and
(b) shall submit the reports and recommendations required of them to, and through, the chief administrative officer.

(2) A report or recommendation from the solicitor of the municipality shall be presented to the council by the solicitor and the chief administrative officer shall be informed of the contents in advance of the presentation to council, unless the report or recommendation is with respect to the chief administrative officer.

(3) Where a director of a department of the municipality disagrees with a recommendation of the chief administrative officer, the objections may be provided to the chief administrative officer who shall present them to the council. 1998, c. 18, s. 32.

Clerk

33 (1) The chief administrative officer shall designate an employee of the municipality to perform the duties of the clerk of the municipality.

(2) The clerk shall

(a) record in a minute book all the proceedings of the council;

(b) account for the attendance of each council member at every meeting of the council;

(c) keep the by-laws and policies of the municipality; and

(d) perform such other duties as are prescribed by the chief administrative officer, the council or an enactment. 1998, c. 18, s. 33.

Policy for records management and destruction

34 (1) The council may adopt a policy for the management and destruction of records.

(2) Records that are required by an enactment to be kept and minutes, by-laws, policies and resolutions of the council shall not be destroyed.

(3) The council may, by policy, specify further classes of records that are not to be destroyed or that are to be kept for specified time periods.

(4) Where

(a) a municipal record is destroyed; or

(b) an original municipal record is not produced in court,
(c) the clerk certifies that a reproduction is part of the records of the municipality and is a true reproduction of the original municipal record,

a photographic, photostatic or electronic reproduction of the record is admissible in evidence to the same extent as the original municipal record and is, in the absence of proof to the contrary, proof of the record. 1998, c. 18, s. 34.

**Sufficient proof in action or proceeding**

35 Where, in an action or proceeding it is necessary to prove the authority of an employee of a municipality, a certificate under the hand of the clerk and the seal of the municipality stating that the employee has the authority is sufficient proof, without proof of the signature of the clerk or of the seal. 1998, c. 18, s. 35.

**False certificate of clerk**

36 A clerk who wilfully gives a false certificate is liable, on conviction, to a penalty not exceeding ten thousand dollars and, in default of payment, to imprisonment for a period of not more than one hundred and eighty days. 1998, c. 18, s. 36.

**Treasurer**

37 (1) The chief administrative officer shall designate an employee of the municipality to perform the duties of the treasurer of the municipality.

(2) The treasurer may delegate any of the powers or duties of the treasurer pursuant to this or any other Act of the Legislature to an employee of the municipality. 1998, c. 18, s. 37.

**Duty of treasurer to advise council**

38 The treasurer shall promptly advise the council of

(a) all moneys due to the municipality that the treasurer considers cannot reasonably be collected after pursuing all reasonable avenues of collection; and

(b) the reasons for the belief that such moneys cannot be collected,

and the council may write off the amounts determined to be uncollectible. 1998, c. 18, s. 38.

**Engineer**

39 (1) The chief administrative officer shall designate an employee of the municipality to be the engineer for the municipality.

(2) Where the engineer has authority to require that action be taken by a person, the engineer may direct that the action be taken.
(3) A person shall not refuse or fail to take action when directed to do so by the engineer.

(4) Where the engineer directs that action be taken and no action is taken, the engineer may cause the necessary work to be done.

(5) The engineer may enter in or upon a property at

(a) a reasonable hour upon reasonable notice to the owner and any occupier of the property; or

(b) any time in the event of an emergency,

for the purpose of inspection, observation, measurement, sampling, testing or work to be done in accordance with this Act or a by-law made pursuant to this Act. *1998, c. 18, s. 39.*

**Approval or permission by engineer**

40 (1) Where approval or permission by the engineer is required pursuant to this Act, the engineer's decision to refuse the approval or permission may be appealed to the

(a) council; or

(b) where there is a committee designated by the council, by policy, to hear appeals, that committee.

(2) On an appeal pursuant to subsection (1), the council or the designated committee, as the case may be, shall

(a) direct the engineer to grant the approval or permission; or

(b) uphold the decision of the engineer.

(3) The right of appeal pursuant to this Section expires fourteen days after the engineer serves a written decision regarding the approval or permission on the owner. *1998, c. 18, s. 40.*

**Administrator for dangerous and unsightly premises**

41 The chief administrative officer shall designate an employee of the municipality or other person to be the administrator responsible for the dangerous and unsightly premises provisions of this Act. *1998, c. 18, s. 41; 2000, c. 9, s. 35.*

**Municipal auditor**

42 (1) The council shall appoint a municipal auditor who is registered pursuant to this Act to be the auditor for the municipality.

(2) The auditor shall report to the council on the accounts and funds
(a) administered by the council; and

(b) where the control is apparent or implied in the council.

(3) The auditor's report shall contain the information, and be in the form, required pursuant to this Act.

(4) The auditor's report shall be filed with the council and the Minister by July 31 in each year.

(5) The auditor shall report, to the council and to the Minister, any management letters and any communication from the auditor detailing weaknesses in internal control, deficiencies in management information systems or other areas requiring improvement.

(6) The financial statements of a municipality, as reported on by the auditor, shall set out the remuneration paid to each council member and the chief administrative officer.

(7) No person shall be appointed as auditor who, at any time during the fiscal year in which the auditor is appointed, is or has been

(a) a council member;

(b) a contractor hired by the municipality; or

(c) an employee of the municipality,

except that an auditor may be reappointed as auditor. *1998, c. 18, s. 42.*

**Access by auditor**

43 (1) The auditor has access at all times to the books, accounts and vouchers of the municipality and may require from the employees of the municipality such information and explanations as may be necessary for the performance of the auditor's duties.

(2) The employees of a municipality shall, on request, promptly provide access, information and explanations to the auditor. *1998, c. 18, s. 43.*

**Audit committee**

44 (1) The council shall annually appoint an audit committee.

(2) The responsibilities of the audit committee include

(a) a detailed review of the financial statements of the municipality with the auditor;

(b) an evaluation of internal control systems and any management letter with the auditor;
(c) a review of the conduct and adequacy of the audit;

(d) such matters arising out of the audit as may appear to the audit committee to require investigation;

(e) such other matters as may be determined by the council to be the duties of an audit committee;

(f) any other matters as may be determined by the council. 1998, c. 18, s. 44.

**Pension plans**

45 (1) In this Section, "full-time employee" means an employee who is employed in full-time, continuous employment.

(2) The council shall establish a pension plan to provide pensions for full-time employees in such manner as the council shall, by policy, determine.

(3) The council may, by policy, establish pension plans to provide pensions for some or all other employees of the municipality in such manner as the council may, by policy, determine.

(4) A pension plan may include employees of a board, commission or other body corporate established by the municipality alone or jointly with other municipalities.

(5) The council may, by policy, establish a pension plan to provide a pension for the mayor or councillors or both.

(6) The municipality, the employees and, where a pension plan is established for the mayor or councillors, those for whom the pension plan is established, shall make contributions to the plan's cost.

(7) A pension plan may provide for annual increases in the pensions paid pursuant to the plan, but the increases shall not exceed the lesser of

(a) six per cent; or

(b) the percentage increase in the cost of living in the preceding year, as measured by the change in the Consumer Price Index for Canada prepared by Statistics Canada.

(8) The Pension Benefits Act applies to a pension plan established pursuant to this Section. 1998, c. 18, s. 45.

**Employment not during pleasure**
Notwithstanding the Interpretation Act, no employee of a municipality holds office during pleasure, unless a written agreement between the employee and the municipality provides otherwise. 1998, c. 18, s. 46.

PART III

POWERS

Resolutions, policies, by-laws

47 (1) The council shall make decisions in the exercise of its powers and duties by resolution, by policy or by by-law.

(2) The council may exercise any of its powers and duties by resolution unless a policy or a by-law is required by an enactment.

(3) The council may exercise by by-law any of the duties and powers that it may exercise by resolution or policy.

(4) The council may exercise by policy any of the duties and powers that it may exercise by resolution.

(5) The council may make and carry out a contract, perform an act, do any thing or provide a service for which the municipality or the council is authorized by an Act of the Legislature to spend or borrow money. 1998, c. 18, s. 47.

Policies

48 (1) Before a policy is passed, amended or repealed the council shall give at least seven days notice to all council members.

(2) The council may adopt different policies for different areas of the municipality.

(3) In addition to matters specified in this Act or another Act of the Legislature, the council may adopt policies on any matter that the council considers conducive to the effective management of the municipality. 1998, c. 18, s. 48.

Power to make policies

49 (1) The council may make policies

(a) setting the interest rate to be charged on overdue taxes, area rates, water charges, sewer charges and any other charges or sums owing to the municipality;
(b) regulating the use of solid-waste management facilities, providing for times and conditions under which they may be used and setting charges for the use of solid-waste management facilities operated by the municipality;

(c) setting and amending the fees to be paid for

(i) licences issued pursuant to a by-law of the municipality,

(ii) an inspection required or conducted pursuant to a by-law of the municipality or an enactment,

(iii) permits, applications and approvals required to be obtained from the municipality or an employee of the municipality pursuant to a by-law of the municipality or an enactment,

(iv) and expenses charged for the impoundment of animals;

(d) delegating the power to issue, refuse, suspend, cancel or revoke licences and permits, but not including building permits and development permits;

(e) establishing the amount that may be accepted by the municipality in lieu of prosecution for breach of a by-law and setting out procedures to be followed for such acceptance.

(2) Where the power to issue, refuse, suspend, cancel or revoke licences and permits is delegated by policy, provision for an appeal of such issuance, refusal, suspension, cancellation or revocation to a standing committee or to the council shall be included in the policy. 1998, c. 18, s. 49.

Powers of municipality regarding property

50 (1) A municipality may acquire and own property granted or conveyed to the municipality either absolutely or in trust for a public or charitable purpose.

(2) Where property is conveyed to a municipality in trust for a public or charitable purpose, the municipality holds the property according to the terms of the trust and may do anything necessary to carry out the objects of the trust.

(3) The property vested in a municipality, absolutely or in trust, is under the exclusive management and control of the council, unless an Act of the Legislature provides otherwise.

(4) Possession, occupation, use or obstruction of property of a municipality does not give an estate, right or title to the property.

(5) A municipality may
(a) acquire property, including property outside the municipality, that the municipality requires for its purposes or for the use of the public;

(b) sell property at market value when the property is no longer required for the purposes of the municipality;

(c) lease property owned by the municipality at market value;

(d) sell deeds for cemetery lots and certificates of perpetual care. 1998, c. 18, s. 50.

**Sale or lease of municipal property**

51 (1) A municipality may sell or lease property at a price less than market value to a nonprofit organization that the council considers to be carrying on an activity that is beneficial to the municipality.

(2) A resolution to sell or lease property referred to in subsection (1) at less than market value shall be passed by at least a two thirds majority of the council present and voting.

(3) Where the council proposes to sell property referred to in subsection (1) valued at more than ten thousand dollars at less than market value, the council shall first hold a public hearing respecting the sale.

(4) The council shall advertise the public hearing at least twice, in a newspaper circulating in the municipality, the first notice to appear at least fourteen days before the hearing.

(5) The notice of the public hearing shall include the date, time and place of the hearing, the location of the real property or a description of the tangible personal property, the estimated value of the property and the purpose of the sale. 1998, c. 18, s. 51.

**Sale to abutting owner**

51A Where a municipality holds land that is of insufficient size or dimensions to be capable of any reasonable use, in the opinion of the council, all or part of the land may be sold to the owner of any lot abutting that land and may be consolidated with such lot and, notwithstanding Section 51, the sale price of the land so sold may be set by council at a price that is less than market value at the time of the sale. 2003, c. 9, s. 51.

**Expropriation**

52 (1) Where the council considers it necessary to acquire real property, including real property outside the municipality, for a purpose for which it may spend money, the council may expropriate the real property, but this power to expropriate does not authorize a municipality to expropriate property of another municipality.

(2) Where real property is proposed to be expropriated,
(a) the municipality shall survey the property and prepare a description of it;

(b) municipal employees and agents of the municipality may enter upon the property to survey or examine it; and

(c) the municipality may make borings or other excavations in the property and shall reimburse the owner for any damage done if the expropriation is not completed.

(3) The Expropriation Act applies to expropriation proceedings by a municipality or a village. 1998, c. 18, s. 52.

Plebiscite

53 (1) A council may direct that a plebiscite be held in all or part of the municipality and that the clerk hold a public meeting in connection with the plebiscite.

(2) Where a plebiscite is directed, the clerk shall require the returning officer appointed pursuant to the Municipal Elections Act to conduct the plebiscite and it shall be conducted as closely as possible to the manner provided for the conduct of a special election pursuant to that Act.

(3) A plebiscite shall be held on a Saturday, as specified in the resolution, which shall be not less than ten weeks after the resolution directing the plebiscite is passed. 1998, c. 18, s. 53.

Police services

54 (1) The council may provide police services in the municipality by a combination of methods authorized pursuant to the Police Act and the board of police commissioners of a municipality has jurisdiction over the provision of the police services, notwithstanding that they are provided by a combination of methods.

(2) A municipality may contract with the Royal Canadian Mounted Police, the Minister of Justice or another municipality to provide police services. 1998, c. 18, s. 54.

Public transportation service

55 (1) A municipality may provide a public transportation service by

(a) the purchase of vehicles or vessels and operation of the service;

(b) providing financial assistance to a person who will undertake to provide the service; or

(c) a combination of these methods.

(2) The Public Utilities Act does not apply to a public transportation service within a municipality that provides the service. 1998, c. 18, s. 55.
Area improvement and promotion

56 (1) A municipality may

(a) beautify, improve and maintain property owned or leased by the municipality;

(b) pay grants to a body corporate for the purpose of promoting or beautifying a business district and for airport, wharf or waterfront development;

(c) identify and promote a business district as a place for retail and commercial activity;

(d) establish or maintain parking facilities.

(2) The municipality may levy an area rate applicable only to the commercial property and business occupancy assessments in the area benefited by the expenditures in order to recover them.

(3) In setting such an area rate, the council may set

(a) different rates for business occupancy assessments and commercial property assessments; and

(b) a minimum and maximum amount to be paid by a person assessed,

or may provide that payments be made on another basis established by the council. 1998, c. 18, s. 56.

Business and industrial development

57 (1) A municipality may

(a) solicit and encourage the establishment and development of new, and the establishment, development and expansion of existing institutions, industries and businesses in and around the municipality;

(b) publicize the advantages of the municipality or any part of the municipality and the surrounding areas as a location for the establishment and expansion of institutions, industries and businesses;

(c) pay grants to a body corporate for the purpose of promoting the municipality or any part of the municipality and the surrounding areas as a location for institutions, industries and businesses;

(d) prepare and disseminate information about the municipality or any part of the municipality and the surrounding areas for the assistance of institutions, industries and businesses intending to locate or expand in the municipality or the surrounding area.
(2) A municipality shall not grant a tax concession or other form of direct financial assistance to a business or industry. *1998, c. 18, s. 57.*

**Regional libraries**

58 (1) A municipality may enter into and carry out agreements for providing regional libraries and other purposes pursuant to the Libraries Act.

(2) A regional municipality has the powers of a regional library board pursuant to the Libraries Act.

(3) Where a regional municipality provides library services directly, it is the regional library board for purpose of grants made pursuant to the Libraries Act. *1998, c. 18, s. 58.*

**Highway and housing agreements**

59 A municipality may enter into and carry out agreements

(a) for highway construction, improvement and maintenance and other purposes pursuant to the Public Highways Act;

(b) with

   (i) the Minister of Community Services or Canada Mortgage and Housing Corporation with respect to housing projects, or

   (ii) any body corporate or agency having similar objects to Canada Mortgage and Housing Corporation with respect to projects pursuant to the National Housing Act (Canada);

(c) with the Government of the Province with respect to the development, operation or maintenance of trails on land of Her Majesty in right of the Province. *1998, c. 18, s. 59; 2001, c. 35, s. 3.*

**Municipality and village service agreements**

60 (1) A municipality or a village may agree with one or more municipalities, villages, service commissions, the Government of the Province or of Canada or a department or agency of either of them or a band council pursuant to the Indian Act (Canada) to provide or administer municipal or village services.

(2) An agreement made by a municipality or village pursuant to subsection (1) may

(a) include any service provided by the municipality or village, as the case may be;
(b) include the provision of services within or outside the municipality or village, as the case may be;

(c) delegate the power to provide the service to a committee representing each of the participating municipalities and villages, to a district planning commission or to a party to the agreement.

(3) An agreement made by a municipality or village pursuant to subsection (1) may include

(a) a description of the services to be provided pursuant to the agreement;

(b) the area for which the services are to be provided;

(c) how and by whom the services are to be provided and administered;

(d) how the cost of the services, both capital and current, is to be paid, the proportions of the cost to be paid by each party to the agreement or a method of determining those proportions, when the respective shares of the cost are to be paid and a rate of interest payable in default of prompt payment;

(e) where the power to provide the service is delegated to a committee, whether the committee to which responsibility for the service is delegated is a separate body corporate, and the corporate powers that it may exercise;

(f) the ownership of any capital assets to be created under the agreement;

(g) provision for the disposition of a capital asset before or at the termination of the agreement;

(h) provision for the sharing of any liabilities before or at the termination of the agreement;

(i) provision for amending, reviewing or terminating the agreement;

(j) provision for resolving disputes among the parties to the agreement;

(k) such other terms and conditions as the parties to the agreement may determine.

(4) Where an agreement made by a municipality or village pursuant to subsection (1) creates a body corporate

(a) a copy of the agreement shall be filed with the Registrar of Joint Stock Companies; and

(b) the participating municipalities and villages may guarantee its borrowings. 1998, c. 18, s. 60; 2000, c. 9, s. 36; 2001, c. 35, s. 4.

Agreements
61 (1) A municipality or a village may agree with any person for the provision of a service or a capital facility that the municipality or village is authorized to provide.

(2) An agreement made pursuant to subsection (1) may allow for the lease, operation or maintenance of the facility or provision of the service by a person, including the sale or disposition to that person of property of the municipality or village that continues to be required for the purposes of the municipality or village, as the case may be. 1998, c. 18, s. 61.

Flag, symbol or coat-of-arms

62 (1) The council may, by policy, adopt a flag, symbol or coat of arms for the municipality.

(2) A flag, symbol or coat of arms adopted pursuant to this Section may be registered pursuant to an Act of Parliament in order to prevent its unauthorized use.

(3) No person, other than the municipality, shall use a flag, symbol or coat of arms of the municipality unless specifically authorized by the council and upon payment of any fee charged by the municipality for the use. 1998, c. 18, s. 62.

Municipal powers respecting trees

63 (1) A municipality may

(a) remove dead, dying or diseased trees on public and private property;

(b) recommend and encourage

(i) the proper pruning, protection and repair of privately owned trees in the municipality,

(ii) the planting of trees of suitable species at desirable sites within the municipality.

(2) A municipality shall not remove trees from private property unless the owner has granted written permission or an order requiring the removal of the tree has been issued.

(3) The council may, by policy, authorize its employees to enter upon land within the municipality to

(a) treat the trees on the land as approved and recommended by Forestry Canada;

(b) inspect the trees to determine whether they are in a diseased condition or damaged to the extent that they constitute a hazard to the safety of persons or property.

(4) The council may, by policy, authorize an employee to order an owner of land, within thirty days of service of a copy of the order, to remove a tree or limb that is, in the opinion of the employee, hazardous to persons or property or so affected by disease or insect infestation as to endanger the life and health of trees in the vicinity.
(5) An order to remove a tree or limb shall contain a description of the location of the tree or limb directed to be removed and a copy of the order shall be served upon the owner of the land.

(6) Where the owner fails to remove the tree or limb described in the order within thirty days of service of a copy of the order, a person authorized by the employee may enter upon the land upon which the tree or limb is situate, without warrant or other legal process, and remove the tree or limb.

(7) The actual cost of removal of the tree or limb pursuant to subsection (6) may be recovered as a debt from the owner of the land upon which it was located and is a first lien on the real property of the owner of the land and may be collected in the same manner as taxes.

(8) An owner may appeal an order requiring the removal of a tree or limb to the Supreme Court of Nova Scotia within seven days of service of the order on the owner and the giving of a notice of appeal acts as a stay of proceedings until the appeal has been determined.

(9) Upon an appeal pursuant to subsection (8), the Supreme Court of Nova Scotia may confirm, modify or set aside the order.

(10) A municipality is not liable for failure to remove a diseased or dangerous tree or limb from property, whether publicly or privately owned.

(11) A person who defaces, mutilates or cuts a tree upon property of a municipality without the written consent of the municipality is guilty of an offence, and is guilty of a separate offence for each tree defaced, mutilated or cut.

(12) A municipality may borrow for a term not exceeding ten years for the cost of a major tree removal program. 1998, c. 18, s. 63.

PART IV

FINANCE

Fiscal year

64 The fiscal year of a municipality begins on April 1 and ends on March 31 in the following year. 1998, c. 18, s. 64.

Power to expend money

65 The council may expend money required by the municipality for

(a) expenses of elections and plebiscites;

(b) premiums on an insurance policy for damage to property, personal injury or liability, including liability of members of the council or employees of the municipality, volunteer
members of fire departments, emergency services providers and volunteers in municipal programs;

(c) repayment of money borrowed by the municipality, the payment of interest on that money and payment of sinking funds;

(d) police services;

(e) providing an emergency response system;

(f) snow and ice removal;

(g) equipping and maintaining fire departments or emergency services providers;

(h) honoraria and training expenses for volunteer firefighters and emergency services volunteers;

(i) providing school crossing guards;

(j) emergency measures;

(k) recreational programs;

(l) advertising the opportunities of the municipality for business, industrial and tourism purposes and encouraging tourist traffic, with power to make a grant to a nonprofit society for this purpose;

(m) promotion and attraction of institutions, industries and businesses, the stabilization and expansion of employment opportunities and the economic development of the municipality;

(n) lighting any part of the municipality;

(o) public transportation services;

(p) preventing or decreasing flooding;

(q) collecting, removing, managing and disposing of solid waste;

(r) salaries, remuneration and expenses of the mayor or warden, councillors, officers and employees of the municipality;

(s) the reasonable expenses incurred by the mayor or warden or a councillor for attendance at meetings and conferences, if the permission of the council is obtained prior to the meeting or conference or the attendance is in accordance with a policy of the council;

(t) the contribution of the municipality to a pension or superannuation fund;
(u) where determined by the Board, payment to the Board of an assessment on a public utility owned or operated by the municipality;

(v) annual subscription fees of the Union of Nova Scotia Municipalities and other municipal or professional associations;

(w) public libraries;

(x) lands and buildings required for a municipal purpose;

(y) furnishing and equipping any municipal facility;

(z) acquisition of equipment, materials, vehicles, machinery, apparatus, implements and plant for a municipal purpose;

(aa) streets, culverts, retaining walls, sidewalks, curbs and gutters;

(aaa) private roads, culverts, retaining walls, sidewalks, curbs and gutters that are associated with private roads and are identified and approved for expenditure by the council;

(ab) placing underground the wiring and other parts of a system for the supply or distribution of electricity, gas, steam or other source of energy or a telecommunications system;

(ac) a system for the supply or distribution of electricity, gas, steam or other source of energy;

(ad) pounds;

(ae) a fire alarm system;

(af) ponds, reservoirs, brooks, canals and other means of accumulating or directing the flow of water to be used in extinguishing fires;

(ag) playgrounds, trails[,] including trails developed, operated or maintained pursuant to an agreement made under clause 59(c), bicycle paths, swimming pools, ice arenas and other recreational facilities;

(ah) public grounds, squares, halls, museums, parks, tourist information centres and community centres;

(ai) public markets;

(aj) property held by trustees for the use of the public;

(ak) wastewater facilities and stormwater systems;

(al) water systems;
(am) solid-waste management facilities;

(an) buildings for a medical centre to encourage medical doctors, dentists and other health professionals to locate in the municipality or a part of it;

(ao) industrial parks, incubator malls and land and other facilities for the encouragement of economic development;

(ap) parking lots and parking structures;

(aq) landing strips and airports;

(ar) wharves and public landings;

(as) carrying out an agreement with the Minister of Community Services, Canada Mortgage and Housing Corporation or a body corporate or agency made under clause 59(b);

(at) contributing to a hospital to which the Hospitals Act applies, with power to raise the amount as an area rate in the area or areas primarily served by the hospital and to borrow for capital grants;

(au) a grant or contribution to

   (i) a society within the meaning of the Children and Family Services Act,

   (ii) a mental health clinic in receipt of financial assistance from the Province,

   (iii) an exhibition held by an educational institution in the municipality,

   (iv) a club, association or exhibition within the meaning of the Agriculture and Marketing Act,

   (v) any charitable, nursing, medical, athletic, educational, environmental, cultural, community, fraternal, recreational, religious, sporting or social organization within the Province,

   (va) a day care licensed under the Day Care Act,

   (vi) a registered Canadian charitable organization,

and the municipality shall publish annually a list of the organizations and grants or contributions made pursuant to this clause in a newspaper circulating in the municipality;

(av) all other expenditures

   (i) authorized by this Act or another Act of the Legislature,
(ii) that are required to be made under a contract lawfully made by, or on behalf of, the municipality,

(iii) incurred in the due execution of the duties, powers and responsibilities by law vested in, or imposed upon, the municipality, its mayor or warden, council or officers. 1998, c. 18, s. 65; 2001, c. 35, s. 5; 2003, c. 9, s. 52; 2004, c. 7, s. 4; 2005, c. 9, s. 6.

Power to borrow money

66 (1) A municipality may borrow to carry out an authority to expend funds for capital purposes conferred by this Act or another Act of the Legislature.

(2) The authority to borrow and expend money conferred by this Section may be exercised in respect of any land, building or undertaking owned by the municipality, even if all or part of the land, building or undertaking is located in another municipality.

(3) Where a municipality or village enters into a joint undertaking with a municipality, village or service commission for a purpose for which it is authorized to borrow and expend money, it may borrow its portion of the cost of the undertaking irrespective of which party or inter-municipal corporation will own the undertaking.

(4) A municipality may borrow money

(a) with the approval of the Minister of Transportation and Public Works, to improve a street that is the property of Her Majesty in right of the Province;

(b) to pay and retire debentures;

(c) where a municipality is authorized by an Act of the Legislature to give a guarantee, to honour such a guarantee that it is called upon to pay;

(d) to carry out an agreement made pursuant to clause 59(c);

(da) to demolish a building or structure that is owned by the municipality;

(e) for the purpose of making a loan to a registered fire department or registered emergency services provider. 1998, c. 18, s. 66; 2001, c. 35, s. 6; 2004, c. 7, s. 5; 2005, c. 55, s. 1; 2008, c. 25, s. 1.

Expenditure for municipal purpose

67 Where an Act of the Legislature authorizes or directs a municipality to make an expenditure, enter into a contract or guarantee or take action as a result of which it may be required to pay money, the sums required are for the ordinary lawful purposes of the municipality. 1998, c. 18, s. 67.
Sharing of taxes or grants in lieu

68 A municipality may agree with another municipality to share taxes or grants in lieu of taxes paid or payable to the municipality. 1998, c. 18, s. 68.

Low income tax exemption policy

69 (1) In this Section and Section 70, "income" means a person's total income from all sources for the calendar year preceding the fiscal year of the municipality and, if so determined by the council, includes the income of all other members of the same family residing in the same household, but does not include an allowance paid pursuant to the War Veterans Allowance Act (Canada) or pension paid pursuant to the Pension Act (Canada).

(2) The council may, by policy,

(a) grant an exemption from taxation, in the amount or to the extent set out in the policy, for a person whose income is below the amount set out in the policy; and

(b) prescribe a scale of exemptions related to income.

(3) The council may provide that a person applying for an exemption pursuant to this Section shall make an affidavit or provide other proof confirming the person's income.

(4) The policy to grant an exemption from taxation may

(a) specify that the exemption only extends to persons who are residents of the municipality or property of a ratepayer occupied as the ratepayer's principal residence;

(b) provide that where a property is assessed to more than one person, any of them who is entitled to an exemption may receive only the portion of the exemption equal to that person's share of the total assessment for the property, but where the different interests are not separate, then to that portion determined by the treasurer, whose determination is final;

(c) specify a date, not less than thirty days after the filing of the assessment roll, after which no application for an exemption will be received. 1998, c. 18, s. 69; 2004, c. 7, s. 6.

Policy for reduction of taxes where destruction

69A (1) The council may, by policy, provide for the reduction, to the extent that the council considers appropriate, of the taxes payable with respect to a property if a building situate on the property has been destroyed or partially destroyed by fire, storm or otherwise and the assessment of the property does not reflect that the building has been destroyed or partially destroyed, and provide for the reimbursement of any overpayment resulting from the reduction.

(2) A policy adopted pursuant to subsection (1) may be made retroactive to April 1, 1999.
(3) Upon a request by the clerk, the Director of Assessment shall value the property for the purpose of a policy adopted pursuant to subsection (1) but, for greater certainty, shall not change the assessment of the property except in accordance with the Assessment Act. 2001, c. 14, s. 2.

**By-law for postponed payment of rates and taxes**

70 (1) The council may, by by-law, provide for the postponed payment of all, or a defined portion of, rates and taxes by persons whose income is below the amount set out in the by-law.

(2) A by-law passed pursuant to this Section

(a) applies only to the property of a person occupied by that person as the person's principal residence;

(b) may provide that taxes be postponed for a certain period, or until the death of the assessed owner or other specified contingency;

(c) may provide for the postponement of tax collection procedures for the current year;

(d) may prescribe the procedure for applying for the benefits of the by-law, including the required forms and affidavits;

(e) may provide for interest on the taxes postponed.

(3) A limitation period affecting a municipality's entitlement to collect postponed taxes does not begin until the period of postponement expires.

(4) Where a municipality provides that only a portion of the taxes due may be postponed and where the portion that is required to be paid is three years overdue, the period of postponement terminates thirty days after the treasurer notifies the person whose taxes have been postponed, unless the taxes that were not postponed are paid before the expiration of the thirty days.

(5) Except as otherwise provided by this Act or another Act of the Legislature, a council shall not relieve a taxpayer from all or a portion of taxes. 1998, c. 18, s. 70.

**Tax exemption policy for certain organizations**

71 (1) The council may, by policy, exempt from taxation, to the extent and under the conditions set out in the policy

(a) property

    (i) of a named registered Canadian charitable organization, and

    (ii) that is used directly and solely for a charitable purpose;
(b) property of a nonprofit community, charitable, fraternal, educational, recreational, religious, cultural or sporting organization if, in the opinion of the council, the organization provides a service that might otherwise be a responsibility of the council;

(c) and (d) repealed 2001, c. 14, s. 3.

(e) the buildings, pump stations, deep well pumps, main transmission lines, distribution lines, meters and associated plant and equipment of a municipal water utility.

(2) The council may, by policy, to the extent and under the conditions set out in the policy, provide that the tax payable with respect to all or part of the taxable commercial property of any nonprofit community, charitable, fraternal, educational, recreational, religious, cultural or sporting organization named in the policy be reduced to the tax that would otherwise be payable if the property were residential property, inclusive of area rates.

(3) A tax exemption or reduction pursuant to this Section shall be shown on the tax bill and accounted for by the municipality as an expenditure.

(4) The council may, in its discretion, refuse to grant an exemption or reduction pursuant to this Section and a policy made pursuant to this Section extends only to properties specifically named in the policy.

(5) An exemption given pursuant to this Section does not apply to area rates or the fire protection rate unless specified in the policy.

(6) A policy made pursuant to this Section has effect in the fiscal year following the fiscal year in which it is published, unless the policy sets a different effective date, including an effective date retroactive to the beginning of the current fiscal year. 1998, c. 18, s. 71; 2001, c. 14, s. 3; 2001, c. 35, s. 7; 2005, c. 9, s. 7; 2008, c. 25, s. 2.

Tax reduction by-law for day cares

71A (1) The council may, by by-law, to the extent and under the conditions set out in the by-law, provide that the tax payable with respect to all or part of the taxable commercial property of any day care licensed under the Day Care Act be reduced to the tax that would be payable if the property were residential property, including area rates.

(2) A by-law made pursuant to this Section may have an effective date retroactive to the beginning of the current fiscal year. 2004, c. 7, s. 7; 2005, c. 9, s. 8.

Business occupancy tax exemption by-law for day cares

71B The council may, by by-law, exempt any day care licensed under the Day Care Act from taxes payable in respect of business occupancy assessment. 2004, c. 7, s. 7.

Estimates of required sums
72 (1) The council shall make estimates of the sums that are required by the municipality for the fiscal year.

(2) The estimates shall include the probable revenue from all sources other than taxes for the fiscal year and make due allowance for

(a) the abatement and losses which might occur in the collection of the taxes; and

(b) taxes for the current fiscal year that might not be collected.

(3) The council shall include an allowance to provide for any variation in the total assessed value shown on the roll that might result from assessment appeals.

(4) The council shall include in its estimates the deficit from the preceding fiscal year.

(5) The council may include in its estimates an amount for

(a) contingencies and unforeseen expenses in matters on which it may vote and expend money;

(b) all or part of any surplus of previous fiscal years that will be available for the current fiscal year.

(6) The council shall authorize the levying and collecting of a

(a) commercial tax rate of so much on the dollar on the assessed value of taxable commercial property and business occupancy assessment; and

(b) residential tax rate of so much on the dollar on the assessed value of taxable residential property and resource property.

(6A) Notwithstanding clause (6)(a), the tax rate for the part of commercial property that is identified on the assessment roll as being occupied by a seasonal tourist business shall be 75% of the commercial tax rate.

(7) The tax rates shall be those which the council deems sufficient to raise the amount required to defray the estimated requirements of the municipality. 1998, c. 18, s. 72; 2005, c. 9, s. 9.

**Tax rates**

73 (1) Subject to subsection (2), a council may set separate commercial and residential tax rates for the area of the municipality determined by the council to be

(a) a rural area receiving a rural level of services;

(b) a suburban area receiving a suburban level of services; and
(c) an urban area receiving an urban level of services.

(2) The council of Halifax Regional Municipality shall set separate commercial and residential tax rates for the area of the Halifax Regional Municipality determined by the council to be

(a) a rural area receiving a rural level of services;

(b) a suburban area receiving a suburban level of services; and

(c) an urban area receiving an urban level of services. 1998, c. 18, s. 73.

Minimum tax

74 (1) The council may, by policy, prescribe a minimum tax per dwelling unit and the minimum tax may be set at different levels for different areas of the municipality.

(2) Where the tax rate applied to the assessment of a property is less than the minimum tax prescribed by the council, the owner of the property shall pay an additional tax equal to the difference between the tax rate applied to the assessment of the property and the minimum tax.

(3) The number of dwelling units in a property shall be determined by the Director of Assessment whose decision may be appealed to the Board. 1998, c. 18, s. 74.

Area rates and uniform charges

75 (1) The council may spend money in an area, or for the benefit of an area, for any purpose for which a municipality may expend funds or borrow.

(2) The council may recover annually from the area the amount required or as much of that sum as the council considers advisable to collect in any one fiscal year by an area rate of so much on the dollar on the assessed value of the taxable property or occupancy assessments in the area.

(3) The council may provide

(a) a subsidy for an area rate from the general rate in the amount or proportion approved by the council;

(b) in the resolution setting the area rate, that the area rate applies only to the assessed value of one or more of the taxable commercial, residential or resource property and occupancy assessments in the area.

(4) The council may, in lieu of levying an area rate, levy a uniform charge on each

(a) taxable property assessment;

(b) dwelling unit,
in the area.

(5) Charges pursuant to subsection (4) are first liens on the real property and may be collected in the same manner as taxes.

(6) A council may expend money within an area for any lawful purpose and may raise all, or part of it, by a general rate on the whole municipality.

(7) The area rate referred to in this Section may be different on commercial property and business occupancy assessments than on residential and resource property. *1998, c. 18, s. 75; 2005, c. 9, s. 10.*

### Recreational property tax

76 (1) An owner of land to which Section 29 of the Assessment Act applies shall annually pay to the municipality in which the land is situate a tax, to be known as a recreational property tax, equal to five dollars per acre, or part of an acre, for all of the land assessed as recreational property.

(2) The recreational property tax applies for the municipal taxation year 1977, and the amount of the tax per acre is increased by five per cent per year for each subsequent municipal taxation year, unless altered pursuant to subsection (3).

(3) The Governor in Council may, by regulation, determine the amount of the tax per acre for the recreational property tax.

(4) In the event that any land, or any part thereof, to which this Section applies ceases to be land used directly and solely for the purposes of a non-profit community, charitable, fraternal, educational, recreational, religious, cultural or sporting organization or institution a change in use tax equal to fifty per cent of the value, determined by the assessor pursuant to the Assessment Act, of the land or part thereof to which this Section ceased to apply, is due and payable to the municipality in which the land is situate by the person determined by the assessor to be responsible for the change in use, unless the land becomes farm property, in which case no change in use tax is payable. *1998, c. 18, s. 76.*

### Grant respecting conservation property

76A (1) The Minister of Environment shall in each year pay to the municipality in which conservation property exempt from taxation is situate a grant equal to the amount that would have been due and payable to the municipality had each conservation property in the municipality continued to be classified as it was immediately before becoming conservation property.

(2) Notwithstanding anything in this Act or any other Act of the Legislature authorizing a tax on the assessed value of property, no change in use tax is payable by reason of a property becoming conservation property.
(3) Where any land, or part thereof, to which this Section applies, ceases to be conservation property, a change in use tax, determined by the assessor pursuant to the Assessment Act, equal to twenty per cent of the value of the land, or part thereof, that ceased to be conservation property is due and payable to the municipality in which the land is situate by the person determined by the assessor to have been responsible for the change in use.

(4) Notwithstanding subsection (3), no change in use tax is payable by reason of the ownership of conservation property being transferred to Her Majesty in right of the Province or Canada or to a municipality. 2008, c. 36, s. 5.

Farm property

77 (1) The Minister shall in each year pay to the municipality in which farm property exempt from taxation is situate a grant equal to $2.10 per acre in respect of the land.

(2) For the fiscal year ending March 31, 2001, and for each subsequent fiscal year, the Minister shall pay to the municipality in which the land is situate a grant per acre equal to the grant paid for the immediately preceding fiscal year varied by the same percentage as the variation in the cost of living over the immediately preceding calendar year as measured by the change in the Consumer Price Index for Canada prepared by Statistics Canada.

(3) Where any land, or part thereof, to which this Section applies ceases to be farm property, a change in use tax, determined by the assessor pursuant to the Assessment Act, equal to twenty per cent of the value of the land, or part thereof, that ceased to be farm property is due and payable to the municipality in which the land is situate by the person determined by the assessor to have been responsible for the change in use, unless the land, or part thereof, becomes forest property bona fide used or intended to be used for forestry purposes, in which case no change in use tax is payable.

(4) Subject to subsections (5), (6) and (7), an owner of farm property may

(a) transfer to each of the owner's father, mother, brother, sister, son, daughter, grandson, granddaughter or spouse; or

(b) convey, reserve to or set aside for the owner,

one lot suitable for the erection of a single family dwelling and the

(c) lot shall not exceed one acre or the minimum size required by any applicable law, whichever is larger; and

(d) change in use tax is not payable if the land ceases to be used for agricultural purposes.

(5) For the purpose of subsections (6) and (7), "transfer" includes conveyance, reservation to and setting aside for.
(6) The change in use tax is payable by the transferee of land referred to in subsection (4) in accordance with this Section if, within seven years of the date of the transfer, the owner of the lot, grantee of the lot or person for whom the lot is reserved or set aside transfers the lot to any person other than a father, mother, brother, sister, son, daughter, grandson, granddaughter or spouse of the owner or to the owner, then the change in use tax is payable by the transferor in accordance with this Section.

(7) Subsections (4) to (6) do not apply to a transfer of land unless the grantor or person reserving or setting aside the land files, in the registry, a statutory declaration that the grantee of the land or person for whom the land is reserved or set aside, as the case may be, is a person named in subsection (4). 1998, c. 18, s. 77; 2000, c. 9, s. 37.

Forest property tax

78 (1) In lieu of all rates and taxes of the municipality, an owner of forest property bona fide used or intended to be used for forestry purposes shall annually pay a tax, to be known as a forest property tax, equal to

(a) twenty-five cents per acre, if the forest property is classified as resource property; and

(b) forty cents per acre, if the forest property is classified as commercial property,

and, where an area, village or commission rate is levied for fire protection, the owner is liable to pay an additional annual tax not exceeding one cent per acre, as the authority levying the area, village or commission rate determines.

(2) Where any land, or part thereof, to which this Section applies, ceases to be land used for forestry purposes, a change in use tax, determined by the assessor pursuant to the Assessment Act, equal to twenty per cent of the value of the land, or part thereof, that ceased to be used for forestry purposes is due and payable to the municipality in which the land is situate by the person determined by the assessor to have been responsible for the change in use, unless the land, or part thereof, is used for agricultural purposes, in which case no change in use tax is payable.

(3) Subject to subsections (4), (5) and (6), an owner of forest land may transfer to each father, mother, brother, sister, son, daughter, grandson, granddaughter or spouse or may convey or reserve to or set aside for the owner one lot suitable for the erection of a single family dwelling, and the change in use tax is not payable if the land ceases to be used for forestry purposes.

(4) A lot referred to in subsection (3) shall not exceed one acre or the minimum size required by any applicable law, whichever is larger.

(5) If, within seven years of the date of the transfer, conveyance or reservation to or setting aside for the owner of a lot referred to in subsection (3), the grantee of the lot or person for whom the lot is reserved or set aside transfers the lot to any person other than a father, mother, brother, sister, son, daughter, grandson, granddaughter or spouse of the owner referred to in subsection
(3) or to the owner, then the change in use tax is payable by the transferor in accordance with this Section.

(6) Subsections (3) to (5) do not apply to any transfer, conveyance, reservation or setting aside of lands unless the grantor or person reserving or setting aside the land files, in the registry, a statutory declaration that the grantee of the land or person for whom the land is reserved or set aside, as the case may be, is a person named in subsection (3). 1998, c. 18, s. 78.

**Commercial rent increase where tax increase**

78A (1) Notwithstanding any provision in a lease, licence or permit for commercial property that is in existence at the time of the coming into force of this Section, where that lease, licence or permit does not include a provision enabling the owner of the property to increase the rent or require an annual deposit in relation to any increase in property tax payable by the owner, that lease, licence or permit is deemed to include such a clause.

(2) Where a deposit is required or the rent is increased under subsection (1), the owner shall give the tenant notice in writing not later than ninety days before the deposit is required or the rent is increased.

(3) Notice under subsection (2) may be provided by

(a) giving it to the tenant personally;

(b) giving it to an agent or employee of a tenant on the premises;

(c) posting it in a conspicuous place in some part of the premises; or

(d) sending it to the tenant by registered mail, in which case notice is deemed to have been given on the third day after the date of mailing. 2005, c. 9, s. 11.

**User charges**

79 Subject to the approval of the Board for those services that are subject to the Public Utilities Act, the council may, by by-law, prescribe charges for the provision of services for persons who use or benefit from the service, on a basis to be set out in the by-law. 1998, c. 18, s. 79.

**Fire protection rate**

80 (1) The council may levy a rate on the value of all assessable property and business occupancy assessment in the area served by a water system in the municipality, as defined by the council by policy, in order to recover that part of the cost of the water system that is attributable to fire protection.

(2) No property, except property of Her Majesty in right of the Province, in the area served by the water system as defined by policy is exempt from the rate, unless exempted by by-law.
(3) The rate is a first lien on the real property and may be collected in the same manner as taxes.

(4) The rate referred to in subsection (1) may be different for commercial property and business occupancy assessments than for residential and resource property. 1998, c. 18, s. 80; 2001, c. 35, s. 8; 2005, c. 9, s. 12.

By-law regarding payment of charges

81 (1) The council may make by-laws imposing, fixing and providing methods of enforcing payment of charges for

(a) wastewater facilities or stormwater systems, the use of wastewater facilities or stormwater systems and connecting to wastewater facilities or stormwater systems;

(b) expenditures incurred for the wastewater management system in a wastewater management district;

(ba) solid-waste management facilities;

(bc) transit facilities;

(c) the municipal portion of the capital cost of installing a water system;

(d) laying out, opening, constructing, repairing, improving and maintaining streets, curbs, sidewalks, gutters, bridges, culverts and retaining walls, whether the cost is incurred by the municipality directly or by, or pursuant to, an agreement with Her Majesty in right of the Province, the Minister of Transportation and Public Works or any person;

(da) laying out, opening, constructing, repairing, improving and maintaining private roads, curbs, sidewalks, gutters, bridges, culverts and retaining walls that are associated with private roads, where the cost is incurred

   (i) by the municipality, or

   (ii) under an agreement between the municipality and a person;

(e) the municipal portion of the cost of a major tree removal program or the cost of removing trees from a private property;

(f) the municipal portion of the capital cost of placing the wiring and other parts of an electrical distribution system underground;

(g) depositing in a special purpose tax account to provide for future expenditures for wastewater facilities, stormwater systems, water systems, transit facilities or other anticipated capital requirements.
(2) The council may, by by-law

(a) define classes of buildings to be erected or enlarged according to the varying loads that, in the opinion of council, the buildings impose or may impose on the sewer system or wastewater facility and levy a one-time redevelopment charge to pay for additional or trunk sanitary or storm sewer capacity or additional wastewater facility capacity required to accommodate the effluent from the buildings;

(b) impose a one-time oversized sewer charge on each property determined by the council to benefit from a sewer in the future to recover the cost of making the sewer an oversized sewer and provide that the oversized sewer charge is not payable until the property is serviced by a sanitary sewer or a storm sewer;

(c) levy a one-time storm drainage charge on the owner of each lot of land in a drainage management area for which an application is made for a development permit to allow, on the lot, a development of a class designated by the council in the by-law.

(3) A by-law passed pursuant to this Section may provide

(a) that the charges fixed by, or determined pursuant to, the by-law may be chargeable in proportion to frontage, in proportion to area, in proportion to the assessment of the respective properties fronting on the street or according to another plan or method set out in the by-law;

(b) that the charges may be made and collected only where

   (i) the persons owning more than fifty per cent of the frontage of the real property fronting on the street or the portion of a street on which the work is performed, or

   (ii) the persons as determined by the method set out in the by-law,

have filed with the clerk a petition requesting that the work be performed;

(c) that the charges may be different for different classes of development and may be different in different areas of the municipality;

(d) when the charges are payable;

(e) for the total or partial exemption of persons and land from the charge and for adjustments to be made with respect to lots of land or developments where the proposals or applications change in order to reflect the changing nature of lots or developments;

(f) that the charges are first liens on the real property and may be collected in the same manner as other taxes;

(g) that the charges be collectable in the same manner as taxes and, at the option of the treasurer, be collectable at the same time, and by the same proceedings, as taxes;
(h) a means of determining when the lien becomes effective or when the charges become due and payable;

(i) that the amount payable may, at the option of the owner of the property, be paid in the number of annual installments set out in the by-law and, upon default of payment of any installment, the balance becomes due and payable; and

(j) that interest is payable annually on the entire amount outstanding and unpaid, whether or not the owner has elected to pay by installments, at a rate and beginning on a date fixed by the by-law.

(4) For greater certainty, no property is exempt from a charge levied pursuant to this Section except property of Her Majesty in right of the Province.

(5) A municipality may install the wastewater facilities, stormwater system, water system and system for the supply or distribution of gas, steam or other source of energy of the municipality outside its boundaries and may enter into contracts to provide the services.

(6) A municipality may charge for services provided outside the municipality in the same manner in which the service is charged for within the municipality, provided that rates that are subject to the approval of the Board are approved by the Board.

(7) Notwithstanding the Public Utilities Act and for greater certainty, any by-law made pursuant to this Section and any charge imposed or fixed pursuant to this Section do not require approval by the Board. 1998, c. 18, s. 81; 2001, c. 35, s. 9; 2004, c. 7, s. 8; 2006, c. 40, s. 4.

Interest payable

82 Interest is payable on unpaid taxes and charges levied pursuant to this Part at the same rate as for other outstanding taxes. 1998, c. 18, s. 82.

Special purpose tax accounts

83 (1) All sums raised by a special purpose tax shall be credited to the account for that tax.

(2) The council may withdraw money from a special purpose tax account for an expenditure on a purpose for which the account was established.

(3) The council may, if the balance in a special purpose tax account exceeds the funds required for the purpose for which the special purpose tax account was established, return the surplus to the contributors.

(4) The council, by resolution passed by at least a two thirds majority, may withdraw money from a special purpose tax account for any purpose for which the municipality may expend funds if the council
(a) first holds a public hearing respecting the withdrawal;

(b) advertises the public hearing at least twice in a newspaper circulating in the municipality, the first notice to appear at least fourteen days before the hearing, and includes in the notice of the public hearing the date, time and place of the hearing and the purpose of the withdrawal.

(5) The council may borrow from a special purpose tax account by resolution if the resolution prescribes the terms of repayment, including interest, at a rate not less than the interest rate that the municipality would pay to borrow the funds for a similar term from another source. 1998, c. 18, s. 83.

Borrowing limits

84 A municipality may borrow to cover the annual current expenditure of the municipality that has been authorized by the council, but the borrowing shall not exceed fifty per cent of the combined total of the taxes levied by the municipality for the previous fiscal year and the amounts received, or to be received, by the municipality from Her Majesty in right of Canada or in right of the Province or from an agency of Her Majesty. 1998, c. 18, s. 84.

Borrowing for village or service commission

85 (1) A municipality within which all or part of a village or service commission lies may borrow money and pay it to the village or service commission for any of the purposes for which the commission has authority to expend money.

(2) A municipality may lend money to a village or service commission with interest at the rate, and on the terms, agreed upon.

(3) Where the municipality collects the taxes on behalf of the village or service commission, unless some other agreement is made, the municipality shall deduct each fiscal year the amounts required to pay interest and repay principal on the loans from the amounts otherwise payable.

(4) Where a village or service commission defaults in either principal or interest, the municipality shall recover the amounts in default by an area rate levied on the assessed value of the taxable property and occupancy assessment in the area of the village or service commission and shall immediately notify the Minister of the default.

(5) The area rate referred to in subsection (4) may be different for commercial property and business occupancy assessments than for residential and resource property. 1998, c. 18, s. 85; 2005, c. 9, s. 13.

Minister may establish borrowing limits

86 (1) The Minister may in each fiscal year, establish borrowing limits for a municipality, village or service commission.
Where borrowing limits are established, a municipality, village or service commission may not borrow money pursuant to this Act or another Act of the Legislature, unless the proposed borrowing is within the limits established.

Subsections (1) and (2) do not apply to borrowing for the purpose of defraying part of the annual current expenditure of a municipality, village or service commission. 1998, c. 18, s. 86.

Capital budget filing

The Minister shall not establish borrowing limits or approve a borrowing resolution for a municipality, village or service commission in a fiscal year unless the municipality, village or service commission, as the case may be, has filed with the Minister its capital budget for that fiscal year in the form prescribed by the Minister. 1998, c. 18, s. 87.

Ministerial approval

No money shall be borrowed by a municipality, village, committee created by an intermunicipal services agreement or service commission pursuant to the provisions of this Act or another Act of the Legislature until the proposed borrowing has been approved by the Minister.

Subsection (1) and subsection 438(2) do not apply to a borrowing for the purpose of defraying part of the annual current expenditure of a municipality, village or service commission.

A guarantee by, or on behalf of, a municipality, village or service commission of a borrowing or debenture is not effective unless the Minister has approved of the proposed guarantee.

A municipality may enter into a lease, lease-purchase or other commitment to pay money over a period extending beyond the end of the current fiscal year, provided that where the total commitment exceeds one hundred thousand dollars, the proposed commitment has been approved by the Minister.

Subsection (4) does not apply to an employment contract or collective agreement. 1998, c. 18, s. 88; 2000, c. 9, s. 39; 2001, c. 35, s. 10.

Guarantee payment of debentures

A county or district municipality may, subject to the approval of the Minister, guarantee the payment of the principal and interest of debentures of a village situate wholly or partly within it. 1998, c. 18, s. 89.

Village or service commission borrowing

No money shall be borrowed by a village or service commission under the provisions of this Act or another Act of the Legislature until the commission obtains the approval of the electors for the proposed borrowing at a public meeting called by advertisement placed in a
newspaper circulating in the area of the village or service commission, and posted in not less than two conspicuous places within the area, the advertisements to appear at least fourteen days before the date set for the meeting.

(2) Subsection (1) does not apply to a borrowing

(a) to pay and retire, at maturity, debentures of the village or service commission; or

(b) for the purpose of defraying the annual current expenditure of the village or service commission, if the aggregate borrowing for the fiscal year does not, at any time, exceed one half of the total amount of taxes levied for the current fiscal year. 1998, c. 18, s. 90.

Approved borrowing requirements

91 (1) Where a municipality is authorized to borrow money, subject to the approval of the Minister

(a) the sum shall be borrowed by the issue and sale of debentures, in one sum or by installments, as determined by the council; and

(b) the council shall determine

(i) the amount and term of, and the rate of interest on, each debenture,

(ii) when the interest on a debenture is to be paid, and

(iii) where the principal and interest on a debenture are to be paid.

(2) In accordance with the Municipal Finance Corporation Act, the mayor or warden and clerk or the persons designated by the council, by policy, shall sell and deliver the debentures on behalf of the municipality at the price, in the sums and in the manner they deem proper.

(3) The mayor or warden and clerk or the persons designated by the council, by policy, may

(a) change the sums of the debentures at any time from the amounts determined by the council, provided that the total principal amount payable in any one fiscal year is not changed;

(b) before the debentures are sold, reduce the rate of interest from that determined by the council;

(c) exchange debentures, provided the rate of interest is not increased and the total principal amount payable in any one fiscal year is not changed. 1998, c. 18, s. 91.

Debenture postponement
92 (1) Where a municipality is authorized to borrow money, the municipality may, with the approval of the Minister, postpone the issue of debentures and borrow the money on terms and conditions agreed upon with the lender.

(2) Money borrowed without the issue of debentures shall be repaid within one year after the resolution is approved by the Minister, unless the Minister approves an extension of the repayment period or a repayment period not exceeding ten years. 1998, c. 18, s. 92.

**Debenture records**

93 The treasurer shall keep a record of all debentures of the municipality. 1998, c. 18, s. 93.

**Form of debenture**

94 (1) A debenture shall be

(a) in the form approved by the council; and

(b) signed by the mayor or warden and clerk or the persons designated by the council, by policy, and sealed with the municipal seal.

(2) Interest coupons shall be signed by the clerk or the person designated by the council, by policy, or bear a printed facsimile of the clerk's signature.

(3) A right to call in and redeem a debenture prior to maturity shall be set out on the face of the debenture. 1998, c. 18, s. 94.

**Debenture payment requirements**

95 (1) A debenture may be

(a) payable to bearer;

(b) registered as to principal only; or

(c) registered as to principal and interest,

as determined by the council and the debenture shall state whether it is payable to bearer, registered as to principal or as to principal and interest.

(2) Where a debenture is

(a) payable to bearer, it is negotiable and transferable by delivery;
(b) registered, the council shall appoint a registrar of debentures who shall keep a register of the debentures and the debenture is transferable by the registered owner by entry in the register and endorsement of the entry on the debenture.

(3) Interest coupons are transferable by delivery, unless the debenture is registered as to both principal and interest, in which case the interest is payable only to the registered holder of the debenture. *1998, c. 18, s. 95.*

**Debenture certificate**

96 (1) Every debenture of a municipality shall bear a certificate of the Deputy Minister to the effect that the debenture is valid and binding according to its terms, and the validity of every debenture is not open to question in any court in the Province.

(2) The certificate required pursuant to subsection (1), when signed by the Deputy Minister, is conclusive evidence that

(a) the municipality had authority to issue the debenture;

(b) the debenture was lawfully issued;

(c) the debenture is valid and binding on the municipality according to its terms; and

(d) the validity of the debenture is not open to question in any court in the Province.

(3) The Deputy Minister may sign the certificate if the Deputy Minister is of the opinion that the municipality has substantially complied with the provisions of the statutes pursuant to which the debentures are issued.

(4) The signature of the Deputy Minister may be reproduced by mechanical means.

(5) Non-compliance with this Act does not invalidate an irregular or informal debenture and the holder of such a debenture may, on an ex parte application, obtain from a judge of the Supreme Court of Nova Scotia an order requiring the issuance of a new and proper debenture in replacement of the irregular or informal debenture. *1998, c. 18, s. 96.*

**Debenture a municipal lien**

97 The principal and interest of a debenture are a lien and charge on all assets of the municipality. *1998, c. 18, s. 97.*

**Debenture sinking fund**

98 (1) When a municipality issues debentures, the municipality may provide for a sinking fund for the debentures.
(2) The municipality shall annually pay into the sinking fund an amount that the council considers sufficient to provide for the repayment of the debentures when they fall due.

(3) The Minister may require a municipality to establish a sinking fund for any issue of debentures and may specify the annual amount to be paid into it.

(4) A premium realized from the sale of debentures shall be paid into the sinking fund, but if there is no sinking fund the premium may be used for any purpose for which a municipality may borrow money.

(5) Except as provided in this Section, no part of a sinking fund or interest on it shall be used for any purpose but paying the principal of the debentures for which the fund was provided.

(6) The Minister may permit a municipality to cease paying into the sinking fund if the Minister determines that the amount in the sinking fund will be sufficient to provide for the payment of the debentures for which the fund was provided.

(7) The Minister may permit a municipality to withdraw from a sinking fund an amount not exceeding the amount by which the sinking fund exceeds the amount of the debentures for which the fund was provided.

(8) Any surplus remaining in a sinking fund after the debentures for which the fund was provided have been repaid shall be transferred to the municipality's capital reserve fund. 1998, c. 18, s. 98.

**Capital reserve fund**

99 (1) A municipality shall maintain a capital reserve fund.

(2) The capital reserve section of a special reserve fund in existence, on the coming into force of this Act, is a capital reserve fund.

(3) The capital reserve fund includes

(a) funds received from the sale of property;

(b) the proceeds of insurance resulting from loss or damage of property that is not used for replacement, repair or reconstruction of the property;

(c) any surplus remaining from the sale of debentures that is not used for the purpose for which the debentures were issued;

(d) the surplus remaining in a sinking fund when the debentures for which it was established are repaid;

(e) any capital grant not expended in the year in which it was paid;
(f) proceeds received from the winding up of a municipal enterprise as defined in the Municipal Finance Corporation Act;

(g) the current fiscal year's accrual for landfill closure and post closure costs; and

(h) amounts transferred to the fund by the council.

(4) A withdrawal from the capital reserve fund shall be authorized by a council, by resolution, and may only be used for

(a) capital expenditures for which the municipality may borrow;

(b) repayment of the principal portion of capital debt; and

(c) landfill closure and post closure costs.

(5) The council may borrow from a capital reserve fund, by resolution, if the resolution prescribes the terms of repayment, including interest, at a rate not less than the interest rate that the municipality would pay to borrow the funds for a similar term from another source.

(6) A municipality may maintain other reserve funds for such purposes as the council may determine. 1998, c. 18, s. 99.

Investment of funds

100 (1) Funds in a sinking fund, capital reserve fund, utility depreciation fund or other fund of a municipality shall be

(a) deposited in an interest bearing account at a bank doing business in the Province;

(b) invested pursuant to an investment policy adopted by the council and approved by the Minister; or

(c) invested in investments in which a trustee is permitted to invest pursuant to the Trustee Act.

(2) Income arising from the investment of a fund is part of that fund unless the council otherwise provides.

(3) The council may pledge any investments to the credit of the capital reserve fund as collateral security for a borrowing for a capital purpose. 1998, c. 18, s. 100.

PART V

DEED TRANSFERS

Deed transfer affidavit
101 (1) Notwithstanding the Registry Act, the registrar of deeds shall not accept for registration a deed

(a) where the property, or any part thereof, is situate within a municipality that levies a deed transfer tax, unless it is accompanied by the affidavit required pursuant to this Part and a certificate issued by the treasurer stating that the deed transfer tax has been paid in full or that no deed transfer tax is payable;

(b) where the whole of the property is situate within a municipality that does not levy a deed transfer tax, unless it is accompanied by the affidavit required pursuant to this Part.

(2) The grantee shall file an affidavit made by the grantee or by someone having full knowledge of the facts setting out

(a) the names of the parties;

(b) the location of the property;

(c) the sale price of the property with full details of the consideration, including the amount of any lien or encumbrance subject to which the transfer was made; and

(d) any other information prescribed by the Minister.

(3) The affidavit shall be filed within ten days of the transfer.

(4) Where the affidavit is not made by the grantee, it shall state that the person making it has personal knowledge of the facts stated therein.

(5) Where the affidavit is made by a person other than the grantee, that person is personally liable, jointly and severally, with the grantee for payment of any deed transfer tax.

(6) Where the grantee claims exemption from the deed transfer tax, the affidavit shall set out the facts on which the grantee claims to be exempt and, in the case of a registered Canadian charitable organization, shall give the number of its registration pursuant to the Income Tax Act (Canada).

(7) Where it appears from the face of the certificates of execution that a deed was executed prior to the time that a municipality imposed a deed transfer tax and it is not practical to ascertain from any of the parties to the deed particulars of the sale price of the property, the affidavit may set out those facts in lieu of the sale price.

(8) Where the municipality levies a deed transfer tax, the affidavit shall be filed with the treasurer and where the municipality does not levy a deed transfer tax, the affidavit shall be filed in the registries for every registration district within which a part of the property is situate.

(9) The affidavit shall be in the form, and contain the information, prescribed by the Minister.
(10) The exercise by the Minister of the authority contained in subsection (9) is regulations within the meaning of the Regulations Act.

(11) Notwithstanding subsection (2), the treasurer may require that the affidavit be filed electronically.

(12) Notwithstanding subsection (2), the registrar may require that the affidavit or the affidavit and certificate, as the case may be, be filed electronically.

(13) An affidavit, including all signatures and the certificate of execution that is filed electronically, is deemed to be the original affidavit for all purposes.

(14) Where there is a difference between a copy of an affidavit that is filed electronically and one that is filed in writing, the copy that is filed electronically is deemed to be the original, even if the written copy contains an original signature of a party or witness.

(15) An affidavit or certificate filed electronically has the same legal effect as an affidavit or certificate filed in writing.

(16) An affidavit or certificate filed electronically that is certified as a true copy by the treasurer or registrar is admissible in court in the same manner as the original.

(17) Every person who makes an affidavit that contains a false statement is guilty of an offence. 1998, c. 18, s. 101; 2005, c. 55, s. 2.

Deed transfer tax by-law

102 (1) A council may determine, by by-law, that a deed transfer tax applies in the municipality and the rate of the deed transfer tax, but the rate of the deed transfer tax shall not exceed one and one half per cent of the value of the property transferred.

(2) A deed transfer tax applies to the sale price of every property that is transferred by deed. 1998, c. 18, s. 102.

Apportionment of deed transfer tax

103 Where only part of a property is within a municipality, the deed transfer tax applies to that part of the value that is apportioned by the Director of Assessment to the part of the property within the municipality, and the decision of the Director of Assessment on such apportionment is final. 1998, c. 18, s. 103.

Deed transfer tax payment

104 The deed transfer tax shall be paid by the grantee named in the deed within ten days of the transfer. 1998, c. 18, s. 104.
Incorrect property sale price

105 (1) Where the treasurer is not satisfied that the affidavit sets out the correct sale price or is not able to determine the sale price from the affidavit, the treasurer may refuse to accept the affidavit and issue the certificate and shall so advise the grantee.

(2) The grantee may either tender a revised affidavit or may tender the affidavit to the regional assessment appeal court that has jurisdiction over the assessment appeal region that includes the municipality.

(3) The regional assessment appeal court shall proceed to determine the sale price and for that purpose may examine persons on oath.

(4) The determination of the regional assessment appeal court is final. 1998, c. 18, s. 105; 2005, c. 55, s. 3.

Treasurer to endorse deed

106 Where the municipality levies a deed transfer tax, the treasurer shall issue in writing, or electronically, a certificate stating that, as computed from the affidavit filed, the deed transfer tax is paid in full or no deed transfer tax is payable. 1998, c. 18, s. 106; 2005, c. 55, s. 4.

Interest on deed transfer tax

107 Where the grantee does not pay the deed transfer tax when due, the grantee shall pay interest at the rate determined by the council, by policy, until paid, beginning ten days after the transfer and shall pay an additional penalty of ten per cent on any deed transfer tax that remains unpaid after thirty days from the transfer. 1998, c. 18, s. 107.

Deed transfer tax is a lien

108 (1) The deed transfer tax, with interest and penalty, is a lien upon the property transferred.

(2) The lien attaches on the date when the deed transfer tax is due and may be collected in the same manner as taxes.

(3) The tax is a first lien on the real property and may be collected in the same manner as taxes. 1998, c. 18, s. 108.

Deed transfer tax exemptions

109 (1) Where a deed transfers property

(a) between persons married to one another;

(aa) to a municipality;
(b) between persons formerly married to one another, if the transfer is for the purpose of division of marital assets; or

(c) by way of gift, notwithstanding that

   (i) the deed transfers property subject to an encumbrance, including a mortgage or a tax lien, and the grantee assumes the amount of the encumbrance, including interest and expenses, or

   (ii) there is a nominal consideration therefor,

it is exempt from deed transfer tax.

(2) Where

(a) a deed merely confirms, corrects, modifies or supplements a deed previously given;

(b) there is no consideration beyond one dollar; and

(c) the deed does not include more property than the deed previously given,

it is exempt from deed transfer tax.

(3) A deed from the Nova Scotia Farm Loan Board to a borrower under the Agriculture and Rural Credit Act is not subject to deed transfer tax.

(4) A deed given pursuant to a tax sale is not subject to deed transfer tax.

(5) A deed is not subject to deed transfer tax if the certificates of execution for the deed show, on their face, that they were signed by the official prior to the date on which the municipality adopted a deed transfer tax.

(6) A deed which transfers property pursuant to an agreement of purchase and sale entered into prior to the date on which the municipality adopted a deed transfer tax, is not subject to deed transfer tax.

(7) Where the grantee is a registered Canadian charitable organization, a deed is exempt from the deed transfer tax if the property is not to be used for any commercial, industrial, rental or other business purpose and if an officer of the grantee makes and files an affidavit to that effect.

(8) Notwithstanding subsection (7), where, within three years after the filing of the affidavit, the property is used by the grantee for a commercial, industrial, rental or other business purpose or is sold or conveyed by the grantee, the treasurer shall compute the deed transfer tax for which the grantee would have been liable if the grantee had not been a registered Canadian charitable organization and the grantee is liable to pay the amount of the tax and interest on it at the rate of
ten per cent per annum computed from the date of the deed referred to in subsection (7). 1998, c. 18, s. 109; 2000, c. 9, s. 41; 2003, c. 9, s. 53.

Registrar of Deeds as agent and collector

110 Where the council and the Minister agree that the Registrar of Deeds is to be the municipality's agent and collector of the deed transfer tax, the Registrar is the municipality's agent and collector and has all of the powers of the treasurer pursuant to this Part. 1998, c. 18, s. 110.

PART VI
TAX COLLECTION

Payment of taxes

111 (1) The council may determine

(a) the due date for taxes;

(b) that taxes are payable in one sum or by installments.

(2) Where a council has not set a due date for payment of taxes, taxes are due and payable as soon as the tax rate is set.

(3) Where payment of taxes by installments is authorized, the council may provide that in default of payment of an installment when due, the balance of taxes outstanding are immediately due and payable. 1998, c. 18, s. 111.

Payment of taxes by installments

112 (1) The council may, by policy, provide for the payment of taxes by installments before the tax rate is set.

(2) The policy shall set out the date or dates on which the installments are due and the manner in which the amount of each installment is calculated.

(3) Each installment shall be payable by the person assessed for the property for the current fiscal year.

(4) The amount of each installment shall bear interest, beginning on the date on which it falls due, at the same rate of interest determined for overdue taxes.

(5) Installments paid shall be applied in part payment of the taxes on that property for the current fiscal year. 1998, c. 18, s. 112.
Incentives and interest

113 (1) The council may provide incentives for the early payment of taxes.

(2) The council may impose interest, at a rate determined from time to time by policy, for non-payment of taxes when due.

(3) Interest shall be added to the unpaid taxes and shall be collected as if the interest originally formed part of the unpaid taxes.

(4) Interest shall be calculated according to the length of default in payment.

(5) The council may provide that interest be compounded, not more frequently than monthly.

(6) The council may provide that interest shall be calculated from the date the tax rate is set if taxes are not paid within thirty days of the due date.

(7) The council may adopt a formula by which, and the time when, the rate of interest on overdue taxes is automatically adjusted.

(8) Unless the council otherwise provides, incentives shall be allowed and interest charged on area rates and rates collected for any other body at the same rates and under the same terms and conditions as the council has provided for its own taxes. 1998, c. 18, s. 113.

Taxes paid in error or overpaid

113A (1) The Governor in Council may make regulations respecting taxes paid in error or overpaid and, without limiting the generality of the foregoing, may make regulations

(a) requiring a municipality to refund taxes paid in error or overpaid;

(b) limiting the time for applying for a refund;

(c) respecting the payment of interest.

(2) The exercise by the Governor in Council of the authority contained in subsection (1) is regulations within the meaning of the Regulations Act. 2008, c. 26, s. 1.

Tax collection where assessment appeal

114 (1) Taxes on a property may be collected or recovered even if the assessment of the property is under appeal.

(2) After an assessment appeal is determined and any appeal from that decision is decided, any taxes that were overpaid shall be refunded to the appellant, together with interest at a rate set by the council by policy.
(3) Where a council has not adopted a policy on the rate of interest, the rate is the rate of interest on overdue taxes. *1998, c. 18, s. 114.*

**Taxes are first liens**

115 Change in use tax, forest property tax and recreational property tax are first liens upon the property in respect of which they are levied. *1998, c. 18, s. 115.*

**Taxes in respect of other properties**

116 Where property is

(a) vested in Her Majesty or any person for Imperial, Dominion or Provincial purpose; and

(b) occupied by a person other than in an official capacity,

the occupant shall be taxed in respect of the property, but the property may not be sold for taxes. *1998, c. 18, s. 116.*

**Tax bills**

117 (1) Every person liable to pay taxes shall be served with a tax bill showing the amount of taxes for the current year, the due date and all arrears of taxes by that person or in respect of the property.

(2) The tax bill shall be served personally or mailed to the address shown on the assessment roll or any more current address known to the treasurer.

(3) Where taxes are due on property of persons unknown or the address of the owner is unknown, the tax bill shall be posted in a conspicuous place on the property.

(4) The tax bill shall contain a concise statement of the terms of incentives for early payment of taxes, interest on overdue taxes and installment payment options allowed by the council.

(5) Where there is an error in the name of a person in a tax bill, the taxes may be collected from the person intended to be taxed if the person is taxable and can be identified. *1998, c. 18, s. 117.*

**Certificate as prima facie evidence**

118 A certificate purporting to be signed by the treasurer that a person is liable to the municipality for the sum claimed for taxes and that a specified balance has not been paid is, without proof of the signature or the official character of the treasurer, prima facie evidence in any court of the facts stated. *1998, c. 18, s. 118.*

**Power to sue for and recover taxes**
119 (1) The treasurer may, at any time, sue for and recover all taxes and other sums due to the municipality in an action in the name of the municipality as if the amount were a debt.

(2) Any proceedings for the collection of taxes pursuant to this Act may be pursued even if a judgment for taxes has been entered.

(3) A municipality may set off a sum due from a person to the municipality against a claim that person has against the municipality. 1998, c. 18, s. 119.

**Warrant**

120 (1) A judge of the provincial court, mayor, warden or councillor may, upon application by the treasurer, issue a warrant in Form A in Schedule A, with any variations that circumstances may require, to distrain the goods of a person indebted to the municipality for taxes who is about to leave the municipality, even if the taxes are not yet due.

(2) An application made pursuant to subsection (1) shall be in the form of an affidavit setting out the

(a) amount in which the person is indebted to the municipality; and

(b) belief, with or without statement of the grounds of the belief, of the treasurer that unless the person's goods are distrained the taxes will be lost to the municipality. 1998, c. 18, s. 120.

**Issue of warrant**

121 At any time after the due date for taxes, the treasurer may proceed to issue warrants, in Form A in Schedule A or to like effect, for the collection of all taxes then due and unpaid. 1998, c. 18, s. 121.

**Articles exempt from seizure**

121A Articles that are exempt from seizure under Section 45 of the Judicature Act are exempt from seizure under a warrant issued under Section 121. 2005, c. 55, s. 5.

**Limitation on issuance of warrant**

122 A warrant may be issued at any time within six years from the time when the taxes become due and remains valid until executed. 1998, c. 18, s. 122.

**Warrant enforcement**

123 (1) A warrant issued pursuant to the authority of this Act may be directed to any police officer, civil constable, by-law enforcement officer or other employee of the municipality and it may be executed by any of them whether or not it is directed to that person.
(2) The person to whom a warrant is directed shall execute it and pay the proceeds over to the municipality with a return in Form B in Schedule A or to like effect.

(3) A warrant may be executed at any place within the Province by an officer having jurisdiction in that place or by an officer having jurisdiction in the municipality that issued it.

(4) The person to whom a warrant is directed shall levy the taxes for which the warrant was issued, with collection costs and expenses, by distress and sale of the goods and chattels of the person or of the goods and chattels in that person's possession, wherever situate.

(5) The property levied upon may be removed to any place for safekeeping and the cost of removal and storage are part of the collection expenses.

(6) The person executing a warrant is entitled to the fees set by council, by policy, and the fees and expenses shall be added to the amount to be collected pursuant to the warrant.

(7) Where a warrant is executed without payment of the full amount due, it may be executed again or a new warrant may be issued and executed for the amount remaining unpaid.

(8) Where the person executing a warrant is unable to collect the amount due under the warrant, the warrant and a statement of the proceedings taken pursuant to it shall be returned to the treasurer. 1998, c. 18, s. 123.

Sale of distrained goods

124 (1) When goods are distrained pursuant to this Act, the person distraining them shall advertise the goods for sale in a newspaper circulating in the area where the sale is to take place at least seven days before the sale takes place.

(2) A sale pursuant to subsection (1) may be adjourned from time to time.

(3) If the taxes for which the distress has been made and the costs, charges and expenses incurred in connection with the distress are not paid at or before the time appointed for the sale or an adjournment of it, the goods shall be sold at public auction to pay the taxes, costs, charges and expenses, including the expenses of the sale. 1998, c. 18, s. 124.

Procedure for remaining balance

125 (1) If a balance remains after payment of the taxes, costs, charges and expenses, it shall be paid to the person in whose possession the property was when the distress was made if no claim to the balance is made by any other person within thirty days after the sale.

(2) A claim to the balance may be made within thirty days after the sale by a person who claims ownership of the property sold or entitlement by lien or other right to the surplus.
(3) Where a claim is made by a person and is admitted by the person who had possession of the property when it was distrained, the balance shall be paid over to the claimant.

(4) Where the claim is contested, the balance shall be paid to the treasurer, who may retain it until the right to it is determined by action at law or otherwise.

(5) Nothing in this Section renders the municipality, its treasurer or other officer liable for costs. 1998, c. 18, s. 125.

### Taxes on property of deceased person

126 (1) The property of a deceased person is liable for taxes levied with respect to the property before or after death, and the property is liable to be sold for non-payment of taxes.

(2) The tax bills may be served on the executor or administrator, sent to the last address of the deceased person or posted upon the property.

(3) Where there is no executor or administrator, property of a deceased person may be levied on and sold for non-payment of taxes.

(4) The executors or administrators shall pay the taxes out of the property of the deceased person that comes into their hands and are personally liable for the taxes to the extent of the property or income of the deceased person that comes under their control. 1998, c. 18, s. 126.

### Property assessed to person in representative capacity

127 (1) Where property under the control of a person as executor, administrator, trustee, guardian or agent is assessed to that person in a representative capacity, any proceedings shall be kept separate and distinct from any based on property assessed personally to that person.

(2) Where a person assessed for property in a representative capacity fails to pay the taxes on the property, the person is personally liable for the taxes to the extent that the property or the income from it is sufficient to pay the taxes.

(3) A person assessed for property in a representative capacity may raise the amount of the taxes by sale, mortgage or lease of the property.

(4) Where more than one person is assessed for a property in a representative capacity, notice to any one of them is notice to all of them. 1998, c. 18, s. 127.

### Security interest in personal property

128 (1) In this Section and Section 129, "security interest" has the same meaning as in the Personal Property Security Act.
(2) Where personal property, other than a mobile home, is taken or repossessed pursuant to a security interest and sold, or is sold under execution, other legal process or court order, the proceeds of the sale are first liable for any taxes that have been levied by the municipality in which the personal property was situate when taken with respect to the business occupancy assessment of the owner or person who was in possession of the personal property.

(3) A municipality shall issue a tax certificate binding on the municipality, on request, stating the taxes referred to in subsection (2).

(4) The holder of a security interest, sheriff or other person selling the personal property may pay the business occupancy taxes before or after the sale and add them to the amount claimed.

(5) The holder of a security interest, sheriff or other person selling the personal property shall pay the taxes out of the proceeds of the sale and is personally liable to the municipality for the business occupancy taxes to the extent of the total proceeds of the sale less the costs of conducting the sale.

(6) Where personal property, other than a mobile home, is taken or repossessed pursuant to a security interest and is not sold within six months of the taking or repossession, the holder of the security interest is personally liable to the municipality in which the property was situate when taken for the taxes levied with respect to the business occupancy assessment of the owner or the person who was in possession of the personal property. 2000, c. 28, s. 85.

**Security interest in mobile home**

129 (1) Where a mobile home is taken or repossessed pursuant to a security interest and sold, or is sold under execution, other legal process or court order, the proceeds of the sale are first liable for any taxes that have been levied with respect to the mobile home by the municipality in which the mobile home was situate when taken.

(2) The holder of a security interest, sheriff or other person selling the mobile home may pay the taxes before or after the sale and add them to the amount claimed.

(3) The holder of a security interest, sheriff or other person selling the mobile home shall pay the taxes out of the proceeds of the sale and is personally liable to the municipality for the taxes to the extent of the total proceeds of the sale less the costs of conducting the sale.

(4) Where a mobile home is taken or repossessed pursuant to a security interest and is not sold within six months of the taking or repossession, the holder of the security interest is personally liable to the municipality for the taxes levied with respect to the mobile home by the municipality in which the mobile home was situate when taken.

(5) Any lien for taxes against a mobile home taken or repossessed pursuant to a security interest and sold within six months of the taking or repossession, or sold under execution, other legal process or court order is discharged by the sale if this Section has been followed. 2000, c. 28, s. 85.
**Priority for proceeds of sale of real property**

129A (1) Where real property is taken or sold under execution, other legal process or court order, the proceeds of the sale are first liable for any taxes that have been levied with respect to the property.

(2) The holder of the security interest, sheriff or other person selling the property shall pay the taxes out of the proceeds of the sale and is personally liable to the municipality for the real property taxes to the extent of the total proceeds of the sale less the costs of conducting the sale. 2000, c. 28, s. 85.

**Power to sue tenant for rent arrears**

130 A landlord who pays any taxes or expenses due from a tenant may sue for and recover them from the tenant or may distrain upon the tenant's property for the amount paid, in the same manner as distraint upon the tenant's property for arrears of rent. 1998, c. 18, s. 130.

**Partial payment of taxes**

131 (1) Where a person, including a person paying on behalf of another person, pays only a portion of the taxes due, the treasurer shall apply and credit the amount

(a) firstly, to the payment of the taxes rated upon the person in respect of business occupancy assessment;

(b) secondly, to the payment of any other taxes that are not a lien on any property; and

(c) thirdly, to the payment of accumulated interest and then the taxes longest in arrears with respect to any real property designated by the person.

(2) Where no real property is designated, the treasurer shall, subject to the priorities listed in subsection (1), apply the amount received to the payment of the taxes longest in arrears.

(3) The acceptance of part payment does not prevent the collection of any interest imposed in respect of non-payment of taxes or an installment of taxes.

(4) Where taxes are paid on behalf of a purchaser of real property, the taxes shall be applied to taxes due with respect to the property designated by the person paying the taxes, including any business occupancy tax owed by the vendor with respect to the vendor's occupancy of that property. 1998, c. 18, s. 131; 2006, c. 40, s. 5.

**Tax certificate**

132 (1) A municipality shall issue a tax certificate, on request, stating

(a) the current taxes on the property;
(b) the total taxes due by the owner to the municipality with respect to the property;

c) any sums due from an owner of property for work done on the property by the municipality, the engineer, the administrator or any other authorized person, the cost of which forms a lien on the property;

(d) whether a change-in-use tax will be incurred if the use of the land is changed; and

e) any sums due from the person assessed for business occupancy taxes that are required to be paid prior to payment of the real property taxes with respect to the property.

(2) The fee for a tax certificate shall be set by the council, by resolution.

(3) A tax certificate binds the municipality. 1998, c. 18, s. 132.

**Certain taxes are liens**

133 (1) Taxes levied in respect of real property are a first lien upon the real property.

(2) Taxes levied in respect of a mobile home are a first lien upon the mobile home.

(3) The lien has priority over the claims, liens or encumbrances of any person and need not be registered.

(4) Where property is sold for taxes and the sale is set aside, the lien is not discharged.

(5) The lien has effect from the first day of the fiscal year for which the tax rate is set.

(6) Taxes are a first lien upon property conveyed between the time the assessment roll is filed and the tax rate is set and may be collected from a subsequent owner.

(7) Taxes cease to be a lien on the property when six years have elapsed after the end of the fiscal year in which they were levied, but may be collected after they have ceased to be a lien.

(8) Taxes in respect of business occupancy assessments are not a lien upon property. 1998, c. 18, s. 133.

**Tax sale**

134 (1) Property may be sold for taxes if the taxes with respect to the property are not paid in full for the taxation year immediately preceding the year in which the tax sale proceedings are commenced, but the proceedings shall not commence before June 30th in the year immediately following that taxation year.

(2) Property shall be put up for tax sale if taxes are in arrears for the preceding three fiscal years.
(3) The council may defer tax sale proceedings for a property for up to two years.

(4) A municipality is not required to put a property up for tax sale

(a) if the solicitor for the municipality advises that a sale of the property would expose the municipality to an unacceptable risk of litigation;

(b) if the amount of taxes due is below the collection limit established by the council, by policy;

(c) if the property has been put up for sale three times in the preceding three years and no satisfactory offer has been made with respect to it;

(d) if the taxes have been deferred pursuant to a by-law; or

(e) if the municipality and the taxpayer have entered into a tax arrears payment arrangement and the taxpayer is in compliance with the agreement.

(5) Where the municipality and a taxpayer have entered into a tax arrears payment arrangement, the period for which the tax lien is effective is extended by the period of the tax arrears payment arrangement. 1998, c. 18, s. 134.

**Owner unknown tax sale**

135 (1) Where land assessed to "owner unknown" is liable to be sold for taxes, the municipality shall notify the Minister of Natural Resources that the land is liable to be sold for taxes.

(2) No land assessed to "owner unknown" shall be sold for taxes unless the Minister of Natural Resources has been notified at least one hundred and twenty days before the sale and has not acted to vest the land in Her Majesty in right of the Province.

(3) The Minister of Natural Resources may require a municipality to furnish a statement concerning a specified property assessed to "owner unknown".

(4) A notice or statement required pursuant to this Section shall include a general description of the land, the amount of taxes and interest owing in respect of the land and any information the municipality has concerning possible owners of the land.

(5) Upon payment of the taxes and interest owing in respect of land assessed to "owner unknown", plus ten per cent as an allowance for expenses, the land vests absolutely in Her Majesty in the right of the Province, subject to this Section.

(6) When land vests in Her Majesty in the right of the Province pursuant to this Section, the Minister of Natural Resources shall cause a certificate to be registered in the registry

(a) stating that the land described in the certificate is vested in Her Majesty;
(b) setting out the date the land vested;

c) describing the land with the best available description;

d) setting out the property identification number, assessment account number and municipal tax account number for the land; and

e) stating that the land will cease to vest in Her Majesty if

   (i) on application made within eighteen months of the vesting, a person proves to the satisfaction of the Minister of Natural Resources or a judge of the Supreme Court of Nova Scotia on appeal from the Minister of Natural Resources that the person owns the land, and

   (ii) the person pays the taxes, interest and allowance for expenses paid by the Minister of Natural Resources.

(7) Within six months of the vesting of the land, a copy of the certificate shall be published in a newspaper circulating in the municipality in which the land is situate once a week, for three successive weeks.

(8) A person may apply to the Minister of Natural Resources within eighteen months after land vests in Her Majesty in right of the Province pursuant to this Section to determine that the land ceases to vest in Her Majesty, and if the applicant proves to the satisfaction of that Minister that the person owns the land, that Minister shall determine that upon payment by the applicant of the taxes, interest and allowance for expenses paid by the Minister of Natural Resources for the land, the land ceases to vest in Her Majesty.

(9) Where land ceases to vest in Her Majesty in right of the Province pursuant to this Section, the Minister of Natural Resources shall cause a certificate to that effect to be registered in the registry and shall include in the certificate the recording particulars of the certificate that set out the vesting of the land.

(10) A decision of the Minister of Natural Resources may be appealed within thirty days to the Supreme Court of Nova Scotia.

(11) Where land ceases to vest in Her Majesty in right of the Province pursuant to this Section, the land is deemed never to have vested in Her Majesty pursuant to this Section.

(12) Where a dominant tenement vests in Her Majesty in right of the Province pursuant to this Section, an easement or a right-of-way appurtenant to it passes to Her Majesty, and where a servient tenement vests in Her Majesty pursuant to this Section, the vesting does not terminate or affect an easement or a right-of-way to which it is subject. 1998, c. 18, s. 135.

**Personal claims on Crown land**
136 (1) A person who claims to own land that vests in Her Majesty in right of the Province pursuant to this Act may apply to the Supreme Court of Nova Scotia for an order declaring what rights that person would have had to the land if the land had not vested in Her Majesty, and the Court may direct that any necessary inquiries be made and may finally adjudicate the matter.

(2) An application pursuant to subsection (1) may be made within ten years after the land vests in Her Majesty in right of the Province or, where the person who claims to own the land is under the age of nineteen years or of unsound mind when the land vests in Her Majesty, within ten years after that person attains the age of nineteen years or becomes of sound mind, but no application may be made more than twenty years after the land vests in Her Majesty.

(3) Where the Supreme Court of Nova Scotia determines that a person owns land that has vested in Her Majesty in right of the Province pursuant to this Act, the Minister of Natural Resources, in the Minister's absolute discretion, shall

(a) pay to that person the value of the land at the date the land vested in Her Majesty, less

   (i) the amount of taxes, interest and allowance for expenses paid by the Minister, and

   (ii) any grants in lieu of taxes that may have been paid with respect to the land; or

(b) upon payment of the amount of taxes, interest and allowance for expenses paid by the Minister and any grants in lieu of taxes that may have been paid with respect to the land, convey the land to that person. 1998, c. 18, s. 136.

Tax sale property list

137 (1) Where land is to be sold for taxes, a list of the properties to be put up for sale shall be prepared setting out, with respect to each lot

(a) the name and address of the person assessed;

(b) a brief description of the lot sufficient to identify and locate it;

(c) the amount of arrears, including interest; and

(d) the years in which the arrears were levied.

(2) The tax sale list, or a copy certified by the treasurer, is conclusive evidence of the facts stated therein. 1998, c. 18, s. 137.

Tax sale preliminary notice

138 After the tax sale list is compiled, the municipality shall mail to each owner named in the list a preliminary notice setting out the information contained in the list with respect to the person and advising that the property is liable to be sold for the arrears, with interest and expenses, and
that tax sale procedures will be commenced and costs expended unless the arrears are paid within fourteen days of the date of the preliminary notice, or such longer period as the council may, by policy, prescribe. 1998, c. 18, s. 138.

**Title search and survey**

139 (1) After the time set out in the tax sale preliminary notice has expired, a title search shall be conducted for each property on the list for which the taxes have not been paid.

(2) The cost of the title search, from the date it is ordered, is part of the expenses of the sale and a lien on the property for which it is ordered.

(3) Where the treasurer determines that a survey of the property is necessary for the proper identification and description of the land to be sold, a survey may be undertaken before or after the sale.

(4) The cost of a survey, from the date it is ordered, is part of the expenses of the sale and a lien on the property for which it is ordered and where the survey is not undertaken prior to the sale, the expenses of the sale shall include an estimate of the cost of the survey.

(5) Where the title search or survey is done by an employee of the municipality, the cost included in the expenses of the sale is the amount determined by the treasurer to be the reasonable cost of having the same work performed by a solicitor or surveyor in private practice. 1998, c. 18, s. 139.

**Application to court by treasurer**

139A (1) The treasurer may apply to a court of competent jurisdiction for

(a) an order that there are arrears of taxes respecting a property proposed to be sold for taxes that would allow the sale;

(b) an order prescribing that upon the sale the tax deed will convey all outstanding interests in the property, or subject to such interests in the property, or subject to such interests as the court may specify; and

(c) directions respecting the manner in which notice may be provided, the persons to be notified and such other matters respecting the carrying out of the sale as the court deems appropriate.

(2) The court may require that persons appearing to have an interest in the property other than the assessed owners be notified of the tax sale.

(3) The court may require that any person appearing to have an interest in the property, whether that person is assessed for that interest or not, be given an opportunity to appear on the application.
(4) A tax sale conducted pursuant to an order obtained under this Section is not open to challenge on any grounds and a tax deed of the property so sold conveys a fee simple interest in the property sold, free and discharged of all encumbrances, charges and liens, except any right to redeem pursuant to Section 152, and subject to the exceptions in subsection 156(3) and any exceptions, exclusions or partial interests set out in the order of the court. 2003, c. 9, s. 54.

Notice of intent to sell

140 (1) Upon completion of the title search and any survey, the owner of each lot and a person with a mortgage, lien or other charge on the land shall be served with notice of intent to sell the land for taxes.

(2) The spouse of each owner of a lot referred to in subsection (1) shall be notified in accordance with the Matrimonial Property Act.

(3) The notice shall contain

(a) a general description of each lot of land;

(b) the amount of arrears of taxes and expenses incurred to date, the year or years in which they were levied and the person in whose name the land was then assessed;

(c) a statement that the land is liable to be sold for the arrears with interest and expenses of, and incidental to, the sale unless they are paid within sixty days from the date of the notice;

(d) an estimate of the total expenses that would be incurred if the property is sold for taxes;

(e) the proposed date of the sale;

(f) a statement to the effect that if the owner challenges the right of the municipality to set the land up for sale the owner should obtain legal advice and contact the municipality. 1998, c. 18, s. 140.

Public auction

141 (1) Unless the arrears of taxes, interest and expenses are paid, the treasurer shall proceed to sell land liable to be sold for taxes at public auction.

(2) The treasurer may, with the consent of the council, call tenders for property rather than put the property up for sale at public auction.

(3) The council may direct the treasurer as to what constitutes an acceptable minimum tender or bid, if the treasurer is of the opinion that the property might not realize sufficient to cover the outstanding taxes, interest and expenses.
(4) Where lands to be sold for taxes are partly in one municipality and partly in another, the treasurer may sell the entire lot if

(a) notice of the sale is given to the other municipality; and

(b) the taxes, interest and expenses due to the other municipality are included in the amount for which the land is to be sold,

and the taxes, interest and expenses shall be paid to the other municipality forthwith after the sale. 1998, c. 18, s. 141.

Tax sale advertisement

142 (1) After the notice of intent to sell land for taxes has been served

(a) the land liable to be sold for taxes shall be advertised for sale at public auction; or

(b) tenders shall be called for the land.

(2) Notice of the sale at public auction or the call for tenders shall be published

(a) at least twice prior to the sale or when tenders close in a newspaper circulating in the municipality;

(b) with the first advertisement appearing at least thirty days prior to the sale or when tenders close; and

(c) setting out each lot of land to be sold and the date, time and place of the sale or when tenders close.

(3) It is sufficient to state in the advertisements the street and number of a property advertised or to include any other such short reference by which the property may be identified, together with a statement that a full description can be seen at the office of the treasurer. 1998, c. 18, s. 142.

Municipal purchase of tax sale property

143 (1) A municipality, by an official or agent, may bid for and purchase land at a tax sale for any municipal purpose.

(2) Where no bid is received for land sufficient to satisfy the full amount of the taxes, interest and expenses due in respect of the land, the treasurer may bid the amount of the taxes, interest and expenses and purchase the land for the municipality.

(3) Where a municipality purchases land at a tax sale the subsequent proceedings shall be the same as for a purchase by another person.
(4) Where no bid is received for any land sufficient to satisfy the full amount of the taxes, interest and expenses due in respect of the land and the municipality does not purchase the land, the municipality may, without further notice to the owner and encumbrancers, again advertise the property and

(a) sell it at auction for the best price that may be obtained; or

(b) call tenders for the property and sell it for the highest tender,

and the council may direct the treasurer as to what constitutes an acceptable minimum bid or tender price.

(5) Subsections 142(2) and (3) apply to the advertising referred to in subsection (4). 1998, c. 18, s. 143; 2003, c. 9, s. 55.

Conflict of interest

144 (1) repealed 2001, c. 35, s. 11.

(2) No

(a) council member or employee of a municipality that sells land for arrears of taxes;

(b) member of a village commission or employee of a village that sells land for arrears of taxes;

(c) spouse of a person referred to in clause (a) or (b); or

(d) company in which a person referred to in clause (a), (b) or (c) owns or beneficially owns the majority of the issued and outstanding shares,

shall purchase the land at the sale either directly or through an agent.

(3) A person who contravenes this Section is liable, on summary conviction, to a penalty of five thousand dollars and, in default of payment, to imprisonment for a term not exceeding six months.

(4) Where there is a conviction pursuant to subsection (3), the relevant person referred to in clause (2)(a) or (b) forfeits their office or employment, as the case may be. 1998, c. 18, s. 144; 2001, c. 35, s. 11.

Arrears

145 Where a municipality collects taxes for a village, service commission or any other body, the arrears of the taxes are deemed to be those of the municipality in all proceedings for the sale of land for taxes. 1998, c. 18, s. 145.
**Investment of purchase money**

146 (1) The purchase money received at a tax sale shall be applied, so far as it extends

(a) firstly, to payment of the taxes, interest and expenses owing with respect to the land;

(b) secondly, to payment of any taxes due by the owner of the land to a village;

(c) thirdly, to payment of any other taxes, charges for water or electricity and other sums due by the owner to the municipality that are not a lien,

and the balance shall be deposited to the credit of the tax sale surplus account.

(2) Where the land sold for taxes is redeemed, the balance shall be applied to reduce the amount that the person redeeming is required to pay.

(3) Where the owner of land sold for taxes owes the municipality any taxes or charges not secured by a lien on the land sold, the taxes or charges may be paid from the balance.

(4) Except as provided in this Section, no part of the balance may be withdrawn from the tax sale surplus account during the period in which the land may be redeemed. *1998, c. 18, s. 146.*

**Application for order directing payment**

147 (1) A person with an interest in land sold for taxes may apply to the Supreme Court of Nova Scotia for an order directing the payment of all, or part, of the balance to that person.

(2) An application pursuant to subsection (1) may be made at any time after the period of redemption has expired and before the expiry of twenty years from the date of the sale.

(3) Where the Supreme Court of Nova Scotia orders payment, the Court shall order the payment of that part of the balance proportional to the applicant's interest in the property before it was sold.

(4) Interest is not payable with respect to the payment of the balance and costs may not be awarded against the municipality on an application pursuant to subsection (1).

(5) Where a balance remains in the tax sale surplus account twenty years after the sale, the municipality shall transfer it to its capital reserve fund. *1998, c. 18, s. 147.*

**Payment of purchase money**

148 (1) Payment at a tax sale shall be by cash, certified cheque, money order, bank draft, irrevocable letter of credit or lawyer's trust cheque and not otherwise.
(2) The purchaser at a tax sale shall immediately pay the purchase price or deposit a smaller amount equal to the taxes, interest and expenses for which the land was sold, failing which the treasurer shall forthwith put the land up for sale again.

(3) Where the balance of the purchase money is not paid within three business days, the land shall again be advertised and put up for sale.

(4) The expenses of the resale shall be deducted from the deposit and the balance shall be refunded after the resale is held. 1998, c. 18, s. 148; 2004, c. 7, s. 9.

Tenders

149 (1) Where a municipality calls tenders for land to be sold for taxes, the municipality may reject all tenders if

(a) the price tendered is less than the taxes, interest and expenses; and

(b) the council considers that the best price offered is inadequate,

and may again put the land up for sale, by tender or by public auction.

(2) Where a municipality calls tenders for land to be sold for taxes, the person whose tender is accepted shall pay the tender price within three business days after being notified of the acceptance.

(3) Where the balance of the purchase money is not paid within three business days, the land shall again be advertised and put up for sale.

(4) The expenses of the resale shall be deducted from the deposit and the balance shall be refunded after the resale is held. 1998, c. 18, s. 149.

Sale certificate

150 (1) After land is sold for taxes, upon payment of the purchase money the treasurer shall give the purchaser a certificate of sale, in Form C in Schedule A or to like effect, describing the land sold and stating the sum for which it was sold.

(2) The certificate shall state that a deed conveying the land to the purchaser, or as directed by the purchaser, shall be provided upon payment of the prescribed fee at any time after six months from the date of the sale, if the property is not redeemed.

(3) The treasurer shall register a copy of the certificate of sale in the registry.

(4) A copy of the certificate of sale shall be served on each owner of the land sold and, if the land may be redeemed, a notice that the land may be redeemed shall be included with the copy of the certificate of sale. 1998, c. 18, s. 150.
Purchaser rights

151 On receipt of the certificate of sale, the purchaser

(a) has all the rights of action and powers of an owner needed to protect the land and may collect
rents due, or to grow due, and use the land without diminishing its value, but shall not cut down
any trees on the land, injure the premises or knowingly allow any other person to do so;

(b) is not liable for damage done to the land without the purchaser's knowledge; and

(c) shall insure any buildings on the land, if the buildings are insurable, and is deemed to have an
insurable interest in the land. *1998, c. 18, s. 151.*

Redemption of tax sale property

152 (1) Land sold for non-payment of taxes may be redeemed by the owner, a person with a
mortgage, lien or other charge on the land or a person having an interest in the land within six
months after the date of the sale, but where, at the time of sale, taxes on the land are in arrears for
more than six years, no right of redemption exists.

(2) To redeem the land the person redeeming shall pay

(a) the sum paid by the purchaser;

(b) interest at the rate of ten per cent per annum on the total sum paid by the purchaser from the
date of the sale to the date of redemption;

(ba) the full amount of any outstanding taxes arising before the tax sale where the purchaser paid
less than the amount of the outstanding taxes on the land;

(c) taxes levied on the land after the sale and any interest;

(d) the fee to record the certificate of discharge;

(e) all sums paid by the purchaser for fire insurance premiums to insure buildings on the land;
and

(f) all amounts paid by the purchaser for necessary repairs made, with the written approval of the
treasurer, to buildings on the land,

less any balance remaining in the tax sale surplus account with respect to the property and any
rent or other income earned by the purchaser from the land.

(3) Where the municipality buys the land, the taxes payable by a person redeeming are the
amount that would be payable if the municipality did not own the land.
Where redemption takes place before the tax rate is set, the taxes payable by a person redeeming are those payable for the preceding year and after the tax rate is set, any surplus shall be refunded to the person redeeming and the land is liable for any deficiency.

Where property has been redeemed, a certificate of discharge in Form D in Schedule A, or to like effect, shall be prepared and registered in the registry.

The registrar of deeds shall make a marginal note referring to the registry of the certificate of discharge on the recorded copy of the certificate of sale. 1998, c. 18, s. 152; 2008, c. 25, s. 3.

Repayment to purchaser

153 (1) Where redemption of land is to take place, the purchaser shall, within fourteen days of being requested to do so, provide a statement of amounts spent for fire insurance premiums and repairs made, with the written approval of the treasurer, to buildings on the land.

(2) After delivery of the statement of amounts spent, the purchaser shall receive the

(a) sum paid upon the purchase of the land;

(b) interest on the purchase price; and

(c) sums paid with respect to fire insurance premiums and repairs,

less any rent or other income earned by the purchaser from the property.

(3) A dispute concerning the amount to be paid for redemption or to be repaid to the purchaser upon redemption may be referred to the Supreme Court of Nova Scotia. 1998, c. 18, s. 153.

Purchaser rights cease

154 From the time of the payment to the treasurer of the full amount for redemption, the purchaser of the land ceases to have a right to it. 1998, c. 18, s. 154.

Deed to purchaser

155 (1) At the request of the purchaser at a tax sale and upon payment of the fee determined by the council, by resolution, the municipality shall deliver a deed to the land in Form E in Schedule A, or to like effect, to the purchaser, or as directed by the purchaser, at any time after the

(a) sale if, at the time of the sale, taxes on the land were unpaid for more than six years before the sale; or

(b) expiration of six months from the sale, if the land has not been redeemed.

(2) The deed shall
(a) fully describe the land conveyed;

(b) be signed by the mayor or warden and the clerk; and

(c) be under the seal of the municipality. 1998, c. 18, s. 155.

**Tax sale deed**

156 (1) A deed to land sold for taxes is conclusive evidence that the provisions of this Act with reference to the sale of the land described in the deed have been fully complied with and each act and thing necessary for the legal perfection of the sale has been duly performed.

(2) The deed has the effect of vesting the land in the grantee in fee simple, free and discharged from all encumbrances.

(3) Notwithstanding subsection (1), where a dominant tenement is sold for taxes, an easement or right-of-way appurtenant to it passes to the purchaser and where a servient tenement is sold for taxes, the sale does not terminate or affect an easement or right-of-way to which it is subject. 1998, c. 18, s. 156.

**Persons with lien, charge or encumbrance**

157 A mortgagee, judgment creditor or other person having a lien, charge or encumbrance on land liable to be sold for taxes, or in respect of which taxes are due

(a) may pay the taxes, interest and expenses;

(b) may add the amount paid for taxes, interest, expenses and any amount paid to redeem the property after a tax sale to the mortgage, judgment or other security;

(c) has, in respect of the amount paid, the same rights, remedies and privileges as under the security; and

(d) may sue for, and recover, the amount paid, with interest, from the person primarily liable to pay it. 1998, c. 18, s. 157.

**Cooperative housing**

158 Where real property is held by a company incorporated for cooperative housing purposes and is subject to a mortgage held by the Minister of Housing and Municipal Affairs, a copy of the tax bill and, where the real property is to be sold for taxes, a copy of the notice of sale shall be sent to the regional manager of the Department of Housing and Municipal Affairs for the area where the property is located. 1998, c. 18, s. 158.

**Veterans' Land Act agreement**
159 (1) Where real property is held under an agreement of sale with the Director within the meaning of the Veterans' Land Act (Canada), the taxes upon the property are a lien upon the property and the property may be sold for taxes in the same manner as if the Director were a corporation sole and not an agent of Her Majesty in right of Canada.

(2) A copy of the notice of assessment, the tax bill and the notice of sale for taxes shall be sent to the Director within the meaning of the Veterans' Land Act (Canada), or to the district office thereof, before the property is sold. *1998, c. 18, s. 159.*

**Tax exemption notice**

160 (1) An owner of property that becomes exempt from taxation during a fiscal year is entitled to a rebate of the taxes on the property for the portion of the fiscal year in which it is exempt.

(2) The owner shall notify the Director of Assessment that the property is exempt within thirty days after the property becomes exempt and if the owner fails to do so, the rebate shall be calculated from the date notice is given.

(3) The Director of Assessment shall forthwith provide the treasurer with a copy of the notice.

(4) Upon receipt of the notice, the treasurer shall forthwith notify the person assessed of the amount of tax to be rebated.

(5) The notice from the treasurer may be appealed pursuant to the Assessment Act as if it were a notice of assessment.

(6) Upon expiration of the period of appeal or upon the appeal having been disposed of, where the person entitled to the rebate pays the taxes, the treasurer shall pay the rebate to the person and where the person is indebted to the municipality, the treasurer shall apply the rebate to reduce the indebtedness. *1998, c. 18, s. 160.*

**Rebate for business occupancy assessment**

161 (1) Where property ceased to be occupied or used in the preceding fiscal year, the person who was assessed for business occupancy assessment in respect of it is entitled to a rebate of the taxes on the assessment.

(2) Where property ceases to be occupied or used in a fiscal year, the person who was assessed for business occupancy assessment in respect of it is entitled to a rebate of the taxes on the assessment for the portion of the fiscal year in which it is not used or occupied.

(3) The owner shall notify the Director of Assessment that the property has ceased to be used or occupied within thirty days after the cessation and if the owner fails to do so, the rebate shall be calculated from the earlier of the date

(a) of the notice; or
(b) another person is taxed with respect to occupancy of the same property.

(4) The Director of Assessment shall forthwith provide the treasurer with a copy of the notice.

(5) Upon receipt of the notice, the treasurer shall forthwith notify the person assessed of the amount of tax to be rebated.

(6) The notice from the treasurer may be appealed pursuant to the Assessment Act as if it were a notice of assessment.

(7) Upon expiration of the period of appeal or upon the appeal having been disposed of, where the person entitled to the rebate pays the taxes, the treasurer shall pay the rebate to the person and where the person is indebted to the municipality, the treasurer shall apply the rebate to reduce the indebtedness. *1998, c. 18, s. 161.*

**Business occupancy tax payable**

162 (1) Where a person commences a business, opens a business at a new or additional location or engages again in a business during a fiscal year and is assessed for business occupancy assessment as a result, the Director of Assessment shall forthwith notify the treasurer.

(2) Upon receipt of the notice, the treasurer shall forthwith notify the person assessed of the amount of the tax due.

(3) The tax payable pursuant to this Section is that proportion of the taxes for the full fiscal year, that the number of days from the day on which the person commenced the business, opened it at the new or additional location or engaged again in the business, as the case may be, until the last day of the fiscal year, bears to the total number of days in the fiscal year. *1998, c. 18, s. 162.*

**Proceeding not brought by municipality**

163 (1) A proceeding with respect to taxes based on an assessment, except an action or other proceeding brought by a municipality for the collection of taxes, may only be brought

(a) within six months of the date upon which the assessment roll is forwarded to the clerk;

(b) where an appeal has been taken to the regional assessment appeal court, within six months from the time limited for appealing to the Board; and

(c) where an appeal has been taken to the Board, within thirty days after the date of the Board's decision.

(2) Nothing that could have been raised

(a) by way of appeal to a regional assessment appeal court;
(b) by way of appeal to the Board;

(c) on originating notice pursuant to the Assessment Act,

may be raised by way of defence in an action or other proceeding brought by, or on behalf of, a municipality.

(3) No taxes or tax levy shall be quashed for a matter of form only and no tax levy shall be quashed for an illegality except as to an individual person's taxes. 1998, c. 18, s. 163.

Validity of taxes

164 (1) No

(a) error, informality or irregularity on the part of the council, the assessor, the regional assessment appeal court, the recorder, the clerk, the treasurer or any other officer; and

(b) no error or omission in giving a notice required pursuant to this Act,

affects or prejudices the validity of taxes or the tax levy.

(2) The invalidity, irregularity or illegality of an individual's taxes does not extend to, or affect, the validity of other taxes. 1998, c. 18, s. 164.

Affidavit

165 (1) Where a notice is required pursuant to this Act, the person who served or gave the notice may make an affidavit setting out that the notice was served or given in compliance with this Act and setting out how the notice was given.

(2) The affidavit is prima facie evidence that the notices were served or given in the manner required pursuant to this Act. 1998, c. 18, s. 165.

Service

166 Service of a notice required pursuant to this Part is sufficient

(a) if it is mailed by ordinary mail to the last known address of the person on whom the notice is to be served; or

(b) where the address of the person is unknown, if it is mailed to a tenant or occupant of the land or a copy of the notice is posted in a conspicuous place on the premises. 1998, c. 18, s. 166.

Formula for rate of interest
167 Where the council is authorized or required, pursuant to this Act, to set a rate of interest, the council may instead adopt a formula by which the rate of interest may be determined and automatically adjusted. *1998, c. 18, s. 167.*

**PART VII**

**BY-LAWS**

**Adoption procedure**

168 (1) A by-law shall be read twice.

(2) At least fourteen days before a by-law is read for a second time, notice of the council's intent to consider the by-law shall be published in a newspaper circulating in the municipality.

(3) The notice shall state the object of the by-law, the date and time of the meeting at which the council proposes to consider it and the place where the proposed by-law may be inspected.

(4) The council may require further advertising, including advertising by radio or television.

(5) The council may provide that advertising by radio and television replaces advertising in a newspaper, except in the case of advertising required pursuant to Parts VIII and IX.

(6) The council may, by policy, further determine the procedure to be followed and the notice to be given with respect to the introduction and passing of by-laws. *1998, c. 18, s. 168.*

**Publication**

169 (1) A by-law has the force of law upon publication.

(2) A by-law is published when

(a) it is passed by the council in the manner provided in this Act;

(b) it is approved by a minister of the Crown whose approval is required; and

(c) a notice is published in a newspaper circulating in the municipality, stating the object of the by-law and the place where it may be read.

(3) When a by-law is published, the clerk shall file a certified copy of the by-law with the Minister.

(4) Failure to file with the Minister a copy of a by-law that is not subject to the approval of the Minister does not invalidate the by-law. *1998, c. 18, s. 169.*

**Application area**
170 (1) A by-law

(a) made pursuant to this Act or another Act of the Legislature may apply to an area defined in
the by-law;

(b) may set different charges for different areas;

(c) unless otherwise stated in the by-law, applies to the municipality.

(2) In addition to the powers specifically conferred pursuant to this Act or another Act of the
Legislature, a municipality may provide, in a by-law, for matters incidental or conducive to the
exercise of the specified powers. 1998, c. 18, s. 170.

Power to regulate, license and prohibit

171 (1) Subject to Part VIII, in this Act, the power to

(a) license, includes the power to regulate;

(b) regulate, includes the power to license; and

(c) regulate includes the power to prohibit.

(2) A by-law shall not be inconsistent with an enactment of the Province or of Canada. 1998, c. 18, s. 171.

Specific power does not limit general power

171A Where this Act confers a specific power on a municipality in relation to a matter that can
be read as coming within a general power also conferred by this Act, the general power is not to
be interpreted as being limited by the specific power. 2008, c. 25, s. 4.

Power to make by-laws

172 (1) A council may make by-laws, for municipal purposes, respecting

(a) the health, well being, safety and protection of persons;

(b) the safety and protection of property;

(c) persons, activities and things in, on or near a public place or place that is open to the public;

(d) nuisances, activities and things that, in the opinion of the council, may be or may cause
nuisances, including noise, weeds, burning, odours, fumes and vibrations and, without limiting
the generality of the foregoing, by-laws
(i) prescribing a distance beyond which noise shall not be audible,

(ii) distinguishing between one type of noise and another,

(iii) providing that any noise or sound greater than a specific decibel level or other measurement of noise or sound is prohibited,

(iv) prescribing the hours during which certain noises, or all noise above a certain level, specified in the by-law is prohibited,

(v) authorizing the granting of exemptions in such cases as the by-law provides,

(vi) providing that it is an offence to engage in any activity that unreasonably disturbs or tends to disturb the peace and tranquility of a neighbourhood;

(e) transport and transport systems;

(f) businesses, business activities and persons engaged in business;

(g) automatic machines;

(h) the appointment of a day to be a civic holiday;

(i) a requirement that pawnbrokers report all transactions by pawn or purchase;

(j) regulation of the application and use of pesticides, herbicides and insecticides for the maintenance of outdoor trees, shrubs, flowers, other ornamental plants and turf on the part of a property used for residential purposes and on property of the municipality and, without restricting the generality of the foregoing, the by-law may

(i) require the posting of notices when pesticides, herbicides or insecticides are to be so used and regulate the form, manner and time of the notice and the area in which the notice must be posted,

(ii) establish a registration scheme, that is open to the public, in which a resident who has a medical reason for objecting to pesticides, herbicides and insecticides being so used may file with the clerk an objection to them being so used in the vicinity of the property on which the person resides,

(iii) require that notices be served on the residents of properties registered pursuant to the registration scheme within the distance specified in the by-law when pesticides, herbicides or insecticides are to be so used and regulate the form, time and manner of the notice, and

(iv) specify the circumstances in which the posting or serving of notices is not required,
but a by-law may not prohibit the use of pesticides, herbicides and insecticides and a by-law pursuant to this clause does not apply to property used for agricultural or forestry purposes;

(ja) the condition or maintenance of vacant buildings, structures and properties and, without restricting the generality of the foregoing, may

(i) adopt property maintenance and performance standards,

(ii) prescribe the manner in which buildings or structures must be secured by owners or the municipality, and

(iii) limit the length of time that buildings or structures may remain boarded up;

(k) services provided by, or on behalf of, the municipality;

(l) the enforcement of by-laws made under the authority of a statute, including

(i) procedures to determine if by-laws are being complied with, including entering upon or into private property for the purposes of inspection, maintenance and enforcement,

(ii) remedies for the contravention of by-laws, including undertaking or directing the remedying of a contravention, apprehending, removing, impounding or disposing, including the sale or destruction, of plants, animals, vehicles, improvements or other things and charging and collecting the costs thereof as a first lien on the property affected,

(iii) the creation of offences,

(iv) for each offence, imposing a fine not exceeding ten thousand dollars or imprisonment for not more than one year or both, including the imposition of a minimum fine,

(v) providing for the imposition of a penalty for an offence that is in addition to a fine or imprisonment if the penalty relates to a fee, cost, rate, toll or charge that is associated with the conduct that gives rise to the offence,

(vi) providing for imprisonment, for not more than one year, for non-payment of a fine or penalty,

(vii) providing that a person who contravenes a by-law may pay an amount established by by-law and if the amount is paid the person will not be prosecuted for the contravention,

(viii) providing, with respect to a by-law, that in a prosecution for violation of the by-law, evidence that one person is disturbed or offended is prima facie evidence that the public, or the neighbourhood, is disturbed or offended.
(2) Without restricting the generality of subsection (1) but subject to Part VIII, a council may, in any by-law

(a) regulate or prohibit;

(b) regulate any development, activity, industry, business, animal or thing in different ways, divide each of them into classes and deal with each class in different ways;

(c) provide that in a prosecution for violation of a by-law, evidence that one neighbour is disturbed is prima facie evidence that the neighbourhood is disturbed;

(d) adopt by reference, in whole or in part, with changes that the council considers necessary or advisable, a code or standard and require compliance with it;

(e) provide for a system of licences, permits or approvals, including any or all of

(i) establishing fees for licences, permits or approvals, including fees for licences, permits and approvals that may be in the nature of a reasonable tax for the activity authorized or for the purpose of raising revenue, which fees may be set or altered by policy,

(ii) prohibiting any development, activity, industry, business or thing until a licence, permit or approval is granted,

(iii) providing that terms and conditions may be imposed on a licence, permit or approval, the nature of the terms and conditions and who may impose them,

(iv) setting out the conditions that shall be met before a licence, permit or approval is granted or renewed, the nature of the conditions and who may impose them,

(v) providing for the duration of licences, permits and approvals and their suspension or cancellation for failure to comply with a term or condition or the by-law or for any other reason specified in the by-law;

(f) where decision making is delegated by by-law to a person or committee other than the council, provide for an appeal of the decision, the body that is to decide the appeal and related matters. 1998, c. 18, s. 172; 2004, c. 7, s. 10.

Acquisition of vacant building

172A (1) In this Section, "vacant building" does not include a seasonal dwelling.

(2) The council of a municipality may acquire a property that contains a vacant building if the building is boarded up for a period of time that exceeds the length of time that it may be boarded up under a by-law made pursuant to subclause 172(1)(ja)(iii).
(3) Before deciding to acquire a property under subsection (2), the council shall provide seven days' notice in writing to the owner, setting out the date, time and place of the meeting at which the decision to acquire the property will be discussed, and the owner must be given an opportunity to appear and be heard before any order is made.

(4) Notice under subsection (3) must be provided by service upon the owner or by posting the notice in a conspicuous place upon the property.

(5) Where the owner refuses to sell the property, the council may exercise the power of expropriation under Section 52 to acquire the property.

(6) The council may spend money under Section 65 to acquire the property and improve it. 2008, c. 25, s. 5.

**Retention of trees and vegetation**

172B (1) In this Section, "serviced area" means an area that has access to municipal water or wastewater service or that is identified as a "serviced area" in a municipal subdivision by-law.

(2) A council may make by-laws, for municipal purposes, requiring that existing trees or vegetation be retained or only removed pursuant to a municipal permit.

(3) Subsection (2) does not apply to

(a) land used for agricultural or forestry purposes;

(b) land that is in a serviced area and is only capable of being subdivided into three or fewer lots of a size that could be used for development; and

(c) land that is in an unserviced area and is only capable of being subdivided into ten or fewer lots that could be used for development. 2008, c. 25, s. 5.

**Vending on streets**

173 Without limiting the generality of Section 172, notwithstanding the Motor Vehicle Act, a council may, by by-law, regulate vending, any class of vending, mobile vendors and the placement of vending machines on the streets of the municipality. 1998, c. 18, s. 173.

**Power to make by-laws**

174 Without limiting the generality of Section 172, a council may make by-laws respecting

(a) the regulation and licensing of persons owning or operating rooming houses or boarding houses and regulating the maintenance, administration, operation and occupancy of buildings used as rooming houses or boarding houses and the land on which they are located;
(b) the prevention and fighting of fires;

(c) the firing of firearms;

(d) fire and burglar alarms;

(e) off-road vehicles on public or private property;

(f) wild and domestic animals and activities in relation to them. *1998, c. 18, s. 174.*

**Dog by-law**

175 (1) Without limiting the generality of Section 172, a council may make by-laws

(a) regulating the running at large of dogs, including permitting the running at large of dogs in certain places or at certain times;

(b) imposing a registration fee upon the owner of every dog, the amount to be set by policy, for such length of time as is specified in the by-law with the power to impose a larger fee for female dogs than for male dogs, or for unspayed or unneutered dogs than for spayed or neutered dogs;

(c) requiring tags for the identification of dogs registered under the by-law;

(d) exempting from any registration fee a dog that is a stray dog and is harboured for up to the maximum period of time set by by-law;

(e) defining fierce or dangerous dogs, including defining them by breed, cross-breed, partial breed or type;

(f) regulating the keeping of fierce or dangerous dogs;

(g) prohibiting the keeping of a dog that persistently disturbs the quiet of the neighbourhood by barking, howling, or otherwise;

(h) authorizing the dog control officer to impound, sell, kill or otherwise dispose of dogs

   (i) that run at large contrary to the by-law,

   (ii) in respect of which the fee or tax imposed by a by-law is not paid,

   (iii) that are fierce or dangerous,

   (iv) that are rabid or appear to be rabid or exhibiting symptoms of canine madness,

   (v) that persistently disturb the quiet of a neighbourhood by barking, howling or otherwise;
(i) requiring the owner of a dog, other than a dog that is trained to assist and is assisting a person with a disability, to remove the dog's feces from public property and from private property other than the owner's;

(j) requiring the owner of a dog to provide a written statement of the number of dogs owned, harboured or that are habitually kept upon the premises occupied by the owner.

(2) A dog that is trained to assist and assists a person with a disability is exempt from any registration fee.

(3) Where a dog tag is required by by-law, the dog tag shall bear a serial number and the year in which it is issued and a record shall be kept showing the name and address of the owner and the serial number of the tag.

(4) The owner of a kennel of purebred dogs that are registered with the Canadian Kennel Club may, in any year, pay a fee set by council, by policy, as a tax upon the kennel for that year and upon payment of the amount, the owner of the kennel is exempt from any further fee regarding the dogs for that year.

(5) Where required by by-law to do so, the owner of a dog may enter upon private property to remove the dog's feces. 1998, c. 18, s. 175.

**Dangerous dogs**

176 (1) Where a peace officer believes, on reasonable grounds, that a person is harbouring, keeping or has under care, control or direction a dog that is fierce or dangerous, rabid or appears to be rabid, that exhibits symptoms of canine madness or that persistently disturbs the quiet of a neighbourhood by barking, howling or otherwise contrary to a by-law, a justice of the peace may, by warrant, authorize and empower the person named in the warrant to

(a) enter and search the place where the dog is, at any time;

(b) open or remove any obstacle preventing access to the dog; and

(c) seize and deliver the dog to the pound and for such purpose, break, remove or undo any fastening of the dog to the premises.

(2) Where the person named in the warrant is unable to seize the dog in safety, the person may destroy the dog.

(3) repealed 2004, c. 7, s. 11.

1998, c. 18, s. 176; 2003, c. 9, s. 56; 2004, c. 7, s. 11.

**Additional penalty**
177 At the trial of a charge laid against the owner of a dog that is fierce or dangerous, that persistently disturbs the quiet of a neighbourhood by barking, howling or otherwise or that runs at large, contrary to a by-law, in addition to the penalty, the judge may order that the

(a) dog be destroyed or otherwise dealt with; and

(b) owner pay any costs incurred by the municipality related to the dog, including costs related to the seizure, impounding, or destruction of the dog,

and it is not necessary to prove that the

(c) dog previously attacked or injured a domestic animal, person or property;

(d) dog had a propensity to injure or to damage a domestic animal, person or property; or

(e) defendant knew that the dog had such propensity or was, or is, accustomed to doing acts causing injury or damage. 1998, c. 18, s. 177; 2000, c. 9, s. 42.

Rabid animals

178 A person may kill or destroy a rabid dog or other rabid animal found at large and may secure and confine a dog or other animal at large and appearing to be rabid or exhibiting symptoms of canine madness. 1998, c. 18, s. 178.

Proof at trial

179 Upon the trial of an action brought against the owner or harbourer of a dog for any injury caused, or damage occasioned by, such dog, it is not necessary to prove knowledge by, or notice to, the owner or harbourer of any mischievous propensity of the dog. 1998, c. 18, s. 179.

Protected water supply area

180 (1) The council may, by by-law, designate lands owned by a municipality as protected water supply areas.

(2) No person shall

(a) place, or permit to escape, any matter or thing of an offensive nature, deleterious nature or likely to impair the quality of water for use for domestic purposes, upon land in a protected water supply area;

(b) fish or bathe in a lake, or other body of water, in a protected water supply area;

(c) camp on land in a protected water supply area;
(d) cut wood or erect, construct or place a building or structure in a protected water supply area without the permission of the council.

(3) The Angling Act does not apply to a lake, river or stream forming part of a water supply area of a municipality or village or to the land surrounding or adjacent to them. 1998, c. 18, s. 180.

**Minimum standards by-law**

181 (1) Without limiting the generality of Section 172, a council may make by-laws

(a) prescribing minimum standards of sanitation, plumbing, water supply, lighting, wiring, ventilation, heating, access, maintenance, appearance, construction and material for buildings, or parts thereof, occupied for residential purposes, whether the building, or part thereof, is erected, constructed or converted to residential purposes before or after the date of the making of the by-law;

(b) limiting the number of persons who may reside in a building or part thereof;

(c) imposing on the owner, tenant or occupant, or any one or more of them, the responsibility for complying with the by-law;

(d) providing for notice to an owner, occupant or tenant, or any one or more of them, to discontinue the residential use of a building, or part thereof, in contravention of the by-law; and

(e) prescribing penalties for such residential use after notice to discontinue the use is given.

(2) The council may make by-laws prescribing minimum standards of sanitation, plumbing, water supply, lighting, wiring, ventilation, heating, access, maintenance, appearance, construction and material for buildings, or parts thereof, occupied for commercial purposes.

(3) Where a person contravenes a by-law made pursuant to this Section, the administrator may apply to the Supreme Court of Nova Scotia for any or all of the remedies provided pursuant to this Section.

(4) The Supreme Court of Nova Scotia may hear and determine the matter at any time and, in addition to any other remedy or relief, may make an order

(a) restraining the continuance, or repetition of, a contravention and a new or further contravention in respect of the same building or structure;

(b) directing the removal or destruction of the building or structure, or part thereof, that is in contravention of, or fails to comply with, the by-law and authorizing the administrator, where an order is not complied with, to enter upon the land and premises with necessary workers and equipment and remove and destroy the building or structure, or part thereof, at the expense of the owner;
(c) regarding the recovery of the expense of removal and destruction, an order to enforce the by-law and an order as to costs, as the Court determines is proper,

and an order may be interlocutory, interim or final.

(5) Where there is another contravention of a by-law made pursuant to this Section by the same person after an application is made pursuant to subsection (3),

(a) it is not necessary to bring a further application;

(b) the original application may be amended from time to time, and at any time before final judgment so as to include the other offences; and

(c) the whole matter of the contraventions shall be heard, dealt with and determined.

(6) Where the administrator cannot find the owner of a building or structure in respect of which a contravention is taking place or has taken place, notice of the application may be posted upon the building or structure.

(7) The standards of a by-law passed pursuant to this Section shall be consistent with the standards prescribed pursuant to the Building Code Act and regulations. 1998, c. 18, s. 181.

Offence

182 Every person who makes a false statement in an application for a licence to be issued by a municipality is guilty of an offence. 1998, c. 18, s. 182.

Recovery of penalties, fees and fines

183 (1) A

(a) penalty;

(b) licence fee,

imposed pursuant to this Act may, unless otherwise provided, be recovered and enforced with costs on summary conviction.

(2) A penalty for a contravention of this Act or a by-law of the municipality made pursuant to this Act or another Act of the Legislature shall, when collected, be paid to the municipality.

(3) A penalty or fine pursuant to a by-law of the municipality, unless otherwise provided, belongs to, and forms part of, the general revenue of the municipality. 1998, c. 18, s. 183.

Application for injunction
Where

(a) a building is erected, being erected or being used in contravention of a by-law of the municipality;

(b) land is being used in contravention of a by-law of the municipality;

(c) a breach of a by-law is anticipated or is of a continuing nature; or

(d) a person is carrying on business, or doing any thing, without having paid the licence or permit fee required,

the municipality may apply to a judge of the Supreme Court of Nova Scotia for an injunction or other order and the judge may make any order that the justice of the case requires. 1998, c. 18, s. 184.

No liability for damages

185 A municipality and its officers and employees are not liable for damages caused by it in remedying or attempting to remedy a contravention unless the municipality was grossly negligent. 1998, c. 18, s. 185.

Ministerial approval not required for by-laws

186 Unless otherwise provided in an enactment, a by-law made by a council pursuant to this Act or another Act of the Legislature is not subject to the approval of the Minister. 1998, c. 18, s. 186.

Record of by-laws and policies

187 (1) A council shall keep one copy of every by-law and one copy of every policy, certified by the clerk under the seal of the municipality that it was passed or made and, in the case of a by-law requiring the approval of a minister of the Crown, bearing the approval of the minister.

(2) The clerk shall file a certified copy of the notice of publication of the by-law with every by-law entered in the by-law records.

(3) The by-law records shall be maintained by the clerk.

(4) The original by-laws shall be open to inspection by any person at a reasonable time, but shall not be removed from the office of the clerk and the production of an original by-law in a court shall not be required on subpoena but only upon order of the court or a judge after satisfactory cause is shown.

(5) The clerk shall
(a) print all of the by-laws of the municipality from time to time in force;

(b) keep printed copies of the by-laws, amended to date, for sale; and

(c) provide a copy of a by-law, amended to date, to a person requesting one, at a reasonable price, having regard to the cost of printing the by-law. *1998, c. 18, s. 187.*

### Prima facie proof

188 (1) A copy of a by-law made pursuant to this Act or another Act of the Legislature purporting to be certified by the clerk, under the seal of the municipality, to

(a) be a true copy of a by-law passed by the council;

(b) have received all required approvals,

shall be received in evidence as prima facie proof of its passing, receipt of all required approvals, publication, being in force and the contents of it without further proof in any court, unless it is specially pleaded or alleged that the seal or the signature of the clerk was forged.

(2) Printed documents, certified by the clerk, purporting to be printed copies of any or all by-laws passed by the council shall be admitted in evidence in all courts in the Province as prima facie proof of the by-laws and of the due passing of them. *1998, c. 18, s. 188.*

### Procedure for quashing by-law

189 (1) A person may, by notice of motion which shall be served at least seven days before the day on which the motion is to be made, apply to a judge of the Supreme Court of Nova Scotia to quash a by-law, order, policy or resolution of the council of a municipality, in whole or in part, for illegality.

(2) No by-law may be quashed for a matter of form only or for a procedural irregularity.

(3) The judge may quash the by-law, order, policy or resolution, in whole or in part, and may, according to the result of the application, award costs for or against the municipality and determine the scale of the costs.

(4) No application shall be entertained pursuant to this Section to quash a by-law, order, policy or resolution, in whole or in part, unless the application is made within three months of the publication of the by-law or the making of the order, policy or resolution, as the case may be. *1998, c. 18, s. 189.*

### PART VIII

PLANNING AND DEVELOPMENT
Purpose of Part

190 The purpose of this Part is to

(a) enable the Province to identify and protect its interests in the use and development of land;

(b) enable municipalities to assume the primary authority for planning within their respective jurisdictions, consistent with their urban or rural character, through the adoption of municipal planning strategies and land-use by-laws consistent with interests and regulations of the Province;

(c) establish a consultative process to ensure the right of the public to have access to information and to participate in the formulation of planning strategies and by-laws, including the right to be notified and heard before decisions are made pursuant to this Part; and

(d) provide for the fair, reasonable and efficient administration of this Part. 1998, c. 18, s. 190.

Interpretation

191 In this Part and Part IX, unless the context otherwise requires

(a) "aggrieved person" includes

(i) an individual who bona fide believes the decision of the council will adversely affect the value, or reasonable enjoyment, of the person's property or the reasonable enjoyment of property occupied by the person,

(ii) an incorporated organization, the objects of which include promoting or protecting the quality of life of persons residing in the neighbourhood affected by the council's decision, or features, structures or sites of the community affected by the council's decision, having significant cultural, architectural or recreational value, and

(iii) an incorporated or unincorporated organization in which the majority of members are individuals referred to in subclause (i);

(b) "commission" means a district planning commission continued pursuant to this Act;

(c) "development" includes the erection, construction, alteration, placement, location, replacement or relocation of, or addition to, a structure and a change or alteration in the use made of land or structures;

(d) "development officer" means the person or persons appointed by a council to administer a land-use or subdivision by-law;

(e) "Director" means the Provincial Director of Planning appointed pursuant to this Part, and includes a person acting under the supervision and direction of the Director;
(f) "former Planning Act" means Chapter 346 of the Revised Statutes, 1989, the Planning Act and any predecessor to that Act;

(g) "incentive or bonus zoning" means requirements that permit the relaxation of certain requirements if an applicant exceeds other requirements or undertakes other action, in the public interest, as specified in the requirements;

(h) "municipal planning strategy" means a municipal planning strategy, intermunicipal planning strategy or secondary planning strategy;

(i) "nonconforming structure" means a structure that does not meet the applicable requirements of a land-use by-law;

(j) "nonconforming use of land" means a use of land that is not permitted in the zone;

(k) "nonconforming use in a structure" means a use in a structure that is not permitted in the zone in which the structure is located;

(l) "participating municipality" means a municipality participating in a commission;

(m) "planning area" means the area to which a municipal or inter-municipal [intermunicipal] planning strategy applies;

(n) "planning documents" means

(i) a municipal planning strategy and a land-use by-law adopted to carry out the municipal planning strategy,

(ii) an amendment to a municipal planning strategy and a land-use by-law amendment to carry out the municipal planning strategy amendment, and

(iii) a subdivision by-law and an amendment to it;

(o) "regulate" does not include the power to prohibit;

(p) "structure" includes a building;

(q) "subdivision" means the division of an area of land into two or more parcels, and includes a resubdivision or a consolidation of two or more parcels;

(r) "watercourse" means a lake, river, stream, ocean or other body of water. 1998, c. 18, s. 191.

**Provincial Director of Planning**

192 (1) The Minister shall appoint from the public service an officer in the Department of Housing and Municipal Affairs to be known as the Provincial Director of Planning.
(2) The Minister may, from time to time, authorize another person in the Department of Housing and Municipal Affairs to act in the Director's stead.

(3) The Minister may appoint an Assistant Provincial Director of Planning to perform the duties of the Provincial Director subject to the Director's supervision and direction. 1998, c. 18, s. 192; 2006, c. 40, s. 6.

**Statement of provincial interest**

193 The Governor in Council, on the recommendation of the Minister, may adopt or amend a statement of provincial interest necessary to protect the provincial interest in the use and development of land. 1998, c. 18, s. 193.

**Requirements for statement of provincial interest**

194 (1) When preparing or amending a statement of provincial interest, the Minister shall seek the views of councils affected by the proposed statement.

(2) The statements of provincial interest in Schedule B are deemed to be statements of provincial interest pursuant to this Part.

(3) The Minister may, at any time, review a statement of provincial interest.

(4) The Governor in Council may amend or repeal a statement of provincial interest, including a statement of provincial interest included in Schedule B.

(5) A statement of provincial interest is regulations within the meaning of the Regulations Act. 1998, c. 18, s. 194.

**Copy and notice of adoption or amendment**

195 Upon the adoption or amendment by the Governor in Council of a statement of provincial interest, the Minister shall send a copy of the statement to the clerk of each municipality affected by it and give notice of its adoption in a newspaper circulating in the affected area. 1998, c. 18, s. 195.

**Provincial activities reasonably consistent**

196 The activities of the Province shall be reasonably consistent with a statement of provincial interest. 1998, c. 18, s. 196.

**Requirement to consider planning documents**

197 A department of the Province, before carrying out or authorizing any development in a municipality, shall consider the planning documents of the municipality. 1998, c. 18, s. 197.
Planning documents reasonably consistent

198 (1) Planning documents adopted after the adoption of a statement of provincial interest shall be reasonably consistent with the statement.

(2) The Minister may request that a council, within a prescribed time, adopt or amend its planning documents so that they are reasonably consistent with a statement of provincial interest.

(3) Where

(a) a council does not comply with a request pursuant to subsection (2); or

(b) development that is inconsistent with a statement of provincial interest might occur and the Minister is satisfied that there are necessary and compelling reasons to establish an interim planning area to protect the provincial interest,

the Minister may, by order, establish an interim planning area for a prescribed area.

(4) Within an interim planning area subdivision, development, or certain classes of subdivision or development, may be regulated or limited or prohibited in whole or in part, as necessary, to protect the provincial interest.

(5) No permit or approval of any kind may be issued that is contrary to an order establishing an interim planning area or an order regulating or prohibiting development in the interim planning area.

(6) The Minister shall

(a) send a copy of an order establishing an interim planning area and any order regulating or prohibiting development in the interim planning area to the clerk of each municipality affected; and

(b) give notice that an order is in effect in a newspaper circulating in the area affected.

(7) Where a council adopts planning documents in a manner reasonably consistent with a statement of provincial interest and the documents are in effect, the Minister shall revoke an order establishing an interim planning area for the prescribed area. 1998, c. 18, s. 198; 2004, c. 44, s. 1.

Repeal of Regional Development Plan

199 The Halifax-Dartmouth Metropolitan Regional Development Plan and Regulations, adopted and amended pursuant to the former Planning Act, are repealed. 1998, c. 18, s. 199.

Planning advisory committee
200 (1) A municipality may, by policy, establish a planning advisory committee and may establish different planning advisory committees for different parts of the municipality.

(2) Two or more municipalities may, by policy, establish a joint planning advisory committee.

(3) A planning advisory committee or joint planning advisory committee shall include members of the public and may include a representative appointed by a village.

(4) The purpose of a planning advisory committee or a joint planning advisory committee is to advise respecting the preparation or amendment of planning documents and respecting planning matters generally.

(5) The duties assigned, pursuant to this Part, to a planning advisory committee or a joint planning advisory committee shall only be carried out by the committee.

(6) The council shall appoint members of a planning advisory committee or a joint planning advisory committee by resolution. 1998, c. 18, s. 200.

**Area advisory committee**

201 (1) A municipality may establish, by policy, one or more area planning advisory committees to advise the planning advisory committee or joint planning advisory committee on planning matters affecting a specific area.

(2) An area planning advisory committee shall include members of the public.

(3) An area planning advisory committee, with jurisdiction over an area that includes all or part of a village, shall include at least one member appointed by the village commission.

(4) The council shall appoint members of an area planning advisory committee by resolution. 1998, c. 18, s. 201.

**Policy establishing committee**

202 In the policy establishing a planning advisory committee, joint planning advisory committee or area planning advisory committee the council shall

(a) fix the term of appointment and any provisions for reappointment;

(b) fix the remuneration, if any, to be paid to the chair of the committee, if the chair is not a council member;

(c) fix the remuneration, if any, to be paid to those members of the committee who are not council members;

(d) establish the duties and procedures of the committee; and
(e) provide for the appointment of the chair and other officers of the committee. 1998, c. 18, s. 202.

Open meetings and exceptions

203 (1) Meetings of a planning advisory committee, joint planning advisory committee or area planning advisory committee or a commission are open to the public, unless the committee or commission, by a majority vote, moves a meeting in private to discuss matters related to

(a) personnel, labour relations, contract negotiations, litigation or potential litigation or legal advice eligible for solicitor-client privilege; or

(b) a potential application for a development permit, land-use by-law amendment, development agreement or amendment to a development agreement before the applicant has applied to the municipality or development officer.

(2) The date, time and location of committee or commission meetings shall be posted in a conspicuous place in the municipal office or another conspicuous place, as determined by the committee or commission.

(3) Any person may view

(a) committee or commission minutes, other than for a meeting in private, after they are adopted; and

(b) committee or commission reports to council, after they are submitted to the council.

(4) A planning advisory committee, joint planning advisory committee or area planning advisory committee may hold meetings for public discussion when, and in the manner, it or the council decides. 1998, c. 18, s. 203.

Public participation program

204 (1) A council shall adopt, by policy, a public participation program concerning the preparation of planning documents.

(2) A council may adopt different public participation programs for different types of planning documents.

(3) The content of a public participation program is at the discretion of the council, but it shall identify opportunities and establish ways and means of seeking the opinions of the public concerning the proposed planning documents. 1998, c. 18, s. 204.

Requirements for adoption of planning documents

205 (1) A council shall adopt, by by-law, planning documents.
(2) A by-law adopting planning documents shall be read twice.

(3) Before planning documents are read for a second time the council shall hold a public hearing.

(4) A council shall complete the public participation program before placing the first notice for a public hearing in a newspaper circulating in the municipality.

(5) The notice for the public hearing is sufficient compliance with the requirement to advertise second reading of a by-law.

(6) Second reading shall not occur until the council has considered any submissions made or received at the public hearing.

(7) Only those council members present at the public hearing may vote on second reading of the planning documents.

(8) A council shall adopt planning documents, at second reading, by majority vote of the maximum number of members that may be elected to council. 1998, c. 18, s. 205; 2004, c. 7, s. 12.

Public hearing

206 (1) Prior to holding a public hearing required pursuant to this Part, the clerk shall give notice of the public hearing in a newspaper, circulating in the municipality, inserted at least once a week, for two successive weeks.

(2) The first notice of the public hearing shall be published at least fourteen days before the date of the public hearing.

(3) The notice of the public hearing shall

(a) state the place where, and the hours during which, the proposed documents may be inspected by the public;

(b) state the date, time and place set for the public hearing;

(c) describe by metes and bounds, a plan, map, sketch or civic address or other description adequate to identify the area affected by the proposed documents;

(d) give a synopsis of the proposed documents, if the public hearing is with respect to an amendment to a municipal planning strategy or land-use by-law or the approval or amendment of a development agreement.

(4) Copies of the proposed documents or portions of the documents shall be provided to a person, on request, upon payment of a reasonable fee set by the council, by policy, sufficient to recover the cost of providing the copies.
(5) Upon the publication of the first notice of the public hearing, the clerk shall send a copy of the notice to the clerk of every municipality that immediately abuts an area affected by the proposed documents.

(6) Upon the publication of the first notice of the public hearing, the clerk shall send a copy of the notice to the clerk of every village in which an affected property is situate. 1998, c. 18, s. 206.

**Joint public hearing**

207 (1) The councils of two or more municipalities, two or more community councils or the council of a regional municipality and one or more community councils may agree to hold a joint public hearing regarding the adoption or amendment of an inter-municipal [intermunicipal] planning strategy.

(2) When a proposed development is subject to a public hearing pursuant to another Act of the Legislature, the council may provide for a single hearing process for the proposed development, if this Act is complied with. 1998, c. 18, s. 207.

**Requirement for review by Director**

208 (1) Planning documents are subject to review by the Director.

(2) The clerk shall submit four certified copies of the planning documents to the Director.

(3) Where the Director determines that the planning documents

(a) appear to affect a provincial interest;

(b) may not be reasonably consistent with an applicable statement of provincial interest;

(c) appear to conflict with the law; or

(d) in the case of a subdivision by-law, may conflict with the provincial subdivision regulations, the planning documents are subject to the Minister's approval.

(4) Within thirty days after receiving the planning documents, the Director shall

(a) return two copies of the planning documents to the clerk, with a written notice affixed stating that they are not subject to the approval of the Minister; or

(b) provide written notice to the clerk that the planning documents are subject to the approval of the Minister and include the reasons why they are so subject.
(5) Compliance with the procedural requirements for the adoption or amendment of planning documents is not subject to the review of the Director or the Minister.

(6) Within sixty days after the date of a written notice that planning documents are subject to the approval of the Minister, the Minister shall

(a) approve all or part of the documents;

(b) approve the documents with amendments; or

(c) refuse to approve the documents,

and return to the clerk two copies of the planning documents as approved, amended or refused with written reasons for the decision.

(7) Where no decision is made in accordance with subsection (6), the planning documents are deemed to be approved on the sixty-first day and the clerk shall place a notice in a newspaper circulating in the municipality advising that the planning documents are in effect as of the date of the notice, stating where the documents may be inspected.

(8) Except where the Minister refuses to approve planning documents, upon receipt of the planning documents from the Director or the Minister, the clerk shall place a written notice in a newspaper circulating in the municipality advising that the planning documents, or planning documents as amended by the Minister, are in effect as of the date of that notice, stating where the documents may be inspected.

(9) A notice that planning documents are in effect is publication of a by-law for the purposes of this Act.

(10) A municipal planning strategy takes effect on the date a notice is published in a newspaper, circulating in the municipality, informing the public that the municipal planning strategy and its implementing land-use by-law are in effect. 1998, c. 18, s. 208.

Repeal of planning documents

209 Planning documents may be repealed and the procedure for repealing them is the same as the procedure for adopting them. 1998, c. 18, s. 209.

Amendment of land-use by-law

210 (1) An amendment to a land-use by-law that

(a) is undertaken in accordance with the municipal planning strategy; and

(b) is not required to carry out a concurrent amendment to a municipal planning strategy,
is not subject to the review of the Director or the approval of the Minister.

(2) The procedure for the adoption of an amendment to a land-use by-law referred to in subsection (1) is the same as the procedure for the adoption of planning documents, but a public participation program is at the discretion of the council and the amendment may be adopted by a majority of votes of the council members present at the public hearing.

(3) Upon the adoption of an amendment to a land-use by-law referred to in subsection (1), the clerk shall place a notice in a newspaper circulating in the municipality stating that the amendment has been adopted and setting out the right of appeal.

(4) When notice of an amendment to a land-use by-law referred to in subsection (1) is published, the clerk shall file a certified copy of the amending by-law with the Minister.

(5) Within seven days after a decision to refuse to amend a land-use by-law referred to in subsection (1), the clerk shall notify the applicant in writing, giving reasons for the refusal and setting out the right of appeal.

(6) Where the council has not, within one hundred and twenty days after receipt of a completed application to amend a land-use by-law referred to in subsection (1), commenced the procedure required for amending the land-use by-law by publishing the required notice of public hearing, the application is deemed to have been refused.

(7) Within seven days after an application to amend a land-use by-law, referred to in subsection (1), being deemed to be refused, the clerk shall notify the applicant in writing that the application is deemed to have been refused and setting out the right to appeal.

(8) An amendment to a land-use by-law referred to in subsection (1) is effective when

(a) the appeal period has elapsed and no appeal has been commenced; or

(b) all appeals have been abandoned or disposed of or the amendment has been affirmed by the Board. 1998, c. 18, s. 210; 2004, c. 7, s. 13.

Certain amendments by policy

211 (1) A council may, by policy, adopt amendments to

(a) the engineering specifications in a subdivision by-law;

(b) the processing fees set out in a land-use by-law or in a subdivision by-law;

(c) a subdivision by-law resulting from an amendment to the provincial subdivision regulations.

(2) An amendment referred to in subsection (1) is not subject to the review of the Director or the approval of the Minister. 1998, c. 18, s. 211.
Municipal planning strategy

212 A council may adopt a municipal planning strategy for all, or part, of the municipality and there may be separate strategies for different parts of the municipality. *1998, c. 18, s. 212.*

Purpose of municipal planning strategy

213 The purpose of a municipal planning strategy is to provide statements of policy to guide the development and management of the municipality and, to further this purpose, to establish

(a) policies which address problems and opportunities concerning the development of land and the effects of the development;

(b) policies to provide a framework for the environmental, social and economic development within a municipality;

(c) policies that are reasonably consistent with the intent of statements of provincial interest; and

(d) specify programs and actions necessary for implementing the municipal planning strategy. *1998, c. 18, s. 213.*

Statements of policy in planning strategy

214 (1) A municipal planning strategy may include statements of policy with respect to any or all of the following:

(a) the goals and objectives of the municipality for its future;

(b) the physical, economic and social environment of the municipality;

(c) the protection, use and development of lands within the municipality, including the identification, protection, use and development of lands subject to flooding, steep slopes, lands susceptible to subsidence, erosion or other geological hazards, swamps, marshes or other environmentally sensitive areas;

(d) stormwater management and erosion control;

(e) in connection with a development, the excavation or filling in of land, the placement of fill or the removal of soil, unless these matters are subject to another enactment of the Province;

(f) in connection with a development, retention of trees and vegetation for the purposes of landscaping, buffering, sedimentation or erosion control;

(g) studies to be carried out prior to undertaking specified developments or developments in specified areas;
(h) the staging of development;

(i) the provision of municipal services and facilities;

(j) municipal investment for public and private development and the coordination of public programs relating to the economic, social and physical development of the municipality;

(k) non-conforming uses and structures;

(l) the subdivision of land;

(m) the use and conservation of energy, including the height and siting of developments;

(n) measures for informing, or securing, the views of the public regarding contemplated planning policies and actions or by-laws arising from such policies;

(o) policies governing

(i) land-use by-law matters,

(ii) amendment of the land-use by-law,

(iii) the acceptance and use of cash-in-lieu of required parking,

(iv) the use of development agreements,

(v) the establishment of comprehensive development districts,

(vi) the use of site-plan approval areas, including whether notice must be given to owners and tenants of property that is thirty metres or more from the applicant's property,

(vii) the establishment of transportation reserves,

(viii) the use of infrastructure charges;

(p) the regulation or prohibition of development and the use of land in order to carry out an agreement pursuant to the Aeronautics Act (Canada);

(q) any other matter relating to the physical, social or economic environment of the municipality.

(2) A council shall include policies in the municipal planning strategy on how it intends to review the municipal planning strategy and land-use by-law. 1998, c. 18, s. 214; 2003, c. 9, s. 57.

**Intermunicipal planning strategy**
215 (1) Councils of two or more municipalities may agree to adopt a mutually binding intermunicipal planning strategy.

(2) The provisions of this Act that apply to a municipal planning strategy apply to an intermunicipal planning strategy. 1998, c. 18, s. 215.

Secondary planning strategy

216 (1) A municipal planning strategy may provide for the preparation and adoption of a secondary planning strategy which applies, as part of the municipal planning strategy, to a specific area or areas of the municipality.

(2) The purpose of a secondary planning strategy is to address issues with respect to a particular part of the planning area, which may not, in the opinion of the council, be adequately addressed in the municipal planning strategy alone. 1998, c. 18, s. 216.

No action inconsistent with planning strategy

217 (1) A municipality shall not act in a manner that is inconsistent with a municipal planning strategy.

(2) The adoption of a municipal planning strategy does not commit the council to undertake any of the projects suggested in it. 1998, c. 18, s. 217.

Acquisition of land for development

218 (1) A municipality may

(a) acquire and assemble land for the purpose of carrying out a development consistent with the municipal planning strategy, whether the development is to be undertaken by the municipality or not; or

(b) by agreement with the owners of the land, acquire the right to impose easements or other development restrictions on the lands as if it had acquired the title.

(2) The municipality may subdivide, rearrange and deal with lands described in clause (1)(a) as if it were a private owner and may sell the lands subject to any building restrictions or easements that the council requires to ensure the development is consistent with the municipal planning strategy. 1998, c. 18, s. 218.

Adoption of land-use by-law or amendment

219 (1) Where a council adopts a municipal planning strategy or a municipal planning strategy amendment that contains policies about regulating land use and development, the council shall, at the same time, adopt a land-use by-law or land-use by-law amendment that shall enable the policies to be carried out.
A council may amend a land-use by-law in accordance with policies contained in the municipal planning strategy on a motion of council or on application.

A council shall not adopt or amend a land-use by-law except to carry out the intent of a municipal planning strategy. 1998, c. 18, s. 219; 2004, c. 7, s. 14.

Content of land-use by-law

220 (1) A land-use by-law shall include maps that divide the planning area into zones.

(2) A land-use by-law shall

(a) list permitted or prohibited uses for each zone; and

(b) include provisions that are authorized pursuant to this Act and that are needed to implement the municipal planning strategy.

(3) A land-use by-law may regulate or prohibit development, but development may not be totally prohibited, unless prohibition is permitted pursuant to this Part.

(4) A land-use by-law may

(a) regulate the minimum dimensions for frontage and lot area for any class of use and size of structure;

(b) regulate the maximum floor area of each use to be placed upon a lot, where more than one use is permitted upon a lot;

(c) regulate the maximum area of the ground that a structure may cover;

(ca) regulate the location of a structure on a lot;

(d) regulate the height of structures;

(e) regulate the percentage of land that may be built upon;

(f) regulate the size, or other requirements, relating to yards;

(g) regulate the maximum density of dwelling units;

(h) require and regulate the establishment and location of off-street parking and loading facilities;

(i) regulate the location of developments adjacent to pits and quarries;

(j) regulate the period of time for which temporary developments may be permitted;
(k) prescribe the form of an application for a development permit, the content of a development permit, the period of time for which the permit is valid and any provisions for revoking or renewing the permit;

(ka) regulate the floor area ratio of a building;

(l) prescribe the fees for an application to amend a land-use by-law or for entering into a development agreement, site plan or variance.

(5) Where a municipal planning strategy so provides, a land-use by-law may

(a) subject to the Public Highways Act, regulate or restrict the location, size and number of accesses from a lot to the abutting streets, provided that a lot has access to at least one street;

(b) regulate or prohibit the type, number, size and location of signs and sign structures;

(c) regulate, require or prohibit fences, walks, outdoor lighting and landscaping;

(d) in connection with a development, regulate, or require the planting or retention of, trees and vegetation for the purposes of landscaping, buffering, sedimentation or erosion control;

(e) regulate or prohibit the outdoor storage of goods, machinery, vehicles, building materials, waste materials, aggregates and other items and require outdoor storage sites to be screened by landscaping or structures;

(f) regulate the location of disposal sites for any waste material;

(g) in relation to a development, regulate or prohibit the altering of land levels, the excavation or filling in of land, the placement of fill or the removal of soil unless these matters are regulated by another enactment of the Province;

(h) regulate or prohibit the removal of topsoil;

(i) regulate the external appearance of structures;

(j) set out conditions, including performance standards, to be met by a development before a development permit may be issued;

(k) provide for incentive or bonus zoning;

(l) prescribe methods for controlling erosion and sedimentation during the construction of a development;

(m) regulate or prohibit excavation, filling in, placement of fill or reclamation of land on floodplains identified in the land-use by-law;
(n) prohibit development or certain classes of development where, in the opinion of council, the

(i) cost of providing municipal wastewater facilities, stormwater systems or water systems would be prohibitive,

(ii) provision of municipal wastewater facilities, stormwater systems or water systems would be premature, or

(iii) cost of maintaining municipal streets would be prohibitive;

(o) regulate or prohibit development within a specified distance of a watercourse or a municipal water-supply wellhead;

(p) prohibit development on land that

(i) is subject to flooding or subsidence,

(ii) has steep slopes,

(iii) is low-lying, marshy, or unstable,

(iv) is otherwise hazardous for development because of its soil conditions, geological conditions, undermining or topography,

(v) is known to be contaminated within the meaning of the Environment Act, or

(vi) is located in an area where development is prohibited by a statement of provincial interest or by an enactment of the Province;

(q) regulate or prohibit development in areas near airports in excess of 30 NEF/NEP (thirty noise exposure forecast/noise exposure projections) as set out on maps produced by an airport authority, as revised from time to time, and reviewed by Transport Canada;

(r) permit the development officer to grant variances in parking and loading spaces, ground area and height, floor area occupied by a home-based business and the height and area of a sign.

(6) repealed 2008, c. 25, s. 6.

1998, c. 18, s. 220; 2000, c. 9, s. 43; 2003, c. 9, s. 58; 2006, c. 40, s. 7; 2008, c. 25, s. 6.

Notification and costs

221 (1) A land-use by-law may identify the class or classes of by-law amendments, development agreements or amendments to development agreements that require
(a) notifying affected property owners who are either the assessed owners or are as otherwise
defined in the land-use by-law for this purpose; and

(b) a sign to be posted on the affected property describing the requested by-law amendment,
development agreement or amendment to a development agreement.

(2) A council may by resolution provide that any person applying for a land-use by-law
amendment, a development agreement or an amendment to a development agreement shall pay
the municipality the cost of

(a) any required advertising;

(b) notifying affected land owners;

(c) posting a sign. 1998, c. 18, s. 221.

Future public use

222 (1) A council may zone privately owned land for future public use other than transportation
reserves if the by-law provides for an alternative zone on the land, consistent with the municipal
planning strategy.

(2) Where privately owned land is zoned for future public use the municipality shall, within one
year of the effective date of the zoning, acquire the land or the alternative zone comes into effect.
1998, c. 18, s. 222.

Parking cash-in-lieu

223 (1) Where provided for in a municipal planning strategy, council may accept money instead
of all or part of any required off-street parking lot or facility.

(2) Council shall use any money received to construct or maintain municipally owned parking or
transit facilities to serve the immediate area of the development with respect to which the
payment was made, provided the facilities are located in an area identified in the municipal
planning strategy.

(3) The method used to determine the contribution for parking or transit facilities shall be set out
in the land-use by-law and shall take into account the cost of construction of an individual
parking space, including costs of land, grading and paving or any other standard determined by
the council. 1998, c. 18, s. 223.

Transportation reserve

224 (1) Where a municipal planning strategy identifies property required for the purposes of
widening, altering or diverting an existing street or pathway or for the purposes of a new street or
pathway, council may, in a land-use by-law identify the transportation reserve and
(a) set out its intention to acquire property for the purposes of widening, altering or diverting an existing street or pathway, or for the purposes of a new street or pathway;

(b) set out the proposed right-of-way intended to be acquired;

(c) set out building setbacks for the widened, altered, diverted or new street or pathway;

(d) prohibit development in the proposed right-of-way or between the proposed right-of-way and the building setbacks.

(2) Any right-of-way and any building setbacks shall be shown on a map or plan that is attached to and forms part of the land-use by-law.

(3) Where the council adopts by-law provisions in accordance with this Section it shall provide for an alternate zone on the property to be acquired.

(4) The alternate zone comes into effect if the municipality does not acquire the property in the right-of-way within five years of the effective date of the provisions.

(5) Where council adopts provisions in accordance with this Section, an affected property owner may make a written request to council to acquire the property or acquire an interest in the property, at the discretion of council.

(6) Where council does not acquire the property or acquire the interest in the property within one year of the written request of an affected property owner, the alternate zone on the property comes into effect. 1998, c. 18, s. 224.

Development agreements

225 (1) A council may consider development by development agreement where a municipal planning strategy identifies

(a) the developments that are subject to a development agreement;

(b) the area or areas where the developments may be located; and

(c) the matters that council shall consider prior to the approval of a development agreement.

(2) The land-use by-law shall identify the developments to be considered by development agreement. 1998, c. 18, s. 225.

Comprehensive development districts

226 (1) A council may regulate the development of a district by development agreement by establishing a comprehensive development district where the municipal planning strategy identifies
(a) the classes of uses permitted in a district;

(b) developments or uses in a district, if any, that are permitted without a development agreement;

(c) the area or areas where a district may be established; and

(d) the matters that council shall consider prior to the approval of a development agreement for the development of a district.

(2) When a municipal planning strategy provides for a comprehensive development district, the land-use by-law shall include a comprehensive development district zone.

(3) No development may occur in a comprehensive development district unless it is consistent with the development agreement or it is a development permitted without a development agreement. 1998, c. 18, s. 226.

**Content of development agreement**

227 (1) A development agreement may contain terms with respect to

(a) matters that a land-use by-law may contain;

(b) hours of operation;

(c) maintenance of the development;

(d) easements for the construction, maintenance or improvement of watercourses, ditches, land drainage works, stormwater systems, wastewater facilities, water systems and other utilities;

(e) grading or alteration in elevation or contour of the land and provision for the disposal of storm and surface water;

(f) the construction, in whole or in part, of a stormwater system, wastewater facilities and water system;

(g) the subdivision of land;

(h) security or performance bonding.

(2) A development agreement may include plans or maps.

(3) A development agreement may

(a) identify matters which are not substantive or, alternatively, identify matters that are substantive;
(aa) identify if the variance provisions are to apply to the development agreement;

(b) provide for the time when and conditions under which the development agreement may be discharged with or without the concurrence of the property owner;

(c) provide that upon the completion of the development or phases of the development, the development agreement, or portions of it, may be discharged by council;

(d) provide that if the development does not commence or is not completed within the time specified in the development agreement, the development agreement or portions of it may be discharged by council without the concurrence of the property owner. 1998, c. 18, s. 227; 2003, c. 9, s. 59.

Requirements for effective development agreement

228 (1) A development agreement shall not be entered into until

(a) the appeal period has elapsed and no appeal has been commenced; or

(b) all appeals have been abandoned or disposed of or the development agreement has been affirmed by the Board.

(2) A council may stipulate that a development agreement shall be signed by the property owner within a specified period of time.

(3) A development agreement does not come into effect until

(a) the appeal period has elapsed and no appeal has been commenced or all appeals have been abandoned or disposed of or the development agreement has been affirmed by the Board;

(b) the development agreement is signed by the property owner, within the specified period of time, if any, and the municipality; and

(c) the development agreement is filed by the municipality in the registry.

(4) The clerk shall file every development agreement, amendment to a development agreement and discharge of a development agreement in the registry. 1998, c. 18, s. 228.

Discharge of development agreement

229 (1) A development agreement is in effect until discharged by the council.

(2) A council may discharge a development agreement, in whole or in part, in accordance with the terms of the agreement or with the concurrence of the property owner.
(3) After a development agreement is discharged, the land is subject to the land-use by-law. *1998, c. 18, s. 229.*

**Adoption or amendment of development agreement**

230 (1) A council shall adopt or amend a development agreement by policy.

(2) A council shall hold a public hearing before approving a development agreement or an amendment to a development agreement.

(3) Only those members of the council present at the public hearing may vote on the development agreement or the amendment.

(4) Upon approving a development agreement or an amendment to a development agreement, the clerk shall place a notice in a newspaper circulating in the municipality stating that the development agreement is approved and setting out the right of appeal.

(5) The clerk shall file a certified copy of a development agreement or amendment with the Minister when notice of the development agreement or an amendment to it is published.

(6) Within seven days after a decision refusing to approve a development agreement or an amendment to a development agreement, the clerk shall notify the applicant in writing, giving reasons for the refusal and setting out the right of appeal.

(7) Amendments to those items in a development agreement that the parties have identified as not substantive, if the substantive items were identified in the agreement, or that were not identified as being substantive, do not require a public hearing. *1998, c. 18, s. 230; 2003, c. 9, s. 60.*

**Site-plan approval**

231 (1) Where a municipal planning strategy so provides, a land-use by-law shall identify

(a) the use that is subject to site-plan approval;

(b) the area where site-plan approval applies;

(c) the matters that are subject to site-plan approval;

(d) those provisions of the land-use by-law that may be varied by a site-plan approval;

(e) the criteria the development officer shall consider prior to granting site-plan approval;

(ea) the notification area;

(f) the form and content of an application for site-plan approval.
(2) repealed 2003, c. 9 s. 61.

(3) No development permit shall be issued for a development in a site-plan approval area unless

(a) the class of use is exempt from site-plan approval as set out in the land-use by-law and the development is otherwise consistent with the requirements of the land-use by-law; or

(b) the development officer has approved an application for site-plan approval and the development is otherwise consistent with the requirements of the land-use by-law.

(4) A site-plan approval may deal with

(a) the location of structures on the lot;

(b) the location of off-street loading and parking facilities;

(c) the location, number and width of driveway accesses to streets;

(d) the type, location and height of walls, fences, hedges, trees, shrubs, ground cover or other landscaping elements necessary to protect and minimize the land-use impact on adjoining lands;

(e) the retention of existing vegetation;

(f) the location of walkways, including the type of surfacing material, and all other means of pedestrian access;

(g) the type and location of outdoor lighting;

(h) the location of facilities for the storage of solid waste;

(i) the location of easements;

(j) the grading or alteration in elevation or contour of the land and provision for the management of storm and surface water;

(k) the type, location, number and size of signs or sign structures;

(l) provisions for the maintenance of any of the items referred to in this subsection. 1998, c. 18, s. 231; 2003, c. 9, s. 61.

Site-plan approval

232 (1) A development officer shall approve an application for site-plan approval, unless the

(a) matters subject to site-plan approval do not meet the criteria set out in the land-use by-law; or
(b) applicant fails to enter into an undertaking to carry out the terms of the site plan.

(2) Where a development officer approves or refuses to approve a site plan, the process and notification procedures and the rights of appeal are the same as those that apply when a development officer grants or refuses to grant a variance.

(2A) Notwithstanding subsection (2), council may require a larger notification distance for site-plan approvals in its land-use by-law where the municipal planning strategy so provides.

(3) The council, in hearing an appeal concerning a site-plan approval, may make any decision that the development officer could have made.

(4) A council may by resolution provide that any person applying for approval of a site plan shall pay the municipality the cost of

(a) notifying affected land owners;

(b) posting a sign.

(5) A development officer may, with the concurrence of the property owner, discharge a site-plan, in whole or in part. 1998, c. 18, s. 232; 2003, c. 9, s. 62; 2006, c. 40, s. 8.

Development permit in site-plan approval area

233 A development officer shall issue a development permit for a development in a site-plan approval area if a site plan is approved and the development otherwise complies with the land-use by-law, and

(a) the appeal period has elapsed and no appeal has been commenced; or

(b) all appeals have been abandoned or disposed of or the site plan has been affirmed by the council. 1998, c. 18, s. 233.

Conveyance to person not a party

234 Where the owner of property that is subject to a development agreement or a site plan conveys all or part of the property to a person not a party to the development agreement or site plan, the development agreement or the site plan continues to apply to the property until, in the case of a development agreement, it is discharged by council and, in the case of a site-plan, it is discharged by the development officer. 1998, c. 18, s. 234; 2006, c. 40, s. 9.

Variance

235 (1) A development officer may grant a variance in one or more of the following terms in a development agreement, if provided for in the development agreement, or land-use by-law requirements:
(a) percentage of land that may be built upon;
(b) size or other requirements relating to yards;
(c) lot frontage or lot area, or both, if
   (i) the lot existed on the effective date of the by-law, or
   (ii) a variance was granted for the lot at the time of subdivision approval.

(2) Where a municipal planning strategy and land-use by-law so provide, a development officer may grant a variance in one or more of the following terms in a development agreement, if provided for in the development agreement, or land-use by-law requirements:

(a) number of parking spaces and loading spaces required;
(b) ground area and height of a structure;
(c) floor area occupied by a home-based business;
(d) height and area of a sign.

(3) A variance may not be granted where the

(a) variance violates the intent of the development agreement or land-use by-law;
(b) difficulty experienced is general to properties in the area; or
(c) difficulty experienced results from an intentional disregard for the requirements of the development agreement or land-use by-law. 1998, c. 18, s. 235; 2003, c. 9, s. 63.

Variance procedures

236 (1) Within seven days after granting a variance, the development officer shall give notice in writing of the variance granted to every assessed owner whose property is within the greater of thirty metres and the distance set by the land-use by-law or by policy of the applicant's property.

(2) The notice shall

(a) describe the variance granted;
(b) identify the property where the variance is granted; and
(c) set out the right to appeal the decision of the development officer.
(3) Where a variance is granted, a property owner served a notice may appeal the decision to the council within fourteen days after receiving the notice.

(4) Where a variance is refused, the applicant may appeal the refusal to council within seven days after receiving notice of the refusal, by giving written notice to the clerk who shall notify the development officer.

(5) Where an applicant appeals the refusal to grant a variance, the clerk or development officer shall give seven days written notice of the hearing to every assessed owner whose property is within thirty metres of the applicant's property.

(6) The notice shall

(a) describe the variance applied for and the reasons for its refusal;

(b) identify the property where the variance is applied for; and

(c) state the date, time and place when council will hear the appeal. 1998, c. 18, s. 236; 2008, c. 25, s. 7.

Variance appeals and costs

237 (1) Where a council hears an appeal from the granting or refusal of a variance, the council may make any decision that the development officer could have made.

(2) A development officer shall issue a development permit for any development for which a variance has been granted and which otherwise complies with the terms of the development agreement or a land-use by-law, whichever is applicable, if

(a) the appeal period has elapsed and no appeal has been commenced; or

(b) all appeals have been abandoned or disposed of or the variance has been affirmed by the council.

(3) A council may by resolution provide that any person applying for a variance shall pay the municipality the cost of

(a) notifying affected land owners;

(b) posting a sign. 1998, c. 18, s. 237; 2003, c. 9, s. 64.

Nonconforming structure or use

238 (1) A nonconforming structure, nonconforming use of land or nonconforming use in a structure, may continue if it exists and is lawfully permitted at the date of the first publication of the notice of intention to adopt or amend a land-use by-law.
(2) A nonconforming structure is deemed to exist at the date of the first publication of the notice of intention to adopt or amend a land-use by-law, if the

(a) nonconforming structure was lawfully under construction and was completed within a reasonable time; or

(b) permit for its construction was in force and effect, the construction was commenced within twelve months after the date of the issuance of the permit and the construction was completed in conformity with the permit within a reasonable time.

(3) A nonconforming use in a structure is deemed to exist at the date of the first publication of the notice of intention to adopt or amend a land-use by-law if

(a) the structure containing the nonconforming use was lawfully under construction and was completed within a reasonable time; or

(b) the permit for its construction or use was in force and effect, the construction was commenced within twelve months after the date of the issuance of the permit and the construction was completed in conformity with the permit within a reasonable time; and

(c) the use was permitted when the permit for the structure was granted and the use was commenced upon the completion of construction.

(4) This Act does not preclude the repair or maintenance of a nonconforming structure or a structure containing a nonconforming use.

(5) A change of tenant, occupant or owner of any land or structure does not of itself affect the use of land or a structure. 1998, c. 18, s. 238.

Nonconforming structure for residential use

239 (1) Where a nonconforming structure is located in a zone that permits the use made of it and the structure is used primarily for residential purposes, it may be

(a) rebuilt, replaced or repaired, if destroyed or damaged by fire or otherwise, if it is substantially the same as it was before the destruction or damage and it is occupied by the same use;

(b) enlarged, reconstructed, repaired or renovated where

(i) the enlargement, reconstruction, repair or renovation does not further reduce the minimum required yards or separation distance that do not conform with the land-use by-law, and

(ii) all other applicable provisions of the land-use by-law except minimum frontage and area are satisfied.
(2) A nonconforming structure, that is not located in a zone permitting residential uses and not used primarily for residential purposes, may not be rebuilt or repaired, if destroyed or damaged by fire or otherwise to the extent of more than seventy-five percent of the market value of the building above its foundation, except in accordance with the land-use by-law, and after the repair or rebuilding it may only be occupied by a use permitted in the zone. 1998, c. 18, s. 239; 2004, c. 44, s. 2.

**Nonconforming use of land**

240 A nonconforming use of land may not be

(a) extended beyond the limits that the use legally occupies;

(b) changed to any other use except a use permitted in the zone; and

(c) recommenced, if discontinued for a continuous period of six months. 1998, c. 18, s. 240.

**Nonconforming use in a structure**

241 (1) Where there is a nonconforming use in a structure, the structure may not be

(a) expanded or altered so as to increase the volume of the structure capable of being occupied, except as required by another Act of the Legislature;

(b) repaired or rebuilt, if destroyed or damaged by fire or otherwise to the extent of more than seventy-five percent of the market value of the building above its foundation, except in accordance with the land-use by-law and after the repair or rebuilding it may only be occupied by a use permitted in the zone.

(2) Where there is a nonconforming use in a structure, the nonconforming use

(a) may be extended throughout the structure;

(b) may not be changed to any other use except a use permitted in the zone;

(c) may not be recommenced, if discontinued for a continuous period of six months. 1998, c. 18, s. 241.

**Relaxation of restrictions**

242 (1) A municipal planning strategy may provide for a relaxation of the restrictions contained in this Part respecting nonconforming structures, nonconforming uses of land, and nonconforming uses in a structure and, in particular, may provide for

(a) the extension, enlargement, alteration or reconstruction of a nonconforming structure;
(b) the extension of a nonconforming use of land;

(c) the extension, enlargement or alteration of structures containing nonconforming uses, with or without permitting the expansion of the nonconforming use into an addition;

(d) the reconstruction of structures containing nonconforming uses, after destruction;

(e) the recommencement of a nonconforming use of land or a nonconforming use in a structure after it is discontinued for a continuous period in excess of six months;

(f) the change in use of a nonconforming use of land or a nonconforming use in a structure, to another nonconforming use.

(2) The policies adopted in accordance with this Section shall be carried out through the land-use by-law and may require a development agreement. 1998, c. 18, s. 242; 2003, c. 9, s. 65.

**Development officer**

243 (1) A council shall appoint a development officer to administer its land-use by-law and subdivision by-law.

(2) Where the municipality participates in a district planning commission or enters into an agreement with another municipality to provide services, the council may appoint as its development officer an employee of the commission or of the other municipality. 1998, c. 18, s. 243.

**Development permit**

244 (1) Before any development is commenced, a development permit shall be obtained if the council has adopted a land-use by-law.

(2) A land-use by-law may specify developments for which a development permit is not required. 1998, c. 18, s. 244.

**Time limits for development permit application**

245 (1) Within fourteen days after receiving an application for a development permit the development officer shall

(a) determine if an application is incomplete; and

(b) where the application is incomplete, notify the applicant in writing advising what is required to complete the application.
(2) Within thirty days after receiving a completed application for a development permit, the development officer shall grant the development permit or inform the applicant of the reasons for not granting the permit. *1998, c. 18, s. 245.*

**Limitations on granting development permit**

246 (1) A development permit shall be issued for a proposed development if the development meets the requirements of the land-use by-law, the terms of a development agreement or an approved site plan.

(2) Where a land-use by-law is amended or a development agreement is approved or amended, a development permit for a development pursuant to the amendment or the agreement may not be issued until

(a) the appeal period has elapsed; or

(b) all appeals have been abandoned or disposed of or the decision of council has been affirmed by the Board.

(3) A development permit that is inconsistent with a proposed land-use by-law or a proposed amendment to a land-use by-law may not be issued for one hundred and fifty days from the publication of the first notice advertising the council's intention to adopt or amend the by-law.

(4) Where the proposed land-use by-law or by-law amendment has not come into effect after the expiry of one hundred and fifty days from the publication of the first notice advertising the council's intention to adopt or amend the by-law, the development officer shall issue the development permit if the proposed development meets the requirements of the land-use by-law. *1998, c. 18, s. 246.*

**Appeals to the Board**

247 (1) The approval or refusal by a council to amend a land-use by-law may be appealed to the Board by

(a) an aggrieved person;

(b) the applicant;

(c) an adjacent municipality;

(d) a village in which an affected property is situated;

(e) the Director.

(2) The approval, or refusal to approve, and the amendment, or refusal to amend, a development agreement may be appealed to the Board by
(a) an aggrieved person;
(b) the applicant;
(c) an adjacent municipality;
(d) a village in which an affected property is situated;
(e) the Director.

(3) The refusal by a development officer to
(a) issue a development permit;
(b) approve a tentative or final plan of subdivision or a concept plan,
may be appealed by the applicant to the Board. *1998, c. 18, s. 247; 2000, c. 9, s. 44.*

**No appeal permitted**

248 The following are not subject to an appeal:

(a) an amendment to a land-use by-law to make the by-law consistent with a statement of provincial interest;

(b) an amendment to a land-use by-law or a development agreement to implement a decision of the Board;

(c) a development agreement approved, as ordered by the Board;

(d) an amendment to a land-use by-law that is required to carry out a concurrent amendment to a municipal planning strategy. *1998, c. 18, s. 248.*

**Service of appeal**

249 An appeal shall be served on the Board within fourteen days after the date

(a) of publication of notice of the adoption of the land-use by-law amendment;

(b) of written notice of council's decision refusing to amend the land-use by-law;

(c) of publication of notice of the approval or amendment of a development agreement;

(d) of written notice of council's decision refusing to approve or amend a development agreement;
(e) of written notice of the development officer's decision refusing to issue a development permit or refusing to approve a tentative or final plan of subdivision or a concept plan;

(f) a decision is deemed to be refused. 1998, c. 18, s. 249; 2000, c. 9, s. 45.

**Restrictions on appeals**

250 (1) An aggrieved person or an applicant may only appeal

(a) an amendment or refusal to amend a land-use by-law, on the grounds that the decision of the council does not reasonably carry out the intent of the municipal planning strategy;

(b) the approval or refusal of a development agreement or the approval of an amendment to a development agreement, on the grounds that the decision of the council does not reasonably carry out the intent of the municipal planning strategy;

(c) the refusal of an amendment to a development agreement, on the grounds that the decision of the council does not reasonably carry out the intent of the municipal planning strategy and the intent of the development agreement.

(2) An applicant may only appeal a refusal to issue a development permit on the grounds that the decision of the development officer does not comply with the land-use by-law, a development agreement, an order establishing an interim planning area or an order regulating or prohibiting development in an interim planning area.

(3) An applicant may only appeal a refusal to approve a concept plan or a tentative or final plan of subdivision on the grounds that the decision of the development officer does not comply with the subdivision by-law.

(4) The Director may only appeal on the grounds that the decision of the council is not reasonably consistent with a statement of provincial interest, an order establishing an interim planning area or an order regulating or prohibiting development in an interim planning area. 1998, c. 18, s. 250.

**Time limits**

250A (1) A municipality shall file a complete appeal record with the Board, and any other person as the Board may require, within fourteen business days of the municipality being notified by the Board of the appeal.

(2) A hearing must begin within forty-five days from the filing of the appeal record unless the Board determines that it is necessary for the interests of justice for the hearing to begin at some later time or unless all the parties agree that the hearing may begin at some later time.
(3) The Board shall render its decision within sixty days after the close of submissions by the parties, unless the Board otherwise states at the close of the hearing or unless it is necessary for the interests of justice.

(4) A decision of the Board is not invalid nor does the Board lose jurisdiction over a matter in the event that a decision is rendered later than sixty days after the close of submissions.

(5) In the event that the Board directs the filing of post-hearing written submissions, such submissions must be filed with the Board within fourteen days after the close of the hearing unless the Board determines that it is necessary for the interests of justice for such submissions to be submitted at some later time or unless all the parties agree that the submissions may be filed at some later time.

(6) Notwithstanding subsection 28(1) of the Utility and Review Board Act,

(a) the Board shall, by order, impose costs on a municipality that fails to file a complete appeal record within the time referred to in subsection (1); and

(b) the Board may, by order, impose costs on any party to an appeal that fails to meet any deadline or time limit established pursuant to this Section or otherwise established or imposed by the Board.

(7) When imposing costs pursuant to subsection (6), the Board shall consider, in addition to what the Board considers relevant, the financial ability of the party to pay and the conduct of the party in the appeal.

(8) This Section only applies to appeals to the Board made pursuant to this Part.

(9) This Section only applies to proceedings commenced on or after the coming into force of this Section. 2008, c. 25, s. 8.

Powers of Board on appeal

251 (1) The Board may

(a) confirm the decision appealed from;

(b) allow the appeal by reversing the decision of the council to amend the land-use by-law or to approve or amend a development agreement;

(c) allow the appeal and order the council to amend the land-use by-law in the manner prescribed by the Board or order the council to approve the development agreement, approve the development agreement with the changes required by the Board or amend the development agreement in the manner prescribed by the Board;

(d) allow the appeal and order that the development permit be granted;
(e) allow the appeal by directing the development officer to approve the tentative or final plan of subdivision or concept plan.

(2) The Board shall not allow an appeal unless it determines that the decision of council or the development officer, as the case may be, does not reasonably carry out the intent of the municipal planning strategy or conflicts with the provisions of the land-use by-law or the subdivision by-law. 1998, c. 18, s. 251; 2001, c. 35, s. 12; 2003, c. 9, s. 66.

Restrictions on powers of Board

252 (1) The Board shall not order the granting of a development permit, the approval of a plan of subdivision, a land-use by-law amendment, a development agreement or an amendment to a development agreement that

(a) is not reasonably consistent with a statement of provincial interest;

(b) conflicts with an order made by the Minister establishing an interim planning area or regulating or prohibiting development in an interim planning area.

(2) The Board shall not make any decision that commits the council to make any expenditures with respect to a development. 1998, c. 18, s. 252.

District planning commissions

253 (1) A district planning commission established by an order of the Minister pursuant to a former Planning Act continues to be a body corporate.

(2) Municipalities that are members of a district planning commission are deemed to have entered into an intermunicipal services agreement for the provision of the services provided by the commission on the same terms and conditions as contained in the order of the Minister establishing the commission, and such an agreement may be varied or rescinded with the agreement of all participating municipalities and the approval of the Minister to the variation or rescission is not required.

(3) A participating municipality may withdraw from a commission effective April 1 without the agreement of the remaining participating municipalities but shall, before withdrawing, give the other participating municipalities notice before March 31 of the preceding year.

(4) A participating municipality that withdraws from a commission is

(a) not entitled to receive any assets of the commission without the approval of the remaining participating municipalities; and

(b) responsible for severance costs or other costs imposed by its withdrawal and for its share of any liabilities of the commission existing at the time of its withdrawal.
(5) Where all the participating municipalities have agreed to dissolve the commission, they shall, by agreement, provide for the distribution of the assets and liabilities of the commission among the participating municipalities upon its dissolution.

(6) Where all the participating municipalities cannot agree on the distribution of the assets and liabilities of the commission, one or more of them may make an application to the Supreme Court of Nova Scotia to determine an equitable distribution of them. 1998, c. 18, s. 253; 2003, c. 9, s. 67.

**District planning commission members**

254 (1) A member of a commission who is a council member of a participating municipality ceases to be a member of the commission when the member ceases to be a council member.

(2) Where a member is no longer able to act, the council that appointed the member may appoint another member for the balance of the term. 1998, c. 18, s. 254.

**Powers of commission**

255 (1) A commission may

(a) advise and assist the council of any participating municipality in the preparation or amendment of planning documents and in the provision of any service related to planning or delegated to the commission by one or more of the participating municipalities;

(b) exercise rights and powers and perform duties that may be delegated to it by the council of a participating municipality;

(c) expend its funds for any of the purposes of the commission;

(d) retain the services of those persons necessary for the purposes of the commission and determine their remuneration;

(e) do any other things necessary for the attainment of its purposes.

(2) A commission may acquire and dispose of real property to the extent authorized and approved by all the councils of the participating municipalities. 1998, c. 18, s. 255.

**Auditor and financial report required**

256 (1) A commission shall annually appoint a registered municipal auditor to be its auditor.

(2) On or before June 30 in each year, a commission shall provide the councils of the participating municipalities with a financial report for the preceding year signed by the commission's auditor. 1998, c. 18, s. 256.
Annual report required

257 On or before June 30 in each year, a commission shall make an annual report to the councils of the participating municipalities setting out its activities for the preceding year. 1998, c. 18, s. 257.

Commission's estimates

258 (1) On or before January 15 in each year, a commission shall submit to the clerk of each of the participating municipalities an estimate of its revenues and expenditures for the next fiscal year after adding any anticipated deficit or deducting any anticipated surplus for the current fiscal year.

(2) The participating municipalities may agree on a method for approving or questioning the estimates of a commission.

(3) The council of each participating municipality shall include in its annual estimate of expenditures its proportion of the commission's estimates.

(4) A commission may at any time prepare supplementary estimates subject to the approval of the councils of the participating municipalities.

(5) The council of each participating municipality shall pay the commission its share of the estimates of the commission in accordance with any terms or payment schedule included in the order establishing the commission. 1998, c. 18, s. 258.

Use of mediation

259 The Minister, a council or the Board may, if the person or body considers it appropriate, at any time before a decision is made pursuant to this Part, use mediation, conciliation or other dispute resolution methods to attempt to resolve concerns or disputes. 1998, c. 18, s. 259.

260 repealed 2000, c. 9, s. 46.

No injurious affection

261 Property is deemed not to be injuriously affected by the adoption, amendment or repeal of a statement of provincial interest, interim planning area and development regulations in connection with it, subdivision regulations, subdivision by-law, municipal planning strategy, land-use by-law or the entering into, amending or discharging of a development agreement. 1998, c. 18, s. 261.

Former Planning Act

262 A municipal development plan and zoning by-law or municipal planning strategy and land-use by-law adopted pursuant to a former Planning Act are a municipal planning strategy and
land-use by-law within the meaning of this Act, to the extent they are consistent with this Act. 1998, c. 18, s. 262.

Conflict

263 In the event of a conflict between this Part and this Act or another Act of the Legislature, this Part prevails. 1998, c. 18, s. 263.

Prohibition on breach of development agreement or site plan

263A No person shall breach the terms of a development agreement or site plan. 2004, c. 7, s. 15.

Breach of development agreement

264 (1) A municipality may, upon the breach of a development agreement, if thirty days notice in writing has been provided to the owner, enter the land and perform any of the terms contained in the development agreement or take such remedial action as is considered necessary to correct a breach of the development agreement, including the removal or destruction of any thing that contravenes the terms of a development agreement.

(2) All reasonable expenses, whether arising out of the entry on the land or from the performance of the terms, are a first lien on the land that is the subject of the development agreement.

(3) No action shall be maintained against a municipality or against any agent, servant or employee of a municipality for anything done pursuant to this Section. 1998, c. 18, s. 264; 2001, c. 35, s. 13.

Breach of approved site plan

265 (1) A municipality may, upon the breach of an approved site plan, if thirty days notice in writing has been provided to the owner, enter the land and perform any of the terms contained in the site plan.

(2) All reasonable expenses whether arising out of the entry on the land or from the performance of the terms of the site plan are a first lien on the land that is the subject of the site plan.

(3) No action shall be maintained against a municipality or against any agent, servant or employee of a municipality for anything done pursuant to this Section. 1998, c. 18, s. 265.

Remedies where offence

266 (1) This Section applies to this Part and Part IX.

(2) In the event of an offence
(a) where authorized by the council or by the chief administrative officer, the clerk or
development officer, in the name of the municipality; or

(b) the Director, in the name of the Province, when authorized by the Minister,

may apply to the Supreme Court of Nova Scotia for any or all of the remedies provided pursuant to this Section.

(3) The Supreme Court may hear and determine the matter at any time and, in addition to any other remedy or relief, may make an order

(a) restraining the continuance or repetition of an offence in respect of the same property;

(b) directing the removal or destruction of any structure or part of a structure that contravenes any order, regulation, municipal planning strategy, land-use by-law, development agreement, site plan or statement in force in accordance with this Part and authorizing the municipality or the Director, where an order is not complied with, to enter upon the land and premises with necessary workers and equipment and to remove and destroy the structure, or part of it, at the expense of the owner;

(c) as to the recovery of the expense of removal and destruction and for the enforcement of this Part, order, regulation, land-use by-law or development agreement and for costs as is deemed proper,

and an order may be interlocutory, interim or final.

(4) Where, after the action or proceeding is commenced, it appears that

(a) the offence that was the subject of the action or proceeding may have been done or committed by a person other than the defendant;

(b) the title to the property, or part of or any interest in it, that vested at the commencement of the action or proceeding, has since become vested in a person other than the defendant; or

(c) there has been a fresh offence by the same person or by another person with respect to the same property,

it is not necessary to bring another application and the original application may be amended from time to time and at any time before final judgment to include all parties and all offences and the whole matter of the offences shall be heard, dealt with and determined, notwithstanding that the offences may be offences against different Sections of this Part or against different orders, land-use by-laws, development agreements, regulations or statements of provincial interest.

(5) Where the owner of any property where an offence is taking place or has taken place cannot be found, the municipality or the Director may post a notice of the offence and of the application upon the property. 1998, c. 18, s. 266, 2004, c. 7, s. 16.
Right of entry

267 (1) This Section applies to this Part and Part IX.

(2) A person authorized by the Minister or by a council has the right to enter at all reasonable times in or upon any property within the municipality, without a warrant, for the purposes of an inspection necessary to administer an order, land-use by-law, development agreement, regulation or statement of provincial interest.

(3) The authorized person shall not enter any place actually being used as a dwelling without the consent of the occupier unless the entry is made in daylight hours and written notice of the time of the entry has been given to the occupier at least twenty-four hours in advance of the entry.

(4) Where a judge is satisfied, on evidence under oath, that the entry is refused or no person is present to grant access, the judge may by order authorize entry into or on the property during reasonable hours set by the judge.

(5) Any order made by a judge shall continue in force until the purpose for which entry is required is fulfilled. 1998, c. 18, s. 267.

PART IX

SUBDIVISION

Requirements for subdivision approval

268 (1) An application for subdivision approval shall

(a) be made to the development officer; and

(b) include a plan of subdivision prepared by a Nova Scotia land surveyor.

(2) Subdivision approval is not required for a subdivision

(a) where all lots to be created, including the remainder lot, exceed ten hectares in area;

(b) resulting from an expropriation;

(c) resulting from an acquisition or disposition of land by Her Majesty the Queen in right of the Province or in right of Canada or by an agency of Her Majesty;

(d) of a cemetery into burial lots;

(e) resulting from an acquisition of land by a municipality for municipal purposes;

(ea) resulting from an acquisition of land by a village for village purposes;
(f) resulting from the disposal, by a municipality or Her Majesty the Queen in right of the Province, of a street or part of a street or a former street or part of a former street, including the consolidation of a street or part of a street or a former street or part of a former street with adjacent land;

(fa) resulting from the disposal of a trail or part of a trail, including the consolidation of a trail or part of a trail with adjacent land;

(g) of an abandoned railway right of way;

(h) that is a consolidation of a part of an abandoned railway right of way with adjacent land;

(i) resulting from a lease of land for twenty years or less, including any renewal provisions of the lease;

(i) resulting from the acceptance for registration by the Registrar of Condominiums of a phase of a phased-development condominium that meets the requirements, if any, prescribed by the regulations made pursuant to the Condominium Act;

(ib) resulting from the quieting of a title;

(j) resulting from a devise of land by will executed on or before January 1, 2000.

(3) An affidavit of the person making a disposition or encumbrance of land that would create a subdivision that specifies the exemption from the requirement for approval and the facts that entitle the subdivision to the exemption is sufficient proof that approval of the subdivision is not required, unless the person to whom the disposition or encumbrance is made has notice to the contrary. 1998, c. 18, s. 268; 2002, c. 10, s. 22; 2003, c. 9, s. 68; 2004, c. 7, s. 17; 2006, c. 40, s. 10.

Deemed consolidation

268A (1) Two or more lots that are and have been in common ownership and used together since April 15, 1987, or earlier are deemed to be consolidated if the owner or the owner's agent registers a statutory declaration in the appropriate registry of deeds or records a statutory declaration in the land registration office stating that the lots were in common ownership and used together on or before April 15, 1987, and have continued to be so owned and used, and including the facts that support the statement, the present descriptions of the lots including any property identifiers assigned by Service Nova Scotia and Municipal Relations and the description of the consolidated single lot.

(2) Registration or recording of the statutory declaration referred to in subsection (1) is deemed to consolidate the lots as of the date of registration or recording.

(3) Subdivision approval of the consolidation is not required. 2003, c. 9, s. 69.
**Instrument of subdivision**

269 (1) Notwithstanding clause 268(1)(b), in a county or district municipality where so provided in the provincial subdivision regulations or a subdivision by-law, an application for subdivision approval may be made by instrument of subdivision rather than by a plan of subdivision.

(2) This Section applies only where the subdivision does not create a street or private road and results in

(a) each lot created being at least one hundred thousand square feet in area and having dimensions that would permit it to contain a two hundred and fifty foot diameter circle within its boundaries; or

(b) an increase in size of an existing lot by the addition of a part or all of an abutting lot, if the lot reduced in area complies after the subdivision with the frontage and area if any requirements set out in the provincial subdivision regulations or municipal subdivision by-law, as the case may be.

(3) An instrument of subdivision shall be in the form prescribed in the provincial subdivision regulations.

(4) Except as otherwise provided in this Act, the procedure and requirements for approval of a subdivision by instrument and a reference to a plan of subdivision includes an instrument of subdivision.

(5) For greater certainty, no instrument of subdivision that adds or consolidates parcels or areas of land in different ownerships may be approved by a development officer until the development officer is provided with

(a) executed deeds suitable for registering to effect the addition or consolidation; and

(b) the fees for registering the deeds,

and the development officer shall register the deeds with the approved instrument. 1998, c. 18, s. 269; 2000, c. 9, s. 47; 2005, c. 55, s. 6.

**Provincial subdivision regulations**

270 (1) The Minister shall prescribe provincial subdivision regulations.

(2) Provincial subdivision regulations shall include

(a) procedures for preliminary evaluation and tentative and final approvals;

(b) requirements for preliminary evaluation and tentative and final approvals;
(c) the form of a notice of approval of subdivision;

(d) provisions for the repeal of a subdivision; and

(e) provisions for the referral of an application to a department or agency of the Province or of a municipality.

(3) Provincial subdivision regulations may include

(a) requirements for access to a lot;

(b) requirements respecting the shape of a lot;

(c) where they are not prescribed in a land-use by-law, requirements for minimum lot frontage and minimum lot area;

(d) provisions allowing a waiver of any requirements of the regulations and the circumstances in which a waiver may be allowed;

(e) the fee for the processing of applications for approval or repeal of a subdivision, including registration, recording and filing fees;

(f) procedures and requirements for concept plans;

(g) procedures for the approval of, form of and requirements for approval and registration of instruments of subdivision in a county or district municipality;

(h) requirements for private roads;

(i) any other matter relating to the division of land.

(4) At least thirty days before prescribing or amending provincial subdivision regulations, the Minister shall

(a) send a copy of the proposed regulations to the clerk of every municipality that will be affected by the regulations and invite written comments; and

(b) place a notice in a newspaper circulating in the area that will be affected by the regulations stating where the proposed regulations may be inspected and invite written comments.

(5) Where, on the coming into force of this Act, a municipality has not adopted a subdivision by-law, the municipality is deemed to have adopted the provincial subdivision regulations applicable to the municipality as its subdivision by-law.

(6) A subdivision by-law that is inconsistent with the provincial subdivision regulations is deemed to be amended by the subdivision regulations applicable to the municipality, unless the
by-law provisions are more stringent, implement the municipal planning strategy or, with respect to the regulations concerning instruments of subdivision, do not provide for instruments of subdivision. 1998, c. 18, s. 270; 2001, c. 6, s. 119; 2003, c. 9, s. 70.

**Subdivision by-law**

271 (1) A subdivision by-law applies to the whole of a municipality, but the by-law may contain different requirements for different parts of the municipality.

(2) A subdivision by-law shall include

(a) any requirements prescribed by the provincial subdivision regulations applicable to the municipality unless

   (i) the municipality adopts more stringent requirements, or

   (ii) the municipal requirements implement the municipal planning strategy;

(b) procedures for preliminary evaluation and tentative and final approvals;

(c) requirements for preliminary evaluation and tentative and final approvals;

(d) the form of a notice of approval of subdivision;

(e) provisions for the repeal of a subdivision; and

(f) provisions for the referral of an application to a department or agency of the Province or of the municipality.

(3) A subdivision by-law may include

(a) requirements for access to a lot;

(b) requirements respecting the shape of a lot;

(c) where they are not prescribed in a land-use by-law, minimum lot frontage and minimum lot area;

(d) provisions allowing a waiver of certain requirements of the by-law and the circumstances in which a waiver may be allowed;

(e) procedures for the approval of, form of and requirements for approval and registration of instruments of subdivision in a county or district municipality;

(f) the fee for the processing of applications for approval or repeal of a subdivision, including registration, recording and filing fees;
(g) requirements for the design and construction of streets, private roads, wastewater facilities, stormwater systems, water systems and other services;

(ga) requirements for part of a system for the supply or distribution of electricity or other source of energy or a telecommunications system to be placed underground;

(h) requirements for the transfer to the municipality of useable land, or equivalent value, for trails, park, playground and similar public purposes, and a requirement that, if the land being subdivided has frontage on the ocean, a river or a lake, the land transferred include land with frontage on the ocean, river or lake or land to provide public access to the ocean, river or lake, provided that the land required to be transferred does not exceed

   (i) five per cent of the area of the lots shown to be approved on the final plan of subdivision, or

   (ii) ten per cent of the area of the lots shown to be approved on the final plan of subdivision, if the requirement and the reasons for it are provided for in a municipal planning strategy;

(i) procedures and requirements for concept plan approval;

(j) the identification of transportation reserves and requirements that lots be designed so as not to impede a transportation reserve;

(k) regulate the width of streets or private road rights-of-way on which subdivisions are permitted.

(4) Where a municipal planning strategy so provides, a subdivision by-law may

(a) regulate or prohibit new municipal streets in all, or part, of the municipality where, in the opinion of the council, the streets would be premature;

(b) regulate or prohibit subdivisions on private roads in all, or part, of the municipality;

(c) limit the number of lots that may be created from an area of land in a calendar year.

(5) A subdivision by-law may require that prior to approval of a final plan of subdivision the applicant shall

(a) install water systems, wastewater facilities, stormwater systems and other services in the area of land being subdivided to the standards prescribed by the municipality;

(b) install trees for streets, bus bays, sidewalks and pathways; and

(c) lay out, construct, grade and pave, in whole or in part, any street in the area of land being subdivided to the standards prescribed by the municipality,
or in the alternative, enter into a bond or other security satisfactory to the municipality to

(d) install and provide the water systems, wastewater facilities, stormwater systems and other services in the area of land being subdivided to the standards prescribed by the municipality;

(e) install the trees along streets, bus bays, sidewalks and pathways required by the by-law; and

(f) lay out, construct, grade and pave, in whole or in part, any street in the area of land being subdivided to the standards prescribed by the municipality,

and in either case provide a bond or other security, satisfactory to the municipality, for the maintenance of the services for a maximum of two years from the date the services are accepted by the municipality as having been installed to the standards prescribed by the municipality.

(6) A subdivision by-law may require that an applicant have, or permit an applicant to have, a qualified professional certify to the municipality that the services have been designed and installed to the standards prescribed by the municipality, and the municipality may rely on the certificate so given.

(7) A subdivision by-law may authorize the municipality to require an applicant for subdivision approval to provide water systems, wastewater facilities, stormwater systems and other services, including streets, in the area of land being subdivided with a capacity exceeding the anticipated requirements of the applicant's subdivision, if the municipality reimburses the applicant for any costs incurred with respect to the excess capacity.

(8) Any cost to a municipality pursuant to subsection (7) may, at the option of the council, be recovered by the municipality in the same manner as an infrastructure charge or in another manner.

(9) The procedure for the adoption, amendment, repeal, approval and publication of a subdivision by-law is the same as the procedure prescribed for planning documents.

(10) Notwithstanding the Public Utilities Act and for greater certainty, any by-law made pursuant to this Section and any transfer, bond, security, cost, charge or requirement, fixed or imposed pursuant to this Section, do not require approval by the Board. 1998, c. 18, s. 271; 2001, c. 35, s. 14; 2001, c. 6, s. 119; 2003, c. 9, s. 71; 2004, c. 7, s. 18.

Contents of subdivision by-law

272 (1) A council may, in the subdivision by-law, require a person applying for final approval of a subdivision to

(a) provide, at no cost to the municipality, easements for the drainage of stormwater in those circumstances specified in the subdivision by-law on the land that is proposed to be subdivided or outside that land;
(b) transfer to the municipality land, including easements, that may be necessary to operate and maintain stormwater systems;

(c) enter into an agreement to carry out a drainage plan or grading plan required by a subdivision by-law and to provide security satisfactory to the engineer to secure performance of the agreement.

(2) A subdivision by-law may

(a) specify standards and requirements for an easement required by the subdivision by-law;

(b) set standards and requirements respecting drainage master plans, drainage plans and grading plans;

(c) prescribe when drainage master plans, drainage plans and grading plans are required. *1998, c. 18, s. 272.*

**Land or cash-in-lieu**

273 (1) In this Section, "equivalent value" includes cash or facilities, services or other value in kind, related to parks, playgrounds and similar public purposes or any combination thereof, determined by the municipality to be equivalent to the value of the land as determined by the assessor pursuant to this Section.

(2) Where a subdivision by-law provides for the transfer to the municipality of useable land, the applicant may provide land, equivalent value or a combination of land and equivalent value equal to the amount of the transfer required by the subdivision by-law.

(3) The subdivision by-law may specify the cases in which land only, equivalent value only, or land and equivalent value in a specified combination shall be transferred.

(4) Where equivalent value is to be provided in lieu of transferring land, the amount required shall be determined by an assessor based on the market value of the proposed lots excluding streets, easements and the residue of the land of the applicant, and this valuation may be appealed in the same manner as an assessment.

(5) Where cash is paid in lieu of transferring land, the council shall use the funds for the acquisition of, and capital improvements to, parks, playgrounds and similar public purposes and may use the interest on any funds not expended for those purposes for the operation and maintenance costs of parks, playgrounds and similar public purposes.

(5A) Notwithstanding subsections (5) and (13), the council may transfer

(a) the funds referred to in subsections (5) and (13) to a village or non-profit organization that is providing parks, playgrounds or other recreational facilities in the municipality to be used for the
acquisition of and capital improvements to those parks, playgrounds or other recreational facilities; and

(b) the interest on the funds referred to in subsections (5) and (13) to a village or non-profit organization that is providing parks, playgrounds or other recreational facilities in the municipality to be used for the operation or maintenance of those parks, playgrounds or other recreational facilities.

(6) A subdivision by-law may include a definition of useable land, which may specify a minimum area, minimum dimensions, location and a method of establishing a minimum quality of the land.

(7) Useable land does not include any streets or easements conveyed to the municipality.

(8) The area of useable land to be conveyed to the municipality is calculated on the area of the lots to be approved, as shown on the final plan of subdivision, excluding streets and the residue of the land of the applicant.

(9) A development officer shall accept any land offered by an applicant that meets the definition of useable land contained in the subdivision by-law.

(10) An applicant may, with the approval of the council, convey to the municipality an area of land in the municipality of equal value outside the area being subdivided, in lieu of land in the subdivision.

(11) An applicant may provide a bond or other security acceptable to the council for the conveyance to the municipality of land in a future phase of the subdivision rather than conveying land from the approved phase of the subdivision or equivalent value.

(12) Any land conveyed to a municipality pursuant to this Section shall be

(a) free and clear of all encumbrances except an easement or right of way that does not materially interfere with the use and enjoyment of the land; and

(b) used for parks, playgrounds and similar public purposes.

(13) Where council determines that any land transferred pursuant to this Section might no longer be needed for parks, playgrounds or similar public purposes, the council may sell the land, after notifying the owners of lots in the subdivision with respect to which the land was conveyed to the municipality, by notice published in a newspaper circulating in the municipality at least fourteen days prior to the council meeting at which a decision to sell will be made, and the proceeds shall be used for parks, playgrounds and similar public purposes. 1998, c. 18, s. 273; 2003, c. 9, s. 72; 2004, c. 7, s. 19; 2006, c. 40, s. 11.

**Infrastructure charges**
A municipal planning strategy may authorize the inclusion of provisions for infrastructure charges in a subdivision by-law.

(2) Infrastructure charges for

(a) new or expanded water systems;

(b) new or expanded wastewater facilities;

(c) new or expanded stormwater systems;

(d) new or expanded streets;

(da) new or expanded solid-waste management facilities;

(e) new traffic signs and signals and new or expanded transit facilities,

may be imposed in a subdivision by-law to recover all, or part, of the capital costs incurred, or anticipated to be incurred, by a municipality by reason of the subdivision and future development of land and infrastructure charges for land, planning, studies, engineering, surveying and legal costs incurred with respect to any of them.

(3) The subdivision by-law shall set out the infrastructure charge areas in which infrastructure charges are to be levied, the purposes for which infrastructure charges are to be levied and the amount of, or method of calculating, each infrastructure charge.

(4) Infrastructure charges may be set at different levels related to the proposed land use, zoning, lot size and number of lots in a subdivision and the anticipated servicing requirements for the infrastructure charge area.

(5) Infrastructure charges may not be imposed if an infrastructure charge has been paid with respect to the area of land, unless further subdivision of the land will impose additional costs on the municipality.

(6) An infrastructure charge may only be used for the purpose for which it is collected.

(7) Final approval of a subdivision shall not be granted unless the infrastructure charges are paid or the applicant has entered into an agreement with the municipality securing the payment of the infrastructure charges.

(8) Infrastructure charges are a first lien on the land being subdivided and may be collected in the same manner as taxes.

(9) A by-law in effect on the date this Act comes into force that provides for a trunk sewer tax imposed on each lot in a new or existing subdivision is deemed to be a by-law made pursuant to this Section.
(10) Notwithstanding the Public Utilities Act and for greater certainty, any by-law made pursuant to this Section and any charge set, levied or imposed pursuant to this Section do not require the approval of the Board. *1998, c. 18, s. 274; 2001, c. 35, s. 15; 2003, c. 9, s. 73; 2006, c. 40, s. 12.*

**Infrastructure charges agreement**

275 (1) An applicant and a municipality may enter into an infrastructure charges agreement that may

(a) provide for the payment of infrastructure charges in installments;

(b) permit the applicant to provide certain services or extended services in lieu of the payment of all, or part, of the charge;

(c) provide for security to ensure that the infrastructure charges are paid when due;

(d) provide for any other matter necessary or desirable to effect the agreement.

(2) A subdivision by-law may prescribe the circumstances in which an infrastructure charges agreement may be entered into and the general terms that such an agreement shall contain. *1998, c. 18, s. 275.*

**Effect of infrastructure charges agreement**

276 An infrastructure charges agreement

(a) is binding on the land that is subdivided;

(b) shall be registered in the registry or, in the case of land registered pursuant to the Land Registration Act, shall be recorded in the land registration office in the register of each parcel created or altered by the subdivision, and shall be indexed as a conveyance to and from the owner of the land that is subdivided; and

(c) is binding on each individual lot in a subdivision, to the extent specified in the agreement. *1998, c. 18, s. 276; 2001, c. 6, s. 119.*

**Time limits for subdivision approval application**

277 (1) Within fourteen days of receiving an application for subdivision approval, the development officer shall

(a) determine if the application is complete; and

(b) where the application is incomplete, notify the applicant in writing, advising what is required to complete the application.
(2) A completed application for subdivision approval that is neither approved nor refused within ninety days after it is received is deemed to be refused, unless the applicant and the development officer agree, in writing, to an extension.

(3) The development officer shall inform the applicant of the reasons for a refusal in writing. 1998, c. 18, s. 277; 2003, c. 9, s. 74.

**Limitations on granting subdivision approval**

278 (1) Subject to Section 283, an application for subdivision approval shall be approved if the proposed subdivision is in accordance with the enactments in effect at the time a complete application is received by the development officer.

(2) An application for subdivision approval shall be refused where

(a) the proposed use of the lots being created is not permitted by the land-use by-law;

(b) the proposed lots do not comply with a requirement of the land-use by-law, unless a variance has been granted with respect to the requirement;

(c) the proposed lots would require an on-site sewage disposal system and the proposed lots do not comply with requirements established pursuant to the Environment Act for on-site sewage disposal systems, unless the owner has been granted an exemption from technical requirements by the Minister of the Environment, or a person designated by that Minister;

(d) the development officer is made aware of a discrepancy among survey plans that, if either claimant were completely successful in a claim, would result in a lot that cannot be approved;

(e) the proposed access to a street does not meet the requirements of the municipality or the Province;

(f) the proposed subdivision does not meet the requirements of the subdivision by-law and no variance is granted; or

(g) the proposed subdivision is inconsistent with a proposed subdivision by-law or a proposed amendment to a subdivision by-law, for a period of one hundred and fifty days from the publication of the first notice advertising the council's intention to adopt or amend the subdivision by-law. 1998, c. 18, s. 278; 2001, c. 35, s. 16.

**Lots not meeting requirements**

279 Where a subdivision by-law or a land use by-law specifies minimum lot dimensions or lot area and the subdivision by-law so provides, the development officer may approve a plan of subdivision that shows not more than two lots that do not meet these requirements, provided that the lot dimensions and area are not less than ninety per cent of the required minimums. 1998, c. 18, s. 279; 2004, c. 44, s. 3.
Streets

280 (1) No plan of subdivision may be approved by a development officer where

(a) the plan shows a street to be owned by the municipality, unless the engineer has approved the design and construction standards of the street, and any intersection with a street, owned by the municipality;

(b) the plan shows a proposed intersection with a street owned by the Province, unless the intersection has been approved by the Minister of Transportation and Public Works, or a person designated by that Minister; or

(c) the Minister of Transportation and Public Works, or a person designated by that Minister, or the engineer advises that the probable volume of traffic from the development will create unsafe conditions for which no remedial arrangements have been made.

(2) The owners of lots shown on a plan of subdivision as abutting on a private right of way are deemed to have an easement over the private right of way for vehicular and pedestrian access to the lot and for the installation of electricity, telephone and other services to the lot.

(3) The new streets and new extensions of streets shown on a plan of subdivision, excluding roads that are shown on the plan as private roads, are vested absolutely in the municipality in which they are situate when the final approved plan is filed in the registry. 1998, c. 18, s. 280.

Requirement to approve plan of subdivision

281 A development officer shall approve a plan of subdivision prepared to carry out a development agreement authorized by a municipal planning strategy and land-use by-law, notwithstanding that the plan does not comply with the subdivision by-law, if the plan complies with the terms of the agreement. 1998, c. 18, s. 281.

Underlying lots deemed consolidated

281A Where a subdivision plan shows a remainder lot that is made up of the remainder of two or more underlying lots that have not been consolidated, the underlying lots are deemed to be consolidated before approval of the subdivision plan unless the application and plan indicate that they are not and if

(a) subsection 282(1) is complied with; and

(b) the remainder lot is ten hectares or less in area, the subdivision plan includes a survey of the entirety of the remainder lot, in which case, the development officer shall register the deeds respecting the remainder lot, if any, with the approved plan. 2003, c. 9, s. 75.
**Subdivision that adds or consolidates**

282 (1) No plan of subdivision that adds or consolidates parcels or areas of land in different ownerships may be approved by a development officer until the development officer is provided with

(a) executed deeds suitable for registering to effect the addition or consolidation; and

(b) the fees for registering the deeds.

(2) The development officer shall register the deeds with the approved plan. *1998, c. 18, s. 282; 2000, c. 9, s. 48.*

**Approval by development officer**

282A (1) No plan or instrument of subdivision that, under the Land Registration Act, is not acceptable for registration pursuant to the Registry Act, may be approved by a development officer unless the development officer is provided with proof that the parcels affected are all registered pursuant to the Land Registration Act.

(2) No plan or instrument of subdivision that adds or consolidates parcels or areas of land, that, under the Land Registration Act, is not acceptable for registration pursuant to the Registry Act, may be approved by a development officer unless the development officer is provided with proof that both the parcel from which land is taken and the parcel to which land is added are registered pursuant to the Land Registration Act.

(3) A deed to effect a consolidation provided to a development officer pursuant to Section 282 shall, where the deed is to be registered pursuant to the Land Registration Act, include a legal description of the consolidated parcel.

(4) The approval of a plan or instrument of subdivision contrary to subsection (1) or (2) shall be cancelled if the plan or instrument of subdivision is not accepted for registration pursuant to the Land Registration Act. *2001, c. 6, s. 119; 2004, c. 38, s. 26.*

**Tentative plan of subdivision**

283 Where a tentative plan of subdivision is approved pursuant to the subdivision by-law, a lot or lots shown on the approved tentative plan shall be approved at the final plan of subdivision stage, if

(a) the lots are substantially the same as shown on the tentative plan;

(b) any conditions on the approval of the tentative plan have been met;

(c) the services required by the subdivision by-law at the time of approval of the tentative plan have been constructed and any municipal service has been accepted by the municipality or
acceptable security has been provided to the municipality to ensure the construction of the service; and

(d) the complete application for final subdivision plan approval is received within two years of the date of the approval of the tentative plan. 1998, c. 18, s. 283; 2001, c. 35, s. 17.

Appeals to the Board

284 The refusal to approve a concept plan or tentative or final plan of subdivision may be appealed to the Board by the applicant in accordance with the procedure for an appeal to the Board set out in Part VIII. 1998, c. 18, s. 284.

Filing of approved final plan of subdivision

285 (1) No final plan of subdivision shall be filed in the registry unless the plan has been approved by a development officer in accordance with this Part.

(2) A development officer, or a person acting for a development officer, shall, within seven days of the approval of a final plan of subdivision, forward two original copies of the approved plan to the registry, one of which is to be filed in the registry.

(3) At the same time as an approved final plan of subdivision is filed in the registry, a notice of the approved final plan of subdivision shall be registered in the registry.

(4) A notice of the approved final plan of subdivision shall be indexed as a conveyance from the person whose land is divided.

(5) Where an approved final plan of subdivision effects an addition or consolidation, the notice of the plan shall be indexed as a conveyance from the person whose land is divided and from the person whose land is enlarged as a result of the addition or consolidation. 1998, c. 18, s. 285; 2006, c. 40, s. 13.

Lot crossing municipal boundary

286 Where a lot to be created by a plan of subdivision crosses a municipal boundary, an approval is required from each municipality in which the proposed lot is located. 1998, c. 18, s. 286.

When subdivision takes effect

287 (1) A subdivision of land takes effect when the plan of subdivision is filed in the registry.

(2) No deed, mortgage, lease or other instrument which would result in the subdivision of land for which subdivision approval is required has effect until the subdivision is approved and the plan is filed.
(3) A deed, mortgage, lease or other instrument, which purports to subdivide land and is executed before the approval and the filing of a plan of subdivision in the registry in accordance with this Part, is deemed

(a) to have been executed immediately after the filing of the plan of subdivision; and

(b) where the deed, mortgage, lease or other instrument has been registered in the registry, to have been duly registered at the time of the actual registration.

(4) Where two or more deeds, mortgages, leases or other instruments are deemed to have been executed at the same time, they are deemed to have been executed in the same order as they were actually executed.

(5) Where a deed, mortgage, lease or other instrument is made which results in the subdivision of land in accordance with a plan or instrument of subdivision duly approved and filed in the registry, the amendment of the plan or instrument does not restrict the right of the owner, mortgagee, lessee or other holder to execute other deeds, mortgages, leases or instruments in which the property is described as it is described in the original deed, mortgage, lease or other instrument. 1998, c. 18, s. 287.

Amendment of approved final plan of subdivision

288 (1) An approved final plan of subdivision may be amended, provided the amendment does not materially alter the boundaries of a lot created by the approved plan.

(2) The provisions of this Act that apply to an approved final plan of subdivision apply to an amended plan of subdivision, except the effective date of the approval of the amended plan is the same as that of the approved final plan of subdivision. 1998, c. 18, s. 288; 2003, c. 9, s. 76.

Amendment or repeal of instrument of subdivision

289 An instrument of subdivision approved pursuant to this Act or the former Planning Act may be amended or repealed in the same manner, and with the same effect, as an approved final plan of subdivision. 1998, c. 18, s. 289.

Subdivision for which no approval required

290 Nothing in this Act prevents an application for approval of or the approval of, a subdivision for which no approval is required. 1998, c. 18, s. 290.

Title or interest not affected

291 (1) A failure to comply with

(a) this Act; or
(b) the former Planning Act,

or a regulation or by-law made thereunder does not affect the creation of a title or interest in real property conveyed, or purported to have been conveyed, by deed, lease, mortgage or other instrument before April 16, 1987.

(2) Subsection (1) does not affect the rights acquired by a person from a judgment or order of a court given or made in litigation or proceedings commenced before April 16, 1987. 1998, c. 18, s. 291.

Former Planning Act

292 A subdivision by-law adopted pursuant to a former Planning Act is a subdivision by-law within the meaning of this Act, to the extent that it is consistent with this Act. 1998, c. 18, s. 292.

PART X

FIRE AND EMERGENCY SERVICES

Municipal role

293 A municipality may maintain and provide fire and emergency services by providing the service, assisting others to provide the service, working with others to provide the service or a combination of means. 1998, c. 18, s. 293.

Registration as fire department

294 (1) A body corporate may apply to a municipality for registration as a fire department.

(2) A municipality shall not refuse to register a body corporate that complies with this Act if the

(a) municipality is satisfied that the body corporate is capable of providing the services it offers to provide;

(b) body corporate carries liability insurance, as required by the municipality;

(c) body corporate does not provide the fire services for profit; and

(d) municipality does not provide the same services for the same area.

(3) A fire department, including a fire department of a municipality, village or fire protection district, shall register in each municipality in which it provides emergency services.

(4) A registered fire department shall provide the municipality with a list of specific emergency services it will endeavour to provide and the area in which the services will be provided.
(5) Registration continues in force until withdrawn by the municipality for cause or the fire department requests that the registration be revoked.

(6) A municipality may grant or lend money to, or guarantee a loan for, a registered fire department for operating or capital purposes.

(7) A municipality may grant or lend assets, without charge, to a registered fire department.

(8) Registration does not make a fire department an agent of a municipality.

(9) A registered fire department is not a municipal enterprise pursuant to the Municipal Finance Corporation Act. 1998, c. 18, s. 294.

Registration as emergency services provider

295 (1) A body corporate may apply to a municipality for registration as an emergency services provider to provide emergency services other than fire services.

(2) A municipality shall not refuse to register a body corporate that complies with this Act if the

(a) municipality is satisfied that the body corporate is capable of providing the services it has undertaken to provide;

(b) body corporate carries liability insurance, as required by the municipality;

(c) body corporate does not provide the emergency services for profit; and

(d) municipality does not provide the same services for the same area.

(3) A body corporate that applies pursuant to subsection (1) shall register in each municipality in which it provides emergency services.

(4) A registered emergency services provider shall provide the municipality with a list of the specific emergency services it will endeavour to provide and the area in which the services will be provided.

(5) Registration continues in force until withdrawn by the municipality for cause or the emergency services provider requests that the registration be revoked.

(6) A municipality may grant or lend money to, or guarantee a loan for, a registered emergency services provider for operating or capital purposes.

(7) A municipality may grant or lend assets, without charge, to a registered emergency services provider.

(8) Registration does not make an emergency services provider an agent of a municipality.
(9) A registered emergency services provider is not a municipal enterprise pursuant to the Municipal Finance Corporation Act. 1998, c. 18, s. 295.

Policies

296 (1) The council may make policies respecting full-time, volunteer and composite fire departments and emergency service providers in the municipality.

(2) Policies for fire departments and emergency service providers may include

(a) requirements and procedures for registration;

(b) personnel policies with respect to those members who are employees of the municipality;

(c) the manner of accounting to the council for the use of funds provided by the municipality;

(d) an annual meeting to report to the public respecting fire and emergency services;

(e) such other matters as are necessary and expedient for the provision of emergency services in the municipality.

(3) The council may require proof of compliance with its policies before advancing any funds. 1998, c. 18, s. 296.

Powers where fire

297 (1) When any fire, rescue or emergency occurs, the fire chief or other officer in charge, and any person under the direction of that officer, shall endeavour to extinguish the fire and prevent it from spreading, conduct the rescue or deal with the emergency and, for that purpose, may

(a) command the assistance of persons present and any inhabitant of the municipality;

(b) remove property from buildings on fire or in danger of fire;

(c) take charge of property;

(d) enter, break into or tear down any building;

(e) exclude and remove persons and vehicles from the building or vicinity; and

(f) generally do all things necessary to respond to the emergency.

(2) It is an offence to disobey any lawful order or command of the officer in charge.
(3) Where a fire alarm is given or the officer in charge has reason to believe that a fire exists on any premises, the officer in charge and any person under the direction of that officer may enter or break into any building for the purpose of ascertaining whether a fire exists.

(4) The officer in charge may direct that a building be pulled down or otherwise destroyed if, in the judgment of that officer, doing so will tend to contain a fire or protect the public from a dangerous condition.

(5) A municipality, a village, a fire protection district, a fire department, an emergency services provider and an officer in charge, and a person acting under the direction or authority of that officer, are not liable for an act done in the exercise of any of the powers conferred by this Section. 1998, c. 18, s. 297.

298 repealed 2002, c. 6, s. 56.

Offence

299 It is an offence to interfere with

(a) efforts of a member of a fire department or emergency services provider to extinguish fires and render assistance in emergencies; and

(b) publicly or privately-owned fire-fighting, rescue or emergency facilities and equipment and hydrants. 1998, c. 18, s. 299.

No liability

300 A municipality, a village, a fire protection district, an employee of a municipality, village or fire protection district, a member of the fire department of a municipality, village or fire protection district, a registered fire department, a member of a registered fire department, a registered emergency services provider and a member of a registered emergency services provider are not liable for an act or omission in providing, or failing to provide, an emergency service, unless they are grossly negligent. 1998, c. 18, s. 300.

When action lies

301 (1) No action lies with respect to an act or omission in providing, or failing to provide, an emergency service against an employee of a municipality, village or fire protection district, a member of the fire department of a municipality, village, fire protection district, registered fire department or registered emergency services provider.

(2) Notwithstanding subsection (1) and subject to Section 300, an action may lie against a municipality, village, fire protection district, registered fire department or registered emergency services provider with respect to its employee, member of its fire department or member. 1998, c. 18, s. 301.
Mutual aid

302 (1) A municipality may assist at fires, rescues or other emergencies occurring outside its boundaries.

(2) A municipality may agree with municipalities, villages, fire protection districts, federal and provincial departments and agencies or others to provide assistance at fires, rescues and other emergencies and to receive assistance at fires, rescues and other emergencies.

(3) A fire department that assists a registered fire department pursuant to a mutual aid agreement is not required to register and is entitled to all of the protections provided by this Act for the assisted fire department.

(4) An emergency services provider that assists a registered fire department or registered emergency services provider pursuant to a mutual aid agreement is not required to register and is entitled to all of the protections provided in this Act for the assisted fire department or emergency services provider. 1998, c. 18, s. 302.

PART XI

ELECTRICAL SERVICES

Contract with N.S. Power or municipality

303 (1) Subject to the Public Utilities Act, a council may contract with Nova Scotia Power Incorporated or another municipality for transmission and supply of electric power.

(2) A municipality that has entered into a contract for electric power or that generates electric power may

(a) use the electric power for the purpose of lighting streets, highways and property of the municipality or for any other purpose of the municipality;

(b) distribute the electric power throughout the municipality;

(c) establish and maintain an electrical distribution system in the municipality;

(d) sell or dispose of the electric power, or any part thereof, to a person or body;

(e) dispose of the whole of the electric power or any portion that it does not require, or otherwise dispose of, to any person, firm or corporation having authority within the municipality to supply electric power or to operate an electric tramway;

(f) employ required employees;
(g) contract for the supply and distribution of electric power in another municipality, if the council of the other municipality agrees;

(h) acquire real and personal property and construct and operate facilities for the generation, transmission and distribution of electric power;

(i) include in its yearly estimates all amounts that are necessary or proper for the due carrying out of the purposes referred to in this subsection.

(3) Any agreement, contract, change in the cost of electric power, payment extension, connection between systems or diversion of power from one system to another is subject to the approval of the Board. 1998, c. 18, s. 303.

Lien and power cut-off

304 (1) The amount due to a municipality for the provision of electrical power is, subject only to municipal taxes, a first lien on the property of the person to whom the electrical power was provided, in priority to all prior liens or encumbrances on the property.

(2) The lien applies only to the amount due to the municipality for a period not exceeding ninety days.

(3) Where a person fails to pay a municipality the amount due for electric power within one month after the account is due, the municipality may cut off the supply of electricity to that person and may recover the amount due up to that time, despite a contract with the person to furnish electric power for a longer period.

(4) The lien referred to in subsection (1) is not a charge against a parcel registered pursuant to the Land Registration Act until a certificate evidencing the lien has been recorded in the register of the parcel.

(5) The municipality may record a notice of the lien referred to in subsection (1) in the parcel register of any property owned by a person to whom electrical power was provided to which the lien applies and shall thereupon serve that person with a copy of the lien and recording particulars.

(6) Upon satisfaction of the lien including payment of the fees for recording the lien and the release, the municipality shall record a release of the lien in the parcel registers in which the lien was recorded. 1998, c. 18, s. 304; 2001, c. 6, s. 119.

N.S. Power Inc. powers

305 (1) Nova Scotia Power Incorporated may extend the time for payment of any sum due it by a municipality, provided the municipality pays interest on any sum due Nova Scotia Power Incorporated at such rate of interest, not exceeding seven per cent per annum, as Nova Scotia Power Incorporated may determine.
(2) Nova Scotia Power Incorporated may make any connections between systems to divert power from one system to another system.

(3) The manner of any connection between systems, the amount to be charged to a system receiving power from a connection and the amount to be credited to a system supplying power shall be determined by Nova Scotia Power Incorporated. 1998, c. 18, s. 305.

Power to sell system

306 A municipality may sell its system for developing or distributing electric power, including property used in connection with it. 1998, c. 18, s. 306.

PART XII

STREETS AND HIGHWAYS

Interpretation

307 In this Part, "street" means a public street, highway, road, lane, sidewalk, thoroughfare, bridge, square and the curbs, gutters, culverts and retaining walls in connection therewith, but does not include streets vested in Her Majesty in right of the Province. 1998, c. 18, s. 307; 2000, c. 9, s. 49; 2008, c. 39, s. 388.

Streets vested in municipality

308 (1) All streets in a municipality are vested absolutely in the municipality.

(2) In so far as is consistent with their use by the public, a council has full control over the streets in the municipality.

(3) No road, or allowance for a road, becomes a street until the council formally accepts the road or allowance, or the road or allowance is vested in the municipality according to law.

(4) Possession, occupation, use or obstruction of a street, or a part of a street, does not give and never has given any estate, right or title to the street. 1998, c. 18, s. 308.

By-laws for protection of streets

309 (1) The council may make by-laws for the protection of streets and may limit the by-law to certain streets, or to certain times of the year, or to both.

(2) For the purpose of the Motor Vehicle Act, the council is a local authority.

(3) The council may, by policy, limit or prohibit the use of a mall by vehicles, or classes of vehicles, and may restrict or prohibit parking on a mall.
(4) The council may, by by-law

(a) establish a pedestrian mall on a street or any other land owned by the municipality;

(b) prohibit any person from using any vehicle or apparatus on a sidewalk in the municipality;

(c) prohibit any person from taking or riding any animal on any sidewalk in the municipality;

(d) designate any street as a controlled access street;

(e) regulate or prohibit access to a controlled access street.

(5) No person may

(a) construct or use a road or gate connected with, or opening upon, the controlled access street; or

(b) offer for sale goods within the limit of the controlled access street. 1998, c. 18, s. 309; 2006, c. 40, s. 14.

Power to make by-laws

310 (1) The council may, by by-law

(a) require the owner, occupier or person in charge of a property to clear snow and ice from the sidewalks adjoining the property;

(b) prescribe measures to be taken by the owners, occupiers or persons in charge for the abatement of dangerous conditions arising from the presence of snow and ice on the sidewalks adjoining the property.

(2) Where a person required by a by-law made pursuant to subsection (1) fails to clear the ice and snow from the sidewalk forthwith after notice to do so or to take the necessary measures for the abatement of any dangerous condition arising from the presence of the snow and ice, the engineer may have the snow and ice cleared and any necessary measures to abate dangerous conditions taken.

(3) The council may, by by-law

(a) require the owner of a property to remove ice or icicles from part of a building overhanging or abutting a sidewalk;

(b) require the owner of lands abutting a street to maintain an area of vegetation between the streetline and the main travelled way. 1998, c. 18, s. 310.

Traffic authority
311 (1) In this Section, "highway" and "Provincial Traffic Authority" have the same meaning as in the Motor Vehicle Act.

(2) The council may, by policy, appoint a traffic authority for all or part of the municipality.

(3) A traffic authority has, within the municipality, the powers of a traffic authority of a city or town pursuant to the Motor Vehicle Act.

(4) The clerk shall notify the Provincial Traffic Authority of the appointment of a traffic authority.

(5) Where there is no traffic authority appointed by a council, the Minister of Transportation and Public Works may appoint a traffic authority to hold office until the council appoints a traffic authority.

(6) Where it appears to the Minister of Transportation and Public Works that a traffic authority appointed by the council is not performing the duties and functions of a traffic authority, the Minister of Transportation and Public Works may cancel the appointment of the traffic authority.

(7) The Provincial Traffic Authority has, with respect to

(a) highways vested in Her Majesty in right of the Province;

(b) highways in areas of a municipality for which there is no traffic authority; and

(c) highways in a municipality that have been designated by the Minister of Transportation and Public Works as main travelled or through highways,

the powers conferred upon a traffic authority by or pursuant to the Motor Vehicle Act.

(8) The traffic authority for a municipality has, with respect to highways in the municipality, excluding those for which the Provincial Traffic Authority has authority, the powers conferred upon a traffic authority by or pursuant to the Motor Vehicle Act. 1998, c. 18, s. 311.

Street related powers

312 (1) A council may design, lay out, open, expand, construct, maintain, improve, alter, repair, light, water, clean, and clear streets in the municipality.

(2) When a street is laid out, opened or expanded, a survey plan shall be filed in the registry.

(3) The council may expend funds for the purpose of clearing snow and ice from the streets, sidewalks and public places in all, or part, of the municipality. 1998, c. 18, s. 312.

Civic addresses
313 The council may

(a) by by-law, adopt a system for assigning civic numbers to properties, including buildings, and other locations;

(b) by by-law, require owners or occupiers of property to post the correct civic number prominently on their properties, with power to prescribe the size, design and location of the civic number that the owner or occupier is so required to post, and the manner in which it is posted;

(c) by policy, name or rename any street or private road;

(d) post the name of any street or private road, including posting the name on private property;

(e) by by-law, require the owner of land that is a private road to

   (i) apply for permission to erect a sign or signpost that identifies the road by the name assigned to it pursuant to clause (c) to any person or authority whose permission is required by law to erect the sign or signpost and use the owner's best efforts to obtain such permission, and

   (ii) erect a sign or signpost of such size and design, in such location and in such a manner as is prescribed by the by-law, where permission is obtained to erect the sign or signpost in accordance with subclause (i). 1998, c. 18, s. 313; 2007, c. 47, s. 1.

Street encroachment

314 (1) Where any part of a street, other than the travelled way, has been built upon and it is determined that the encroachment was made in error, the engineer may permit, in accordance with any by-law made pursuant to subsection (2), the encroachment to continue until such time as the building or structure encroaching upon the street is taken down or destroyed.

(2) A council may, by by-law, regulate encroachments upon, under or over streets, including stipulating the period of time an encroachment may remain and the entering into of agreements, including terms and conditions, for particular encroachments. 1998, c. 18, s. 314.

Street closure

315 (1) The council may, by policy, permanently close any street or part of a street and the council shall hold a public hearing before passing the policy.

(1A) Notwithstanding subsection (1), where a street or part of a street is being altered, improved or redesigned, part of that street may be closed without holding a public hearing under subsection (1) if

(a) the part of the street that remains open
(i) is open to vehicular and pedestrian traffic, and

(ii) meets all the municipal standards; and

(b) the part of the street that is closed

(i) is determined by the engineer to be surplus, and

(ii) is worth less than fifty thousand dollars.

(2) The council shall give notice of its intent to close the street by advertisement in a newspaper circulating in the municipality.

(3) The notice shall set out the time and place of the public hearing at which those in favour or opposed to the street closing will be heard and describe the street to be closed sufficiently to identify it.

(4) A copy of the notice shall be mailed to the Minister of Transportation and Public Works before the public hearing.

(5) A copy of the policy passed by the council, certified by the clerk under the seal of the municipality, incorporating a survey or a metes and bounds description of the street that is closed, shall be filed in the registry and with the Minister of Transportation and Public Works.

(6) Upon filing the policy in the registry, all rights of public user in the land described in the policy are forever extinguished and the municipality may sell and convey the land or may subsequently reopen the land as a street in the manner required by this Act. 1998, c. 18, s. 315; 2004, c. 44, s. 4.

**Contribution to cost of underground wiring**

316 Where a council determines that wires and other parts of an electrical distribution or telecommunications system be placed underground, the council may contribute to the cost. 1998, c. 18, s. 316.

**Work on a street**

317 (1) No person shall break the surface of a street without the permission of the engineer.

(2) A council may, by policy, prescribe the terms upon which a permit to break the surface of a street may be granted, including setting a fee for the permit and requiring security to be posted to ensure that the street is restored.

(3) No person shall construct or widen a driveway, or other access to a street, without the permission of the engineer. 1998, c. 18, s. 317.

**Obstruction of street**
318 (1) Except as otherwise provided in this Act, no person shall

(a) obstruct a street in a municipality;

(b) erect, construct or place a building or structure, fence, railing, wall, tree or hedge or part of them upon a street;

(c) deposit any snow or ice on the travelled way of a street;

(d) deposit any snow or ice near a portion of the travelled way of a street so as to hinder clearing of the travelled pathway;

(e) prevent water flowing from a street on to the adjoining land;

(f) cause or permit water to flow over a street, except as directed by the engineer or council;

(g) deposit, or permit to accumulate, sewage, refuse, garbage, rubbish or other matter on a street or in a drain, gutter, sluice or watercourse on a street; or

(h) cause or permit sewage, refuse, garbage, rubbish or any other matter to discharge or flow upon a street or into a drain, gutter, sluice or watercourse on a street.

(2) An owner or occupant of land who collects water upon the land and turns or allows the water to flow upon a street is liable for all damage to the street, gutters or drains occasioned thereby.

(3) Where, as a result of the collection of the water, the flow requires, in the opinion of the engineer, the construction of a larger drain, sluice or culvert on the street, or makes necessary any alteration in the street or the building of new drains, sluices or culverts, the person is liable to pay the cost of the alteration or construction.

(4) Where a person is in apparent contravention of this Section, the engineer may serve notice on the person to remedy the contravention and, where the condition is not remedied within the time specified in the notice, the engineer may cause the condition to be remedied.

(5) Where an obstruction is a structure of any kind, the engineer may require the owner of the structure to remove the structure from the street within such time as the engineer specifies.

(6) Where the structure is not removed within the time specified, the engineer may remove, demolish or destroy the structure in such manner as is deemed expedient. 1998, c. 18, s. 318; 2000, c. 9, s. 50.

Public Utilities Act applies

319 Section 78 of the Public Utilities Act applies to the erection or placement of a pole, wire, conduit or pipe in, upon, along, under or across a street. 1998, c. 18, s. 319.
Removal of sign or billboard

320 (1) The engineer may require an owner or occupant of land adjoining a street to remove a sign or billboard on the land that, in the opinion of the engineer, is a source of danger to traffic on the street.

(2) Where the owner of the land fails to remove the sign or billboard within fourteen days after receipt of notice from the engineer, the engineer may cause the sign or billboard to be removed. 1998, c. 18, s. 320.

Dangerous vegetation

321 (1) The engineer may require an owner or occupant of land adjoining a street to remove or trim a tree, bush, shrub, hedge or other vegetation that, in the opinion of the engineer, is a source of danger to traffic on the street.

(2) Where the owner of the land fails to remove or trim the vegetation within fourteen days after receipt of notice from the engineer, the engineer may cause the vegetation to be removed or trimmed. 1998, c. 18, s. 321.

Temporary purposes

322 The engineer may

(a) permit a person to use a portion of a street for construction or other temporary purpose;

(b) temporarily close a street, or part thereof, for the protection of the public, to allow work to be done on the street or on lands and buildings adjacent to the street or for any other purpose beneficial to the public interest. 1998, c. 18, s. 322.

Power to enter land

323 (1) The engineer may

(a) enter upon land adjoining a street and erect and maintain snow fences on it or take down, alter or remove a fence or obstruction of any kind that causes drifts or an accumulation of snow so as to impede or obstruct traffic;

(b) at any time and from time to time, construct, open, maintain or repair a drain, gutter, sluice or watercourse upon land adjoining a street and for such purpose may, at any time and from time to time, enter into and upon such land.

(2) A person who hinders or obstructs the engineer in the exercise of a power or authority conferred by this Section is guilty of an offence. 1998, c. 18, s. 323.

Motor Vehicle Act does not apply
324 A by-law passed pursuant to this Part is not subject to the Motor Vehicle Act. 1998, c. 18, s. 324.

PART XIII

SOLID-WASTE RESOURCE MANAGEMENT

By-law regarding solid waste

325 The council may make by-laws respecting solid waste, including, but not limited to,

(a) prohibiting persons from depositing any solid waste except at a solid-waste management facility;

(b) regulating the disposal, collection and removal of solid waste;

(c) regulating the use of containers for solid waste;

(d) licensing persons engaged in the business of removing or collecting solid waste, regulating the operation of the business and prohibiting, in whole or in part, the operation of such a business by a person not holding a licence;

(e) prescribing the materials that may or may not be deposited at a solid-waste management facility of the municipality or in which the municipality participates;

(f) prescribing the terms and conditions under which a deposit may be made at a solid-waste management facility of the municipality or in which the municipality participates, including the amount and manner of payment of any fees and charges to be paid for the deposit;

(g) requiring the separation of solid waste prior to collection;

(h) setting fees or charges for removal of solid waste;

(i) requiring compliance with a waste resource diversion strategy;

(j) respecting anything required to implement the integrated solid-waste resource management strategy of the municipality. 1998, c. 18, s. 325.

Solid-waste management

326 (1) A municipality may provide compensation to an area, to the property owners in an area or to the residents of an area in which a solid-waste management facility is located in amounts, and under the conditions, determined by the council.

(2) A municipality may contract with other municipalities or persons for the use of any component of its solid-waste management program. 1998, c. 18, s. 326.
PART XIV

SEWERS

Prohibition

327 No person shall injure or remove any portion of wastewater facilities or a stormwater system, except as directed by the engineer. 1998, c. 18, s. 327.

Policy for standards and specifications

328 (1) The council may, by policy, prescribe standards and specifications for connections to wastewater facilities and stormwater systems and the conditions under which connections may be made.

(2) No person shall make a connection to wastewater facilities or a stormwater system

(a) in violation of any policy or by-law made pursuant to this Act;

(b) without the approval of the engineer. 1998, c. 18, s. 328.

Building service connection

329 (1) An owner is responsible for the design, construction and maintenance of that part of a building service connection determined by the council or village commission by by-law, whether on privately-owned property or not.

(2) The construction of a building service connection is subject to the supervision of the engineer.

(3) A building service connection shall be of the size and at the grade, and with the mode of piercing or opening into the sewer, and generally be constructed in the manner and of the materials approved by the engineer.

(4) No building service connection shall be covered in until it is inspected and approved by the engineer.

(5) Where the owner, or an agent of the owner, covers in a building service connection before it is inspected and a certificate of approval issued, the engineer may open it for the purpose of inspection.

(6) The engineer may repair or replace a building service connection with the consent of the owner and at the expense of the owner. 1998, c. 18, s. 329; 2001, c. 35, s. 18.

Sewer connection abandoned
330 (1) When a sewer connection is abandoned, the owner shall effectively block up the connection at the sewer in a manner approved by the engineer.

(2) The blocking up shall be inspected and approved by the engineer before it is covered.

(3) Where the owner or the owner's agent covers in a blocked sewer connection before it is inspected and a certificate of approval issued, the engineer may open it for the purpose of inspection.

(4) Where the owner does not effectively block up a sewer connection within twenty-four hours from the receipt of a notice from the engineer to do so, the engineer may cause it to be done. 1998, c. 18, s. 330.

Repairs required

331 (1) Where a building service connection or special sewer connection is causing a municipal sewer to malfunction and repairs to the connection would result in the malfunction being cured, the engineer may require the owner of the property in which any portion of the connection which requires repairs is located to complete the repairs within a reasonable time specified by the engineer.

(2) Where the repairs required are not completed by the owner within the time specified, the engineer may cause the repairs to be completed. 1998, c. 18, s. 331.

Connection required to municipal sewer

332 (1) The engineer may give notice in writing to an owner of property that may be served by a sewer requiring that owner, within the time specified in the notice, to connect with the municipal sewer by a building service connection.

(2) The engineer may require an owner to repair, reconstruct or replace a building service connection.

(3) If a building service connection is not laid, built and connected with the municipal sewer or any other work in connection with the building service connection is not done to the satisfaction of the engineer, the engineer shall, in writing, notify the owner of the property served or to be served by the building service connection to that effect, specifying in what particulars the work is unsatisfactory, and if the owner fails to perform the work to the satisfaction of the engineer within seven days from the receipt of the notice, the engineer may perform the necessary work. 1998, c. 18, s. 332.

Prohibition and power to make by-laws

333 (1) No person shall permit the discharge into wastewater facilities or a stormwater system of a municipality or a village or into wastewater facilities or a stormwater system or building
service connection connecting with the wastewater facilities or stormwater system of a municipality or a village of

(a) a liquid or vapour having a temperature higher than that specified by the council or village commission, by by-law;

(b) inflammable or explosive matter;

(c) a quantity of matter capable of obstructing the flow in, or interfering with, the proper operation of a part of the sewage works and treatment process;

(d) sewage that has any corrosive property that could be hazardous to structures, equipment or personnel;

(e) sewage of such quality that an offensive odour or foam could emanate from the wastewater facilities system or that could cause a nuisance;

(f) sewage containing fish or animal offal or pathological or medical wastes;

(g) the contents of septic tanks, holding tanks or wastes from marine vessels or vehicles or sludge from sewage treatment plants;

(h) sewage containing animal fats, wax, grease or vegetable oil in liquid or solid form in concentrations exceeding those specified by the council or village commission, by by-law;

(i) sewage containing herbicides, pesticides, xenobiotics, polychlorinated biphenols or radioactive materials that are not approved for disposal in a sanitary sewer by the Atomic Energy Control Board of Canada;

(j) sewage in concentrations of suspended solids that exceed the limit specified by the council or village commission by by-law;

(k) sewage that exerts or causes biological oxygen demand and chemical oxygen demand greater than amounts specified by the council or village commission, by by-law, or chlorine requirements in such quantities as to constitute a significant load on the sewage treatment facilities;

(l) sewage that contains toxic substances at the point of discharge to the municipal sewer in excess of the concentrations specified by the council or village commission, by by-law;

(m) sewage containing substances for which special treatment or disposal practices are required by any applicable enactments of Canada or the Province,

and compliance with any limit is not attainable simply by dilution.

(2) The council or village commission may, by by-law
(a) prohibit the discharge of named substances into any building service connection, wastewater facilities or stormwater system;

(b) prescribe conditions under which the discharge of contaminants set out in this Section or in a by-law may be permitted, and shall in the by-law set out the contaminant the discharge of which is permitted, and the requirements of any agreements with respect to it;

(c) prescribe methods of testing and measurement to ensure compliance with this Part and any by-law.

(3) A treatment or flow quantity control equalizing facility installed pursuant to a by-law or an agreement made pursuant to this Section shall be maintained by the owner of the property on which it is installed at the expense of the owner. 1998, c. 18, s. 333; 2001, c. 35, s. 19.

Requirement for interceptors

334 (1) The engineer may require an owner of land that is connected to wastewater facilities or a stormwater system of the municipality or the village to provide grease, oil and sand interceptors.

(2) All interceptors shall be of a type and capacity approved by the engineer and shall be located so as to be readily and easily accessible for cleaning and inspection.

(3) Grease and oil interceptors shall be constructed of impervious materials capable of withstanding abrupt and extreme changes in temperature and shall be of substantial construction, watertight and equipped with easily removable covers which when bolted in place are gastight and watertight.

(4) Where the interceptors required are not provided by the owner within the time referred to in the notice, the engineer may cause the interceptors to be provided. 1998, c. 18, s. 334; 2001, c. 35, s. 20.

Control service access

335 (1) The engineer may require the owner of an industrial, commercial or institutional property served by a building service connection to install a suitable control service access in the building service connection to facilitate observation, sampling and measurement of the wastes.

(2) The control service access shall be located and constructed in accordance with plans approved by the engineer.

(3) The control service access shall be installed by the owner at the owner's expense and shall be maintained by the owner so as to be safe and accessible at all times.

(4) Where the control service access required is not provided by the owner within the time required by the engineer, the engineer may cause the control service access to be installed. 1998, c. 18, s. 335.
By-law regarding private systems

336 A municipality may, by by-law, require owners of private on-site sewage disposal systems to have the systems pumped, emptied, cleaned, checked and maintained in accordance with the standards set out in the by-law. 1998, c. 18, s. 336.

Requirement to connect to municipal sewer

337 (1) Where a municipal sewer becomes available to a property served by a private on-site sewage disposal system, the engineer may require the owner of the property to connect the property to the municipal sewer.

(2) Upon receipt of a notice from the engineer requiring a connection, the owner shall, within the time specified in the notice, cause the property to be connected to the municipal sewer by a building service connection.

(3) If required by the engineer, the owner shall cause any septic tank, cesspool, privy or private on-site sewage disposal system on the property to be abandoned and removed or filled with suitable material in a manner acceptable to the engineer.

(4) Where the owner of a property is notified by an official of the municipality or the village or an official of the Province, pursuant to a by-law or an enactment, to remove or close up a cesspit, septic tank, privy or private on-site sewage disposal system on the property, and the owner fails to comply with the notice, or where the owner of a property fails to comply with a notice requiring the construction of a building service connection in accordance with this Act, the engineer may cause to be done all work necessary for compliance with the notice.

(5) The engineer may require, as a part of the work necessary for compliance, the installation of a suitable water closet and its connection with a municipal sewer. 1998, c. 18, s. 337; 2001, c. 35, s. 21.

Prohibition

338 No person shall

(a) permit stormwater, surface water, ground water, roof runoff, subsurface drainage, cooling water or industrial process waters to be discharged into a sanitary sewer;

(b) connect a sump pump to a sanitary sewer;

(c) discharge sewage anywhere except into a municipal sewer, private on-site sewage system or central sewage collection and treatment system;

(d) permit any contents of a septic tank or cesspit to be discharged into a municipal sewer or watercourse. 1998, c. 18, s. 338.
Private wastewater facilities requirements

339 (1) A person who owns, maintains or operates private wastewater facilities or who owns or occupies land on or under which there is private wastewater facilities shall maintain and operate the system in such a manner that

(a) a danger to the public health is not created by the system;

(b) sewage or effluent from the system does not appear on the surface of the ground, or in any ditch, excavation or building basement;

(c) sewage or effluent from the system does not appear in any well or in any body of water from which water is used for drinking purposes;

(d) sewage or effluent from the system does not leak from any part of the system; and

(e) offensive odours are not emitted from the system.

(2) Where a person who owns, maintains or operates private wastewater facilities or who owns or occupies land on or under which there is private wastewater facilities fails or neglects to maintain or operate the system in the manner prescribed, the engineer may cause to be served upon that person a notice requiring that the failure or neglect be corrected in the manner set out in the notice within seven days from the service of the notice.

(3) Where the failure or neglect is not corrected in accordance with the terms of the notice and within the time prescribed in the notice, the engineer may cause to be done all work necessary for compliance with the notice. 1998, c. 18, s. 339.

Requirement to connect to municipal sewer

340 (1) Where a municipal sewer becomes available to a property served by private wastewater facilities, the engineer may require the owner of the property to connect the property to the municipal sewer.

(2) Upon receipt of a notice from the engineer requiring a connection, the owner shall, within the time specified in the notice, cause the property to be connected to the municipal sewer by a building service connection.

(3) The owner shall cause any private wastewater facilities or any portion of it on the property to be abandoned and removed or filled with suitable material.

(4) Where the owner of a property fails to comply with a notice of the engineer pursuant to this Section, the engineer may cause to be done all work necessary for compliance with the notice. 1998, c. 18, s. 340.

Abandonment of private wastewater facilities
341 (1) When a municipal sewer becomes available to all the properties served by private wastewater facilities, the person who owns, maintains or operates the private wastewater facilities shall cause it to be abandoned and removed or filled with suitable material.

(2) Where the person who owns, operates or maintains the private wastewater facilities fails to comply with subsection (1), the engineer may cause to be done all work necessary for compliance. *1998, c. 18, s. 341.*

**By-law for wastewater management districts**

342 (1) A council may, by by-law, establish wastewater management districts.

(2) A by-law establishing a wastewater management district shall include

(a) the boundaries of the wastewater management district;

(b) the system of wastewater management to be used in the district; and

(c) the extent to which the municipality is responsible for the repair, upgrading or replacement of private and municipal sewer systems.

(3) Where the council has established a wastewater management district, the municipality, its servants and agents may enter on any property within the wastewater management district to repair, upgrade or replace a public or private wastewater system and may, in accordance with the by-law, charge any or all of the costs to the owners of the property served by the system. *1998, c. 18, s. 342.*

**By-law regarding stormwater**

343 (1) A council may make by-laws,

(a) setting standards and requirements respecting stormwater management;

(b) requiring stormwater to be directed to or retained in areas specified in the by-laws;

(c) setting standards and requirements respecting the design, construction and installation of stormwater systems and related services and utilities;

(d) providing further criteria for the approval of stormwater systems that do not meet the standards and requirements set by by-law, but that are an improvement over an existing stormwater system;

(e) regulating the use and maintenance of municipal and private stormwater systems;

(f) providing for the protection of municipal and private stormwater systems;
(g) prescribing when connection of stormwater systems to a municipal stormwater system is required;

(h) providing for exemptions from the requirement to connect stormwater systems to a municipal stormwater system;

(i) prescribing the circumstances under which the engineer may undertake the work required to connect stormwater systems to a municipal stormwater system;

(j) regulating and setting standards for drainage;

(k) regulating and setting standards for grading, describing when the standards and requirements shall be met, and exempting those classes of lots described in the by-law;

(l) prohibiting the issuance of any municipal permits or approvals where a by-law pursuant to this Part is not complied with and prescribing conditions under which, in such cases, the issuance of permits or approvals may be allowed, and any conditions that may be attached to them;

(m) regulating and setting standards with respect to the alteration, diversion, blocking or infilling of stormwater systems.

(2) The engineer may direct a person to comply with a by-law made pursuant to this Section and may direct restoration to the original condition if any work is done contrary to the by-law.

(3) Where the engineer undertakes the work required to connect stormwater systems to a municipal stormwater system pursuant to a by-law, the cost may be recovered from the owner of land which the stormwater system benefits and is a first lien on that land. 1998, c. 18, s. 343.

PART XV

DANGEROUS OR UNSIGHTLY PREMISES

Requirement to maintain property

344 Every property in a municipality shall be maintained so as not to be dangerous or unsightly. 1998, c. 18, s. 344.

Authority to delegate

345 (1) The council may, by policy, delegate some or all of its authority pursuant to this Part, except the authority to order demolition, to the administrator.

(2) The council may, by policy, delegate its authority pursuant to this Part, or such of its authority as is not delegated to the administrator, to a community council or to a standing committee, for all or part of the municipality. 1998, c. 18, s. 345.
Order to remedy condition

346 (1) Where a property is dangerous or unsightly, the council may order the owner to remedy the condition by removal, demolition or repair, specifying in the order what is required to be done.

(2) An owner may appeal an order of the administrator to the council or to the committee to which the council has delegated its authority within seven days after the order is made.

(3) Where it is proposed to order demolition, before the order is made not less than seven days notice shall be given to the owner specifying the date, time and place of the meeting at which the order will be considered and that the owner will be given the opportunity to appear and be heard before any order is made.

(4) The notice may be served by being posted in a conspicuous place upon the property or may be served upon the owner. 1998, c. 18, s. 346; 2000, c. 9, s. 51.

Order to remedy condition

347 (1) A municipality may apply to a court of competent jurisdiction for a declaration that a property is dangerous or unsightly and an order specifying the work required to be done to remedy the condition by removal, demolition or repair.

(2) The court may order any property found to be dangerous or unsightly to be vacated until the condition is remedied.

(3) The court may, where any property is found to be dangerous or unsightly, order that no rent becomes due, or is payable by, any occupants until the condition is remedied. 1998, c. 18, s. 347.

Effect of order

348 (1) In this Section, "order" means an order made by the administrator, committee, council or court pursuant to this Part.

(2) An order may be served by being posted in a conspicuous place upon the property or may be served upon the owner.

(3) Where the owner fails to comply with the requirements of an order within the time specified in the order, the administrator may enter upon the property without warrant or other legal process and carry out the work specified in the order.

(3A) repealed 2003, c. 9, s. 77.

(4) After the order is served, any person who permits or causes a dangerous or unsightly condition, continues to permit or cause a dangerous or unsightly condition or who fails to comply with the terms of the order is liable, on summary conviction, to a penalty of not less than one
hundred dollars and not more than five thousand dollars, and in default of payment to imprisonment for not more than three months.

(5) Every day during which the condition is not remedied is a separate offence.

(6) Where an order requires the demolition or removal of a building, the administrator may cause the occupants to be removed, using force if required, in order to effect the demolition or removal. 1998, c. 18, s. 348; 2001, c. 35, s. 22; 2003, c. 9, s. 77; 2006, c. 40, s. 15.

Order to vacate unsafe property

349 (1) A property within a municipality that is unsafe shall be vacated forthwith upon order of the administrator.

(2) The administrator shall post notice that the property is unsafe in a conspicuous place on the property.

(3) The notice shall remain posted until the unsafe condition is remedied. 1998, c. 18, s. 349.

Immediate action

350 Where public safety requires immediate action, the administrator may immediately take the necessary action to prevent danger or may remove the dangerous structure or condition. 1998, c. 18, s. 350.

Notice

351 Where land is sold for non-payment of taxes and the period for its redemption has not expired, proceedings may be taken in respect of the repair, removal or destruction of any structure on the land by reason of its condition, and where the purchaser of the land is

(a) the municipality, any notice required to be given with respect to an order for removal or destruction shall be given to the person who was entitled to receive it immediately before the day on which the land was sold; and

(b) any person other than the municipality, the notice shall be given to both the person entitled to receive it immediately before the day on which the land was sold and the purchaser at the tax sale. 1998, c. 18, s. 351.

Power to enter land

352 (1) The administrator may, for the purpose of ensuring compliance with this Part, enter in or upon any land or premises at any reasonable time without a warrant.

(2) Except in an emergency, the administrator shall not enter any room or place actually being used as a dwelling without the consent of the occupier unless the entry is made in daylight hours
and written notice of the time of the entry has been given to the occupier at least twenty-four hours in advance.

(3) If a person refuses to allow the administrator to exercise, or attempts to interfere or interferes with the administrator in the exercise of a power pursuant to this Act, the administrator may apply to a judge of the Supreme Court of Nova Scotia for an order to allow the administrator entry to the building and an order restraining a person from further interference. 1998, c. 18, s. 352.

No action

353 No action shall be maintained against a municipality or against the administrator or any other employee of a municipality for anything done pursuant to this Part. 1998, c. 18, s. 353.

PART XVI

BOUNDARIES

Boundaries remain unless altered by Board

354 (1) The boundaries of the Cape Breton Regional Municipality are the boundaries of the County of Cape Breton, unless altered by the Board pursuant to this Act.

(2) repealed 2008, c. 39, s. 389.

(3) The boundaries of the Region of Queens Municipality are the boundaries of the County of Queens, unless altered by the Board pursuant to this Act.

(4) The boundaries of a regional municipality incorporated pursuant to this Act are the boundaries set out in the order establishing the regional municipality, unless altered by the Board pursuant to this Act.

(5) The boundaries of a county or district municipality continue to be as they were on July 1, 1996, unless altered by the Board pursuant to this Act or a regional municipality is incorporated that includes the county or district municipality.

(6) The boundaries of a town continue as they were on July 1, 1996, or in a subsequent order incorporating the town, unless altered by the Board pursuant to this Act or a regional municipality is incorporated that includes the town.

(7) The boundaries, names and numbers of the polling districts in a municipality continue to be as they were on July 1, 1996, unless altered by the Board pursuant to this Act. 1998, c. 18, s. 354; 2008, c. 39, s. 389.

Structures within municipal boundaries
355 All docks, quays, wharves, slips, breakwaters and other structures connected with the shore of any part of a municipality are within the boundaries of the municipality. *1998, c. 18, s. 355.*

**Determination of uncertain boundary line**

356 (1) Upon application by a municipality, a village or the Minister, the Board may determine an uncertain boundary line, including a county boundary.

(2) An application shall

(a) set out the nature and cause of the uncertainty;

(b) include the proposed determination;

(c) list the steps taken to obtain agreement from adjacent municipalities, and whether all affected municipalities have agreed to the proposed determination;

(d) include the particulars of the evidence known respecting the existence and location of the boundary.

(3) The Board shall ensure that a copy of the application is provided to the Minister and to any municipality adjacent to the uncertain boundary line.

(4) An order of the Board determining an uncertain boundary line

(a) may establish the boundary line by metes and bounds description, by map, or both;

(b) is a regulation pursuant to the Regulations Act; and

(c) is binding on all municipalities notified of the application. *1998, c. 18, s. 356.*

**Change in or settlement of mutual boundary**

357 Where two or more municipalities or a municipality and a village agree to a change in, or settlement of, a mutual boundary, the Board may confirm the change or settlement without a hearing if

(a) the agreed change or settlement is advertised in a newspaper circulating in the affected municipalities, as directed by the Board;

(b) the advertisement invites objectors to advise the Board of their objections;

(c) proof of the advertising has been provided to the Board; and

(d) no objections are received by the Board within thirty days after the first advertisement. *1998, c. 18, s. 357.*
Amalgamation or annexation

358 Municipalities may be amalgamated or the whole or part of a municipality may be annexed to another upon application to the Board by

(a) the Minister;

(b) a municipality; or

(c) the greater of ten percent or one hundred of the electors in the area proposed to be amalgamated or annexed. *1998, c. 18, s. 358.*

Application for preliminary order

359 (1) An applicant for amalgamation or annexation shall apply for a preliminary order.

(2) The application for a preliminary order shall include

(a) the boundaries of the area proposed to be amalgamated or annexed sufficient to identify the area;

(b) an estimate of the population of the area proposed to be amalgamated or annexed;

(c) the total assessed value of taxable property and occupancy assessments in the area proposed to be amalgamated or annexed;

(d) where the area is or contains a village, the audited financial statements of the village for the fiscal year immediately preceding the year in which the application is made;

(e) a brief statement of the reasons for the application; and

(f) such other matters as the applicant considers relevant to the application.

(3) The applicant shall serve a copy of the application for a preliminary order on the clerk of any municipality that would be affected by the annexation or amalgamation if granted, on the Minister, and on such others as the Board directs. *1998, c. 18, s. 359.*

Hearing notifications

360 (1) Upon the Board setting the date for a hearing of the application for a preliminary order, the Board shall, at the expense of the applicant, advertise the hearing in a newspaper circulating in the area to be amalgamated or annexed, including the date by which any person wishing to be heard must notify the Board.

(2) Any interested person may appear and be heard at the hearing for a preliminary order by notifying the Board at least one week before the date fixed for the hearing. *1998, c. 18, s. 360.*
Persons heard

361 At the hearing of the application for a preliminary order the Board shall hear

(a) the applicant;

(b) a representative of any municipality that would be affected by the amalgamation or annexation if granted;

(c) the Minister; and

(d) any person who has previously notified the Board. 1998, c. 18, s. 361.

Preliminary order

362 (1) After the application is heard, the Board may make a preliminary order, indicating

(a) suggested boundaries of the area proposed to be amalgamated or annexed;

(b) studies to be undertaken into the financial implications of amalgamation or annexation for the area, for the Province and for any municipality that would be affected;

(c) such other studies as may appear to the Board to be relevant to a decision on the necessity or expediency of the amalgamation or annexation; and

(d) any other evidence that the Board may direct be provided during the hearing of the application.

(2) Where the Board determines that there are no reasonable grounds for the application or there is no reasonable possibility that the application would be granted, the Board may dismiss the application.

(3) The cost of any studies required by the Board shall be borne by the parties as directed by the Board.

(4) Where any required studies are not completed within the time provided in the preliminary order, the Board may

(a) extend the time for completing the studies;

(b) proceed with the application without the studies;

(c) have the studies carried out or completed at the expense of the party responsible for them; or

(d) dismiss the application.
Order for amalgamation or annexation

363 (1) After the application has been heard, the Board may, if satisfied that the order is in the best interests of the inhabitants of the area, taking into account the financial and social implications of the order applied for, order an amalgamation or annexation upon such terms as it considers advisable.

(2) The order of the Board for an amalgamation or an annexation shall

(a) fix the effective date of the amalgamation or annexation;

(b) make provision for any necessary revision of polling districts;

(c) make provision for any election that the Board considers necessary including setting the dates for nomination day and ordinary polling day for the election and providing for returning officers and the conduct of the election;

(d) direct the Director of Assessment to make any necessary adjustment in the assessment roll applicable to the area;

(e) provide for any other matter that is necessary or desirable to effect the amalgamation or annexation; and

(f) from time to time make such determinations, issue such orders and directions and do, or cause to be done, all such other matters and things as, in the opinion of the Board, are necessary or incidental to the annexation or amalgamation.

(3) An order of the Board may

(a) adjust assets and liabilities among those affected by the order as the Board considers fair;

(b) annex, amalgamate, continue or dissolve boards, commissions, villages and service commissions and allocate their assets as the Board considers fair; and

(c) require compensating grants for a period of not more than five years from a benefiting municipality to a municipality that loses assessment as a result of an order.

(4) The Board may make an interim order and reserve further directions.

(5) The Board may make an order granting the whole or part of an application, and may grant such further or other relief as the Board considers proper.
(6) Where the Board considers that, as a result of an annexation it is desirable to annex the whole or part of the municipality remaining after the order to some other municipality, the Board after such notice and hearing as it considers desirable may order the annexation.

(7) A copy of an order for an amalgamation or an annexation shall be published in the Royal Gazette as a regulation, and shall be filed and advertised as directed by the Board. 1998, c. 18, s. 363.

**Councillor continues to hold office**

364 Unless the Board otherwise orders, where an area is annexed to another municipality, any councillor holding office at the time of the annexation continues to hold office until the next regular municipal election, notwithstanding that the councillor's polling district has ceased to be part of the municipality. 1998, c. 18, s. 364.

**Village or service commission dissolved**

365 Unless the Board otherwise orders, when an area is annexed to a town, any village or service commission having authority in the area annexed to the town is dissolved and its assets and liabilities are vested in the town. 1998, c. 18, s. 365.

**Policies and by-laws continue in force**

366 (1) When municipalities are amalgamated, the policies and by-laws in effect in each continue in force in the area of each former municipality until repealed by the council.

(2) When an area is annexed to another municipality, the policies and by-laws in the annexing municipality apply to the area except for the municipal planning strategy and land-use and subdivision by-laws, which remain in force in the annexed area until repealed by the council of the annexing municipality. 1998, c. 18, s. 366.

**Effect of annexation or amalgamation**

367 (1) Unless the Board otherwise orders

(a) the real property of a municipality situate in an area annexed to another municipality is vested in the annexing municipality;

(b) taxes imposed with respect to the ownership or occupation of property in an area annexed to another municipality and unpaid at the date of an annexation belong to the annexing municipality and may be collected as if they had been imposed by the annexing municipality;

(c) where the whole of a municipality is annexed to a municipality or municipalities are amalgamated, all of the assets and liabilities of the annexed or former municipalities are vested in the annexing or amalgamated municipality, and the annexing or amalgamated municipality stands in the place and stead of the annexed or former municipalities.
(2) The annexing or amalgamated municipality has the same rights with respect to the collection of taxes imposed by the annexed or former municipalities as if the taxes had been imposed by the annexing or amalgamated municipality. 1998, c. 18, s. 367.

Powers of Board

368 (1) Upon application, the Board may, by order

(a) divide or redivide a municipality into polling districts;

(b) amend the boundaries of any polling district;

(c) dissolve polling districts;

(d) determine that a town be divided into polling districts or cease to be divided into polling districts;

(e) determine the number of councillors for a municipality; and

(f) determine the date upon which the order takes effect.

(2) An application may be made by

(a) the Minister;

(b) a municipality; or

(c) at least fifty electors of a municipality.

(3) The Board may make an order granting the whole or part of an application, and may grant such further or other relief as the Board considers proper.

(4) In determining the number and boundaries of polling districts the Board shall consider number of electors, relative parity of voting power, population density, community of interest and geographic size.

(5) In determining the number of councillors for a town, the Board shall consider the population and geographic size of the town. 1998, c. 18, s. 368.

Study of polling districts required

369 (1) In the year 1999, and in the years 2006 and every eighth year thereafter the council shall conduct a study of the number and boundaries of polling districts in the municipality, their fairness and reasonableness and the number of councillors.
(2) After the study is completed, and before the end of the year in which the study was conducted, the council shall apply to the Board to confirm or to alter the number and boundaries of polling districts and the number of councillors. 1998, c. 18, s. 369.

**Councillor continues to hold office**

370 Unless the Board otherwise orders, where boundaries of polling districts are revised, any councillor holding office at the time of the revision continues to hold office until the next regular municipal election. 1998, c. 18, s. 370.

**PART XVII**

**MUNICIPAL INCORPORATION**

**Interpretation**

371 In this Part,

(a) "plebiscite" means a vote of the electors of the municipalities that are affected;

(b) "study" means a review conducted by or under the control of the Board, with input from the residents of the municipalities that are affected. 1998, c. 18, s. 371; 2000, c. 9, s. 52.

**Establishment of regional municipality**

372 (1) The Board may, if requested by all of the councils of the municipalities in a county, undertake a study of the form of municipal government in the county to determine whether a regional municipality would be in the interests of the people of the county.

(2) Where

(a) a study of the form of municipal government in a county to determine whether a regional municipality would be in the interests of the people of the county has been undertaken, whether the study was undertaken by the Minister or otherwise prepared; and

(b) a plebiscite has taken place and its results show that a majority of the electors who voted in the plebiscite are in favour of the establishment of a regional municipality for the county,

the Governor in Council may, on the recommendation of the Minister, order that a regional municipality be established for the county.

(3) Sections 373 to 382 of this Part apply to a county for which a regional municipality is established from and after the date of the order establishing the regional municipality.

(4) An order establishing a regional municipality shall set out
(a) the name of the regional municipality;

(b) the county for which the regional municipality is established;

(c) the incorporation date, which shall be April 1 in the year determined by the Governor in Council;

(d) the dates for nomination day and ordinary polling day for the first election of the mayor and councillors of the regional municipality;

(e) the date the council takes office, which shall be at least twenty weeks before the incorporation date;

(f) the term of office of the members of the council elected at the first election;

(g) any matter unique to the regional municipality that must be provided for to ensure the effective implementation of the regional municipality and to protect the interests of the public; and

(h) any other matter that is necessary or desirable to effect the incorporation of the regional municipality.

(5) Where a regular municipal election would take place after the date of an order establishing a regional municipality, that election shall not be held and the term of office of the members of the councils of the municipalities is extended to the incorporation date of the regional municipality.

(6) The exercise by the Governor in Council of the authority contained in this Section is regulations within the meaning of the Regulations Act. 1998, c. 18, s. 372; 2000, c. 9, s. 53.

Coordinator of regional municipality

373 (1) Subject to subsection (2), the Governor in Council shall appoint a person to be the coordinator of the regional municipality.

(2) The Governor in Council shall appoint as the coordinator a person approved by a majority of the councils of the municipalities in the county.

(3) Between the date the new council takes office and the incorporation date, the council shall exercise the powers of the coordinator and the coordinator has no further authority. 1998, c. 18, s. 373.

Duties and powers of coordinator

374 (1) The coordinator is responsible for designing and implementing the administrative structure of the regional municipality.
(2) The coordinator shall appoint the chief administrative officer and, on the recommendation of the chief administrative officer, the heads of departments.

(3) The new council shall ratify the appointment of the chief administrative officer as soon as practicable after the incorporation.

(4) The chief administrative officer, in consultation with the coordinator, shall employ all other employees of the regional municipality, effective on the incorporation date or such earlier date as the chief administrative officer deems expedient.

(5) Preference in employment shall be given to an employee of municipal government where that employee meets the basic requirements for a position and is the most qualified candidate from within municipal government.

(6) Subsection (5) does not apply to the appointment of the chief administrative officer.

(7) On or before the incorporation date, the coordinator shall establish a pension plan in accordance with the Pension Benefits Act to replace any pension plan established by a municipal government.

(8) The coordinator has all of the powers of the council and of the board of police commissioners.

(9) The coordinator may contract and be contracted with, sue and be sued, acquire real and personal property, engage officers and employees, prescribe a seal and do such things and make such expenditures as are required for the orderly establishment of the regional municipality.

(10) The coordinator may, with the approval of the Minister, borrow such sums as may be required for the purposes of this Part, and the sums borrowed shall be repaid by the regional municipality in not more than ten annual installments, as determined by the council.

(11) All acts of the coordinator have, upon the incorporation of the regional municipality, full force and effect, and shall be and be deemed to have been exercised by the regional municipality.

(12) The officers and employees of the municipal governments shall render assistance to the coordinator upon request, and furnish all information and perform all acts requested by the coordinator.

(13) The coordinator has all of the powers of a commissioner appointed pursuant to the Public Inquiries Act. 1998, c. 18, s. 374.

First election

375 (1) The coordinator shall apply to the Board for a determination, and the Board shall determine, the number of councillors and the boundaries of the polling districts in the regional municipality.
(2) Proceedings for the first election of the mayor and councillors of the regional municipality shall be as nearly as may be as specified in the Municipal Elections Act, but the coordinator may abridge any time period contained therein.

(3) The coordinator shall, with the assistance of employees of the municipal governments, provide for the first election of the mayor and councillors of the regional municipality.

(4) Notwithstanding the Municipal Elections Act, a member of the council of a municipality is eligible to be elected to the council.

(5) Qualifications for nomination as a council member shall be determined as if the municipal governments had been merged in the regional municipality six months prior to nomination day.

(6) Each council member is entitled to remuneration from the regional municipality from the date that member takes office, except that no member of the council of a municipality who is elected to the council may receive remuneration from the municipality from that date.

(7) Notwithstanding any other enactment, there shall not be an election for school board members concurrently with the first election of the council members, unless otherwise prescribed by the Governor in Council.

(8) A member of a school board is not eligible to be nominated or to serve as a council member, if that member would be a member of the school board and a council member at the same time. 1998, c. 18, s. 375.

Transitional provisions

376 (1) Between the date of the order providing for the incorporation of a regional municipality and the incorporation date, a municipal government shall not

(a) replace an employee who retires, resigns, is laid off or is dismissed, convert an employee from part-time to full-time status or promote an employee or hire a new employee, except in the case of term appointments that will expire before the incorporation date;

(b) enter into any lease, contract or other commitment that has effect after, or a term extending beyond, the incorporation date; or

(c) dispose of a capital asset,

unless the coordinator has so approved.

(2) Between the date of the order providing for the incorporation of a regional municipality and the incorporation date, a municipal government shall not expend any funds from an operating or capital reserve fund, and after the incorporation date the council shall apply any reserve funds of a municipal government for the benefit of the residents of the area of the former municipal government.
Between the date of the order providing for the incorporation of a regional municipality and the incorporation date, a municipal government shall not provide early retirement, pre-retirement, termination or severance benefits for any employee. 1998, c. 18, s. 376.

Programs and benefits for employees

377 (1) The regional municipality may provide early retirement, pre-retirement, termination or severance benefits for any employee of a municipal government who is not employed by the regional municipality.

(2) An early retirement program may be limited to the incumbents of positions that the chief administrative officer considers to be unnecessary for the regional municipality.

(3) The cost of severance benefits provided by the regional municipality shall be borne by the regional municipality and not be charged to the area of the municipal government that formerly employed the employee, and the sums required may be borrowed by the regional municipality and shall be repaid by the regional municipality in not more than ten annual installments, as determined by the council. 1998, c. 18, s. 377.

Ministerial order

378 The Minister may, by order, provide for anything necessary or incidental to the incorporation and effective government of a regional municipality, and may include any orders, directions and conditions that are necessary, or desirable, in connection therewith. 1998, c. 18, s. 378.

Effect of incorporation of regional municipality

379 (1) Upon the incorporation of a regional municipality, the municipal governments in the area to be incorporated as a regional municipality are dissolved, and the assets and liabilities of them are vested in the regional municipality including, with the exception of benefits and entitlements created by Section 71 of the Labour Standards Code, all employee benefits and entitlements.

(2) Upon the incorporation of a regional municipality, every authority, board, commission, corporation or other entity of a municipal government in the area to be incorporated as a regional municipality and every joint authority, board, commission, committee or other joint entity involving a municipal government in the area to be incorporated as a regional municipality is dissolved and their assets and liabilities are vested in the regional municipality including, with the exception of benefits and entitlements created by Section 71 of the Labour Standards Code, all employee benefits and entitlements.

(3) The vesting of an asset of a municipal government in the regional municipality does not void any policy of insurance with respect to the asset, including public liability policies, and the regional municipality is deemed to be the insured party for purposes of any such policy.
(4) Nothing in this Act dissolves any authority, board, commission, committee or other entity that includes representatives of municipalities situate outside the regional municipality.

(5) The regional municipality shall continue to pay any pension or annuity being paid by a municipal government on the day preceding the incorporation date according to its terms.

(6) The regional municipality is a successor employer for purposes of the Pension Benefits Act.

(7) The regional municipality may transfer, free of cost, property of a village that is dissolved pursuant to subsection (1) to a body incorporated to provide community services in the area served by the dissolved village. 1998, c. 18, s. 379.

**Application of Trade Union Act**

380 (1) In this Section, "employee" means an employee as defined in Section 2 of the Trade Union Act, excluding those described in subsection 2(2) of that Act.

(2) The regional municipality is a transferee for the purpose of Section 31 of the Trade Union Act and, for greater certainty

(a) the regional municipality is bound by successor rights as determined pursuant to the Trade Union Act; and

(b) subject to the Trade Union Act, the regional municipality and the employees, who are covered by collective agreements, of a municipal government are bound by the collective agreements as if the regional municipality were a party to them.

(3) Where the Labour Relations Board, in applying subsections (1) and (2), determines that those employees who are employed by the regional municipality and who were not previously included in a bargaining unit of a municipal government be included in a bargaining unit of the regional municipality, those employees shall be deemed to have seniority credits with the regional municipality equal to the employment service they had with that municipal government.

(4) Where an employee of a municipal government is employed by the regional municipality, the period of employment and seniority of that employee with the municipal government at the time of the incorporation of the regional municipality is deemed to have been employment and seniority with the regional municipality and the continuity of employment and seniority is not broken.

(5) Where an employee of a municipal government is employed by the regional municipality in a position which becomes a bargaining unit position, the employee's right to employment in the position is not affected by whether that employee was previously employed pursuant to a collective agreement and the employee is deemed to have seniority credits with the regional municipality equal to the employee's service with that municipal government.
(6) No provision of a collective agreement with a municipal government that purports to favour the employees of one municipal government in obtaining employment with the regional municipality over those of another municipal government has any force or effect. 1998, c. 18, s. 380.

Labour Relations Board

381 (1) Where, in the opinion of the Minister of Labour, the workload of the Labour Relations Board requires additional members, the Governor in Council may, in addition to the Vice-chair appointed pursuant to subsection 16(4) of the Trade Union Act, appoint additional members and Vice-chairs to the Labour Relations Board for such period of time as is set out in the appointment.

(2) An appointment pursuant to subsection (1) does not increase the quorum of the Labour Relations Board. 1998, c. 18, s. 381.

Deemed references and continuations

382 (1) A reference in an enactment, deed, will or other document to a municipal government is and is deemed to be a reference to the regional municipality.

(2) A reference in an enactment, deed, will or other document to the mayor, warden or chairman of a municipal government is and is deemed to be a reference to the mayor of the regional municipality.

(3) The by-laws, orders, policies and resolutions in force in a municipal government immediately prior to the incorporation of a regional municipality continue in force in the area over which that municipal government had jurisdiction to the extent that they are authorized by this or another Act, until amended or repealed by the council of the regional municipality. 1998, c. 18, s. 382.

Application for incorporation as town

383 (1) A town may be incorporated upon application to the Board.

(2) An application for incorporation may be made by one third of the electors of the area proposed to be incorporated as a town. 1998, c. 18, s. 383; 2002, c. 36, s. 1.

Application for preliminary order

384 (1) An applicant for incorporation shall apply for a preliminary order.

(2) The application for a preliminary order shall include

(a) the boundaries of the town proposed to be incorporated sufficient to identify the area;

(b) an estimate of the population of the town proposed to be incorporated;
(c) the total assessed value of taxable property and occupancy assessments in the town proposed to be incorporated;

(d) where the area is or contains a village, the audited financial statements of the village for the fiscal year immediately preceding the year in which the application is made;

(e) a brief statement of the reasons for the application; and

(f) such other matters as the applicant considers relevant to the application.

(3) The applicant shall serve a copy of the application for a preliminary order on the clerk of the county or district municipality from which the town would be incorporated, on the Minister, and on such others as the Board directs. 1998, c. 18, s. 384.

Hearing notifications

385 (1) Upon the Board setting the date for a hearing of the application for a preliminary order, the Board shall, at the expense of the applicant, advertise the hearing in a newspaper circulating in the area in which the town would be incorporated, including the date by which any person wishing to be heard must notify the Board.

(2) Any interested person may appear and be heard at the hearing for a preliminary order by notifying the Board at least one week before the date fixed for the hearing. 1998, c. 18, s. 385.

Persons heard

386 At the hearing of the application for a preliminary order the Board shall hear

(a) the applicant;

(b) a representative of the county or district municipality from which the town would be incorporated;

(c) the Minister; and

(d) any person who has previously notified the Board. 1998, c. 18, s. 386.

Preliminary order

387 (1) After the application has been heard, the Board may make a preliminary order, indicating

(a) suggested boundaries of the area proposed to be incorporated;

(b) studies to be undertaken into the financial implications of incorporation for the area proposed to be incorporated, the Province and the municipality from which the town would be incorporated;
(c) such other studies as may appear to the Board to be relevant to a decision on the necessity or expediency of the incorporation; and

(d) any other evidence that the Board may direct be provided during the hearing of the application.

(2) Where the Board determines that there are no reasonable grounds for the application or there is no reasonable possibility that the application would be granted, the Board may dismiss the application.

(3) The cost of any studies required by the Board shall be borne by the parties as directed by the Board.

(4) Where any required studies are not completed within the time provided in the preliminary order, the Board may

(a) extend the time for completing the studies;

(b) proceed with the application without the studies;

(c) have the studies carried out or completed at the expense of the party responsible for them; or

(d) dismiss the application.

(5) repealed 2003, c. 9, s. 78.

1998, c. 18, s. 387; 2003, c. 9, s. 78.

Order for incorporation as a town

388 (1) After the application has been heard, the Board shall, if satisfied that an order incorporating the area as a town is in the best interests of the inhabitants of the area taking into account the financial and social implications of the order applied for, make an interim order defining the boundaries of the area and for the taking of a vote pursuant to Section 388A to determine whether the inhabitants of the area are in favour of the incorporation.

(1A) Where the result of the vote taken pursuant to Section 388A is that a majority of the electors who voted were in favour of the proposed incorporation, the Board shall issue an order incorporating the area as a town upon such terms as it considers advisable.

(1B) Where the result of the vote taken pursuant to Section 388A is that a majority of the electors who voted did not vote in favour of the proposed incorporation, the Board shall dismiss the application to incorporate the area as a town.

(2) The order of the Board incorporating a town shall
(a) name the town;

(b) define the boundaries of the town;

(c) fix the effective date of the incorporation;

(d) determine the number of councillors;

(e) determine whether the town will be divided into wards and, if so, establish ward boundaries;

(f) set the dates for nomination day and ordinary polling day for the first election of the mayor and councillors;

(g) provide for returning officers and the conduct of the first election;

(h) set the date the council takes office;

(i) direct the Director of Assessment to make any necessary adjustment in the assessment roll applicable to the area;

(j) provide for any other matter that is necessary or desirable to effect the incorporation of the town; and

(k) from time to time make such determinations, issue such orders and directions, and do or cause to be done all such other matters and things as, in the opinion of the Board, are necessary or incidental to incorporation of the town.

(3) An order of the Board may

(a) adjust assets and liabilities among those affected by the order as the Board considers fair;

(b) annex, amalgamate, continue or dissolve boards, commissions, villages and service commissions and allocate their assets as the Board considers fair.

(4) The Board may make an interim order and reserve further directions. 1998, c. 18, s. 388; 2002, c. 36, s. 2.

Vote of electors

388A (1) Where the Board orders the taking of a vote pursuant to Section 388, the Chief Electoral Officer shall take a vote of the electors in the area defined by the Board in the manner prescribed in this Act and the regulations at which the question is

Do you favour the incorporation of [define area] in the Municipality of [name] as a town?

and the choices are yes or no, only.
(2) Where a vote of the electors is to be taken pursuant to this Section, the following provisions apply:

(a) the voting upon the question shall be by ballot on a day fixed by the Chief Electoral Officer;

(b) the dates for revision of the preliminary list of electors, ordinary polling day and advance polling days shall be set by the Chief Electoral Officer in accordance with the requirements of the Municipal Elections Act for special elections;

(c) public notification of the time and place of the revision and voting shall be given by advertisement in a newspaper circulating in the plebiscite area, and by such other means as the Chief Electoral Officer deems advisable;

(d) the Chief Electoral Officer shall appoint a returning officer to administer the plebiscite in the plebiscite area, and the returning officer shall arrange for a suitable place or places in the area for the vote to be taken and shall appoint deputy returning officers, poll clerks, revising officers, enumerators and other election officers required to conduct the vote, and any officer so appointed has the same powers and privileges as the corresponding officers in the case of an election pursuant to the Municipal Elections Act;

(e) the list of electors to be used at the vote shall be determined by the Chief Electoral Officer and the use or distribution of the list as directed by the Chief Electoral Officer is an election purpose pursuant to the Municipal Elections Act;

(f) the list of electors referred to in clause (e) shall form the preliminary list of electors, which shall be revised in accordance with the Municipal Elections Act, except that in lieu of posting the list, the Chief Electoral Officer shall cause a notification to be sent to each elector whose name and address is on the preliminary list of electors indicating when and where applications will be received for amendment to the preliminary list of electors and containing such other information as the Chief Electoral Officer decides;

(g) the Chief Electoral Officer shall advertise in a newspaper circulating in the plebiscite area that notifications have been sent and provide information about how, when and where the preliminary list of electors will be revised;

(h) notwithstanding clause (f), the Chief Electoral Officer may require that persons applying to be added to the list of electors provide satisfactory evidence of identity and residence before being added to the list of electors by the revising officer;

(i) a group of electors in favour of and a group of electors opposed to the question may register with the returning officer;

(j) the registration of a group of electors by the returning officer shall be in the prescribed form and shall identify a name for the group and the name, address and telephone number of a designated representative of the group;
(k) the designated representative of a registered group of electors is authorized to nominate one or more agents to represent the group at a polling station and to receive the list of electors on behalf of the group;

(l) the returning officer shall appoint each agent of a registered group of electors and the appointment shall specify at which polling station the agent may act;

(m) an agent of a registered group of electors may be appointed to more than one polling station, but only one agent representing each registered group may be present in the polling station at a time; and

(n) upon appointment, an agent representing a registered group is in the same position as an agent representing a candidate pursuant to the Municipal Elections Act.

(3) Following the counting of the votes, the returning officer shall make a return to the Chief Electoral Officer in the prescribed form.

(4) The Chief Electoral Officer may make a tariff of fees, costs, allowances and expenses to be paid and allowed to persons appointed to conduct and receive the vote, of other persons employed at or with respect to the taking of the vote and may from time to time revise and amend the tariff.

(5) The fees, costs, allowances and expenses referred to in subsection (4) shall be paid by Her Majesty in right of the Province.

(6) The Minister shall give such directions and make such regulations and prepare such forms as may appear to be necessary for the purpose of this Section and for the guidance of the Chief Electoral Officer and other officers or persons employed in the taking of the vote and may apply, modify or alter any of the provisions of the Municipal Elections Act and may make due provision for circumstances that may arise and that are not otherwise provided for.

(7) The forms to be used at the taking of the vote and the procedure with respect to voting and other matters shall be the same as nearly as may be as in the case of an election pursuant to the Municipal Elections Act but such forms and procedure may be modified and altered to such extent as is deemed necessary by the Chief Electoral Officer.

(8) A person whose name is not on the final list of electors is permitted to vote following the procedure in the Municipal Elections Act as modified or altered by the Chief Electoral Officer in the circumstances.

(9) Except as otherwise provided by this Act or the regulations, the Municipal Elections Act applies mutatis mutandis to the taking of the vote as if it were a special election pursuant to that Act. 2002, c. 36, s. 3.

Effect of order and publication
389 (1) An order of the Board incorporating a town is conclusive evidence that the town has been duly incorporated.

(2) A copy of an order incorporating a town shall be published in the Royal Gazette as a regulation, and shall be filed and advertised as directed by the Board. 1998, c. 18, s. 389.

**Limitations on town incorporation**

390 A town may not be incorporated in a regional municipality or in a town. 1998, c. 18, s. 390.

**Effects upon incorporation**

391 (1) When a town is incorporated, the area within its boundaries ceases to be part of the county or district municipality from which it was incorporated.

(2) Unless the Board otherwise orders, when a town is incorporated, a village or service commission having authority in the area incorporated as a town is dissolved and its assets and liabilities are vested in the town. 1998, c. 18, s. 391.

**By-laws continue**

392 The by-laws of the county or district municipality from which a town is incorporated continue in force in the town for two years after the date of incorporation unless earlier repealed by the council of the town or extended by order of the Minister on request by the town council for a further period of two years. 1998, c. 18, s. 392.

**Property and taxation**

393 (1) Unless the Board otherwise orders, the real property of the county or district municipality situate in an area incorporated as a town is vested in the town.

(2) Unless the Board otherwise orders, taxes imposed with respect to the ownership or occupation of property in the area incorporated as a town and unpaid at the date of incorporation belong to the town and may be collected as if they had been imposed by the town. 1998, c. 18, s. 393.

**Application to dissolve town**

394 A town may be dissolved upon application to the Board by

(a) the Minister;

(b) the council of the town; or

(c) ten per cent of the electors of the town. 1998, c. 18, s. 394.
Application for preliminary order

395 (1) An applicant for dissolution shall apply for a preliminary order.

(2) The application for a preliminary order shall include

(a) the boundaries of the town proposed to be dissolved;

(b) an estimate of the population of the town;

(c) the total assessed value of taxable property and occupancy assessments in the town;

(d) the audited financial statements of the town for the fiscal year immediately preceding the year in which the application is made;

(e) a brief statement of the reasons for the application; and

(f) such other matters as the applicant considers relevant to the application.

(3) The applicant shall serve a copy of the application for a preliminary order on the clerk of the town, the clerk of the district municipality to which the town would revert if dissolved and on such others as the Board directs. 1998, c. 18, s. 395.

Hearing notifications

396 (1) Upon the Board setting the date for a hearing of the application for a preliminary order, the Board shall, at the expense of the applicant, advertise the hearing in a newspaper circulating in the town proposed to be dissolved, including the date by which any person wishing to be heard must notify the Board.

(2) Any interested person may appear and be heard at the hearing for a preliminary order by notifying the Board at least one week before the date fixed for the hearing. 1998, c. 18, s. 396.

Persons heard

397 At the hearing of the application for a preliminary order, the Board shall hear

(a) the applicant;

(b) a representative of the council of the town proposed to be dissolved;

(ba) a representative of any municipality to which the area of the town, if dissolved, might be annexed or form part of;

(c) the Minister; and
(d) any person who has previously notified the Board. *1998, c. 18, s. 397; 2003, c. 9, s. 79.*

**Preliminary order**

398 (1) After the application has been heard, the Board may make a preliminary order, indicating

(a) studies to be undertaken into the financial implications of dissolution for the town, the Province and the municipality to which the town would revert if dissolved;

(b) such other studies as may appear to the Board to be relevant to a decision on the necessity or expediency of the dissolution; and

(c) any other evidence that the Board may direct be provided during the hearing of the application.

(2) Where the Board determines that there are no reasonable grounds for the application for dissolution or there is no reasonable possibility that the application would be granted, the Board may dismiss the application.

(3) The cost of any studies required by the Board shall be borne by the parties as directed by the Board.

(4) Where any required studies are not completed within the time provided in the preliminary order, the Board may

(a) extend the time for completing the studies;

(b) proceed with the application without the studies;

(c) have the studies carried out or completed at the expense of the party responsible for them; or

(d) dismiss the application.

(5) repealed 2003, c. 9, s. 80.

*1998, c. 18, s. 398; 2003, c. 9, s. 80.*

**Order for dissolution of town**

399 (1) After the application for dissolution is heard, the Board may dissolve the town upon such terms as it considers advisable.

(2) The order of the Board dissolving a town shall

(a) declare that the area comprising the town be dissolved and be annexed to, and form part of, another municipality or municipalities;
(b) set out the effective date of the dissolution;

(c) determine that the area be an additional polling district or shall form part of another polling district of the municipality to which it is annexed;

(d) determine whether the area should continue as a village and, if so, provide for all things necessary to convert the former town to a village;

(e) direct the Director of Assessment to make any necessary adjustment in the assessment roll applicable to the area;

(f) make such determinations, issue such orders and directions and do or cause to be done all such other matters and things as, in the opinion of the Board, are necessary or incidental to the carrying out of the dissolution of the town.

(3) An order of the Board may annex, amalgamate, continue or dissolve boards and commissions and allocate their assets as the Board considers fair.

(4) The Board may make an interim order and reserve further directions.

(5) repealed 2003, c. 9, s. 80.

1998, c. 18, s. 399; 2003, c. 9, s. 80.

**Elector and polling districts**

400 (1) Where an order of the Board results in the dissolved town being one additional polling district, until the next regular election of councillors, the mayor of the town dissolved is the councillor for the district.

(2) Where an order of the Board results in the dissolved town being more than one additional ward or polling district, a special election shall be conducted by the returning officer of the municipality to which the dissolved town has been annexed in accordance with the Municipal Elections Act.

(3) Where a town is dissolved, the list of electors for the town continues to be the list of electors for the polling district until a new list of electors is prepared pursuant to the Municipal Elections Act.

(4) When a town is dissolved, the policies and by-laws in effect continue in force in the area of the former town until repealed by the council or, to the extent it has jurisdiction, any village commission that may replace the former town council. 1998, c. 18, s. 400.

**Streets of dissolved town**

401 Where a town is dissolved
(a) the Governor in Council may assume liability for the payment of all or any part of any debt incurred by the town for streets in the town; and

(b) the Minister of Transportation and Public Works shall determine which of the streets in the town are municipal highways and shall advise the municipality to which the town has been annexed. 1998, c. 18, s. 401.

Assets and liabilities of dissolved town

402 (1) Where a town is dissolved, the assets and liabilities of the town become assets and liabilities of the county or district municipality to which it reverts.

(2) The county or district municipality to which a dissolved town reverts stands in the place and stead of the town for all purposes and has the same powers to collect taxes due to the town as if the taxes had been imposed by it. 1998, c. 18, s. 402.

PART XVIII

VILLAGES

Interpretation

403 In this Part, "elector" means a person resident within the village entitled to vote at a municipal election, and who will have resided in the village for at least six months immediately prior to the village election. 1998, c. 18, s. 403.

Villages continue

404 The inhabitants of every village for which village commissioners were incorporated pursuant to the Village Services Act or to which that Act was declared to apply continue to be a body corporate under the name "Village of ....... " with the same boundaries, until altered by the Board pursuant to this Act. 1998, c. 18, s. 404.

Commission governs

405 A village is governed by a commission consisting of at least three commissioners and the number of commissioners, not exceeding five, shall be determined by the village by by-law. 1998, c. 18, s. 405.

Perpetual succession and common seal

406 (1) A village has perpetual succession and shall have a common seal.

(2) The seal shall be kept by the clerk of the village.
(3) A deed or document to which a village is a party shall be authenticated by the seal of the village and the chair and the clerk shall, when duly authorized, sign the deed or document and affix the seal. 1998, c. 18, s. 406.

Requirements for village commissioner

407 (1) No person is qualified to serve as a village commissioner unless the person is an elector.

(2) Every village commissioner shall take and subscribe the oath of office prescribed by the Municipal Elections Act in the manner prescribed by that Act before entering upon the duties of village commissioner.

(3) A village commissioner whose term of office has expired is eligible for reelection. 1998, c. 18, s. 407.

Meetings of village commission

408 (1) The village commissioners shall, at their first meeting after an election, elect a chair and a vice-chair.

(2) The chair shall preside at all meetings of the village commission.

(3) The vice-chair shall act in the absence or inability of the chair or in the event of the office of chair being vacant.

(4) All meetings of the village commission are open to the public.

(5) Meetings of the village commission shall be held at the times and places specified in the by-laws.

(6) The vice-chair, when notified that the chair is absent or unable to fulfil the duties of chair, or that the office of chair is vacant, has all the power and authority, and shall perform all the duties, of the chair. 1998, c. 18, s. 408.

Term

409 A village commissioner holds office for a term of three years. 1998, c. 18, s. 409.

By-law for nominations

410 (1) The village commission may, by by-law, provide for the nomination of candidates for election on a day preceding the day on which the election is to be held.

(2) Where a nomination day by-law is passed, nominations may only be made on the day provided for by the by-law. 1998, c. 18, s. 410.
Village commissioner vacancy

411 (1) Where a vacancy occurs in the office of a village commissioner, within thirty days

(a) the remaining village commissioners shall call a special meeting of the electors of the village for the purpose of filling the vacancy, which shall be held in the same manner as elections held at an annual meeting; or

(b) an election shall be held in accordance with the nomination and election by-laws of the village.

(1A) Notwithstanding subsection (1), a vacancy need not be filled until the next annual meeting or the election held in accordance with the nomination and election by-laws of the village immediately following the next annual meeting if it occurs within six months of the next annual meeting unless the Minister or the village commission determines otherwise.

(2) The person elected to fill a vacancy shall serve in office for the remainder of the term of the village commissioner whose office the person was elected to fill. 1998, c. 18, s. 411; 2001, c. 35, s. 24.

Village commissioner resignation

412 A village commissioner

(a) may resign from office at any time by delivering to the village clerk a signed declaration to that effect;

(b) who ceases to be ordinarily resident in the village, ceases to be qualified to serve as a village commissioner;

(c) who, without leave of the village commission, is absent from three consecutive regular meetings of the village commission, ceases to be qualified to serve as a village commissioner. 1998, c. 18, s. 412.

Annual public meeting

413 An annual public meeting of the electors of the village shall be held on or before the first day of July in each fiscal year. 1998, c. 18, s. 413.

Notice of meeting

414 (1) The chair of the village commission shall give notice of the time and place of the annual meeting of the electors by causing notices to be posted, in not less than five conspicuous places in the village, at least fourteen days before the date of the meeting.
(2) The village commission may advertise the annual meeting in a newspaper circulating in the village at least fourteen days before the meeting, in lieu of, or in addition to, posting notices. 1998, c. 18, s. 414.

**Annual meeting**

415 (1) The chair of the village commission shall preside at the annual meeting.

(2) The village commission shall present a report of the proceedings of the preceding fiscal year and the audited financial statement at the annual meeting.

(3) The electors present at an annual meeting shall, after the presentation and disposal of the report of the village commission and of the financial statement, proceed to elect village commissioners.

(4) The chair shall appoint two electors to act as scrutineers.

(5) Where more than one village commissioner is to be elected at the same meeting, a separate ballot shall be taken for each commissioner.

(6) Where the village commission so provides by by-law, a single ballot may be taken for the election of more than one village commissioner. 1998, c. 18, s. 415.

**By-law for election of village commissioners**

416 (1) The village commission may provide by by-law for the village commissioners to be elected on a day within one week following the annual meeting.

(2) The by-law shall

(a) specify the day that the election is to be held;

(b) specify the hours that polling is to occur;

(c) provide for the appointment of two scrutineers; and

(d) provide for any matter or thing necessary to effectively conduct the election. 1998, c. 18, s. 416.

**Voting procedures**

417 (1) Upon the completion of the voting, the clerk in the presence of each of the two scrutineers shall open the ballot box and examine the ballot papers and proceed to count the votes and shall declare the person or persons having the greatest number of votes elected.
(2) When there is a tie at an election of a village commissioner, the clerk shall determine the successful candidate by lot as prescribed by the Municipal Elections Act.

(3) After the votes are counted the village clerk shall make up a written statement containing the following particulars

(a) the number of votes polled;

(b) the names of the persons receiving votes and the number of votes received by each person.

(4) The statement shall be signed by the village clerk and filed with the minutes of the meeting. 1998, c. 18, s. 417.

Vote recount

418 (1) If, within three days after the election, any elector requests a recount of the votes cast at the election, the village clerk shall appoint a time within three days to recount the votes at the village office and shall, at the time and place appointed, in the presence of the chair of the village and the elector, proceed to recount the votes.

(2) The village clerk, as soon as the result of the poll is ascertained, shall declare to be elected the candidate or candidates having the highest number of votes, and in the event of a tie determine the successful candidate by lot as prescribed by the Municipal Elections Act. 1998, c. 18, s. 418.

Special meeting of electors

419 (1) The village commission may convene a special meeting of the electors and shall give fourteen days notice of it by posting notices in conspicuous places in the village stating the time, place and purpose for which the meeting is convened.

(2) The village commission may advertise the meeting in a newspaper circulating in the village at least fourteen days before the meeting in lieu of, or in addition to, posting notices. 1998, c. 18, s. 419.

Village clerk and treasurer

420 (1) The village commission shall appoint a village clerk and treasurer who shall be paid the salary granted by the village commission.

(2) The village clerk shall

(a) record all by-laws, resolutions, decisions and other proceedings of the village commission;

(b) if requested by any village commissioner, record the vote of every village commissioner voting on any matter;
(c) keep the books, records and accounts of the village;

(d) preserve and file all accounts, original and certified copies of the by-laws and of all minutes of proceedings of the village commission; and

(e) act as clerk at, and keep records of, all meetings of electors. 1998, c. 18, s. 420.

Policy for records management and destruction

421 (1) The village commission may adopt a policy for the management and destruction of records.

(2) Records required to be kept by any enactment and minutes, by-laws, policies or resolutions of the village commission may not be destroyed.

(3) The village commission may, by policy, specify further classes of records that are not to be destroyed or that are to be kept for set periods.

(4) When a village record has been destroyed or when the original village record is not produced in court, any photographic, photostatic or electronic reproduction of the record is admissible in evidence to the same extent as the original could have been produced and is, in the absence of proof to the contrary, proof of the record, if the clerk certifies that the reproduction is part of the records of the village and that it is a true reproduction of the original. 1998, c. 18, s. 421.

Power to employ persons

422 The village commission may employ the persons necessary for the purposes of the village. 1998, c. 18, s. 422.

Power to expend money

423 (1) The village commission may expend money required by the village for

(a) expenses of elections and plebiscites;

(b) premiums on any insurance policy for damage to property, personal injury or liability, including liability of members of the village commission or employees of the village and volunteer members of the fire departments and emergency services providers and volunteers in village programs;

(c) repayment of money borrowed by the village, the payment of interest on that money and payment of sinking funds;

(d) providing an emergency response system;

(e) snow and ice removal;
(f) procuring and providing for the village, or any part of it, a suitable system of fire protection or emergency services and may, for the purpose, purchase or otherwise acquire and equip maintain and repair apparatus, machinery, implements and plan for use in extinguishing fires or providing emergency services;

(g) equipping and maintaining fire departments or emergency services providers;

(h) honoraria and training expenses for volunteer firefighters and emergency services volunteers;

(i) providing school crossing guards;

(j) recreational programs;

(k) advertising the opportunities of the village for business, industrial and tourism purposes and encouraging tourist traffic, with power to make a grant to a nonprofit society for this purpose;

(l) lighting any part of the village;

(m) preventing or decreasing flooding;

(n) collecting, removing, managing and disposing of solid waste;

(o) salaries, remuneration and expenses of the village commissioners, officers and employees of the village;

(p) the reasonable expenses incurred by the village commissioners for attendance at meetings and conferences, if the permission of the village commission is obtained prior to the meeting or conference or if the attendance is in accordance with a resolution of the village commission;

(q) the contribution of the village to a pension or superannuation fund;

(r) payment to the Board of an assessment on a public utility owned or operated by the village, as determined by the Board;

(s) annual fees of municipal, village or professional associations;

(t) public libraries;

(u) lands and buildings required for any purpose of the village,

(v) furnishing and equipping any village facility;

(w) acquisition of equipment, materials, vehicles, machinery, apparatus, implements and plant for any village purpose;
(x) placing the wiring and other parts of a system for the supply or distribution of electricity, gas, steam or other source of energy, or a telecommunications system, underground;

(y) buildings for a medical centre to encourage medical doctors, dentists and other health professionals to locate in the village;

(z) a fire alarm system;

(aa) ponds, reservoirs, brooks, canals and other means of accumulating or directing the flow of water to be used in extinguishing fires;

(ab) playgrounds, trails, bicycle paths, swimming pools, ice arenas and other recreational facilities;

(ac) public grounds, squares, halls, museums, parks, tourist information centres and community centres;

(ad) wastewater facilities and stormwater systems;

(ae) water systems;

(AF) solid-waste management facilities;

(ag) a system for providing electric light and power;

(ah) parking lots and parking structures;

(ai) wharves and public landings;

(aj) constructing, maintaining and repairing streets, sidewalks, curbs, gutters and other improvements to streets and highways, provided that no improvement shall be constructed without the permission of the owner of the street or highway;

(ak) doing all things necessary or incidental to the exercise of any of the powers and duties of the village.

(2) The village may extend, construct, alter, improve, maintain and operate the wastewater facilities, stormwater system, water system or electric light system of the village outside the limits of the village and may enter into contracts to supply the services outside the village.

(2A) Village property used for any of the purposes referred to in subsection (2) is deemed, for purposes of clause 5(1)(u) of the Assessment Act, to be used exclusively for the purpose of village commissioners.
(3) The village may charge for any service provided outside the village in the same manner in which the service is charged for in the village provided that any rates subject to the approval of the Board are approved by the Board. 1998, c. 18, s. 423; 2004, c. 7, s. 20.

Village expropriation powers

424 A village has the same powers of expropriation as a municipality, and shall follow the same procedure. 1998, c. 18, s. 424.

Mutual aid

425 (1) A village may assist at fires, rescues or other emergencies occurring outside its boundaries.

(2) A village may agree with municipalities, villages, federal and provincial departments and agencies or others to provide assistance at fires, rescues and other emergencies and to receive assistance at fires, rescues and other emergencies. 1998, c. 18, s. 425.

By-law powers

426 A village commission may make by-laws for

(a) regulating proceedings and preserving order at meetings of the village commission;

(b) the government and procedure of meetings of the electors of the village;

(c) regulating the management, and providing for the security of, public property of any kind belonging to the village, and providing for the permanent improvement of the village in all matters ornamental as well as useful;

(d) protecting and preventing injury to streets, squares, sidewalks and pavements and to the posts, railings, trees and ornaments of the village;

(e) regulating or protecting drains, sewers or watercourses in the village;

(f) providing for any other purpose, matter or thing within the powers, duties or control of the commissioners. 1998, c. 18, s. 426.

Power to make by-laws

427 (1) The commission may, by by-law

(a) require the owner, occupier or person in charge of a property to clear snow and ice from the sidewalks adjoining the property;
(b) prescribe measures to be taken by the owners, occupiers or persons in charge for the abatement of dangerous conditions arising from the presence of snow and ice on the sidewalks adjoining the property.

(2) Where a person required by a by-law made pursuant to subsection (1) fails to clear the ice and snow from the sidewalk forthwith after notice to do so, or to take the necessary measures for the abatement of any dangerous condition arising from the presence of the snow and ice, the village clerk may have the snow and ice cleared and any necessary measures to abate dangerous conditions taken and the cost of the work, with interest at the rate determined by the village commission, from the date of the completion of the work until the date of payment, is a first lien on the property.

(3) The commission may, by by-law

(a) require the owner of a property to remove ice or icicles from part of a building overhanging or abutting a sidewalk;

(b) require the owner of lands abutting a street to maintain an area of vegetation between the streetline and the main travelled way. 1998, c. 18, s. 427.

By-laws for enforcement of payment of charges

428 (1) The village commission may make by-laws imposing, fixing and providing methods of enforcing payment of charges for

(a) wastewater facilities or stormwater systems, for the use of wastewater facilities or stormwater systems, and for connecting to wastewater facilities or stormwater systems;

(b) repealed 2003, c. 9, s. 81.

(c) the village portion of the capital cost of installing a water system;

(d) laying out, opening, constructing, repairing, improving and maintaining streets, curbs, sidewalks, gutters, bridges, culverts and retaining walls whether the cost is incurred by the village directly or by, or pursuant to, an agreement with Her Majesty in right of the Province, the Minister of Transportation and Public Works or any person;

(e) the village portion of the capital cost of placing the wiring and other parts of an electrical distribution system underground;

(f) a special purpose tax account to provide for future expenditures for wastewater facilities, stormwater systems, water systems, transportation facilities or other anticipated capital requirements.

(2) The village commission may, by by-law
(a) define classes of buildings to be erected or enlarged according to the varying loads that, in the opinion of the village commission, the buildings impose or may impose on the sewer system and levy a one-time redevelopment charge to pay for additional or trunk sanitary or storm sewer capacity required to accommodate the effluent from the buildings;

(b) impose a one-time oversized sewer charge on each property determined by the village commission to benefit from a sewer in the future to recover the cost of making the sewer an oversized sewer, and provide that the oversized sewer charge is not payable until the property is serviced by a sanitary sewer or a storm sewer;

(c) levy a one-time storm drainage charge on the owner of each lot of land in a drainage management area for which an application is made for a development permit to allow, on the lot, a development of a class designated by the village commission in the by-law.

(3) A by-law made pursuant to this Section may provide

(a) that the charges fixed by, or determined pursuant to, the by-law may be chargeable in proportion to frontage, in proportion to area or in proportion to the assessment of the respective properties fronting on the street or according to another plan or method set out in the by-law;

(b) that the charges may be made and collected only where the persons, owning more than fifty per cent of the frontage of the real property fronting on the street or the portion of a street on which the work has been performed, have filed with the clerk a petition requesting that the work be performed;

(c) that the charges may be different for different classes of development and may be different in different areas of the village;

(d) when the charges are payable;

(e) for total or partial exemption of persons and land from the charge and for adjustments to be made with respect to lots of land or developments where the proposals or applications change in order to reflect the changing nature of lots or developments;

(f) that the charges are first liens on the real property and may be collected in the same manner as other taxes;

(g) that the charges be collectable in the same manner as taxes, and at the option of the treasurer be collectable at the same time and by the same proceedings as taxes;

(h) a manner for determining when the lien becomes effective or when the charges become due and payable;

(i) that the amount payable may, at the option of the owner of the property, be paid in the number of annual installments set out in the by-law, and on default of payment of any installment the balance becomes due and payable;
(j) that interest is payable annually on the entire amount outstanding and unpaid, whether or not the owner has elected to pay by installments, at a rate and beginning on a date fixed by the by-law.

(4) For greater certainty, no property is exempt from a charge levied pursuant to this Section, except property of Her Majesty in right of the Province. 1998, c. 18, s. 428; 2003, c. 9, s. 81.

By-law regarding taxation

429 (1) A village commission has the powers of a municipality to make by-laws pursuant to this Act for tax reductions, exemptions and deferrals.

(2) A by-law passed pursuant to subsection (1) does not require the approval of the Minister. 1998, c. 18, s. 429.

By-law requiring connection with sewer

430 (1) Where a village is operating a sewer or drainage system, the village commission may, by by-law, require the owner of every building to connect to the sewer line in the manner prescribed in the by-law, and may exempt from the requirement buildings that

(a) are adequately served with sewer and drainage;

(b) do not require sewer service; or

(c) would not be adequately or practically served by connection with the sewer line.

(2) The by-law may require the owner of a septic tank or outhouse to remove and destroy the septic tank or outhouse and to fill any resulting cavity when the building served by the septic tank or outhouse is connected or required to be connected with the sewer.

(3) The village commission may serve notice on an owner requiring the owner to comply with the by-law, and any person who does not comply with the notice within thirty days is guilty of an offence. 1998, c. 18, s. 430.

By-law prescribing penalties

431 (1) Except as otherwise provided, the village commission may, by by-law, prescribe a maximum penalty, not exceeding five thousand dollars, for the violation of a by-law of the village and may, in the by-law, provide that in default of payment of the penalty the offender may be imprisoned for not more than ninety days.

(2) The village commission may, by by-law, prescribe a minimum penalty not exceeding one hundred dollars for the violation of a by-law of the village.
(3) Where no penalty for violation of a by-law of a village is prescribed, every person who violates a by-law is liable upon summary conviction, to a penalty of not more than five thousand dollars and in default of payment, to imprisonment for a period of not more than ninety days.

(4) Every day during which a contravention of or failure to comply with a by-law of a village continues is a separate offence. *1998, c. 18, s. 431.*

**Collection of penalties**

432 (1) All penalties for violations of a by-law of a village shall, when collected, be paid to the village.

(2) A penalty pursuant to a by-law of the village, if no other provision is made respecting it, belongs to and forms part of the general revenue of the village. *1998, c. 18, s. 432.*

**Ministerial approval and revocation**

433 (1) Except as otherwise specified in the enactment authorizing the by-law, every by-law made by a village commission pursuant to the authority of this Act or another Act of the Legislature is subject to the approval of the Minister and, when so approved, has the force of law.

(2) The Minister may subsequently revoke approval of a by-law, or part of the by-law and, after such revocation, the by-law or the part in respect of which approval is revoked is repealed.

(3) Two copies of every by-law enacted by a village commission shall be certified by the clerk to be true copies and shall be provided to the Minister. *1998, c. 18, s. 433.*

**By-law records**

434 (1) The village commission shall keep one copy of every by-law, certified by the village clerk under the seal of the village that it was passed or made and, in the case of a by-law requiring the approval of the Minister, bearing the approval of the Minister.

(2) The by-law records shall be maintained by the village clerk.

(3) The original by-laws shall be open to inspection by any person at any reasonable time, but shall not be removed from the office of the village and the production of the original by-law in a court may not be required on subpoena but only upon order of the court or a judge after satisfactory cause is shown.

(4) The village clerk shall print all of the by-laws of the village from time to time in force and shall keep printed copies of the by-laws, amended to date, for sale.

(5) The village clerk shall provide a copy of any by-law amended to date to any person requesting one, at a reasonable price, having regard to the cost of printing. *1998, c. 18, s. 434.*
**Prima facie proof of by-law**

435 (1) A copy of any by-law made pursuant to this Act or another Act of the Legislature purporting to be certified by the village clerk under the seal of the village to be a true copy of a by-law passed by the village commission and having received all necessary approvals shall be received in evidence as prima facie proof of its passing, its having received all necessary approvals, its being in force and the contents of it without any further proof in any court, unless it is specially pleaded or alleged that the seal or the signature of the village clerk is forged.

(2) Printed documents certified by the village clerk purporting to be printed copies of any or all by-laws passed by the village commission shall be admitted in evidence in all courts in the Province as prima facie proof of the by-laws and of the due passing of them. *1998, c. 18, s. 435.*

**Application for Supreme Court order**

436 A village may apply to a judge of the Supreme Court of Nova Scotia for an injunction or other order, and the judge may make any order that the justice of the case requires, if

(a) a building is erected, is being erected or is being used in contravention of a by-law of the village;

(b) land is being used in contravention of a by-law of the village;

(c) a breach of a by-law is anticipated or is of a continuing nature; or

(d) a person is carrying on business or is doing any thing without paying the licence or permit fee required. *1998, c. 18, s. 436.*

**Application to quash**

437 (1) A person may, by notice of motion, apply to a judge of the Supreme Court of Nova Scotia to quash a by-law, order, policy or resolution of the village commission, in whole or in part, for illegality.

(2) No by-law may be quashed for a matter of form only or for a procedural irregularity.

(3) The judge may quash the by-law, order, policy or resolution in whole or in part and may, according to the result of the application, award costs for or against the village and may determine the scale of the costs.

(4) The notice of motion shall be served at least seven days before the day on which the motion is to be made.

(5) No application pursuant to this Section to quash a by-law, order, policy or resolution, in whole or in part, shall be entertained unless the application is made within three months after the publication of the by-law or the making of the order, policy or resolution. *1998, c. 18, s. 437.*
Power to borrow

438 (1) A village may borrow the sums necessary to carry out any village service.

(2) No money shall be borrowed by a village until the proposed borrowing is approved by a meeting of the electors of the village and by the Minister.

(3) Subject to subsection (2), the procedures for borrowing by a village are the same as for a municipality. 1998, c. 18, s. 438; 2003, c. 9, s. 82.

Village commission estimates and rates

439 (1) The village commission, before the annual meeting in each fiscal year, shall make estimates of all sums required for the lawful purposes of the village for the then current fiscal year after crediting the probable revenue from all sources other than rates, including any subsidy allowed by the council of the municipality within which the village is situate, and making due allowance for the abatement and losses which may occur in the collection of the taxes and for taxes for the current fiscal year which may not be collected or collectable.

(2) In preparing the estimates, the village commission shall include all sums which are required for the retirement of debenture debt, or debenture interest, or sinking fund deposits, if any, in respect of all debentures issued by the municipality for or on behalf of the village.

(3) Subject to subsection (3A), the village commission shall authorize the levying and collecting of

(a) a commercial tax rate of so much on the dollar of the assessed value of taxable commercial property and business occupancy assessments; and

(b) a residential tax rate of so much on the dollar of the assessed value of taxable residential property and resource property.

(3A) The commercial tax rate shall not exceed one and a half times the residential tax rate.

(3B) The tax rates referred to in subsection (3) shall be those that the village commission deems sufficient to raise the amount of money required to defray the estimated requirements of the village.

(4) The amount rated upon each ratepayer shall be collected in the same manner as municipal rates and taxes with the same rights and remedies in the event of default of payment.

(5) Where the assessment for municipal purposes covers property in part outside the limits of the village, the village commission may allow such abatement of rates as the commission deems just.

(6) Where any expenditure is incurred for defraying the expenses of providing and operating a waterworks system, the amount of the expenditure shall be paid out of the revenue received from
the operation of the system pursuant to the Public Utilities Act so far as that revenue extends, and any deficit thereafter may be rated and collected. 1998, c. 18, s. 439; 2005, c. 9, s. 14.

**Tax collection**

440 (1) A village has the same power to prescribe due dates, installment billing, interest, penalties and discounts as a municipality.

(2) A village has the same powers as a municipality to collect taxes.

(3) Village taxes are a first lien on the property with respect to which they are levied. 1998, c. 18, s. 440.

**Delegation of tax collection to municipality**

441 (1) A village may, with the consent of the municipal council, delegate its powers of tax collection to the municipality within which it is situate.

(2) Where a village delegates its powers of tax collection to a municipality, the village clerk shall provide the municipal treasurer with a requisition for the amount required for the current fiscal year and a list of the taxpayers of the village.

(3) Where any part of the amount required is an area charge, the requisition shall state the amount to be raised as an area charge and the taxpayers liable for the charge.

(4) Where a property is partly within the village and partly outside, the list shall show what proportion has been allowed as an abatement.

(5) Where a requisition and list are furnished to the municipal clerk pursuant to a delegation of tax collection powers agreed to by the municipal council, the sums required by the village, for the purposes of the village, shall be levied and collected by the municipality in the same manner as if the amounts were area rates.

(6) After making an allowance for the abatement, losses, expenses, discounts and commissions which may occur in the collection of the taxes and for taxes for the current fiscal year which may not be collected or collectable, the amount set out in the requisition shall be paid over by the treasurer of the municipality to the village in installments from time to time as requested by the chairman.

(7) In determining the rate of taxation required to levy and collect the amount of the requisition, the municipality shall not be bound by the list of ratepayers provided by the village, but may use such other information as is available to it. 1998, c. 18, s. 441.

**Village commission area rates**
442 Where the village incurs an expenditure in an area of the village, the village commission may direct that the amount of the expenditure, together with an allowance for the abatement, losses and expenses which may occur in the collection and for amounts which may not be collected or collectable, be rated and collected by a rate of so much on the dollar on the assessed value of the property in the area as shown on the then current assessment roll of the municipality, and the amount so rated shall be collected in the same manner as other rates of the village. 1998, c. 18, s. 442.

**Power to borrow**

443 The village commission may, from time to time, borrow for the purpose of defraying the annual current expenditure of the village and the interest on the loans shall be added to the current expenses for the fiscal year, provided that the loans shall not in the aggregate at any time exceed fifty per cent of the total amount of taxes levied for the current fiscal year. 1998, c. 18, s. 443.

**Capital reserve fund**

444 (1) A village shall maintain a capital reserve fund.

(2) The capital reserve fund of a village is subject to the same requirements and limitations as the capital reserve fund of a municipality.

(3) The village shall pay into a capital reserve fund the proceeds from the sale of any property of the village and the proceeds of any fire or other insurance. 1998, c. 18, s. 444.

**Village auditor**

445 (1) A village shall appoint an auditor who shall be a person registered as a municipal auditor.

(2) A village auditor has the powers and duties of the auditor of a municipality. 1998, c. 18, s. 445.

**Power to sell or lease property**

446 With the consent of the Minister a village commission may sell any real or personal property at market value when the property is no longer required for the use of the village, or may lease any real or personal property for market value, but the consent is not required if the property so leased or sold does not exceed twenty-five thousand dollars in value. 1998, c. 18, s. 446.

**Application to change village boundaries**

447 (1) An application to change the boundaries of a village may be made to the Board by

(a) the village commission; or
(b) an owner of real property in the area proposed by the owner to be added to, or taken from, the village.

(2) An application to the Board by the village commission to change the boundaries shall be accompanied by

(a) a description of the boundary change; and

(b) a petition of two thirds of the owners of real property in the area proposed to be added to, or taken from, the village, approving of the change.

(3) An application to the Board by an owner of real property in the area proposed to be added to or taken from the village shall be accompanied by a petition of two thirds of the owners of real property in the area proposed to be added to or taken from the village, approving of the change, and the application shall contain the name and mailing address of the person to whom notices and communication may be given with respect to the application.

(4) Upon receipt of an application to change the boundaries of a village, the Board shall give such public notice of the application as the Board considers appropriate and shall hold a hearing with respect to the application.

(5) Notice of the date, time and location of the hearing shall be served upon the village clerk, the clerk of the municipality of which the village forms a part, an application, if any, and the Minister.

(6) At the hearing the Board shall hear any interested person or municipality.

(7) The Board may, after inquiring into and taking into account

(a) the necessity or expediency of the order applied for;

(b) the financial position and obligations of the village and municipalities affected;

(c) the burden of taxation upon the ratepayers of the village and the area proposed to be added to, or taken from, the village; and

(d) all other matters that in the opinion of the Board are relevant,

order that the boundaries of the village be changed.

(8) An order made pursuant to subsection (7) shall

(a) define the boundaries of the village, with any alterations made as a result of the hearing;

(b) state when the new boundaries are to be effective; and
(c) contain such directions respecting the implementation of the new boundaries as the Board sees fit. 1998, c. 18, s. 447.

**Dissolution of village**

448 (1) The Minister may, by order, dissolve any village upon the request of the village commission authorized by a meeting of the electors of the village.

(2) The Minister may, by order, dissolve a village upon the request of a municipality if

(a) there has been, to the knowledge of the Minister and the clerk of the municipality, no meeting of the electors of the village for at least two years; and

(b) ninety days notice of the proposed dissolution has been served on the latest village commissioners and village clerk known to the Minister, and no objection to the proposed dissolution has been filed with the Minister.

(3) The Board may, by order, dissolve a village on the request of not fewer than ten per cent of the electors of the village.

(4) The Board shall serve notice of the proposed dissolution at least sixty days before the dissolution on

(a) the village clerk and any village commissioner;

(b) the clerk of the municipality in which the village is located; and

(c) the Minister.

(5) The notice shall provide that any objection to the proposal shall be filed with the Board within forty-five days of the service of the notice.

(6) Where any objections are received to the proposal, the Board shall hold a hearing with respect to the proposed dissolution, and the clerk of the Board shall notify the village clerk, the municipal clerk, any person who filed an objection and the Minister of the date and location of hearing.

(7) Upon the making of an order dissolving the village, the village ceases to be a body corporate and this Act no longer applies to it.

(8) All assets and liabilities, including outstanding debentures, of the former village are vested in the municipality in which the former village is located and the municipality may transfer, free of cost, property of a village that is dissolved to a body incorporated to provide community services in the area served by the dissolved village.

(9) Any net liability shall be funded by an area rate levied on the area of the former village.
(10) An order dissolving a village is regulations within the meaning of the Regulations Act. 1998, c. 18, s. 448.

PART XIX

MUNICIPAL AFFAIRS

Interpretation

449 In this Part, "municipality" means a regional municipality, town or county or district municipality, except where the context otherwise requires or as otherwise defined in this Act, and includes a village, a committee created by an intermunicipal services agreement and a service commission. 1998, c. 18, s. 449; 2000, c. 9, s. 54.

Requirements for Ministerial approval

450 (1) Where, by any Act of the Legislature, an approval or a consent of a minister of the Crown of or to any resolution, regulation, by-law, plan, borrowing or other act or matter of a municipality is required, the approval of the Minister is also required and whenever the approval of the Minister is required, the Minister may, in the Minister's discretion

(a) approve or consent to all or part and from time to time approve or consent to other parts or to the remainder;

(b) attach any condition, subject to which approval or consent becomes effective;

(c) approve or consent with amendments and the subject matter of the approval or consent is effective as amended until subsequently amended or repealed, with the approval of the Minister, by the council that adopted it;

(d) rescind, vary or revoke the approval or consent, or any condition subject to which the approval or consent was effective, either in whole or in part, whereupon the matter approved or consented to or the condition, or part thereof, shall cease to have force and effect.

(2) Where, by any Act of the Legislature, a resolution, regulation, by-law or other act or matter of a municipality or of any board, committee or other body to which a municipality appoints members is subject to the approval of the Governor in Council or may be disallowed by the Governor in Council, the resolution, regulation, by-law or other act or matter is subject to the approval of the Minister and does not have effect until it receives the approval of the Minister, but is not subject to the approval of, or disallowance by, the Governor in Council. 1998, c. 18, s. 450; 2000, c. 9, s. 55.

Prescription of accounting methods

451 (1) The Minister may prescribe the
(a) system of accounting to be used by municipalities and the form in which records shall be kept and funds accounted for;

(b) information to be provided by municipalities to the Minister and when it shall be provided;

(c) manner in which municipal accounts are to be audited and the reports to be provided by municipal auditors.

(2) The exercise by the Minister of the authority contained in subsection (1) is regulations within the meaning of the Regulations Act.

(3) The Minister may prescribe different systems for different classes of municipality. 1998, c. 18, s. 451.

Ministerial powers

452 (1) The Minister may

(a) collect and analyze information relating to municipalities;

(b) prepare and publish information and advice relating to municipal affairs;

(c) study and advise upon the system of municipal institutions and the administration of municipal affairs;

(d) effect improvement in the conduct and administration of municipal affairs;

(e) consult with, assist and advise municipalities in the conduct and administration of municipal affairs;

(f) do anything necessary or incidental to the foregoing or directed to the improvement of municipal government in the Province.

(2) The Minister may enter into agreements with a municipality or a board, agency or commission of a municipality to assist in the achievement of any objects that are within the powers of the municipality or board, agency or commission and to effect improvement generally in the conduct and administration of municipal affairs.

(3) The Minister, with the approval of the Governor in Council, may enter into agreements with the Government of Canada or another province or any department or agency of either of them to assist in the achievement of any objects that are within the powers of a municipality or board, agency or commission of a municipality, and to effect improvement generally in the conduct and administration of municipal affairs. 1998, c. 18, s. 452.

Date or time restrictions or limitations
453 (1) Where an enactment fixes a date for, or imposes a time restriction or limitation in respect of

(a) the determination or finalization of a budget of a municipality or a village of its estimates of revenues and expenditures;

(b) setting a tax rate by a municipality;

(c) the transmission of tax bills, statements or notices by a municipality;

(d) payment of taxes to a municipality, including imposition of penalties; or

(e) any other act relating to taxation by a municipality,

the Minister may, by order, upon the request of the council, extend the date or time restriction or limitation.

(2) The exercise by the Minister of the authority contained in subsection (1) is regulations within the meaning of the Regulations Act. 1998, c. 18, s. 453.

Ministerial power to direct audit or review

454 (1) The Minister may, at any time, direct an audit or review of a municipality by a person appointed by the Minister.

(2) The person appointed by the Minister to make an audit or review shall, for that purpose, have free access to all books of account, securities, cash, documents, bank accounts, vouchers, correspondence and records of every description of the municipality.

(3) A person who fails to give any information or thing reasonably required by the person appointed to make an audit or review for the purpose of the audit or review, or who destroys, mutilates or defaces any such thing, is guilty of an offence and is liable, upon summary conviction, to a penalty of not more than fifty thousand dollars and, in default of payment, to imprisonment for a term of not more than twelve months. 1998, c. 18, s. 454.

Public Inquiries Act

455 The Minister, or any person to whom the Minister may, in writing, delegate the authority may, for any of the purposes of this Act, examine any municipality, person, company, property or thing whatsoever, at any time, and for the purpose has the same power, privileges and immunities as a commissioner appointed under the Public Inquiries Act. 1998, c. 18, s. 455.

Order by Minister

456 (1) The Minister may order a municipality to do anything required by law or by agreement with the Minister or Her Majesty in right of the Province, or necessary or desirable in the
interests of the municipality, or necessary or desirable for the due accounting for, collection or payment of any of a municipality's assets, liabilities, revenues, funds or money.

(2) Every person who fails to comply with an order of the Minister, votes in favour of any motion that would result in a failure to obey the order or votes against a motion to comply with the order is guilty of an offence and is liable, on summary conviction, to a penalty of not less than one thousand dollars and not more than ten thousand dollars and, in default of payment, to imprisonment for a term of not less than three months and not more than twelve months. 1998, c. 18, s. 456.

Registration as municipal auditor

457 (1) A person licensed as a public accountant pursuant to the Public Accountants Act may be registered as a municipal auditor.

(2) A firm or partnership may be registered as a municipal auditor if a majority of the members of the firm or partnership are licensed as public accountants pursuant to the Public Accountants Act.

(3) A person, firm or partnership shall not act as, or exercise or perform any of the duties of, a municipal auditor unless registered as a municipal auditor pursuant to this Section.

(4) An application for registration as a municipal auditor shall be filed with the Minister on or before June 30 in each year.

(5) An application for registration as a municipal auditor shall be accompanied by an application fee in the amount determined by the Governor in Council.

(6) The Minister may accept an application filed after June 30 but on or before December 31 in any year, upon payment of the additional fee determined by the Governor in Council.

(7) The Minister may publish in the Royal Gazette the names of those persons, firms and partnerships whose applications for registration have been accepted and when so published the persons firms and partnerships are registered as municipal auditors.

(8) Registration as a municipal auditor expires on July 31 in each year.

(9) The Minister may, at any time, cancel or suspend the registration of a municipal auditor for any reason that the Minister may deem sufficient and may reinstate or restore any cancelled or suspended registration.

(10) A person, firm or partnership shall not, while registration is cancelled or suspended, exercise or perform the duties of a municipal auditor.

(11) An unabridged copy of every statement or report, of whatsoever nature or whether interim or final, made by a municipal auditor shall forthwith be forwarded by the auditor to the Minister.
(12) A person who violates this Section is liable, on conviction, to a penalty of not more than ten thousand dollars and, in default of payment, to imprisonment for a period of not more than six months.

(13) A reference in any Act of the Legislature to a registered municipal auditor, an auditor registered pursuant to the Municipal Act or like term is and is deemed to be a reference to a person, firm or partnership registered as a municipal auditor pursuant to this Section. 1998, c. 18, s. 457.

**Declaration of council vacancy**

458 (1) Where a municipality

(a) fails, or in the opinion of the Governor in Council, is about to or may fail, to pay the amount due for principal and interest on any debenture;

(b) fails to pay into a sinking fund any amount it is required to pay;

(c) fails to pay any of its other debts or liabilities whatsoever when due;

(d) fails, in the opinion of the Governor in Council, to levy the amount required to meet the expenditures required for any fiscal year;

(e) fails, in the opinion of the Governor in Council, to comply with any order of the Minister; or

(f) has passed a resolution requesting the Governor in Council to do so,

the Governor in Council may, on the recommendation of the Minister, if deemed expedient to do so, declare vacant the offices of mayor or warden and councillors of the municipality.

(2) Where the Governor in Council has declared vacant the office of mayor or warden and councillors, the Governor in Council shall appoint a mayor or warden and councillors to hold office during pleasure, to be the council of the municipality until the first meeting of a new council elected pursuant to an order of the Governor in Council.

(3) Any vacancy occurring in a council appointed by the Governor in Council shall be filled by the Governor in Council.

(4) A member of a council appointed by the Governor in Council is not required to have the qualifications of a councillor prescribed by the Municipal Elections Act.

(5) Where the Governor in Council appoints a council, the tenure of every municipal employee is during the pleasure of the appointed council. 1998, c. 18, s. 458.

**Election of new council**
459 (1) After the Governor in Council appoints a council, no election shall be held pursuant to
the Municipal Elections Act until ordered by the Governor in Council.

(2) An order of the Governor in Council for the election of a new council shall set out
(a) the dates for nomination day, advance polls and ordinary polling day for the election; and
(b) the date the new council takes office.

(3) When the Governor in Council orders the election of a new council, the tenure of every
municipal employee ceases to be during the pleasure of the council. 1998, c. 18, s. 459.

Powers of council appointed by Governor in Council

460 (1) The council appointed by the Governor in Council has all of the powers of a council.

(2) The council appointed by the Governor in Council may, with the approval of creditors
representing at least half of the aggregate indebtedness of the municipality,
(a) consolidate some or all of its debts and issue new debentures to effect the consolidation;
(b) issue debentures to pay any debt and compel acceptance of the debentures in payment of the
debt;
(c) issue new debentures in exchange for any outstanding debentures and compel their
acceptance;
(d) fix the terms, conditions, places and times for exchanges of debentures;
(e) postpone or vary the terms, times and places for payment of any outstanding debentures and
other indebtedness and the interest;
(f) vary the rate of interest on any outstanding debentures and other indebtedness;
(g) sell any municipal assets.

(3) The council appointed by the Governor in Council may
(a) vary any tax rate or other charge imposed to pay any indebtedness;
(b) vary the basis, terms and times of payment of any tax rate or other charge imposed to pay any
indebtedness;
(c) create sinking funds and reserves to pay debentures and other indebtedness;
(d) manage, invest and apply sinking funds, reserves and surpluses;
(e) ratify any agreement, arrangement or compromise entered into with creditors respecting debentures and other indebtedness;

(f) borrow any amount required to meet the current expenditures of the municipality until the taxes are collected.

(4) In the case of a village or service commission, the council appointed by the Governor in Council may require the county or district municipality in which the village or service commission is situate to pay an amount sufficient to provide for the orderly payment of the debts and liabilities of the village or service commission, and the amount so provided, with an allowance for collection costs and losses, shall be recovered by the county or district municipality as an area rate on the area of the village or service commission.

(5) In the case of a village or service commission, the council appointed by the Governor in Council may recommend the dissolution of the village or service commission and the Governor in Council may, by proclamation, dissolve the village or service commission, effective the date set out in the proclamation. 1998, c. 18, s. 460.

PART XX

FREEDOM OF INFORMATION AND PROTECTION OF PRIVACY

Note - See Section 502 and following note.

Interpretation

461 In this Part,

(a) "background information" means

   (i) any factual material,

   (ii) a public opinion poll,

   (iii) a statistical survey,

   (iv) an appraisal,

   (v) an economic forecast,

   (vi) an environmental-impact statement or similar information,

   (vii) a final report or final audit on the performance or efficiency of a municipality or on any of its programs or policies,
(viii) a consumer test report or a report of a test carried out on a product to test equipment of a municipality,

(ix) a feasibility or technical study, including a cost estimate, relating to a policy or project of a municipality,

(x) a report on the results of field research undertaken before a policy proposal is formulated,

(xi) a report of an external task force, advisory board or similar body that has been established to consider any matter and make reports or recommendations to a municipality, or

(xii) a plan or proposal to establish a new program or to change a program, if the plan or proposal has been approved or rejected by the council;

(b) "employee" in relation to a municipality, includes a person retained under an employment contract to perform services for the municipality;

(c) "law enforcement" means

   (i) policing, including criminal-intelligence operations,

   (ii) investigations that lead, or could lead, to a penalty or sanction being imposed, and

   (iii) proceedings that lead, or could lead, to a penalty or sanction being imposed;

(d) "municipal body" means a committee, community council, agency, authority, board or commission, whether incorporated or not

   (i) a majority of the members of which are appointed by, or

   (ii) which is under the authority of,

one or more municipalities;

(e) "municipality" means a regional municipality, town, county or district municipality, village, service commission or municipal body;

(f) "personal information" means recorded information about an identifiable individual, including

   (i) the individual's name, address or telephone number,

   (ii) the individual's race, national or ethnic origin, colour, or religious or political beliefs or associations,

   (iii) the individual's age, sex, sexual orientation, marital status or family status,
(iv) an identifying number, symbol or other particular assigned to the individual,

(v) the individual's fingerprints, blood type or inheritable characteristics,

(vi) information about the individual's health-care history, including a physical or mental disability,

(vii) information about the individual's educational, financial, criminal or employment history,

(viii) anyone else's opinions about the individual, and

(ix) the individual's personal views or opinions, except if they are about someone else;

(g) "prescribed" means prescribed by the regulations made pursuant to the Freedom of Information and Protection of Privacy Act or this Part;

(h) "record" includes books, documents, maps, drawings, photographs, letters, vouchers, papers and any other thing on which information is recorded or stored by graphic, electronic, mechanical or other means, but does not include a computer program or any other mechanism that produces records;

(i) "responsible officer" means, in the case of a

(i) regional municipality, town or county or district municipality, the chief administrative officer, if one has been appointed or, if one has not been appointed, the clerk,

(ii) village or service commission, the clerk,

(iii) municipal body

(A) a majority of the members of which are appointed by one municipality, the responsible officer for the appointing municipality,

(B) which is under the authority of one municipality, the responsible officer for that municipality, or

(C) which is not described in paragraph (A) or (B), the chair or presiding officer;

(j) "review officer" means the review officer appointed by the Governor in Council pursuant to the Freedom of Information and Protection of Privacy Act;

(k) "third party", in relation to a request for access to a record or for correction of personal information, means any person, group of persons or organization other than

(i) the person who made the request,
(ii) the municipality to which the request is made, or

(iii) a municipal body, a majority of the members of which are appointed by, or which is under the authority of, the municipality to which the request is made;

(l) "trade secret" means information, including a formula, pattern, compilation, program, device, product, method, technique or process, that

(i) is used, or may be used, in business or for any commercial advantage,

(ii) derives independent economic value, actual or potential, from not being generally known to the public or to other persons who can obtain economic value from its disclosure or use,

(iii) is the subject of reasonable efforts to prevent it from becoming generally known, and

(iv) the disclosure of which would result in harm or improper benefit. 1998, c. 18, s. 461.

Purpose of Part

462 The purpose of this Part is to

(a) ensure that municipalities are fully accountable to the public by

(i) giving the public a right of access to records,

(ii) giving individuals a right of access to, and a right to correction of, personal information about themselves,

(iii) specifying limited exceptions to the rights of access,

(iv) preventing the unauthorized collection, use or disclosure of personal information by municipalities, and

(v) providing for an independent review of decisions made pursuant to this Part;

(b) provide for the disclosure of all municipal information with necessary exemptions, that are limited and specific, in order to

(i) facilitate informed public participation in policy formulation,

(ii) ensure fairness in government decision-making, and

(iii) permit the airing and reconciliation of divergent views; and

(c) protect the privacy of individuals with respect to personal information about themselves held by municipalities and to provide individuals with a right of access to that information. 1998, c. 18, s. 462.
Application of Part

463 (1) This Part applies to all records in the custody or under the control of a municipality.

(2) Notwithstanding subsection (1), this Part does not apply to

(a) published material or material that is available for purchase by the public;

(b) material that is a matter of public record;

(c) a note, communication or draft decision of a person acting in a judicial or quasi-judicial capacity;

(d) a record of a question that is to be used on an examination or test;

(e) material placed in the archives of a municipality by or for a person, agency or other organization other than the municipality;

(ea) a record of each representation made on behalf of a municipality to the review officer in the course of a review pursuant to Section 487 and all material prepared for the purpose of making the representation; or

(f) a record relating to a prosecution, if all proceedings in respect of the prosecution have not been completed. 1998, c. 18, s. 463; 2003, c. 9, s. 83.

Limitations on effect of Part

464 This Part does not

(a) limit the information otherwise available by law to a party to litigation, including a civil, criminal or administrative proceeding;

(b) affect the power of any court or tribunal to compel a witness to testify or to compel the production of documents;

(c) prohibit the transfer, storage or destruction of any record in accordance with any other Act of the Legislature or any regulation;

(d) prevent access to records maintained in a public office for the purpose of providing public access to information; or

(e) restrict disclosure of information for the purpose of a prosecution. 1998, c. 18, s. 464.

Conflict
464A (1) Where there is a conflict between this Part and any other enactment and the other enactment restricts or prohibits access by any person to a record, this Part prevails over the other enactment unless subsection (2) or the other enactment states that the other enactment prevails over this Part.

(2) The following enactments that restrict or prohibit access by any person to a record prevail over this Part:

(a) Section 19 of the Consumer Reporting Act;
(b) Section 51 of the Corporation Capital Tax Act;
(c) Section 7 of the Emergency "911" Act;
(d) Section 19 of the Forests Act;
(e) Section 17 and subsection 104(2) of the Health Protection Act;
(f) Section 71 of the Hospitals Act;
(g) subsection 9(7) of the Juries Act;
(h) Section 28 of the Labour Standards Code;
(i) Section 32 of the Maintenance Enforcement Act;
(j) subsection 87(2) and Sections 150 and 175 of the Mineral Resources Act;
(k) subsection 98(6) of the Motor Vehicle Act;
(l) Sections 53, 61 and 62 of the Occupational Health and Safety Act;
(m) subsection 11(3) of the Pension Benefits Act;
(n) Sections 72 and 100 of the Petroleum Resources Regulations made pursuant to the Petroleum Resources Act;
(o) subsection 21(4) of the Primary Forest Products Marketing Act;
(p) Section 48 of the Public Trustee Act;
(q) Section 9 of the Statistics Act;
(r) subsection 9(3) of the Procedure Regulations made pursuant to the Trade Union Act;
(s) subsection 37(8) and Section 45 of the Vital Statistics Act;
(t) Sections 23 and 24 of the Young Persons' Summary Proceedings Act.

(3) The Governor in Council may, by regulation, amend subsection (2) by
(a) adding to that subsection a reference to an enactment;
(b) deleting a reference to an enactment from that subsection.

(4) Notwithstanding anything contained in this Act, the provisions in the Vital Statistics Act relating to
(a) rights of access to personal information, including the right to request a search of personal information;
(b) remedial rights relating to the rights described in clause (a);
(c) correction of personal information; and
(d) procedures relating to the matters referred to in clauses (a) to (c), including the payment of fees and the searching of and obtaining access to personal information,
apply in place of the provisions in this Act respecting the matters in clauses (a) to (d).

(5) Notwithstanding anything contained in this Act, Section 71 of the Hospitals Act, and any regulations made in respect of Section 71, relating to
(a) rights of access to personal information;
(b) remedial rights relating to the rights described in clause (a); and
(c) procedures relating to the matters referred to in clauses (a) and (b), including the payment of fees and the searching of and obtaining access to personal information,
apply in place of the provisions in this Part respecting the matters in clauses (a) to (c). 2003, c. 9, s. 84; 2004, c. 4, s. 116.

Right of access and restriction

465 (1) A person has a right of access to any record in the custody, or under the control, of a municipality upon making a request as provided in this Part.

(2) The right of access to a record does not extend to information exempted from disclosure pursuant to this Part but, if that information can reasonably be severed from the record, an applicant has the right of access to the remainder of the record.
(2A) Subject to subsection (2B), notwithstanding anything contained in this Part, where the record is an executed contract

(a) in which provision is made for the municipality to make a substantial transfer of risk to a person, including risk related to the operation or financing, or both, of government activities; and

(b) that is, or is in a class of contracts that is designated, before or within ninety days of the execution of the contract by the legal decision-making authority by which the municipality acts, the right of access extends to any information in the contract that, but for this subsection, would be exempted from disclosure pursuant to this Part.

(2B) Subsection (2A) does not apply in respect of any information in the contract, to which that subsection refers,

(a) respecting trade secrets;

(b) respecting the financial and business information of the persons to whom that subsection refers; and

(c) the disclosure of which may reasonably be expected to endanger the safety or health of the public, a person or a group of persons.

(3) Nothing in this Part restricts access to information provided by custom or practice prior to the effective date of this Part. 1998, c. 18, s. 465; 2003, c. 9, s. 85.

**Procedure for obtaining access**

466 (1) A person may obtain access to a record by

(a) making a request in writing to the municipality that has the custody or control of the record;

(b) specifying the subject matter of the record requested with sufficient particulars to enable an individual familiar with the subject matter to identify the record; and

(c) paying any fees required pursuant to this Part.

(2) The applicant may ask to examine the record or ask for a copy of the record. 1998, c. 18, s. 466.

**Duty of responsible officer**

467 (1) Where a request is made pursuant to this Part for access to a record, the responsible officer shall
(a) make every reasonable effort to assist the applicant and to respond without delay to the applicant openly, accurately and completely; and

(b) consider the request and give written notice to the applicant of the decision with respect to the request.

(2) The responsible officer shall respond in writing to the applicant within thirty days after the application is received and the applicant has met the requirements of clauses 466(1)(b) and (c), stating

(a) whether the applicant is entitled to the record or part of the record and

    (i) where the applicant is entitled to access, stating that access will be given on payment of the prescribed fee and setting out where, when and how, or the manner in which, access will be given, or

    (ii) where access to the record or to part of the record is refused, the reasons for the refusal and the provision of this Part on which the refusal is based;

(b) that the record is not in the custody or control of the municipality; or

(c) where the record would contain information exempted pursuant to Section 475 if the record were in the custody or control of the municipality, that confirmation or denial of the existence of the record is refused,

and stating

(d) the name, title, business address and business telephone number of an officer or employee of the municipality who can answer the applicant's questions about the decision; and

(e) that the applicant may ask for review by a review officer within sixty days after the applicant is notified of the decision.

(3) A responsible officer who fails to give a written response is deemed to have given notice of a decision to refuse to give access to the record thirty days after the application was received.

(4) A responsible officer may refuse to disclose to an applicant information

(a) that is published and available for purchase by the public; or

(b) that is to be published or released to the public within thirty days after the applicant's request is received.

(5) A responsible officer shall notify an applicant of the publication or release of information that the officer has refused to disclose.
(6) Where the information is not published or released within thirty days after the applicant's request is received, the responsible officer shall reconsider the request as if it were a new request received on the last day of that period, but the information shall not be refused solely because it is due to be published or released to the public. *1998, c. 18, s. 467; 2003, c. 9, s. 86.*

**Duties of responsible officer where access given**

468 (1) Where an applicant is informed that access will be given, the responsible officer shall

(a) where the applicant has asked for a copy and the record can reasonably be reproduced,

(i) provide a copy of the record, or part of the record, with the response, or

(ii) give the applicant reasons for delay in providing the record; or

(b) where the applicant has asked to examine the record or where the record cannot reasonably be reproduced, permit the applicant to examine the record or part of the record.

(2) A responsible officer may give access to a record that is a microfilm, film, sound recording, or information stored by electronic or other technological means by

(a) permitting the applicant to examine a transcript of the record;

(b) providing the applicant with a copy of the transcript of the record;

(c) permitting, in the case of a record produced for visual or aural reception, the applicant to view or hear the record or providing the applicant with a copy of it; or

(d) permitting, in the case of a record stored by electronic or other technological means, the applicant to access the record or providing the applicant a copy of it.

(3) A responsible officer shall create a record for an applicant if

(a) the record can be created from a machine-readable record in the custody or under the control of the municipality using its normal computer hardware and software and technical expertise; and

(b) creating the record would not unreasonably interfere with the operations of the municipality. *1998, c. 18, s. 468.*

**Extension of time for response**

469 (1) The responsible officer may extend the time provided for responding to a request for up to thirty days or, with a review officer's permission, for a longer period if
(a) the applicant does not give enough detail to enable the municipality to identify a requested record;

(b) a large number of records is requested or must be searched and meeting the time limit would unreasonably interfere with the operations of the municipality; or

(c) more time is needed to consult with a thirty [third] party of [or] other municipality before the responsible officer can decide whether or not to give the applicant access to a requested record.

(2) Where the time is extended, the responsible officer shall tell the applicant

(a) the reason;

(b) when a response can be expected; and

(c) that the applicant may complain about the extension to a review officer. 1998, c. 18, s. 469.

Transfer of request

470 (1) Within ten days after a request for access to a record is received, or such longer period as the review officer may determine, the responsible office of a municipality may transfer the request and, if necessary, the record to a municipal body to which the municipality appoints one or more members and which is not under the authority of the municipality, if

(a) the record was produced by or for the municipal body;

(b) the municipal body was the first to obtain the record; or

(c) the record is in the custody, or under the control of, the municipal body.

(2) Where a request is transferred pursuant to subsection (1)

(a) the responsible officer who transferred the request shall notify the applicant of the transfer; and

(b) the responsible officer to which the request is transferred shall respond to the applicant in accordance with this Part not later than thirty days after the request is received. 1998, c. 18, s. 470; 2003, c. 9, s. 87.

Fees

471 (1) An applicant who makes a request pursuant to this Part shall pay to the municipality the prescribed application fee.

(2) A responsible officer may require an applicant who makes a request to pay fees for the following services:
(a) locating, retrieving and producing the record;

(b) preparing the record for disclosure;

(c) shipping and handling the record;

(d) providing a copy of the record.

(3) An applicant is not required pursuant to subsection (2) to pay a fee for the first two hours spent locating and retrieving a record.

(4) No fee shall be charged for a request for the applicant's own personal information.

(5) Where an applicant is required to pay fees for services, the responsible officer shall give the applicant an estimate of the total fee before providing the services.

(6) The responsible officer may require the applicant to pay the estimated fee prior to providing the services.

(7) On request of the applicant, the responsible officer may excuse an applicant from paying all or part of a fee referred to in subsection (2) if, in the opinion of the responsible officer, the applicant cannot afford the payment or for any other reason it is fair to excuse payment.

(8) The fees that applicants are required to pay for services shall not exceed the actual costs of the services. 1998, c. 18, s. 471; 2003, c. 9, s. 88; 2007, c. 9, s. 31.

**Intergovernmental affairs**

472 (1) A responsible officer may refuse to disclose information to an applicant, if the disclosure could reasonably be expected to

(a) harm the conduct by the municipality of relations between the municipality and any of the following or their agencies:

   (i) the Government of Canada or a province of Canada,

   (ii) the Government of Nova Scotia,

   (iii) another municipality,

   (iv) a school board,

   (v) an aboriginal government; or
(b) reveal information received in confidence from a government, body or organization listed in
clause (a), or their agencies, unless the government, body, organization or its agency consents to
the disclosure or makes the information public.

(2) The responsible officer shall not disclose information referred to in subsection (1) without the
consent of the council.

(3) This Section does not apply to information in a record that has been in existence for fifteen or
more years. 1998, c. 18, s. 472.

Refusal to disclose information

473 (1) The responsible officer may refuse to disclose to an applicant information that would
disclose the minutes or substance of the deliberations of a meeting of the council, village
commission or service commissioners or of the members of the municipal body held in private,
as authorized by law.

(2) Subsection (1) does not apply to

(a) information in a record that has been in existence for ten or more years; or

(b) background information in a record, the purpose of which is to present explanations or
analysis to the council, committee, agency, authority, board or commission for its consideration
in making a decision, if

   (i) the decision has been made public,

   (ii) the decision has been implemented, or

   (iii) five or more years have passed since the decision was made or considered. 1998, c.
   18, s. 473.

Refusal to disclose information

474 (1) The responsible officer may refuse to disclose information that would reveal advice,
recommendations or draft resolutions, policies, by-laws or special legislation developed by or for
the

(a) council, village commission or service commissioners; or

(b) members of the municipal body.

(2) The responsible officer shall not refuse to disclose background information used by the
municipality.
(3) This Section does not apply to information in a record that has been in existence for five or more years.

(4) Nothing in this Section requires the disclosure of information that the responsible officer may refuse to disclose under Section 473. 1998, c. 18, s. 474; 2005, c. 55, s. 7.

**Refusal to disclose information**

475 (1) The responsible officer may refuse to disclose information to an applicant if the disclosure could reasonably be expected to

(a) harm law enforcement;

(b) prejudice the defence of Canada or of any foreign state allied to, or associated with, Canada or harm the detection, prevention or suppression of espionage, sabotage or terrorism;

(c) harm the effectiveness of investigative techniques or procedures currently used, or likely to be used, in law enforcement;

(d) reveal the identity of a confidential source of law-enforcement information;

(e) endanger the life or physical safety of a law-enforcement officer or any other person;

(f) reveal any information relating to, or used in, the exercise of prosecutorial discretion;

(g) deprive a person of a right to a fair trial or impartial adjudication;

(h) reveal a record that has been confiscated from a person by a peace officer in accordance with an enactment;

(i) be detrimental to the proper custody, control or supervision of a person under lawful detention;

(j) facilitate the commission of an offence contrary to an enactment; or

(k) harm the security of any property or system, including a building, a vehicle, a computer system or a communications system.

(2) The responsible officer may refuse to disclose information to an applicant if the information is

(a) in a law-enforcement record and the disclosure would be an offence pursuant to an enactment;
(b) in a law-enforcement record and the disclosure could reasonably be expected to expose, to
civil liability, the author of the record or a person who has been quoted or paraphrased in the
record; or

(c) about the history, supervision or release of a person who is in custody, or under supervision,
and the disclosure could reasonably be expected to harm the proper custody or supervision of
that person.

(3) After a police investigation is completed, the responsible officer shall not refuse to disclose to
an applicant the reasons for a decision not to prosecute if the applicant is aware of the police
investigation, but nothing in this subsection requires disclosure of information mentioned in
subsections (1) or (2). 1998, c. 18, s. 475.

Solicitor-client privilege

476 The responsible officer may refuse to disclose to an applicant information that is subject to
solicitor-client privilege. 1998, c. 18, s. 476.

Financial or economic interests

477 (1) The responsible officer may refuse to disclose to an applicant information, the disclosure
of which, could reasonably be expected to harm the financial or economic interests of the
municipality, another municipality or the Government of the Province or the ability of the
Government of the Province to manage the economy and, without restricting the generality of the
foregoing, may refuse to disclose the following information:

(a) trade secrets of the municipality, another municipality or the Government of the Province;

(b) financial, commercial, scientific or technical information that belongs to the municipality,
another municipality or the Government of the Province and that has, or is reasonably likely to
have, monetary value;

(c) plans that relate to the management or personnel of or the administration of the municipality
or another municipality and that have not yet been implemented or made public;

(d) information the disclosure of which could reasonably be expected to result in the premature
disclosure of a proposal or project or in undue financial loss or gain to a third party;

(e) information about negotiations carried on by or for the municipality or another municipality
or the Government of the Province.

(2) The responsible officer shall not refuse to disclose, pursuant to subsection (1) the results of
product or environmental testing carried out by or for the municipality, unless the testing was
done
(a) for a fee as a service to a person, a group of persons or an organization other than the municipality; or

(b) for the purpose of developing methods of testing. *1998, c. 18, s. 477.*

**Health and safety**

478 (1) The responsible officer may refuse to disclose to an applicant information, including personal information about the applicant, if the disclosure could reasonably be expected to

(a) threaten anyone else's safety or mental or physical health; or

(b) interfere with public safety.

(2) The responsible officer may refuse to disclose to an applicant personal information about the applicant, if the disclosure could reasonably be expected to result in immediate and grave harm to the applicant's safety or mental or physical health. *1998, c. 18, s. 478.*

**Conservation**

479 The responsible officer may refuse to disclose information to an applicant, if the disclosure could reasonably be expected to result in damage to, or interfere with the conservation of

(a) fossil sites, natural sites or sites that have an anthropological or heritage value;

(b) an endangered, threatened or vulnerable species, subspecies or race of plants, vertebrates or invertebrates; or

(c) any other rare or endangered living resources. *1998, c. 18, s. 479.*

**Refusal to disclose information**

479A The responsible officer may refuse to disclose

(a) any information of any kind obtained by a conciliation board, conciliation officer or mediator appointed pursuant to the municipality's collective agreement or appointed pursuant to the Civil Service Collective Bargaining Act, the Corrections Act, the Highway Workers Collective Bargaining Act, the Teachers' Collective Bargaining Act or the Trade Union Act or by an employee of the Department of Environment and Labour or an employee, appointee or member of the Civil Service Employee Relations Board, the Correctional Facilities Employee Relations Board, the Highway Workers Employee Relations Board or the Labour Relations Board for the purpose of any of those Acts or or the municipality's collective agreement [or] in the course of carrying out duties under any of those Acts or the municipality's collective agreement;

(b) any report of a conciliation board or conciliation officer appointed pursuant to any of those Acts or the municipality's collective agreement;
(c) any testimony or proceedings before a conciliation board appointed pursuant to any of those Acts or the municipality's collective agreement. 2003, c. 9, s. 89; 2006, c. 40, s. 16.

Personal information

480 (1) The responsible officer shall refuse to disclose personal information to an applicant, if the disclosure would be an unreasonable invasion of a third party's personal privacy.

(2) In determining whether a disclosure of personal information constitutes an unreasonable invasion of a third party's personal privacy, the responsible officer shall consider all the relevant circumstances, including whether

(a) the disclosure is desirable for the purpose of subjecting the activities of the municipality to public scrutiny;

(b) the disclosure is likely to promote public health and safety or to promote the protection of the environment;

(c) the personal information is relevant to a fair determination of the applicant's rights;

(d) the disclosure will assist in researching the claims, disputes or grievances of aboriginal people;

(e) the third party will be exposed unfairly to financial or other harm;

(f) the personal information has been supplied in confidence;

(g) the personal information is likely to be inaccurate or unreliable; and

(h) the disclosure may unfairly damage the reputation of any person referred to in the record requested by the applicant.

(3) A disclosure of personal information is presumed to be an unreasonable invasion of a third party's personal privacy if the personal information

(a) relates to a medical, dental, psychiatric, psychological or other health-care history, diagnosis, condition, treatment or evaluation;

(b) was compiled, and is identifiable as, part of an investigation into a possible violation of law, except to the extent that disclosure is necessary to prosecute the violation or to continue the investigation;

(c) relates to eligibility for income assistance or social service benefits or to the determination of benefit levels;

(d) relates to employment or educational history;
(e) was obtained on a tax return or gathered for the purpose of collecting a tax;

(f) describes the third party's finances, income, assets, liabilities, net worth, bank balances, financial history or activities, or creditworthiness;

(g) consists of personal recommendations or evaluations, character references or personnel evaluations;

(h) indicates the third party's racial or ethnic origin, sexual orientation or religious or political beliefs or associations; or

(i) consists of the third party's name together with the third party's address or telephone number and is to be used for mailing lists or solicitations by telephone or other means.

(4) A disclosure of personal information is not an unreasonable invasion of a third party's personal privacy if

(a) the third party has, in writing, consented to or requested the disclosure;

(b) there are compelling circumstances affecting anyone's health or safety;

(c) an enactment authorizes the disclosure;

(d) the disclosure is for a research or statistical purpose and is in accordance with this Part;

(e) the information is about the third party's position, functions or remuneration as an officer, employee or member of a municipality;

(f) the disclosure reveals the amount of taxes or other debts due by the third party to the municipality;

(g) the disclosure reveals financial and other similar details of a contract to supply goods or services to a municipality;

(h) the information is about expenses incurred by the third party while travelling at the expense of a municipality;

(i) the disclosure reveals details of a licence, permit or other similar discretionary benefit granted to the third party by a municipality, not including personal information supplied in support of the request for the benefit; or

(j) the disclosure reveals details of a discretionary benefit of a financial nature granted to the third party by a municipality, not including personal information that is supplied in support of the request for the benefit or that relates to eligibility for or the level of income assistance or social service benefits.
(5) On refusing to disclose personal information supplied in confidence about an applicant, the responsible officer shall give the applicant a summary of the information unless the summary cannot be prepared without disclosing the identity of a third party who supplied the personal information, and may allow the third party to prepare the summary of personal information. 1998, c. 18, s. 480.

Confidential information

481 (1) The responsible officer shall, unless the third party consents, refuse to disclose to an applicant information

(a) that would reveal

   (i) trade secrets of a third party, or

   (ii) commercial, financial, labour relations, scientific or technical information of a third party;

(b) that is supplied, implicitly or explicitly, in confidence; and

(c) the disclosure of which could reasonably be expected to

   (i) harm significantly the competitive position, or interfere significantly with the negotiating position, of the third party,

   (ii) result in similar information no longer being supplied to the municipality when it is in the public interest that similar information continue to be supplied,

   (iii) result in undue financial loss or gain to any person or organization, or

   (iv) reveal information supplied to, or the report of, an arbitrator, mediator, labour relations officer or other person or body appointed to resolve or inquire into a labour-relations dispute.

(2) The responsible officer shall refuse to disclose to an applicant information that was obtained on a tax return or gathered for the purpose of determining tax liability or collecting a tax, unless the third party consents.

(3) The responsible officer shall disclose to an applicant a report prepared in the course of inspections by an agency that is authorized to enforce compliance with an enactment. 1998, c. 18, s. 481.

Notice to third party
482 (1) When a responsible officer receives a request for access to a record that contains or may contain information of or about a third party that cannot be disclosed, the responsible officer shall, where practicable, promptly give the third party a notice

(a) stating that a request has been made by an applicant for access to a record containing information that disclosure of which may affect the interests, or invade the personal privacy, of the third party;

(b) describing the contents of the record; and

(c) stating that, within fourteen days after the notice is given, the third party may, in writing, consent to the disclosure or may make written representations to the responsible officer explaining why the information should not be disclosed.

(1A) Notwithstanding subsection (1), that subsection does not apply if

(a) the responsible officer decides, after examining the request, any relevant records and the views or interests of the third party respecting the disclosure requested, to refuse to disclose the record; or

(b) where the regulations so provide, it is not practical to give notice pursuant to that subsection.

(2) When notice is given pursuant to subsection (1), the responsible officer shall also give the applicant a notice stating that

(a) the record requested by the applicant contains information the disclosure of which may affect the interests or invade the personal privacy of a third party; and

(b) the third party is being given an opportunity to make representations concerning disclosure.

(c) repealed 2003, c. 9, s. 90.

(3) Within thirty days after notice is given to an applicant, the responsible officer shall decide whether to give access to the record or to part of the record, but no decision may be made before the earlier of

(a) fifteen days after the day notice is given; or

(b) the day a response is received from the third party.

(3A) For greater certainty, the time limited by subsection 467(2) for responding to a request for access to a record is not extended by reason only that a notice is given to an applicant pursuant to subsection (2), but that time may be extended pursuant to Section 469.

(3B) In complying with subsections (1) and (2), the municipality shall not
(a) disclose the name of the applicant to the third party without the consent of the applicant; or

(b) disclose the name of the third party to the applicant without the consent of the third party.

(4) On reaching a decision, the responsible officer shall give written notice of the decision to the applicant and the third party.

(5) Where the responsible officer decides to give access to the record or part of the record,

(a) the notice shall state that the applicant will be given access after twenty days, unless, in that time, the third party asks for a review pursuant to this Part;

(b) the notice shall state that the third party may ask for a review pursuant to this Part within twenty days of the notice; and

(c) access shall not be provided until the expiry of the twenty day period.

(6) Notwithstanding anything contained in this Section, the responsible officer who has, pursuant to this Section, given notice to a third party of a request for access to a record may, with the consent of the third party, give access to the record to the person who has made the request before the expiration of the time limited by subsection (3) for the third party to ask for a review. 1998, c. 18, s. 482; 2003, c. 9, s. 90.

Collection of personal information

483 (1) Personal information shall not be collected by, or for, a municipality unless

(a) the collection of that information is expressly authorized by, or pursuant to, an enactment;

(b) that information is collected for the purpose of law enforcement; or

(c) that information relates directly to, and is necessary for, an operating program or activity of the municipality.

(2) Where an individual's personal information will be used by a municipality to make a decision that directly affects the individual, the municipality shall make every reasonable effort to ensure that the information is accurate and complete.

(3) The responsible officer shall protect personal information by making reasonable security arrangements against such risks as unauthorized access, collection, use, disclosure or disposal.

(4) Where a municipality uses an individual's personal information to make a decision that directly affects the individual, the municipality shall retain that information for at least one year after using it so that the individual has a reasonable opportunity to obtain access to it. 1998, c. 18, s. 483; 2000, c. 9, s. 56.
Request to correct error or omission

484 (1) An applicant who believes there is an error or omission in the applicant's personal information may request the responsible officer to correct the information.

(2) Where no correction is made in response to a request, the responsible officer shall annotate the information with the correction that was requested but not made.

(3) On correcting or annotating personal information pursuant to this Section, the responsible officer shall notify any other municipality or any third party to whom that information has been disclosed during the one-year period before the correction was requested.

(4) On being notified of a correction or annotation of personal information, a municipality shall make the correction or annotation on any record of that information in its custody or under its control. 1998, c. 18, s. 484.

Use and disclosure of personal information

485 (1) A municipality may use personal information only

(a) for the purpose for which that information was obtained or compiled, or for a use compatible with that purpose;

(b) if the individual the information is about has identified the information and has consented to the use; or

(c) for a purpose for which that information may be disclosed to the municipality pursuant to this Section.

(2) A municipality may disclose personal information only

(a) in accordance with this Part or as provided pursuant to another enactment;

(b) if the individual the information is about has identified the information and consented in writing to its disclosure;

(c) for the purpose for which it was obtained or compiled, or a use compatible with that purpose;

(d) for the purpose of complying with an enactment or with a treaty, arrangement or agreement made pursuant to an enactment;

(e) for the purpose of complying with a subpoena, warrant, summons or order issued or made by a court, person or body with jurisdiction to compel the production of information;

(f) to an officer or employee of a municipality if the information is necessary for the performance of the duties of, or for the protection of the health or safety of, the officer or employee;
(g) to a municipality to meet the necessary requirements of municipal operation;

(h) for the purpose of

(i) collecting a debt or fine owing by an individual to the municipality, or

(ii) making a payment owing by the municipality to an individual;

(i) to the auditor for audit purposes;

(j) to a representative of the bargaining agent who has been authorized in writing by the employee, whom the information is about, to make an inquiry;

(k) to the Public Archives of Nova Scotia, or the archives of a municipality, for archival purposes;

(l) to a municipality or a law-enforcement agency in Canada to assist in an investigation

(i) undertaken with a view to a law-enforcement proceeding, or

(ii) from which a law-enforcement proceeding is likely to result;

(m) if the information is disclosed by a law-enforcement agency to

(i) another law-enforcement agency in Canada, or

(ii) a law-enforcement agency in a foreign country under an arrangement, written agreement, treaty or legislative authority;

(n) if the responsible officer determines that compelling circumstances exist that affect anyone's health or safety;

(na) in accordance with subsections (4) or (5);

(o) so that the next of kin or a friend of an injured, ill or deceased individual may be contacted; or

(p) for research, archival and historical purposes as provided in this Section.

(3) A use of personal information is a use compatible with the purpose for which the information was obtained, if the use

(a) has a reasonable and direct connection to that purpose; and

(b) is necessary for performing the statutory duties of, or for operating a legally authorized program of, the municipality that uses the information or to which the information is disclosed.
(4) A municipality may disclose personal information for a research purpose, including statistical research, if

(a) the research purpose cannot reasonably be accomplished unless that information is provided in individually identifiable form;

(b) any record linkage is not harmful to the individuals that information is about and the benefits to be derived from the record linkage are clearly in the public interest;

(c) the responsible officer has approved conditions relating to

   (i) security and confidentiality,

   (ii) the removal or destruction of individual identifiers at the earliest reasonable time, and

   (iii) the prohibition of any subsequent use or disclosure of that information in individually identifiable form without the express authorization of the municipality; and

(d) the person to whom that information is disclosed has signed an agreement to comply with the approved conditions, this Part and any of the municipality’s policies and procedures relating to the confidentiality of personal information.

(5) The Public Archives of Nova Scotia, or the archives of a municipality, may disclose personal information for archival or historical purposes where

(a) the disclosure would not be an unreasonable invasion of personal privacy;

(b) the disclosure is for historical research;

(c) the information is about someone who has been dead for twenty or more years; or

(d) the information is in a record that is in the custody or control of the archives and open for historical research on the coming into force of this Part. 1998, c. 18, s. 485; 2008, c. 25, s. 10.

Disclosure in public interest

486 (1) Whether or not a request for access is made, the responsible officer may disclose to the public, to an affected group of people or to an applicant information

(a) about a risk of significant harm to the environment or to the health or safety of the public or a group of people; or

(b) the disclosure of which is, for any other reason, clearly in the public interest.

(2) Before disclosing information pursuant to subsection (1), the responsible officer shall, if practicable, notify any third party to whom the information relates.
(3) Where it is not practicable to comply with subsection (2), the responsible officer shall mail a notice of disclosure to the last known address of the third party. 1998, c. 18, s. 486.

Request by applicant for review

487 (1) A person who makes any request for access or for correction of personal information may ask for a review of any decision, act or failure to act of the responsible officer that relates to the request.

(2) A third party notified of a request for access may ask for a review of any decision made about the request by the responsible officer.

(3) A person who makes a request pursuant to this Part for access to a record or for correction of personal information may, within thirty days after the person is notified of the decision or within thirty days after the date of the act or failure to act, appeal directly to the Supreme Court of Nova Scotia as provided in this Part, if no third party has been notified or if a third party who has been notified consents to that appeal.

(4) to (6) repealed 2007, c. 9, s. 32.

1998, c. 18, s. 487; 2003, c. 9, s. 91; 2007, c. 9, s. 32.

Procedure for request for review

488 (1) A written request for a review shall be filed with a review officer

(a) within sixty days after the person asking for the review is notified of the decision;

(b) within sixty days after the date of the act or failure to act;

(c) by a third party, within twenty days after notice is given; or

(d) within a longer period allowed by the review officer.

(2) The failure of the responsible officer to respond in time to a request for access to a record is to be treated as a decision to refuse access to the record, but the time limit for filing a request for review does not apply. 1998, c. 18, s. 488.

Copies of request and settlement of matter

489 (1) On receiving a request for a review, a review officer shall forthwith give a copy to

(a) the responsible officer concerned;

(b) an applicant, if the review was requested by a third party; and
(c) any other person that the review officer considers appropriate.

(2) A review officer may try to settle a matter under review through mediation.

(3) Where a review officer is unable to settle a matter within thirty days through mediation, the review officer shall conduct a review. 1998, c. 18, s. 489.

Review in private and nature of review

490 (1) A review officer may conduct a review in private.

(2) The following persons are entitled to make representations to a review officer in the course of a review:

(a) the person who applies for the review;

(b) a third party or applicant who is entitled to notice pursuant to this Part;

(c) the responsible officer whose decision is the subject of the review; and

(d) any other person the review officer considers appropriate.

(2A) Where, pursuant to clause (2)(d), the review officer considers that a person is an appropriate person to make representations in the course of a review of a decision of the responsible officer of a municipality, then, notwithstanding anything contained in this Act, that person

(a) is entitled to

(i) a copy of the report of the review officer pursuant to Section 492,

(ii) appeal the decision of the responsible officer pursuant to Section 494, and

(iii) written notice of an appeal under subsection 494(2); and

(b) is party to the appeal to which the notice of appeal referred to in subclause (a)(iii) relates.

(3) A review officer may decide

(a) whether the representations are to be made orally or in writing;

(b) whether a person is entitled to be present during a review or to have access to, or comment on, representations made to the review officer by any other person. 1998, c. 18, s. 490; 2003, c. 9, s. 92.

Powers of review officer
491 (1) Notwithstanding another Act of the Legislature, or any privilege that is available at law, a review officer may, in a review,

(a) require to be produced and examine any record that is in the custody, or under the control, of the municipality named in the request made pursuant to this Part; and

(b) enter and inspect any premises occupied by the municipality.

(2) A municipality shall comply with a requirement imposed by the review officer pursuant to clause (1)(a) within such time as is prescribed by the regulations.

(3) Where a municipality does not comply with a requirement imposed by the review officer pursuant to clause (1)(a) within the time limited for so doing by subsection (2), a judge of the Supreme Court of Nova Scotia may, on the application of the review officer, order the municipality to do so.

(4) In an application made pursuant to subsection (3), a judge may give such directions as the judge thinks fit, including ordering which persons shall be parties to the application, which persons shall be given notice of the application and the manner in which such notice shall be given.

(5) An order made pursuant to subsection (3) may contain such provisions and such terms and conditions as the judge thinks fit. 1998, c. 18, s. 491; 2000, c. 9, s. 57; 2003, c. 9, s. 93.

Duties of review officer on completing review

492 (1) On completing a review, a review officer shall

(a) prepare a written report setting out the review officer's recommendations with respect to the matter and the reasons for those recommendations; and

(b) send a copy of the report to the responsible officer, and where the matter was referred to the review officer by

(i) an applicant, to the applicant and to any third party notified pursuant to this Part, or

(ii) a third party, to the third party and to the applicant.

(2) In the report, the review officer may make any recommendations with respect to the matter under review that the review officer considers appropriate. 1998, c. 18, s. 492.

Duties of responsible officer on receipt of report
493 (1) Within thirty days after receiving a report of a review officer, the responsible officer shall

(a) make a decision to follow the recommendation of the review officer or any other decision that the responsible officer considers appropriate; and

(b) give written notice of the decision to the review officer and the persons who were sent a copy of the report.

(2) The responsible officer shall give notice, in writing, to the persons who were sent a copy of the report and the decision of the responsible officer, of their right to appeal the decision of the responsible officer to the Supreme Court of Nova Scotia within thirty days of the date of making the decision.

(3) Where the responsible officer does not give notice within the time required, the responsible officer is deemed to have refused to follow the recommendation of the review officer. 1998, c. 18, s. 493; 2005, c. 55, s. 8.

**Appeal to Supreme Court**

494 (1) Within thirty days after receiving a decision of the responsible officer, an applicant or a third party may appeal that decision to the Supreme Court of Nova Scotia.

(1A) An appeal is deemed not to have been taken pursuant to this Section unless a notice of appeal is given to the Minister of Justice by the person taking the appeal.

(1B) Where a notice of appeal is given pursuant to subsection (1A), the Minister of Justice may become a party to the appeal by filing with the prothonotary of the Supreme Court of Nova Scotia a notice stating that the Minister of Justice is a party to the appeal.

(2) The responsible officer who has refused a request for access to a record, or part of a record, shall, immediately on receipt of a notice of appeal by an applicant, give written notice of the appeal to any third party that the responsible officer

(a) has notified pursuant to this Part; or

(b) would have notified pursuant to this Part if the responsible officer had intended to give access to the record, or part of the record.

(3) The responsible officer who has granted a request for access to a record or part of a record shall, immediately on receipt of a notice of appeal by a third party, give written notice of the appeal to the applicant.

(4) An applicant or a third party who has been given notice of an appeal may appear as a party to the appeal.
(5) The review officer is not a party to an appeal.

(6) Where the responsible officer decides to give access to a record or a part of a record after the review officer files a report setting out the review officer's recommendations respecting the matter, the responsible officer shall not give access until the time limited for a third party taking an appeal from the decision to the Supreme Court of Nova Scotia expires and

(a) no appeal has been taken by a third party from the decision within the time limited for so doing; or

(b) where an appeal has been taken within that time by a third party, it has subsequently been abandoned or withdrawn,

but, where an appeal is taken by a third party, the responsible officer shall not give access until either the decision of the responsible officer is upheld by an order of the Supreme Court and the order becomes final by lapse of time or the decision of the responsible officer is upheld by the highest authority to which any further appeal or appeals are taken. 1998, c. 18, s. 494; 2003, c. 9, s. 94; 2005, c. 55, s. 9.

**Powers of Supreme Court**

495 (1) On an appeal, the Supreme Court of Nova Scotia may

(a) determine the matter de novo; and

(b) examine any record in camera in order to determine on the merits whether the information in the record may be withheld pursuant to this Part.

(2) Notwithstanding any other Part or any privilege that is available at law, the Supreme Court of Nova Scotia may, on an appeal, examine any record in the custody or under the control of a municipality, and no information shall be withheld from the Court on any grounds.

(3) The Supreme Court of Nova Scotia shall take every reasonable precaution, including, where appropriate, receiving representations ex parte and conducting hearings in camera, to avoid disclosure by the Court or any person of any information

(a) or other material, if the nature of the information or material could justify a refusal by a responsible officer to give access to a record or part of a record; or

(b) as to whether a record exists, if the responsible officer, in refusing to give access, does not indicate whether the record exists.

(4) The Supreme Court of Nova Scotia may disclose to the Minister of Justice or the Attorney General of Canada information that may relate to the commission of an offence pursuant to another enactment by an officer or employee of a municipality.
(5) Where the responsible officer has refused to give access to a record or part of it, the Supreme Court of Nova Scotia, if it determines that the responsible officer is not authorized to refuse to give access to the record, or part of it, shall

(a) order the responsible officer to give the applicant access to the record, or part of it, subject to any conditions that the Court considers appropriate; or

(b) make any other order that the Court considers appropriate.

(6) Where the Supreme Court of Nova Scotia finds that a record falls within an exemption, the Court shall not order the responsible officer to give the applicant access to the record, regardless of whether the exemption requires, or merely authorizes, the responsible officer to refuse to give access to the record. 1998, c. 18, s. 495.

Exercise of right or power

496 Any right or power conferred on an individual by this Part may be exercised

(a) where the individual is deceased, by the individual's representative, if the exercise of the right or power relates to the administration of the individual's estate;

(b) where a personal guardian or property guardian has been appointed for the individual, by the guardian, if the exercise of the right or power relates to the powers and duties of the guardian;

(c) where a power of attorney has been granted, by the attorney if the exercise of the right or power relates to the powers and duties of the attorney conferred by the power of attorney;

(d) where the individual is less than the age of majority, by the individual's legal custodian in situations where, in the opinion of the responsible officer, the exercise of the right or power would not constitute an unreasonable invasion of the privacy of the individual; or

(e) by a person with written authorization from the individual to act on the individual's behalf. 1998, c. 18, s. 496.

Delegation of powers by responsible officer

497 (1) The responsible officer may delegate to one or more officers of the municipality a power granted to, or a duty vested in, the responsible officer.

(2) A delegation

(a) shall be in writing; and

(b) may contain any limitations, restrictions, conditions or requirements that the responsible officer considers necessary or advisable. 1998, c. 18, s. 497.
Burden of proof

498 (1) At a review or appeal into a decision to refuse an applicant access to all or part of a record, the burden is on the responsible officer to prove that the applicant has no right of access to the record or part.

(2) Where the record or part that the applicant is refused access to contains personal information about a third party, the burden is on the applicant to prove that disclosure of the information would not be an unreasonable invasion of the third party's personal privacy.

(3) At a review or appeal into a decision to give an applicant access to all or part of a record containing information that relates to a third party

(a) in the case of personal information, the burden is on the applicant to prove that disclosure of the information would not be an unreasonable invasion of the third party's personal privacy; and

(b) in any other case, the burden is on the third party to prove that the applicant has no right of access to the record or part. 1998, c. 18, s. 498.

Limitation of liability

499 No action or other proceeding lies against the responsible officer or any person acting on behalf of, or under the direction of, the responsible officer for damages resulting from the

(a) disclosure in good faith of all, or part of, a record pursuant to this Part or any consequences of that disclosure; or

(b) failure to give any notice required pursuant to this Part, if reasonable care is taken to give the required notice. 1998, c. 18, s. 499.

Offence and penalty

500 (1) Every person who maliciously collects or discloses personal information in contravention of this Part or the regulations is guilty of an offence and liable, on summary conviction, to a penalty of not more than five thousand dollars or to imprisonment for six months, or both.

(1A) Every person who knowingly alters a record that is subject to a request in order to mislead the person who made the request is guilty of an offence and liable on summary conviction to a fine of not more than two thousand dollars or to imprisonment for six months, or both.

(2) Section 4 of the Summary Proceedings Act does not apply to this Part. 1998, c. 18, s. 500; 2003, c. 9, s. 95.

Regulations

501 (1) The Governor in Council may make regulations
(a) prescribing procedures to be followed in taking, transferring and processing requests for
access;

(b) prescribing or limiting fees to be paid pursuant to this Part;

(c) prescribing additional circumstances in which a responsible officer may waive the payment
of all, or any part, of a prescribed fee;

(d) prescribing the categories of sites that are considered to have heritage or anthropological
value;

(e) prescribing requirements to be met with respect to disclosures of information to law
enforcement agencies or investigative bodies;

(f) prescribing the form and manner of a review pursuant to this Part;

(g) prescribing the form and manner of an appeal pursuant to this Part;

(h) prescribing any matter that is to be included in a notice that is required pursuant to this Part;

(i) prescribing forms for the purpose of this Part;

(j) prescribing any other matter or thing required or authorized by this Part or the Freedom of
Information and Protection of Privacy Act to be prescribed in regulations;

(k) respecting the application, with respect to this Part, of regulations made pursuant to the
Freedom of Information and Protection of Privacy Act;

(l) defining any word or expression used, but not defined, in this Part;

(m) enlarging or restricting the meaning of any word or expression defined in this Part;

(n) for any purpose contemplated by this Part;

(o) to carry out effectively the intent and purpose of this Part.

(2) The regulations made pursuant to the Freedom of Information and Protection of Privacy Act
apply with respect to this Part with all necessary changes, unless the Governor in Council
determines otherwise, by regulations made pursuant to subsection (1).

(3) A regulation may apply to all persons or bodies, or to a class of persons or bodies, to whom
this Part applies and there may be different regulations for different classes of persons.

(4) The exercise by the Governor in Council of the authority contained in this Section is
regulations within the meaning of the Regulations Act. 1998, c. 18, s. 501.
Amendments apply

502 Any amendments to the Freedom of Information and Protection of Privacy Act apply mutatis mutandis to this Part to the extent that they may be made to apply to this Part. 1998, c. 18, s. 502.

PART XXI

GENERAL

Lawful direction to act and inspections

503 (1) Where a council, village commission, committee or community council or the engineer, the administrator or another employee of a municipality lawfully directs that anything be done and it is not done, the council, village commission, engineer, administrator or employee may cause it to be done at the expense of the person in default.

(2) No action shall be maintained against a municipality, a village or any agent, servant or employee of the municipality or the village for anything done pursuant to this Section.

(3) Where an inspection is required or conducted pursuant to a by-law or an enactment

(a) the inspector may enter in or upon land or premises at a reasonable time without a warrant;

(b) except in an emergency, the inspector shall not enter a room or place actually being used as a dwelling without the consent of the occupier, unless the entry is made in daylight hours and written notice of the time of the entry is given to the occupier at least twenty-four hours in advance;

(c) and where a person refuses to allow the inspector to exercise, or attempts to interfere or interferes with the inspector in the exercise of, a power granted pursuant to this Act, the inspector may apply to a judge of the Supreme Court of Nova Scotia for an order

(i) to allow the inspector entry to the building, and

(ii) restraining a person from further interference; and

(d) it is an offence to refuse access to an inspector or to interfere with an inspector in the exercise of a power granted pursuant to this Act. 1998, c. 18, s. 503; 2001, c. 35, s. 25.

No liability

504 (1) Where a municipality or a village inspects buildings or other property pursuant to this Act or another enactment, the municipality or the village and its officers and employees are not
liable for a loss as a result of the manner or extent of an inspection or the frequency, infrequency or absence of an inspection, unless the municipality or the village was requested to inspect at appropriate stages, and within a reasonable time, before the inspection was required, and either the municipality or the village failed to inspect or the inspection was performed negligently.

(2) An inspection is not performed negligently unless it fails to disclose a deficiency or a defect that

(a) could reasonably be expected to be detected; and

(b) the municipality or the village could have ordered corrected.

(3) Notwithstanding the Limitation of Actions Act or another statute, a municipality or a village and its officers and employees are not liable for a loss as a result of an inspection or failure to inspect, if the claim is made more than six years after the date of the application for the permit in relation to which the inspection was required.

(4) If a municipality or a village receives a certification or representation by an engineer, architect, surveyor or other person held out to have expertise respecting the thing being certified or represented, the municipality or the village and its officers and employees are not liable for any loss or damage caused by the negligence of the person so certifying or representing. 1998, c. 18, s. 504; 2001, c. 35, s. 26.

Offence and penalty

505 (1) A person who

(a) violates a provision of this Act or of an order, regulation or by-law in force in accordance with this Act;

(b) fails to do anything required by an order, regulation or by-law in force in accordance with this Act;

(c) permits anything to be done in violation of this Act or of an order, regulation or by-law in force in accordance with this Act; or

(d) obstructs or hinders any person in the performance of their duties under this Act or under any order, regulation or by-law in force in accordance with this Act,

is guilty of an offence.

(2) Unless otherwise provided in a by-law, a person who commits an offence is liable, upon summary conviction, to a penalty of not less than one hundred dollars and not more than ten thousand dollars and in default of payment, to imprisonment for a term of not more than two months.
(3) Every day during which an offence pursuant to subsection (1) continues is a separate offence.

(4) In addition to a fine imposed for contravening a provision of this Act, a regulation or a by-law of a municipality made pursuant to this Act, a judge may order the person to comply with the provision, order, regulation or by-law under which the person was convicted, within the time specified in the order.

(5) Any person who fails to comply with an order under subsection (4) is guilty of an offence. 1998, c. 18, s. 505; 2005, c. 55, s. 10.

Offence and penalty

506 A person who removes, defaces or makes illegible a notice or order posted pursuant to this Act is guilty of an offence and is liable, on summary conviction, to a penalty of not less than one hundred dollars nor more than five thousand dollars and in default of payment, to imprisonment for a period of not more than ninety days. 1998, c. 18, s. 506; 2000, c. 9, s. 58.

Cost of work is first lien

507 Where a council, village commission, committee or community council or the engineer, the administrator or another employee of a municipality lawfully causes work to be done pursuant to this Act, the cost of the work, with interest at the rate determined by the council, by policy, or by the village commission, by by-law, from the date of the completion of the work until the date of payment, is a first lien on the property upon which, or for the benefit of which, the work was done. 1998, c. 18, s. 507; 2001, c. 35, s. 27.

Offence and penalty

508 Where no penalty is specified for the violation of this Act, a person who contravenes the provision is guilty of an offence and is liable, on summary conviction, to a penalty of not less than one hundred dollars and not more than five thousand dollars and in default of payment, to imprisonment for a period of not more than ninety days. 1998, c. 18, s. 508.

Service of notice

509 (1) Any notice, decision or other document required to be served pursuant to this Act may be served personally, by mailing it to the person at the latest address shown on the assessment roll, by electronic mail or by facsimile.

(2) A notice, decision or other document is deemed to have been served on the third day after it was sent. 2000, c. 9, s. 59.

Service on clerk sufficient

510 Where notice is authorized or required to be served on a municipality or village, service on the clerk is sufficient service. 1998, c. 18, s. 510.
Action brought in corporate name

511 An action brought by or against a municipality or village shall be brought by or against it in its corporate name. _1998, c. 18, s. 511._

Limitation of Actions Act

512 (1) For the purpose of the Limitation of Actions Act, the limitation period for an action or proceeding against a municipality or village, the council, a council member, a village commissioner, an officer or employee of a municipality or village or against any person acting under the authority of any of them, is twelve months.

(2) Subsection (1) applies, with all necessary changes, to a service commission and a board, commission, authority, agency or corporation of a municipality or a board, commission, authority, agency or corporation jointly owned or established by municipalities or villages.

(3) No action shall be brought against any parties listed in subsection (1) or (2) unless notice is served on the intended defendant at least one month prior to the commencement of the action stating the cause of action, the name and address of the person intending to sue and the name and address of that person's solicitor or agent, if any. _1998, c. 18, s. 512._

No liability

513 (1) A municipality, village or inter-municipal corporation created pursuant to Section 60, and its officers and employees, are not liable for

(a) failure to provide a service or the manner in which a service is provided, unless the municipality, village or inter-municipal corporation created pursuant to Section 60 fails to meet a standard of care to be determined having regard to financial, economic, personnel, social, political and other factors or constraints in the circumstances, including whether the service is a volunteer or partly volunteer service;

(b) failure to maintain a public place, that is subject to the direction, control and management of the municipality, village or inter-municipal corporation created pursuant to Section 60, in a reasonable state of repair, unless the municipality, village or inter-municipal corporation created pursuant to Section 60 has actual or constructive notice of the state of disrepair and fails to take steps to remedy or otherwise deal with the state of disrepair within a reasonable time;

(c) failure to enforce a by-law, unless the decision not to enforce the by-law is not made in good faith.

(2) Where an overflow of water from a sewer, drain, ditch or watercourse is a consequence of snow, ice or rain, a municipality, village or inter-municipal corporation created pursuant to Section 60 is not liable for a loss as a result of the overflow. _1998, c. 18, s. 513; 2008, c. 25, s. 11._
No liability

514 A municipality, village or inter-municipal corporation created pursuant to Section 60, and its officers and employees, are not liable for damages caused

(a) directly or indirectly, by

   (i) the operation, maintenance, repair, breaking or malfunction of wastewater facilities, a stormwater system or a water system, or

   (ii) interference with the supply of water through a water system,

unless the damages are shown to be caused by the negligence of the municipality, village or inter-municipal corporation created pursuant to Section 60 or its officers or employees;

(b) by the discharge of sewage or water into premises from a municipal sewer unless the discharge was caused by the improper construction, or neglect in the maintenance of, the sewer or a failure to remedy a matter that was known, or reasonably should have been known, to the municipality, village or inter-municipal corporation created pursuant to Section 60 and should reasonably have been repaired; or

(c) in any case, where this Act or the by-laws of the municipality, village or inter-municipal corporation created pursuant to Section 60 have not been complied with by an owner or previous owner of the property. 1998, c. 18, s. 514; 2005, c. 25, s. 12.

No liability

515 (1) Where a municipality, village or inter-municipal corporation created pursuant to Section 60 operates a utility or provides a service, it is not liable for a loss as a result of the breakage of a pipe, conduit, pole, wire, cable or a part of the utility or service or the discontinuance or interruption of a service or connection by reason of

(a) accident;

(b) disconnection for non-payment or non-compliance with a term or condition of service; or

(c) necessity to repair or replace a part of the utility or service.

(2) A municipality, village or inter-municipal corporation created pursuant to Section 60 is not liable for nuisance as a result of the construction or operation of a work, if the nuisance could not be avoided by any other practically feasible method of carrying out the work. 1998, c. 18, s. 515; 2005, c. 25, s. 13.

Right of indemnity
516 Where a municipality or village is found liable for damages as a result of the unsafe condition of a street or sidewalk, or of a nuisance or encumbrance on it, the municipality or village has a right of indemnity for all such damages, and for costs and expenses incurred in connection therewith, against any person whose act or omission caused the street or sidewalk to be unsafe or caused the nuisance or encumbrance. 1998, c. 18, s. 516.

**Right of indemnity**

517 (1) Where a municipality is found liable for damages as a result of the unsafe condition of a street, bridge or sidewalk that was transferred to it by Her Majesty in right of the Province, it has a right of indemnity for all such damages, and for costs and expenses incurred in connection therewith, against Her Majesty.

(2) Subsection (1) does not apply to a street, bridge or sidewalk

(a) reconstructed or substantially rebuilt or repaired by the municipality; or

(b) after ten years from the date on which it was transferred to the municipality. 1998, c. 18, s. 517.

**Requirement to consult with Union**

518 The Minister shall consult with the executive of the Union of Nova Scotia Municipalities respecting any proposed amendment to this Act. 1998, c. 18, s. 518.

**Requirement to notify Union**

519 (1) The Minister shall notify the Union of Nova Scotia Municipalities at least one year prior to the effective date of any legislation, regulation or administrative action undertaken by or on behalf of the Government of the Province that would have the effect of decreasing the revenue received by municipalities in Nova Scotia or increasing the required expenditures of municipalities in Nova Scotia.

(2) Subsection (1) does not apply with respect to any legislation, regulation or administrative action applying to the Province generally and not mainly to municipalities. 1998, c. 18, s. 519.

**Regulations**

520 (1) The Minister may make regulations

(a) defining any term used, but not defined, in this Act;

(b) prescribing forms and procedures for the purpose of this Act;

(c) altering forms set out in this Act;
(d) [for] the effective administration of this Act; and

(e) [for] the collection, standardization, maintenance and sharing of information related to the subdivision and development of land.

(2) The exercise by the Minister of the authority contained in subsection (1) is regulations within the meaning of the Regulations Act. 1998, c. 18, s. 520.

521 to 536C repealed 2008, c. 39, s. 389.

PART XXIII
TRANSITIONAL AND REPEAL

Continuation in office

537 Town clerks, town treasurers, municipal clerks and municipal treasurers who hold office during good behaviour at the coming into force of this Act continue to hold office during good behaviour until such time as they resign or retire. 1998, c. 18, s. 537.

Continuation in force

538 The by-laws, orders, policies and resolutions in force in a municipality or village immediately prior to the coming into force of this Act continue in force to the extent that they are authorized by this Act or another Act of the Legislature until amended or repealed. 1998, c. 18, s. 538.

Dissolution of business commission

539 (1) Every business improvement district commission is dissolved and its assets and liabilities are vested in the municipality that established it.

(2) A municipality may transfer property of a business improvement district commission to a nonprofit organization incorporated for purposes similar to those of the dissolved commission. 1998, c. 18, s. 539.

Dissolution of industrial commission

540 (1) Every industrial commission established by, or pursuant to, a statute is dissolved and its assets and liabilities are vested in the municipality that established it.

(2) A municipality may transfer property of an industrial commission dissolved by this Act to a nonprofit organization incorporated for purposes related to the improvement of the economy and commerce of the municipality. 1998, c. 18, s. 540.

Dissolution of regional transit authority
541 (1) Every regional transit authority is dissolved and its assets and liabilities are vested in the municipality that established it.

(2) Municipalities that are members of a regional transit authority are deemed to have

(a) entered into an intermunicipal services agreement for the provision of public transportation services on the same terms and conditions as contained in the incorporating documents of the regional transit authority; and

(b) dedicated the property of the authority to that purpose. 1998, c. 18, s. 541.

Dissolution of corporations and commissions

542 (1) Every incorporated waterfront development corporation, parking commission, tree commission, parks commission or recreation commission established by a municipality or by statute is dissolved and its assets and liabilities are vested in the municipality that established it or in which it operated.

(2) A municipality may transfer property of a waterfront development corporation, parking commission, tree commission, parks commission or recreation commission dissolved by this Act to a nonprofit organization incorporated for purposes similar to those of the dissolved body or related to the improvement of the municipality. 1998, c. 18, s. 542.

Transitional tax rates

543 (1) Where a regional municipality is incorporated, the council may authorize, for the ten fiscal years commencing on the incorporation date,

(a) different commercial and residential tax rates in each former municipal unit by phasing down or up the rates that applied within the municipal unit immediately before the incorporation date; and

(b) the levying and collecting of a separate rate within each former municipal unit for debt charges arising from debt outstanding immediately prior to the incorporation date.

(2) A council may levy a rate on an area to recover outstanding deficits, debts, debt charges or other items of past expenditure that the council determines should be recovered from the ratepayers of the area.

(3) A rate levied pursuant to subsection (2) applies to the assessed value of all taxable property and business occupancy assessments in the area.

(4) In the first fiscal year of a regional municipality, the council may levy and collect taxes at the same rates as were levied by the municipal governments, applied to the assessed value of all taxable property and business occupancy assessments on the same basis as the rates levied by
municipal governments, provided the total sum so levied will be sufficient to meet the estimated requirements of the regional municipality for that year.

(5) This Section applies to Cape Breton Regional Municipality, Halifax Regional Municipality and Region of Queens Municipality from the date of their respective incorporations. 1998, c. 18, s. 543.

**Reference to municipality**

544 A reference in an enactment to a municipality, as defined in the Municipal Affairs Act, is a reference to a municipality, village or service commission as defined in this Act. 1998, c. 18, s. 544.

(2) Subsections 134(2) and (3) have effect on and after April 1, 2003.

(3) Section 199 has effect on and after April 1, 2000. *1998, c. 18, s. 584.*

**SCHEDULE A**

**FORM A**

**WARRANT**

TO: Any police officer, civil constable, by-law enforcement officer or other municipal employee

(taxpayer) is indebted to the (Municipality) for (amount) taxes and interest.

You are required forthwith to distraint the goods and chattels of (taxpayer) for that amount and for the expenses of collection, and if need be to remove them to some place of safekeeping.

If the property distrainted is not redeemed by payment of that amount, with the expenses of collection, and any additional charges and expenses, you shall sell the goods and chattels distrainted upon to satisfy the amount due.

Given under my hand and the municipal seal

day of , 19 .

Treasurer

**FORM B**

**RETURN**

The warrant of distress for taxes hereto annexed was directed to me to be executed, and I have executed it by

(or I have been unable to find sufficient goods to realize the amount due for taxes, and interest and costs, fees and expenses and that the amount remaining due after the levy and sale is )

(or I have been unable to find any goods whereon to levy)

date

**FORM C**

**CERTIFICATE OF SALE FOR TAXES**
THIS IS TO CERTIFY that on (date), (purchaser) of (address) purchased for the sum of $ the lands and premises described in Schedule "A" hereto annexed, which were sold for arrears of taxes due to the (Municipality), the same having been assessed to (assessed owner), and described in a deed recorded in Book at Page.

A deed conveying the property to the purchaser or as directed by the purchaser will be provided upon payment of the prescribed fee at any time after three [six] months from the date of the sale if the property is not redeemed.

Given under the hand of the treasurer and the seal of the (Municipality) this day of , 19.

Treasurer

FORM D
CERTIFICATE OF DISCHARGE

THIS IS TO CERTIFY that the (Municipality) has been paid the amount required to redeem the land described in Schedule "A" hereto annexed, which had been assessed to (assessed owner) and was on (date) sold for arrears of taxes to (purchaser), and with respect to which a certificate of sale for taxes was issued and was recorded in Book at Page.

The certificate of sale for taxes is now released.

Given under the hand of the treasurer and the seal of the (Municipality) this day of , 19.

FORM E
TAX DEED

THIS TAX DEED is made this day of , 19

BETWEEN:

The Municipality of,
hereinafter called the "Grantor"

OF THE ONE PART

- and -

The Purchaser's Name
hereinafter called the "Grantee"

OF THE OTHER PART

Whereas the Grantor did advertise and sell on (date) the land assessed to described in Schedule "A" hereto annexed for arrears of taxes, interest and expenses.

Now This Indenture Witnesses that in consideration of the sum of One Dollar and other good and valuable consideration the Grantor hereby conveys to the Grantee all the lands or interests described in Schedule "A".
In Witness Whereof, we have set our hands and affixed the seal of the Municipality the day and year first above written.

SIGNED, SEALED AND DELIVERED ) MUNICIPALITY OF
in the presence of )
)
)
)
Mayor/ Warden
)
)
per:
)
Clerk

PROVINCE OF NOVA SCOTIA )
COUNTY OF )

ON THIS day of , A. D., 19 , before me, the subscriber, personally came and appeared , the subscribing witness to the foregoing Indenture, who, having been by me duly sworn, made oath and said that and , the Mayor/Warden and Clerk of the Grantor herein, signed, sealed and delivered the same in h presence.

A Commissioner of the Supreme Court of Nova Scotia

Note: Schedule "A" is to contain a full metes and bounds description of the property being conveyed, and must also contain a proper back reference to the next earlier deed, and to the deed to the delinquent taxpayer.

1998, c. 18, Sch. A.

SCHEDULE B

Statements of Provincial Interest

Table of Contents

Introduction

Definition

Statement of Provincial Interest Regarding Drinking Water

Statement of Provincial Interest Regarding Flood Risk Areas

Statement of Provincial Interest Regarding Agricultural Land

Statement of Provincial Interest Regarding Infrastructure

Statement of Provincial Interest Regarding Housing

Implementation
INTRODUCTION

Nova Scotia's land and water resources are fundamental to our physical, social and economic well-being. But they are finite resources and using them in one way can mean the exclusion of other uses forever. Therefore, it is important that decisions about Nova Scotia's land and water be made carefully. Ill-advised land use can have serious consequences for the physical, economic and social well-being of all Nova Scotians.

These statements of Provincial interest recognize the importance of our land and water resources. The statements also address issues related to the future growth of our communities. They are intended to serve as guiding principles to help Provincial Government departments, municipalities and individuals in making decisions regarding land use. They are supportive of the principles of sustainable development.

Development undertaken by the Province and municipalities should be reasonably consistent with the statements.

As the statements are general in nature, they provide guidance rather than rigid standards. They reflect the diversity found in the Province and do not take into account all local situations. They must be applied with common sense. Thoughtful, innovative and creative application is encouraged.

DEFINITIONS

These definitions apply to the Statements of Provincial Interest.

Agricultural Land means active farmland and land with agricultural potential as defined by the Canada Land Inventory as Class 2, 3 and Class 4 land in active agricultural areas, speciality crop lands and dykelands suitable for commercial agricultural operations as identified by the Department of Agriculture and Marketing.

Floodplain means the low lying area adjoining a watercourse.

Floodproofed means a measure or combination of structural and non-structural measures incorporated into the design of a structure which reduces or eliminates the risk of flood damage, usually to a defined elevation.

Floodway means the inner portion of a flood risk area where the risk of flooding is greatest, on average once in twenty years, and where flood depths and velocities are greatest.

Floodway Fringe means the outer portion of a flood risk area, between the floodway and the outer boundary of the flood risk area, where the risk of flooding is lower, on average once in one hundred years, and floodwaters are shallower and slower flowing.

Groundwater Recharge Area means the area of land from which water flows to supply a well.

Municipal Water Supply Watershed means an area encompassing a surface watershed or recharge area, or a portion of it, serving as a water supply area for a municipal water system.

Off-site Fill means fill that has been imported from outside the floodplain or fill which is transported from the Floodway Fringe to the Floodway.

Planning Documents means a municipal planning strategy, land-use by-law, development agreement and subdivision by-law.
STATEMENT OF PROVINCIAL INTEREST
REGARDING DRINKING WATER

GOAL
To protect the quality of drinking water within municipal water supply watersheds.

BASIS
A safe supply of drinking water is a basic requirement for all Nova Scotians.

Inappropriate development in municipal water supply watersheds may threaten the quality of drinking water.

Some water supply watersheds are located outside the municipality using the water. The municipality depending on the water therefore has no direct means of protecting its supply.

APPLICATION
This statement applies to all municipal water supply watersheds in the Province including surface watersheds and groundwater recharge areas.

PROVISIONS
1. Planning documents must identify all municipal water supply watersheds within the planning area.

2. Planning documents must address the protection of drinking water in municipal water supply watersheds. Measures that should be considered include

(a) restricting permitted uses to those that do not pose a threat to drinking water quality;

(b) balancing the expansion of existing uses against the risks posed to drinking water quality;

(c) limiting the number of lots. Too many lots may result in development which cumulatively affects drinking water quality. The minimum size of lots and density of development should be balanced against the risks posed to the quality of drinking water;

(d) setting out separation distances between new development and watercourses to provide protection from run-off;

(e) establishing measures to reduce erosion, sedimentation, run-off and vegetation removal associated with development.

3. Existing land use and the location, size and soil conditions of a municipal water supply watershed will determine the land-use controls that should be applied. Large surface watersheds, for example, may be able to sustain more development than a small groundwater recharge area.

It is recognized that in some situations the long-term protection of the drinking water supply may be impractical. In these cases planning documents must address the reasons why the water supply cannot be protected. Municipalities in this situation should consider locating an alternate source of drinking water where long-term protective measures can be applied.
4. The Province supports the preparation of watershed management strategies for all municipal water supply watersheds. These strategies should be prepared by the concerned municipalities and the municipal water utility, in consultation with all affected parties, including landowners.

STATEMENT OF PROVINCIAL INTEREST REGARDING FLOOD RISK AREAS

GOAL

To protect public safety and property and to reduce the requirement for flood control works and flood damage restoration in floodplains.

BASIS

Floodplains are nature's storage area for flood waters [floodwaters].

New development in a floodplain can increase flood levels and flows thereby increasing the threat to existing upstream and downstream development.

Five floodplains have been identified as Flood Risk Areas under the Canada-Nova Scotia Flood Damage Reduction Program.

APPLICATION

This statement applies to all Flood Risk Areas that are designated under the Canada-Nova Scotia Flood Damage Reduction Program. These are

(1) East River, Pictou County,

(2) Little Sackville River, Halifax County,

(3) Sackville River, Halifax County,

(4) Salmon and North Rivers, Colchester County, and

(5) West and Rights Rivers and Brierly Brook, Antigonish County.

There are other areas in the Province that are subject to flooding which have not been mapped under the Canada-Nova Scotia Flood Damage Reduction Program. In these areas, the limits of potential flooding have not been scientifically determined. However, where local knowledge or information concerning these floodplains is available, planning documents should reflect this information and this statement.

PROVISIONS

1. Planning documents must identify Flood Risk Areas consistent with the Canada-Nova Scotia Flood Damage Reduction Program mapping and any locally known floodplain.

2. For Flood Risk Areas that have been mapped under the Canada-Nova Scotia Flood Damage Reduction Program planning documents must be reasonably consistent with the following:

(a) within the Floodway,
development must be restricted to uses such as roads, open space uses, utility and service corridors, parking lots and temporary uses, and

(ii) the placement of off-site fill must be prohibited;

(b) within the Floodway Fringe,

(i) development, provided it is floodproofed, may be permitted, except for

(1) residential institutions such as hospitals, senior citizen homes, homes for special care and similar facilities where flooding could pose a significant threat to the safety of residents if evacuation became necessary, and

(2) any use associated with the warehousing or the production of hazardous materials,

(ii) the placement of off-site fill must be limited to that required for floodproofing or flood risk management.

3. Expansion of existing uses must be balanced against risks to human safety, property and increased upstream and downstream flooding. Any expansion in the Floodway must not increase the area of the structure at or below the required floodproof elevation.

4. For known floodplains that have not been mapped under the Canada-Nova Scotia Flood Damage Reduction Program, planning documents should be, at a minimum, reasonably consistent with the provisions applicable to the Floodway Fringe.

5. Development contrary to this statement may be permitted provided a hydrotechnical study, carried out by a qualified person, shows that the proposed development will not contribute to upstream or downstream flooding or result in a change to flood water [floodwater] flow patterns.

STATEMENT OF PROVINCIAL INTEREST REGARDING AGRICULTURAL LAND

GOAL

To protect agricultural land for the development of a viable and sustainable agriculture and food industry.

BASIS

The preservation of agricultural land is important to the future of Nova Scotians.

Agricultural land is being lost to non-agricultural development.

There are land-use conflicts between agricultural and non-agricultural land uses.

APPLICATION

This statement applies to all active agricultural land and land with agricultural potential in the Province.

PROVISIONS

1. Planning documents must identify agricultural lands within the planning area.
2. Planning documents must address the protection of agricultural land. Measures that should be considered include:

(a) giving priority to uses such as agricultural, agricultural related and uses which do not eliminate the possibility of using the land for agricultural purposes in the future. Non-agricultural uses should be balanced against the need to preserve agricultural land;

(b) limiting the number of lots. Too many lots may encourage non-agricultural development. The minimum size of lots and density of development should be balanced against the need to preserve agricultural land;

(c) setting out separation distances between agricultural and new non-agricultural development to reduce land-use conflicts;

(d) measures to reduce topsoil removal on lands with the highest agricultural value.

3. Existing land-use patterns, economic conditions and the location and size of agricultural holdings means not all areas can be protected for food production, e.g., when agricultural land is located within an urban area. In these cases, planning documents must address the reasons why agriculture lands cannot be protected for agricultural use. Where possible, non-agricultural development should be directed to the lands with the lowest agricultural value.

STATEMENT OF PROVINCIAL INTEREST REGARDING INFRASTRUCTURE

GOAL
To make efficient use of municipal water supply and municipal wastewater disposal systems.

BASIS
All levels of government have made significant investment in providing municipal water supply and municipal wastewater disposal infrastructure systems.

Unplanned and uncoordinated development increases the demand for costly conventional infrastructure.

APPLICATION
All communities of the Province.

PROVISIONS
1. Planning documents must promote the efficient use of existing infrastructure and reduce the need for new municipal infrastructure. Measures that should be considered include:

(a) encouraging maximum use of existing infrastructure by enabling infill development on vacant land and higher density development;

(b) discouraging development from leapfrogging over areas served by municipal infrastructure to unserviced areas;

(c) directing community growth that will require the extension of infrastructure to areas where serving costs will be minimized. The use of practical alternatives to conventional wastewater disposal systems should be considered;
(d) identifying known environmental and health problems related to inadequate infrastructure and setting out short and long-term policies to address the problems including how they will be financed.

2. Where on-site disposal systems are experiencing problems, alternatives to the provision of conventional wastewater disposal systems should be considered. These include the replacement or repair of malfunctioning on-site systems, the use of cluster systems and establishing wastewater management districts.

3. Installing municipal water systems without municipal wastewater disposal systems should be discouraged.

4. Intermunicipal solutions to address problems and provide infrastructure should be considered.

STATEMENT OF PROVINCIAL INTEREST
REGARDING HOUSING

GOAL

To provide housing opportunities to meet the needs of all Nova Scotians.

BASIS

Adequate shelter is a fundamental requirement for all Nova Scotians.

A wide range of housing types is necessary to meet the needs of Nova Scotians.

APPLICATION

All communities of the Province.

PROVISIONS

1. Planning documents must include housing policies addressing affordable housing, special-needs housing and rental accommodation. This includes assessing the need and supply of these housing types and developing solutions appropriate to the planning area. The definition of the terms affordable housing, special-needs housing and rental housing is left to the individual municipality to define in the context of its individual situation.

2. Depending upon the community and the housing supply and need, the measures that should be considered in planning documents include: enabling higher densities, smaller lot sizes and reduced yard requirements that encourage a range of housing types.

3. There are different types of group homes. Some are essentially single detached homes and planning documents must treat these homes consistent with their residential nature. Other group homes providing specialized services may require more specific locational criteria.

4. Municipal planning documents must provide for manufactured housing.

IMPLEMENTATION

1. These statements of provincial interest are issued under the Municipal Government Act. The Minister of Housing and Municipal Affairs, in cooperation with other provincial departments, is responsible for their interpretation.
2. Provincial Government departments must carry out their activities in a way that is reasonably consistent with these statements.

3. New municipal planning documents as well as amendments made after these statements come into effect must be reasonably consistent with them.

4. Councils are encouraged to amend existing planning documents to be reasonably consistent with the statements. Where appropriate, the preparation of intermunicipal planning strategies is encouraged.

5. Reasonably consistent is defined as taking reasonable steps to apply applicable statements to a local situation. Not all statements will apply equally to all situations. In some cases, it will be impractical because of physical conditions, existing development, economic factors or other reasons to fully apply a statement. It is also recognized that complete information is not always available to decision makers. These factors mean that common sense will dictate the application of the statements. Thoughtful innovation and creativity in their application is encouraged.

6. Conflicts among the statements must be considered and resolved in the context of the planning area and the needs of its citizens.

7. The Department of Housing and Municipal Affairs, with other Provincial departments, may prepare guidelines and other information to help municipalities in implementing the statements. Provincial staff are available for consultation on the reasonable application of the statements.

1998, c. 18, Sch. B.
An Act to Provide for the Preservation, Regulation and Study of Archaeological and Historical Remains and Palaeontological and Ecological Sites

Short title

1 This Act may be cited as the Special Places Protection Act. R.S., c. 438, s. 1.

Purpose of Act

2 The purpose of this Act is to

(a) provide for the preservation, protection, regulation, exploration, excavation, acquisition and study of archaeological and historical remains and palaeontological sites which are considered important parts of the natural or human heritage of the Province;
(b) provide for the preservation, protection, regulation, acquisition and study of ecological sites which are considered important parts of the natural heritage of the Province and, notwithstanding the generality of the foregoing, preserve, regulate, acquire and study those ecological sites that

(i) are suitable for scientific research and educational purposes,

(ii) are representative examples of natural ecosystems within the Province,

(iii) serve as examples of ecosystems that have been modified by man and offer an opportunity to study the natural recovery of ecosystems from such modification,

(iv) contain rare or endangered native plants or animals in their natural habitats,

(v) provide educational or research field areas for the long-term study of natural changes and balancing forces in undisturbed ecosystems; and

(c) promote understanding and appreciation among the people of the Province of the scientific, educational and cultural values represented by the establishment of special places. R.S., c. 438, s. 2.

**Interpretation**

3 In this Act,

(a) "Committee" means the Advisory Committee on the Protection of Special Places;

(aa) "heritage object" means an archaeological, historical or palaeontological object or remain but does not include such an object to which the Treasure Trove Act applies;

(b) "Minister" means the member of the Executive Council assigned responsibility for this Act;

(c) "Museum" means the Nova Scotia Museum;

(d) "registered owner" means an owner of land whose interest in the land is defined and whose name is specified in an instrument in the registry of deeds, and includes a person shown as a tenant of land on the last revised assessment roll;

(e) "special places" means those places referred to in Section 2. R.S., c. 438, s. 3; 1990, c. 45, s. 1; 2005, c. 28, s. 1.

**Act binds Crown**

4 (1) This Act binds Her Majesty in right of the Province.

(2) repealed 1990, c. 45, s. 2.
Advisory Committee on Protection of Special Places

5 (1) There is hereby established a committee to be known as the Advisory Committee on the Protection of Special Places.

(2) The Committee shall be appointed by the Minister and shall be composed of

(a) one person employed by the department for which the Minister has responsibility, who is the chair of the Committee;

(b) three persons who are representative of

(i) the Department of Environment and Labour,

(ii) the Department of Tourism, Culture and Heritage, and

(iii) the Department of Natural Resources; and

(c) up to six other persons who may include persons recognized as experts in fields pertinent to this Act and persons who represent aboriginal interests.

(3) Members of the Committee may be appointed for such terms as the Minister determines.

(4) repealed 2005, c. 28, s. 2.

(5) Members of the Committee shall be eligible for re- appointment.

(6) A member of the Committee shall not receive any remuneration for being a member thereof, but shall be reimbursed for actual expenses incurred in connection therewith. R.S., c. 438, s. 5; 2005, c. 28, s. 2.

Duties and powers

6 The Committee shall be responsible to the Minister and shall have power to

(a) make recommendations to the Minister concerning the administration, classification and acquisition of special places;

(b) conduct research with respect to existing and possible future special places;

(c) recommend regulations to the Minister with respect to management plans and other matters related to ecological sites;

(d) conduct research concerning the possible removal from designation of existing special places;
(e) ensure that, if a special places designation is being considered that appears to effect the operation of some other public Act, the persons charged with the administration of that Act have the opportunity to make representations to the Committee before any recommendations are made to the Minister;

(f) do any other thing which the Minister may assign the Committee with respect to assisting him in the proper administration of this Act. *R.S., c. 438, s. 6.*

**Designation of protected site**

7 (1) The Minister, with the approval of the Governor in Council, may designate any land within the Province, including land covered with water, that has outstanding archaeological, historical or palaeontological significance as a protected site.

(2) A designation made pursuant to subsection (1) shall contain a description of the land sufficient to identify it and a copy of the designation shall be deposited in the registry of deeds for the registration district in which the land is situated.

(2A) Every designation of a protected site shall be published in one edition of the Royal Gazette and the effective date of such designation shall be the date of the publication of the aforesaid designation in the Royal Gazette.

(2B) Such publication shall contain a description of the protected site sufficient to identify the boundaries of same.

(3) The Minister may place appropriate signs or other devices at a protected site indicating that the land is a protected site, but no sign or device is required to be placed at a site.

(4) Where the land to be so designated is privately owned,

(a) the Minister shall cause notice of the intention to designate to be served upon each registered owner not less than thirty days prior to designation;

(b) the owner may comment upon the proposed designation within the period of time specified by the Minister; and

(c) no person shall be entitled to any damages for compensation for injurious affection as a result of the designation of land or land covered with water. *R.S., c. 438, s. 7; 1990, c. 45, s. 3.*

**Termination of designation**

7A (1) Where it appears to the Committee that the continued designation of land as a protected site is inappropriate, the Committee may recommend to the Minister that the designation be terminated.
(2) Before making a recommendation pursuant to subsection (1), the Committee shall give notice of the proposed recommendation in a newspaper circulating in the Province giving at least thirty days for receipt by the Committee of written submissions by the public and, where the land is privately owned, the notice shall be served on the registered owner of the land.

(3) The Committee shall not make a recommendation pursuant to subsection (1) until thirty days following the deadline for receipt of written submissions pursuant to subsection (2).

(4) Upon receipt by the Minister of a recommendation pursuant to this Section to terminate a designation, the Minister may, with the approval of the Governor in Council, terminate the designation.

(5) Where the Minister terminates the designation of land, the Minister shall cause notice of the termination to be deposited in the registry of deeds for the registration district in which the land is situate and, where the land is privately owned, to be sent to the registered owner of the land. 1990, c. 45, s. 4.

Heritage research permit

8 (1) No person shall carry out explorations or make excavations on any land in the Province, including land covered with water, for the purpose of seeking heritage objects, without a heritage research permit.

(2) The Minister, or a person authorized by the Minister, may issue heritage research permits authorizing archaeological, historical or palaeontological explorations and excavations in the Province.

(3) A heritage research permit shall be subject to the following:

(a) the application must be made on a form approved by the Minister;

(b) the applicant must be competent to conduct heritage research as proposed on the form provided;

(c) the permit holder must submit a report on the work done to the Minister within the time specified on the permit and in such detail as the Minister requires; and

(d) the permit holder must deliver possession of all heritage objects recovered, while excavating pursuant to the heritage research permit, to the Museum or to any other public institution which the Minister may designate, which objects become the property of the Province.

(4) Notwithstanding clause (d) of subsection (3), the Museum or other public institution designated by the Minister pursuant to said clause (d) may return any heritage object received to the person who recovered it, subject to such conditions as to the care and disposition of the object as the Museum or other institution, as the case may be, determines. R.S., c. 438, s. 8; 1990, c. 45, s. 5.
Effect of permit

9 A permit issued under this Act does not

(a) authorize the permit holder to enter upon lands or remove heritage objects therefrom without the consent of the owner or person entitled to grant consent; or

(b) relieve the permit holder from compliance with any enactment, regulation or law relating to excavations on land. *R.S., c. 438, s. 9.*

Cancellation of permit

10 The Minister may cancel a permit at any time and the permit shall, upon cancellation, cease to be in force. *R.S., c. 438, s. 10.*

Seizure of heritage object

11 Where a heritage object has been recovered from any site in the Province by a person who is not a holder of a permit or by a permit holder in contravention of his permit, the Minister or a person authorized by him may seize the heritage object and deliver it to the Museum, which object becomes the property of the Province. *R.S., c. 438, s. 11; 1994-95, c. 17, s. 1.*

Prohibition where no permit

12 Notwithstanding the issue of a licence pursuant to the Treasure Trove Act, no person shall

(a) excavate or otherwise alter a protected site or remove any objects from a protected site unless he is the holder of a permit;

(b) knowingly destroy, desecrate, deface or alter archaeological or historical remains or a palaeontological site whether designated or not unless he holds a heritage research permit to excavate the specific site. *R.S., c. 438, s. 12; 1990, c. 45, s. 6.*

Stop order

13 (1) When, in the opinion of the Minister, any special place, whether designated or not, is threatened with destruction by reason of commercial, industrial or other development or activity, the Minister may order the development or activity to cease in whole or in part for thirty days and, upon the recommendation of the Minister, the Governor in Council may continue the order until a site survey and, if necessary, a site investigation and salvage is carried out under the direction of the Museum.

(2) When such a development or activity is carried out by a government department or agency or a developer, the Governor in Council may require that funds be provided by that department, agency or developer to cover the costs of site survey, investigation and salvage.
(3) Where a site survey, investigation or salvage is ordered, it shall be carried out in such a manner that it will not cause undue hardship on the agency, owner or person responsible for the development or activity. R.S., c. 438, s. 13; 1990, c. 45, s. 7.

Designation of ecological site

14 (1) The Minister, with the approval of the Governor in Council, may on Crown land or on private land with the consent of the owner, including land covered with water, designate certain areas of the Province as ecological sites.

(2) The Minister may formulate a management plan for an ecological site at any time and may seek the assistance of the Committee when so doing.

(3) Every designation of an ecological site shall be published in one edition of the Royal Gazette and the effective date of such designation shall be the date of the publication of the designation in the Royal Gazette.

(4) Such publication shall contain a description of the ecological site sufficient to identify the boundaries of same.

(5) The Minister may place appropriate signs or other devices at an ecological site indicating that the land is a protected site, but no sign or device is required to be placed at a site.

(6) The ecological sites shall be designated by a description of the lands sufficient to identify them and such designation shall be registered as soon as possible by the Minister in the registry of deeds office for the registration district in which the lands are situated.

(7) Before the registration of the aforesaid designation, the Minister shall forthwith by registered mail give notice to the registered owner or owners of the lands so designated.

(8) A designation of an ecological site

(a) runs with the land to which it applies and binds all successors in title to the land or any estate in the land unless the designation is terminated pursuant to this Act; and

(b) is not affected by any tax deed conveying the land to which it applies.

(9) Subsection (8) applies to all designations of ecological sites whether made before or after the coming into force of that subsection. R.S., c. 438, s. 14; 1990, c. 45, s. 8; 2004, c. 6, s. 31; 2005, c. 28, s. 3.

Termination of designation

14A (1) Where it appears to the Committee that the continued designation of land as an ecological site is inappropriate, the Committee may recommend to the Minister that the designation be terminated.
(2) Before making a recommendation pursuant to subsection (1), the Committee shall give notice of the proposed recommendation in a newspaper circulating in the Province giving at least thirty days for receipt by the Committee of written submissions by the public and, where the land is privately owned, the notice shall be served on the registered owner of the land.

(3) The Committee shall not make a recommendation pursuant to subsection (1) until thirty days following the deadline for receipt of written submissions pursuant to subsection (2).

(4) Upon receipt by the Minister of a recommendation pursuant to this Section to terminate a designation, the Minister may, with the approval of the Governor in Council, terminate the designation.

(5) Where the Minister terminates the designation of land, the Minister shall cause notice of the termination to be deposited in the registry of deeds for the registration district in which the land is situate and, where the land is private land, to be sent to the registered owner of the land. 1990, c. 45, s. 9.

Management of designated Crown land

15 Crown lands designated as ecological sites shall be under the administration and control of the Minister. R.S., c. 438, s. 15.

Ecological research permit

16 (1) The Minister, or a person authorized by the Minister, may issue ecological research permits authorizing ecological research or other ecological activities within the designated ecological sites.

(2) Such permits so issued shall be subject to the following:

(a) an application for a permit must be made on a form approved by the Minister;

(b) the applicant must be competent to conduct ecological research or other ecological activities as proposed on the form provided;

(c) the permit holder must submit a report on the work done or activities carried on to the Minister within the time specified on the permit; and

(d) the permit may be made subject to such conditions as the Minister, or a person authorized by the Minister, may prescribe in order to protect the designated ecological site or some part thereof from any such proposed research or activities, and, if the lands are privately held, such research or activities must be carried on with the written consent of the landowner.

(3) The Minister may cancel the permit at any time and the permit shall, upon cancellation, cease to be in force. R.S., c. 438, s. 16; 1990, c. 45, s. 10.
Ecological research permit

17 After the designation of an ecological site, no person shall carry on any activity which may alter any part of the terrain or of the vegetation or carry on any acts which may disturb the fauna or the flora within the designated site, unless such person has first obtained an ecological research permit from the Minister, or a person authorized by the Minister. R.S., c. 438, s. 17; 1990, c. 45, s. 11.

Prohibition on disposal or grant of rights

18 (1) The Province, upon the designation of an ecological site upon Crown lands, and notwithstanding the provision of any other special or general statute, shall not grant, lease or otherwise dispose of lands that comprise such a site.

(2) Any grant of the Province of any rights under any other statute, including, but not so as to restrict the generality thereof, the mining rights, fishing and game rights, forestry rights and water rights, shall be forbidden on any ecological site designated and any grant purported to be made shall be null and void. R.S., c. 438, s. 18.

Restriction on expropriation

19 Notwithstanding any general or special Act, including the provisions of the Expropriation Act, no expropriation power can be exercised within the limits of a designated ecological site without the express authorization of the Minister, in addition to any other authorization necessary to carry out such expropriation power. R.S., c. 438, s. 19.

Regulations

20 (1) The Governor in Council, upon the recommendation of the Minister, may make regulations for the protection, preservation and use of special places on Crown lands and with respect to special places on private lands with the further consent of the landowner and, generally and without restricting the generality thereof, may make regulations

(a) establishing management plans for designated ecological sites;

(b) for the classification of ecological sites and the uses to which each classification can be put;

(c) for the control of entry onto a special place and the control of activities within such places;

(d) respecting the control, regulation, restriction or prohibition of any kind of use, development or occupation of the land or of any of the natural resources in a special place;

(e) respecting the sign, plaques and markers to be placed at a special place;

(f) determining measures, including financial incentives, to encourage the identification, preservation and protection of special places;
(g) respecting generally any other matter or thing necessary or incidental to the protection of special places.

(2) The exercise by the Governor in Council of the authority set forth in this Section shall be regulations within the meaning of the Regulations Act. R.S., c. 438, s. 20; 1990, c. 45, s. 12.

Service of notice

21 (1) Service of any notice required to be made by this Act shall be sufficient if served upon the person by registered mail at his last known address.

(2) Where a person upon whom service should be made cannot be identified or his address is not known, service shall be sufficient if notice is affixed in a conspicuous place on the land and a copy is delivered to any occupant of the land. R.S., c. 438, s. 21.

Offence and penalty

22 (1) Every person who contravenes any provision of this Act or who, being the holder of a permit, fails to comply with any term or condition of any permit issued under this Act is guilty of an offence and is liable on summary conviction to a penalty not exceeding ten thousand dollars.

(2) Where a corporation is convicted of an offence against this Act, the maximum penalty that may be imposed upon the corporation is one hundred thousand dollars and not as provided in subsection (1). R.S., c. 438, s. 22; 1990, c. 45, s. 13.

Existing designations and permits preserved

23 Notwithstanding the repeal of the former Historical Objects Protection Act, every designation made and permit issued under that Act remains good and valid. R.S., c. 438, s. 23.
Policy Framework for the Management of Assets and Acquired Services

1. Effective Date

This framework is effective as of November 1st, 2006.

2. Context

2.1 Purpose

The Policy Framework for the Management of Assets and Acquired Services and its associated policy instruments set the direction for the management of assets and acquired services to ensure the conduct of these activities provides value for money and demonstrates sound stewardship in program delivery. A failure to effectively manage these activities can result in increased program and administrative costs and can compromise program outcomes.

Assets include a very broad range of resources ranging from land, buildings and major IT systems to furniture and equipment. Acquired services can be very simple, such as temporary help, or highly complex service delivery arrangements.

This framework sets out the principles for the management of assets and acquired services, which are consistent with the Management Accountability Framework. As with all areas of government management, it is firmly grounded in the Values and Ethics Code for the Public Service.

In addition, the framework identifies key legislation, policy instruments, community professional standards and requirements for integrated information systems that constitute the basis for the government’s management practices and controls for assets and acquired services.

Finally, the framework supports the role of Treasury Board ministers in making effective management and expenditure decisions in the context of assets and acquired services while ensuring Parliamentarians have the necessary information for the oversight of management and spending in the Estimates process.

3. Principles

3.1. Decisions with respect to the management of assets and acquired services:

- are consistent with government priorities and departmental mandates, enable program outcomes, address critical risks, and comply with legislation, regulations and policies;
- demonstrate public service values and ethics, rigorously assess health and safety, actively promote environmental stewardship, contribute to broader government objectives and ensure access, service quality, privacy, and security;
- encourage innovation by considering the full range of options available to best meet program needs;
- are informed by financial and non-financial performance measures and results; and
- are fair, transparent and accessible to serve Parliament’s appropriation and oversight role and the Treasury Board’s management role.
3.2. Value for money and sound stewardship in the management of assets and acquired services are achieved through:

- strategic and integrated decision-making and management processes at a government-wide, horizontal, portfolio, departmental and program levels to optimize the use of assets and services;
- a risk-based and complexity-based approach to processes, systems, capacity, resourcing, oversight and reporting to promote the attainment of program outcomes;
- a life cycle management approach reflecting direct and indirect costs of assets and services, to ensure affordability, cost effectiveness and performance;
- consideration of asset performance and utilization in retention and disposal decisions made in support of program delivery;
- delegation of authority based on need, capacity and on an effective regime of accountabilities and responsibilities;
- efficient and effective business processes; and
- management systems, processes and information that provide the basis for managing performance and for assigning costs to support:
  - effective fact-based decision-making, budgeting and reporting consistent with the Management Resources and Results Structure (MRRS)
  - reallocation in response to changing priorities,
  - risk-based oversight and monitoring and
  - demonstrated compliance with legislation, regulations and policy.

4. Accountabilities, Roles and Responsibilities

4.1 Deputy Heads

Deputy Heads are accountable to their respective Ministers and to Treasury Board for the management of assets and acquired services in departments. They are responsible for implementing an effective management framework, including departmental procedures, processes and systems, that demonstrates how the department is managing based on the principles identified above. The framework must demonstrate how the management of assets and acquired services is effectively integrated with program, expenditure, financial and human resources related considerations to promote value for money.

Deputy Heads are responsible for ensuring that the monitoring of assets and acquired services management practices and controls is in place within the department and for acting expeditiously when control failures are identified. Responses must be fact-based, get to root causes and respect due process when dealing with issues of personal conduct.

The specific responsibilities of departmental deputy heads for the life-cycle management of assets and acquired services are described in a suite of Treasury Board policy instruments.

4.2 Treasury Board and Treasury Board of Canada Secretariat (Secretariat)

The Treasury Board and its Secretariat are responsible for establishing a government-wide system of management and control for federal assets and acquired services pursuant to the authority given in the Financial Administration Act and Federal Real Property and Federal Immovables Act.

A key element of the Treasury Board's role is the review and approval of departmental investment plans, including assessment of the performance and cost of assets and acquired services from
government-wide, horizontal, portfolio, departmental and program perspectives.

The Secretariat is responsible for providing appropriate policies, directives, tools and guidance necessary to support this framework and government-wide learning. It also performs a community leadership role by sharing information and fostering best practices.

The Secretariat establishes professional standards for communities of practice. This specifically includes support for the identification of core competencies and associated training and, where applicable, certification standards required of employees working in all areas of life-cycle asset management.

The Secretariat monitors the implementation of Treasury Board policies in and across departments. Where necessary, the Secretariat ensures that the appropriate remedial measures are undertaken by Deputy Heads in support of their responsibilities for the monitoring of asset and acquired services management practices and controls.

### 4.3 Common Service Organizations

Common Service Organizations provide services to departments that support the effective management of assets and acquired services. Common Service Organizations are responsible for contributing to the achievement of value for money for Canadians by providing professional services that are responsive to the needs of client departments in the most cost effective way possible.

### 5. Relationship to other Treasury Board Frameworks

This Framework is linked to and informed by other key frameworks and associated policies such as the [Foundation Framework for Treasury Board Policies](http://www.tbs-sct.gc.ca/pol/doc-eng.aspx?id=12022&section=HTML), the Integrated Risk Management Framework and the Financial Management Policy Framework.

The specific legislative, regulatory and policy instruments that support this framework are set out in the attached Appendix.

The Asset and Acquired Services policy responsibilities complement legislative and policy requirements in the areas of program, expenditure, financial and human resources management thereby ensuring value for money and sound stewardship in program delivery.

### 6. Monitoring, Reporting and Performance Assessment

Performance indicators, reporting requirements and compliance mechanisms with respect to the life-cycle management of assets and acquired services are identified in individual policies, where applicable.

Information gathered through policy monitoring and reporting, as well as through the review of audits conducted by departments or the Office of the Auditor General, is used to assess a department's management performance. These assessments may be used to inform discussions between the Secretary of the Treasury Board and Deputy heads on the Management Accountability Framework (MAF).

Deputy Heads are responsible for ensuring that the findings of MAF assessments and issues identified through monitoring are examined, reviewed and effectively acted upon.

Departmental performance is the basis for increased delegations and or their limitation or removal by Treasury Board Ministers. Delegations for asset and acquired services related management...
activities are informed by a department's demonstration of management capacity relative to this framework and associated policies, directives and standards.

7. Consequences

The Foundation Framework for Treasury Board Policies explains the role that consequences play in the application of Treasury Board policies. Assets and acquired services policies provide more subject-specific information on consequences.

8. Enquiries

Responsibility for the policy instruments supporting this policy framework is vested with the Treasury Board of Canada Secretariat.

MESSAGE FROM THE MINISTER

As the Minister responsible for Canadian Heritage, I am pleased to present Parks Canada Guiding Principles and Operational Policies. I extend my appreciation to those Canadians who helped in the development of this comprehensive policy. You have made an important contribution to the preservation of Canada's national heritage.

What we value as Canadians is our freedom, our clean environment, the beauty and wildness of nature, and the paths of human endeavour that brought us to where we are today. The peace and sense of renewal we feel in wandering through a forest, along a mountain path or beside a surging sea encourage us to want to share these experiences with our children. The sense of wonder and reverence we feel as we learn about the past human activities that laid the foundation of our country stimulate a profound concern for ensuring the survival of historic places, artifacts and structures.

These values, which we cherish so deeply, motivate us to make protection of natural areas and commemoration of historic places a high national priority. Such areas and sites represent the very essence of our identity as a people. They characterize the way we see ourselves and how others see us as a nation. Through our efforts, we demonstrate to the world a thoughtful, caring attitude towards the national and international treasures of nature and culture so richly bestowed upon Canadians.

The inspiration and knowledge we derive from these special heritage places more than justify our efforts to protect and commemorate them. More important, as a civilized society we have a fundamental stewardship responsibility to ensure that the record of our past, the rich diversity of wild spaces and species, the beauty and grandeur of our lands and seas, and the cultural character of our communities are not inadvertently lost over time.

Canada has in place a world-class system of heritage areas and programs, be they national historic sites, national parks, heritage rivers, heritage railway stations and buildings, historic canals or marine conservation areas. These places are located all across Canada and are part of a global heritage family. Canadians must share in the continuing challenge of managing and safeguarding these national treasures – not only because of the magnitude of the task, but because it is important that we feel part of the effort to preserve such an abundant legacy.

Michel Dupuy
Minister of Canadian Heritage

This document is a comprehensive statement of broad principles that gives direction to both present programs and future initiatives of Parks Canada. It provides a framework for the delivery of heritage programs and for responsible management decisions that reflect the national interest while being sensitive to local considerations.

The document explains how the federal government, within the context of Parliamentary approvals, carries out its national programs of natural and cultural heritage recognition and protection as assigned to the Minister responsible for Parks Canada. This program is but part of a family of protected heritage areas and activities administered by other federal, provincial, territorial and non-government organizations, and depends increasingly on the cooperation of others.

The policies provide national direction for more detailed policies in specific subject areas, and for various park and historic site management plans, which take into account Canada's regional diversity. Further, they can be a guide for other agencies, organizations and individuals also involved in commemorating, protecting and presenting natural and cultural heritage.

The Parks Canada Policy of 1979 is replaced by this document, which reflects the many changes that have occurred since then. These include a greater sense of urgency in dealing with environmental and heritage matters, new and amended legislation, as well as changes in heritage programs.

The legislative and program changes which have occurred since 1979 include:

- amendments to the *National Parks Act* (1988);
- passage of the *Heritage Railway Stations Protection Act* (1988);
- new policies, including the Federal Heritage Buildings Policy (1982) and the National Marine Parks Policy (1986); and
PREFACE

"... deterioration or disappearance of any item of the cultural or natural heritage constitutes a harmful impoverishment of the heritage of all nations of the world."

(World Heritage Convention, UNESCO)

Canadian Identity and Heritage

As Canadians we appreciate the beauty of the natural environment and the richness of our history. These elements contribute to an understanding and collective sense of Canada's national identity as well as a shared sense of pride. They unify us as a people yet express our national diversity. Canadians share this heritage with each other and welcome others to value, respect and learn about it. We celebrate this rich heritage through national historic sites, national parks and park reserves, heritage railway stations, historic canals, marine conservation areas, heritage rivers, federal heritage buildings and historical markers.

These national symbols contribute to our Canadian identity in many ways. They depict a diversity of cultures and natural environments. They are national symbols, yet can be located in virtually any part of the country – urban, rural and remote. They are also tangible links not only with the past and the present but with the future. Heritage places provide a window to the world and showcase our global responsibilities in ensuring continued protection and presentation of a heritage that has both national and international significance.

Canada's environment encompasses a vast array of terrestrial and marine ecosystems — the Arctic tundra, the western mountains, the prairies, the Precambrian Shield, and the eastern uplands, including the off-shore areas of the Great Lakes, and the Atlantic, Arctic, and Pacific coasts. The environment also includes places and landscapes associated with human heritage. These historic places — which represent thousands of years of human history and encompass places of work and worship, commerce and culture, law and leisure — evoke our past, our aspirations and our values.

Conservation Strategies and Sustainable Development

Heritage places must be managed in a manner that sustains them and respects their intrinsic values.

Heritage places contribute to broader sustainable development and conservation strategies by:

- maintaining ecological integrity and biodiversity of natural areas;
- preserving the commemorative integrity of historic places;
- promoting a conservation ethic, citizenship values based on a respect for the environment and heritage, ecosystem and cultural resource management; and
- generally demonstrating conservation principles and approaches set out in various relevant United Nations Reports.

The World Heritage Convention and Heritage Places

Canada played a major role in devising the 1972 Convention concerning the Protection of the World Cultural and Natural Heritage, which has as its objectives the protection, conservation and presentation of cultural and natural heritage of outstanding universal value. Under the terms of the convention, Canada has committed itself to identify and to delineate sites associated with cultural and natural heritage within Canada; to adopt a general policy that aims to give the cultural and natural heritage a function in the life of the community; to establish one or more services charged with the protection, conservation and presentation of this heritage; to take appropriate legal, scientific, technical, administrative and financial measures, as
well as to foster the establishment of training centres, to achieve the objectives of the Convention, and to avoid any deliberate measures that might damage cultural and natural heritage. The Convention also establishes a framework for international cooperation and assistance.

The Convention on Biological Diversity and Protected Heritage Areas

By administering protected heritage areas, Parks Canada plays a major role in implementing the Convention on Biological Diversity, adopted in Rio de Janeiro in 1992. Protected areas such as national parks and reserves, marine conservation areas, and some national historic sites can contribute directly to the in-situ conservation of biological diversity and, therefore, to Canada's national strategy for the conservation and sustainable use of biological diversity.

In fulfilling its mission in this regard, Parks Canada promotes the protection of ecosystems and natural habitats, the maintenance and recovery of viable wild populations of species in natural settings, as well as the environmentally sound management of surrounding or adjacent areas.

While the primary purpose of national historic sites and other cultural heritage sites is not to conserve biological diversity, a number of such sites may contribute to biological diversity because of their size and/or ecological features. Good environmental stewardship encompasses a concern for places that reflect the human as well as the biophysical heritage.

Early History

For more than a century, the Government of Canada has been involved in protecting outstanding natural areas and in commemorating significant aspects of Canadian history. This extensive experience has enabled Canada to be recognized, internationally, as a world leader in the management of heritage.

Canada's national parks system began in 1885 when 26 km² around mineral hot springs near Banff Station, Alberta, were set aside for public use. The Rocky Mountains Park Act of 1887 defined the first parks as "public park and pleasure grounds for the benefit, advantage and enjoyment of the people of Canada." The National Parks Act, originally enacted in 1930, dedicates the national parks to the people of Canada for their benefit, education and enjoyment and makes provision to keep them unimpaired for the enjoyment of future generations. The setting aside of historic Fort Anne in Annapolis Royal, Nova Scotia, in 1917, followed by the establishment of the Historic Sites and Monuments Board of Canada in 1919, laid the foundation for Canada's system of national historic sites. The 1930 National Parks Act also provided a legislative framework for the setting aside of federal lands for historical purposes. The Historic Sites and Monuments Act of 1953, reflecting the strong sense of national purpose that followed the Second World War, provided statutory authority for the designation of national historic sites – regardless of ownership – as well as a legislative basis for acquiring and for contributing directly to the care and preservation of these sites.

The Present

Parks Canada's protected heritage areas play a significant part in achieving Government of Canada goals of:

- completing the parks systems and protecting Canada's natural heritage, including contributing towards the setting aside as protected space 12 per cent of the country; and
- commemorating the historical heritage of importance to all Canadians.
The Future

Parks Canada is committed to establishing a comprehensive network of protected heritage areas representative of Canada's natural and cultural heritage. To achieve this goal, Parks Canada needs the cooperation and involvement of others.

Efforts will be made to manage natural protected areas on an ecosystem basis, while meeting compatible social and economic needs, and maintaining the areas in a natural state. Cultural heritage areas will be managed in accordance with cultural resource management principles and practice so that their commemorative integrity is ensured and that the fabric of the communities in which they are located is enhanced.

Protected heritage areas can demonstrate the interdependence of humans and the environment, and provide enhanced educational and interpretive opportunities. As a result, Canadian heritage values should increasingly be recognized as part of a nationally unifying ethic.

These are the challenges for the future.
PART I

POLICY OVERVIEW AND GUIDING PRINCIPLES
MISSION FOR THE DEPARTMENT OF CANADIAN HERITAGE

Parks Canada, as an integral part of the Department of Canadian Heritage, plays an important role in: "Building our future together — strengthening a shared sense of Canadian identity which respects the diversity of the land and the people."

VISION FOR PARKS CANADA

Parks Canada's leadership in the management of protected heritage areas aims at promoting sound principles of stewardship and citizen awareness, and ecological and commemorative integrity. This is done by:

- adhering to international conventions such as the World Heritage Convention and the Convention on Biological Diversity;
- responsibly managing a system of national heritage areas and programs (e.g., national parks, national historic sites, historic canals, heritage rivers and heritage railway stations);
- providing opportunities for the public to get involved; and
- working with others to support heritage areas.

Parks Canada envisions having a stronger leadership role in protecting and presenting heritage areas well into the next century. This role will have two key components: a broad definition of protected heritage, and a view of leadership that encompasses more than ownership. It is recognized that national historic sites and national parks are but one component of the Canadian network of heritage areas.

Leadership by example means managing areas of national significance. But it also means helping and cooperating with others to protect and present heritage — for example, through providing technical advice and national standards, and fostering and advocating heritage protection and presentation, both nationally and internationally.

Stewardship of heritage areas is a shared responsibility. Canadian citizens must be more aware and involved in decision-making and in the delivery of heritage programs.

The future integrity of Canada's existing and proposed natural and cultural heritage areas will continue to be a priority for Parks Canada. With increasing challenges to and demands on Canada's heritage areas, it is important not only to develop a strategic policy to ensure the perpetuity of these special places, but also to clearly articulate Parks Canada's leadership role in working with Canadians to support these areas. The public will increasingly share in this responsibility. This will lead to a broader range of heritage areas and programs. This policy document will guide these efforts and the designation and management of special places into the next century.
POLICY CONTEXT

Parks Canada's purpose is:

To fulfill national and international responsibilities in mandated areas of heritage recognition and conservation; and to commemorate, protect and present, both directly and indirectly, places which are significant examples of Canada's cultural and natural heritage in ways that encourage public understanding, appreciation and enjoyment of this heritage, while ensuring long-term ecological and commemorative integrity.

Introduction

Parks Canada operates within a broad and varied context, consistent with national and international commitments, to protect and present places that represent the world's natural and cultural heritage. These commitments recognize that people and the environment are inseparable and that survival is fundamentally linked to a healthy environment and respect for human heritage. It is important, therefore, to ensure that these policies anticipate and respond to challenges and opportunities as they arise.

Issues of international, national and regional scope affect heritage places. Canada must continue to respond positively to increasing international emphasis on the commemoration, protection and presentation of places representing the world's natural and cultural heritage. The goal of sustainable development must include the goal of maintaining the integrity of Canada's natural and cultural heritage. The global economy is changing, and the contribution of the tourism sector in the North American economy, including Canada, is expected to continue to increase. While Parks Canada does not have a direct mandate for tourism, it does have a part to play in recognizing and supporting tourism's place in presenting an image of Canada to visitors, in helping to maintain a sound and prosperous economy, and in fostering sustainable development that benefits local communities.

Parks, national historic sites and canals provide demonstration and communication opportunities for environmental and heritage citizenship initiatives, and various other departmental activities. In addition, the federal environmental assessment legislation is meticulously applied in heritage places administered by Parks Canada.

Parks Canada Mandate

Parks Canada plays a leading role in federal government activities related to recognizing places representative of Canada's natural heritage and places of national historic importance, and in protecting and presenting these places to the public. Parks Canada is also responsible for erecting and maintaining a variety of heritage markers.

The legislation mandating Parks Canada activities includes the National Parks Act, the Historic Sites and Monuments Act, the Heritage Railway Stations Protection Act, and the Department of Transport Act. The Federal Heritage Buildings program and the Canadian Heritage Rivers program are operated under Cabinet authority and federal-provincial agreement between parks ministers respectively.

In some cases, Parks Canada's heritage activities entail direct responsibility for the management of federal lands and their associated resources. This is the case for national parks, aspects of marine conservation areas, and a number of national historic sites, including historic canals. In other cases, activities are focused on formal designations by the Government of Canada and, where mandated, providing support for the preservation and interpretation of designated heritage properties that are managed by others. These include all heritage railway stations; most federal heritage buildings; most Canadian heritage rivers; and many national historic sites.
Shared Responsibility

Parks Canada contributes to an international heritage agenda through its leadership role in, participation in, or support for, international conventions, programs, agencies and agreements. These include, among others:

- UNESCO's World Heritage Convention;
- the Ramsar Convention on Wetlands of International Significance;
- the Convention on Biological Diversity;
- UNESCO's Québec Declaration on World Heritage Towns;
- the Venice Charter for the Conservation and Restoration of Monuments and Sites;
- the International Charter for Archaeological Heritage Management;
- the World Charter for Nature;
- UNESCO's Biosphere Reserves Program;
- the International Council for Monuments and Sites (ICOMOS);
- the International Centre for the Study of the Preservation and Restoration of Cultural Properties (ICCROM); and
- the World Conservation Union (also known as IUCN).

As well, many bilateral and multilateral initiatives between countries often involve heritage information exchanges and joint activities.

Canadians can take pride in their internationally recognized contribution to heritage conservation – as exemplified by the many World Heritage Sites found in Canada – and their emerging role in promoting responsible stewardship throughout the world.

Global environmental and heritage concerns are responded to through research and public presentation programs at protected heritage areas. These programs may encompass such themes as acid rain, climate change, biodiversity, endangered species and the impact of development, natural processes and disasters on heritage places. This contributes to forging the relationship between international commitments, and national and local actions.

Because heritage areas and sites cannot be managed in isolation, cooperative working relationships and agreements are actively sought with agencies and individuals involved in the management of surrounding or adjacent landscapes, ecosystems and communities. This helps all parties achieve mutually supportive environmental, service, social, and cultural objectives for conservation and sustainability. The first priority in relationships is always to ensure long-term ecological and commemorative integrity of heritage areas. Therefore, it is important for Parks Canada to monitor and respond to existing or proposed activities external to heritage areas.

Parks Canada recognizes that while protected heritage areas often play a major role in local economies, sustainable tourism must be based upon:

- maintaining and enhancing ecological and commemorative integrity;
- respecting the intrinsic natural, cultural and scenic values of Canada's protected heritage areas; and
- providing education and recreation opportunities which foster a sense of Canadian identity.

Based on these guidelines, Parks Canada will cooperate with other levels of government and tourism stakeholders to encourage a sustainable heritage tourism industry.

The Family of Heritage Places and Programs

The heritage areas and programs administered by Parks Canada are but a part of the nationwide family of parks, historic sites, protected areas, and heritage programs in Canada. Cooperation and coordination among heritage interests is not only desirable but essential to ensuring more effective conservation of significant heritage places and to minimizing any duplication of efforts.
Agreements with provincial and territorial governments, as well as with allied non-government organizations and Aboriginal peoples, can be significant means of ensuring recognition, establishment and protection of heritage places. The responsibilities and complementary roles of provincial, territorial and other governments, as well as national and local heritage and Aboriginal groups are valued.

Aboriginal Interests

Where Aboriginal interests have not been previously dealt with by treaty or other means, it is the Government of Canada's policy to negotiate comprehensive claims based on traditional and continuing use and occupancy of land. Claims settlements may include particular Aboriginal rights and benefits in relation to wildlife management and the use of water and land, and may provide for these through participation on advisory or public government bodies. Such arrangements would recognize the government's responsibility to protect the interests of all users, including the general public and third parties, to ensure resource conservation, to respect international agreements, and to manage renewable resources within its jurisdiction. Where existing Aboriginal or treaty rights occur within protected heritage areas, the principles set out in court decisions which may serve to clarify these rights, such as Regina v. Sparrow, will be respected.

When establishing new national parks or reserves, and national marine conservation areas, or acquiring national historic sites, Parks Canada works within Canada's legal and policy framework regarding Aboriginal peoples' rights, as recognized and affirmed by Section 35 of the Constitution Act, 1982. Accordingly, Parks Canada will consult with affected Aboriginal communities at the time of new park establishment and historic site acquisition, or as part of an Aboriginal land claim settlement.
GUIDING PRINCIPLES

Parks Canada contributes at the international, national and local levels to sustaining cultural and natural heritage through a continuing commitment to the following principles. Ensuring commemorative integrity and protecting ecological integrity are always Parks Canada's paramount values in applying these principles as well as the more detailed activity policies.

1- ECOLOGICAL AND COMMEMORATIVE INTEGRITY

Protecting ecological integrity and ensuring commemorative integrity take precedence in acquiring, managing, and administering heritage places and programs. In every application of policy, this guiding principle is paramount. The integrity of natural and cultural heritage is maintained by striving to ensure that management decisions affecting these special places are made on sound cultural resource management and ecosystem-based management practices.

It is recognized that these places are not islands, but are part of larger ecosystems and cultural landscapes. Therefore, decision-making must be based on an understanding of surrounding environments and their management.

Rigorous adherence to this principle is fundamental to ensuring a continuing contribution to heritage and environmental stewardship.

Heritage areas are designated and managed for their intrinsic and symbolic values, and for the benefit of the public. Fostering appreciation and understanding of commemorative and ecological integrity is the foundation for public use and enjoyment.

The various internal and external factors that contribute to the deterioration of heritage places and ecosystems are carefully analyzed. Protection and presentation are afforded in ways appropriate to the type, significance and sensitivity of the ecosystems and heritage resources involved.

Because protected heritage areas are influenced by surrounding and adjacent land uses, and, in turn, the management of heritage areas influences those surrounding areas, cooperative relationships are sought. The first priority for Parks Canada is always to ensure long-term ecological and commemorative integrity of heritage areas. Using its influence, Parks Canada makes concerted efforts to encourage compatible external activities and to discourage incompatible ones within the greater ecosystem or cultural landscape setting of a heritage area.

2- LEADERSHIP AND STEWARDSHIP

In achieving results relating to protection and presentation of cultural and natural heritage, leadership is established by example, by demonstrating and advocating environmental and heritage ethics and practices, and by assisting and cooperating with others.

A leadership role involves a broader responsibility to the conservation and interpretation community within Canada as well as other countries. Therefore, training and other forms of cooperative assistance are needed to share experiences and expertise.

Stewardship involves both a leadership and a participatory role. However, varying degrees of cooperative action are inherent in all of Parks Canada's heritage activities.

A leadership role may be considered for additional heritage activities or programs where:

- internationally acknowledged types of areas or programs are involved (e.g., Natural Monuments or Landmarks);
- appropriate approaches can be developed with provinces, territories and other potential partners; and
- heritage values are of national or international significance.

Conversely, a participatory role may be considered in heritage conservation initiatives where:
- types of areas or programs are involved that are not included within international classification systems (e.g., heritage trails);
- other conservation groups have the lead role; and
- significant heritage values are involved.

Parks Canada's leadership role includes the responsibility to help promote among various agencies, groups and governments the federal government's long-term goal to preserve and celebrate national heritage and to set aside 12 per cent of Canada as protected space. In this regard, Parks Canada promotes the concept of an integrated family or network of heritage areas, and cooperates with provinces and territories in their protected area and heritage strategies.

3- NEW PROTECTED HERITAGE AREAS

The identification, selection, designation, and establishment of nationally significant natural areas and historic places are based on open, systematic, rigorous, cooperative, and knowledge-based practices.

Significant expressions of the country's natural and cultural heritage are identified, wherever found throughout Canada, for possible inclusion in national systems of heritage places. Nationally significant heritage places are identified in consultation with affected provincial and territorial governments, Aboriginal peoples, and other parties. Interim protection for an area may be sought until formal protection is attained.

These initiatives are supported by research, data bases, and collaboration with the public and government agencies. A high priority is placed on working with others to ensure that Canada's systems of natural areas and historic places represent the human history and natural diversity of our country.

4- EDUCATION AND PRESENTATION

The long-term success of efforts to commemorate, protect, and present Canada's natural and cultural heritage depends on the ability of all Canadians to understand and appreciate this heritage, and to personally adopt practices which are sensitive to heritage and the environment. This is encouraged through a variety of communication, interpretation and outreach programs, and demonstrated leadership at the local, national and international levels.

It is important that people discover and learn about their heritage and ecosystems and that they contribute to their sustainability. Opportunities are, therefore, provided to understand heritage values, and related management and environmental issues, as well as broader conservation concerns. The sharing of information, including published and unpublished results of research and controlled access to collections, is an important element in encouraging this understanding.

The provision of accurate, comprehensive and timely information is important in fostering awareness, appreciation, appropriate use and understanding, and in encouraging public involvement and stewardship. This is achieved through such means as interpretation, communication, outreach, environmental education, citizenship, and public participation programs, as well as through advisory committees.

5- HUMAN - ENVIRONMENT RELATIONSHIP

People and the environment are inseparable. Protection and presentation of natural and cultural heritage take account of the close relationship between people and the environment.

Though a distinction is often made between places that are of cultural heritage significance and places of natural heritage significance, people and their environment cannot be separated. Therefore, protection and presentation of natural areas recognize the ways in which people have lived within particular environments. Likewise, efforts to protect and present historic places recognize where biophysical factors have been influential in Canada's development and history.
6- RESEARCH AND SCIENCE

*Management decisions are based on the best available knowledge, supported by a wide range of research, including a commitment to integrated scientific monitoring.*

Parks Canada requires applied and basic research and monitoring activities to make responsible decisions in its management, planning and operating practices, as well as to broaden scientific understanding. Research activities are encouraged and managed to ensure that commemorative and ecological integrity are maintained.

Parks Canada cooperates with, assists, and is assisted by many natural and social science researchers, and specialists in human history. These may include those associated with other federal, provincial and territorial government agencies, universities, interest groups, and the private sector. Local knowledge is also of value to Parks Canada in managing heritage areas.

7- APPROPRIATE VISITOR ACTIVITIES

*Opportunities will be provided to visitors that enhance public understanding, appreciation, enjoyment and protection of the national heritage and which are appropriate to the purpose of each park and historic site. Essential and basic services are provided while maintaining ecological and commemorative integrity and recognizing the effects of incremental and cumulative impacts.*

Public opportunities are provided for in ways which contribute to heritage protection and national identity objectives, and which build public support for, and awareness of, Canadian heritage.

Parks Canada recognizes the need for control and management of appropriate activities. Public demand alone is not sufficient justification for provision of facilities and services in support of appropriate activities.

Services, facilities and access for the public must directly complement the opportunities provided, be considered essential, take account of limits to growth, and not compromise ecological and commemorative integrity nor the quality of experiences. They must be consistent with approved management plans. Also, they must reflect national standards for environmental and heritage protection and design, as well as high-quality services, the diversity of markets and equity of access considerations for disabled persons and visitors of various income levels.

There are inherent dangers associated with some natural and cultural features and public activities. Therefore, risk management programs involving others are developed by Parks Canada for the safety of visitors. Public safety considerations are built into planning and design processes. Priority is placed on accident prevention, education and information programs designed to protect visitors, in ways consistent with the commemorative and ecological integrity of heritage places. Visitors are encouraged to learn about any risks associated with heritage places and to exercise appropriate self-reliance and responsibility for their own safety in recreational or other activities they choose to undertake.

8- PUBLIC INVOLVEMENT

*Public involvement is a cornerstone of policy, planning and management practices to help ensure sound decision-making, build public understanding, and provide opportunities for Canadians to contribute their knowledge, expertise and suggestions.*

Canadians are provided with the opportunity to state their views on such major issues as national policies, the establishment of new national parks, the acquisition of national historic sites, and the preparation and review of management plans, before final decisions are made. Special opportunities for public participation are provided to individuals and groups at the local and regional levels, including Aboriginal peoples, who may be more directly affected by Parks Canada initiatives and operations.

For public participation to be effective, certain
fundamental practices will be adhered to. These are:

- the provision of clear, timely, relevant, objective and accurate information;
- an indication of the areas requiring decisions and relevant policies, legislation and agreements;
- adequate notice and time for public review;
- the careful consideration of public input;
- feedback on the nature of comments received and on Parks Canada response to participants; and
- respect for all interested publics.

9- COLLABORATION AND COOPERATION

_Parks Canada works with a broad range of federal, provincial, territorial and municipal government agencies, the private sector, groups, individuals, and Aboriginal interests to achieve mutually compatible goals and objectives. These relationships support regional integration, partnerships, cooperative arrangements, formal agreements, and open dialogue with other interested parties, including adjacent or surrounding districts and communities._

Volunteers, non-profit cooperating associations and their national organization, the Canadian Parks Partnership, adjacent land-owners or tenants, Aboriginal peoples, universities, as well as other research and educational institutions, among others, can all make fundamental contributions to heritage protection and environmental citizenship efforts. The private sector can also play an important role in helping to achieve heritage conservation objectives by delivering environmental and heritage messages, establishing and maintaining compatible business enterprises, and helping to provide appropriate high-quality services in or near parks and historic sites, in a manner consistent with these policies.

10- ACCOUNTABILITY

_Parks Canada is accountable for the application of, and adherence to, these principles and for the implementation of the activity policies. This accountability will be formally reviewed through State of the Parks reporting._

State of the Parks Reports are prepared periodically for tabling in Parliament. These Reports deal with the state of all heritage places administered by Parks Canada and with progress toward establishing new areas. They help to ensure that threats to heritage places are identified. State of the Environment Reports also monitor progress with respect to protected natural areas in general throughout Canada, and Parks Canada contributes to this effort.

Policy Application

These Principles set out the key elements of policy which apply broadly to Parks Canada's heritage activities. Specific policies for national parks, national historic sites, historic canals, national marine conservation areas and other activities, are set out in Part II, "Activity Policies," and Part III, "Cultural Resource Management Policy." These provide more detailed direction for the management of the various heritage places and programs of Parks Canada.

In addition to these policies, further management details may be found within strategic plans, management directives, management plans, business plans, ecosystem management plans, service plans, community plans, and regulations.

NATIONAL PARKS POLICY

BACKGROUND

Canadians live in a land rich in natural beauty and diversity. For millions of years, natural forces and not human activities were the major influences on this landscape. Prior to the arrival of Europeans, Aboriginal peoples depended almost entirely on the natural environment. But more recently, with the advent of an agricultural and then an industrial society, human activities have been altering that environment at an accelerating pace.

National parks protect environments representative of Canada's natural heritage for the benefit of present and future generations. The challenge for Parks Canada is to maintain the ecological integrity of the parks while providing opportunities for public enjoyment and education. This requires the careful protection of the natural features and processes for which each park is established, a key component of which is the fostering of public awareness of the value of safeguarding representative natural landscapes in the national parks system.

National parks cannot sustain all the types of activities and development which a broad range of visitors might desire. Generally, access and services which relate directly to the objective for national parks will be provided within the parks, while a broader range of needs will be met in the surrounding region. The cooperation of tourism and other sectors will be essential to help establish the appropriate balance of services and facilities on a regional basis.

Throughout the last century, the growth in Canada's population and the exploitation of natural resources have decreased the areas available for national park establishment, and have heightened competition for potential park lands, particularly in southern Canada. Opportunities for Canadians to experience unspoiled natural areas have become more limited and thus the need for action is more urgent.

Representing each of Canada's 39 terrestrial natural regions in the national parks system will not be easy. Most lands have some kind of interest or commitment for uses such as oil and gas development, mining, hydro-electricity, forestry, agriculture and private recreation. Land-use conflicts and jurisdictional issues will have to be resolved in cooperation with the provinces, territories, Aboriginal peoples, and all interested parties including local residents. In spite of these challenges, Parks Canada remains committed to completing the system of national parks and, through the "Government of Canada Green Plan" has been given the opportunity to do so by the year 2000.

In the establishment and management of national parks, Parks Canada will strive to maintain ecological integrity. Achievement of this goal will require cooperation with individuals and other government agencies in ecosystem management beyond park boundaries, recognizing that there are legitimate but often different objectives for surrounding regions. Consequently, maintaining ecological integrity will be a major consideration in proposing park boundaries, in determining how the park's resources will be protected and interpreted, and in seeking effective regional integration through cooperative efforts with governments and landowners in the surrounding area.

In addition to their natural features, many national parks contain areas which have cultural and historic significance. These will be managed according to the "Cultural Resource Management Policy," found in Part III of this document.

In parks where there are existing Aboriginal or treaty rights, the exercise of these rights will be respected. As well, in some national parks, traditional activities by Aboriginal peoples will
continue as a result of rights defined by land claim agreements and treaties, or by specific agreements negotiated during the process of park establishment. Given the legislative and constitutional basis of such agreements, they are expected to supersede Parks Canada policy and in some instances will consequently amend the National Parks Act. Continuation of traditional activities and related cooperative management will result in new national parks that recognize the importance of the natural environment in sustaining Aboriginal cultures. Traditional renewable resource harvesting for domestic purposes by other local people may also continue for finite periods on an exception basis, where no immediate alternative can be found.

In addition to the contribution which national parks make to achieving Government of Canada goals related to completing the parks system, protecting Canada's natural heritage, and setting aside 12 per cent of Canada as protected space, national parks can contribute directly and indirectly to the achievement of many other Government of Canada goals, such as:

- preserving the integrity, health, and biodiversity of Arctic ecosystems;
- strengthening and building environmental partnerships;
- providing timely, accurate and accessible information to enable Canadians to make environmentally sensitive decisions;
- helping to develop an environmentally literate society;
- strengthening environmental science with special emphasis on understanding regional ecosystems; and
- striving to ensure that all operations and procedures meet or exceed national targets for sustaining the environment.

Management plans provide the framework for decision-making within each park. The National Parks Act requires public consultations during the preparation of park management plans and stipulates that the maintenance of ecological integrity through the protection of natural resources will be the first priority when considering park zoning and visitor use.

**OBJECTIVE**

To protect for all time representative natural areas of Canadian significance in a system of national parks, and to encourage public understanding, appreciation, and enjoyment of this natural heritage so as to leave it unimpaired for future generations.

**1.0 The National Parks System**

National parks protect representative examples of the Canadian landscape. To this end, Parks Canada has identified 39 terrestrial natural regions across Canada, each of which warrants representation in the national parks system. Efforts to create new parks are concentrated on those natural regions that do not have a national park.

National park establishment work is guided by the National Parks System Plan. The plan provides a description of each of the 39 National Park Natural Regions and the status of national park establishment in each. Parks Canada will periodically update the plan, including the listing of representative natural areas which are identified during regional analysis studies. In addition, Parks Canada will keep up to date an action plan to describe the activities which must be undertaken to complete the representation of each of the national park natural regions.

Parks Canada, acting alone, cannot protect all the areas identified as representative of Canada's natural regions.
But by making public the system plan and action plan, Parks Canada hopes to encourage other public agencies and appropriate private organizations to work towards protecting areas that will not be included within the national park system.

Public support and the cooperation of other levels of government are essential in establishing new national parks or adjusting the boundaries of existing national parks. The park establishment process is therefore based upon public consultation and intergovernmental cooperation.

There is no rigid process for establishing new national parks. Each situation is unique and the steps leading up to the creation of a new national park reflect individual circumstances. The normal sequence, however, is characterized by five steps: identifying representative natural areas; selecting a potential national park; assessing park feasibility; negotiating a park agreement and obtaining clear title; and establishing a new national park in legislation. The following policies related to park establishment are grouped under these headings.

1.1 Identifying Representative Natural Areas

1.1.1
Representative natural areas will be identified for those national park natural regions not represented in the national parks system. The following criteria will be used:

i) the area must portray the geology, physiography, vegetation, wildlife, and ecosystem diversity characteristic of the natural region; and,

ii) the area's ecosystems must be in a healthy, natural state, or, if they are stressed or significantly modified, the area must have the potential for being restored to a natural state.

1.1.2
Representative natural areas will be identified in consultation with provincial and territorial governments, with other federal agencies and with the interested public.

1.1.3
Representative natural areas will be identified regardless of their current protected status or jurisdiction.

1.2 Selecting Potential National Parks

1.2.1
Potential national parks will be selected from among the representative natural areas identified in those natural regions that do not already have adequate representation in the national parks system.

1.2.2
In selecting potential national parks, consideration will be given to a wide range of factors, including:

i) the extent to which the area represents the ecosystem diversity of the natural region;

ii) the potential for supporting viable populations of wildlife species native to the natural region;

iii) the ecological integrity of the area's ecosystems, as well as those of the surrounding lands;

iv) the occurrence of exceptional natural phenomena, and rare, threatened or endangered wildlife and vegetation;

v) the existence of significant cultural heritage features or landscapes;

vi) opportunities for public understanding, education and enjoyment;

vii) competing land and resource uses;

viii) possible threats to the long-term sustainability of the area's ecosystems;

ix) complementarity with the objectives of existing or planned protected natural areas of other jurisdictions in the region;

x) the potential for establishing an adjacent national marine conservation area that is
representative of its marine region;

xi) the implications of Aboriginal rights, comprehensive land claims and treaties with Aboriginal peoples; and

xii) international criteria for national parks.

1.2.3
Potential national parks will be selected in consultation with provincial or territorial governments, other federal agencies, non-government organizations, affected Aboriginal peoples and the interested public.

1.3
Assessing National Park Feasibility

1.3.1
Parks Canada, in conjunction with provincial or territorial governments, will undertake an assessment of the feasibility of a new park proposal; where there are opportunities, this will be undertaken as part of other processes such as regional land use planning, provincial protected area strategies or Aboriginal comprehensive land claim negotiations.

1.3.2
As part of the feasibility assessment, there will be consultations to seek the views of local communities, Aboriginal peoples, non-government organizations, relevant industries, other government departments and the interested public. Parks Canada will provide information regarding the purpose and the environmental, social and economic implications of the national park proposal.

1.3.3
In proposing the boundaries of a potential national park, Parks Canada will endeavour to establish a park with a size and configuration that:

i) protects ecosystems and landscape features representative of the natural region;

ii) accommodates the habitat requirements of viable populations of wildlife species that are native to the natural region;

iii) includes an undisturbed core which is relatively unaffected by impacts originating from the surrounding landscape;

iv) does not fragment sensitive, highly diverse or productive natural communities;

v) maintains drainage basin integrity;

vi) protects exceptional natural phenomena, and vulnerable, threatened or endangered wildlife and vegetation;

vii) offers opportunities for public understanding and enjoyment;

viii) results in minimum long-term disruption of the social and economic life particularly in the surrounding region; and

ix) does not encompass permanent communities.

In addition, consideration may be given to including significant cultural heritage features or landscapes within a proposed national park.

1.3.4
It is the policy of the Department of Indian Affairs and Northern Development to ensure that an inventory of the non-renewable natural resource potential of areas in the Northwest Territories and Yukon be compiled prior to their formal establishment as new national parks. The fundamental qualities of the area which recommend it for national park status will be taken into account in any land use activities associated with compiling the inventory. Parks Canada will cooperate with other federal agencies responsible for carrying out such inventories.

1.3.5
Parks Canada will consider, in cooperation with agencies having jurisdiction over land and resource uses, ways to prevent the loss of ecological values during the feasibility assessment process.

1.3.6
Following completion of a park feasibility assessment, governments will decide whether to proceed to negotiate a park agreement.
1.3.7
Boundary adjustments intended to improve the representation of the natural themes or the ecological integrity of an existing national park will be assessed according to the above policies.

1.4. National Park Agreements

1.4.1
New national park agreements will be negotiated between the Government of Canada and the government and/or Aboriginal peoples having constitutional authority regarding the lands; the agreement will commit the parties to establishing a national park under the National Parks Act and will set out the terms and conditions under which this will take place.

1.4.2
Areas which include Provincial Crown Lands will be established as national parks according to an agreement between the Government of Canada and the provincial government setting out terms and conditions for the acquisition of all third party interests and the transfer of administration and control of Provincial Crown Lands to the Crown in Right of Canada.

1.4.3
National parks in the territories will be established pursuant to agreements with the territorial government and with relevant Aboriginal organizations.

1.4.4
The Crown in Right of Canada will own the land and subsurface rights within the legislated boundaries of national parks.

1.4.5
Commercial exploration, extraction or development of natural resources will be terminated before national parks are formally established. Certain traditional subsistence uses of natural resources may be permitted to continue in designated parts of a national park as outlined in sections 1.4.10, 1.4.11, 1.4.12 and 1.5.2.

1.4.6
Private lands and interests will be acquired by negotiated settlement. Term interests may be allowed to expire. In exceptional cases, where lands are essential for park purposes, a settlement may require using expropriation to establish clear title to some properties.

1.4.7
Parks Canada will contribute toward the cost of special provisions agreed at the time of park establishment to reduce negative impacts on occupants or other users of lands acquired for a national park.

1.4.8
A variety of means will be used to foster opportunities for local residents to find employment and business opportunities related to the operation of national parks.

1.4.9
Cooperative arrangements for complementary use and management of lands adjacent to national parks will be pursued with government and non-government agencies at the local, provincial, territorial and federal levels in order to maintain ecosystem integrity and to foster sustainable development.

1.4.10
Existing Aboriginal and treaty rights of the Aboriginal peoples of Canada will be honoured. These may be defined in treaties and comprehensive claim agreements.

1.4.11
In areas subject to existing Aboriginal or treaty rights or to comprehensive land claims by Aboriginal peoples, the terms and conditions of park establishment will include provision for continuation of renewable resource harvesting activities, and the nature and extent of Aboriginal peoples' involvement in park planning and management.
1.4.12 In addition to Aboriginal or treaty rights, when new national parks are proposed within areas where local people have traditionally depended on the land for subsistence and no immediate alternative can be found, an agreement may be negotiated regarding the continuation of specified subsistence resource harvesting activities for a finite period of time, subject to regulation.

1.4.13 Parks Canada will negotiate interim measures as part of the park agreement in order to facilitate effective protection and management of the area until the national park is formally established under federal legislation. In the territorial north, one such measure may be withdrawal from further disposition of the lands for a proposed new national park under the *Territorial Lands Act*.

1.5 Establishing National Parks in Legislation

1.5.1 National parks will be formally established through amendment to the *National Parks Act*. The proposed legislation will give effect to the terms of a new park agreement.

1.5.2 Where new national parks are established in conjunction with the settlement of land claims of Aboriginal peoples, final boundaries of the national park as well as harvesting rights and involvement of Aboriginal peoples in park planning and management will be proposed in legislation according to the terms of the land claim agreement. In the interim, the area may be set aside as a "national park reserve" under the Act and traditional hunting, fishing and trapping activities by Aboriginal peoples will continue. Other interim measures may also include local Aboriginal peoples' involvement in park reserve management.

2.0 Management Planning

Park management plans are essential for the direction of park managers. They are also commitments to the public of Canada from the Minister responsible for Parks Canada regarding the use and protection of national parks. They contain statements of management objectives in sufficient detail to indicate how a park will protect and represent the natural and cultural aspects of its region. In keeping with these objectives, plans will: specify the type and degree of resource protection and management needed to assure the ecological integrity of the park and the management of its cultural resources; define the type, character and locale of visitor facilities, activities and services; and identify target groups.

The 1988 amendments to the *National Parks Act* state that the maintenance of ecological integrity must be the first consideration in management planning. Parliament has confirmed the Parks Canada policy of preparing management plans for all parks and of public involvement in this process. It is now mandatory that within five years of the proclamation of a national park under any Act of Parliament, the Minister shall approve and table that park's management plan in Parliament. The Minister must also review, amend as necessary and re-table the management plans every five years.

Appropriate public participation at the national, regional and local levels is an essential part of the development of management plans.

Generally, management planning will begin as soon as lands are placed under Parks Canada administration and control, although it may still be years before all issues are resolved and a park is established under the *National Parks Act*. Interim management guidelines are prepared to direct essential park operations until a management plan is approved. The guidelines will be conservative and will not propose major development or resource manipulation. Definition of resource
management practices and existing and potential opportunities for understanding, appreciation and enjoyment will form a key part of the interim guidelines.

2.1 Management Plans

2.1.1 Parks Canada will prepare management plans for the Minister's approval and tabling in Parliament:

i) within five years after the proclamation of a park under any Act of Parliament; or

ii) within five years of the transfer of administration and control to Parks Canada of lands proposed for establishment as national parks.

Management plans will be reviewed every five years for re-tabling with any amendments.

2.1.2 In the preparation of a management plan, the maintenance of ecological integrity through the protection of natural resources and processes will be the first priority when considering zoning and visitor use. The protection of cultural resources will receive a high level of consideration subject to this legislated requirement.

2.1.3 Each management plan will contain a statement of park purpose and objectives that will reflect the role of the park in the system of national parks, and in the natural region in which it is located.

2.1.4 Park management plans provide the framework for further detailed sub-plans concerning:

i) ecosystem management (park conservation plan); and

ii) interpretation, visitor services and visitor risk management (park service plan).

2.1.5 Parks Canada will inform and involve a broad spectrum of the Canadian public in the preparation, review and amendment of park management plans.

2.1.6 The implementation and effectiveness of each park management plan will be monitored continuously.

2.1.7 Parks Canada will cooperate with other levels of government, private organizations and individuals responsible for the planning of areas adjacent to national parks to maintain ecological integrity and to ensure that services and facilities are integrated in a positive manner with surrounding regions.

2.1.8 Management plans for national parks which have additional international or national designations such as World Heritage Site, Biosphere Reserve, Ramsar Site, Canadian Heritage River, or National Historic Site, will include strategies for protection and promotion of the values that resulted in the additional designations.

2.2 Zoning

The national parks zoning system is an integrated approach by which land and water areas are classified according to ecosystem and cultural resource protection requirements, and their capability and suitability to provide opportunities for visitor experiences. It is one part of an array of management strategies used by Parks Canada to assist in maintaining ecological integrity through providing a framework for the area-specific application of policy directions, such as for resource management, appropriate activities, and research. As such, zoning provides direction for the activities of park managers and park visitors alike. The application of zoning requires a sound information base related to both ecosystem structure, function and sensitivity, as well as the opportunities and impacts of existing and
potential visitor experiences.

The zoning system provides a means to reflect principles of ecological integrity by protecting park lands and resources and ensuring a minimum of human-induced change. In certain national parks not all zones will be represented. Where zones which permit a concentration of visitor activities and supporting services and facilities are required (i.e., Zones IV and V), they will occupy no more than a small proportion of a national park.

In some cases, environmentally or culturally sensitive areas or sites may warrant special management but do not fit the zoning designations below. Park management plans will include the guidelines necessary for the protection and use of such areas or sites. Their designation complements the zoning system and is important to the protection of the full range of valued resources in certain national parks. Likewise, a temporal zoning designation may be considered for certain areas as part of the management planning program. Ecosystem management requirements will be paramount in consideration of any temporal zones.

2.2.1
The national parks zoning system will apply to all land and water areas of national parks, and to other natural areas within the Parks Canada system as appropriate. It does not preclude resource harvesting activities which are permitted by virtue of national park reserve status, land claim settlements and/or by new park establishment agreements.

2.2.2
Any change to a park's zoning constitutes a major amendment to the park management plan and may only be made following an environmental assessment, public notice and public participation in the decision.

2.2.3
The national park zoning system comprises the following five zones. (While the broad zoning framework is presented here, implementation depends upon more detailed guidance found in the zoning chapter of the directive on the National Parks Management Planning Process.)

2.2.3.1
Zone I - Special Preservation

Specific areas or features which deserve special preservation because they contain or support unique, threatened or endangered natural or cultural features, or are among the best examples of the features that represent a natural region. Preservation is the key consideration. Motorized access and circulation will not be permitted. In cases where the fragility of the area precludes any public access, every effort will be made to provide park visitors with appropriate off-site programs and exhibits interpreting the special characteristics of the zone.

2.2.3.2
Zone II - Wilderness

Extensive areas which are good representations of a natural region and which will be conserved in a wilderness state. The perpetuation of ecosystems with minimal human interference is the key consideration. Zones I and II will together constitute the majority of the area of all but the smallest national parks, and will make the greatest contribution towards the conservation of ecosystem integrity.

Zone II areas offer opportunities for visitors to experience, first hand, a park's natural and cultural heritage values through outdoor recreation activities which are dependent upon and within the capacity of the park's ecosystems, and which require few, if any, rudimentary services and facilities. Where the area is large enough, visitors will also have the opportunity to experience remoteness and solitude. Opportunities for outdoor recreation activities will be encouraged
only when they do not conflict with maintaining the wilderness itself. For this reason, motorized access and circulation will not be permitted, with the possible exception of strictly controlled air access in remote northern parks, as specified in 4.4.3.

Parks Canada will use a variety of other direct and indirect strategies for managing public use, and will evaluate the effectiveness of these strategies on a regular basis.

2.2.3.3 Zone III - Natural Environment

Areas which are managed as natural environments, and which provide opportunities for visitors to experience a park's natural and cultural heritage values through outdoor recreation activities requiring minimal services and facilities of a rustic nature. While motorized access may be allowed, it will be controlled. Public transit that facilitates heritage appreciation will be preferred. Park management plans may define provisions for terminating or limiting private motorized access.

2.2.3.4 Zone IV - Outdoor Recreation

Limited areas which are capable of accommodating a broad range of opportunities for understanding, appreciation and enjoyment of the park's heritage values and related essential services and facilities, in ways that impact the ecological integrity of the park to the smallest extent possible, and whose defining feature is direct access by motorized vehicles. Park management plans may define provisions for limiting private motorized access and circulation.

2.2.3.5 Zone V - Park Services

Communities in existing national parks which contain a concentration of visitor services and support facilities. Specific activities, services and facilities in this zone will be defined and directed by the community planning process. Major park operation and administrative functions may also be accommodated in this zone. Wherever possible, Parks Canada will locate these functions to maintain regional ecological integrity.

2.3 Designated Wilderness Areas

The 1988 amendments to the National Parks Act provide for the designation, by regulation, of wilderness areas within a park. It is intended that the designated wilderness area boundaries will be consistent with Zone II boundaries, although the requirement to produce a legal boundary survey may cause some slight variations. In addition, where Zone I areas are included in or are adjacent to Zone II areas, or are large enough to be considered on their own, they may also be included in designated wilderness areas, but will be managed to conform to their special requirements for protection.

While the criteria for defining designated wilderness areas mirror that for Zone II Wilderness, an Order in Council designation places a legislative constraint on development. Once the Order is in place, provisions of the National Parks Act come into effect which prohibit authorization of any activity in a designated wilderness area that is likely to impair its wilderness character. Only those activities would be allowed which are required for: park administration; public safety; the provision of basic user facilities including trails and rudimentary campsites; the carrying on of traditional renewable resource harvesting activities where authorized; and, in exceptional circumstances, access by air to remote parts of such areas.

As with all other crucial stages of management planning, the boundaries and appropriate uses of proposed designated wilderness areas will be determined with public input during the preparation or review of a management plan.
Changes to the boundary of a designated wilderness area would have to be preceded by public consultation and approved through an Order in Council.

3.0 Protecting and Managing Park Ecosystems

Management for park purposes differs markedly from that of other lands, where effort may be directed toward modifying or controlling nature, producing crops or extracting natural resources. Within national parks, effort is directed at maintaining ecosystems in as natural a state as possible. This goal has far-reaching implications in that many concepts and practices that are relevant or essential to successful resource management on other lands are inappropriate in national parks.

Sustaining the integrity of park ecosystems will be a major challenge in the coming years. Parks seldom contain complete or unaltered ecosystems. This, combined with increasing and cumulative stress from sources such as adjacent land use, downstream effects of air and water pollution, invasion by exotic species, visitor use and climate change can result in irreversible degradation of park ecosystems, the loss of biodiversity and impoverishment of gene pools. In recognizing the challenge, Parks Canada has produced the Strategic Framework to Sustain the Integrity of Ecosystems, which contains principles to which this Policy conforms and which are reflected in the following statements.

Ecosystem management provides a conceptual and strategic basis for the protection of park ecosystems. It involves taking a more holistic view of the natural environment and ensuring that land use decisions take into consideration the complex interactions and dynamic nature of park ecosystems and their finite capacity to withstand and recover from stress induced by human activities. The shared nature of ecosystems also implies that park management will have effects on surrounding lands and their management.

To be effective, ecosystem management must be far-reaching and have a broad base of support. In particular it requires understanding and collaboration among all those whose activities influence the ecological integrity of the park. Parks Canada must demonstrate leadership by working closely with other land management agencies to develop a better understanding of the relationship between existing land use practices and their effects on the natural environment. National parks are becoming increasingly important in national and international efforts to maintain biodiversity and genetic resources. Consequently, Parks Canada negotiates specific agreements with provincial and territorial planning and conservation agencies and also supports involvement in the UNESCO Man and the Biosphere Program as a means of integrating regional planning around parks.

Ecosystem management must be credible and therefore solidly based in science. Thus, the concept of partnerships is particularly important since universities, conservation organizations and the private sector have much to contribute towards research and environmental monitoring initiatives within national parks.

When research confirms that the structure and function of park ecosystems have been seriously altered by human activities, and that reliance on natural processes alone cannot achieve restoration objectives, intervention may be warranted. Since management action to restore ecosystems will have far-reaching and long-lasting effects, caution must be exercised. Management must be guided by the establishment of clear, practical and measurable objectives that are consistent with the park management plan and by the rigorous application of science in the collection and interpretation of research and monitoring data.

3.1 Ecosystem Protection

3.1.1 National park ecosystems will be given the
highest degree of protection to ensure the perpetuation of natural environments essentially unaltered by human activity.

3.1.2
Human activities within a national park that threaten the integrity of park ecosystems will not be permitted. Where ecosystem integrity is threatened by human activities outside the park, Parks Canada will initiate collaborative action with adjacent land management agencies or owners to try to eliminate or reduce the threat.

3.1.3
Parks Canada will prevent new sources of pollution from developing within national parks and will take action to eliminate or minimize existing sources inside or outside parks. Pollution concerns which are localized will be addressed at the park level, while those which are wide ranging will be addressed in cooperation with other appropriate government agencies.

3.1.4
Sport hunting will not be permitted in a national park. Sport fishing may be permitted in a national park but will be restricted to designated areas.

3.1.5
Parks Canada, in cooperation with other law enforcement agencies, will ensure compliance with the National Parks Act and Regulations and other relevant legislation to protect natural resources, maintain the public peace and protect life and property. Strict enforcement action will be taken to detect and stop illegal activities such as poaching and pollution.

3.1.6
The public will be consulted in the development of park regulations and visitors will be made aware of the rationale for such regulations.

3.2
Ecosystem-Based Management

3.2.1
In keeping with park management plans, Parks Canada will establish measurable goals and management strategies to ensure the protection of ecosystems in and around national parks.

3.2.2
Decision-making associated with the protection of park ecosystems will be scientifically based on internationally accepted principles and concepts of conservation biology.

3.2.3
National park ecosystems will be managed with minimal interference to natural processes. However, active management may be allowed when the structure or function of an ecosystem has been seriously altered and manipulation is the only possible alternative available to restore ecological integrity.

3.2.4
Provided that park ecosystems will not be impaired, the manipulation of naturally occurring processes such as fire, insects and disease may take place when no reasonable alternative exists and when monitoring has demonstrated that without limited intervention:

i) there will be serious adverse effects on neighbouring lands; or
ii) major park facilities, public health or safety will be threatened; or
iii) the objectives of a park management plan prescribing how certain natural features or cultural resources are to be maintained cannot be achieved.

3.2.5
Where manipulation is necessary it will be based on scientific research, use techniques that duplicate natural processes as closely as possible, and be carefully monitored.
3.2.6
An integrated data base will be developed and kept up to date for each national park to provide, along with research and environmental monitoring, the baseline information required to protect and maintain park ecosystems and contribute to State of the Parks reporting to Parliament. In defining information needs, the spatial and temporal dimensions of park ecosystems and ecosystem processes will be a primary consideration. Therefore, data requirements will regularly extend beyond park boundaries.

3.2.7
Parks Canada will work with other government agencies, universities and conservation organizations involved in conservation biology and environmental monitoring to develop integrated programs for the collection, storage, analysis and interpretation of data.

3.2.8
Parks Canada will actively promote national parks as sites for scientific research that will contribute to the long-term protection and better public understanding of ecosystems. Parks Canada will initiate projects or cooperate in programs sponsored by other government agencies and the scientific community to ensure that benchmark research areas are established and maintained in national parks to better understand the effects of human activity on ecosystems both inside and outside national parks.

3.2.9
Parks Canada will take the lead role in establishing integrated and collaborative management agreements and programs with adjacent land owners and land management agencies. Parks Canada will seek mutually satisfactory solutions to trans-boundary concerns associated with the management of shared ecosystem components, the effects of adjacent land use practices on park ecosystems, or the effects of park management practices on the use of adjacent lands. Parks Canada will also participate in regional land use planning and management initiatives sponsored by other jurisdictions to encourage the understanding and cooperation of other agencies in protecting park ecosystems, and for Parks Canada to better understand the management concerns of those other agencies.

3.2.10
A species of plant or animal, which was native to but is no longer present in a park, may be reintroduced after scientific research has shown that reintroduction is likely to succeed and that there will be no significant negative effects on the park and neighbouring lands. Parks Canada will seek the cooperation of adjacent land owners and land management agencies to ensure the success of reintroduction programs.

3.2.11
All practical efforts will be made to prevent the introduction of exotic plants and animals into national parks, and to eliminate or contain them where they already exist.

3.2.12
In each national park, an array of representative and unique aquatic ecosystems will be closed to sport fishing. In addition, opportunities will be provided for benchmark research on, and interpretation of, aquatic systems that may require that other areas be closed to sport fishing.

Where fish populations can sustain some harvest without impairing resources, angling may be permitted in designated areas. Regulations will be conservatively based on continuing stock assessments and will conform to the principle that angling is part of an overall aquatic program involving public education, recreation and ecosystem protection.

Fish stocking will be discontinued except where necessary to restore indigenous fish populations that have been adversely affected by habitat modification.
When studies indicate that structures such as weirs and dams have seriously altered aquatic ecosystems and restoration of these ecosystems is feasible, Parks Canada will have these structures removed and rehabilitate the area.

3.2.13 Parks Canada will be exemplary in the implementation of federal legislation pertaining to environmental assessment and review in national parks. In addition, all programs, policies and plans will be subject to environmental assessment. Parks Canada is committed to making the results of all assessments available to the public.

3.2.14 Parks Canada will participate in environmental impact assessments for proposed developments outside national parks that may affect park ecosystems.

3.2.15 When extractive activities are permitted in a national park pursuant to sections 1.4.11 and 1.4.12, Parks Canada will place a high priority on the management, monitoring and regulation of harvesting activities. Predator control or habitat modification to artificially enhance the availability of resources for harvesting will not be permitted.

4.0 Public Understanding, Appreciation and Enjoyment of National Parks

National Parks are "dedicated to the people of Canada for their benefit, education and enjoyment ... and shall be maintained and made use of so as to leave them unimpaired for the enjoyment of future generations." Since these words were enshrined in the National Parks Act in 1930, many millions of Canadians have visited their national parks. Millions more in Canada and around the world have enjoyed books, films, articles and photographs depicting the intricate wonders of these special places. From these direct and indirect experiences has grown an increased level of understanding and appreciation of the natural values for which the parks are established and protected. This has, in turn, led to strong public support for maintaining the ecological, educational and cultural values of the parks by people of widely varied interests and capabilities. Maintaining this support is essential to completing the national parks system as well as for protecting the existing parks.

To fulfill the obligations of the National Parks Act and serve the people of Canada, park values must be maintained forever. A comprehensive Visitor Activity Management Process has been developed that is predicated on analysis of social science information and integrated with natural and cultural science information. Clear service objectives must be used in determining benefit, education and enjoyment opportunities, since the provision of such opportunities must be measured against the obligations imposed by the Act to maintain the parks unimpaired. This means that not every kind of use requested by the public can be provided.

In meeting the obligations of the Act, Parks Canada does not stand alone. Provincial, territorial, municipal and private agencies will be encouraged to provide complementary opportunities, programs and facilities outside national parks in ways that respect shared ecosystems and the distinctive qualities of local communities. The practice of environmentally sustainable tourism will constitute an important mutual linkage with other land management agencies and private interests.

4.1 Management of Visitor Activities

4.1.1 The Visitor Activities Management Process will be used to match visitor interests with the specific educational and outdoor recreation opportunities determined for each national park through the management plan.
4.1.2
Consistent with maintaining ecological integrity, each national park may offer a variety of outdoor recreation opportunities conforming to the zoning determined in the management plan. These will serve visitors of diverse interests, ages, physical capabilities and skills so that they can understand and experience the park's natural environment.

4.1.3
Only outdoor activities which promote the appreciation of a park's purpose and objectives, which respect the integrity of the ecosystem, and which call for a minimum of built facilities will be permitted.

4.1.4
As new or modified forms of outdoor recreation emerge, each will be assessed for its appropriateness nationally before consideration in the park management planning process. Individual park management plans will then specify the types and ranges of both new and existing appropriate outdoor recreation activities and their supporting facilities. Parks Canada will also periodically review its national directives to ensure that new forms of outdoor recreation are adequately considered.

4.1.5
The private sector and non-governmental organizations, such as volunteers, cooperating associations and the Canadian Parks Partnership, will be encouraged to provide skills development programs that will increase visitor understanding, appreciation and enjoyment of the national parks.

4.1.6
An integrated visitor activities data base will be developed and kept up to date for each national park to provide, along with research, monitoring and evaluation, the visitor information required for park management decisions and state of the parks reporting to Parliament. The information gained will be used to add to or improve existing opportunities, and in the development and review of park management plans, service plans, and visitor risk management programs. Both activity data and park infrastructure and environment data will be incorporated into risk assessments. Risk control measures will consider the experience needs of the visitor and promote visitor self-reliance accordingly.

4.1.7
Parks Canada will use a variety of direct and indirect strategies for managing public use. Examples of direct strategies include zoning, rationing use intensity, restricting activities, and law enforcement. Examples of indirect strategies include facility design, information dispersal, and cost recovery mechanisms.

4.1.8
Provisions for public understanding, appreciation and enjoyment of the cultural resources located in national parks, and associated activities, services and facilities, will be made in accordance with the policy on Cultural Resource Management.

4.2 Interpretation and Public Education

4.2.1
Parks Canada will continue to develop and enhance its information, interpretation and extension programs and services as a principal means of achieving its protection and presentation objectives, building constituencies and fostering national identity.

4.2.2
Information will be made available to all Canadians, as well as to park visitors, to encourage and assist them in understanding, appreciating, enjoying and protecting their national parks.

4.2.3
Parks Canada will welcome visitors and make them aware of the opportunities for understanding, appreciating and enjoying each national park through its programs, services and facilities. It will also provide information on
relevant regulations and the necessary skills and equipment to safely participate in an activity. Particular efforts will be made to provide visitor orientation at key locations to ensure that visitors understand the purpose of national parks and their role in protecting them; can easily locate park features, services and facilities; and can freely choose whether they wish to participate in an activity or not. Visitors will be made aware of risk assessment information and of their responsibility to incorporate this information into their activity planning.

4.2.4
Parks Canada will provide the public with interesting and enjoyable opportunities to observe and discover each park's natural, cultural, historical and environmental features and processes, as well as the park's resource management issues and practices, both within and outside national parks. It will present these opportunities in a variety of ways using personal and non-personal interpretive techniques. Parks Canada may present park themes and messages directly or indirectly through cooperative arrangements.

4.2.5
Parks Canada will relate park themes and messages to broader environmental issues to provide the public with opportunities to acquire the knowledge and skills to make environmentally responsible decisions.

4.2.6
Parks Canada will provide interpretation programs on challenges to maintaining the ecological integrity of national parks in order to foster greater public understanding of the role that protected spaces play in a healthy environment.

4.2.7
Information on a park and its themes will be accessible to all visitors. Where the location of a service or facility illustrating the themes prevents access by persons with disabilities, special programs or services will be offered.

4.2.8
Institutions and groups may be permitted to use the parks for educational activities or research, in ways that do not impair the ecosystem or limit enjoyment by other users.

4.2.9
Parks Canada will be responsible for the preparation and presentation of interpretation programs and special events. In meeting this objective, Parks Canada will welcome and seek the assistance of informed individuals, professionals, and interest groups.

4.3
Visitor Services and Facilities

4.3.1
Parks Canada, working in cooperation with others, will offer high-quality visitor services by ensuring park resources do not deteriorate, and that quality visitor experiences are not diminished.

4.3.2
Parks Canada will cooperate with the tourism sector towards fulfilling public needs for a broad range of essential services and facilities within the regions surrounding national parks, particularly as they relate to the practice of environmentally sustainable tourism. To avoid impacts on park ecosystems and to contribute to regional economic development, the location of commercial services and facilities should take place in adjacent communities. Parks Canada will locate its own administrative facilities outside the parks wherever possible provided that the location would have the least impact on a shared ecosystem.

4.3.3
Certain services and facilities are essential for public access to, as well as understanding, appreciation and enjoyment of, heritage areas. Provision of such services and facilities within national parks will be based upon the following considerations:
• impacts on the ecosystem as well as on specific natural and cultural resources;
• contribution to the interpretation of park themes and messages;
• heritage character and historical appropriateness;
• types of opportunities and activities appropriate to the area, as set out in management plans;
• a high degree of concern for site planning and choice of construction materials;
• environmentally appropriate design, aesthetics, architectural motif, and energy conservation; and
• the needs and expectations of visitors, consistent with park objectives.

4.3.4
Within national parks, essential services and facilities will serve the basic needs of the public, and will be directly related to the provision of understanding, appreciation and enjoyment of the natural and cultural heritage. While protection of the environment and heritage resources is paramount, Parks Canada is committed to the principles of service excellence. Normally, services and facilities will be grouped together within appropriate zones for energy conservation and protection of park resources, public convenience and equality of access.

4.3.5
The involvement of the public including private and voluntary organizations, such as cooperating associations and the Canadian Parks Partnership, will be encouraged in the planning, development and operation of appropriate services and facilities for visitors in national parks.

4.3.6
The setting of rates controlled by Parks Canada for use of services and facilities provided either by Parks Canada or by private enterprise should take into account such market factors as supply and demand, and the price, quality and location of related services outside national parks.
4.3.7
Parks Canada will continue to develop and adopt architectural and environmental design guidelines and standards for each park so that the scale, site, accessibility, form, aesthetics and function of structures are in harmony with the setting.

4.4
Access and Circulation

4.4.1
Where feasible, access and circulation within national parks will be designed to supply opportunities for understanding, appreciation and enjoyment for visitors of all ages, skills and physical abilities. Special information programs will be offered where direct access is excessively challenging or inappropriate. All access and circulation will be defined in management plans and conform with zoning.

4.4.2
Non-motorized means of transportation will be favoured in national parks wherever feasible. Public transit for park purposes will be preferred where special circumstances warrant.

4.4.3
Access by private or commercial aircraft within national parks will not be allowed except to remote areas where reasonable travel alternatives are not available; where it has been authorized through the management planning process and specified by regulation; and under strict controls designating landing sites, times, flight lines, altitudes and any special conditions related to resource protection, including wildlife harassment or the enjoyment of the park by other visitors.

4.4.4
Roads and trails may be constructed if their primary function is to serve park purposes, they have been approved under the park management plan and they meet the full requirements of the Federal Environmental Assessment and Review Process. New roads and trails that constitute through routes designed to serve other than park purposes will not be considered.

4.5
Visitor Accommodation

4.5.1
Within national parks, preference will be given to basic accommodation facilities such as campgrounds, hostels and shelters which enhance visitors' understanding, appreciation and enjoyment of the parks' special values and which provide access to additional, enjoyable park experiences including a range of appropriate recreational opportunities.

4.5.2
In particular, camping opportunities, activities and services are directly related to the national park mandate of providing benefit, education and enjoyment to park visitors and, therefore, will be the principal form of accommodation made available to the majority of park visitors.

4.5.3
In some national parks, the commercial sector may be invited to provide roofed accommodation due to severe climate conditions and the lack of existing or potential adjacent facilities. Any such facility must not impair the wilderness experience of others, will be assessed within the management planning process, and if authorized must stringently conform to the zoning plan.

4.5.4
Where commercial accommodation is provided within national parks, it will enhance understanding, appreciation and enjoyment of natural settings; provide access to additional park experiences, including a range of recreational opportunities; and be available for use by the general public.

5.0
Historical Activities and Infrastructure

When Canada's national park system was born at
Banff over a century ago, there was still a vast wilderness in Canada and a different perspective prevailed on the values and purposes of national parks. It was not deemed inappropriate to establish permanent and seasonal communities within national parks to serve the needs and wants of the park visitors. Similarly, some parks were created around national transportation corridors more for their scenery and tourism appeal than for other natural heritage considerations. Such development is part of the national park history. The communities and recreational facilities, including golf courses and commercial downhill skiing areas, continue to provide enjoyment and livelihood for a large number of park visitors and residents.

Through careful planning and consultation with all stakeholders, Parks Canada manages these park communities, transportation corridors and recreational developments in ways that minimize impairment to the ecological integrity of the parks. The communities in the national parks and the way they are managed represent a unique opportunity to demonstrate the overriding values of ecological integrity, environmental citizenship, environmental stewardship and sustainable development through applied research and partnership.

Nonetheless, given the limited range of unspoiled wilderness left in Canada, it is inappropriate to establish additional communities or intensive infrastructure for recreation in existing and future national parks.

5.1 National Park Communities

Because of their size, permanent population, year-round services and extensive municipal infrastructure, the communities of Banff and Jasper are classified as Towns. They are communities considered to have tax bases adequate to support a form of local self-government. Accordingly, by agreement with the residents and under the enabling provisions of the *National Parks Act* amendments, Parks Canada began negotiating the transfer of municipal taxing, utility and planning authorities to the Town of Banff in 1988. On January 1, 1990, the Town became an officially incorporated Alberta municipality under conditions set by a federal provincial agreement. Official designation as Visitor Centres is given to communities that provide a focus for and concentration of visitor activity services and facilities. Waterton, Wasagaming and Waskesiu are classified as Visitor Centres, in addition to being the administrative headquarters of Waterton Lakes, Riding Mountain and Prince Albert National Parks, respectively. Visitor use of these centres is primarily seasonal and they offer a limited range of facilities. Land was provided for seasonal cottage residence in each of these communities in past years when such use was considered appropriate.

Lake Louise is also a Visitor Centre but, along with Field in Yoho, does not contain areas for cottage residence. At Lake Louise all residential land is either used for government housing or tied to commercial leases and developed as staff accommodation. Field, meanwhile, is a largely residential community accommodating the administrative centre for the park as well as an operational centre for the Canadian Pacific Railway.

Resort Subdivisions are summer seasonal cottage subdivisions established early in the history of Jasper, Wood Buffalo, Prince Albert and Riding Mountain National Parks.

5.1.1

The boundary of the Town of Banff has been established by a Town Plan prepared in conjunction with the park management plan, and has been set out in the *National Parks Act*. The same provision will apply to the Town of Jasper if the residents opt for self-government measures in the future.

5.1.2
No new communities will be developed within national parks.

5.1.3
Statements of principles governing the management of park communities may be developed, and then be approved by the Minister.

5.1.4
No additional lands will be made available for private cottages and camps or seasonal camping areas.

5.1.5
Where there is a community in a national park, a community plan will be prepared based on direction contained in the park management plan. Community plans will be approved by the Minister.

5.1.6
Parks Canada will encourage the establishment of community groups to advise park superintendents on matters affecting local interests.

5.1.7
The Crown in Right of Canada will continue to own the land in all national park communities. The Minister will give final approval to community plans and land use regulations or bylaws based upon community plans, and will be the final authority on planning matters.

5.1.8
Where Parks Canada retains exclusive community government authorities, charges and taxes to be levied for municipal and health services will be based on cost accounting data and the municipal taxing practices of the province in which a park is located.

5.2
Golf Courses and Commercial Ski Areas

5.2.1
Due to the amount of land they require and the need for intense manipulation of natural regimes, no new golf courses will be constructed in national parks and expansions to existing golf courses will not be considered.

5.2.2
Due to the pressures placed on alpine and subalpine environments, the 1988 National Parks Act amendments prohibited development of new commercial skiing areas inside the national parks. The five existing commercial alpine skiing areas will be managed within their legislated boundaries according to long-range development plans approved by the Minister and subject to public consultations.

6.0
Land Tenure and Residency

Although there is limited application in new national parks, tenure and residency provisions apply across the system as described below.

6.1
Land Tenure

6.1.1
Limited tenure may be granted on national park lands in the form of permits, leases, or licences of occupation for the provision of essential services and facilities for park visitors and for authorized residential uses.

6.1.2
Upon the expiry of a lease, licence, or permit of occupation, where not already provided in an existing agreement, a replacement instrument may be negotiated if the purpose is supported by the park management plan; if the holder has complied with the terms and conditions of the expiring agreement; and if the granting of a replacement agreement is consistent with federal government policy on fair access.
6.1.3
Parks Canada will acquire leasehold interests in national parks where a park management plan identifies that the leasehold lands or facilities are required for public purposes.

6.2
Residency

6.2.1
Persons who have established a need to reside in a national park as defined in regulations will be entitled to acquire the appropriate instrument of tenure for as long as the need to reside status is maintained.

6.2.2
Residents of national parks will live in park communities or on the sites of their work stations.

6.2.3
Condominium ownership of private accommodation will be allowed for those who have established a need to reside in park communities as defined in regulations.
NATIONAL MARINE CONSERVATION AREAS POLICY
NATIONAL MARINE CONSERVATION AREAS POLICY

BACKGROUND

OBJECTIVE

1.0 The National Marine Conservation Areas System

1.1 Identifying Representative Marine Areas

1.2 Selecting Potential National Marine Conservations Areas

1.3 Assessing National Marine Conservation Areas Feasibility

1.4 National Marine Conservation Areas Agreements

1.5 Establishing National Marine Conservation Areas in Legislation

2.0 Management Planning

3.0 Managing the Use of National Marine Conservation Areas

3.1 Ecosystem Management

3.2 Protection and Compliance

3.3 Fishing and Aquaculture

3.4 Marine Transportation

4.0 Public Understanding, Appreciation, and Enjoyment of National Marine Conservation Areas

4.1 Management of Visitor Activities

4.2 Interpretation and Public Education

4.3 Visitor Services and Facilities

4.4 Tenure
In Canada, the establishment of marine protected areas is in its infancy. Although a national marine parks policy was produced in 1986, it was not based on practical experience. Since then, further study and consultation have led to a clarification of the concept that demonstrates the differences between terrestrial national parks and the needs for marine area management.

As proposed in these new policy statements, "national marine parks" are better classified as "national marine conservation areas." These areas would have a highly protected core made up of Preservation Zones I and Natural Environment Zones II, as well as multiple-use Conservation Zones III.

As Parks Canada acquires operational experience in the establishment and management of marine conservation areas, it will be necessary to reassess elements of this policy to ensure that they are workable. Appropriate consultation will occur before any changes are made to the policy.
BACKGROUND

Context for Policy Revisions

The creation of marine protected areas has become an urgent concern of many coastal states. To accelerate the establishment of a Canadian system of marine protected areas, Parks Canada developed a policy for the establishment of national marine parks. It received Ministerial approval in 1986 following extensive public consultations.

Since then, an agreement was signed in 1987 with Ontario to establish Fathom Five in Georgian Bay as Canada's first national marine park. In 1988, Canada signed an agreement with British Columbia calling for the creation of a marine park at South Moresby in the Queen Charlotte Islands, and with Quebec in 1990 to examine the feasibility of establishing a joint federal provincial marine park at the confluence of the Saguenay Fiord and St. Lawrence Estuary. These new marine park proposals, as well as preliminary work on other park proposals, have provided considerable practical experience and opportunity for Parks Canada staff to work with officials from other government agencies and the public to implement the 1986 policy.

During this period, considerable effort has been spent at the national and international levels examining the fundamental principles and practices associated with planning and managing systems of marine protected areas. At the national level, Parks Canada and various advisory groups, interest groups and universities have sponsored several workshops, seminars and publications providing valuable insight and support for the establishment of marine protected areas in Canadian waters. As well, public consultation on the proposed revision to this policy has provided many useful suggestions.

At the international level, the 4th World Wilderness Congress (1987) and the 17th General Assembly of the International Union for the Conservation of Nature (IUCN) (1988) passed important resolutions setting out a broad policy framework for the planning and management of marine protected areas. In 1992, the IUCN prepared more detailed guidelines on marine protected areas that were tabled at the 4th World Congress on National Parks and Protected Areas.

The international community is urging all states to develop national and global representative systems of marine protected areas in order to meet the objectives of the World Conservation Strategy. Citing the Parks Canada approach as a possible model, coastal states are urged to develop a biogeographical classification system to aid in the selection of a truly representative system of marine protected areas. To help ensure their long-term viability, they urge that the establishment of marine protected areas be based on a high level of cooperation between the public and all levels of government. Furthermore, the areas set aside should be relatively large and managed on a sustainable basis.

While the basic tenets of the 1986 National Marine Parks Policy remain, the revised policy responds to the broad experience gained at all levels over the past several years, and to recent public comments. Policies have required some restructuring and clarification and some new principles and concepts have been introduced which Parks Canada hopes will facilitate the planning and management of a national system of marine protected areas in Canada. One of the changes made has been to refer to these areas as "national marine conservation areas" instead of "national marine parks." Parks Canada believes that this designation more accurately reflects the purpose and objectives of these areas.

Management and Planning Considerations in
the Marine Environment

The policy recognizes that planning and management considerations in the marine environment differ from those associated with terrestrial national parks.

Differences in the nature of marine ecosystems are a fundamental consideration. For example, terrestrial parks are usually associated with semi-closed ecosystems dominated by components that are essentially fixed in space and subject to rates of change over relatively long periods of time. On the other hand, marine protected areas are almost always associated with open ecosystems that are large and dynamic and where rates of change associated with many important ecological processes involve relatively little time. Several pelagic, demersal and anadromous fish species and many of the marine mammals and invertebrate species undertake far-ranging migrations associated with their feeding or reproductive cycles.

The water column is the fundamental component in most marine ecosystems. The density of sea water allows it to suspend and transport materials over great distances and thereby link geographically isolated areas. It provides a transportation medium for pollutants that enter the sea from the atmosphere or from terrestrial run-off, and renders marine protected areas vulnerable to a wide range of potentially harmful downstream effects. This characteristic also generally affords marine ecosystems a greater capacity for natural regeneration than their terrestrial counterparts. The water column sustains primary production and provides for most of the habitat requirements of marine plants and animals (including benthic communities) through the transportation of nutrients, food and their larvae.

The nature and effect of human activities in the marine environment also differ from those on land. Maintaining the structural integrity of terrestrial ecosystems due to habitat loss and fragmentation associated with activities such as forestry, agriculture and transportation are usually critical concerns on land. However, they are less of a concern in marine environments. (Exceptions apply to estuarine and near-shore areas.) Of far greater concern in the sea are the effects of pollution and over-exploitation of resources that gradually alter physical, chemical and biological processes in ways that are not often immediately apparent.

It is important to understand that, for the most part, our knowledge of marine ecosystems lags far behind that of terrestrial ecosystems. Furthermore, the technology available to study marine ecosystems is not as extensive or as revealing as that used on land, and the logistics of operating in the marine environment make marine research a generally costly proposition.

The complexity of legislation and jurisdictions affecting the marine environment is also a significant consideration. For example, within Canada, there are at least 36 federal acts and 20 provincial and territorial acts together with numerous international conventions and accords that relate to the protection and use of the marine environment and marine resources. In view of the openness of marine ecosystems and the high degree of connectivity between marine environments and between these and upstream terrestrial activities, the long-term viability of marine protected areas will require close collaboration and cooperation across many jurisdictional boundaries.

The policy also recognizes the need for flexibility in the approach to the planning and management of these areas since from region to region, Canadians view the marine environment and the role of marine protected areas quite differently. This is a reflection of strongly held social and economic values concerning the protection and use of the marine environment and its resources. While Parks Canada believes these areas must make a meaningful contribution to the protection of Canada's marine heritage, it also believes that the objectives for these areas are unlikely to be
achieved without the cooperation, support and continued involvement of those most directly affected by their establishment.

In addition to their natural features, most national marine conservation areas contain significant cultural resources. These will be managed according to the Cultural Resource Management Policy found in Part III of this document.

The Concept of A National Marine Conservation Area

In keeping with guidance from the IUCN, Parks Canada is committed to establishing a system of marine protected areas that is representative of the full range of Canada's marine environments. For this reason, and to assist in their effective conservation, these areas will ideally be quite large. For example, the proposed study area for the Gwaii Haanas National Marine Conservation Area encompasses 3,180 km$^2$ of coastal waters.

National marine conservation areas will include the sea bed, its subsoil and the overlying water column. In coastal areas, they may include wetlands, river estuaries, islands and other coastal lands. However, they may also be established wholly offshore to protect marine areas some distance from Canada's coastline.

Since marine protected areas are vulnerable to downstream effects associated with adjacent terrestrial areas, establishing a marine conservation area in proximity to an existing national park or another protected area could provide additional protection to a conservation area.

The management philosophy associated with national marine conservation areas will differ from that in terrestrial national parks in one very important respect. Instead of trying to protect marine ecosystems in a state essentially unaltered by human activity, which is the primary goal in terrestrial national parks, management effort in national marine conservation areas will be directed towards the conservation of these areas in the sense that it is defined in the World Conservation Strategy. Therefore, the focus will be on the management of a wide range of human activities to ensure the greatest sustainable benefit to present generations while maintaining the potential of the area to meet the needs and aspirations of future generations. In this context, conservation embraces a number of management concepts including preservation, maintenance, sustainable use, and restoration of the natural marine environment.

The success of this program will hinge on the establishment of integrated management systems which, ideally, should help to coordinate the management of marine and terrestrial areas well beyond the boundaries of a national marine conservation area. In some cases, this would involve the participation of Parks Canada in integrated management programs sponsored by other agencies. In other instances, it will require that Parks Canada take a lead role in facilitating and coordinating the efforts of government and non-government agencies and affected users to collaborate and share in the stewardship of these areas. In the long term, it is hoped that these areas might serve as models for a more holistic approach to the planning and management of marine environments.

An essential feature of all national marine conservation areas will be the setting aside of some zones for protection purposes. These zones will recognize the existence of particularly significant and vulnerable ecosystem components or cultural resources, their importance for ecological research or environmental monitoring, and their potential for non-consumptive recreational use and public education. These zones would be identified during the preparation of a proposal to create a national marine conservation area.

While amendments were made to the National Parks Act in 1988 to allow for the establishment of marine protected areas on an interim basis, new
legislation will be required to better reflect the mandate and overall responsibility of the Minister for the administration, control and coordinated management of national marine conservation areas to ensure the protection of their associated marine ecosystems. This legislation must also recognize the responsibilities of other federal and provincial ministers in areas such as the administration and control of fisheries, navigation and shipping.

**OBJECTIVE**

To protect and conserve for all time national marine areas of Canadian significance that are representative of the country's ocean environments and the Great Lakes, and to encourage public understanding, appreciation and enjoyment of this marine heritage so as to leave it unimpaired for future generations.

1.0 The National Marine Conservation Areas System

National marine conservation areas are intended to conserve representative examples of Canada's marine environments, coastal zone, and Great Lakes. Based on current scientific information, Canada's oceans and Great Lakes have been divided into 29 marine regions, each of which warrants representation in the system of national marine conservation areas. Efforts to create new marine conservation areas are concentrated on those marine regions that are unrepresented.

Establishment of new marine conservation areas will be guided by the National Marine Conservation Area System Plan. The Plan will provide a description of the 29 marine regions, and the status of system planning for each. Parks Canada will periodically update the Plan, including the listing of representative marine areas identified during regional analysis studies. In addition, Parks Canada will keep an Action Plan up to date to describe the activities that must be undertaken to complete the representation of each of the marine regions.

Parks Canada, acting alone, cannot protect all the areas identified as representative of Canada's marine regions. But by making public the Systems Plan and Action Plan, Parks Canada hopes to encourage other public agencies and appropriate private organizations to work to protect areas that will not be included within the national marine conservation area system.

Public support and the cooperation of other levels of government are essential in establishing new national marine conservation areas or adjusting the boundaries of existing ones. The establishment process is therefore based upon public consultation and intergovernmental cooperation.

There is no rigid process for establishing national marine conservation areas. Each situation is unique and the steps leading up to their creation will reflect individual circumstances. The normal sequence, however, is characterized by five steps: identifying representative marine areas; selecting a potential national marine conservation area; assessing marine conservation area feasibility; negotiating a marine conservation area agreement; and establishing a new national marine conservation area in legislation. The following policies related to marine conservation area establishment are grouped under these headings.

1.1 Identifying Representative Marine Areas

1.1.1 Representative marine areas will be identified for those marine regions that are not represented in the system. The following criteria are used:

i) the area must portray the geological, oceanographic, biological and ecosystem diversity that is characteristic of the marine region; and

ii) the area's ecosystems must be in a healthy, natural state, or, if they are stressed or significant environmental
degradation has taken place, restoration and maintenance of their essential structure and function must be considered feasible.

1.1.2 Representative marine areas will be identified in consultation with provincial and territorial governments, other federal agencies and with the interested public.

1.1.3 Representative marine areas will be identified regardless of the current protected status or jurisdiction.

1.2 Selecting Potential National Marine Conservation Areas

1.2.1 Potential national marine conservation areas will be selected from among the representative marine areas, in those marine regions which do not already have adequate representation in the system of marine conservation areas.

1.2.2 In selecting potential national marine conservation areas, consideration will be given to a wide range of factors including:

i) the extent to which the area represents the ecosystem diversity of the marine region;

ii) the degree to which the area contributes to the maintenance of essential ecological processes and life support systems for downstream areas (e.g., the protection of nursery or juvenile rearing areas);

iii) the importance of the area in maintaining biodiversity and protecting critical habitats of rare, threatened or endangered species;

iv) the occurrence of exceptional natural phenomena and cultural resources;

v) the existing or potential value of the area for ecological research and monitoring;

vi) opportunities for public understanding, education and enjoyment;

vii) possible threats to the long-term sustainability of the area's marine ecosystems as well as those of the surrounding lands;

viii) minimizing conflict with existing or probable marine resource uses such as significant commercial fishing areas, mineral or energy resources, navigation routes or defence exercise areas;

ix) complementarity with the objectives of existing or planned protected marine or coastal areas of other jurisdictions in the marine region;

x) the potential of establishing an adjacent national park or national park reserve representative of its natural region;

xi) the potential to cooperatively manage existing and potential uses of the marine resources within and adjacent to the potential marine conservation area on a sustainable basis, compatible with the objective of protecting its biotic resources and other park values; and

xii) the implications of comprehensive land claims and treaties with Aboriginal peoples.

1.2.3 A composite national marine conservation area consisting of two or more non-contiguous areas may be considered where it will facilitate achieving marine conservation area identification and selection objectives.

1.2.4 Potential national marine conservation areas will be selected in consultation with provincial and territorial governments, other federal agencies, non-government organizations, and the interested public.
Assessing National Marine Conservation Areas Feasibility

1.3.1
To initiate an assessment of the feasibility of a marine conservation area, Parks Canada will first consult with other federal departments and agencies, provincial and territorial governments and seek their cooperation and support.

1.3.2
Parks Canada will then initiate discussions with local communities and affected user groups to seek their cooperation in conducting a feasibility study, to determine the best timing and process for their active participation, and how to incorporate the knowledge of individuals living and working in the area.

1.3.3
As a guide, the feasibility study should include recommendations on the conservation and management objectives of the area, its boundaries, a draft zoning plan as described in section 2.1.0 with a description of the purpose and objectives of each zone and the uses that will be permitted, including fishing. It should also identify specific issues of concern to local communities and affected user groups and, when possible, recommend how they could be addressed.

1.3.4
In proposing the boundaries of a potential national marine conservation area, every effort will be made to establish an area with a size and configuration that:

i) protects a wide diversity of marine ecosystems representative of the marine region;

ii) accommodates the habitat requirements of viable populations of marine species that are native to the marine region;

iii) does not fragment sensitive, highly diverse or productive marine communities;

iv) protects exceptional marine phenomena, and rare, threatened or endangered marine wildlife and plants;

v) includes important sites for ecological research and monitoring;

vi) offers opportunities for public understanding and enjoyment;

vii) results in minimum long-term disruption of the social and economic life in the surrounding region; and

viii) does not encompass permanent communities.

In addition, consideration may be given to including submerged cultural features or coastal/island sites which are significant in portraying human use of marine resources within a proposed national marine conservation area.

1.3.5
As part of the feasibility assessment, Parks Canada will cooperate with those federal departments or provincial/territorial governments responsible for assessing the renewable and nonrenewable natural resource potential of the proposed marine conservation area. Any associated field activities will take into account the natural and cultural qualities which recommend the area for marine conservation area status.

1.3.6
Boundary adjustments intended to improve the representation of an existing marine conservation area or its ecological integrity will be assessed according to the above policies.

National Marine Conservation Areas Agreements

1.4.1
National marine conservation areas will be established pursuant to agreements with the concerned provincial or territorial governments, federal departments and agencies, and with Aboriginal organizations, as appropriate.
1.4.2
The Crown in Right of Canada will own all land, including the sea or lake bed and its subsoil, within a national marine conservation area. Private lands and interests will be acquired by negotiated settlement, and term interests may be allowed to expire.

1.4.3
The agreement will describe the boundaries of the national marine conservation area, and will stipulate the role(s) of concerned government departments and agencies, any local communities and affected user groups, as well as interested non-government organizations and the public in the cooperative stewardship, planning and management of the marine conservation area.

1.4.4
Parks Canada will take a lead role in developing cooperative arrangements with all concerned parties for the complementary use and management of resources within a national marine conservation area.

1.4.5
Commercial exploration, extraction or development of nonrenewable resources and ocean dumping will not be permitted within a national marine conservation area.

1.4.6
Parks Canada and the provincial and federal governments will foster opportunities for local residents to find employment and business opportunities related to the operation of national marine conservation areas.

1.4.7
Where the resources of a marine conservation area are, or may be, significantly impacted by upstream pollution sources, Parks Canada will cooperate with government and non-government agencies at the local, provincial, territorial, federal and international levels in order to monitor water quality and endeavour to prevent or mitigate pollution effects.

1.4.8
Prior to the establishment of a marine conservation area, Parks Canada will prepare a report setting out the area's purpose and objectives, boundaries agreed to, zoning plan, and the various agreements made with other governments and federal departments for the cooperative management of the marine conservation area.

1.5
Establishing National Marine Conservation Areas in Legislation

1.5.1
Marine conservation areas will be formally established by the Parliament of Canada through amendment to the National Parks Act or in accordance with new legislation respecting the establishment of national marine conservation areas.

1.5.2
When new national marine conservation areas are established in conjunction with the settlement of land claims of Aboriginal peoples, the final boundaries as well as harvesting rights and involvement of Aboriginal peoples in planning and management will be proposed in legislation according to the terms of the land claim agreement. In the interim, the area may be set aside as a "national marine conservation areas reserve" under the Act and traditional hunting, fishing and other marine resource based activities by entitled Aboriginal peoples will continue.

2.0
Management Planning

The goal of a national marine conservation area management plan is to provide for sustainable use of the area consistent with the need to maintain the structure and function of marine ecosystems. The plan provides guidance to marine conservation area managers and users about the
day-to-day management and use of the area. It also outlines how the Minister responsible for Parks Canada proposes to conserve the area's resources in keeping with the provisions of the *National Parks Act*.

Management planning is an iterative process: plans must be prepared within five years of the area's proclamation and be reviewed and amended as necessary every five years thereafter. Since planning decisions are inevitably based on incomplete knowledge of the area's resources, plans will always lean to the side of caution when prescribing reasonable levels of use. However, through continuing cooperative and inter-disciplinary approach, information about the physical, biological and socio-economic characteristics of the area will be compiled and interpreted to avoid uncertainty in decision-making.

Zoning is an essential part of the national marine conservation area management plan. Its main purposes are to define and map the different levels of protection and use that will occur in the marine conservation area and to separate potentially conflicting human activities. Zoning must be comprehensive but also as simple as possible to ensure it can be readily understood by the public, and be translated into management actions and regulations that are easy to comply with and enforce. To avoid unnecessary regulation of human activities, each zone will have clear and justifiable objectives.

The three proposed marine conservation zones reflect a continuum of protection and use. Different levels of protection and use will be permitted in each zone, or at different times.

Temporal and vertical zoning may provide flexibility and objectivity in harmonizing use. For example, temporal zoning could prohibit visitor access to, or commercial fishing near, a particular fish spawning ground, sea bird colony or whale calving area during the reproductive season but allow it throughout other, less critical periods. Depending on the factors involved, the time span may be long term, seasonal, cyclical or even diurnal. Vertical zoning may also be appropriate in some situations where, for example, certain benthic species or habitats require absolute protection while fishing, transportation or recreational uses continue at or near the surface of the water column.

In some cases, environmentally or culturally sensitive sites may require special management but do not fit the zoning designations below. Management plans will include the guidelines necessary for the protection and use of such sites. In other cases, a marine conservation area may encompass an existing protected area where the degree of protection and use allowed does not correspond precisely to the national marine conservation area zoning definitions. In this situation, where the existing protected area contributes to the overall purpose and objectives of the conservation area, it may be designated as a special use zone to ensure its function and identity remain intact.

2.1 Parks Canada will adopt an inter-disciplinary approach to management planning to ensure a broader perception and understanding of issues, and the development of solutions to problems that are more comprehensive, far-reaching and durable.

2.2 Parks Canada will prepare management plans for the Minister's approval and tabling in Parliament within five years of an area's proclamation under the *National Parks Act* or other legislation. Management plans will be reviewed every five years thereafter.

2.3 Maintaining the structure and function of marine ecosystems will be a first priority when considering the zoning and management of visitor use and renewable resource harvesting activities.
2.4 Cultural resources will be managed in accordance with the Cultural Resource Management Policy.

2.5 Each management plan will contain a statement of the purpose and objectives of the marine conservation area in the national system and in the marine region in which it is located. As well, it will detail the specific protection and use objectives of each designated zone.

2.6 Parks Canada will inform and involve a broad spectrum of the Canadian public in the preparation, review and amendment of management plans.

2.7 A management advisory committee will be formed for each conservation area to ensure regular consultation and direct involvement of resource users and residents of the surrounding region in the preparation and implementation of the management plan.

2.8 Parks Canada will cooperate with other federal agencies and levels of government, private organizations and individuals involved in the planning and management of areas adjacent to marine conservation areas to ensure that research, management and regulatory programs, facilities and services are integrated in effective and economical ways.

2.9 Management plans for national marine conservation areas which have additional international and national designations such as World Heritage Site, Biosphere Reserve or National Historic Site, will include strategies for protection and promotion of the values that resulted in the additional designations.

2.10 The national marine conservation area zoning system will apply to all land and water areas of national marine conservation areas, and will state the specific protection and use objectives of each designated zone. Parks Canada will monitor the degree to which those objectives are being achieved and assess the validity of the designation during the review of the management plan.

The zoning provisions outlined below are intended to serve as a guide only. They may change as Parks Canada acquires planning and management experience in several marine conservation areas. Also, an alternative zoning system may be recommended for a national marine conservation area during the feasibility study.

2.10.1 Zone I (Preservation) - Areas will be considered for Zone I designation when their management objectives involve protecting:

i) habitats deemed critical to the survival and maintenance of depleted, vulnerable, threatened or endangered species;

ii) habitats of more common species and communities that are particularly sensitive to human disturbances;

iii) unique or best examples of a natural feature;

iv) cultural resources of national historic significance or of historic significance;

v) areas considered important for long-term environmental monitoring or ecological research.

In Zone I areas, renewable resource harvesting will not be permitted. Visitor use will not normally be allowed but in certain cases, where the public education benefits are high, provisions may be made for limited and closely supervised visitor access. Permanent facilities will not be permitted, unless they are essential for public safety or the protection of natural features.

2.10.2
Zone II (Natural Environment) - Areas will be considered for Zone II designation when their management objectives involve:

i) creating a buffer zone around Zone I areas in order to enhance protection of its special habitats or features;
ii) protecting highly representative areas that provide opportunities for non-consumptive recreational use and public education in as natural a setting as possible; and
iii) conducting environmental monitoring and research projects in which public education is an integral part of the study program.

In Zone II areas, renewable resource harvesting activities including recreational hunting and fishing will be prohibited. Research, public education and low-intensity outdoor recreation will be permitted. Where practical and safe, the use of non-motorized transportation would be encouraged. Only minimal facility development would be allowed.

2.10.3 Zone III (Conservation) - Areas will be considered for Zone III designation when their management objectives involve:

i) renewable resource harvesting activities, aquaculture and marine transportation; or
ii) providing opportunities for a broad spectrum of outdoor recreation and public education activities.

In Zone III areas, provision will be made for reasonable use consistent with maintaining the structure and function of marine ecosystems. Hunting may be permitted in designated areas on a conservative basis, subject to ongoing population assessments and visitor safety concerns. Permanent facilities for conservation area administration, public education, visitor services and accommodation would be allowed.

2.10.4 Zones of a marine conservation area may be subject to temporary access or use restrictions when specific components or functions of a marine ecosystem require additional protection. These temporary zoning restrictions may be seasonal, cyclical, diurnal (on a daily or nightly basis), or combinations thereof, as warranted.

2.10.5 Vertical zoning may be used to provide more protection to natural or cultural resources at or near the sea floor while recreational, transportation or near-surface fishing activities continue above.

2.10.6 Changes to an area's zoning, including provisions for temporal and vertical zoning, will only be made following public notice and public participation in the decision.

2.10.7 Establishing and maintaining a core of Zone I and II areas will be an essential feature of all national marine conservation areas.

3.0 Managing the Use of National Marine Conservation Areas

Managing the use of national marine conservation areas will be based on the "ecosystem management" concept. This involves adopting a holistic view of the natural environment, ensuring that decisions consider the dynamic and interactive nature of ecosystems, human activities within the ecosystems, and their finite capacity to recover from stress caused by human disturbances.

To be effective, ecosystem management must have a broad base of support. It requires understanding and collaboration among all those who directly use the area or who influence the ecological integrity of a marine conservation area by their activities in the surrounding hinterland.
Forging strong partnerships is also important, particularly in research and environmental monitoring where user groups, universities, conservation organizations and the private sector have much to contribute.

Ecosystem management must be based in science. Adequate baseline information about the physical, oceanographic and biological characteristics, and existing and potential uses of the conservation area is required to guide planning and management of the area and to develop public education programs. Monitoring is required to detect changes occurring in the marine environment and to determine whether these are due to natural causes or to stress caused by human activities.

3.1 Ecosystem Management

3.1.1 Measurable goals and management strategies will be formulated for each national marine conservation area to ensure the protection and maintenance of its ecosystems.

3.1.2 Where marine ecosystems or components thereof have been seriously degraded, Parks Canada will initiate restoration programs in cooperation with others.

3.1.3 When a marine species which spends a part of its natural life cycle in a marine conservation area is adversely affected by human activities outside the area, Parks Canada will cooperate with Canadian and international regulatory agencies to promote its conservation throughout its range.

3.1.4 Extirpated species that are native to the marine conservation area may be reintroduced after research has shown that reintroduction is likely to succeed and that its probable effects are acceptable within the conservation area and the surrounding region.

3.1.5 The introduction of exotic plants or animals into the wild in a marine conservation area will not be permitted.

3.1.6 Federal environmental assessment and review legislation will be implemented in conservation areas in an exemplary fashion. Parks Canada will also review and comment upon environmental impact assessments for proposed developments that are near established or potential marine conservation areas.

3.1.7 Parks Canada will encourage understanding and cooperation in achieving marine area conservation goals by participating in regional sea and coastal zone planning programs sponsored by other jurisdictions and interested parties.

3.1.8 To promote science-based management, Parks Canada will work with others in compiling and analyzing baseline information on the physical, oceanographic and biological characteristics of the marine conservation area and surrounding lands, use of marine resources within this geographic area and their effects.

3.2 Protection and Compliance

3.2.1 Parks Canada will implement appropriate regulations under the National Parks Act or other statutes in accordance with management and zoning decisions set out in the approved conservation area management plan.

3.2.2 Parks Canada, in cooperation with other law enforcement agencies, will monitor compliance with the marine conservation area regulations that have been implemented to protect marine
ecosystems, maintain the public peace and protect life and property. Strict enforcement action will be taken to detect and stop illegal activities such as poaching.

3.2.3
The public will be consulted in the development of regulations applicable to marine conservation areas, and visitors will be made aware of the rationale for such regulations.

3.2.4
Under the National Parks Act, Parliament must approve new pipeline or submarine cable rights of way through a national marine conservation area while the Governor in Council retains authority to alter existing rights of way. The Minister will recommend that new or altered corridors be authorized only where it is demonstrated that, relative to alternative routes or modes, a new or altered route:

i) will provide significant economic advantages; and

ii) will not significantly increase damage or long-term risk to the area's marine environment.

All such proposals will be subject to the Federal Environmental Assessment and Review Process and must be constructed and operated so as to satisfy all environmental impact mitigation measures that have been agreed upon.

3.3
Fishing and Aquaculture

3.3.1
Fishing is an appropriate activity in Zone III areas, subject to protecting the conservation area's ecosystems, to maintaining viable stocks, and to attaining the purpose and objectives of the marine conservation area.

3.3.2
Aquaculture may be permitted in Zone III areas if it does not impair the structure and function of the marine conservation area's ecosystems and does not conflict with other fisheries, navigation, marine outdoor recreation and public education activities.

3.3.3
Fishing and aquaculture closures in Zone I and II areas and changes to fishing and aquaculture practices in Zone III areas will be agreed to between Parks Canada, the Department of Fisheries and Oceans (DFO) and, where applicable, provincial agencies in consultation with the fishing industry, at the time of establishment of a marine conservation area, and reviewed during management planning.

3.3.4
Fishing in national marine conservation areas will be regulated under the provisions of the Fisheries Act. Other statutes may also be used to provide additional protection to marine ecosystems.

3.3.5
Fishing in marine conservation areas will be managed in accordance with fisheries management plans established by DFO. Parks Canada will participate in the negotiation of these plans to secure the protection of marine ecosystems in and around marine conservation areas.

3.3.6
Parks Canada will work cooperatively with DFO and the fishing industry to minimize indiscriminate methods of fishing and the use of gear that is destructive to the sea bed within a conservation area.

3.3.7
Shore based support facilities for fishing will be permitted in Zone III areas if operated in a manner that does not conflict with the purpose and objectives of the conservation area. Parks Canada may contribute to the cost of relocating or upgrading existing facilities that are incompatible with the area's purpose and objectives. Expansion
and improvement will require approval by Parks Canada, DFO and other involved federal or provincial/territorial agencies.

3.3.8
Proposals to introduce any new fishery into a marine conservation area (including aquaculture), not agreed to at the time the conservation area was established, will be considered during the management planning process. These proposals will be subject to the prior completion of stock assessment and environmental impact studies.

3.4
Marine Transportation

3.4.1
Transportation, navigation and aids to navigation, and the operation of pleasure craft in marine conservation areas will be regulated under the Canada Shipping Act and other applicable legislation and regulations.

3.4.2
The routing of new transportation corridors within marine conservation areas will be considered during the management planning process, and will take into account the need for essential services, such as ferries and northern supply routes.

3.4.3
Vessel access to, and movement within, marine conservation areas will be managed in conformity with conservation area objectives and the area's zoning plan in a manner that will:

i) circumvent areas frequented by threatened or endangered species and their habitats;

ii) provide the public with opportunities to understand and enjoy the conservation area;

iii) ensure public safety; and

iv) minimize conflict between commercial and recreational uses.
3.4.4 Traditional Aboriginal and other fishermen's rights of marine access, including over-ice transportation, will be recognized, subject to the requirement of protecting fish and wildlife, including marine mammals, and habitat important to their well-being.

4.0 Public Understanding, Appreciation, and Enjoyment of National Marine Conservation Areas

Parks Canada has an important leadership role in marine environmental education. Its interpretation and public education programs are intended to promote the development of an environmental consciousness in all Canadians and a willingness to take personal and collective action to better protect and maintain the marine environment.

Through interpretation programs, Parks Canada challenges visitors to develop a better understanding and appreciation of the area's marine heritage and the issues affecting it and the surrounding region. Through public education programs, and in cooperation with others, Parks Canada hopes to foster a stronger environmental ethic among all Canadians and to broaden support for marine conservation, including the establishment of marine conservation areas and other marine protected areas. These programs will also promote the wise use and stewardship of marine resources by local people and visitors.

Only recreational activities that are compatible with the long-term protection of the marine conservation area and that allow visitors to enjoy the marine environment for what it is and on its own terms will be encouraged. Visitors will be encouraged to develop the knowledge, skills and camaraderie required to visit marine conservation areas safely with minimal disturbance to the environment and to develop an appreciation and respect for local traditions and ways of life.

In responding to visitor needs for services, facilities and access to marine conservation areas, Parks Canada must act with care and imagination. Their provision will depend on the sensitivity of a particular environment to human impact. Marine conservation areas offer rare and outstanding opportunities to experience and learn about Canada's marine heritage. They cannot, however, accommodate every kind of service and facility requested by the public. The difficulties of access and movement within marine areas make it essential that services and facilities be designed to allow for safe contact with the water.

4.1 Management of Visitor Activities

4.1.1 The Visitor Activity Management Process will be used to match visitor interests with specific educational and outdoor recreation opportunities determined for each marine conservation area through the management plan.

4.1.2 Parks Canada will encourage those outdoor recreational uses of a marine conservation area that broaden visitor understanding and appreciation of the natural environment, and that cause minimal disturbance to the environment, wildlife and local life styles.

4.1.3 In providing opportunities for outdoor recreation, Parks Canada will take into account the different needs of visitors depending on their age, physical capabilities and levels of skill and knowledge to function safely in the marine environment.

4.1.4 Parks Canada will encourage the private sector and non-governmental organizations to provide skills and knowledge development programs to increase visitor understanding and enjoyment of the marine conservation areas.
4.1.5
As new or modified forms of outdoor recreation emerge, each will be assessed for its appropriateness nationally before consideration in the management planning process. Individual management plans will then specify the types and ranges of both new and existing appropriate outdoor recreation activities and their supporting facilities. Parks Canada will also review its national directives periodically to ensure that new forms of outdoor recreation are adequately considered.

4.1.6
An integrated visitor activities data base will be developed and kept up to date for each national marine conservation area to provide, along with research, monitoring and evaluation, the visitor information required for management decisions and state of the parks reporting to Parliament. The information gained will be used to add to or improve existing opportunities, and in the development and review of management plans, service plans, and visitor risk management programs. Both activity data and infrastructure and environment data will be incorporated into risk assessments. Risk control measures will consider the experience needs of the visitor and promote visitor self-reliance accordingly.

4.1.7
Parks Canada will use a variety of direct and indirect strategies for managing public use. Examples of direct strategies include zoning, rationing use intensity, restricting activities, and law enforcement. Examples of indirect strategies include facility design, information dispersal, and cost-recovery mechanisms.

4.1.8
Provisions for public understanding, appreciation and enjoyment of the cultural resources located in national marine conservation areas, and associated activities, services and facilities, will be made in accordance with the Cultural Resource Management Policy.

4.2
Interpretation and Public Education

4.2.1
Parks Canada will cooperate with others in developing marine conservation area interpretation and public education programs that will provide visitors and all Canadians with accurate information of the area's marine ecosystems, key environmental issues and the various programs that have been implemented for the protection and wise use of these ecosystems.

4.2.2
Visitors will be informed of activities permitted in the conservation area, and the services and facilities available to them in the area and surrounding region. In particular, visitors will be made aware of the dependence of local people on the area's marine resources, and will be asked to respect their values and traditions during their visit.

4.2.3
Various marine conservation interpretation programs will be made available to visitors, including those with disabilities, in a manner which causes little or no disturbance to the natural environment.

4.2.4
Parks Canada will cooperate with schools, universities and other learning institutions in developing public education programs, and to encourage the use of marine conservation areas as centres for environmental education and research.

4.3
Visitor Services and Facilities

4.3.1
Parks Canada will only provide facilities and services in marine conservation areas that are deemed essential for interpretation, public education and recreational activities in the approved management plan.
4.3.2
In developing facilities within a marine conservation area, impacts on the area’s resources and established uses such as fishing will be minimized, and due attention will be given to visitor risk management.

4.3.3
The establishment of artificial reefs to attract marine organisms for display purposes, the intentional sinking of vessels or other man-made objects for recreational diving, and similar facilities will not be permitted in marine conservation areas.

4.3.4
Parks Canada will encourage visitors to become familiar with the skills, knowledge and equipment they should have in order to safely undertake outdoor activities in the marine conservation area.

4.3.5
Parks Canada will coordinate accident prevention and search and rescue services in and around marine conservation areas with the Canadian Coast Guard and other agencies involved in public safety.

4.3.6
Parks Canada will work with the tourism sector to fulfill public needs for a broad range of services and facilities adjacent to the marine conservation areas, and will locate its own administrative facilities accordingly.

4.3.7
Private and voluntary organizations, such as cooperating associations, will be encouraged to plan, develop and operate essential visitor services and facilities within a marine conservation area.

4.4

Tenure

4.4.1
No lands or foreshore areas within a marine conservation area will be made available for private cottages, camps, seasonal camping areas, or for any exclusive recreational use by individuals or organisations. In areas where settlement has already occupied shorelines in locations contemplated for a national marine conservation area, the boundary may include such shorelines since they are often important biological areas. In such cases, a shoreline zoning classification system will be developed to regulate nearshore developments.

4.4.2
Limited tenure may be granted on marine conservation area lands and waters in the form of permits, leases, or licences of occupation for the provision of essential services and facilities for visitors.
4.4.3
Upon the expiry of a lease, licence, or permit of occupation (when not already provided in an existing agreement), a replacement instrument may be negotiated if the purpose is supported by the conservation area management plan; if the holder has complied with the terms and conditions of the expiring agreement; and if the granting of a replacement agreement is consistent with federal government policy on fair access.
CANADIAN HERITAGE RIVERS SYSTEMS POLICY
CANADIAN HERITAGE RIVERS SYSTEM POLICY

Creating a National System

2.0
Rivers Under Parks Canada Jurisdiction

3.0
Technical and Financial Assistance
CANADIAN HERITAGE RIVERS SYSTEM POLICY

BACKGROUND

Canada's rivers are keys to the understanding of our country's natural and human history. Virtually all of the nation's freshwater eventually flows through rivers into five different salt water bodies: the Atlantic, Pacific and Arctic Oceans, Hudson Bay, and into the Gulf of Mexico. Modern industrial development has irreversibly changed many rivers through the construction of dams for hydro-electricity and irrigation, and through the disposal of waste into them. There is relentless pressure on Canada's important rivers from industry, agriculture and urbanization.

To help identify, conserve and encourage public use of important rivers, the Canadian Heritage Rivers System (CHRS) was set up as a cooperative program by the federal, provincial and territorial governments. The System is overseen by a Board comprised of representatives appointed by each participating government. Parks Canada and the Department of Indian Affairs and Northern Development represent the federal government on this Board.

This policy outlines how Parks Canada will implement its responsibilities for the coordination of the CHRS as well as its own participation in nominating, designating and managing rivers under the Minister's authority.

All agencies participating in the Canadian Heritage Rivers System, including Parks Canada, adhere to the agreed objectives and policies which are described in the document, The Canadian Heritage Rivers System: Objectives, Principles and Procedures. The System's objectives are to give national recognition to the important rivers of Canada and to ensure their future management in such a way that the natural and human heritage which they represent is conserved and interpreted, and the opportunities they possess for recreation and heritage appreciation are realized by residents of and visitors to Canada.

Parks Canada Objective for the Canadian Heritage Rivers System

Within the framework of the Canadian Heritage Rivers System, the objective of Parks Canada is:

To foster protection of outstanding examples of the major river environments of Canada in a cooperative system of Canadian Heritage Rivers, and to encourage public understanding, appreciation and enjoyment of their human and natural heritage.

1.0 Creating a National System

1.1 As the lead federal agency on the Canadian Heritage Rivers Board, Parks Canada will advocate a national perspective on the development of the System.

1.2 Parks Canada will encourage the membership of all provinces and territories in the System.

1.3 Through the development of national framework plans, Parks Canada will support and encourage the nomination of rivers that represent the natural and cultural heritage of all of Canada's river environments.

1.4 Parks Canada will cooperate with other federal agencies and, where necessary, coordinate actions between these agencies and participating provincial and territorial governments, on issues concerning the nomination, designation and management of rivers in the System.

1.5
Through the Board Secretariat, and working with other federal agencies, national cooperating associations and non-governmental organizations, Parks Canada will publicly promote the System as a national program.

2.0 Rivers Under Parks Canada Jurisdiction

2.1 Parks Canada will nominate as Canadian Heritage Rivers, rivers under its own jurisdiction which, according to its own framework plans, represent the natural and cultural heritage of Canada's rivers.

2.2 Management plans for national parks or other areas under Parks Canada jurisdiction in which designated Canadian Heritage Rivers are located will be prepared according to the National Parks Policy. These plans will contain specific reference to the management of these rivers according to CHRS objectives, and will be lodged with the Board to fulfill the requirements for designation of rivers to the CHRS.

2.3 Parks Canada will demonstrate leadership by managing designated Canadian Heritage Rivers located in national parks and other areas under its jurisdiction according to CHRS objectives, resource management objectives, and other relevant federal government policies.

2.4 Parks Canada will monitor the condition of its Canadian Heritage Rivers and will report as required to the Board on their condition.

2.5 Parks Canada will work with neighbouring jurisdictions and appropriate agencies to protect the upstream watersheds of its Canadian Heritage Rivers.

2.6 Parks Canada will assume the cost of public information programs for Canadian Heritage Rivers under its own jurisdiction.

3.0 Technical and Financial Assistance

3.1 Parks Canada will provide direct financial and technical assistance to participating governments for the completion of studies and plans leading to the nomination and designation of Canadian Heritage Rivers.

3.2 Parks Canada will provide the Board and its member governments with technical assistance on matters concerning the nomination, designation and management of Canadian Heritage Rivers, and will undertake national river studies on behalf of the Board.

3.3 Through a Secretariat operated on behalf of the Board, Parks Canada will provide support for plaquing ceremonies to commemorate the designation of rivers to the System, assume the cost of a national and international public information program for the System, and will provide support for coordinating the ongoing monitoring of designated rivers.

PROTECTING AND PRESENTING NATIONAL HISTORIC SITES (See Part III, Cultural Resource Management Policy)
NATIONAL HISTORIC SITES POLICY

BACKGROUND

As places that exemplify thousands of years of human history and hundreds of years of nation building, Canada's national historic sites are part of the inheritance of all Canadians. Extending from the northwest corner of the Yukon to the eastern tip of Newfoundland, these historic places reflect a diversity of cultures, geographical settings and time periods as vast as Canada itself, symbolizing its national identity and human environmental heritage.

National historic sites evoke many of the great themes of human history, in circumstances that represent the commonplace as well as the unique. They remind Canadians and visitors to Canada that our past is rich and varied, encompassing places as diverse as Port au Choix in Newfoundland, a 4,000-year-old Aboriginal site depicting the Maritime Archaic culture; the Lachine Canal, in Montréal, one of the most important places associated with Canada's industrial and transportation history; York Factory, in Manitoba, once the headquarters of a fur trade empire that covered western and northern Canada, and Kitwanga Fort site in British Columbia, part of a significant intertribal trading network. At the same time, national historic sites reflect the enormous impact that the biophysical environment — our natural heritage — has had on the landscape of Canadian history. As places where we commemorate our history and our diverse but common heritage, national historic sites play a significant role in the public education of all Canadians.

The term "national historic site" embraces the entire spectrum of nationally significant historic places, ranging in size from the gravesites of the Fathers of Confederation to extensive cultural landscapes in urban, rural and wilderness settings. These places may contain surface and subsurface remains, individual buildings or complexes of buildings and other works, artifacts, natural features and combinations thereof. Where individual national historic sites do not constitute cultural landscapes in their own right, they form part of a larger cultural landscape. Recognition of this enhances our appreciation of the value of these historic places and their associated environments.

The impulse to commemorate significant aspects of the past is one that Canadians share with others around the world. Most nations have formal or informal programs of this nature, and over 100 countries, including Canada, adhere to the United Nations' World Heritage Convention. The Convention has as its objective the identification, protection, conservation and presentation of cultural and natural heritage places of outstanding universal value. A number of Canada's national historic sites have been recognized by the United Nations Educational, Scientific and Cultural Organization (UNESCO) as World Heritage Sites, including L'Anse aux Meadows in Newfoundland, the only authenticated site of the Viking presence in the New World, and Ninstints Village in British Columbia, with its unsurpassed collection of Haida totem and mortuary poles. Another Canadian World Heritage Site, the Historic District of the city of Québec, contains several national historic sites that were instrumental in its World Heritage designation, chief among them being the walls of the old city.

At the federal level, responsibility for designating the nation's historic places rests with the Minister of Canadian Heritage, who acts on the advice of the Historic Sites and Monuments Board of Canada. The Board also advises the Minister on the commemoration of persons, events and other historical phenomena.

Early governmental activities in Canada relating to the commemoration of historic places tended to focus on marking and preserving battle and
fortification sites because of their importance — real and symbolic — as landmarks in Canada's national evolution. Local initiative was often instrumental in the commemoration of these places. The importance of local interest in the conservation of national heritage has long been a feature of the national historic sites program, as has been the recognition that our national history is to be found in all parts of the country. It was not until the second decade of the 20th century that the first national program for preserving sites of historical interest was established within the Dominion Parks Branch of the former Department of the Interior. Largely the work of an early commissioner of the Branch, this program represented a blending of the cultural heritage and natural conservation movements of the time, and began the long organizational association between national historic sites and national parks that has continued to the present. With the formation of the Historic Sites and Monuments Board of Canada in 1919, provision was made for outside experts to advise the Minister on the commemoration of nationally significant aspects of Canadian history.

Three pieces of federal legislation have been instrumental in the development of the historic sites program: the *Dominion Forest Reserves and Parks Act* of 1911; Part II of the *National Parks Act* (1930), which makes provision for the setting aside of federal lands to commemorate an event of national importance, or to preserve a historic landmark or "any object of historic, prehistoric, or scientific interest of national importance;” and the *Historic Sites and Monuments Act* (1952-53), which describes the powers of the Minister with respect to the commemoration of historic places and outlines the role of the Historic Sites and Monuments Board of Canada.

The federal government plays an essential role in historical commemoration, specifically at the national level, but many others are actively involved. Private citizens, historical societies, heritage groups, professional bodies and others play a major part in identifying and conserving heritage, and in lobbying governments at all levels to devise, implement or expand legislation and programs. In fact, most of the proposals for commemoration considered by the Minister are submitted by the public.

Provincial and territorial governments also play a significant role, not only through the programs they sponsor and the historic sites they operate, but also because provincial jurisdiction over private property enables the provinces to pass and enforce legislation extending legal protection to designated properties or sites not owned by governments or subject to federal regulation. Federal-provincial-territorial cooperation is facilitated by formal mechanisms, as well as by ongoing contact at the agency level.

National historic sites represent a true national partnership in the preservation of Canada's heritage. The Minister of Canadian Heritage is responsible for designating these sites and for directly managing a number of them, while many others are owned by other levels of government, corporations and individuals. This partnership, which is often informal rather than formal, is symbolized by the term "Family of National Historic Sites." The family includes sites that are operated as heritage institutions, as well as those that continue to serve traditional commercial, administrative, industrial and spiritual purposes, touching the everyday lives of people across Canada in national historic sites such as the Historic District of Lunenburg, Christ Church Cathedral in Fredericton, the Chateau Frontenac in the city of Québec, Union Station in Toronto, Stirling, in Alberta, Igloolik Island in the Northwest Territories, or Stanley Park in Vancouver. To a degree unforeseen even ten years ago, historic sites are increasingly viewed as an integral part of the human environment, rather than as enclaves where the past is separated from the present.

While Canadians can take pride in their national historic sites, there is no room for complacency. Each year significant places associated with our
history are destroyed, either by natural causes or through human action or inaction. Many sites of great value remain to be commemorated, and many await the resources necessary to properly protect and effectively present them. Our historic sites represent a legacy that, once lost, can never be replaced.

The Government of Canada is aware that a strong and secure sense of the past is an indispensable source of confidence in the future, particularly for a country that is outward-looking by choice and independent by conviction. National historic sites provide tangible and irreplaceable links to what defines us as a nation and a people, and along with other national institutions and symbols, especially those of historic value, are integral to "our sense of country." The federal government is dedicated to assuring that the existing system of national historic sites remains strong and, equally important, that new sites are added to ensure that the full range of Canada's human history is adequately represented within the national commemorative program.

The designation and stewardship of national historic sites reflect the values of those who have been given responsibility for the commemoration of our heritage. The need to identify and to preserve non-renewable heritage resources has never been more urgent or important. Future generations will judge the content and quality of our stewardship.

This policy sets out objectives, describes means to achieve them, and provides guidelines for evaluating the program using such concepts as commemorative integrity.

OBJECTIVES

- To foster knowledge and appreciation of Canada's past through a national program of historical commemoration.
- To ensure the commemorative integrity of national historic sites administered by Parks Canada by protecting and presenting them for the benefit, education and enjoyment of this and future generations, in a manner that respects the significant and irreplaceable legacy represented by these places and their associated resources.
- To encourage and support the protection and presentation by others of places of national historic significance that are not administered by Parks Canada.

Commemorating Canada's Past

Commemoration is the means by which Canada gives official recognition to subjects of national historic significance. Such subjects cover the whole range of Canada's human history, including persons, places, events and other phenomena. Commemoration may take any of the forms described in the Historic Sites and Monuments Act and in Part II of the National Parks Act.

A commemoration will possess four qualities:

i) It will be formally approved by the Minister;
ii) It will communicate the national significance of what is being commemorated;
iii) In the case of resources of national historic significance administered by Parks Canada, it will respect the legacy that these resources represent; and
iv) It will be enduring.

The concept of commemorative integrity is used to describe the health or wholeness of a national historic site. A national historic site possesses commemorative integrity when the resources that symbolize or represent its importance are not impaired or under threat, when the reasons for the site's national historic significance are effectively communicated to the public, and when the site's heritage values are respected by all whose decisions or actions affect the site.

1.0
ROLES AND RESPONSIBILITIES

1.1 The Role of the Minister

The Minister of Canadian Heritage is responsible for directing the national program of historical commemoration provided for in legislation.

1.1.1 The Minister will respond to public and other requests relating to the commemoration of aspects of Canada's human history.

1.1.2 The Minister will make designations of national historic significance, based on recommendations of the Historic Sites and Monuments Board of Canada.

1.1.3 The Minister will determine the appropriate forms of commemoration for recognizing national historic significance, based on recommendations of the Historic Sites and Monuments Board of Canada, and information provided by the department.

1.1.4 Provinces and territories will be notified when the Minister receives a request for designation affecting that province or territory, and will thus have an opportunity to provide information they consider relevant.

1.1.5 In the case of a national historic site under the authority of another federal minister or agency, the Minister will seek an interdepartmental agreement providing for the protection of the site.

1.1.6 To protect national historic sites that are not owned by the federal government, the Minister will, at the time of designation, encourage the province or territory in which the site is located to apply its own heritage legislation. To the extent permitted by law, the Minister will recognize provincial or territorial heritage designations on lands under his or her authority.

1.1.7 The Minister will, at the time of designation, provide owners of national historic sites with a copy of the Cultural Resource Management Policy, and encourage them to apply the principles and practice described in the Policy. Where operational requirements permit, owners of national historic sites will be provided with professional and technical advice upon request.

1.2 The Role of the Historic Sites and Monuments Board of Canada

The Historic Sites and Monuments Board of Canada is an independent body that provides the Minister of Canadian Heritage with impartial and expert advice on matters relating to historical commemoration, and devises its own policies to carry out its responsibilities. In practice, the Minister will not designate or commemorate without the Board's advice. All parts of the country are represented on the Board, which includes two residents from Ontario, two from Quebec, one from each of the other provinces and territories, as well as the National Archivist of Canada, an official of the Canadian Museum of Civilization and an official of the Department of Canadian Heritage. The Historic Sites and Monuments Board of Canada meets at least twice a year and submits recommendations to the Minister for approval.

1.2.1 The Historic Sites and Monuments Board of Canada will advise the Minister on those aspects of Canadian history that it considers worthy of a Ministerial designation of national historic significance, and will provide the Minister with reasons for the proposed designation.
1.2.2
The Historic Sites and Monuments Board of Canada will advise the Minister on the form of commemoration it considers appropriate to recognize national historic significance, and may advise the Minister on any other matter relating to the commemoration of Canada's history.

1.2.3
When the Historic Sites and Monuments Board of Canada recommends that the Minister acquire a site to commemorate an aspect of Canadian history, the recommendation will be based on historical considerations relating to the national historic significance of the site, or its resources. The Board may advise the Minister on which in situ or extant resources, if any, are considered to have national historic significance.

1.3
The Role of Parks Canada

Parks Canada and its predecessors have been responsible for the national historic sites program since 1914.

1.3.1
Parks Canada will fulfill the Minister of Canadian Heritage's responsibility to provide a Secretary and other employees of the department necessary for conducting the business of the Historic Sites and Monuments Board of Canada.

1.3.2
Parks Canada will undertake studies on all aspects of Canada's human history relative to the national program of historical commemoration, and will compile inventories of sites in order to ensure that the commemorative program reflects the rich and varied texture of Canada's past. These studies will be undertaken to assist the Historic Sites and Monuments Board of Canada and the department in identifying, evaluating, selecting and commemorating sites of national historic significance.

1.3.3
Parks Canada will maintain and periodically update a long-range systems plan to identify and address gaps in the commemorative program and to provide a basis for making systematic decisions regarding forms of commemoration.

1.3.4
Parks Canada will provide managerial, policy, planning, research and technical facilities and services to support the effective implementation of the national commemorative program.

1.3.5
Opportunities for public involvement in the national commemorative program contribute to an overall sense of national identity and to a greater appreciation of the public benefits of national historic sites. Parks Canada will provide opportunities for public involvement in the identification, development and operation of national historic sites, and will work with individuals and volunteer groups such as cooperating associations to achieve commemorative objectives.

1.3.6
Parks Canada is committed to ongoing cooperation with those who are involved in the commemoration of Canada's history. It will consult and cooperate with agencies at the federal and other government levels, with non-government organizations and with members of the public to achieve commemorative objectives.

1.3.7
Parks Canada will encourage understanding, appreciation and enjoyment of Canada's history and of Canada's national historic sites by communicating the scope of the national historic sites system and by making the results of research available to the public through departmental, cooperative and private sector publications and other media.
1.3.8 Parks Canada will inform the public about those aspects of Canada's human history that have been designated nationally significant by the Minister, and about the location and significance of national historic sites so that Canadians can become better acquainted with the special places associated with their history. Only in those rare cases where the integrity of a site and its resources would be threatened will information about the location be withheld.

1.3.9 Parks Canada will review existing federal legislation for purposes of enhancing the statutory protection of national historic sites under federal jurisdiction.

1.3.10 Parks Canada will protect and present national historic sites under its administration in accordance with the Cultural Resource Management Policy.

1.3.11 Parks Canada will monitor the condition of national historic sites.

2.0 Determining National Historic Significance

Only those aspects of Canadian history that have been declared by the Minister to be of national historic significance will be commemorated.

2.1 Scope

2.1.1 Any aspect of Canada's human history not specifically excluded by policies of the Historic Sites and Monuments Board of Canada may be considered for a Ministerial designation of national historic significance. Living persons and places located outside Canadian territory are among the exclusions.

2.1.2 With the exception of Prime Ministers, who are eligible for commemoration immediately upon death, a minimum of 25 years must normally elapse following the death of an individual, in order to allow the Historic Sites and Monuments Board of Canada to make an informed, impartial recommendation based solely on historical considerations concerning the possible national significance of that person.

2.1.3 The Historic Sites and Monuments Board of Canada will not recommend that religious and ethnic groups per se be specifically commemorated except where their contributions are represented by sites, individuals, or events of national historic significance.

2.2 Criteria

Designations of national historic significance will be based on the following general criteria:

i) the subject under consideration will have had a nationally significant impact on Canadian history, or will be deemed to represent a nationally important example or illustration of Canadian human history.

- Uniqueness or rarity are not, in themselves, evidence of national historic significance, but may be used as criteria in connection with i);
- A representative example may be deemed to warrant a designation of national historic significance because it eminently typifies an important aspect of Canadian history.

ii) a site, structure or object may be designated by virtue of an association with a nationally significant aspect of Canadian history, provided that the association is itself sufficiently important for the site to merit a designation of national historic significance.

2.3
Designation

2.3.1
The Historic Sites and Monuments Board of Canada will consider proposals for commemoration that have originated with the public and other sources. Public involvement in proposing subjects that might qualify as being of national historic significance will be encouraged.

2.3.2
Recommendations of national historic significance and the forms of commemoration relating thereto will be forwarded to the Minister for consideration. To ensure that the commemorative program is one of high calibre, advice to the Minister will be based on sound research.

2.3.3
Parks Canada will advise the Minister on operational and other implications of approving a Historic Sites and Monuments Board of Canada recommendation of national historic significance, specifically as it relates to the form of commemoration.

2.3.4
A designation of national historic significance will be made when the Minister approves a recommendation from the Historic Sites and Monuments Board of Canada to that effect.

3.0 Forms of Commemoration

Aspects of Canadian history declared to be of national historic significance will be commemorated. Formal activities relating to commemoration, such as the unveiling of a plaque or monument, or the dedication of a national historic site, will usually be accompanied by a ceremony. Such ceremonies provide an excellent opportunity for Canadians to learn about their history.

3.1 Plaques

Aspects of Canadian history declared to be of national historic significance will normally be commemorated by a Ministerial plaque bearing the inscription of the Historic Sites and Monuments Board of Canada. A plaque is not a national historic site, although it may be erected at or on a national historic site. The existence of a Ministerial plaque at a site not administered by Parks Canada does not imply provision for protection or maintenance of the site by Parks Canada.

3.1.1
Plaques will be erected only after it has been determined that the existence and/or location of the plaque will not adversely affect the integrity of the site.

3.1.2
Plaques will be erected at a place on Canadian territory that is closely associated with that which is being commemorated.

3.1.3
The appropriate text for a plaque will be recommended to the Minister by the Historic Sites and Monuments Board of Canada.

3.1.4
The text on all plaques will appear in both official languages and, when recommended by the Historic Sites and Monuments Board of Canada, in other languages.

3.2 Monuments

The Minister may authorize the erection of a monument when, based on the advice of the Historic Sites and Monuments Board of Canada, the Minister considers that the aspect of Canadian history being recognized would most appropriately be commemorated by a monument.
3.2.1
The design of monuments should convey to the public what is being commemorated.

3.2.2
Proposals for the design of monuments will be invited from Canadian artists and sculptors, including those residing within the region where the monument is to be erected.

3.2.3
The monument will be erected or installed at a place closely associated with that which is being commemorated.

3.3
Agreements

The Minister may enter into agreements with others for the marking, care and preservation of historic places, based on recommendations of the Historic Sites and Monuments Board of Canada.

3.3.1
Under the National Cost-Sharing Program, the Minister may enter into an agreement to contribute toward the cost of acquiring, conserving and presenting a site or structure declared to be of national historic significance and, further, may provide professional and technical advice, subject to all of the following:

i) the site or structure will be owned by a province, territory, municipality, or incorporated body;
ii) an agreement to share costs will be recommended by the Historic Sites and Monuments Board of Canada;
iii) the site or structure will be accessible to the public;
iv) the use of the site or structure will not compromise or detract from the significance or integrity of that which is being commemorated; and
v) the agreement between the Minister and the owner of the national historic site will be based on the principles set out in the Cultural Resource Management Policy.

3.4
Acquisition

Each of Canada’s national historic sites illustrates an important aspect of Canada's history. Federal ownership is not a requirement — indeed, the majority of Canada's national historic sites are owned by individual citizens, public and private organizations, and other levels of government. It is neither feasible nor desirable for the Government of Canada to own all national historic sites. Nevertheless, the federal government will continue to acquire national historic sites to ensure that the responsibility for this national program does not fall on others alone, so that the heritage represented by these sites is protected and accessible to Canadians in all parts of the country, and to provide leadership and active involvement in heritage conservation and interpretation.

3.4.1
The Historic Sites and Monuments Board of Canada may recommend to the Minister the acquisition of a national historic site.

3.4.2
Before a Ministerial decision is made, Parks Canada will inform the Minister of the operational, financial and policy implications of acquiring a national historic site to meet commemorative objectives, including development of the site where relevant.

3.4.3
When, in the opinion of the Minister, the acquisition of a national historic site by the Government of Canada is warranted in order to commemorate national historic significance, the Minister will seek Treasury Board approval for the proposed acquisition.

In the case of a national historic site that is already owned by the federal government, but
which is not under the Minister's authority, the usual procedure by which the Minister will acquire administration of the site will be by agreement between Ministers.

A national historic site under the Minister's authority may be set aside in accordance with Part II of the National Parks Act so that regulations under that Act may apply to it. Such a setting aside is an administrative rather than a commemorative action, and is treated in the Cultural Resource Management Policy.

3.4.4
National historic sites will be identified for acquisition in accordance with the following criteria:

i) the site will be recognized as a significant commemorative addition to the network of national historic sites under the Minister's authority; and

- sufficient knowledge of this and related sites will exist to ensure that the integrity of the network of national historic sites will be maintained; and

- the site will include significant resources related directly to the purpose for which the site is being commemorated, and these resources will possess sufficient integrity to make commemoration meaningful; and

- the benefits to the public in terms of knowledge and appreciation of Canadian history will be high, i.e., the site and/or its resources will have excellent potential for interpretation and, consequently, for illustrating an important aspect of Canadian history; and

- the site and/or its resources will be deemed to merit preservation by the federal government for the enjoyment of this and future generations.

ii) a site may be acquired when, in the opinion of the Minister, based on a recommendation of the Historic Sites and Monuments Board of Canada, the site is of such exceptional or outstanding importance in Canadian history as to merit acquisition on grounds of significance alone.

3.4.5
In setting priorities for acquiring national historic sites, consideration will be given to:

- factors in the systems plan such as historical theme representation; and

- potential for providing opportunities and encouragement for Canadians and visitors to Canada to better their knowledge of this country and its history by visiting all parts of Canada.

A site that is under threat may have a higher priority for acquisition than one which is not, providing that other criteria and factors are satisfied equally.

3.4.6
A national historic site may be set apart to preserve an object or objects of historic or scientific interest of national importance pursuant to Part II of the National Parks Act at a location that is not itself of national historic significance. When this occurs, the site will be in a locality directly associated with the object or objects or their creator(s).

3.4.7
In response to the advice of the Historic Sites and Monuments Board of Canada, the Minister may recommend to the Governor in Council that a national historic site be commemorated by the establishment of a historic museum. It is policy not to seek the establishment of a historic museum, except when it is considered indispensable to achieving commemorative objectives.

Historic museums, where approved, will be established within, or adjacent to, places that have
been declared to be of national historic significance. Structures built or used for interpretation or visitor reception are not "historic museums," unless so designated by the Governor in Council.

3.4.8

National historic sites will be acquired by the Minister in accordance with the following guidelines:

- residents of the locality and the provincial or territorial government will be consulted; and
- an impact assessment will be conducted to identify the effects of acquisition (such an assessment will include a consideration of possible threats to the resources posed by acquisition).

The public will be encouraged to become involved in the acquisition and development of the national historic site.

3.5

Other Forms of Commemoration

The Historic Sites and Monuments Board of Canada may propose alternative forms of commemoration to the Minister, providing the alternative is formal, meaningful, appropriate and enduring.

4.0

Rescinding Commemoration

To maintain the integrity of the commemorative program, a designation of national historic significance or an approved form of commemoration may be revoked by the Minister, acting on the advice of the Historic Sites and Monuments Board of Canada. Such action will be undertaken rarely, and then only when:

i) the commemoration was based on the existence of resources that have since disappeared; or
ii) the resources have fallen into such a state

of disrepair as to nullify the reason(s) for the commemoration; or

iii) the commemorative significance of the structure or site has been severely compromised as a result of having been moved and/or altered.

PROTECTING AND PRESENTING NATIONAL HISTORIC SITES

The protection and presentation of national historic sites, regardless of ownership, are major objectives of Canada's national commemorative program. In the case of national historic sites administered by Parks Canada, protection and presentation are fundamental to commemoration since without protection there can be no historic site to be enjoyed, and without presentation there can be no understanding of why the site is important to our history and, hence, to all Canadians.

Protecting and presenting national historic sites administered by Parks Canada is dealt with in the Cultural Resource Management Policy, which serves as the overall management policy for Parks Canada-administered national historic sites (see Part III of this document). Cultural resource management is based on the ethic that respect for the legacy represented by resources should influence all actions and activities related to those resources, so that the people of Canada may benefit from and enjoy this legacy now and in the future.

HISTORIC CANALS POLICY

BACKGROUND

Canals have been part of transportation in Canada since the building of three small canal locks at Sainte-Marie Among the Hurons in the 1640's to the present-day operation of the St. Lawrence Seaway. Originally built for transportation, trade and in some cases defence, a number of Canada's canals no longer serve commercial purposes, but have developed into places to appreciate and enjoy our cultural and natural heritage through land- and water-based activities.

In recognition of this change from commercial transportation to heritage appreciation, the Government of Canada transferred the responsibility for a number of operating canals in the 1970's from the Minister of Transport to the Minister responsible for Parks Canada. Those canals that continue to be operated for purposes of through navigation as well as for the protection and presentation of their cultural and natural resources are covered by this policy.

Historic canals vary from single locks, such as the St. Peters Canal in Nova Scotia, to complex systems of interconnected locks, channels and natural waterways, such as the Trent-Severn Waterway in Ontario. The latter canals have an impact that goes far beyond the movement of boats from one lock to another. They form extensive cultural and natural heritage corridors that link cities and towns and whose drainage basins encompass large geographical areas. In some cases, the management of these heritage corridors is subject to federal-provincial agreements.

A number of the historic canals, such as the Chambly in Quebec, have been declared to be of national historic significance. In addition, specific resources on certain historic canals have been declared to be of national historic significance. The locks, dams and blockhouses on the Rideau Canal in Ontario are examples of resources that have been so designated.

Providing opportunities and services for appropriate use (as defined in section 3.0 of this policy) of the historic canals is an important part of canal operations. Parks Canada will maintain a proper balance between appropriate use and heritage resource protection, so that the legacy these canals represent will be understood and appreciated. Consultation and cooperation are also important to the effective management of the historic canals. Various levels of government, as well as groups and concerned individuals, have a role in fostering public appreciation, enjoyment and understanding of the values represented by the historic canals.

OBJECTIVE

To foster appreciation, enjoyment and understanding of Canada's historic canals by providing for navigation; by managing cultural and natural resources for purposes of protection and presentation; and by encouraging appropriate uses.

1.0 Navigation

The canals covered by this policy are distinguished from other canal sites administered by Parks Canada because they are operated for purposes of through navigation as well as for their heritage values.

1.1 Providing for Navigation

1.1.1 Navigation forms an important part of the heritage character and heritage experience that these canals provide. However, structures, operating devices and procedures will not be modified to increase the capacity of historic canals.
1.1.2
The following considerations will guide the provision of navigation: availability of adequate water levels, maintenance of public safety, preservation of heritage character, physical condition of the works, time of year, demand, and available human and financial resources.

1.1.3
Where navigation is maintained, Parks Canada objectives will be to maintain adequate canal water depths, structures and navigation aids in order to provide for navigation.

1.1.4
Water levels and flows required for navigation on the canals will be monitored and managed to minimize flooding and adverse resource impacts.

1.1.5
Canals that become non-navigable are no longer subject to the provisions of this policy, but will continue to be managed in accordance with other Parks Canada policies.

2.0
Resource Management

Historic canals provide a range of opportunities for the public to enjoy activities on water and land, and to learn about aspects of Canada's cultural and natural heritage. As with all resources administered by Parks Canada, the cultural and natural resources are managed so as to protect and present the legacy that they represent.

Cultural resources form part of the historical context of the canals and, coupled with natural resources, provide a landscape whose heritage character should be protected, appreciated, enjoyed and understood. Natural landscapes and habitats along the canals complement the cultural resources and contribute to the environmental quality of the canals. Systematic management of the historic canals will provide for the protection, presentation and appropriate use of cultural and natural resources as well as for navigation.

2.1
Planning for Resource Management and Use

2.1.1
Management plans for each historic canal will treat the canal and its cultural and natural resources as an entity and will provide for present and future sustainable uses.

2.1.2
Public consultation is an inherent part of the planning for the management of historic canals, and opportunities will be provided for public contribution to the planning process.

2.1.3
Land acquisition will be made on the basis of approved plans or agreements and will be by mutual agreement with the owner. It is not the intention of Parks Canada to acquire additional lands, except where essential to the proper management of a canal.

2.1.4
Lands identified through a planning process as surplus to canal requirements may be disposed of, subject, where necessary, to the application of reservations such as flooding rights.

2.1.5
Parks Canada will encourage local governments and other agencies to contribute, by means of plans, zoning bylaws and public education, to the protection of the heritage character of corridors formed by the canals and adjacent lands.

2.2
Protecting Cultural Resources

2.2.1
Cultural resources will be protected according to the Cultural Resource Management Policy.
2.2.2 Manually operated devices on locks, bridges and dams will be retained when they form part of the historical character and heritage experience of a canal.

2.2.3 Because of the heritage character of these canals, there may be an element of risk associated with their use. Parks Canada will take reasonable precautions, but will not significantly alter historic fabric or intrude on the heritage character of a canal. Before any physical modification is contemplated, other non-intrusive options will be considered.

2.2.4 Parks Canada has been given stewardship responsibility for the historic canals because of their heritage value. Modification of a cultural resource to meet significant operational or safety purposes will be considered only after thorough review, taking into account the maintenance of this stewardship responsibility. Any proposed modification or action (human or natural) affecting a level 1 cultural resource (as defined in the Cultural Resource Management Policy) that results in a change to the attributes upon which the level 1 designation was based will be reviewed in accordance with section 4.0 of the policy on National Historic Sites to ensure that the resource still merits being considered nationally significant.

2.2.5 Parks Canada will encourage others to protect cultural resources on lands not administered by Parks Canada that are adjacent to the canals.

2.3 Protecting Natural Resources

2.3.1 Natural resources will be protected in accordance with Parks Canada policies.

2.3.2 Canals will be operated and maintained in ways that seek an appropriate balance between use and environmental impacts, and comply with the Canadian Water Quality Guidelines.

2.3.3 Parks Canada will encourage others to protect ecologically related natural landscapes and habitats, including wetlands, on lands not administered by Parks Canada that are adjacent to the canals.

2.3.4 Parks Canada will manage dredge and fill activities to ensure that wetland environments, fish habitat and undisturbed shorelines are protected.

2.4 Presentation

2.4.1 Presentation programs will be developed to provide the public with an appreciation of the significant values of individual historic canals, in order to foster enjoyment of their cultural and natural resources and to encourage an understanding of how these canals have contributed to the development of Canada.

2.4.2 All presentation, including visitor activities, relating to cultural and natural resources will be conducted in accordance with Parks Canada policies.

2.4.3 The development and management of appropriate facilities, services and programs for visitor activities on the historic canals will be planned in a market-sensitive manner.

2.4.4 Presentation programs, including visitor activities, will not impair resources and will stress the principle that cultural and natural resource conservation contributes to the public benefit and
is a responsibility of the public as well as of Parks Canada.

3.0 Appropriate Use

Appropriate uses and activities are defined as those which contribute to the public's appreciation and enjoyment of the historic canals, which respect the heritage character of canal resources, and which are compatible with public safety.

3.1 Compatible and appropriate uses of historic canals will be encouraged so that the land and water resources can be enjoyed in all seasons.

3.2 The use and operation of historic canals will be managed in accordance with the Historic Canals Regulations.

3.3 The intensity, type and location of use of historic canals may be limited by notice or regulation to ensure visitor safety, enjoyment and resource protection.

3.4 Regulations necessary for public safety, navigation, and use of cultural and natural resources will be enforced by the appropriate authority.

3.5 Water that is surplus to navigation requirements may be used to meet the needs of recreation, wildlife conservation, power generation, municipalities or other appropriate uses in accordance with the Federal Water Policy.

3.6 Hydro-electric development proposals on lands administered by Parks Canada may be considered when they are consistent with the protection of cultural and natural resources. Such proposals will be subject to the federal environmental assessment and review process, the Dominion Water Power Regulations, as well as to public consultation.

3.7 Leases, licences and permits for use of canal lands or water will specify any limitations to protect cultural resources, environmental quality, public safety, and the enjoyment of other canal users and residents, and will be subject to review under the federal environmental assessment and review process. Commercial operations will be controlled and monitored. Special privileges that would result in unfair competition will not be granted.

3.8 New applications for major works or for any significant change in the type or capacity of service offered by a commercial establishment on lands administered by Parks Canada will be subject to the federal environmental assessment and review process, including public consultation.

4.0 Working with Others

In recognition of the actual and potential impact of the operation of the historic canals on others, Parks Canada will cooperate with provincial departments, individuals, agencies and groups to achieve its objectives. The involvement of others (including volunteer groups such as cooperating associations) in the provision of certain appropriate services and facilities to the public contributes to the achievement of objectives relating to public needs.

4.1 Parks Canada will consult with tourism and recreational groups, as well as with other levels of government, in identifying opportunities for the private sector to supply appropriate services and facilities on the historic canals.

4.2 Historic canals contribute to regional tourism by being managed in a manner that recognizes historical and environmental requirements. Where
appropriate, Parks Canada will participate in, and provide leadership to, selected community and inter-agency tourism initiatives.

4.3 Parks Canada recognizes that the management of historic canals has a social and economic impact on adjacent lands and other jurisdictions, and will work with local, provincial and other federal agencies to assist in the planning, protection and presentation of cultural and natural resources in the regions adjacent to the historic canals.

4.4 Parks Canada will cooperate with the appropriate provincial authorities in their management of renewable natural resources that are harvested on lands and waters administered by Parks Canada.

3.0 Consultation and Monitoring

4.0 Public Input
BACKGROUND

Our architectural heritage is a part of what makes us proud to be Canadians. It enriches the landscape around us, and situates us in time and space. It tells us about our past and our present, strengthening our sense of identity and reflecting that identity in all its diversity.

This architectural heritage is both important and irreplaceable. As such it must be identified and protected if it is to benefit the lives of future generations in the way that it has benefited our lives and the lives of generations past. In recent years there has been a steadily growing interest in protecting this architectural heritage on the part of citizens as well as governments. The Government of Canada has committed itself to taking the steps necessary to identify and to protect its own heritage buildings.

In the 1970's Parks Canada was charged with developing a policy proposal to identify those federal buildings that represent an important part of our national heritage, and to provide for the conservation and sustainable uses of these buildings. Cabinet approved this policy in 1982, and Treasury Board subsequently issued an administrative policy providing direction for its implementation. A number of buildings have already been designated as "federal heritage buildings," among them, Old Government House in Fredericton, the Grande Allée Drill Hall in the city of Québec, the former Kingston Post Office, and Royal Roads Military College in Victoria.

The Minister of Canadian Heritage is responsible for the Federal Heritage Buildings Review Office (FHBRO), which assists departments in the implementation of this policy. The FHBRO maintains an interdepartmental committee called the Federal Heritage Buildings Committee to advise on the heritage designation of federal buildings and on proposed interventions. The committee normally consists of members from the Department of Canadian Heritage, Public Works Canada, the custodial department of the building in question and, for buildings in the National Capital Region, the National Capital Commission.

The Federal Heritage Buildings Policy provides for the designation of federal heritage buildings and for the determination of their heritage character. This character includes the distinct characteristics that give buildings their importance, their quality, style or uniqueness. The policy also provides for a case-by-case review of any proposed intervention that might affect the heritage character of designated buildings, as well as for the resolution of any conflict that might arise between custodial departments and the Federal Heritage Buildings Review Office. The policy applies to all federal departments and to certain agencies that are responsible for real property, as well as to those branches designated as departments for the purposes of the Financial Administration Act. Crown corporations may voluntarily submit themselves to the policy, and are encouraged to do so.

The federal government's purpose in devising this policy is to identify and protect federal heritage buildings in ways that respect their heritage value and are attentive to local, regional, provincial and territorial priorities for heritage protection; to endeavour to provide continuing protection to federal heritage buildings that leave federal ownership; to encourage others to conserve buildings that are of heritage interest to them; and to promote the application of cultural resource management principles and practice in the treatment of federal heritage buildings.

OBJECTIVE

To protect the heritage character of designated federal buildings in the interest of present and future generations by promoting the long-term use
of these buildings in ways that preserve their heritage character.

1.0 Designation of Federal Heritage Buildings

All federal buildings 40 years old or older for which alteration, demolition, or disposal are planned must be identified and referred to the Federal Heritage Buildings Review Office for evaluation, in order to determine if the buildings have heritage value. Also to be evaluated are buildings 40 years old or older whose acquisition is being contemplated.

1.1 Identification

Ministers of departments to which this policy applies, including the Minister of Canadian Heritage, will identify for evaluation by the Federal Heritage Buildings Review Office all federal buildings in their custody which are 40 years old or older and for which an intervention is planned. Departments, other governments and members of the public may request at any time that a federal building 40 years old or older be evaluated. Departments may also request evaluation of, and advice on, buildings less than 40 years old.

1.2 Evaluation

1.2.1 The Federal Heritage Buildings Review Office will evaluate the identified buildings to determine if they merit heritage designation. Parks Canada will prepare research that addresses historical, architectural and environmental criteria, as well as any other relevant information, as a basis for this evaluation.

1.2.2 A building evaluated as a heritage building will be recommended for designation as a "classified" or as a "recognized" federal heritage building. A classified building is the higher of these two designations.

1.3 Registration

1.3.1 The Federal Heritage Buildings Review Office will convey the recommended designation (classified or recognized) to the custodial department. The recommendation will be accompanied by a statement of heritage character.

1.3.2 When the custodial department concurs with the recommendation, the Minister of Canadian Heritage approves the designation. When the custodial department does not concur, it may request an evaluation by an individual or individuals jointly agreed upon by the custodial department and the FHBRO. In the case of a building located in the National Capital Region, the designation also requires a recommendation of the Chairman of the National Capital Commission.

1.3.3 A federal building which has been designated under this policy will be entered in the Register of Federal Heritage Buildings, along with a statement of its heritage character. A visible marker of its status as a federal heritage building may also be provided.

1.3.4 Provincial and territorial governments will be provided with lists of evaluated federal buildings in their provinces or territories on an ongoing basis, as well as with copies of the reports upon which evaluations are based, and the heritage character statements for designated buildings.
2.0 Review of Proposed Interventions to Federal Heritage Buildings

An intervention is defined as an action that may have an impact on the heritage character of a classified or recognized heritage building. Intervention includes alteration, demolition and disposal. Interventions will be reviewed only after a building has been evaluated. The review will be based on the statement of heritage character and will be conducted in accordance with established criteria and a body of standards. The review will vary depending on whether the designation is "classified" or "recognized."

2.1 Classified Buildings

2.1.1 The custodial department will submit any concept proposal that involves an intervention to a classified building to the Federal Heritage Buildings Review Office.

2.1.2 The Federal Heritage Buildings Review Office will review the proposal on the basis of established criteria and standards in order to determine the potential effects on the heritage character of the building. If effects on the heritage character are likely to occur, detailed design proposals will be examined. When the review is complete, the FHBRO will make its recommendations to the custodial department.

2.2 Recognized Buildings

2.2.1 The custodial department will submit any proposals for demolition or disposal to the Federal Heritage Buildings Review Office, which will in turn ensure that alternatives have been adequately explored. If demolition is proposed, the FHBRO will look into the possibility of recording the building and, in the case of disposal, the FHBRO will seek means of providing continuing protection.

2.2.2 For all other interventions, the responsibility for reviewing proposals, plans and specifications will rest with the custodial department of the building in question, which will use the same review standards and criteria as the Federal Heritage Buildings Review Office.

2.3 Conflict Resolution Concerning Reviews of Interventions

When there is an impasse concerning proposed interventions, the Ministers concerned will resolve the matter.

2.4 Notification of Other Governments

In addition to what has been described above, provincial and territorial government heritage agencies will be notified of proposals for disposal or demolition of federal heritage buildings in their jurisdictions. It is federal government policy to offer surplus buildings to the appropriate province or territory before they are sold by public tender.

2.4.1 When a designated building is sold to a non-government party, provinces and territories will be encouraged to apply their historic resource protection legislation to the building.

3.0 Consultation and Monitoring

The Federal Heritage Buildings Review Office will encourage consultation between custodial departments and experts in building conservation.
3.1
Custodial departments of designated buildings will be provided with the FHBRO Code of Practice and with training to assist them in their stewardship of these buildings.

3.2
As is the case with other federal policies, custodial departments will be expected to monitor their own actions to ensure compliance.

4.0
Public Input

In response to proposals from other government agencies, heritage groups and individuals, the practicality of extending the policy to federal works other than buildings, as well as to federal agencies and Crown corporations not currently covered by the policy, will be explored.

HERITAGE RAILWAY STATIONS POLICY

BACKGROUND

For more than a century, railway stations have been an integral part of the Canadian landscape. Not only do they stand as testimony to Canada's development, but to many Canadian communities they are an important source of pride. That a great many Canadians feel an attachment to these railway stations is shown by their enthusiastic efforts to preserve them.

Until the late 1980's, public efforts to preserve railway stations were hindered by the absence of legislation. As most railway stations are owned or controlled by federally regulated railway companies, they are not subject to the various provincial laws that protect heritage. In 1988 Parliament passed a private member's bill to protect these railway stations. The Heritage Railway Stations Protection Act was given Royal Assent in September 1988.

The Heritage Railway Stations Protection Act requires federally regulated railway companies to obtain authorization from the Governor in Council before removing, destroying, altering or disposing of a heritage railway station, and before altering any of the heritage features of the station. It also allows for timely public involvement in opposing those interventions that are seen as potentially deleterious to a heritage railway station or its heritage features. The Act provides for heavy fines for infractions.

The Heritage Railway Stations Policy is based on the Heritage Railway Stations Protection Act. Responsibility for the implementation of the Act and this policy has been given to the Minister of Canadian Heritage, who is supported by the Historic Sites and Monuments Board of Canada.

The Heritage Railway Stations Policy promotes consultation, dialogue and public participation in the pursuit of the shared goal of identifying and conserving the built heritage. The policy establishes processes for identifying and evaluating heritage railway stations; for specifying, where applicable, the features that give them heritage value; and for reviewing on a case-by-case basis any intervention that might affect them or their heritage features. The federal government encourages railway companies that own or control these stations to apply cultural resource management methods in their treatment of them, and to set an example in conserving aspects of Canada's built heritage.

OBJECTIVE

To protect heritage railway stations for the benefit of present and future generations, by ensuring that these railway stations and the features that represent their heritage character are preserved.

1.0 Designation of Heritage Railway Stations

Under this policy, any railway stations that are owned or controlled by railway companies subject to the Railway Act will be considered eligible for designation; this includes the Canadian National Railway Company with respect to both its own railways and Government of Canada railways which it manages and uses.

1.1 Identification

1.1.1 The railway companies, other levels of government and the general public will be encouraged to propose eligible railway stations to the Minister of Canadian Heritage for designation.

1.1.2 Parks Canada will notify the railway company and the provincial or territorial government in which the station is located of the proposed designation,
and will carry out the research necessary for the identification and evaluation of eligible railway stations.

1.2 Evaluation

1.2.1 The Historic Sites and Monuments Board of Canada will evaluate eligible stations in accordance with historical, architectural and environmental criteria that have been established for this purpose, using research prepared by Parks Canada and other relevant information.

1.2.2 The Board will advise the Minister whether a station should be designated a heritage railway station. If the recommendation is positive, the Board may also recommend designation for certain features of the station.

1.3 Registration

1.3.1 Once the Minister has approved a positive recommendation from the Board, a station is designated as a heritage railway station and, when applicable, certain of its features are designated as heritage features. Affected railway companies and provincial or territorial governments will be notified.

1.3.2 A designated station will be entered in the Register of Heritage Railway Stations, maintained by Parks Canada, along with a statement of its heritage character. Designated railway stations will be recognized by appropriate markers or otherwise.

2.0 Review and Authorization of Proposed Interventions

A heritage railway station cannot be destroyed, removed, disposed of or altered, nor can its heritage features be altered, without the authorization of the Governor in Council. Alterations to meet an emergency, or the disposal of a station to a railway company to which the Act also applies, do not require authorization.

2.1 A railway company that proposes an intervention to a heritage railway station must give written public notice of such intention.

2.2 Parks Canada will review proposed interventions in accordance with established criteria in order to determine their impact, if any, on the heritage railway station or on any of its heritage features. Parks Canada may give advice to railway companies in this regard.

2.3 An individual, group or government may signify its objection to proposed interventions by filing a notice with the Minister, setting out the reasons for objection and the pertinent facts on which the objection is based.

2.4 When a notice of objection has been filed with the Minister, the Minister may refer the matter to the Historic Sites and Monuments Board of Canada.

2.5 In reviewing objections, the Board may convene a public meeting to give all interested persons a reasonable opportunity to make representations to it.

2.6 Upon receipt of the results of the Historic Sites and Monuments Board of Canada review, the Minister will recommend to the Governor in Council approval or rejection of the proposed intervention, or approval of a modified intervention, and will inform the railway company, the relevant provincial or territorial
government and interested members of the public.

2.7
If the recommendation is approved, the Governor in Council may authorize the railway company to carry out the proposed or modified intervention, under such terms and conditions as the Governor in Council deems appropriate.

2.8
Parks Canada will provide technical advice to meet an emergency situation when requested to do so by a railway company.

2.9
When a designated railway station is sold to a party not subject to the Railway Act, the province or territory within which the station is situated will be asked to apply its historic resource protection legislation to the station.

3.0 Monitoring

Parks Canada will monitor compliance with regulations under the Heritage Railway Stations Protection Act, and see that work is carried out in conformity with authorized terms and conditions. The Canadian public will play a monitoring role by demonstrating its interest in the conservation of this aspect of our cultural heritage.

CULTURAL RESOURCE MANAGEMENT POLICY

BACKGROUND

Parks Canada is one of the principal cultural resource management organizations in Canada. It is responsible for a vast array of cultural resources in public settings at national parks (including national marine conservation areas), national historic sites and historic canals, as well as in collections and at other properties that it administers.

Cultural resource management is an integrated and holistic approach to the management of cultural resources. It applies to all activities that affect cultural resources administered by Parks Canada, whether those activities pertain primarily to the care of cultural resources or to the promotion of public understanding, enjoyment and appropriate use of them.

For purposes of this policy a cultural resource is a human work, or a place that gives evidence of human activity or has spiritual or cultural meaning, and that has been determined to be of historic value. Cultural resources are distinguished from other resources by virtue of their assigned historic value. This value derives from an association with an aspect or aspects of human history. Parks Canada may apply the term cultural resource to a wide range of resources in its custody, including, but not limited to, cultural landscapes and landscape features, archaeological sites, structures, engineering works, artifacts and associated records.

Frequently, cultural resources occur in complexes or assemblages. Such assemblages might include movable and immovable resources, resources that are above ground and below, on land and in water, and whose features are both natural and fabricated.

The term cultural resource embraces the whole as well as the parts that make up the whole. Because the whole is almost always greater than the sum of its parts, effective cultural resource management does not focus on the components — the discrete resources — at the expense of the overall place. Cultural resource management thus operates on two levels. It applies to the overall management of a national historic site or a historic canal (which can be considered as cultural resources), as well as to the individual cultural resources that are contained in a national historic site, national park, or historic canal.

The challenges of managing cultural resources for public benefit are considerable. By their very nature, the most significant cultural resources are those whose protection and public presentation are most desirable, although in the case of certain sacred sites located on lands administered by Parks Canada, broad public presentation may not be appropriate. In carrying out its commitment to responsible stewardship, Parks Canada must determine how best to promote visitation and public understanding of cultural resources, without diminishing the qualities and attributes that give those resources their value. It must respond to the desire for access while safeguarding the irreplaceable resources being visited, and the values that those resources represent. It must encourage appropriate contact with cultural resources while not consuming those resources. It must integrate the management of the cultural and the natural realms. Finally, it must determine the most effective means of protection and presentation within available financial and human resources. These challenges require a policy framework which is holistic, which deals with cultural resources as symbolic as well as physical entities, and which is motivated by a sense of responsibility to pass on the legacy entrusted to us.

Cultural resource management depends on a strong corporate or organizational ethic embodied in a set of principles. In its practice, cultural
resource management integrates professional, technical and administrative activities to ensure that cultural resources are identified and evaluated, and that their historic value is duly considered in all actions that might affect them. In the case of cultural heritage sites, cultural resource management provides the means for ensuring their commemorative integrity.

Canadian efforts to protect and present cultural resources for public benefit are part of a worldwide endeavour to protect, understand and appreciate our human heritage. In its stewardship of treasures of national historic significance as well as of other valued cultural resources, Parks Canada acts within a national and international community of agencies that share the responsibility of managing our human heritage for public benefit. In so doing, Parks Canada both contributes to and benefits from the development of a national and international body of principles and practices of cultural resource management.

To promote awareness of cultural resource management, Parks Canada encourages all stewards of cultural resources to apply cultural resource management principles and practice. In addition to managing the cultural resources entrusted to it in accordance with the policy, Parks Canada will make this policy available to other trustees of cultural heritage, including the owners of national historic sites.

**OBJECTIVE**

To manage cultural resources administered by Parks Canada in accordance with the principles of value, public benefit, understanding, respect and integrity.

1.0 **Principles of Cultural Resource Management**

In managing cultural resources Parks Canada will adhere to principles of value, public benefit, understanding, respect, and integrity, and will proceed on a case-by-case basis. These principles are not mutually exclusive; they share common elements and work most effectively when considered as a whole rather than individually. Applying the principles is the key to sound cultural resource management, because the principles provide the means for determining the appropriateness of actions affecting cultural resources. Given the complexity of cultural resources, it is apparent that they cannot be managed on the basis of a general list of approved or prohibited activities. Consequently, all activities that might affect cultural resources, including activities relating to conservation and presentation, will be evaluated, and when approved, implemented in accordance with these principles.

An activity that compromises the commemorative integrity of a national historic site will not be permitted.

The principles provide requisite guidance for treating both the material and non-material aspects of heritage conservation and presentation.

The principles of this policy apply to all agreements that Parks Canada makes with others respecting the management of cultural resources.

The guidance provided by these principles is made more explicit in directives, manuals, standards and guidelines developed by Parks Canada.

1.1 **Principles of Value**

1.1.1 For purposes of this policy, resources that have historic value are called cultural resources. It is for this value that cultural resources will be safeguarded and presented for public benefit.

1.1.2 While all cultural resources are valued, some cultural resources are deemed to be of the highest possible value and will be protected and presented accordingly.
Parks Canada will value most highly those cultural resources of national historic significance.

1.1.3 Cultural resources rarely occur in isolation. They often derive their value from being part of a place or a site.

Parks Canada will value cultural resources in their context and will consider resources as a whole as well as discrete parts.

1.1.4 Cultural resources will be valued not only for their physical or material properties, but also for the associative and symbolic attributes with which they are imbued, and which frequently form the basis of their historic value.

1.1.5 A cultural resource whose historic value derives from its witness to many periods in history will be respected for that evolution, not just for its existence at a single moment in time.

Parks Canada will reveal an underlying or previous physical state of an object, structure or site at the expense of later forms and material only with great caution; when historic value is clearly related to an earlier form, and when knowledge and existing material of that earlier form allow.

1.1.6 A cultural resource that derives its historic value from the interaction of nature and human activities will be valued for both its cultural and natural qualities.

1.1.7 Natural ecosystem features and paleontological resources frequently form an integral part of the history and landscape of national historic sites and historic canals. These features and resources in national historic sites and historic canals will be valued in a manner that reflects the role of Parks Canada as an important environmental steward.

Parks Canada will conduct a natural ecosystem feature inventory on lands and waters within national historic sites and historic canals to determine the state of such features and to identify natural features of special significance that should be protected.

Wildlife habitat of species that have been designated as rare, threatened or endangered by the Committee on the Status of Endangered Wildlife in Canada (COSEWIC), or by the province or territory in which the area is located, will be protected.

Natural ecosystem features, which by virtue of their strategic location and physical or biological characteristics are of value to government agencies involved in environmental monitoring and programs to maintain biodiversity and genetic resources in Canada, will be protected.

Natural ecosystem features of special significance will be managed in accordance with the principles and relevant policies regarding the protection and management of natural ecosystems set out in section 3.0 of the National Parks Policy, and by the applicable directives and procedures used to guide the management of natural ecosystem features in the national parks.

National historic sites and canals with extensive areas may be zoned in order to indicate the types of activities that are appropriate in different parts of the site or canal.

1.2 Principles of Public Benefit

1.2.1 Cultural resources are dedicated and held in trust so that present and future generations may enjoy and benefit from them.

Public benefit of cultural resources will be most appropriately achieved by the protection
and presentation of that which is of national historic significance.

- The continuing public benefit of a resource will be assured through ongoing maintenance and care.

1.2.2
To understand and appreciate cultural resources and the sometimes complex themes they illustrate, the public will be provided with information and services that effectively communicate the importance and value of those resources and their themes.

- Parks Canada will select the means for presenting the history and cultural heritage of its national parks, national historic sites and historic canals in ways that recognize the nature and interests of the public it serves.

1.2.3
Parks Canada will encourage public involvement in the protection and presentation of cultural resources at national parks, national historic sites and historic canals.

- Appropriate uses of cultural resources will be those uses and activities that respect the historic value and physical integrity of the resource, and that promote public understanding and appreciation.
- Information about cultural resources will be made available. In cases where revealing the location of a cultural resource could constitute a threat to the resource (certain fragile archaeological remains, for example), information about location may be withheld.
- In the interest of long-term public benefit, new uses that threaten cultural resources of national historic significance will not be considered, and existing uses which threaten them will be discontinued or modified to remove the threat.

1.3 Principles of Understanding

1.3.1
The care and presentation of cultural resources require knowledge and understanding of those resources, of the history they represent, and of the most effective means to communicate that history to the public for whom the resources are held in trust.

- Cultural resource management activities will be based on knowledge, and professional and technical skills and expertise.
- Parks Canada will integrate the contributions of relevant disciplines in planning and implementing cultural resource management, and will place a particular importance on interdisciplinary teamwork.
- Adequate research, recording and investigation will precede any action that might affect cultural resources and their presentation.

1.3.2
The importance of genuine public understanding, appreciation and enjoyment of cultural resources will be recognized. The understanding of cultural resources requires knowledge that goes beyond a simple knowledge of the physical properties of the resources.

- Genuine public understanding may require the recording and use of traditional and other knowledge that previously did not exist in written form.
- Parks Canada will proceed on the basis that the meaning of cultural resources may exist in a continuum ranging from national significance to local or special significance for particular people, and that the two orders of significance can be communicated.
- Parks Canada will identify the nature and various interests of the public to develop effective means of communication.
1.3.3
Information about cultural resources will be recorded and those records will be maintained for the future.

- Parks Canada will maintain up-to-date inventories and records on its cultural resources. Dossiers will contain basic data and related documentation, including the results of research and evaluation, records of decision and actions taken. Heritage recording will be carried out on cultural resources of national historic significance.
- When faced with loss due to human or natural forces and when long-term stabilization or salvage is not possible, cultural resources will be recorded and documented to preserve a public record.

1.3.4
Parks Canada will avoid actions that reduce the potential for long-term conservation and for future understanding and appreciation of a cultural resource and the legacy that it represents.

1.4
Principles of Respect

1.4.1
Those who hold our heritage in trust are responsible for passing on that heritage in ways that maintain its potential for future understanding, appreciation and study. As an irreplaceable part of this heritage, cultural resources will be managed with continuous care and with respect for their historic character; that is, for the qualities for which they are valued.

- Parks Canada will respect the distinguishing features that constitute the historic character of a cultural resource.
- Uses of cultural resources will be respectful of, and compatible with, their historic character. This applies equally to the use of landscapes and structures, the display or use of artifacts and to public activities affecting cultural resources.
- Appropriate visitor activities and public uses of cultural resources at national parks, national historic sites and historic canals will respect the resources and be consistent with the purpose, themes and objectives of the park, historic site or canal.

1.4.2
Trustees are obliged to act in ways that best ensure the continued survival of the resource, with minimum deterioration.

- Parks Canada will respect cultural resources by using the least destructive and most reversible means to accomplish objectives. Variance from the path of least intrusive action must be justified.
- Respectful, preventive and continuing maintenance will form an indispensable part of cultural resource management.

1.5
Principles of Integrity

1.5.1
Parks Canada will present the past in a manner that accurately reflects the range and complexity of the human history commemorated at or represented in a national historic site, historic canal or national park.

- Evidence that is specific to a resource or site will always be preferred to general evidence of a type or period.
- There are times when one may have to rely on evidence that is indirect, but which is consistent with what is highly probable in the light of known facts and patterns. Conservation and interpretation based on such evidence will be permitted only when the activities founded thereon are based on extensive knowledge, when they are carefully documented and recorded, and when, with respect to the physical features that constitute the historic character of a cultural resource, they are reversible.
The use of indirect or comparative evidence will be acknowledged.

History will be presented with integrity. This will include the presentation of differing contemporary views, perspectives informed by traditional knowledge, and later interpretations. Parks Canada will not play the role of arbiter of Canada's human history.

Depictions of the past without basis in knowledge will not be considered.

1.5.2
Cultural resources should be distinguishable from, and not overwhelmed by, efforts to conserve, enhance and present them.

- New work of all kinds will be distinguishable from the work of the past.
- New work will be sensitive to the historic character of the resource or resources of which it forms a part and will not overwhelm those resources.
- Reconstructions and reproductions of past forms should not be confused with what is genuinely the work of the past. Reproductions and reconstructions will be suitably marked so as to distinguish them from the original and, in the case of national historic sites, will not be used when they impair the commemorative integrity of those sites.

2.0
The Practice of Cultural Resource Management

Parks Canada will apply the principles of this policy within a practical framework of cultural resource management. The practice of cultural resource management is not itself a formal process distinct from the activities and processes already in place; rather, it integrates those activities and processes within an overall policy structure.

The practice of cultural resource management requires that four elements be in place in all decision-making that affects cultural resources:

- the inventory of resources;
- the evaluation of resources to determine which are to be considered as cultural resources and what it is that constitutes their historic value;
- the consideration of historic value in actions affecting conservation and presentation; and
- monitoring and review to ensure that conservation and presentation objectives continue to be met effectively.

The practice of cultural resource management provides a framework for decision-making rather than a set of predetermined answers. Its aim is to ensure that the historic character for which resources are valued is identified, recognized, considered and communicated.

The practice of cultural resource management in Parks Canada recognizes those international conventions and federal policies that encourage the consideration of heritage value in management; for example, the World Heritage Convention, the Environmental Assessment and Review Process, the Federal Heritage Buildings Policy and the Federal Policy on Land Use.

2.1
Inventory of Resources

All resources administered by Parks Canada will be given initial consideration as cultural resources within the meaning of this policy.

2.1.1
Parks Canada will develop and maintain inventories of all the resources it administers for the purpose of determining which resources should be identified as cultural resources.

2.1.2
All buildings administered by Parks Canada that are 40 years old or older will be identified for the purposes of applying the Federal Heritage Buildings Policy.
2.2 Evaluation of Resources to Determine Cultural Resources and Their Historic Value

Evaluation enables Parks Canada to determine which resources are cultural resources and what constitutes their value; that is to say, what particular qualities and features make up the historic character of a cultural resource. An understanding of the historic character of a resource focuses the program’s efforts at protection, presentation and appropriate use.

Ministerial plaques and monuments will be managed in accordance with this policy. Resources will be evaluated for their historical associations, their aesthetic and functional qualities and their relationships to social and physical environments, for purposes of determining which of the following three levels should be ascribed to a resource:

2.2.1 Level I:

National historic significance is the highest level assigned to a cultural resource in the custody of Parks Canada. National historic significance will be determined in accordance with the National Historic Sites Policy. It should be noted that there are national historic sites within the boundaries of national parks and that a number of the historic canals are also national historic sites.

2.2.1.1 Evaluation to determine national historic significance is undertaken by the Historic Sites and Monuments Board of Canada. Its recommendation to the Minister, and any subsequent Ministerial designation, may specify which resources within a designated national historic site are themselves of national historic significance.

2.2.1.2 Where a Ministerial designation is not specific with respect to the national historic significance of resources at a national historic site, the program will apply the commemorative intent of the designation to determine which resources are to be specifically considered of national historic significance.

2.2.2 Level II:

A resource that is not of national historic significance may have historic value and thus be considered a cultural resource.

2.2.2.1 Parks Canada will establish and apply criteria to determine which resources under its jurisdiction are Level II. A resource may be included in this category by virtue of its historical, aesthetic or environmental qualities. Criteria will also give consideration to such factors as regional or local association; or provincial, territorial or municipal designations.

2.2.2.2 Buildings that are designated "classified" or "recognized" in accordance with the Federal Heritage Buildings Policy will automatically be considered as Level II cultural resources, unless they meet the requirements that have been described for Level I cultural resources. Buildings may also be considered Level II cultural resources in accordance with criteria described in 2.2.2.1, above.

2.2.3 Other:

While all resources under the administration of Parks Canada deserve initial consideration as cultural resources, resources that are determined, upon evaluation, not to meet criteria established for Levels I and II are exempted from this policy, and will be managed under other appropriate processes and policies.

2.2.3.1 Resources evaluated and deemed not to be
cultural resources for purposes of this policy may be re-evaluated at a later date.

2.3 Consideration of Historic Value in Actions Affecting Cultural Resources

Cultural resource management requires that the concept of historic value of cultural resources be fully integrated into the planning and delivery of conservation, presentation and operational programs.

2.3.1 Planning processes will recognize that resources of national historic significance are of highest value, and that resources of historic value are at the second level of importance.

2.3.2 In all actions that affect cultural resources, Parks Canada will consider the potential consequences of proposed actions and the cumulative impacts of those actions on the historic character of those resources, and will plan and implement measures that respect that historic character.

2.3.3 When a proposed action on lands or waters administered by Parks Canada requires an environmental assessment, that assessment will include consideration and mitigation of the impacts of the proposed action on cultural resources.

2.3.4 Interventions proposed to buildings designated "classified" under the Federal Heritage Buildings Policy will be submitted for review to the Federal Heritage Buildings Review Office.

2.3.5 In the case of buildings designated "recognized" under the Federal Heritage Buildings Policy, proposed interventions will be reviewed by the department, except for disposals and demolitions which will be submitted for review to the Federal Heritage Buildings Review Office.

2.4 Monitoring and Review of Ongoing Activities

Management processes will include the review and monitoring of activities that affect cultural resources and their presentation.

3.0 Activities of Cultural Resource Management

3.1 Corporate Direction

Parks Canada will ensure the application of the principles and practice of cultural resource management in all activities that may affect cultural resources and the historic character of those resources.

3.1.1 The principles and practice of cultural resource management will apply to those contracts, leases, licences, concessions or agreements that affect cultural resources administered by Parks Canada.

3.2 Planning

Effective planning sets out the ways and means by which cultural resources will be cared for and presented. Planning activities flow from policy objectives and adhere to policy principles. Through these activities Parks Canada ensures that the elements of good cultural resource management practice are in place in all systems and processes.

Long-range direction for the management of the cultural resources at each national park, national historic site and historic canal is established through the processes of management and service planning.

3.2.1 Given the multi-disciplinary nature of cultural
resource management, planning practices will integrate in a timely fashion the contributions of responsible disciplines.

3.2.2 Management planning for a national historic site will be based on the commemorative objectives that led to the designation and acquisition of the site. Primary themes developed in the course of management planning will be consistent with that designation. When, as a result of further research, it is considered that a primary theme should be changed, the matter will be referred to the Historic Sites and Monuments Board of Canada. The goal of management planning for national historic sites is to ensure the commemorative integrity of national historic sites and the application of cultural resource management principles and practice.

3.2.3 Management plans for national historic sites that have been designated World Heritage Sites will contain strategies for protecting and promoting the values that resulted in this international designation.

3.2.4 Management planning that affects cultural resources in national parks will deal with cultural resources on the basis of this policy and will be consistent with human history themes established for a park.

3.2.5 Because cultural resources are managed for public benefit, public consultation is essential in planning. The principles of this policy will form part of the terms of reference for all public consultation regarding the management of cultural resources.

3.2.6 Parks Canada will cooperate actively with other appropriate agencies with respect to shared cultural resource management concerns in land use planning, tourism and marketing.

3.2.7 If, following the acquisition or establishment of a national park, national historic site or historic canal, additional lands or objects are required to meet program objectives, these will be identified and acquired in accordance with established authorities and planning processes.

3.2.8 When regulations are considered necessary for the effective management of public activities at a national historic site administered by Parks Canada, regulations made under an appropriate statutory authority will be applied.

3.3 Research

Ongoing research and investigation will be carried out as they are essential to the success of cultural resource management. Research is fundamental to the achievement of conservation objectives, high-quality interpretation and public programs, and the advancement of knowledge.

3.3.1 Research and the results of research will be the basis for activities that have an impact on cultural resources and their presentation.

3.3.2 Results of research will be made available to the public in the form of publications and other media.

3.3.3 Parks Canada will cooperate with other professionals, research agencies and individuals to achieve mutual objectives.

3.4 Conservation

Conservation encompasses the activities that are aimed at the safeguarding of a cultural resource so as to retain its historic value and extend its physical life. There are conservation disciplines
that address different kinds of cultural resources. All share a broad concept of conservation that embraces one or more strategies that can be placed on a continuum that runs from least intervention to greatest; that is, from maintenance to modification of the cultural resource.

3.4.1 General

3.4.1.1 In planning conservation activities Parks Canada will ensure first and foremost the basic protection of its cultural resources. With regard to cultural resources, the highest obligation is to the protection and presentation of resources of national historic significance.

3.4.1.2 In undertaking conservation activities Parks Canada is especially cognizant of the principles of respect for the existing form and material that constitute the historic character of a cultural resource. Conservation activities will therefore involve the least possible intervention to achieve objectives.

3.4.1.3 In dealing with issues relating to the protection of existing fabric and enhancement through modification for presentation, Parks Canada will apply the five principles of cultural resource management to determine the most appropriate treatment. Respect for historic value will be the central consideration.

3.4.1.4 In determining the most appropriate conservation treatment, consideration will be given to the following factors:

i) the historic character of the cultural resource as determined through evaluation;

ii) the physical condition, integrity and context of the resource;

iii) the impact of the treatment on the integrity of historic fabric and character;

iv) available documentation and information;

v) the opportunities for presentation and potential appropriate uses of the resource; and

vi) available financial and human resources.

3.4.1.5 Activities involving some replacement are the most interventionist of conservation activities and will be the last to be considered.

3.4.1.6 The reproduction, reconstruction or replication of a cultural resource will be considered as an interpretative option, not as a conservation activity. These activities are addressed in section 3.5.2 on Interpretation.

3.4.2 Maintenance

Conservation involves not just a once-in-a-lifetime intervention to a cultural resource but equally its routine and cyclical maintenance. Parks Canada will employ conservation maintenance to mitigate wear and deterioration without altering the performance, integrity or appearance of a resource.

3.4.3 Preservation

Preservation encompasses conservation activities that consolidate and maintain the existing form, material and integrity of a resource. Preservation includes short-term protective measures as well as long-term actions to retard deterioration or prevent damage. Preservation extends the life of the resource by providing it with a secure and stable environment.

Preservation activities will involve the least possible physical intervention and, in the case of interim measures, be as reversible as possible, so as not to jeopardize long-term conservation options. In the case of long-term measures,
preservation activities ensure the stability and security of a resource so that it can be kept serviceable through routine maintenance.

3.4.4 Modification

Modification encompasses conservation activities that may change the existing form or materials through treatments, repair, replacement of missing or deteriorated parts, or recovery of earlier known forms and materials. It involves a higher level of intervention than preservation. Modification may be undertaken in order to satisfy new uses or requirements, compatible with the historic character of a resource, as in the case of appropriate adaptive re-use of a structure; or to reveal, recover or represent a known earlier state of a resource, which is called restoration. Modification may involve some replacement of fabric.

3.4.4.1 Parks Canada will base modification on a sound knowledge of, and respect for, the historic character of the resource; particularly as that character is expressed by the existing form and material of the resource.

3.4.4.2 Parks Canada will assess and consider the impact of proposed modification activities on the historic character of cultural resources and will identify and consider the consequences of modification using the cultural resource management principles of value, public benefit, understanding, respect and integrity.

3.4.4.3 Restoration is a modification activity that will require clear evidence and detailed knowledge of the earlier forms and materials being recovered.

3.4.4.4 In the case of sites and structures, modification may include the activities of period restoration, and of rehabilitation for purposes of safety, property protection and access.

i) Period restoration is the accurate recovery of an earlier form, fabric and detailing of a site or structure based on evidence from recording, research and analysis, through the removal of later additions and the replacement of missing or deteriorated elements of the earlier period. Depending on the intent and degree of intervention, period restoration may be a presentation rather than a conservation activity.

ii) Rehabilitation is the modification, including adaptive re-use, of a resource to meet various functional requirements while preserving the historic character of the structure.

3.4.4.5 In the case of artifacts, modification includes removal of the products of deterioration such as corrosion, repair, and the infilling of missing parts. Modification also includes restoration, which returns the object or specimen to a known earlier visual state, using compatible construction methods and materials.

3.5 Presentation

Presentation encompasses activities, facilities, programs and services, including those related to interpretation and visitor activities, that bring the public into contact, either directly or indirectly, with national historic sites, national parks and historic canals. Parks Canada presents these places by promoting awareness of them, by encouraging visitation, by disseminating information about them and about opportunities to enjoy them, by interpreting them and their wider significance to visitors and non-visitors, by providing opportunities for appropriate visitor use and public involvement, and by providing essential services and facilities.
3.5.1

**General**

The presentation of cultural resources offers the public a wide range of opportunities to understand, appreciate and enjoy those resources.

3.5.1.1

Parks Canada will integrate its activities so that efforts at presentation will respect and enhance the historic value of the whole in order to contribute to a positive experience for the public. A knowledge of the nature and interests of the public will enable Parks Canada to enhance that experience by appropriate means of presentation.

3.5.1.2

In planning and implementing the presentation of cultural resources at national historic sites, national parks and historic canals, Parks Canada will cooperate with individuals, organizations and agencies.

3.5.1.3

New structures and buildings at national historic sites will respect and be compatible with the historic character of the site. Such new work will not be detailed in such a way as to be mistaken for a historic structure.

3.5.1.4

Signs at national historic sites and for cultural resources will respect the historic character of those resources. Such signs may be distinctive.

3.5.1.5

Parks Canada will encourage visitors to become familiar with the risks associated with access to cultural resources, and to exercise appropriate responsibility for their own safety. The qualities (historic value) that make access to a cultural resource desirable will not be diminished or destroyed in order to provide access, especially when public safety can be achieved by means other than modification.

3.5.1.6

Information about cultural resources will be accessible to all visitors. Where the location of a resource, service or facility illustrating the historic value of cultural resources prevents access by persons with disabilities, special programs or services will be offered.
3.5.1.7
Information about the richness and diversity of the family of national historic sites and how these sites express various aspects of our national identity will be made available to those who visit national historic sites administered by Parks Canada.

3.5.2
Interpretation

Interpretation seeks to reveal meanings and relationships so that the public will gain an enhanced awareness of what cultural resources signify. It includes the specialized activities by which Parks Canada communicates an understanding and appreciation of the historic value of particular places, things, events and activities to visitors and the public. This communication may be accomplished through firsthand experience of historic places, appropriate use of cultural resources and the use of media. An understanding of public needs and interests is indispensable for effective interpretation, because such understanding makes it possible to identify effective means to communicate the significance of cultural resources.

3.5.2.1
In its interpretive activities Parks Canada will communicate the historic character of the cultural resources being presented, the historical significance of the specific national historic site, national park or historic canal, the relevant links between historical activities and the natural environment and the value of cultural resource management.

3.5.2.2
Where there is a Ministerial designation of national historic significance, the primary interpretive obligation will be to communicate what has been designated as being of national historic significance.
3.5.2.3
In selecting the most appropriate means and media for interpreting cultural resources and themes related to human history, Parks Canada will be guided by Ministerial decisions regarding the purpose and form of commemoration, and will consider the following factors:

i) the commemorative intent, themes, purpose and objectives of the national historic site, national park or historic canal;

ii) the historic value of the resource;

iii) the interpretive potential of the resource and its themes;

iv) visitor needs and expectations;

v) the impact of interpretation activities on the resource;

vi) the availability of knowledge on which to proceed;

vii) opportunities for appropriate visitor use;

viii) the relationship of specific interpretive options to the overall presentation of a site; and

ix) available human and financial resources.

3.5.2.4
Outreach programs will be developed to enhance knowledge and appreciation of national historic sites (including historic canals) as well as cultural resources in national parks and to promote heritage awareness and conservation.

3.5.2.5
Interpretation is an ongoing activity. It will include the maintenance, monitoring and review of interpretation programs.

3.5.2.6
Interpretation need not be complex to be effective. The kinds and levels of interpretation may range from letting the spirit of the place speak for itself to creating a sense of the past, although these forms are not mutually exclusive. No hierarchy of resources or interpretation activities is implied by the following examples, and all may be used at a specific location.

3.5.2.6.1
**Spirit of Place**

Some cultural resources evoke an aura or spirit that speaks directly to visitors with minimal interpretive support material.

This interpretive approach will be considered for resources and complexes that have retained their historic uses or function or whose integrity is intact; whose meaning is readily comprehensible; whose condition will not support more intensive use and development or whose integrity would be compromised by more elaborate development.

3.5.2.6.2
**Interpretive Media**

Parks Canada will use a variety of personal, print, exhibit and electronic media when there is a need to offer background, detail and perspective on the history of cultural resources.

3.5.2.6.3
**Creating a Sense of the Past**

Creating a sense of the past for the visitor is an interactive interpretive approach that may use a combination of the following activities: accurate restoration, reconstruction or replication of cultural resources; volumetric representation(s) of cultural resources; reproduction of period costumes and objects; role playing and representations of past activities. Creating a sense of the past is a comprehensive interpretive option that requires the integration of all aspects of the scene or environment being interpreted (for example, landscape treatments should be consistent with period restorations/reconstructions).

Parks Canada will consider creating a sense of the past as an interpretive option when:

i) there is a specific commemorative objective to provide the visitor with an understanding of a defined period in the
history of a site; and
ii) the action is consistent with the principles of value, public benefit, understanding, respect and integrity of the site and its resources; and
iii) resources and their setting possess sufficient historical integrity to support a complete scene or environment; and
iv) there is sufficient understanding of the resource to ensure accuracy of detail; and
v) cost can be justified in relation to historic significance and interpretive potential; and
vi) in the case of established sites, demonstrated visitor demand or expectations warrant this type of development.

3.5.2.6.3.1 Reproductions may be manufactured and used in interpretation when:

i) sufficient knowledge exists for an accurate reproduction; and
ii) the original object is too fragile or cannot be provided with a stable display environment; or
iii) more than one of an object is required; or
iv) an object is to be handled or consumed.

3.5.2.6.3.2 The use of reproductions will be acknowledged.

3.5.2.6.3.3 In exceptional circumstances, the period reconstruction or replication of whole structures or complexes may be considered as the best possible means of achieving public understanding of a significant aspect of the past. Period reconstruction may not be undertaken unless:

i) reconstruction of the vanished resource would make a significant contribution to historical, scientific or technical knowledge; and
ii) the cost of reconstruction, including its maintenance and operation, can be justified in relation to the historic significance and interpretive potential of the work.

If these considerations are met, reconstruction may only be considered if:

a) there are no significant preservable remains that would be threatened by reconstruction; and
b) the action will not compromise the commemorative integrity of the site; and

3.5.2.6.3.4 The use of period reconstructions will respect existing cultural resources and will be acknowledged.

3.5.2.6.3.5 Period reconstruction and reproductions are by definition contemporary work and have no a priori historic value. Because of their special character, however, they may be managed in accordance with this policy.

3.5.3 Special Programs and Events

Special programs and events offer important opportunities to integrate the presentation of cultural resources at national historic sites, national parks and historic canals with related activities in their surrounding communities and to develop partnerships with others.

In planning for these activities and uses Parks Canada will be sensitive to the size, nature and interests of existing and potential visitor groups, while acknowledging that not all visitor expectations are compatible with the mandate for national historic sites and national parks.

3.5.3.1 Activities that are consistent with the principles of cultural resource management, that are
appropriate to the specific national park, national historic site or historic canal and that are acceptable will be encouraged.

3.5.3.2
Where warranted, special programs for targeted groups of visitors will be developed.

3.5.3.3
Special events and uses will be encouraged where they contribute directly to public appreciation of the historic themes, resources and opportunities of a national park, national historic site or historic canal.

3.5.3.4
Special events and uses will respect cultural resources and their historic character and will not impair the safety, experience and enjoyment of visitors.

3.5.3.5
Some special events and uses that are otherwise appropriate may depict the past in ways that are not specifically accurate to the site. In cases where such events or special uses are permitted, these discrepancies will be acknowledged.

3.5.3.6
Research and study by others of cultural resources at national historic sites, national parks and historic canals will be encouraged as an appropriate activity when such work respects the principles of this policy and is compatible with visitor activities.

3.5.4
Services and Facilities

3.5.4.1
Facilities and services necessary to achieve public understanding, appreciation and enjoyment of cultural resources will be provided.

3.5.4.2
Services and facilities may be provided through contract, lease, licence, concession or agreement.
GLOSSARY

Accommodation

**substantial:** privately owned and operated low-density, roofed, visitor accommodation located on leased land, and which may provide associated services such as food or equipment rentals in support of the main function of providing visitor accommodation.

**traditional:** low-cost visitor accommodation that includes a variety of backcountry and frontcountry camping opportunities with related amenities; shelters; and privately operated hostels.

Active Management

Any prescribed course of action directed towards maintaining or changing the condition of cultural, physical or biological resources to achieve specific Parks Canada objectives.

Activity Policy

A set of policies governing one of the seven program elements of Parks Canada, which include National Parks, National Historic Sites, Canadian Heritage Rivers, National Marine Conservation Areas, Historic Canals, Federal Heritage Buildings and Heritage Railway Stations.

Appropriate Visitor Activity

An activity which:

- is consistent with these policies and the protection of ecological and/or commemorative integrity of protected heritage areas;
- is especially suited to the particular conditions of a specific protected heritage area; and
- provides the means to appreciate, understand and enjoy protected heritage area themes, messages and stories.

Biosphere Reserves

Representative examples of landscapes, each with their characteristic plants, animals and human uses, which have been given an international designation under Unesco's Man and the Biosphere Programme (MAB), launched in November 1971 by the United Nations Educational, Scientific and Cultural Organization. Each biosphere reserve is made up of a protected "core" of undisturbed landscape (such as a national park), together with nearby areas showing some of the ways in which once-similar landscapes are being managed to meet human needs.

Canadian Heritage River

A river or section of a river which has been determined by the Canadian Heritage Rivers Board to have outstanding Canadian natural heritage, human heritage and/or recreational value.

Canadian History

The record of the entire human past in what is now Canada.

Canadian Parks Partnership

Formed in 1986 as a nation-wide alliance of volunteer cooperating associations, the Canadian Parks Partnership supports National Parks, National Historic Sites and Historic Canals in every province across Canada. It supports the department in accomplishing its mandate, enhancing programs, delivering messages and providing a vehicle for Canadians to participate in and have a sense of ownership of Canada's system of parks, national historic sites and canals. Revenue generated from products, corporate
sponsorships and donations goes into the Partners Parks Fund to support and enhance Parks Canada - Parks Service programs (see Cooperating Association).

**Commemoration**

Ministerial recognition of the national significance of specific lands or waters by acquisition or by agreement, or by another means deemed appropriate within the Minister's authority for purposes of protecting and presenting heritage places and resources, erection of a plaque or monument.

**Commemorative Integrity**

A historic place (national historic site, heritage railway station, federal heritage building, etc.) may be said to possess commemorative integrity when the resources that symbolize or represent its importance are not impaired or under threat, when the reasons for its significance are effectively communicated to the public, and when the heritage value of the place is respected.

**Condominium Ownership**

A form of property ownership in which individual elements are owned by individuals, but common elements are held by all owners as tenants in common.

**Cooperating Association**

A registered, non-governmental, nonprofit corporation which provides services to the public at National Parks, National Historic Sites, and Historic Canals. Cooperating associations and their national umbrella organization, the Canadian Parks Partnership (CPP), are principal partners with Parks Canada in achieving its mandate for heritage protection and education. Through their voluntary efforts and shared objectives the constituency of support for Canada's system of parks and historic sites is greatly enhanced. Through the sale of theme-related products and the conduct of special events, an association may generate revenues for funding activities directly supportive of park, historic site or canal objectives (see Canadian Parks Partnership).

**Cultural Landscape**

Any geographical area that has been modified, influenced, or given special cultural meaning by people.

**Cultural Resource Management**

Generally accepted practices for the conservation and presentation of cultural resources, founded on principles and carried out in a practice that integrates professional, technical and administrative activities so that the historic value of cultural resources is taken into account in actions that might affect them. In Parks Canada, Cultural Resource Management encompasses the presentation and use, as well as the conservation of, cultural resources.

**Cultural Resource**

A human work or a place which gives evidence of human activity or has spiritual or cultural meaning, and which has been determined to have historic value.

**Ecological Integrity**

A condition where the structure and function of an ecosystem are unimpaired by stresses induced by human activity and are likely to persist.

**Ecological Integrity, Maintenance of**

Managing ecosystems in such a way that ecological processes are maintained and genetic, species and ecosystem diversity are assured for the future.

**Federal Heritage Building**
Any federally owned building that has been designated by the Minister of Canadian Heritage under the Federal Heritage Buildings Policy.

**Federal Heritage Buildings Review Office**

An interdepartmental advisory body responsible for identifying which federal buildings merit designation as federal heritage buildings, and for monitoring the conservation and continued use of these buildings.

**Heritage Railway Station**

A railway station that has been designated as a "Heritage Railway Station" by the Minister of Canadian Heritage.

**Heritage Area**

A generic term used to signify those geographical areas which are included within the Parks Canada Program. These include National Parks, National Marine Conservation Areas, National Historic Sites and Historic Canals.

**Heritage Resources**

A Heritage Area, or any natural or cultural features associated with Heritage Areas or potential Areas.

**Heritage Tourism**

An immersion in the natural history, human heritage, the arts and philosophy, and the institutions of another region or country that creates understanding, awareness and support for the nation's heritage.

**Historic Canal**

An administrative term referring to those canals operated by Parks Canada for purposes of navigation as well as for protection, enjoyment and interpretation of their cultural and natural heritage values. Many of these operating canals have been designated as national historic sites under the authority of the *Historic Sites and Monuments Act*, and are managed in accordance with the "administration, preservation and maintenance" clause of that Act.

**Historic Museum**

A museum established under the authority of section 3(e) of the *Historic Sites and Monuments Act* to commemorate a historic place.

**Historic Value**

A value assigned by Parks Canada to a resource, whereby it is recognized as a cultural resource. All resources have historical value; only those which are considered to have importance over and above the historical, have historic value.

**Historical**

Of, relating to, or of the nature of, history, as opposed to fiction. "Historical" refers more broadly to what is concerned with history, whereas the term "historic" refers to having importance in, or influence on, history.

**Hostels**

A public building which offers low-cost, supervised, overnight accommodation for use by families, groups or individuals.

**Indigenous Species**

Organisms that occur naturally in a particular area instead of being introduced, directly or indirectly, by human activity.

**Land Tenure Agreements**

Any form of agreement including lease, licence of occupation or permits, that grants a right of occupancy of Parks Canada - administered lands from the Crown to the holder of the agreement.
Licence of Occupation

A licence granting a right of occupancy of specified lands for a specific purpose, without conferring any interest in the lands.

Management Plan

A document that constitutes the local expression of the general policies of the department and approved by the Minister following extensive public participation. This plan directs the long-term development and operation of a park, national historic site or canal. It constitutes a framework within which subsequent management, implementation and detailed planning will take place.

National Historic Site

Any place declared to be of national historic interest or significance by the Minister responsible for Parks Canada.

National Marine Conservation Areas

A designated marine area set aside in accordance with the National Marine Conservation Area Policy.

National Park

Natural area of land and/or sea, designated to (a) protect the ecological integrity of one or more ecosystems for present and future generations; (b) exclude exploitation or occupation inimical to the purposes of designation of the area; and (c) provide a foundation for spiritual, scientific, educational, recreational and visitor opportunities, all of which must be environmentally and culturally compatible.

In Canada, the word also means a national park as described in Schedule 1 of the National Parks Act. It is an area which has been identified as a natural area of Canadian significance, which has been acquired by Canada and designated by Parliament as a national park, and over which Parks Canada has been given administration and control under the authority of the National Parks Act. It is managed for the benefit, education and enjoyment of Canadians so as to leave it unimpaired for future generations.

Natural Areas of Canadian Significance (NACS)

A natural area which provides outstanding representation of the geology, physiography, vegetation and wildlife that is characteristic of its larger natural region. A potential national park is selected from among NACS within a natural region not represented in the system of national parks.

Park Conservation Plan

A management document that contains objectives and action plans for the protection and management of a park's natural ecosystems and components.

Presentation

Activities, services and facilities that bring the public into direct or indirect contact with national historic sites, national parks and historic canals, and the resources associated with them.

Proponent

The individual or organization intending to undertake a project or activity that is subject to the federal environmental assessment and review process.

Protection

With respect to ecosystems, it means regulatory,
resource management and public education programs aimed at ensuring they are maintained in as natural a state as possible. In the context of cultural resources, protection has a range of meanings. It may refer to the basic maintenance of a resource, often as a preliminary to other work; it may be used as a synonym for preservation or conservation, or it may refer to an administrative regime under which a site/resource is managed or protected.

**Protected Heritage Areas**

Protected heritage areas are:
1. areas that have been accorded "protected" status, because of their natural or cultural qualities, through acquisition or application of land-use controls;
2. as well as areas that have been recognized as having natural or cultural heritage value and which require some form of protected status in order to ensure their long-term protection.

In the former case, management practices flow from the protected status; in the latter, management focuses on the need to devise an appropriate form of protection status. "Protected Heritage Areas" include, but are not limited to, all the program elements and activities set out in this Policy.

**Recognition**

A term used to indicate that a heritage resource (natural or cultural) has significance to all Canadians and warrants protection and presentation, either directly or indirectly, through one of the Parks Canada programs.

**Seasonal Camping Area**

An area in a visitor centre in which individual lots can be developed, and where moveable buildings can be placed, for a limited annual season under the authority of a seasonal camping permit; the permit gives no interest in the land to the permit holder. The areas exist only in the communities of Wasagaming in Riding Mountain National Park, and Waskesiu in Prince Albert National Park.

**Seasonal Cottage Residence**

The residential use of Parks Canada administered lands, held under a lease, which restricts occupancy of the cottage to a specified period of the year, normally April 1st to October 31st.

**Service Plan**

A document that translates the conceptual direction of the Management Plan into a detailed offer of service to the public, with an implementation strategy.

**Sustainable Manner**

The use of resources in a way that ensures their integrity is not destroyed.

**Sustainable Use**

A general term meaning that people can gain direct and indirect benefits from heritage resources over the long term, without destroying them.

**Visitor Activity Management Process**

A decision-making framework used by Parks Canada to contribute to the preparation, integration and implementation of the public opportunity portion of management plans and service plans. This framework applies to both new and existing parks, historic sites or canals and assists in: identifying opportunities and assessing public needs related to public understanding, appreciation and enjoyment; visitor activities planning, definition of levels of service, and operation of facilities; and evaluation of effectiveness in providing service to the public consistent with the Parks Canada mandate.

**Visitor Risk Management**
A decision-making framework, based upon policy and directives, to structure visitor safety programs. Visitor risk management guides the development of a risk assessment and subsequent risk control measures. Visitor risk management determines appropriate levels of service to manage existing, new, potential, or shifting activity risk levels within a protected heritage area.

**Visitor Activity**

Educational or recreational pursuits that contribute to an understanding, appreciation and enjoyment of heritage resources.

**Volumetric Representation**

A representation that recreates the basic form (volume) of a cultural resource using techniques that do not entail the use of materials, details or construction methods of the original.

**Volunteer**

A person, or group, who has signed an agreement to contribute time and talent to complete a project without pay.

**Wilderness**

"An enduring natural area of sufficient size to protect pristine ecosystems which may serve physical and spiritual well being. It is an area where little or no persistent evidence of human intrusion is permitted so that ecosystems may continue to evolve." National Wilderness Colloquium (1988).

**World Heritage Site**

A cultural or natural site that is designated as having outstanding universal value by the World Heritage Committee, according to its criteria. The committee was established to oversee implementation of Unesco's 1972 World Heritage Convention.

EMERGENCY PREPAREDNESS PLAN

GENERAL

1.1 Introduction

The Land Protection section of Dept of Agriculture is charged with the operation and maintenance of dykes and aboiteau structures throughout the province along the shores of the Bay of Fundy. The section is also charged with the operation and maintenance of flood control dams in the Musquodoboit area.

The province is broken into areas that are designated to individual Aboiteau Superintendents. These superintendents are based in areas around the province with head office in Truro.

The dykes maintained by the Dept of Agriculture are maintained to an elevation that will prevent topping on normal tide conditions. However these dykes may be at risk of topping do to extreme storm events. Inspections of these dykes are carried out on an annual basis or after extreme storm conditions.

This plan sets forth a detailed list of locations and contacts that may be required by the Land Protection section to protect life and property if an emergency should occur. Emergency events would include dyke overtopping, dyke breaches, aboiteau failure, limited aboiteau failure, dam failure, storm events, fresh water flooding, gate operation at the Avon River Causeway and dams failures of Nova Scotia Power on the Avon system near Windsor.

Within the Land Protection all staff are familiar with the operations of the dyke systems. All staff could move from area to area if an emergency should occur. With this document the list of contacts would assist staff to function reasonably well in other districts when required.

The only area that would be a bit more difficult to manage would be the Avon River Causeway which would require knowledge on the operating procedures.

1.2 Descriptions of Dyke Location

The dykes are located through the province providing protection for farm land, roads, railroads, residential and commercial properties and other various type of infrastructure.

The following is a general list of where these dykes are located.

1.2.1 Truro Office

The area covered from the Truro office include Colchester County, Truro, Stewiacke area, Shubenacadie area, Maitland area and the Musquodoboit dams. This area includes 217,480 ft of dyke, 72 structures and 10 flood control structures in the Musquodoboit area.

In this area 124,890 ft of dyke is critical in protection of many types of infrastructure. The most critical area would be Truro and the surrounding area.
1.2.2 Amherst Office

The area covered from the Amherst office includes Amherst, Advocate, River Hebert, Minudie and other areas in Cumberland County. This area includes 171,000 ft of dyke with 58 structures.

In this area 96,800 ft of dyke protect many types of infrastructure. The most critical areas would be Amherst, Advocate & River Hebert.

1.2.3 Kentville Office

The Kentville office covers Kings, Annapolis, Digby and Yarmouth Counties.

Kings County has 161,719 feet of dyke with 45 aboiteau structures. The dykes in Kings County protect five sewage treatment plants, 34 residential buildings and 29 commercial buildings. All 12 of these dykes protect sections of roads and highways that add up to 50,000 feet.

Annapolis County has 33,739 feet of dyke below the causeway, with 16 aboiteau structures. Above the causeway, which is controlled by the Power Corporation, there are approximately 400 acres of dykeland along both sides of the Annapolis River. There are 38 different sections of dykeland above the causeway. Twelve of these protect sections of main highways, 17 protect sections of utility lines, sewer plants and buildings. Nova Scotia Power has two power dams that drain into the Annapolis River and has mapped the area for flooding if a dam failure should occur.

Digby County has two dykes, approximately 12,000 feet of dyke with three aboiteau. Over 9,000 feet of road would be flooded if the dykes failed.

Yarmouth County has two dykes that are 1,153 feet in total, with two aboiteau that protect 3,500 feet of road.

1.2.4 Windsor Office

The area covered from the Windsor office includes Windsor Brooklyn area and the Noel, Burntcoat Area. This area includes 106,000 ft of dyke with 55 structures.

In this area 51,200 ft of dyke protect many types of infrastructure. The most critical area being the town of Windsor.

The Avon river causeway is also located in the area which protects 3400 acres from tidal flooding. It is highly unlikely that there would be tidal flooding from topping of this causeway. The main concern would be fresh water flooding caused by a gate malfunction during a high runoff event or a dam failure on the Avon Hydro System.

3 EMERGENCY RESPONSE PROCEDURES

3.1 Definitions and Ramifications

Potential Dyke Overtopping

This would be an instance where the weather warnings have been issued to the effect that very high winds, or tidal surge is predicted. This may affect some or all or none of the dykes in a particular area. Whether dykes are affected depends on if it’s a tide surge that effects all of the Bay of Fundy. Sometime surges may only effect dykes exposed in a certain direction. Very little preparation can be made for this except make people aware of the event.

Dyke Overtopping

This in most instances would be caused by tides being higher than predicted, caused by tidal surge or wind in exposed areas. If this occurs in winter when the dyke is frozen should cause little damage to dyke, however could cause widespread flooding. If this occurs any other time of year but especially in the spring when the frost is coming out of the dyke it could lead to dyke breach.

Dyke Breach

Depending on the size of the breach could have severe consequences. A short breach eg. 100 feet could possibly be repaired before the next high tide depending on accessibility and time of becoming aware of breach. A large reach could mean that the area could be out to tide for a considerable length of time and extent of flooding would depend on what part of the tide cycle the breach occurs on.

Aboiteau Failure

This would occur if an aboiteau structure actually collapsed or if dyke over the aboiteau failed. This situation could lead to prolonged tidal flooding of the area concerned. Actual length of time depending on degree of failure and if temporary repairs were feasible.

Limited Aboiteau Failure

This could consist of a number of scenarios, the most common being loss of gate or gate failure. These can generally be repaired in a relatively short time frame and would only cause very limited flooding if any, again depending on fresh water runoff at the time and size of structure and if one of a number of gates failed or if it’s the only gate. Another cause of failure could be if blockage of upstream end occurred. Upstream blockage can be difficult to remove if it occurs during high runoff event and more so if it’s a single barrel structure, generally can be remedied within several days. Could cause temporary fresh water flooding.

Dam Breach

The dams refers to flood control dams in the Musquodoboit River Watershed. A breach would likely only occur during very large runoff event. It could cause large volumes of water to be released during a time when brook and river flows are already high. Has the potential of causing localized
damage and extreme flooding for a distance downstream of structure.

**Fresh Water Flood**

A fresh water flood could occur as a result of aboiteau upstream blockage, but most likely result from either an extreme rainfall even or ice blockage in channel below the aboiteau structure. Flooding as a result of extreme runoff event is generally over within 2 days of the event occurring. Flooding as a result of ice blockage is more difficult to determine length of time flooding would persist. Length of time would depend on volume of runoff, how porous the ice blockage, height of tides, and changing elevation of tides.

**Gate Failure - Avon River Causeway**

A gate failure is defined as a failure of the gate operation system. This could be a mechanical or electrical failure that would prevent the normal operation of one or both gates. This would be most critical during a storm event.

**Nova Scotia Power Hydro Emergency**

A Nova Scotia power hydro emergency is defined as an emergency on the Avon Hydro system that would cause an abnormal amount of water to enter Pisiquid Lake causing a change in normal operations at the Avon River Causeway.

### 3.2 Procedures

#### 3.2.1 Dyke Overtopping

1. Be notified or observed by staff.
2. Aboiteau Superintendent go to site, assess the situation.
3. Take appropriate action if any.

#### 3.2.2 Dyke Breach

1. Be notified or observed by staff.
2. Aboiteau Superintendent assess the situation.
3. Take appropriate action.

#### 3.2.3 Potential Dyke Overtopping

1. Be informed of potential storm surge or Aboiteau Superintendent be aware of potential due to location and weather conditions.
2. Aboiteau Superintendent put special emphasis on inspecting the areas of concern.
3. Take appropriate action.

#### 3.2.4 Aboiteau Failure

1. Be notified or observed by staff.
2. Aboiteau Superintendent assess the situation.
3. Take appropriate action.

3.2.5 Limited Aboiteau Failure

1. Be notified or observed by staff.
2. Aboiteau Superintendent assess the failure.
3. Take appropriate action.

3.2.6 Dam Breach

1. Be notified or observed by staff.
2. Aboiteau Superintendent assess the situation.
3. Notify people downstream of situation if situation warrants it.
4. Take appropriate action for repair.

3.2.7 Fresh Water Flood

1. Be notified or observed by staff.
2. Aboiteau Superintendent assess the cause of the flooding.
3. Take appropriate remedial action as situation warrants.

3.2.8 Gate Failure - Avon River Causeway

1. Aboiteau Superintendent take appropriate action for repair.
2. Notify any other agency as appropriate if potential for flooding exists.

3.2.9 Nova Scotia Power Hydro Emergency

1. Notification will come from the Energy Control Center for Nova Scotia power.
2. Following notification check what part of the tide cycle is occurring, gate openings and water level.
3. Determine the severity of the problem and start notification
   1. EMO
   2. Town of Windsor
   3. Chief Engineer
   4. Staff if required
   5. Any other stake holders that should be notified
4. Maintain communication with EMO for updates on the situation.

</table>
The Kings County Municipal Planning Strategy (MPS) was originally adopted in 1979. The Planning Act, 1983, requires a review to be commenced within five years of the effective date of the adopted Municipal Planning Strategy or from the date of its last review.

A review was initiated in 1985 with comprehensive revisions to the Agricultural District policies being approved in 1988 and 1989. That review was continued in 1990 to encompass the other sections of the Strategy.

The background research initiated in 1985 was used as the basis for the review of the Municipal Planning Strategy. Three planning subcommittees, Agricultural Resources, Business Development and Expansion, and Community Services and Development, were established in 1986 to recommend directions for future planning. Their recommendations formed the majority of the review considerations introduced in a Position Paper prepared in August, 1990.

This Municipal Planning Strategy has been updated and revised as a result of the extensive review process initiated in 1985 and completed in 1992.

A separate Municipal Planning Strategy for the Village of New Minas was adopted in 1975 and updated in 1982. Thus the policies of this Strategy do not apply in New Minas.

It is the intention of Municipal Council to prepare and adopt more detailed community plans for the other growth centres as becomes necessary to manage growth and plan for the provision of municipal infrastructure.
LEGISLATIVE MANDATE

The authority for the preparation of the Municipal Planning Strategy for the Municipality of the County of Kings is given pursuant to Part VIII Section 212 of the Municipal Government Act.

The Municipal Planning Strategy consists of a number of statements of policy with respect to the use of lands within the County, the provision of municipal services, and any other matter related to the physical, social or economic development of the County.
1.1 KINGS COUNTY – A BRIEF HISTORY

Kings County, situated on Nova Scotia's northwestern shore bounded by the Bay of Fundy and Minas Basin, has long been known for the influence of the French explorers. However, the first extensive agricultural development began with the arrival of the French Acadians who settled the Minas Region in 1675. This wave of immigration represented an expansion of the colony at Port Royal at the mouth of the Annapolis River some seventy years previously.

The Region offered the newcomers rich soil deposits and the Acadians were quick to recognize the productive potential of the area and proceeded to dyke the tidal marshes, reclaiming several hundreds of acres from the sea. The dyked land readily yielded wheat, rye, hay and other field crops. Imported fruit trees from France were planted, producing orchards that were to gain international recognition. Field crops and vegetable production, livestock and poultry raising, and tree fruit cultivation combined with hunting and trapping enabled the Acadians to become somewhat self sufficient and made the Minas Region the most prosperous area of Nova Scotia.

By 1713, the British, in their struggle with the French, finally gained control of North America. The Acadians refused to swear allegiance to the throne of Great Britain and thus were expelled in 1755. The lands in Kings County vacated by the Acadians were given to New England Planters, and were divided into two townships, Horton and Cornwallis, with the Cornwallis River serving as the boundary between them. This group proceeded to reclaim additional land from the sea and improve the orchards.

The arrival of the Empire Loyalists, after the American Revolution in 1775 - 1783 provided the greatest stimulus to development. Many of these refugees settled in Aylesford township and although they were not primarily farmers, they soon turned to the land. Some of them were actively engaged in experimentation, particularly with different varieties of fruit.

The increase in the population resulted in an expansion of the economic base and new trade markets. The export of farm products, wood, fish, and hides to Halifax, New Brunswick and New England saw the rise in shipbuilding in 1790 which lasted more than a hundred years. Such communities as Scots Bay, Halls Harbour, Baxter's Harbour, Horton Landing, Black Rock, Kingsport, and Canning became the trade and shipbuilding centres of the era.

Wolfville became the education centre of the County in 1839 with the establishment of Acadia University comprising Horton Collegiate Academy, Acadia College and Acadia Ladies Seminary. Elsewhere, small manufacturing establishments sprang up including flour mills, cheese factories, tanneries, and a brick-making plant in Avonport by 1877.

The completion of the Windsor and Annapolis Railway in 1869 stabilized apple production by opening access to new markets, both locally and abroad. Once the County had penetrated the British market in the 1890's, Port Williams served as the
origin for much of the overseas apple shipments. However, with the advent of the railroad, shipbuilding and the coastal communities dependent upon that industry began their decline.

Kings County was officially incorporated as a Municipality in 1879 with the consolidation of the townships of Horton, Cornwallis and Aylesford. This paved the way to the establishment of the present local government structure in the County. The Towns of Kentville in 1886, Wolfville in 1893 and Berwick in 1923 were later incorporated out of the Municipality.

Until the Second World War when export markets almost collapsed entirely, apples and other tree fruits continued to be a major source of income for County farmers. The establishment of the Aldershot Militia Training Camp in 1904, and the Agricultural Research Station in 1913 at Kentville marked a government commitment to the economic base of the region. This was strengthened in 1941 with the construction of a Canadian Forces Base at Greenwood which has grown to include almost 2,000 servicemen and their families on the base and provide employment for nearly 650 residents in the west end of the County (1990).

Hundreds of farms line the valley floor in Kings County and account for over a third of the Provincial farm cash receipts.

The last twenty-five years have witnessed the agricultural base strengthen its links with food processing industries. Although there has been a diversification of economic activity and the County is not solely dependent on agriculture, over 50% of the estimated value of production in the manufacturing sector is in industries like meat and poultry or fruit and vegetable processing. This fact alone is a reflection of the dominance and continuing importance of the County's natural resource base.

The growth in the development of agriculture as well as forestry and other resources in Kings County has been equalled by urban growth. Communities which originally developed as market centres to serve the primary industrial sector had, by 1970, grown into financial, commercial and institutional centres.

Kentville had become the government and financial centre of Kings County and New Minas was quickly surpassing both Kentville and Wolfville in becoming the regional commercial centre. This urban development boom had been accompanied by a demand for residential lots which were readily available throughout the County. The relatively inexpensive rural land combined with the increasing preference for a rural living environment had encouraged development in the rural areas.

Kings County is fortunate to be able to combine the pleasant rural agricultural setting with the urban conveniences of the towns and villages within a one-hour drive from the Halifax - Dartmouth Metropolitan Area. Thus, it has, and will continue to, become one of the most attractive counties for residential development in the Province.

1.2 KINGS COUNTY - PLANNING PROGRAM

1.2.1 The Original Planning Concept - 1979

The need to accommodate growth and to preserve the agricultural resource base of Kings County was recognized in 1979.

The original Kings County Municipal Development Plan consisted of complementary Urban Growth Centre and Rural Land Capability policies to separate and define the urban and rural areas and plan future development within each.

The Growth Centre - Land Capability concept provided for two lifestyles within the County, urban and rural, while remaining sensitive to the pressures which one brings upon the other. The Strategy encouraged urban environments in Growth Centres, a rural development focus in Hamlets, and a strictly rural environment in the remainder of the County with the exception of the Shoreland Districts where cottage development was permitted.

1.2.2 A Review of Performance: 1979 - 1990

Has the Plan achieved the goals and objectives established in 1979? The following brief analysis illustrates that it has.

One issue which influenced the planning program was the amount of non-farm development that was locating on prime agricultural land. Prior to the adoption of the Strategy, 35% of all housing was locating on lands classed as having high capability for agricultural production. Since the introduction of the Agricultural District designation and policies this figure has reduced significantly to 18% during the latter part of the eighties. The majority of new housing has successfully been directed to the Growth Centres or to lands with low soil capability for agriculture.

The policies have, therefore, reduced non-farm development on lands which are reserved for agricultural uses.

Over the same period, residential development in Growth Centres rose from 41% to 53% of the County total. Between 1976 and 1986, the growth centres attracted 72% of the Municipality's population growth. New Minas experienced the largest population increase of 1,300; Coldbrook grew by 700; Kingston and North Kentville grew by over 500; and, Greenwood and Centreville added over 300 to their populations. The Coldbrook - Wolfville corridor attracted 56% of all growth and Kingston/Greenwood attracted 17%, totalling three-quarters of all County growth within these two major
urban areas. This population growth in the Growth Centres represents 75% of the County's growth.

Commercial expansion statistics for the same period further indicate the success of the Growth Centre concept. Total commercial floor space in New Minas increased by 73% to 907,000 square feet while Kingston/Greenwood expanded by 26% to 350,000 square feet. The new K-Mart expansion will add another 150,000 square feet of commercial floor space in Greenwood. Two strip malls have been built in Coldbrook and an additional 40 acres of commercial land was redesignated in 1989 to accommodate commercial development in that community.

The location of the Nova Scotia Youth Centre, a young offenders facility, in Cambridge reinforced that community's role as a regional institutional centre. The new Valley Regional Hospital has located in North Kentville.

The cooperative marketing and development of the Annapolis Valley Regional Industrial Park by the Kings Regional Economic Development Commission also reflects the success of the Strategy's industrial policies, as does the industrial development in Port Williams and New Minas. The Michelin Plant in Cambridge, which had a major employment impact on the central part of the County, increased the viability of that Growth Centre.

The recreation and open space policies have facilitated new community parks in Coldbrook, Waterville, New Minas and Port Williams. The public response to the opening of the Aylesford Lake Park beach illustrates the support for public shoreland access policies and demand for similar facilities.

The above examples illustrate the success of the Strategy planning concepts in directing the County's growth and development. However this growth has led to a need for second generation, more refined, urban planning policies.

The Country Residential Districts have provided an alternative location for rural housing together with resource industrial land uses. A recent industrial development proposal, however, highlighted the potential for conflicts between land uses permitted in those districts.

The challenge to the Council of the Municipality of Kings is to further improve the effectiveness of its land use policies in planning for the future.

1.2.3 The Municipal Planning Strategy - 1992

This revised Planning Strategy retains the basic Growth Centre/Land Capability concept successfully implemented since 1979. Kings County is one of the fastest growing counties in the province in terms of population,
yet it has retained a rural character. This rural character is reflected in the dominant agricultural landscape.

The County's economic growth is dependent upon the County's natural resource base, which has formed the backbone of the economy.

Thus, the Kings County Municipal Planning Strategy for the future confirms the Urban Growth Centre and Rural Land Capability Concept to:

1.2.3.1 **DIRECT THE MAJORITY OF FUTURE POPULATION GROWTH AND ASSOCIATED URBAN SERVICES INTO DESIGNATED GROWTH CENTRES.**

1.2.3.2 **TO PROTECT AND ENHANCE THE HIGH CAPABILITY NATURAL RESOURCE BASE IN RURAL AREAS FOR PRIMARY RESOURCE DEVELOPMENT AND ASSOCIATED RURAL LAND USE ACTIVITIES.**

1.2.3.3 **PROTECT THE CAPABILITY OF THE INLAND LAKES AND COASTAL SHORELAND AREAS TO PROVIDE HIGH QUALITY, SUSTAINABLE RECREATION.**

There is, however, one fundamental change. The original Growth Centre policies treated all Growth Centres the same. This revised planning approach emphasizes the individual character of each Growth Centre and provides a selection of policies and options to enhance and promote their respective unique character and growth opportunities. Policies for the Rural Districts have been refined to strengthen the protection of the County's valuable resource base.
1.3 KINGS COUNTY MUNICIPAL PLANNING STRATEGY - GOALS

The planning concept is directed towards achieving the following goals. Specific objectives are stated within each respective policy section.

1.3.1 Kings County Municipal Planning Strategy - General Goals

The General Goals are:

1.3.1.1 TO FACILITATE A BROAD ECONOMIC BASE BY:

- supporting the continued growth of the agricultural industry;
- providing opportunities for expanded industrial, commercial and tourism development;
- establishing a data base upon which to evaluate locational opportunities for industry within the County;
- identifying capital projects and infrastructure to support development, and setting priorities in relation to the Municipality’s five year capital expenditure program.

1.3.1.2 TO PROTECT THE NATURAL ENVIRONMENT OF THE COUNTY BY:

- providing sewage collection and treatment for all urban growth centres;
- providing a solid waste collection and disposal service throughout the Municipality;
- providing a recycling service;
- initiating a public education program directed towards homeowner responsibility for proper installation, inspection, and maintenance of rural on-site sewage disposal systems;
- providing a treatment facility for disposal of sludge pumped from private sewage disposal systems;
- ensuring the environmental compatibility of development within and adjacent to environmentally sensitive areas;
• establishing and maintaining in conjunction with the appropriate provincial departments an inventory of land uses requiring on site storage of hazardous goods.

1.3.1.3 TO PROTECT AND ENHANCE THE COUNTY’S HISTORICAL AND CULTURAL HERITAGE BY:

• providing for the establishment of a Heritage Advisory Committee and the preparation of a Heritage Bylaw;

• recognizing and planning for unique historical districts;

• providing for opportunities for reuse and continued use of heritage buildings and sites.

1.3.1.4 TO GUIDE GROWTH AND DEVELOPMENT IN WAYS WHICH PROVIDE OPPORTUNITIES TO ENHANCE THE QUALITY OF LIFE IN KINGS COUNTY.

1.3.1.5 TO ENCOURAGE GROWTH TO URBAN AREAS WHERE SERVICES CAN BE PROVIDED IN A COST-EFFECTIVE MANNER.

1.3.2 Kings County Municipal Planning Strategy - Urban Goal

The Urban Goal is:

1.3.2.1 TO DIRECT URBAN GROWTH AND DEVELOPMENT TO DESIGNATED GROWTH CENTRES BY:

• providing for a selection of commercial development opportunities adaptable to the development pattern of each growth centre;

• providing development opportunities for secondary and service industries to locate in the growth centres to strengthen community employment opportunities;

• providing options for accommodating a range of institutional uses and urban community facilities within growth centres;

• providing opportunities for development of a variety of housing options;
• providing a coordinated system of recreation areas and open space lands wherein communities can provide facilities and programs;

• providing a full range of urban services to centres including solid waste recycling, collection and disposal, sewage collection and treatment, water purification and distribution, street lighting, sidewalks, street paving, and storm sewers;

• designating growth centre development boundaries.

1.3.3 Kings County Municipal Planning Strategy - Rural Goals

The Rural Goals are:

1.3.3.1 TO FACILITATE THE GROWTH OF THE AGRICULTURAL INDUSTRY IN THE COUNTY BY:

• designating lands with high agricultural soil capability as protected Agricultural Districts;

• reducing the undue fragmentation of farmland which limits future expansion of agricultural activity;

• encouraging industry associated with agriculture to locate and expand in the County;

• supporting the farm population in their efforts to increase the economic viability of the agriculture industry.

1.3.3.2 TO MINIMIZE AND REDUCE CONFLICTS BETWEEN THE AGRICULTURAL INDUSTRY AND NON AGRICULTURAL DEVELOPMENT BY:

• protecting the prime agricultural areas from the intrusion of uses which are incompatible with or adverse to the future growth of the agricultural sector;

• establishing standards for rural uses including separation distance requirements between certain agricultural uses and incompatible uses and ensuring proper waste disposal practices;
1.3.4 TO DESIGNATE RURAL AREAS OF LOW NATURAL RESOURCE CAPABILITY AS COUNTRY RESIDENTIAL DISTRICTS TO PROVIDE RESIDENTIAL DEVELOPMENT OPPORTUNITIES IN A RURAL SETTING THAT WILL NOT ADVERSELY AFFECT EXISTING OR POTENTIAL PRIMARY RESOURCE ACTIVITIES.

1.3.5 TO RESPOND TO THE GROWING DEMAND FOR SHORELAND RESIDENTIAL DEVELOPMENT AND WATER BASED RECREATION PURSUITS BY:

- providing for the designation of Shoreland Districts to accommodate seasonal and year round residential development;

- establishing environmental performance standards for shoreland development;

- providing for the acquisition and development of shoreland areas for use by the general public;

- providing for the development of commercial facilities serving the shoreland residents and recreation users;

- establishing a long-term policy to protect inland lakes from over development based on lake trophic state and shoreland biophysical capability to accommodate development.
1.3.3.6 TO DESIGNATE HAMLETS AS LOCAL RURAL CENTRES PROVIDING OPPORTUNITIES FOR RURAL HOUSING AND LOCAL COMMUNITY, SOCIAL AND COMMERCIAL SERVICES.

2.1 URBAN DEVELOPMENT POLICIES – GROWTH CENTRES

A major goal of this Municipality is to direct urban growth to designated growth areas. Council has identified and designated twelve areas as Growth Centres. These Growth Centres vary widely in population, growth performance, urban amenities, and respective roles within an urban planning context. The policies of this part of the Strategy apply to the designated Growth Centres.

These urban policies are intended to enhance the urban variety and focus on the distinctiveness of each Growth Centre. Each Growth Centre has developed a different function and character. Recognition of this community uniqueness is fundamental to planning for each Growth Centre's future development.

Most Growth Centres offer similar development options. A selection of opportunities for residential, retail and service facilities for both consumers and businesses is available. Educational, health care and recreation facilities vary from one Centre to the next, and industrial development opportunities are available in some but not every Growth Centre. Equally varied among Growth Centres are the qualitative characteristics such as the physical landscape, the built environment and the social networks.

Council's planning approach for the future provides a range of development options to reflect each Growth Centre's distinct opportunities. The policies are intended to facilitate development in a way suited to the unique character and opportunities of each Growth Centre. Therefore, the policies apply uniformly but are intended to allow flexibility in application to each Growth Centre.

2.1.1 The Coldbrook - Wolfville Urban Corridor Growth Centres

The most densely populated area in the County is the Coldbrook -Wolfville Urban Corridor which contains 40 percent of the total County population, and more than 50 percent of taxable assessment. The range of community services and employment opportunities have stimulated growth in this area. This accounts for the residential growth immediately adjacent to the Towns of Wolfville and Kentville such as North Kentville, New Minas, Coldbrook and Port Williams.

There is a trend towards physical merging of the urban areas as they expand towards each other. This may eventually lead to a settlement pattern with little or no distinct separation between the Towns and the County's Growth Centres. This development trend and the interdependence of these communities makes it necessary to plan for the Growth Centres within a combined Town/County urban area context.

The wide variety of services and development opportunities have made the Coldbrook - Wolfville Urban Corridor a "Regional Centre" in the Annapolis Valley. The majority of future urban growth in the Municipality is expected
and planned to be accommodated within the Coldbrook - Wolfville Urban Corridor. A full range of urban land uses will be encouraged, particularly commercial and industrial development to serve the region and provide increased employment opportunities.

Composed of two Towns and four Growth Centres the Corridor involves three municipal units. The scope of this Strategy is limited to the policies of the Municipality of Kings County for communities within its jurisdiction. However, in formulating these policies Council recognized the influence that the Towns of Wolfville and Kentville exert on the County's Growth Centres.

Council has adopted a Secondary Planning Strategy for Coldbrook, which recognizes and reinforces the unique qualities of the community. The Coldbrook Secondary Planning Strategy focuses on supporting the balanced growth of residential and commercial uses in the community, protection of existing agricultural operations, protection of the environment, and supporting the community’s transportation goals of improving pedestrian and automobile traffic circulation.

2.1.2 Kingston and Greenwood Growth Centres

The growth of Kingston and Greenwood in recent decades has been influenced by the presence of the Canadian Forces Base in Greenwood. Despite Kingston's origins as a distinct community, which predates Greenwood by a century or more, the establishment of the Base stimulated growth. This has led to Kingston and Greenwood becoming the second largest combined urban area in the County. Together, the two Growth Centres serve a major trade area in western Kings and eastern Annapolis Counties. Combined residential growth since 1976 accounts for 17% of that of the whole Municipality.

Planning for these Growth Centres will recognize the differences in existing land use patterns and planning needs.

Council's policies aim to recognize the distinct character and special needs of Kingston and Greenwood. The Policies are intended to foster their individual strengths and identities through a process in which residents and business interests play a guiding role. Promoting Greenwood's regional influence and Kingston's traditional business district within the commercial network are among the special objectives for the Centres. Promoting the combined recreation, residential, and industrial opportunities are among the common objectives. Council has adopted Secondary Planning Strategies in Greenwood and Kingston to augment its general planning policies in those Growth Centres.
2.1.3 Traditional Village Growth Centres

The traditional character of all the villages contributes to the Municipality's overall identity, illustrating, in a tangible way, the cultural heritage of Kings County. In recognition of this, special policies to guide commercial development in Growth Centres with a traditional village character have been established.

While Kingston and Port Williams can be considered in relation to the surrounding Towns and Growth Centres, development in the Growth Centres of Canning and Aylesford are less influenced by surrounding urban areas.

Planning policies are intended to encourage Traditional Village Growth Centres to develop in a way which complements and enhances their historical character.

2.1.4 Residential Growth Centres

Hants Border and Centreville are predominantly residential in nature. As a wide range of urban amenities is available in nearby urban areas, the policies promote the residential character offered by these Growth Centres. It is therefore not the intention to encourage extensive commercial or industrial development in these Residential Growth Centres.

Council has adopted a Secondary Planning Strategy for Centreville, which recognizes and reinforces the unique qualities of the community. The Centreville Secondary Planning Strategy focuses on supporting the residential nature of the community through supporting the maintenance and development of recreational infrastructure and through the protection of the environment.

2.1.5 Village of Cornwallis Square Growth Centres

The Village of Cornwallis Square is unique. It includes two Growth Centres, Cambridge and Waterville, both distinct and separate communities, as well as two Hamlets, namely Grafton and Woodville, within the Village service boundary.

Together the Growth Centres offer a number of opportunities for urban development. Waterville once played an active role in the agricultural industry. This history is reflected by its small commercial core. Future development is expected to be primarily residential with modest commercial growth. Neighbouring Cambridge represents one of the greatest concentrations of employment opportunities in the County.
Council's specific aim is to attract employment generators and encourage residential development in both Waterville and Cambridge.

2.1.6 Growth Centre Designation

Originally the Growth Centre boundaries were based on the goal of conserving resource lands and recognized the existing settlement patterns and municipal servicing availability. These considerations are equally valid in the 1990's and have been expanded to include the following eleven factors:

- the impact of urban expansion on resource development;
- the goals and objectives of this Strategy;
- the financial impact on the Municipality;
- the availability, reliability, feasibility and practicality of providing municipal water and/or sewer services;
- projected growth and development demand;
- the existing development pattern;
- urban form;
- street pattern, function, extension and improvements;
- land use compatibility;
- commercial and community facilities; and,
- neighbourhood traffic and pedestrian linkages and circulation.

2.1.7 Urban Objectives

2.1.7.1 To identify urban areas within the Municipality and designate them as Growth Centres.

2.1.7.2 To provide a policy framework to accommodate urban growth and development within defined areas.

2.1.7.3 To ensure the transition area between rural and urban environments is planned in a way that is sensitive to resource activities in the surrounding rural area.
2.1.7.4 To allocate land for residential, commercial, institutional, industrial, and parks and recreational open space areas.

2.1.7.5 To ensure planning policies and regulations reflect the unique character and opportunities of each Growth Centre.

2.1.7.6 To ensure development occurs in a manner in which regard is given to the protection of the environment.

2.1.7.7 To create an orderly urban land use pattern within the Growth Centres.

2.1.7.8 To optimize the use of community resources and public facilities.

2.1.8 General Urban Policies

2.1.8.1 Council shall define specific areas in which urban growth is to be concentrated. The following shall be designated as Growth Centres:

- AYLESFORD
- CAMBRIDGE
- CANNING
- CENTREVILLE
- COLDBROOK
- GREENWOOD
- HANTS BORDER
- KINGSTON
- NEW MINAS
- NORTH KENTVILLE
- PORT WILLIAMS
- WATERVILLE

2.1.8.2 The boundaries of each Growth Centre shall be delineated on the Growth Centre Future Land Use Maps. In delineating the boundaries of the Growth Centres, Council shall have regard to the following:

a. the impact of urban development on resource development

b. the goals and objectives of this Strategy

c. the financial impact on the Municipality

d. the availability, feasibility and practicality of providing municipal water and/or sewer services

e. projected growth and development demand

f. the existing development pattern
g. urban form
h. street pattern, function, extension and improvements
i. land use compatibility
j. commercial and community facilities
k. neighbourhood traffic and pedestrian linkages and circulation

Future land use maps for each Growth Centre are adopted as part of this Strategy in Part 7, Maps. The Future Land Use Maps for Greenwood and Kingston - Map 7 and Map 9 respectively - are incorporated within the Secondary Planning Strategies for those Growth Centres which are appended as schedules to this Strategy.

2.1.8.3 Development in the Growth Centre of New Minas will be guided by the policies of the New Minas Sector Plan.

2.1.8.4 Council shall establish the following land use Districts to apply to lands within the boundaries of the Growth Centres:

a. General Commercial (G)
b. Central Business (B)
c. Community Commercial (C)
d. Residential Commercial (RC)
e. Highway Commercial (H)
f. Commercial Comprehensive Development (CCD)
g. Industrial (M)
h. Residential (R)
i. Institutional (I)
j. Parks and Open Space (P)
k. Natural Environment (E)
These designations will be shown on the Growth Centre Future Land Use Maps and will be applied based on the existing development pattern and Council's intended future land use pattern.

2.1.8.5 Council shall have regard to Policy 2.1.8.2 and Section 2.11 in considering alterations to the boundaries of the Growth Centres or the creation of a new Growth Centre.

2.1.8.6 Council shall plan for the gradual phasing out of agricultural land uses within the Growth Centres by designating lands for urban land uses.

2.1.8.7 Notwithstanding Policy 2.1.8.6, Council shall allow for the replacement and reconstruction of livestock operations within Growth Centres, provided they were in existence prior to June 19, 1979. The Land Use Bylaw shall list such operations as nonconforming uses and limit the reconstruction in the following manner:

a. maximum floor area of the structure will not be permitted to exceed that of the original building

b. the structure shall be located no closer to residential, or institutional uses, parks, watercourses or community facilities than the original structure

c. a permit for the replacement or reconstruction must be obtained within twelve months of the destruction of the original building

2.1.8.8 Through the policies for Resource Extraction uses contained in Section 4.6, Council intends to control uses accessory to extraction operations. The Resource Extraction (M7) Zone will be used to ensure that after aggregate extraction has occurred and related land uses have discontinued, subsequent land uses are consistent with the policies and the Future Land Use designations of this Strategy.

2.1.8.9 Through policies contained in 4.2.2 Natural Environment General Policies, Council may consider proposals to expand existing commercial and industrial uses onto lands within the Natural Environment District.

2.2 URBAN COMMERCIAL DEVELOPMENT

The Coldbrook - Wolfville Urban Corridor serves the entire County as a regional commercial centre. New Minas, Coldbrook and the two towns provide a full complement of commercial facilities and services. Locally oriented commercial uses have developed and are anticipated in North Kentville. Similarly, Port Williams is expected to contain local convenience services, and may increase the tourism commercial uses reflecting its historical Village character.

Commercial development in Greenwood and Kingston serves the less populated region of western Kings and eastern Annapolis Counties and adds to the commercial facilities in Berwick, Middleton and Annapolis County. Whereas Kingston has community commercial convenience services, Greenwood has a regional shopping centre and serves the immediate area, the military populations and the broader surrounding region.

Aylesford, Canning, Kingston and Port Williams are traditional villages with common ties to the early agricultural industry. Their settlement patterns are typically characterized by a commercial core and industries centred around the early century transportation network. As the full range of commercial services is available in nearby regional centres, it is not likely that extensive land reserves will be required for commercial development in the Villages.

Similarly, communities like Centreville, North Kentville and Hants Border have not experienced the demand for major commercial development. Council recognizes the residential character of these areas and shall encourage convenience commercial development.

Waterville has a fairly compact, yet low density, development pattern. The community has a small commercial core with a fire department, churches and a post office. Reserving the central core as a Commercial District is a practical planning approach. Neighbouring Cambridge has intensive institutional and industrial uses bordering a linear strip of alternating residential and commercial districts along Highway # 1.

Council intends to create a range of commercial district designations to broaden commercial opportunities. Council will define the nature and size of commercial uses permitted within each district reflecting the intended commercial function.

2.2.1 Urban Commercial – Objectives

2.2.1.1 To ensure that commercial development occurs in suitable locations within Growth Centres.

2.2.1.2 To ensure that commercial development is compatible with each Growth Centre's commercial service function.

2.2.1.3 To provide opportunities for commercial uses oriented to tourism and the travelling public.
2.2.1.4 To provide opportunities for commercial recreational uses catering to residents and tourists that are suited to urban areas.

2.2.1.5 To reduce the potential for land use conflicts between commercial and other uses.

2.2.2 General Commercial District Policies

Many Growth Centres have a strip of commercial development along major collector streets. These strips are oriented to automobile access and contain a broad range of retail and business uses. The policies provide for the continued development of commercial strips and permit strip malls and shopping centres within these General Commercial districts.

2.2.2.1 Council shall establish a "General Commercial District" (G) designation and designate lands suitable for a broad range of commercial uses on the Growth Centre Future Land Use Maps. These areas will generally form commercial strips oriented to automobile traffic. In addition to a wide range of commercial uses, Shopping Centres and Community Facilities will be directed to locate in General Commercial Districts.

2.2.2.2 Permitted zones in the General Commercial District are:

a. General Commercial (C1)

b. Shopping Centre (C3)

2.2.2.3 Council shall establish a "General Commercial" (C1) Zone in the Land Use Bylaw for application within the General Commercial District. The C1 Zone will permit uses such as:

a. a broad range of commercial uses individually sited or in a single structure

b. Highway Commercial uses, as defined in Subsection 2.2.5, adjacent to Highway # 101 interchanges

c. Community Facilities as defined in Subsection 2.5.3 and Day Care Facilities as defined in Subsection 2.5.5

d. business and professional offices, and clinics

e. existing residential uses
f. existing Light Industrial Commercial uses as defined in Subsection 2.3.3

g. existing Institutional uses

h. Indoor Recreational uses as defined in Subsection 2.2.7

All other uses in areas zoned C1 shall become non-conforming uses and be subject to the policies contained in Section 2.7, Urban Non-Conforming Uses.

2.2.2.4 Council intends to control the visual impact and traffic circulation concerns associated with commercial development within the General Commercial Districts. The Land Use Bylaw will include provisions that will apply to all future commercial development regarding the following:

a. adequate off-street parking shall be provided to meet the anticipated needs of the commercial uses

b. open storage and outdoor display shall be controlled

c. the siting and characteristics of structures and signs shall be controlled

d. traffic generators will be controlled by limiting such uses as service stations and fast food outlets at any intersection to two corners only

e. landscaping designed to encourage attractive development, as well as to provide a buffer between commercial developments and residential uses

2.2.2.5 Council shall establish a Shopping Centre (C3) Zone in the Land Use Bylaw to accommodate Shopping Centre proposals. The C3 Zone will permit shopping centres, strip malls and uses accessory to shopping centres.

2.2.2.6 Within the General Commercial District Council intends to zone the majority of land General Commercial (C1) and permit shopping centres by an amendment to the Land Use Bylaw to rezone lands to the Shopping Centre (C3) Zone. Existing shopping centres shall be zoned C3.
2.2.2.7 In considering amendments to the Land Use Bylaw to rezone lands C3, Council shall require applicants to satisfy the provisions of the Nova Scotia Shopping Centre Development Act. In addition, Council shall have regard to the potential impacts of such development and shall require applicants to undertake necessary studies to ensure the development will be in keeping with the policies of this Strategy. This may involve the following:

a. technical documentation confirming the need for additional commercial floor space

b. a traffic study to the satisfaction of the Council in consultation with the Nova Scotia Department of Transportation and Infrastructure Renewal. Such a study may be required to demonstrate that traffic circulation within the parking areas and to and from the site will be provided to efficiently accommodate the anticipated traffic flows

c. drawings and plans which show the overall design and character of the proposal including the proposed landscaping, traffic circulation, and signage

d. any information required to demonstrate that all relevant policies of this Strategy can be met including general policies for amending the Land Use Bylaw contained in Part 6 of this Strategy

In considering such amendments Council shall have regard to the above and be satisfied that municipal services and the street network can accommodate the proposal.

2.2.3 Central Business District Policies

The traditional villages have retained their original commercial cores which presents the opportunity to maintain their character as traditional Central Business Districts. These districts generally contain a variety of commercial, community and tourist services and have evolved in a pedestrian, rather than automobile oriented fashion. Commercial policies to accommodate and cultivate the unique development mix and form in Growth Centres where traditional Central Business Districts have evolved are contained in this Subsection.

2.2.3.1 Council shall establish a "Central Business District" (B) designation to be applied to Growth Centres with a traditional
section 2.2

2.2-5

village centre to recognize and encourage a pedestrian scale streetscape. Council intends to designate Central Business Districts on the Future Land Use Maps of the Growth Centres. A wide range of commercial and community services and facilities will be encouraged to locate in Central Business Districts.

2.2.3.2 Council shall establish a Central Business (C2) Zone in the Land Use Bylaw for application in the Central Business Districts. Council intends to zone all land in the Central Business District, Central Business (C2). The C2 Zone will permit uses similar to the C1 Zone as outlined in Policy 2.2.2.3. However, some uses will be prohibited and the development standards will be specifically designed to reflect the intent to maintain and/or create a pedestrian scale of development. Such standards may differ from the C1 Zone by:

a. reducing or waiving the front yard requirements

b. reducing the range of uses to those which can be scaled down to a size compatible with the intended pedestrian scale reflecting the character of the District

c. directing parking to side and rear yards or accepting cash in lieu of parking to finance municipal parking facilities

d. not permitting Highway Commercial uses as defined in Subsection 2.2.5

e. prohibiting outdoor storage and limiting outdoor commercial display

f. reducing the size and/or number of permitted signs

2.2.3.3 Within the C2 Zone, Council shall provide for off-street parking for new commercial uses or accept cash-in-lieu of the provision of parking. Funds received shall be used to purchase, construct and maintain public parking facilities. The cash-in-lieu required under this Policy shall be set out in the Land Use Bylaw and shall be based on the cost of purchasing and constructing individual parking spaces equal to the number required in the Bylaw.
Council may consult with local business organizations and/or the Village Commissions to co-ordinate planning for municipal parking lots.

2.2.3.4 Council shall encourage business associations and merchants to become involved in cooperative efforts to enhance and revitalize all or parts of Central Business Districts. Council intends to support community initiatives where possible in its bylaws such as including architectural control provisions in its Land Use Bylaw and, if applicable, by designating Heritage Conservation Districts in accordance with the General Planning Policies contained in Section 4.4 of this Strategy.

2.2.4 Community Commercial District Policies

Not all Growth Centres have developed commercially to create a General Commercial or a Central Business District. In such areas, an opportunity for commercial and community facilities primarily serving the local residential market and the surrounding rural residents is provided. This approach is intended to preserve the residential setting offered by the Residential Growth Centres. The designation may also be used to provide for satellite commercial districts in the larger Growth Centres as Secondary Commercial areas to either a General Commercial or Central Business District.

2.2.4.1 Council shall establish a "Community Commercial District" (C) designation to provide for small commercial areas in Growth Centres which do not have either a General Commercial District or a Central Business District. The designation has also been applied to recognize existing development in the larger Growth Centres outside of the General Commercial District or the Central Business District. Council intends that these Districts remain compact.

2.2.4.2 Council shall establish a Community Commercial (C5) Zone in the Land Use Bylaw to be applied to lands designated Community Commercial District. Permitted uses in the C5 Zone shall be limited to those of a local service nature. In addition, existing residential uses and new residential units in commercial buildings will be permitted. Community Facilities as defined in Subsection 2.5.3 will also be permitted. All other uses in areas zoned C5 shall become non-conforming and subject to the policies contained in Section 2.7, Urban Non-Conforming Uses.
2.2.4.3 Provisions in the Land Use Bylaw will limit the scale of the commercial uses and any related outdoor storage and display. The Bylaw will also provide for landscaping between commercial uses and abutting residential uses to reduce the visual impact of commercial development on surrounding land uses.

2.2.4.4 Council may recognize existing commercial uses in Residential Districts by zoning them C5 provided they are located on Major Collector Streets. It is not the intention that additional C5 Zones will occur in Districts other than Community Commercial Districts.

2.2.5 **Highway Commercial District Policies**

To provide opportunities for commercial uses orientated to the travelling public in proximity to the interchanges along Highway # 101, a Highway Commercial Zone has been established. Highway Commercial uses will be accommodated within the General Commercial Districts in Aylesford and Coldbrook whereas a specific Highway Commercial District may be considered in other Growth Centres.

2.2.5.1 Council may establish a "Highway Commercial District" (H) designation to be applied to lands in proximity to interchanges along Highway # 101.

2.2.5.2 Council shall establish a Highway Commercial (C11) Zone in the Land Use Bylaw. Permitted uses in the C11 Zone will include services catering to the needs of travelling highway motorists and tourists. The Land Use Bylaw will strictly control signs and special provisions will address the need for visibility from the highway.

2.2.5.3 Council shall provide for Highway Commercial uses in Commercial Zones adjacent to Highway # 101 interchanges in General Commercial Districts. The provisions of the Land Use Bylaw for sign visibility for the Highway Commercial Zone shall be made optional for Highway Commercial (C11) Zone uses.

2.2.6 **Commercial Comprehensive Development District Policies**

Occasionally certain areas of land will be identified which have unique attributes due to natural or human factors. Such areas should be a minimum of five (5) acres in size and may be visually prominent, strategically located, environmentally sensitive, and historically significant or contain existing
development, which makes them unique. These areas may benefit from detailed planning and may be designated in the Municipal Planning Strategy and Land Use Bylaw as Commercial Comprehensive Development (CCD) Districts under the provisions of the Municipal Government Act.

In both commercial and residential development contexts, those sites referred to above may require innovative design solutions to effectively develop them. Therefore, Council may consider proposals with alternative development standards. The development agreement will specify these standards.

2.2.6.1 Council shall establish a CCD District to be applied to blocks of land of at least 5 acres in size, with site characteristics or locations which make them unique and warrant careful, detailed site planning. Council may designate lands a CCD District subject to an amendment to this Strategy and the Land Use Bylaw.

2.2.6.2 In considering the establishment of a CCD District Council shall have regard for all applicable policies of this Strategy including the impact on existing commercial, industrial and residential development.

2.2.6.3 Council shall designate large parcels of land as CCD Districts as follows:

a. a large parcel of land along Highway # 1 at the interchange of Highway # 101, in Coldbrook as a CCD District on the Future Land Use Map for Coldbrook

b. a large parcel of land along Highway # 1 at the former site of the Horton District High School in the unincorporated area of Greenwich as CCD District on the Future Land Use Map for the Hamlet of Greenwich

2.2.6.4 Council shall establish a Commercial Comprehensive Development (C6) Zone for application to CCD Districts, in the areas referred to in Policy 2.2.6.3 above. To establish the range of business uses that would be eligible for consideration in a particular CCD District, Council will draw from those permitted in the General Commercial (C1) and Light Industrial-Commercial (M1) Zones of the Land Use Bylaw in effect at the time of application. Additionally, Council intends to permit in the C6 Zone, multiple unit residential uses, boarding houses and residential uses accessory to commercial and industrial uses. Outdoor storage will also be
strictly limited. Residential Facilities and Community Facilities (as provided for in Section 2.5 of this Strategy) may also be permitted. Permitted uses will be subject to the land owner(s) -concerning lands owned by each owner respectively- entering into a Development Agreement with Council.

2.2.6.5 In considering proposals to enter into development agreements with developers in the C6 Zone, Council shall have regard to the following matters:

a. the development agreement will outline the phasing of development to ensure that no part of the site will develop in a manner that would prejudice or compromise development of the remainder of the site

b. the development agreement may provide for a mixed-use development limited to a combination of uses within the scope of the policy and designed to achieve optimum compatibility

c. notwithstanding 2.2.6.5 b. above however, Council intends to limit development agreements for primarily commercial development to a combination of commercial and light industrial uses and community facilities, with residential dwelling units as accessory uses only

d. Council's policy for Shopping Centres contained in Policy 2.2.2.7 of this Strategy

e. the policies of this Strategy including those for amending the Land Use Bylaw and for considering development agreements as contained in Part 6 of this Strategy

2.2.7 Commercial Recreation Policies

Generally indoor commercial recreation uses are well suited to commercial areas as part of the business mix. Conversely those requiring large parcels of essentially open space areas are better suited at the fringe of a commercial district or, ideally, where the use abuts a residential area.

Positioning land extensive open space recreational uses between commercial and residential areas can lessen the potential for conflict between these uses provided it essentially creates an open space buffer.
Some commercial recreation activities can generate a lot of noise, attract large volumes of traffic, operate till late at night and commonly on a seasonal basis. These uses are seldom considered popular neighbours in either a residential or commercial urban setting. In fact, visible sites, away from urban areas are commonly preferred by both the operators and the public. The more intrusive types of commercial recreational businesses such as go-cart and race tracks, drive-in theatres, and theme parks will be directed to rural areas pursuant to and in keeping with, policies contained in Part 3 of this Strategy.

2.2.7.1 Council shall encourage indoor commercial recreation uses such as fitness clubs, bowling alleys and racquet clubs to locate in Central Business Districts and General or Community Commercial Districts by permitting them in zones intended for these Districts.

2.2.7.2 Council shall discourage commercial recreation uses that generate noise or large traffic volumes, such as but not limited to go cart and race tracks, drive-in theatres and theme parks, from locating in Growth Centres. Such uses may be permitted in the Rural Districts pursuant to the Rural Policies contained in Part 3 of this Strategy.

2.2.7.3 Council provides for a Recreational Open Space (P2) Zone in Subsection 2.6.3 of this Strategy. Existing Recreational Open Space uses shall be zoned P2 in the Land Use Bylaw. Council may consider new proposals pursuant to the policies contained in Subsection 2.6.3.

2.2.8 Neighbourhood Commercial Policies

As Growth Centres increase in size and population, developing away from commercial areas, the need for local convenience goods and services may arise. Therefore, opportunities for limited commercial development outside designated commercial districts to serve a strictly neighbourhood convenience market are provided.

2.2.8.1 Council shall establish a Neighbourhood Commercial (C7) Zone in the Land Use Bylaw. Permitted uses in the C7 zone will be limited to convenience stores and residential uses. Provisions of the Land Use Bylaw will limit the scale of neighbourhood commercial uses and ensure new commercial uses are compatible with the surrounding area. In this regard the Land Use Bylaw will prohibit outdoor storage and display and include provisions for landscaping and screening from abutting residential uses.
2.2.8.2 Council shall zone to C7 existing uses that would be permitted in the C7 Zone in Residential Districts.

2.2.8.3 Council may consider applications for rezoning in Residential Districts to C7 subject to the following:

a. frontage and direct access to a Major Collector Street is available

b. the subject site will not create an undue concentration of commercial uses and is at least 2,000 feet from any designated Commercial District in this Strategy or any commercial zone in the Land Use Bylaw

c. the rezoning will apply to a maximum of 100 continuous feet of road frontage

d. the subject site can meet all the requirements of the C7 Zone and the general policies for amending the Land Use Bylaw contained in Part 6 of this Strategy

2.2.9 Residential Commercial District Policies

Within some of the older growth centres, the physical layout of the commercial district reflects both the historical origins of the community’s economic base and the effects of a slow gradual transition to the present day business district. The remnants of the local infrastructure which often includes wharves, warehouses, rail sidings, and factories or plants for manufacturing or processing industries as well as adjacent housing all in close proximity to the business district are characteristic of communities like Kingston, Canning and others.

To reconcile the pressure for commercial space with the need to protect both current residents and industry at the commercial fringes, the planning process needs flexibility. The purpose of this planning approach is to accommodate a gradual long term land use change which reflects the slower cycles of neighbourhood transformation common to older and often smaller urban centres. Officially designating the intended areas also depends on broad community acceptance that at some point in the future (five to ten years) the area would be predominantly commercial or otherwise eligible for business development. This approach would provide for a gradual change from residential development to commercial by allowing the less intrusive or disruptive types of commercial development to occur. At the same time, adjacent residents would have the benefit of knowing how the surrounding area is expected to evolve commercially. The essence of this approach is to ensure new business
development is characterized by modest infilling and conversion of existing structures rather than broad scale redevelopment. If commercial land uses become predominant over residential uses, Council may consider taking steps to incorporate the transitional area into the General or Central Business District.

2.2.9.1 Council shall establish a "Residential Commercial District" (RC) designation which may be applied to developed areas within Growth Centres at the boundaries of a designated Central Business or General Commercial District. Council may apply this transitional land use designation only when the appropriate combination of social, economic and physical characteristics warrant, and the timing is suited to the development life-cycle of the subject area. Designation will be subject to an amendment to and in conformance with other relevant policies of this Strategy.

2.2.9.2 Council shall establish a Residential Commercial (C4) Zone in the Land Use Bylaw to be applied to lands designated Residential Commercial District. Permitted uses in the C4 Zone shall be limited to existing dwellings and a narrow range of commercial uses such as small-scale tourist accommodations, businesses specializing in retail goods and services, personal services, and professional offices. Council also intends to allow homes for special care, existing residential care facilities, churches and any uses permitted accessory to dwellings in residential zones.

2.2.9.3 Council shall include general lot standards with additional site and use specific conditions in the Land Use Bylaw to ensure reasonable separation distances and buffers between residential and commercial uses, as well as other requirements for access, parking, building size and design, maximum commercial floor area, outdoor storage, signs and lighting in order to minimize conflicts with other uses.

2.3 **URBAN INDUSTRIAL DEVELOPMENT**

The three Towns and adjacent Growth Centres such as Coldbrook and New Minas contain the greatest concentration of secondary and service industries in the County. The provincial government emphasized the importance of broadening the economic base of Kings County by establishing an industrial park in Kentville to accommodate secondary industry.

The Coldbrook - Wolfville Urban Corridor is expected to accommodate the majority of future secondary industrial growth. Infrastructure including transportation, and sewer and water services will support the growth of the industrial sector. Smaller industries taking advantage of a local market situation may be expected to locate in Growth Centres outside of these areas.

In the east end of the County, Port Williams offers a small industrial/business park along the Cornwallis River, with access to a public wharf and navigable waters. The heavy industrial area, in the vicinity of the Port Williams wharf, is under pressure for redevelopment as a more commercial, residential and tourist area. Council may consider redevelopment opportunities on a case-by-case basis until such time as a redevelopment plan is completed for the area.

Council intends to accommodate additional industrial space in the west end of the County, in Greenwood and Aylesford.

In Industrial Districts, Council intends to allow commercial uses which by virtue of land area needs and other characteristics of size, outdoor storage, traffic generation and operation, lend themselves well to an industrial setting.

2.3.1 **Urban Industrial Objectives**

2.3.1.1 To provide a selection of opportunities for industrial development.

2.3.1.2 To minimize land use conflicts between industrial uses and other urban land uses, particularly residential.

2.3.1.3 To provide opportunities for development of a mix of light industrial and compatible land extensive commercial uses within industrial districts.

2.3.1.4 To provide opportunities for development of heavy industrial uses subject to appropriate considerations.

2.3.2 **General Urban Industrial Policies**

2.3.2.1 Council shall establish an "Industrial District" (M) designation to provide opportunities for a range of industrial...
uses. Council intends to designate Industrial Districts based on the existing development pattern in the Growth Centres. In addition, lands which have been identified as having favourable transportation, infrastructure and accessibility for industrial development shall be designated Industrial and reserved for such development.

2.3.2.2 Council recognizes that industrial uses vary in potential impact on surrounding uses. Therefore, Council intends to establish two separate zones as follows:

a. Light Industrial Commercial (M1) Zone

b. Heavy Industrial (M2) Zone

2.3.2.3 Non-industrial land uses in either the M1 or M2 Zone shall become non-conforming and subject to the relevant provisions of the Municipal Government Act and the policies of Section 2.7 where applicable.

2.3.2.4 Industrial uses which were in existence prior to June 19, 1979 which are not located in Industrial Districts shall be zoned Light Industrial Commercial (M1) in the Land Use Bylaw. However, industrial uses which are essentially incidental to residential uses which became non-conforming in 1979 shall remain non-conforming and subject to the policies of Section 2.7. Heavy industrial uses will only be permitted in Industrial Districts.

2.3.2.5 To reduce the potential for Land Use Conflicts and negative impacts on the Environment, the Land Use Bylaw will include special provisions addressing the following:

a. setbacks from watercourses and wells for uses which have the potential for contamination such as fuel or chemical storage uses

b. landscaping, berms and fences and/or deep setbacks to reduce visual impact on surrounding land uses or the travelling public

This shall apply on Major Collector Streets, and yards abutting residential uses, Districts or Zones and public parks.
2.3.3 Light Industrial Commercial Policies

The Light Industrial Commercial Zone policies are intended to provide for industrial uses which do not create or emit noises, smells, dust, fumes or other factors which are regarded as nuisances. Also, commercial businesses requiring large land blocks or serve the industrial business community and are compatible within an industrial setting are permitted.

2.3.3.1 Council shall establish a Light Industrial Commercial (M1) Zone in the Land Use Bylaw. Council intends to exclude industrial uses which are known to create or emit noises, smells, dust, fumes or otherwise present a potential for nuisance to surrounding land uses. Commercial uses serving the industrial sector and those which tend to require large blocks of land with extensive outdoor storage and/or warehouse space will be the nature of the permitted Commercial uses.

2.3.3.2 Council shall zone to M1 lands in designated Industrial Districts based on the existing development pattern. Undeveloped reserves of the Industrial Districts shall be zoned M1.

2.3.3.3 Lands containing Light Industrial Commercial uses or Heavy Industrial uses which are zoned M1 and located in Residential Districts will not be eligible for a change in zoning to Heavy Industrial (M2).

2.3.3.4 Council shall consider applications for the rezoning of lands adjacent to lands zoned Light Industrial Commercial (M1) outside of Industrial Districts provided it is for the expansion of an existing business or expanded use of existing structures in the M1 Zone and provided the site can meet all the requirements of the M1 Zone and the policies for amending the Land Use Bylaw contained in Part 6 of this Strategy.

2.3.3.5 Council shall provide for development of light industrial uses as permitted in the Commercial Comprehensive Development (C6) Zone of the Land Use Bylaw and in accordance with policies for the CCD District contained in Subsection 2.2.6 of this Strategy. Such development shall be subject to entering into a development agreement with Municipal Council.
2.3.4 Heavy Industrial Policies

The Heavy Industrial policies are intended to provide development opportunities for a wide range of manufacturing, assembling, fabrication and processing of goods or products in which nuisance factors are potentially high. It is the intent that these uses be separated from residential uses, preferably on interior sites within Industrial Districts surrounded by light industrial or commercial uses.

2.3.4.1 Council shall establish a Heavy Industrial (M2) Zone in the Land Use Bylaw. The M2 Zone will provide opportunities for a broad range of heavy and light industrial uses. Any uses permitted in the M1 Zone will be permitted in the M2 Zone.

Salvage Yards may be permitted in the M2 Zone and will be subject to the same policies as contained in Rural Subsection 3.7.6.

2.3.4.2 Council intends to minimize negative impacts of heavy industrial uses to the surrounding area. The Land Use Bylaw may require berms, fences and/or landscaping between industrial and non-industrial uses to reduce the visual impact of heavy industrial uses. The Land Use Bylaw may also contain provisions designed to reduce the visual impact of industrial uses on the travelling public on certain routes as suggested in Part 4 of this Strategy.

2.3.4.3 Council shall zone lands in Industrial Districts containing existing heavy industrial uses M2 in the Land Use Bylaw.

2.3.4.4 Council may permit new heavy industrial uses in Industrial Districts subject to an amendment to the Land Use Bylaw. In considering proposals for rezoning to M2, Council shall have regard to the following:

a. the site is of sufficient size to be capable of accommodating the proposal in the manner prescribed in the Land Use Bylaw

b. access is available through only Industrial or Commercial Zones to a designated Major Collector Street

c. potential impact on the surrounding established land uses

d. water and sewer services are available and adequate for the proposed use
e. a minimum distance of 1000 feet is maintained between the lot line of the property to be rezoned and any Residential zone or public park

f. that the proposal is consistent with all applicable policies of this Strategy including those for amending the Land Use Bylaw contained in Part 6 of this Strategy

In considering proposals which are likely to impact on the environment, such as to contribute to air, water, noise, or soil pollution; or, which have a potential for contaminating watercourses, Council may require an Environmental Study. The study shall analyze the potential for contamination and outline remedial measures, if necessary. In considering such proposals the Nova Scotia Department of Health and Nova Scotia Environment shall be consulted and asked to comment on the advisability of requiring an Environmental Study and to advise whether a formal Environmental Assessment under the *Environmental Assessment Act* is advisable or necessary.

2.3.4.5 Council acknowledges that it cannot anticipate the land and location needs of all heavy industrial proposals. New Industrial Districts may be designated subject to an amendment to the appropriate Future Land Use Map. In considering an amendment to the Strategy, Council will consider the following:

a. the adequacy of water and sewer services

b. the adequacy of the transportation infrastructure of the proposed access route to the site

c. access is available through only Industrial or Commercial Zones to a designated Major Collector Street

d. the subject lands are of sufficient size and capable of meeting all the requirements of the Land Use Bylaw especially the separation distance criteria developed for rezoning near Residential Districts

e. that the proposal is consistent with the Goals and Objectives of this Strategy, including considerations for amending the Strategy outlined in Part 6
2.3.5 Non-industrial Development – Special Provisions

Council may consider by development agreement the following uses on the properties described as PID # 55022305 and PID # 55445399 generally located on Terrys Creek Road in Port Williams:

a. Full Service or Take Out Restaurant

b. Lounge

2.3.5.1 In considering a Development Agreement under Section 2.3.5, Council shall be satisfied that the development, its uses and any associated structures meets the following criteria:

a. the developer completes a traffic study that assesses the impact of the lounge or restaurant use on the local street pattern, pedestrian traffic and road intersections within 1000 feet of the development

b. the developer provides the Municipality with a stamped engineered building plan that ensures the structure is adequately flood proofed

c. the development, as determined by a qualified engineer or other qualified professional, meets the Nova Scotia Watercourse Alteration Specifications (1997) issued by Nova Scotia Environment

d. the development meets the provisions of Section 2.12.5 regarding the Port Williams Wellfield

e. the development meets the zone requirements of the Land Use Bylaw for the General Commercial (C1) Zone

f. the policies outlined in Section 6.3.3.1 of the Municipal Planning Strategy

2.3.6 Port Williams Heavy Industrial (M2) Zone Transition Policies

The Growth Centre of Port Williams contains Heavy Industrial (M2) Zone lands located on the community’s shorefront. Historically, the areas industrial development was strongly linked to the wharf, which was used until the early 1970’s. Today, the wharf has fallen into disrepair and the industrial nature of the area appears to be on the decline as large industrial uses have closed in recent years. As the area transitions away from industrial uses, the lands located in the shorefront area present a
redevelopment opportunity. In 2005, the Village of Port Williams completed a vision document that recommended that the Central Business District be expanded to the Heavy Industrial (M2) Zone lands. This vision document forms the foundation for a Secondary Planning Strategy (SPS) process.

Although the Secondary Planning Strategy (SPS) process is working to update land use policies for the Heavy Industrial (M2) Zone lands, individual land owners facing business pressures may find it difficult to wait for the comprehensive review to be completed. Council recognizes these business pressures and has adopted this transition policy to enable individual property owners to seek a Land Use Bylaw amendment to allow a specified commercial use on property located in the Heavy Industrial (M2) Zone area of Port Williams. In considering such amendments, Council shall ensure the commercial use is appropriate and is not of a nature or size that may interfere or pre-empt the SPS process. These policies and any new land uses permitted in the M2 Zone should be replaced with the final Port Williams Secondary Planning Strategy.

2.3.6.1 Council may permit commercial uses on individual properties located in the Heavy M2 Zone in the Growth Centre of Port Williams through an amendment to the Land Use Bylaw that inserts the use and property location into the Heavy Industrial (M2) Zone’s list of permitted uses. In considering such land use bylaw amendments Council shall have regard to the following:

a. The use is permitted in the Central Business (C2) Zone, but is not a Beverage Room, Cabaret or Lounge;

b. The use is not prohibited by the Port Williams Wellfields;

c. The use is located within an existing building and will not require major building expansions or new buildings to be constructed;

d. Parking can be provided on site.

2.3-8
2.4 **URBAN RESIDENTIAL DEVELOPMENT**

The predominance of the owner occupied, single detached dwelling on spacious lots has also changed very little since the early seventies and still comprises 75% of all urban housing. Very little mobile home development has occurred and the vast majority of multi-unit projects are less than 15 units in size.

Demand for single detached dwellings is expected to continue. It is recognized, however, that future housing needs will likely reflect an aging population, a downsizing of families, greater variety in the make-up of households. These trends will create a demand for greater variation in housing options. Thus, the Municipality will provide for a range of housing types including one and two unit dwellings, town houses, apartments, and mini homes in addition to mobile home parks. The Municipality is experiencing an increase in the demand for the development of subdivisions for mini-homes on individual lots. Policies to accommodate this development are being added in response to this demand. The planning emphasis will be to promote harmonious integration of all types of housing.

Homes for Special Care, Day Care Facilities and churches can be integrated into neighbourhoods provided traffic considerations are addressed. It is the intent of the Municipality to provide for some urban home occupations within Residential Districts, subject to conditions to ensure general compatibility.

Residential Comprehensive Development Districts can provide increased flexibility in development form, increased site controls for Council and the opportunity for public input. RCDDs also provide the opportunity to explore development schemes that focus on environmental sustainability or alternate development patterns.

### 2.4.1 Urban Residential Objectives

- **2.4.1.1** To promote quality residential development.
- **2.4.1.2** To enhance the visual and social character of existing residential neighbourhoods.
- **2.4.1.3** To foster residential infilling and efficient development of serviced land.
- **2.4.1.4** To provide opportunities for future residential development that reflects the needs of all residents and the ability of the Municipality to provide adequate municipal services.
- **2.4.1.5** To encourage and provide for a wide range of residential accommodations and a variety of neighbourhoods.
2.4.1.6 To encourage development of an adequate number of lots within all Growth Centres to accommodate future housing demands.

2.4.1.7 To promote the harmonious integration of a variety of housing types and residential densities within neighbourhoods.

2.4.1.8 To protect residential neighbourhoods from the intrusion of undesirable commercial and industrial activities.

2.4.1.9 To provide for higher density housing opportunities close to commercial and community services.

2.4.1.10 To increase the potential for rental accommodation to occur including private and publicly assisted housing.

2.4.2 General Urban Residential Policies

2.4.2.1 Council shall establish a "Residential District" (R) designation and designate lands which are predominantly residential on the Growth Centre Future Land Use Maps. In addition, Council intends to designate additional lands to accommodate future residential development. Council shall have regard for public service requirements such as sewer, water, transportation, open space and proximity to commercial and community facilities in designating Residential Districts.

2.4.2.2 Council intends to provide for a range of residential development options within the Growth Centres. To achieve this Council shall establish the following zones:

a. Residential Single Dwelling R1
b. Residential Manufactured Housing RM
c. Residential One and Two Unit R2
d. Residential Mixed Density R3
e. Residential Medium Density R4
f. Residential High Density R5
g. Residential Comprehensive Development District R10

Within Residential Zones, with the exception of the R4 and R5 Residential Zones, Day Care Facilities will only be permitted subject to a Development Agreement as provided for in Subsection 2.5.5.

In 2007, Council amended its policy to require that all new multiple unit residential dwellings in the Coldbrook Growth Centre be considered by development agreement pursuant to the provisions of Policy 2.4.9. All existing R3 and R4 Zones shall remain in place and may be developed according to the provisions of each zone.

2.4.2.3 Additional permitted zones in the Residential District are:

a. Institutional (I1) as provided for in Subsection 2.5.2

b. Community Facilities (CF) as provided for in Subsection 2.5.3

c. Residential Facilities (RF) as provided for in Subsection 2.5.4

d. Neighbourhood Commercial (C7) as provided for in Subsection 2.2.8

e. Parkland (P1), Recreational Open Space (P2), Environmental Open Space (01) as provided in Section 2.6

f. existing commercial uses may be zoned Community Commercial (C5) as provided for in Subsection 2.2.4. However, it is not the intention that additional C5 Zones will occur in Residential Districts

g. industrial uses which have been in existence since prior to June 19, 1979 may be zoned M1 to reflect the established use and may be permitted to expand as provided for in Policy 2.3.3.4

2.4.2.4 Council intends to provide opportunities for the development and integration of affordable housing by making provision for multi-unit residential development within the Residential District, for a variety of housing types and densities.
2.4.2.5 Council shall include regulations in the Land Use Bylaw regarding lot size, frontage, yard setbacks, building height, density, parking, access, landscaping and similar matters intended to provide for the harmonious integration of various housing types.

2.4.2.6 Council shall provide for adequate municipal investment in Growth Centre public services to accommodate the projected demands for up to 300 housing units per annum and accompanying urban land uses.

2.4.2.7 Council shall encourage residential infilling on existing vacant lots serviced by a central sewerage system. The Land Use Bylaw will permit the use of existing undersized lots.

2.4.2.8 Council intends to encourage and facilitate the development of rental accommodation in areas served by or close to a full range of commercial and community services. Accordingly, Council may pre-zone lands close to a range of community or commercial services for medium density housing.

2.4.2.9 Council intends to promote pedestrian movement throughout Residential Districts and shall encourage the creation of pedestrian or bicycle connections between residential uses and schools, open space, and shopping areas. Further, Council will encourage the creation of crosswalks, sidewalks and possibly recreational trail systems.

2.4.2.10 Generally, existing uses in Residential Districts which would not normally be permitted in the particular zone will become non-conforming and be subject to the provisions of the Municipal Government Act and the policies of Subsection 2.7.2.

2.4.2.11 In Residential Districts, Council may provide for the rezoning of lands from any Residential Zone to any other Residential Zone. In considering proposals for rezoning to the Residential Single Dwelling (R1) Zone, Council shall have regard to the following:

a. the proposal includes no less than 5 acres of land

b. the proposal meets all applicable policies of this Strategy, including those for amending the Land Use Bylaw contained in Part 6 of this Strategy
The policies for rezoning to a higher density zone are contained in the following appropriate sections.

**2.4.3 Single Dwelling Urban Policies**

Single detached housing is the predominant housing form in all Growth Centres. An increasing number of subdivisions are being developed and marketed solely for single detached dwellings. A specific zone to permit single detached dwellings, exclusively is being created in response to demand.

2.4.3.1 Council shall establish a Residential Single Dwelling (R1) Zone in the Land Use Bylaw. This zone is intended to apply to areas of developed single detached dwellings and areas already subdivided and marketed for single dwelling development within the designated Residential Districts. Adjacent lands and additional undeveloped lands mainly on the fringe of the Growth Centres may be zoned R1 and reserved for similar development.

2.4.3.2 Council shall limit the permitted uses in the R1 Zone to single detached dwellings, residential care facilities defined in Policy 2.5.4.2 and parks and playgrounds. Residential units in existence at the time of the coming into force of the R1 Zone will be permitted. Uses other than residential which are not permitted in the R1 Zone will become non-conforming and subject to the policies of Section 2.7.

2.4.3.3 Council intends to permit the following additional uses and shall include limitations and special site development standards in the Land Use Bylaw to ensure they are developed in a manner compatible with the surrounding uses:

a. accessory residential uses as provided for in Subsection 2.4.10
b. existing farms
c. churches

2.4.3.4 Council may consider rezoning land from R1 to any other urban residential zone subject to the policies of this Section (2.4) and the policies for amending the Land Use Bylaw contained in Part 6 of this Strategy.
2.4.4 Manufactured Housing - Urban Policies

In recent years a substantial portion of housing construction included factory-built or partially factory-built housing. Homes which are only partially constructed in factories and completed at the building site are essentially the same as a conventional site-built single detached dwelling. However, mini-homes that are completely factory-built and transferred to the site are of a particular dimension, long and slim, that has led to them being classed with traditional mobile homes and have most often located in mobile home parks. It is recognized that mini-homes differ from conventional dwellings only in their method of construction as they are built to the same Building Code standard. However, due to their configuration and lot dimension requirements, it is not certain how easily integrated these homes will be in traditional subdivisions.

Therefore, to provide opportunities for mini-home developments on subdivision lots and to distinguish them from traditional mobile homes, a special zone is being created that will allow mini-homes to be interspersed with conventional one and two unit dwellings. The Zone will also allow Mobile Home Parks subject to conditions. Manufactured homes that are not built to National Building Code Standards shall be permitted only in these parks.

2.4.4.1 Council shall establish a Residential Manufactured Housing (RM) Zone in the Land Use Bylaw which will be applied to areas containing mobile home parks or a mix of mini-home units and one and two unit dwellings on individual lots. Some additional lands adjacent to these areas may also be reserved for a similar mixed development form.

2.4.4.2 Permitted uses in the RM Zone shall include:

a. mini-homes

b. single detached dwellings

c. residential care facilities as defined in Policy 2.5.4.2

d. two unit dwellings

e. mobile home parks

f. residential units existing at the time of the coming into force of the RM Zone

g. parks and playgrounds
Existing uses in the RM Zone which are not permitted will become non-conforming and subject to the provisions of the Municipal Government Act and the policies of Section 2.7.

2.4.4.3 Council intends to permit the following additional uses and may include location limitations and/or special site development standards in the Land Use Bylaw to ensure they are developed in a manner compatible with the surrounding uses.

a. accessory residential uses as provided for in Subsection 2.4.10
b. existing farms
c. churches

2.4.4.4 Council shall include special provisions in the Land Use Bylaw for mobile home parks to ensure the general compatibility of the proposal with adjacent residential uses:

a. where a mobile home park abuts an R1 zone it shall be screened by deep yard setbacks, berms, fences, walls or vegetation. In particular, parking areas, refuse storage and collection areas shall be screened
b. mobile home parks shall be a minimum of two acres and the density shall not exceed six mobile homes per acre

2.4.4.5 Council shall regulate the on-site development of mobile home parks concerning the provision of roads, sewers, water, lighting and recreation areas in accordance with the Municipal Mobile Home Parks Bylaw.

2.4.4.6 Council shall consider applications to rezone additional lands RM subject to an amendment to the Land Use Bylaw. In considering such amendments Council shall have regard to the following:

a. the subject site must be capable of meeting the requirements of the Mobile Home Parks Bylaw and be a minimum of 2 acres
b. the subject site can meet all requirements of the RM Zone and the policies for amending the Land Use Bylaw contained in Part 6
2.4.5 Council shall establish a Residential One and Two Unit (R2) Zone in the Land Use Bylaw. The R2 Zone is intended to apply to areas with a mix of one and two unit dwellings and areas subdivided and marketed for such development. In addition, Council intends to zone to R2 the majority of undeveloped lands within the Growth Centres to encourage similar development.

2.4.5.2 Permitted uses in the R2 Zone shall include:

a. single detached dwellings

b. two unit dwellings

c. residential uses existing at the time of the coming into force of the R2 Zone

d. residential care facilities as defined in Policy 2.5.4.2

e. parks and playgrounds

Existing uses in the R2 Zone which are not permitted will become non-conforming and subject to the provisions of the Municipal Government Act and the policies of Section 2.7.

2.4.5.3 Council intends to permit the following additional uses and shall include location limitations and/or special site development standards in the Land Use Bylaw to ensure they are developed in a manner compatible with the surrounding uses:
2.4.5.4 Council may consider rezoning land from R2 to any other residential zone subject to the policies of this Section (2.4) and the policies for amending the Land Use Bylaw contained in Part 6 of this Strategy.

2.4.6 Urban Residential Mixed-Density Policies

Older residential areas often include a mix of housing resulting from the conversion of large older homes to apartments and higher density redevelopments. The mix of housing is generally compatible because the building materials, height, scale and style are similar although the density varies. The Mixed Density Zone will be applied to these areas to allow the trend of intensification to continue. Additional areas will be zoned to provide further opportunities for new development with a mix of housing types, especially those areas close to commercial, community or institutional facilities.

2.4.6.1 Council shall establish a Residential Mixed Density (R3) Zone in the Land Use Bylaw. The R3 Zone is intended to apply to areas with a mix of residential uses ranging from low density to small scale multi-unit residential development. Council intends to zone to R3 additional lands to provide further opportunities for mixed density residential development in central locations and in proximity to Commercial, Community or Institutional Facilities.

2.4.6.2 Permitted uses in the R3 Zone shall include:

a. one and two unit dwellings

b. town house development

c. multi-unit residential uses (up to 8 units per structure)

d. residential units existing at the time of the coming into force of the R3 Zone

e. Residential Care Facilities as defined in Policy 2.5.4.2
f. boarding houses

g. parks and playgrounds

Existing uses in the R3 Zone which are not permitted will become non-conforming and subject to the provisions of the Municipal Government Act and the policies of Section 2.7.

2.4.6.3 Council intends to permit the following additional uses in the R3 Zone and may include location limitations and special site development standards in the Land Use Bylaw to ensure they are developed in a manner compatible with the surrounding uses:

a. accessory residential uses as provided for in Subsection 2.4.10

b. existing farms

c. churches

2.4.6.4 The Land Use Bylaw shall include regulations for the development of new multiple unit residential uses, between three and eight units, including the following:

a. yards, fences, walls or vegetative screening shall be required to provide a visual screen between the proposal and abutting R1, RM or R2 rear or side yards. This screen is to reduce the potential impact of lighting, noise, views, parking areas and areas for the collection and storage of refuse on the abutting residents

b. architectural design and landscaping features shall be compatible with the character of the surrounding area in terms of bulk, scale, rooflines, setbacks, building materials and exterior treatment

c. the proposal shall have adequate parking in accordance with the provisions of the R3 Zone in the Land Use Bylaw

d. a suitably located landscaped amenity area will be provided to meet the needs of the residents. This area must be adequate in size and be useable and suitable for the open space/leisure activities of the residents
e. the maximum density shall be 12 units per acre

2.4.6.5 In R3 zones, new development abutting the rear or side yards of developed lots in an adjacent R1 or R2 zone shall be similar in use to the abutting use.

2.4.6.6 Council shall consider applications for a rezoning to R3 in the following areas:
   a. undeveloped areas exceeding five acres with direct Major or Residential Collector Street access
   b. areas in close proximity to commercial, institutional or community facilities; or,
   c. areas located between high and low density residential zones.

2.4.6.7 Council may consider rezoning land from R3 to any other residential zone subject to the policies of this Section 2.4 and the policies for amending the Land Use Bylaw contained in Part 6 of this Strategy.

2.4.7 Urban Residential Medium Density Policies

Apartment buildings with 8-16 units account for five percent of all Growth Centre housing development. Such developments are located in all Growth Centres except Coldbrook and many of them are senior citizens housing.

2.4.7.1 Council shall establish a Residential Medium Density (R4) Zone in the Land Use Bylaw. The R4 Zone is intended to provide for multi-unit residential development up to 16 units per structure and up to a density of 16 units per net acre.

2.4.7.2 Permitted uses in the R4 Zone shall include:
   a. multi-unit residential uses (up to 16 units per structure and 16 units per net acre)
   b. town houses
   c. residential uses existing at the time of the coming into force of the R4 Zone
   d. accessory residential uses provided for in Subsection 2.4.10
e. residential care facilities as defined in Policy 2.5.4.2

f. day care facilities defined in Subsection 2.5.5

g. residential facilities as provided for in Subsection 2.5.4

h. churches

i. parks and playgrounds

Existing uses in the R4 Zone which are not permitted will become non-conforming and subject to the provisions of the Municipal Government Act and the policies of Section 2.7.

2.4.7.3 Council shall include special provisions in the Land Use Bylaw for the R4 Zone addressing the following:

a. yards, fences, walls or vegetative screening shall be required to provide a visual screen between the proposal and abutting R1, RM or R2 rear and side yards. This screen is to reduce the potential impact of lighting, noise, views, parking areas and areas for the collection and storage of refuse on the abutting residential properties

b. the proposal shall have adequate parking in accordance with the provisions of the R4 Zone in the Land Use Bylaw

c. a suitably located landscaped amenity area will be provided to meet the needs of the residents. This area must be adequate in size and be useable and suitable for the open space/leisure activities of the residents

d. the maximum density shall be 16 units per acre

2.4.7.4 Council shall zone existing medium density development and consider rezoning new areas R4 in the following locations:

a. areas near commercial zones

b. sites within an R3 Zone separated from low density housing by multi-unit residential uses (i.e. three units or more)

c. lands adjacent to an R3 Zone on sites with direct or Local Exterior Street access to a Major Collector Street; or,
d. locations at the periphery of low density neighbourhoods

In considering rezoning proposals Council shall be satisfied that the proposed site is capable of accommodating the requirements of the Land Use Bylaw for the R4 Zone and policies for amending the Land Use Bylaw as contained in Part 6 of this Strategy.

2.4.7.5 Based on the criteria contained in Policy 2.4.7.4, lands have been reserved for medium density development by zoning them R4. Council may consider rezoning land from R4 to any other residential zone subject to the policies of this Section (2.4) and the policies for amending the Land Use Bylaw contained in Part 6 of this Strategy.

2.4.8 Urban Residential High Density Policies

New Minas and North Kentville are the largest Growth Centres and exhibit the fastest growth. These Centres contain the broadest range of housing options which is likely due to their proximity to major commercial and community facilities.

As the other Growth Centres develop, the development of higher density housing is expected to increase. The high density zone is intended to accommodate such developments. Generally high density Residential uses will be encouraged close to urban amenities, such as, schools, commercial and community facilities and bus services (where available).

2.4.8.1 Council shall establish a Residential High Density (R5) Zone in the Land Use Bylaw. The R5 Zone is intended to provide for high density multi-unit residential development up to 30 units per net acre.

2.4.8.2 Permitted uses in the R5 Zone shall include:

a. multi-unit residential uses (up to 30 units per net acre)

b. town houses

c. residential uses existing at the time of the coming into force of the R5 Zone

d. accessory residential uses as provided for in Subsection 2.4.10

e. residential care facilities as defined in Policy 2.5.4.2
f. day care facilities defined in Subsection 2.5.5

g. churches

h. residential facilities as provided for in Subsection 2.5.4

i. parks and playgrounds

Existing uses in the R5 Zone which are not permitted will become non-conforming and subject to the policies of Section 2.7.

2.4.8.3 Council shall include special provisions in the Land Use Bylaw for the R5 Zone in consideration of the following:

a. yards, fences, walls or vegetative screening shall be required to provide a visual screen between the proposal and abutting R1, RM or R2 rear or side yards. This screen is to reduce the potential impact of lighting, noise, views, parking areas and areas for the collection and storage of refuse on the abutting residences

b. the proposal shall have adequate parking in accordance with the provisions of the R5 Zone in the Land Use Bylaw

c. a suitably located landscaped amenity area will be provided to meet the needs of the residents. This area must be adequate in size and be useable and suitable for the open space/leisure activities of the residents

d. the maximum density shall be 30 units per acre

2.4.8.4 Council shall zone existing high density developments and consider rezoning new areas R5 in the following locations:

a. areas near commercial zones

b. lands zoned R3 or R4 Zone with direct or Exterior Local Street access to a Major Collector Street

c. sites fronting on Major Collector Streets and separated from low density housing in R1, RM or R2 Zones by physical features, medium or high density housing or non-residential uses
In considering rezoning proposals Council shall be satisfied that the proposed site is capable of accommodating the requirements of the Land Use Bylaw for the R5 Zone and policies of this Section (2.4) and those for amending the Land Use Bylaw as contained in Part 6 of this Strategy.

2.4.9 Urban Multiple Unit Residential Policies Within the Coldbrook Growth Centre

In recognition of the need to provide a variety of housing choices to residents and to achieve greater control over the location, design, and scale of multiple unit residential dwellings, Council amended its policies in 2007 to require that all new multiple unit residential developments (i.e., in excess of two (2) units) within the Coldbrook Growth Centre, be considered by development agreement rather than by rezoning. Properties which are currently zoned Residential Mixed Density (R3) or Residential Medium Density (R4) will be permitted to develop as-of-right subject to the Land Use Bylaw provisions related to these zones.

2.4.9.1 It shall be the policy of Council to require that all new multiple unit residential developments within the Residential Districts of the Coldbrook Growth Centre to be considered by Development Agreement, subject to the policies of this Strategy and the provisions of the Municipal Government Act. This policy shall not apply to properties that are currently zoned Residential Mixed Density (R3) or Residential Medium Density (R4). No further properties will, however, be rezoned to the R3 or R4 Zones.

2.4.9.2 In considering development agreements for multiple unit residential development in the Coldbrook Growth Centre, Council shall have regard to the following:

a. that a site plan, prepared by a qualified person, is provided which shows all proposed buildings; amenity, open space and landscaped areas; parking areas and road accesses and any other information required by the development agreement

b. that the site plan shall be encouraged to have regard to the following:

i. that the percentage of lot coverage is consistent with that of the surrounding area;
ii. that the location and amount of landscaped and open space areas, particularly those most visible by the public, is reasonably consistent with existing dwellings within the surrounding area;

iii. that a suitably located and landscaped amenity area or areas consisting of at least 10% of the size of the property be provided to the residents;

c. that the development is designed to enhance or take advantage of natural site characteristics rather than significantly alter or destroy them;

d. that the following locational criteria are met:

i. new multiple unit residential dwellings in excess of eight (8) units shall have frontage or direct access to at least a residential collector street;

ii. all new multiple unit residential dwellings must be connected to a central municipal/village sewerage system; and

iii. new multiple unit residential developments in excess of sixteen (16) units must be connected to central municipal/village water and sewer services.

2.4.9.3 In addition to the requirements set out in 2.4.9.2, in considering development agreements for a multiple unit residential dwelling or dwellings in the Coldbrook Growth Centre, Council shall have regard to the following:

a. that architectural plans, prepared by a qualified person, are provided showing the exterior design of all proposed multiple unit residential dwellings

b. that the architectural design and site plans of a new multiple unit residential dwelling or dwelling shall be encouraged to have regard to the following:

i. that the height and mass of all multiple unit residential dwellings are reasonably consistent with existing dwellings within the surrounding area. In this regard, the maximum height for any multiple unit residential dwelling shall be four (4)
stories and the maximum number of units permitted in any multiple unit residential dwelling shall be sixteen (16);

ii. that the design of the multiple unit residential dwelling related to roof pitch, wall to window ratios, building articulation, exterior cladding as well as building orientation and setback are common to existing dwellings within the surrounding area;

iii. that the multiple unit residential dwelling or dwellings are oriented toward the street and have pedestrian approaches that are well articulated and clearly defined;

iv. that parking areas shall be located to the side or rear of the building in clearly designated and defined parking areas. The use of asphalt for parking areas is encouraged. Adequate parking must be provided, generally consistent with the Land Use Bylaw regulations for the R4 Zone;

v. that the front entrance to the multiple unit residential dwelling is clearly articulated, well lit, and easily visible from the street; and

vi. that accessory structures such as sheds or garages, are located in the rear of the multiple unit residential dwelling.

2.4.9.4 It shall be the policy of Council to require a traffic impact analysis for all multiple unit residential development proposals in excess of ten (10) units.

2.4.9.5 It shall be the policy of Council to require a groundwater assessment for all multiple unit residential development proposals that are not located on a municipal/village central water system.

2.4.10 Urban Accessory Residential Use Policies - Urban Home Occupations

Businesses operated from homes in residential Districts, not only provide the home office or studio facilities for business conducted primarily off-site, they can provide convenient employment opportunities for those physically challenged or those with home care responsibilities.
Some Home Occupations can be intrusive while others may occur without disrupting residential neighbourhoods. Recognizing the economic value as well as the potential conflict, Urban Home Occupations are limited to those which can integrate well in residential areas. Separate policies deal with Home Occupations in the Rural context in Part 3 of this Strategy.

2.4.10.1 Council shall provide for the establishment of Urban Home Occupations as accessory uses to a Residential use. The Land Use Bylaw will define Urban Home Occupations that will be permitted in Growth Centres. Such uses will be limited to those that will not involve a change to the residential character of the residence or be likely to require additional parking. The Land Use Bylaw will include provisions as follows:

a. the employees will be limited

b. the amount of floor area to be devoted to the non-residential use will be limited

c. signs will be strictly controlled

d. no alterations to the structure that would alter the residential character will be permitted

e. storage and display will be prohibited

f. uses requiring outdoor storage or display or which would in any way alter the residential nature of the structure will be prohibited

Policies 2.4.10.2 and 2.4.10.3 include special provisions for Bed and Breakfast operations and Home Day Care uses.

2.4.10.2 Council shall provide for the establishment of Bed and Breakfast operations as Urban Home Occupations. The Land Use Bylaw will define Bed and Breakfasts that will be permitted in Growth Centres as Urban Home Occupations and they will be subject to the criteria set out in Policy 2.4.10.1. The Land Use Bylaw will require adequate parking to accommodate the operation and will limit Bed and Breakfast operations to homes fronting on Collector or Exterior Local Streets.

2.4.10.3 Council shall provide for Home Day Care operations as Urban Home Occupations. The Land Use Bylaw will define
Home Day Care that will be permitted in Growth Centres and be subject to Policy 2.4.10.1. The Land Use Bylaw will require adequate parking for the Home Day Care operations. Home Day Care will be limited to operations providing care to no more than 14 people. Day Care Facilities may also be considered in Residential Districts pursuant to the policies contained in Subsection 2.5.5.

2.4.11 Urban Accessory Residential Use Policies - Home Based Business

In seeking to provide opportunities for economic development, Council recognizes that part of the solution lies in land use policies which facilitate self-employment and promote entrepreneurship. The Municipality can support the original business incubator - the home based business - through the planning process. By judiciously matching the location of more prominent residential based commercial enterprises with residential areas mainly along major automobile and pedestrian routes in some Growth Centres, Council has concluded that home based businesses will enrich the surrounding residential neighbourhood and generally strengthen the economic base.

Rather than open up all residential neighbourhoods to more commercial development than presently allowed for in the Land Use Bylaw under current Urban Home Occupation provisions, Council will establish another area-specific category of residential business use. Council’s objective is to allocate lands for an expanded range and scale of home based businesses only where considered compatible with the surrounding land uses. There are two guiding principles for setting standards for and identifying appropriate areas for home based business. The first requirement is that the appearance and activity level of the home based business remains secondary to the residential use of the land in the residential zone (as for Home Occupations), and that the areas zoned to permit increased options for businesses are confined to residential streets or enclaves which are already characterized by higher traffic volumes, traffic generation or relatively intensive land use. Finally, resident tolerance for activities associated with home based businesses varies among Growth Centres and even among neighbourhoods within a single Growth Centre. Therefore, Council may also weigh the social values intrinsic to a particular area in terms of allowing for the co-existence of commercial and residential uses in primarily residential settings.

2.4.11.1 Council shall provide for commercial uses as Home Based Businesses accessory to residential uses in Growth Centres. The Land Use Bylaw will define Home Based Business as a category of Home Occupations. Council will establish Home Based Business "sub" zones in the Land Use Bylaw.
The Home Based Business sub zones will be expressed by a letter "B" extension following the standard Residential R1, R2, RM and R3 Zones, such as "R1-B" on the Zoning Map. Council may by amendment to the Land Use Bylaw, amend a Growth Centre zoning map by changing an R1 Zone to R1-B, an R2 Zone to R2-B, an RM Zone to RM-B, or an R3 Zone to R3-B.

2.4.11.2 Council intends to regulate the intended use and physical attributes of a Home Based Business to ensure it does not involve a change to the residential character and appearance of the residence. The Land Use Bylaw will include the following provisions to control the size and intensity of the use and ensure it remains in keeping with the intent of this policy:

a. the number of non-resident employees will be limited

b. the amount of floor area to be devoted to the non-residential use will be limited

c. signs will be strictly controlled

d. parking will be strictly controlled

e. alterations to the structure that would change the exterior residential appearance of the dwelling or accessory structure will be prohibited

f. storage and display will be limited

g. uses requiring outdoor storage or display or which would in any way alter the residential nature and appearance of lot and structures will be prohibited

2.4.11.3 Council in considering a rezoning from a standard R1, R2, RM, or R3 zone to a Home Based Business subzone, shall have regard to the following:

a. the subject property(s) shall have frontage on and direct access to a designated major collector street; and

b. policies for amending the Land Use Bylaw contained in Part 6 of this Strategy
2.4.11.4 Council may consider a rezoning from an R1-B, R2-B, RM-B, or R3-B subzone to a corresponding R1, R2, RM, or R3 Zone. In considering a zoning map amendment, Council shall have regard to the Policies for amending the Land Use Bylaw contained in the Urban Residential Development Section 2.4, in addition to policies in Section 6.2 of this Strategy.

2.4.12 Residential Comprehensive Development District (RCDD)

Residential Comprehensive Development Districts allow for integrated and comprehensive planning of new large-scale residential communities by development agreement in Growth Centres. RCDD Districts will not be located within Hamlets or in the rural areas of the County. The RCDD District is intended to provide detailed site controls for larger scale residential development in locations that are environmentally sensitive, prominently located within an established community, or where alternative development standards may be desirable.

RCDDs provide an opportunity for developers to consider alternative lot standards and increased densities in exchange for the provision of additional open space and community amenities, such as pedestrian pathways and bike lanes, or the use of sustainable technologies, such as district heating.

Open space is fundamental to good community planning, especially in areas that have increased density or abut agricultural zoning. Open space areas are not intended to be the land that is unusable or undesirable for development, but rather considered as an integral part of a well-planned development. It provides quality areas for the protection of environmental features, protection of adjacent agricultural land, and the provision of opportunities for active and passive recreation.

The RCDDs will be required when Growth Centres expand into the Agricultural District so that existing and future agricultural activities can be buffered from the residential development.

Our population is aging. This demographic shift requires new types of communities where seniors benefit from a variety of levels of care in a location that is integrated into the broader community. Theses types of development often have a variety of housing types ranging from independent living accommodations, in the form of duplexes, townhouses or apartment buildings, to supported living environments and long term care beds. They may vary in size, and have densities that exceed the surrounding community. As a result, these developments require site controls for landscaping and buffering; architectural controls to guide
massing, bulk and integration with the surrounding built form; and amenity areas and site access to meet the needs of this specialized population.

2.4.12.1 **Residential Comprehensive Development District – Objectives**

2.4.12.1.1 To allow for comprehensively planned residential development within a Growth Centre.

2.4.12.1.2 To ensure that development provides for adequate buffering between agricultural and residential uses.

2.4.12.1.3 To protect important or sensitive open spaces within a comprehensively planned development.

2.4.12.1.4 To allow for flexibility to permit sustainable development patterns and encourage sustainable urban growth.

2.4.12.2 Council shall establish a Residential Comprehensive Development District. This District is intended to provide for comprehensively planned development within Growth Centres. The RCDD will provide detailed site controls for larger scale development in locations that are environmentally sensitive, prominently located within an established community, or where alternative development standards may be desirable.

2.4.12.3 Council may consider requests to establish an RCDD, subject to an amendment to the Future Land Use Map of this Strategy. When considering such proposals, Council shall have regard to the following:

a. the goals and objectives of this Strategy;

b. the potential for conflict with permitted existing surrounding uses;

c. the impact on agricultural lands;

d. the need for additional housing or development;
2.4.12.4 RCDDs will encourage alternative lot standards, such as reduced setbacks and zero lot lines that create more sustainable development forms.

2.4.12.5 Council may adopt landscaping guidelines for agricultural buffer areas.

2.4.12.6 Council shall establish a Residential Comprehensive Development District Zone in the Land Use Bylaw, which shall permit large-scale residential development by Development Agreement.

2.4.12.7 Permitted uses in the Residential Comprehensive Development District (R10) Zone include:

- Accessory Structures to Residential Units
- All Uses Permitted in the Community Facilities (CF) Zone
- Apartment Buildings and Grouped Dwellings
- Long Term Care Facilities; Continuum of Care Retirement Community
- Mini-homes
- Municipal or Village Infrastructure
- Parks and Playgrounds
- Residential Care Facilities
- Single Detached Dwellings
- Small-scale Commercial (less than 2000 square feet of commercial floor area) that directly services the development. This shall include, but is not limited to, corner stores with optional accessory gas bar, coffee shops, cafes, teahouses, restaurants, general retail, and other similar uses. Industrial, resource, drive-in
restaurants, and large-scale commercial uses are prohibited.
- Town Houses and Row Houses
- Two Unit Dwellings
- Urban Home Occupations

2.4.12.8 When considering development agreements in the RCDD Zone, Council shall have regard for the following:

a. that the proposal shall not have a negative financial impact on the municipality;

b. the ability for the development to be serviced by central sewer services and, if possible, central water services;

c. the adequacy of access to a public road and the ability of the surrounding road network to service the proposed development;

d. the adequacy of storm water management;

e. that fire protection services and equipment are available and adequate to accommodate the development;

f. that adequate buffering shall be provided between the proposed development and existing agricultural uses and zones;

g. that building height, mass, scale, urban form and architectural design shall be compatible with the existing development in the community or neighbourhood;

h. Council may require performance bonding or security in the agreement, if deemed necessary, to ensure that major components of the development such as, but not limited to, road construction or maintenance, landscaping or development of amenity areas, are completed in a timely manner;

i. that open space dedications are sufficient to protect important environmental features and to accommodate and mitigate the proposed densities;

j. the proposed density and urban form effectively integrate with the existing development form.
2.4.12.9 When considering the policies established in 2.4.12.8, the following information shall be required:

a. a drainage and storm water management plan, prepared by a professional Engineer, demonstrating that the development will not adversely impact adjacent land or the existing storm water management systems;

b. a detailed site plan showing proposed densities, location of major collector roads, road hierarchy, location and size of road accesses, pedestrian pathways, and open space areas;

c. a Traffic Impact Assessment that is approved by the Department of Transportation and Infrastructure Renewal and the Municipal Engineer, showing the adequacy of the existing and proposed road network to accommodate the proposed development. The Traffic Impact Assessment shall also provide recommendations concerning the mitigation of traffic related issues caused by the development;

d. the location of any zero lot line development;

e. in any portion of the RCDD with densities exceeding 5 units per gross acre, a landscaping plan showing the locations of amenity areas;

f. proposed architectural plans and building elevations; and

g. a detailed plan for the 100 foot agricultural buffer area, including details on the vegetative buffer or the proposed alternatives to the vegetative buffer.

2.4.12.10 Development Agreements for the RCDD (R10) Zone shall address the following:

a. that zero lot line development may be considered on portions of the development area where the open space dedication exceeds 20 percent of the area planned for the zero lot line development. In the case of zero lot line development, the Development Agreement shall make provision for the following:

i. easements or other mechanisms that provide legal access to the side of the structure with the zero lot
line so that necessary maintenance and repair may occur;

ii. that no part of the structure, including eaves, shall encroach on neighbouring properties;

iii. encourage different architectural styles so that the streetscape is varied and visually interesting;

iv. open space or park space is locate within a reasonable walking distance.

b. that the proposal provides an adequate buffer area from abutting agricultural uses or the Agricultural (A1) Zone, in order to mitigate any negative impacts on agricultural activity. A 100 foot wide agricultural buffer area, consisting of land where there are strict development restriction as outlined in section (d) of this policy, is required along property lines where there is active agriculture and may include a vegetative buffer. The vegetative buffer, based on the following guidelines, shall be required, except in cases where other types of buffering are shown to be sufficient (fencing, topographical features, etc.) to reduce noise, provide a visual break, or provide privacy and security:

i. single row of trees consisting of both coniferous and deciduous species, that can achieve a minimum height of 20 feet. A double row of trees is preferable;

ii. the line of trees, at planting, shall be no smaller than 4 feet tall, and should be no further than 30 feet apart;

iii. in cases where there is existing vegetation, the developer must demonstrate that the existing vegetation successfully acts as a buffer. Existing vegetation may also be augmented to meet the requirements of this policy.

c. no residential or commercial uses may occur within the agricultural buffer area. Recreational uses are permitted;

d. if possible, the 100-foot agricultural buffer between the residential uses and adjacent agricultural uses/zone shall
be in public ownership or subject to a registered easement or covenant;

e. development standards, such as but not limited to parking requirements, height and setbacks, are to be generally consistent with the zone that most closely resembles the proposed development form and density per acre, as established by the Land Use Bylaw. However, reduced zone requirements may be considered if additional open space, pedestrian pathways, bike lanes, or other community amenities are provided as part of the development.

f. flag lots may be considered subject to the following criteria:

i. that there is no greater than a 4:1 depth to width ratio;

ii. no flag lot may abut the rear yard of another flag lot;

iii. reduced road frontage, to a minimum of 20 feet, may be considered;

iv. a vegetative buffer is required between the front yard of the flag lot and the rear yard of an abutting residential development;

v. confirmation of servicing;

vi. may be permitted in circumstances where there are topographical issues, such as slope or hydrology that make development difficult.

2.4-27
### 2.5 INSTITUTIONAL, COMMUNITY AND RESIDENTIAL FACILITIES

Institutional, Community and Residential Facility uses vary a great deal in terms of scale, land use impacts and locational requirements. Some uses are land extensive while others are small in scale. Depending on the function, some facilities serve a regional area, others serve a strictly local community and others are either residential facilities or are an integral part of residential neighbourhoods.

In providing for facilities and services operated by government and non-profit organizations, the policies should identify and distinguish between uses suitable in commercial areas and those more suited to residential areas of Growth Centres.

Large facilities such as hospitals and schools generally have large land requirements. Council intends to formally designate the existing large facilities, and to establish criteria to enable Council to consider new proposals in undeveloped areas of Growth Centres. As Institutional uses may be located within or adjacent to Residential Districts, low lot coverage and deep landscaped setbacks are intended to reduce the impact of these facilities on residential development.

#### 2.5.1 Urban Institutional, Community and Residential Objectives

2.5.1.1 To recognize institutional, community and residential facilities, as integral parts of the Growth Centre communities.

2.5.1.2 To distinguish between large institutional uses, community facilities and services and residential facilities according to their compatibility relative to other land uses.

2.5.1.3 To provide for the establishment of Day Care Facilities in Residential Districts.

#### 2.5.2 Urban Institutional Policies

2.5.2.1 Council shall establish an "Institutional District" (I) designation to be applied to existing large institutional facilities. Lands containing large institutional uses will be designated Institutional District on the Growth Centre Future Land Use Maps.

2.5.2.2 Council shall establish the Institutional (I1) Zone in the Land Use Bylaw. The I1 zone shall permit uses such as schools, hospitals, large correctional facilities and uses of a similar scale. Smaller scale community facilities may be permitted as accessory uses and in close proximity to Institutional Districts. Lands designated Institutional will be zoned I1 in the Land Use Bylaw. Existing uses within the I1 zone will be permitted.
2.5.2.3 Council does not intend to reserve undeveloped lands for institutional uses. However, Council will consider proposals to rezone lands in undeveloped Districts of the Growth Centres to permit an institutional use without the necessity of an amendment to this Strategy. In considering a rezoning to I1, Council shall consider the following:

a. preference shall be given to designated General Commercial (G) or Residential (R) Districts

b. the lands are vacant and adjacent to areas of the Growth Centre that are already developed and serviced

c. the proposal would allow for the reuse of an existing suitable structure

d. the general goals and objectives and policies of this Strategy

e. the subject site can meet the requirements of the Land Use Bylaw and policies for amending the Land Use Bylaw contained in Part 6 of this Strategy

2.5.3 Community Facilities Policies

In planning for Community Facilities it is useful to distinguish them from both large institutions of a regional nature and those facilities of a residential nature. Community Facilities include, but are not limited to, village offices, community centres and fire halls. These uses will be encouraged to locate within areas designated for commercial uses. Additional provisions will permit fire stations and public works depots and like uses in Industrial Districts. Community Facilities may be considered in residential areas subject to locational criteria and an amendment to the Land Use Bylaw.

2.5.3.1 Council shall establish a "Community Facilities" (CF) Zone in the Land Use Bylaw. Permitted uses in the CF Zone will include government and non-profit facilities which generally serve a Growth Centre and may also serve the surrounding rural area.

2.5.3.2 Council intends to encourage Community Facilities to locate in Districts intended for commercial uses in Growth Centres. These facilities will be permitted uses in the appropriate commercial zones.
2.5.3.3 Council shall zone lands containing Community Facilities CF in the Land Use Bylaw where they are located in a Residential District. In addition, Council foresees that there may be circumstances under which community facilities are appropriate or desirable in Residential Districts. Accordingly, Council may consider applications for rezoning to CF to permit a Community Facility in a Residential District. The Zoning Bylaw will contain special provisions to ensure compatibility with residential uses by including provisions for deep side and rear yards, low lot coverage, screening and landscaping.

2.5.3.4 In considering proposals to rezone lands to "CF" in Residential Districts, Council shall have regard to the following:

a. the site is located on the periphery of Residential Districts on designated Major Collector streets

b. the site is capable of meeting the requirements of the CF Zone contained in the Land Use Bylaw

c. the proposal can meet all other applicable policies of this Strategy including policies for amending the Land Use Bylaw contained in Part 6 of this Strategy

In addition, Council may require applicants to demonstrate to Council's satisfaction no suitable site is available in nearby Commercial Districts.

2.5.4 Residential Facilities Policies

A further distinction is made between the "Community Facilities" suited to a commercial district, and uses which are residential in nature. Residential Facilities generally do not require a central location, preferred access or visibility.

The residential policies permit small scale residential care facilities with up to eight residents in all residential zones. Churches are also permitted subject to site conditions and locational criteria. Churches that do not meet the locational requirements of the Zone may be considered by site specific zoning amendment. Large Residential Facilities such as nursing homes may also be considered in Residential Districts. These policies intend to provide a quiet location for residential facilities without disrupting the character of the Residential District.
2.5.4.1 Council shall establish a Residential Facilities (RF) Zone in the Land Use Bylaw. Permitted uses in the RF Zone shall include, but not be limited to, churches, residential care facilities for more than eight residents and Homes for Special Care including nursing homes.

2.5.4.2 A Residential Care Facility in which eight or less residents live as a single housekeeping unit is considered a residential use and permitted in all residential zones.

2.5.4.3 Council intends to encourage Residential Facilities to locate in designated Residential Districts. In this regard, a rezoning to RF may be considered in residential districts in addition to permitting them in the Medium and High Density (R4 and R5) Residential Zones.

2.5.4.4 Council shall zone lands containing Residential Facilities RF in the Land Use Bylaw and consider new proposals subject to an amendment to the Land Use Bylaw. The Land Use Bylaw will contain special provisions to ensure compatibility with residential uses by including provisions for low lot coverage, screening and landscaping.

2.5.4.5 Council may provide for a reduction in the parking requirements for expansions to churches that were originally built prior to 1979. A reduction in the parking requirements will not be permitted on residential collector, or local streets.

2.5.4.6 In considering proposals to rezone lands to RF in Residential Districts, Council shall have regard to the following:

a. the site is accessible to a Collector or Local Exterior Street

b. the site can accommodate the requirements of the RF Zone contained in the Land Use Bylaw

c. the proposal can meet all other applicable policies of this Strategy including policies for amending the Land Use Bylaw contained in Part 6 of this Strategy

In considering such proposals, Council shall be satisfied that traffic congestion on local streets will not result.
2.5.5 Day Care Facilities Policies

Day care facilities are a necessary service in light of prevalent social trends such as the increase in single parent families and two income households. They provide secondary care to individuals who may not be able to safely care for themselves, such as children, elderly, and others.

Permitting day care facilities in residential areas would allow such facilities to develop in a safe and quiet environment for the individual requiring care as well as a convenient and accessible location for the primary care-provider. However, some activities which may be associated with day care facilities, such as noise, an increase in traffic, and changes to the physical appearance of a property, may detract from the residential character of an area. Council’s intent is to allow day care facilities providing for care for more than fourteen people in Residential Districts by Development Agreement, which allows for individual consideration of each proposal.

2.5.5.1 Council shall consider the development of Day Care Facilities providing care for more than fourteen (14) people by Development Agreement under the provisions of the Municipal Government Act.

In considering proposals, Council shall have regard to the following:

a. the proposed use shall be located on land fronting on and having direct access to a Collector Street or an Exterior Local Street

b. signage for the proposed use shall be limited in size

c. compatibility with the surrounding residential uses in terms of architectural design, scale and building materials

d. buffers in the form of setbacks, landscaping, screening or fences shall be provided between the proposal and abutting residential rear or side yards

e. the effect of the proposed use on the street network in terms of traffic volumes, traffic circulation, sighting distances, and access to and from the site shall be specifically addressed

f. adequate off-street parking and off-street drop-off area shall be provided
g. a site plan showing the proposed development including the building, outdoor recreation area, parking and drop-off area, sign location, buffers and landscaping will be required. This site plan shall form a part of the Development Agreement and the development of the site shall be in accordance with the site plan as approved by Council.

2.5.5.2 Notwithstanding Policy 2.5.5.1, Council shall permit Day Care Facilities in the Medium or High Density (R4 and R5) Residential Zones. Further opportunities for Day Care Facilities are provided in Commercial Districts.
2.6 URBAN RECREATION, PARKS, OPEN SPACE AND NATURAL ENVIRONMENT

2.6.1 Urban Parks and Recreational Open Space

Council's response to the growing appreciation of and demand for leisure and recreation opportunities in Kings County is clearly reflected in its planning policies and recreation programs. Using its land use policies in concert with recreation management resources, Council will continue to provide for recreation and open space uses.

Part 4, The General Planning Part of this Strategy, elaborates on the detailed Recreation, Parks and Open Space policies.

The following urban policies indicate how such uses will be treated in the Strategy and Land Use Bylaw. In addition, private recreational commercial uses of essentially an open space nature will be guided by the policies of this Subsection.

2.6.2 Urban Parks and Recreational Open Space Objectives

2.6.2.1 To acquire and develop a balanced distribution of recreation lands in Growth Centres.

2.6.2.2 To recognize existing sites and facilities and create opportunities for new active and passive recreation, consistent with the Strategy's comprehensive Recreation, Parks and Open Space objectives and policies contained in Section 4.3 of this Strategy.

2.6.3 Urban Parks and Recreational Open Space Policies

2.6.3.1 Council shall encourage and facilitate the provision of Recreational Open Space and the development of parks. Recreation Parks and Open Space planning will be guided by the General Planning policies contained in Section 4.3.

2.6.3.2 Council shall establish a "Parks and Open Space District" (P) designation and designate Public Parks and Recreational Open Space on the Growth Centre Future Land Use Maps. In addition, public parks will be permitted uses in zones within all Commercial and Residential Districts.

2.6.3.3 Council intends to differentiate between public parks and private recreational open space uses and will create two zones as follows:
2.6.3.4 Council shall establish a Parkland (P1) Zone in the Land Use Bylaw. Public parks both Community and Neighbourhood within areas designated Parks and Open Space District will be zoned P1. In addition, lands containing public parks will be permitted within any District designated and intended for Commercial or Residential development. Public parks will be permitted uses in Residential and Commercial Zones. New public parkland will not require an amendment to this Strategy or the Land Use Bylaw.

2.6.3.5 Council shall establish a Recreational Open Space (P2) Zone in the Land Use Bylaw. Recreational open space uses which are commercial ventures that are quiet in nature and involve large tracts of essentially open space lands will be permitted in the P2 Zone. Recreational Open Space uses will be zoned P2. Council may consider a rezoning to P2 in any Residential District to permit new Recreational Open Space uses. An amendment to the Future Land Use Maps of this Strategy will not be necessary.

2.6.3.6 The P2 Zone will permit recreational commercial uses of an open space nature, such as, but not limited to, golf courses or campgrounds.

In considering rezoning to P2 Council shall have regard to the following:

a. the site is of sufficient size and the nature of the use will create a wide area or extent of open space

b. the surrounding lands are generally vacant and undeveloped

c. the proposed site has direct access to a Collector or Local Exterior street

d. the use will be compatible with urban residential land uses

e. the proposal is in keeping with all other applicable policies of this Strategy including those for amending the Land Use Bylaw contained in Part 6 of this Strategy
2.6.4 Natural Environment and Urban Environmental Open Space

Part 4, the General Planning Policies identify certain lands as having sensitive environmental features and processes which warrant protection. Floodplains, wetlands and steep slopes are among the more significant natural environmental features which can place physical restraints on development. Wildlife habitats and environmentally sensitive or unique areas are additional features to consider in general urban and rural planning programs.

In recognition of both their inherent value as natural resources as well as the constraints they can pose to development, Council has established a number of objectives pertaining to the use of environmental open space in urban areas. These considerations are outlined in detail in Section 4.2 of this Strategy.

2.6.5 Natural Environment and Urban Environmental Open Space Objectives

2.6.5.1 To identify and protect and/or manage lands within Growth Centres which are subject to flooding, contain wetlands, steep slopes, or are otherwise sensitive to or pose constraints on development.

2.6.6 Natural Environment and Urban Environmental Open Space Policies

2.6.6.1 Within Growth Centres, Council intends to limit development on, and in proximity to, floodplains, wetlands, steep slopes and where possible to recognize significant wildlife habitats through designations and zones pursuant to the policies in the Natural Environment, Section 4.2 of this Strategy.

2.6.6.2 Council may designate lands Natural Environment District on the Growth Centre Future Land Use Maps as provided for in Section 4.2 of this Strategy. In the Growth Centres this designation may be applied to the following:

a. lands identified as subject to flooding
b. floodplains
c. dykelands
d. identified significant wetlands
e. significant wildlife habitats on lands publicly owned and controlled

f. unstable slopes and any other lands identified by Council as posing a hazard to development

2.6.6.3 As provided for in Policy 4.2.4.2 lands designated Natural Environment District shall be zoned Environmental Open Space (01) Zone in the Land Use Bylaw. Development will be restricted in accordance with policies contained in Section 4.2 Natural Environment, General Planning Policies.

2.6.6.4 Notwithstanding Implementation Policy 6.1.3.2 Council shall not consider rezoning lands which are zoned 01 and/or designated Natural Environment to any other zone without an amendment to this Strategy and the Land Use Bylaw.

2.6.6.5 In accordance with Implementation Policy 6.1.3.1, Council may consider adjustments and/or rounding out of the Environmental Open Space (01) Zone boundaries without the necessity of a Strategy Amendment. In considering such adjustments, Council shall have regard to the following:

a. lands identified as subject to flooding

b. physical landforms delineating the floodplain

c. identified significant wetlands

d. significant wildlife habitats and wildlife corridors

e. soils prone to water related slope instability

f. existing approved subdivisions and/or development

g. a hydrotechnical or topographical study

2.7 URBAN NON-CONFORMING USES

2.7.1 Urban Non-Conforming Uses

Within the Growth Centres there are some commercial and industrial uses which are not permitted by the Land Use Bylaw. The Municipal Government Act provides a level of protection for uses that were in existence prior to a Land Use Bylaw coming into effect. The Act refers to them as Non-Conforming uses and provides legal status for their continuance subject to qualifications. In this Municipality uses have become non-conforming because either they existed prior to and were not permitted by the original Municipal Planning Strategy and Land Use Bylaw on June 19, 1979, or were permitted under the 1979 Bylaw but became non-conforming as the result of subsequent amendments to the Land Use Bylaw.

In addition to the Municipal Government Act provisions Council intends to allow either the expansion of non-conforming uses or changes to non-conforming uses provided no greater impact on the surrounding land uses is anticipated. Because the range of non-conforming uses and settings in which they occur are so varied, Council will require a Development Agreement prior to allowing a proposed expansion or alternative use.

2.7.2 Policies for Urban Non-Conforming Uses

2.7.2.1 It shall be the Policy of Council by Development Agreement under the Municipal Government Act provisions to consider within Growth Centres, the expansion of non-conforming uses, including a change in use to one expected to have no greater impact on the adjacent land uses than the existing legal use by Development Agreement under the Municipal Government Act provisions.

In considering a Development Agreement Council shall ensure:

a. the use does not extend beyond the boundaries of the existing lot containing that use

b. the use will not adversely affect adjacent land uses

c. that adequate buffering and setback distances are maintained from low density residential uses and that landscaping treatments are included to reduce the visual impact

d. the expanded or converted use is not obnoxious by virtue of noise, odour, dust, vibration, smoke, or other emission
e. that adequate provision is made for the acceptable maintenance and appearance of the expansion or conversion

f. the expansion or conversion shall not affect the hours of operation where the use would interfere with or create undue problems for the residents of the surrounding area

g. the proposal meets all the pertinent policies of this Strategy, including policies for amending the Land Use Bylaw and entering Development Agreements contained in Part 6 of this Strategy

2.7.2.2 In addition to the above, Council shall have regard to the following in considering entering a Development Agreement as provided in Policy 2.7.2.1:

a. the bulk and scale of any building and its exterior finish is compatible with adjacent uses

b. total area used for outdoor storage, and adequate provisions for year-round artificial or natural screening devices

c. the impact of the proposed expanded use on traffic volumes and the local road network, as well as traffic circulation, sighting distances and entrance and exit to and from the site

2.8 URBAN TRANSPORTATION FACILITIES

The urban transportation policies of this Section relate to transportation services in the Growth Centres. The Street network problems experienced in the Coldbrook-Wolfville Urban Corridor are, in part, due to a lack of intergovernmental coordination between the Nova Scotia Department of Transportation and Infrastructure Renewal and the three municipal governments.

The mandate for the development of transportation networks within this Municipality rests with the provincial government while land use planning is a local responsibility. Urban land use activities generate traffic demand and conversely transportation networks can influence development trends. Therefore, increased coordination between the provincial and local governments will be necessary to adequately direct development in the Growth Centres.

The County wide road network serves to link Growth Centres and facilitate traffic through the Growth Centres. Within the Growth Centres these roads serve as Major Collectors. Residential Collector Streets will be designated to accommodate traffic from Interior Local Streets within Growth Centres to the Major Collectors to connect with the intercommunity road network.

Port Williams is unique in regard to its port facility capable of accommodating ocean going vessels. In the past, considerable agricultural produce was shipped through the port.

The airport in Cambridge now owned and operated by the Municipality has improved and now provides cargo and passenger service to the business, agricultural, and industrial sectors. A larger airport for military aircraft is located at 14 Wing Greenwood, adjacent to the Growth Centre of Greenwood.

Noise Exposure Forecast (NEF) contours are established for each airport to determine the intensity of aircraft noise. Zoning for new residential development will be restricted in areas within the 35 or higher NEF Contour Levels.

2.8.1 Urban Transportation Objectives

2.8.1.1 To facilitate improved intergovernmental coordination between the Province and the Municipality in the delivery of transportation services.

2.8.1.2 To improve the form, efficiency and operation of the Growth Centre transportation network.

2.8.1.3 To improve transportation links within and between residential neighbourhoods.
2.8.1.4 To facilitate pedestrian movement throughout Growth Centres, particularly within and between neighbourhoods.

2.8.1.5 To pursue alternative traffic circulation options for Growth Centres currently dependent upon a single Major Collector Street.

2.8.1.6 To reduce traffic congestion and improve the efficiency of traffic circulation.

2.8.1.7 To optimize the use and integration of existing transportation modes and facilities.

2.8.1.8 To minimize conflicts between transportation facilities and other urban land uses.

2.8.2 Urban Transportation Policies - Streets

2.8.2.1 Council shall request a study be done by the Nova Scotia Department of Transportation and Infrastructure Renewal with recommendations for a future County road and Growth Centre street transportation scheme to improve intercommunity links for long term planning of the Coldbrook-Wolfville Urban Corridor.

2.8.2.2 Council shall pursue the possibility of establishing an urban street paving program for the Growth Centres with the Nova Scotia Department of Transportation and Infrastructure Renewal. The program will address the level of street surface standards for urban areas, private developer responsibilities for new streets, and a remedial action plan for existing unpaved streets.

2.8.2.3 Council shall pursue the possibility of establishing an urban storm water management program with the Nova Scotia Department of Transportation and Infrastructure Renewal and Nova Scotia Environment.

2.8.2.4 Council intends to pursue the possibility of requiring paved street construction as part of the land development process at the developer's expense.

2.8.2.5 Council shall pursue the development of a consistent set of standards for road construction between the Nova Scotia Department of Transportation and Infrastructure Renewal and the Municipality. Considerations include rights-of-way,
intersection spacing, cul de sac, street lengths, sight distances, parking and street access. Such standards shall be integrated into Land Use Bylaws and Subdivision Bylaws where possible.

2.8.2.6 Council shall establish an urban street classification system for planning purposes as follows:

a. **Major Collectors** providing for movement of traffic through the Growth Centres

b. **Residential Collectors** providing for movement of traffic from Local Interior Streets to Major Collectors

c. **Interior Local** streets which feed traffic to other Local Interior Streets or Residential Collectors

d. **Exterior Local** are those local streets which lead directly to Major Collector Streets

Major and Residential Collector Streets will be designated on the Future Land Use Maps for the Growth Centres.

2.8.2.7 Council shall require deeper setbacks from designated Major Collector Streets than are normally required for Residential Collector or Local Streets, to enable future street widenings and to afford protection to abutting property owners from increased traffic volumes, noise and speeds.

2.8.2.8 Council shall require 66 foot rights-of-way for all streets or greater right-of-way as required by the Nova Scotia Department of Transportation and Infrastructure Renewal.

2.8.2.9 Council may prepare a Conceptual Future Subdivision Plan for each Growth Centre in consultation with the Nova Scotia Department of Transportation and Infrastructure Renewal showing:

a. the general proposed location and function of future streets

b. proposed traffic and pedestrian linkages within and connecting residential subdivisions, institutional facilities, commercial services and community facilities
Land subdividers will be encouraged to establish their subdivision street pattern in keeping with the existing and proposed street designations. The Municipal Planning Strategy will provide a framework to be used as a guideline in consulting with the Nova Scotia Department of Transportation and Infrastructure Renewal prior to approving future subdivision plans and development.

2.8.3 Airport Land Use Policies

2.8.3.1 Council shall adopt the Municipal Airport and the Canadian Forces Base Noise Exposure Forecast (NEF) Maps as Maps 1 and 2 as part of this Strategy.

2.8.3.2 Council will not permit a zoning amendment to any Residential or Institutional, Community or Residential Facility Zone in an area that is within a 35 or higher Noise Exposure Forecast (NEF) Contour Level for an airport. Notwithstanding this requirement, where existing housing has been zoned residential vacant properties may be permitted to develop residually to maintain conformity with abutting uses.

2.8.3.3 Notwithstanding policy 2.8.3.2, properties in the Greenwood Growth Centre within the NEF 35 contour created prior to November 10, 2008 are eligible for a rezoning to the Residential Single Dwelling (R1) or Residential One and Two Unit (R2) Zone where new residential development will only be permitted on existing lots. In addition, written acknowledgement by the property owner that the dwelling is located in a high noise exposure area is required.

2.8.3.4 Council shall establish an Airport (T1) Zone which shall apply to lands containing the existing airport and will permit airport related buildings and development related to airport activities.

2.8.3.5 Council may provide for land uses serving the airport such as motels, service stations, car rental depots, and parking accommodations for passenger and employee needs in the vicinity of the Kings County Municipal Airport.

2.9 URBAN MUNICIPAL SERVICES

Centralized growth is important from the standpoint of protecting the rural land resource base for agriculture, forestry and open space. Encouraging growth to Growth Centres also leads to cost efficient public service provision.

The Municipality is responsible for providing sewage collection and treatment, central water systems, storm sewers where necessary, and a solid waste collection and disposal service. In addition, residents may request street lighting, sidewalks, and street paving by application to the Municipality.

Containment of growth within development boundaries lessens the demands for the less economical public servicing of strip development in the rural areas.

Until recently the provincial-municipal cost sharing formula, together with grants and subsidies, made initial installation of public services a feasible financial proposition in the Growth Centres. However, continuing provincial contribution reductions in this formula may eventually have significant financial implications for the Municipality's future servicing commitments.

Existing and future potential revenues will relate directly to the density and rate of growth within serviced areas. The cost of servicing the most populated areas will be significantly less per unit than the costs of servicing large areas with low density development. Furthermore, the provision of public services will become more financially feasible as the communities grow.

The intent is to provide an equitable level of public services to all Growth Centres. However, the variation in size, population, residential density and development demand, makes it necessary to establish priorities.

A regional sewer system serves Coldbrook, New Minas and the Town of Kentville and a single sewage treatment facility serves both North Kentville and Centreville. The Town of Kentville water utility has been extended to parts of North Kentville.

2.9.1 Urban Servicing Objectives

2.9.1.1 To provide a wide range of urban public services in all Growth Centres.

2.9.1.2 To coordinate service delivery with the Towns when mutually beneficial.

2.9.1.3 To seek new means and methods or programs to improve public service delivery.

2.9.1.4 To establish a long term comprehensive policy and program for the provision and funding of urban public services.
2.9.2 Urban Servicing Policies

2.9.2.1 Council intends to provide or encourage a broad range of public services in Growth Centres including sewage collection and treatment, storm water collection, water purification and distribution where necessary, street lighting, street paving, and sidewalks.

2.9.2.2 Council intends to establish a long term comprehensive policy and implementation program for the provision and funding of urban public services. Future extensions, upgrading, and maintenance will be addressed as well as public and private sector responsibilities and priorities.

2.9.2.3 Council shall work together with other municipal units in Kings County to examine ways to deliver public services on an inter-municipal basis provided there are distinct benefits to residents in improved service with no appreciable increase in costs to the Municipality.

2.9.2.4 Council shall require the installation of sewerlines and laterals in any subdivision under development which is within the development boundary of a Growth Centre provided it can be connected to an existing sewer system owned by the Municipality of the County of Kings, a Village Commission, or a Town. The streets must be approved by the Nova Scotia Department of Transportation and Infrastructure Renewal and the development must conform to the policies of this Strategy.

2.9.2.5 The developer shall be responsible for expenses in providing sewerlines, storm drainage and street construction to Provincial standards.

2.9.2.6 Notwithstanding Policy 2.9.2.5, the Municipality may consider an alternative method of providing the required public services if it is deemed in the public interest to encourage development without placing a financial burden on the Municipality.

2.9.2.7 Council shall require in the Sewer Bylaw future development to connect to the central sewage collection system where any part of the development is within 100 feet of existing sewer lines.
2.9.2.8 Council shall require through the Subdivision Bylaw that residential subdivisions be serviced with central sewerage services.

2.9.2.9 Notwithstanding 2.9.2.8, Council may permit future development utilizing a septic disposal system to locate in Residential Districts without a central sewerage service on lots abutting streets listed by the Nova Scotia Department of Transportation and Infrastructure Renewal in existence at the date of formal Council adoption of this Strategy.

2.9.2.10 The minimum lot size shall be 50,000 square feet or such greater minimum standards as required by the Department of Health for installation of a private septic disposal system where permitted within a Growth Centre.

2.9.2.11 Council shall not extend central sewerage services beyond the limits of the development boundaries of the Growth Centres as indicated in this Strategy.

2.9.2.12 Where a sewage collection system has been extended beyond the development boundary of a Growth Centre, to alleviate an identified pollution problem, the policies of this Strategy respecting the particular rural district shall apply.

2.9.2.13 Council shall require that storm drainage systems are designed to take advantage of natural watercourses and that the design of the subdivision must relate to the existing natural drainage patterns of the site. Such subdivision proposals shall be referred to engineering consultants for consideration and be designed or approved by such consultants.

2.9.2.14 Council shall require installation costs of street lighting be charged to the users within the service limits by an area rate chargeable to benefiting households in accordance with the Street Lighting Bylaw.

2.9.2.15 It shall be the policy of Council to give priority to the construction of sidewalks on Collector Streets on main thoroughfares prior to sidewalk construction on Local Streets.

2.9.2.16 Council shall continue to provide a solid waste collection and disposal service throughout the Municipality and a recycling service for the Growth Centres.

2.10 GROWTH CENTRE SECONDARY PLANNING STRATEGIES

The process of urbanization is well advanced in some of the Growth Centres, particularly those adjacent to the Town of Kentville. An urban form has already evolved and some Growth Centres are growing at a relatively fast rate. Consequently it may be necessary to undertake more detailed urban planning.

Kings County's first Planning Strategy was adopted for New Minas in 1975 and updated in 1982. It establishes a specific policy framework for New Minas completely independent of this planning document.

Future Secondary Planning Strategies may be prepared for other Growth Centres as a refinement of this Strategy in a format that may incorporate supplementary information such as a conceptual Future Subdivision Plan, a Community Storm Water Management Plan and a Comprehensive Parks and Open Space Plan.

The Growth Centres with the greatest growth and development pressure will be given priority for preparation of Secondary Planning Strategies.

2.10.1 Secondary Planning Strategy Objectives

2.10.1.1 To provide for detailed urban planning of faster growing Growth Centres.

2.10.1.2 To capitalize on and emphasize Growth Centre "uniqueness" in planning for future development.

2.10.1.3 To enhance community involvement in planning.

2.10.2 Secondary Planning Strategy Policies

2.10.2.1 Council intends to adopt detailed Secondary Planning Strategies for all Growth Centres and will assign priority to those exhibiting relatively fast rates of urban growth and development pressure.

2.10.2.2 Notwithstanding the policies of this Strategy, upon adoption of a Secondary Planning Strategy, its supplementary policies, specifically addressing that Growth Centre shall apply and take precedence in the event of a conflict over the policies of this general or parent Strategy.

2.10.2.3 The Secondary Planning Strategies shall be adopted as an integral part of this Strategy by amendments to this Strategy.
2.10.2.4 Future Land Use Maps and other maps prepared as part of a Secondary Planning Strategy shall, upon adoption, replace the corresponding maps within this Strategy.

2.10.3 Centreville Secondary Planning Strategy

Centreville is predominantly residential in nature. As a wide range of urban amenities is available in nearby urban areas, Municipal Planning Strategy policies promote the residential nature of this Growth Centre. It is therefore not the intention to encourage extensive commercial or industrial uses.

Matters of both environmental and recreational issues are also of relevance to Centreville, with the Valley Watershed Stewardship Association expressing interest in the idea of a Secondary Planning Strategy. The Centreville Growth Centre contains many recreational facilities, which are very important and support the residential nature of this community. A golf course, large baseball field and soccer field along with numerous community trails, form the backbone of this community.

2.10.3.1 Project Goal

Council’s goal was to implement a Secondary Planning Strategy for the Growth Centre of Centreville. The purpose of a Secondary Planning Strategy (SPS) is to address more specifically, the planning needs of Centreville than is possible through the countywide Municipal Planning Strategy. As per the Terms of Reference the process addressed the following planning issues:

- identify the existing and potential future park and open space areas and pedestrian links
- identify other land use planning or design related issues that are unique to Centreville
- confirm, and where desirable, modify land use designations to optimize land use opportunities
- review current Growth Centre Boundaries

As well, the Secondary Planning Strategy working group took an opportunity to capitalize on and emphasize Growth Centre “uniqueness” in planning for future development.
2.10.3.2 **Project Working Group**

To complete the Centreville Secondary Planning Strategy, the Municipality facilitated the establishment of a committee that worked with Municipal Planning staff to produce a draft documents. Initially, the committee was tasked with developing draft Secondary Planning Strategies for both Centreville and Coldbrook.

The committee met several times and discussed those issues that were common to both communities. Once those matters were resolved, the joint group formed two separate committees that more specifically represented each of the Growth Centres. The original intent of the project was to continue as a joint effort, but the members felt that there were too many dissimilar matters to be dealt with as Coldbrook is primarily commercial in nature and Centreville is primarily residential in nature and each represents a ‘uniqueness’ within Kings County that the group felt deserved the individual efforts of a community specific Committee.

2.10.3.3 **Public Participation**

The group held meetings on a regular basis and all meetings were open to the public. The regular committee members attended most of the meetings, but there were meetings that were attended by members of the general public. The meetings were somewhat informal and those present were permitted to ask questions and were encouraged to provide input into the process.

Other means of consulting the public during this process included a detailed community questionnaire. The questionnaires were distributed by hand by volunteers (youth groups) and were either picked up, dropped off at a specific community location or mailed back to the Municipality. There was approximately a 30% response rate of the questionnaires, which is considered a very high rate of return.
The community also held a daylong Open House event. The meeting dates and times were communicated by advertisement in the local paper, posters throughout the community, word of mouth by direct phone calling and by written letter to those land owners that may potentially be directly impacted by a proposed boundary or rezoning change. The purpose of the meeting was to gain input comments regarding the proposed changes. Approximately 60 people attended the Open House.

2.10.3.5 **Vision for the Growth Centre of Centreville**

Centreville is unique in that it is designated as one of two residential Growth Centres within the Municipality. As such the vision focuses on how to attract residential development through focusing on tourism opportunities and providing enhanced recreational opportunities.

**Vision:** A community based on country living nestled in a rich rural and mountainous seacoast hinterland with full access to quality urban services.

**Motto:** "A good place to live and grow"

2.10.3.6 **Open Spaces/Trails/Recreation/Parks** (Reference Map 5c)

Centreville is located close to other urbanized areas that have a variety of recreational services and amenities. Development of open spaces, trails, recreational areas and parks must meet the needs of the community, but not duplicate nearby services. Centreville also has a limited population base, which places financial limitations on the amount of recreational infrastructure that is possible.

2.10.3.7 **Trails** (Reference Map 5)

**Goal:** To preserve, manage and develop community and property owner trails for the recreational enjoyment of the community.

2.10.3.7.1 **Objectives**

- **2.10.3.7.1.1** To work in collaboration with the community to enforce municipal bylaws to prevent dumping and damage to trails.

- **2.10.3.7.1.2** To support educational programs for community members teaching respect in the use of the trails.

- **2.10.3.7.1.3** To assist the community in the development of a trail plan that facilitates the safe and enjoyable movement of people.
within the Centreville Growth Centre boundaries.

2.10.3.7.1.4 To encourage developers, community members, community business owners, stakeholders and landowners to develop a trail system within Centreville.

2.10.3.7.2 Policy

2.10.3.7.2.1 Council may undertake an examination of mechanisms and opportunities to include allowances for trails during future land development.

2.10.3.7.2.2 Council may consider alternate funding mechanisms, such as development fees or lot levies, to provide financial supports for a comprehensive trail system in Centreville.

2.10.3.8 Parkland (Reference Map 5)

Goal: To plan and manage community parks for the recreational enjoyment of the community.

2.10.3.8.1 Objectives

2.10.3.8.1.1 To have parks appropriate for the various age groups in the community.

2.10.3.8.1.2 To ensure the parks serve the needs of the community.

2.10.3.8.2 Policy

2.10.3.8.2.1 Council shall work with the community of Centreville and the provincial government to ensure the parks are safe and properly managed.
2.10.3.9 **Golf Course** (Reference Map 5)

**Goal:** To support the development of the golf course as an important community and tourism focal point.

2.10.3.9.1 **Objectives**

2.10.3.9.1.1 To work with the community to support youth golf programs.

2.10.3.9.1.2 To support the community as it develops and promotes other recreational uses of the golf course.

2.10.3.9.1.3 To support the limited planned expansion of the golf course in order to achieve additional recreational opportunities for the community.

2.10.3.9.2 **Policies**

2.10.3.9.2.1 Golf Courses may be permitted to expand, as of right, within the Centreville Growth Centre under the following conditions:

a. the land is zoned Parkland (P2)

b. adequate water and sewer servicing can be confirmed, by a professional engineer.

c. adequate parking is provided, as per the Land Use Bylaw
2.10.3.10 **Recreational Infrastructure** (Reference Map 5)

**Goal:** To work with the community to support the recreational infrastructure.

2.10.3.10.1 **Objectives**

2.10.3.10.1.1 To recognize the importance of recreation to the community of Centreville.

2.10.3.10.1.2 To work with the community to identify funding support for the recreational spaces.

2.10.3.11 **Transportation** (Reference Map 5c)

**Goal:** To promote the development of a comprehensive and cost efficient network of roads, walkways and public transit links.

2.10.3.11.1 **Objectives**

2.10.3.11.1.1 To establish a Kings Transit Service to Centreville.

2.10.3.11.1.2 To work with the Province to ensure that public roadways are well maintained.

2.10.3.11.1.3 Strive to ensure that major public streets in the Centreville Growth Centre are friendly to both vehicular and non-vehicular traffic, such as bicycles and pedestrians.

2.10.3.11.1.4 To support the residents of Centreville in their efforts to have the maximum speed limit within the Centreville Growth Centre not to exceed 60 kilometres per hour and to have all provincial highways, major collector streets and...
2.10.3.11.5 To identify opportunities for and general alignment of future community collector roads.

2.10.3.11.6 To link bicycle lanes and trails.

2.10.3.11.2 Policies

2.10.3.11.2.1 Council shall designate on the accompanying Centreville transportation map, the location of future local street connections for subdivision streets.

2.10.3.11.2.2 Council shall designate collector and local roads consistent with the classification system instituted in Section 3.8 of the Municipal Planning Strategy.

2.10.3.11.2.3 It is Council’s intent continue to co-operate with the provincial traffic authority, Centreville Growth Centre, and the development sector in designing and building a safe and efficient community automobile and pedestrian network throughout the Growth Centre.

2.10.3.11.2.4 Prior to any construction, as a result of a rezoning, a traffic study may be required, which indicates potential impacts on existing road networks and surrounding land uses.
2.10.3.12 **Sewer** (Reference Map 5b)

**Goal:** To provide the highest reasonable level of environmentally sustainable sewage treatment to the Centreville Growth Centre.

2.10.3.12.1 **Objectives**

2.10.3.12.1.1 To ensure that public and private investment in expanding treatment capacity and the extension and upgrading of trunk lines is achieved with the greatest efficiency and benefit to the overall community.

2.10.3.12.1.2 To ensure sewage treatment capacity keeps pace with population growth.

2.10.3.12.1.3 To develop a public education program in conjunction with the community regarding proper septic system maintenance and installation.

2.10.3.12.1.4 To focus future development into areas serviced by Municipal water and sewer.

2.10.3.12.2 **Policy**

2.10.3.12.2.1 It shall be the policy of Council not to permit any further development serviced by septic tank or disposal field. Those that meet Policy 2.9.2.9 of the Municipal Planning Strategy and the clubhouse expansion of the Golf Course shall be exempt of this requirement.
2.10.3.12.2 It shall be the policy of Council to extend sewer services to those areas that identify the need for such services and to ensure that it is user pay in conjunction with the Municipality.

2.10.3.13 **Water Supply Management** (Reference Map 5b)

**Goals:**

To ensure a continuous supply of potable water.

To reduce the risk to private and public water supplies through public awareness.

To reduce the risk to private and public water supplies through enforcement of appropriate agricultural and natural resources environmental practices.

2.10.3.13.1 **Objectives**

2.10.3.13.1.1 To cultivate a community water supply ethic to reduce waste.

2.10.3.13.1.2 To establish community programs to increase the Community’s awareness of how various types of domestic, commercial and agricultural uses may affect groundwater quantity and quality.

2.10.3.13.1.3 To study the impact of the agricultural sector's irrigation demands on the future groundwater quality and quantity.

2.10.3.13.1.4 To study the impact of the natural recharge areas on the future groundwater quality and quantity.
2.10.3.13.1.5 To delineate primary groundwater recharge areas for and to create a groundwater recharge area protection and monitoring strategy as well as implement Centreville recharge area and well field protection zones.

2.10.3.13.1.6 To identify future water supply sources.

2.10.3.13.2 Policy

2.10.3.13.2.1 Council, through its Planning Advisory Committee, may request a Water quality/quantity assessment be conducted prior to a rezoning to any higher residential density, any commercial rezoning or any industrial rezoning.

2.10.3.14 Water System (Reference Map 5b)

**Goal:** To work with the owners/operators of the private utility to ensure the Ellsworth Estates and the Sherman Belcher/Morse Lane water utilities serve their communities with the highest quality of water at the lowest reasonable cost.

2.10.3.14.1 Objectives

2.10.3.14.1.1 To consider initiatives to work with the owners and operator of these utilities to ensure continued delivery of an uninterrupted high quality water supply to the residents they serve.

2.10.3.14.1.2 To consider the implementation of a wellfield maintenance and monitoring strategy.
2.10.3.14.3 To consider initiatives to work with the owners and operators of the Ellsworth Estates water utility to develop a future development plan and management strategy.

2.10.3.14.4 To explore the potential of providing a central water service to private well users.

2.10.3.15 **Storm Water Management**

**Goal:** To manage surface drainage to prevent flooding and to promote groundwater recharge by:

- minimal alteration of natural and existing constructed drainage patterns in the process of community growth; and
- construction of integrated drainage patterns with new development

2.10.3.15.1 **Objectives**

2.10.3.15.1.1 To ensure development does not increase flood risk on sites and on adjacent and upstream or downstream lands.

2.10.3.15.1.2 To minimize disturbance of natural storm water systems, watercourses, wetlands and swales that impact the Centreville Growth Centre and the district.

2.10.3.15.1.3 To protect these natural storm water systems, watercourses, wetlands and swales by integrating them into trail, greenbelt, and recreational development.

2.10.3.15.1.4 To identify these natural storm water systems, watercourses,
wetlands, and swales on an overlay of the district.

2.10.3.15.1.5 To work with the community to promote understanding of the importance of natural and constructed drainage systems.

2.10.3.15.2 Policy

2.10.3.15.2.1 Council shall provide for the implementation of storm management objectives in accordance with Policy 2.9.2 of the Municipal Planning Strategy and the corresponding requirements of the Subdivision Bylaw, and the Land Use Bylaw.

2.10.3.15.2.2 It shall be the Policy of Council to designate specific natural water courses and portions of adjacent lands as Open Space where such systems serve as natural storm drainage and where disruption or alteration of the course could result in, or contribute to, increased flooding or erosion problems. The setback shall extend a minimum of 50 feet to either side of the watercourse as measured from the centre of the natural watercourse.

2.10.3.15.2.3 Council, in co-operation with the province, may establish an adequate annual maintenance program on constructed storm water systems.

2.10.3.15.2.4 The Municipality may incorporate site development plans when approving
2.10.3.16 **Tourism & Heritage**

Centreville, like its name, is centrally located to a number of tourism and heritage attractions, whether they be local to the community itself, to the Annapolis Valley, or to Nova Scotia. The residential Growth Centre designation and the community's vision of remaining a community based on country living nestled in a rich rural and mountainous seacoast hinterland with full access to quality urban services makes it an ideal stopping place from which visitors can enjoy the tourism and heritage within and surrounding the community.

**Goal:** Get the community on the map as a tourism and heritage destination.

2.10.3.16.1 **Objectives**

2.10.3.16.1.1 To promote the community through King's Community Economic Development Agency.

2.10.3.16.1.2 In cooperation with the province and the community, to plan for and develop the trail system within the Centreville Growth Centre and the district.

2.10.3.16.1.3 To erect signage within the Centreville Growth Centre and district to identify heritage and tourism sites.

2.10.3.16.1.4 To have appropriate signage within the community providing direction to tourism and recreational facilities.

2.10.3.16.1.5 To work with the community and the province to permit the installation of signage for development within the Centreville Growth Centre.
Centreville on Hwy 101, on appropriate 300 and 200 Series Highways and Sherman Belcher Road.

2.10.3.16.2 Policy

2.10.3.16.2.1 To create a unique sign bylaw in the Land Use Bylaw to allow for the identification, at one primary location in the Centreville community, to list and identify the tourism and recreational facilities available to a visitor.

2.10.4 Coldbrook Secondary Planning Strategy

Coldbrook has continued to grow both residentially and commercially. With that growth, there is an increased pressure on land and service infrastructure such as sanitary sewer and storm water, and notably traffic patterns and intensity. In 2000, the Nova Scotia Department of Transportation and Public Works implemented a number of physical changes to enhance traffic flow and safety along Highway 1 (and the 101 interchange) with longer term plans for additional improvements.

More recently, planning for industrial uses, particularly those associated with resource extraction and processing have risen from different parts of the community. Recent overlapping interests in ecology, watershed management, and recreation opportunities have cast the Cornwallis River and a local tributary, Spittal Brook, in a new and positive light.

2.10.4.1 Project Goal

Council’s goal is to implement a Secondary Planning Strategy for the Growth Centre of Coldbrook. The purpose of a Secondary Planning Strategy (SPS) is to address more specifically the planning needs of communities than is possible through the countywide Municipal Planning Strategy. As per the Terms of Reference, the process addressed the following planning issues:

- identify the extent of the existing Growth Centre sewer system and appropriate future servicing extensions
- identify the existing and potential future park and open space areas and pedestrian links
• identify other land use planning or design related issues that are unique to Coldbrook

• confirm, and where desirable, modify land use designations to optimize land use opportunities

• review current Growth Centre Boundaries

As well, the Secondary Planning Strategy working group took an opportunity to capitalize on and emphasize Growth Centre “uniqueness” in planning for future development.

The Coldbrook Secondary Planning Strategy provides Council with a blueprint in making land use decisions specific to Coldbrook, concerning housing, business, transportation, recreation and open space, municipal sewer servicing, resource extraction, existing agricultural operations and protection of the environment.

In early 2007, prior to the adoption of this Secondary Planning Strategy, Council adopted Municipal Planning Strategy amendments that permit multi-unit dwellings by development agreement only in the Growth Centre of Coldbrook. Section 2.4 Urban Residential Development specifies development agreement criteria for medium density residential development in the Growth Centre of Coldbrook.

2.10.4.2 Project Working Group

To complete the Coldbrook Secondary Planning Strategy, the Municipality facilitated the establishment of a committee that worked with Municipal Planning staff to produce a draft document. Initially, the committee was tasked with developing draft Secondary Planning Strategies for both Coldbrook and Centreville.

The committee met several times and discussed those issues that were common to both communities. Once those matters were resolved, the joint group formed two separate committees that more specifically represented each of the Growth Centres. The original intent of the project was to continue as a joint effort, but the members felt that there were too many dissimilar matters to be dealt with and each Growth Centre represents a ‘uniqueness’ within Kings
County that the group felt deserved the individual efforts of a community-specific Committee.

2.10.4.3 Public Participation

The group held meetings on a regular basis and all meetings were open to the public. The regular committee members attended most of the meetings, but there were meetings that were attended by members of the general public. The meetings were somewhat informal and those present were permitted to ask questions and were encouraged to provide input into the process.

Other means of consulting the public during this process included a detailed community questionnaire. The surveys were distributed by hand by volunteers (youth groups) and when completed, were picked up, dropped off at a specific community location or mailed back to the Municipality. The response rate of approximately 30% is considered a very high rate of return.

The community also held a daylong Open House event. The meeting date and time was advertised in the local paper, posted throughout the community, and communicated by word of mouth and over the phone. A letter with the meeting notice was sent to those landowners with the potential to be directly impacted by a proposed boundary or rezoning change. The purpose of the meeting was to solicit comments regarding the proposed changes. Approximately 60 people attended the Open House.

Further input was solicited by posting the draft SPS document and Staff analysis on the County website, requesting written submissions and, finally, though producing a questionnaire.

2.10.4.5 Vision for the Growth Centre of Coldbrook

- To retain the rural aspect of the area and to plan in such a way as to curtail certain aspects of development that would conflict with that goal.

- To keep Coldbrook’s uniqueness, with industry and residential combined, to limit too much growth of one or the other.

- To limit industrial activities in the midst of rural-like settings.

- To protect the quality and quantity of water.

- To limit major subdivision development until a central sewer system is established.

- To encourage development in the Coldbrook area in such a manner as to reduce traffic on Highway 1, laying out collective road systems to improve traffic circulation within and from residential subdivisions.

- To curtail aggregate extraction within Coldbrook.

2.10.4.6 Open Spaces / River Corridor / Recreation / Parks
(Reference Map 6a)

The Cornwallis River and a number of streams run through Coldbrook. It is essential that the quality of water, and quantity of water be protected.

Coldbrook is located close to other urbanized areas that have a variety of recreational services and amenities. Existing open spaces consist mainly of scattered neighbourhood parks and playgrounds, some less than an acre, while others are over five acres in area. There are several athletic fields adjacent to the Huntington Hayes Hall and a large private campground is located in the centre of the community.

Any future development of open spaces, trails, recreational areas and parks must meet the needs of the community, without duplicating nearby services. Coldbrook has a growing population base, however, there are financial limitations on the amount of recreational infrastructure that is possible.
Goals:  To protect all riparian areas.

To support efforts of environmental protection for the Cornwallis River and all tributaries.

To eliminate building on flood plains and areas of importance to the water system, including wetlands.

To encourage public awareness regarding the impacts of on-site septic systems on adjacent rivers, flood plains and water resources.

To protect all forms of recharge systems within Coldbrook.

2.10.4.6.1 Objectives

2.10.4.6.1.1 To re-evaluate the boundaries of areas identified as Environmental Open Space surrounding the river, brooks and tributaries.

2.10.4.6.1.2 To identify and map all flood plains.

2.10.4.6.1.3 To support efforts to raise public awareness of the Cornwallis River and adjacent wetlands and floodplains as a valued water resource.

2.10.4.6.1.4 To ensure adequate green space for the community at large.

2.10.4.6.2 Policy

2.10.4.6.2.1 Council shall designate natural watercourses and portions of adjacent lands as Natural Environment where such systems serve as natural storm drainage and where disruption or alteration of the
watercourse could result in, or contribute to, increased flooding or erosion problems. The setback shall extend a minimum of 50 feet to either side of the watercourse as measured from the tops of the banks of watercourses.

2.10.4.6.2.2 To work in cooperation with the Friends of the Cornwallis River or other similar groups to promote and foster environmental protection of the river system.

2.10.4.7 **Water Supply and Water Supply Management**

Private wells are the means that supply the drinking water for the Coldbrook area. The Town of Kentville has wells in an area next to Coldbrook, as such; their protection plans overlap into Coldbrook.

**Goals:** To protect the quality and quantity of potable water supplies to ensure a continuous supply of safe drinking water for the community of Coldbrook.

To assess and understand the groundwater sources or aquifer system to manage and plan for future potable water supplies for the community.

To identify all possible future sources of potable water for the business and private sectors of Coldbrook.

2.10.4.7.1 **Objectives**

2.10.4.7.1.1 To initiate and complete a hydrological assessment of the vital “well water” resources within Coldbrook.

2.10.4.7.1.2 To encourage and support inter-municipal and provincial
policies that will ensure good quality and an adequate future supply of potable water for both the business and private sectors.

2.10.4.7.1.3 To reduce the risk of contamination of the potable water supply from domestic sources, farming operations, and industrial and commercial businesses within Coldbrook.

2.10.4.7.1.4 To raise public awareness concerning risks to local water supplies.

2.10.4.7.1.5 To promote public awareness concerning the proper maintenance of private wells and on-site septic systems to protect potable water supplies.

2.10.4.7.2 Policy

2.10.4.7.2.1 Council may commission a hydrological study of the groundwater resources in Coldbrook, to determine quality, available volume and natural flows of the resource and to identify the area and rate of recharge.

2.10.4.7.2.2 Council shall strive to work with the community to:

cultivate a community water policy to reduce pollutants and waste;

increase public awareness of the extent, types, and cumulative effects of lawn and garden care practices upon the quality and quantity of water supplies;
encourage and support education programs aimed at reducing the risk of contamination to groundwater supplies as a result of farming or commercial operations;

develop water supply protection plans, including recharge and discharge areas within the watershed;

identify future sources of potable water.

2.10.4.7.2.3 Council shall support Wellfield Protection policies and regulations to restrict industrial and commercial uses that involve processing, storage, or handling of materials with the potential to threaten the quality or quantity of potable water supplies.

2.10.4.7.2.4 Council may require a water quality and quantity assessment to be submitted for any rezoning application to permit a higher density residential zone, a commercial zone or an industrial zone.

2.10.4.7.2.5 To work in conjunction with the Town of Kentville to ensure that those areas of Coldbrook already serviced by Municipal water will continue to receive adequate quantity and quality of water.
2.10.4.8 Aggregate

Coldbrook has significant resource extraction operations. The regulations governing aggregate fall under the Provincial Government's jurisdiction. The impact on surrounding land uses is important to the residents and businesses of Coldbrook.

Goals: To ensure sustainable development.

To reduce the potential damaging effects of aggregate extraction operations on the quality and quantity of community water supplies.

To work with the Province to establish a community working group to provide recommendations on the proposed activity prior to any Provincial approval of aggregate extraction. The working group may include a Municipal representative.

2.10.4.8.1 Objectives

2.10.4.8.1.1 To maintain a quality water supply, including all water resources.

2.10.4.8.1.2 To protect the surrounding ecosystem, including native flora and fauna, and carbon sinks.

2.10.4.8.1.3 To discourage the extraction of aggregate.

2.10.4.8.1.4 To work with the Nova Scotia Department of Environment and Labour to limit the extent of exposed mineral soils in resource extraction operations.

2.10.4.8.1.5 To commission a study to determine the impact of resource extraction on the surrounding area.
2.10.4.8.1.6  To work with the provincial government to ensure that precautionary principles are met as set out in the Provincial Environment Act and Regulations.

2.10.4.8.2  Policy

2.10.4.8.2.1  To require that applicants of rezoning requests to the M7 Zone to permit new aggregate operations submit a study detailing the expected impacts on local traffic, water quality and quantity, and the surrounding land uses.

2.10.4.9  Agriculture

The Coldbrook area is rich in farming heritage, starting with the arrival of the pioneers in 1770’s. Agriculture as well as gristmills, sawmills and carding mills provided a living for the families. The character of the community has been shaped by these beautiful farms, some of which are still productive within and on the fringe of the designated Growth Centre. The rural nature of the area has attracted a number of residents in recent years, causing Coldbrook to be one of the fastest growing areas in the Valley. The local residents appreciate the existing farms as they are permitted to use the private land for hiking and biking.

It is essential that the rural flavour that is part of the heritage of the community be preserved, to protect the existing agriculture as already mandated by the County; and to strive for harmony where residential and agriculture uses co-exist.

Goal: To maintain as much as possible the rural character of the Coldbrook community in the manner and amount that it is developed, to preserve the peace and quiet that residents have sought by moving to this area.
2.10.4.9.1 Objectives

2.10.4.9.1.1 To accept a level of conflict between residential uses and normal farming practices.

2.10.4.9.1.2 To incorporate agriculture as an integral part of the community, as food provider, source of employment, or the possible sanctioned use of some properties for hiking and certain sports disciplines.

2.10.4.9.1.3 To prevent Growth Centre expansion into currently zoned agricultural land.

2.10.4.9.2 Policies

2.10.4.9.2.1 To protect existing agricultural operations and lands by continuing to list “Existing Farms” as permitted uses in the R1, R2 and R3 Zones.

2.10.4.10 Transportation (Reference Map 6c)

The Secondary Planning Strategy Committee, in consultation with the community, identified a number of transportation issues that need to be resolved to improve traffic circulation within Coldbrook.

Goals: To identify all transportation issues that affect the vehicular and pedestrian traffic in the community.

To promote the development of a comprehensive and cost efficient network of roads and walkways for the community.

2.10.4.10.1 Objectives

2.10.4.10.1.1 Council may commission a transportation study to identify
issues related to vehicular and pedestrian circulation in Coldbrook. The study shall also include recommendations regarding the following and any additional issues identified by the study:

to have the maximum speed limit on all roads within the Growth Centre, including Highway #1, not to exceed 60 km/hr;

to have traffic signals installed at the intersection of South Bishop and Highway #1;

to encourage improvements such as reducing the number of entrances and exits to Scotian Gold and Foodland Mall, to reduce the risk of traffic accidents;

to provide sidewalks on Highway #1 from Harrington Road to Foodland Mall;

to identify opportunities for future collector roads and their general alignment within Coldbrook;

to have English Mountain Road, South Bishop Road and Lovett Road upgraded to handle the large volume of traffic;

to have crosswalks installed at all major intersections and areas with high pedestrian traffic;
to encourage active living by keeping the Coldbrook Trail corridor from the Kentville Town boundary to the Cambridge boundary for non-motorized use only.

2.10.4.10.1.2 Council shall strive to cooperate with the provincial traffic authority, various Coldbrook community groups and the development sector in designing a safe and efficient automobile and pedestrian network within Coldbrook.

2.10.4.10.2 Policies

2.10.4.10.2.1 Council may require a traffic impact study for rezoning applications to permit a higher density residential zone, a commercial zone or industrial zone; to determine the potential impacts on existing road networks and surrounding land uses.

2.10.4.10.2.2 Council may commission a transportation study to address the following in Coldbrook:

- identification of automobile and pedestrian circulation issues from a safety and efficiency perspective;
- identification of pedestrian corridors;
- the realignment of streets;
- the location of future sidewalks and streets;
- transportation constraints to future development;
any other traffic issue Council and the community wish to include.

2.10.4.11 Sewer (Reference Map 6b)

Goal: To provide the highest reasonable level of environmentally sustainable sewage treatment to the Coldbrook Growth Centre.

2.10.4.11.1 Objectives

2.10.4.11.1.1 To ensure that public and private investment in expanding treatment capacity and the extension and upgrading of trunk lines is achieved with the greatest efficiency and benefit to the overall community.

2.10.4.11.1.2 To work with developers with the intention of ensuring that new development is subject to connection to central sewer service.

2.10.4.11.1.3 To ensure that connections to central trunk lines are achieved in a manner most efficient to service subsequent development.

2.10.4.11.1.4 To ensure that all existing or new pumping stations are located and/or constructed in such a manner that, in the event of overflow, raw sewage will not enter streams or waterways.

2.10.4.11.1.5 To develop a public education program in conjunction with the Coldbrook Community Association regarding proper on-site septic disposal system
installation and maintenance to help prevent possible contamination to groundwater.

2.10.4.11.1.6 To ensure that new areas incorporated into the Coldbrook Growth Centre boundary receive sewer services in a timely manner.

2.10.4.11.1.7 To withhold development and building permit approvals for new development serviced by on-site septic disposal.

2.10.4.11.1.8 To protect the underlying aquifer, the Municipality, in cooperation with the Department of Environment and residents, is encouraged to assess the need for central sewer systems within unserviced areas.

2.10.4.11.2 Policies

2.10.4.11.2.1 It shall be the policy of Council not to permit any new development serviced by septic tank or disposal field. Those that meet the provisions of Policy 2.9.2.9 of the Municipal Planning Strategy shall be exempt of this requirement.

2.10.4.11.2.2 To extend sewer services to those areas that identify the need for such services and to ensure that it is user pay in conjunction with the Municipality.
2.10.4.12 Storm Water Management

Goal: To manage surface drainage to prevent flooding and to promote groundwater recharge by:

- minimal alteration of natural and existing constructed drainage patterns in the process of community growth; and
- construction of integrated drainage patterns with new development.

2.10.4.12.1 Objectives

2.10.4.12.1.1 To ensure development does not increase flood risk on sites and on adjacent properties and upstream or downstream lands.

2.10.4.12.1.2 To minimize disturbance of natural drainage systems within Coldbrook, including, wetlands, watercourses and swales.

2.10.4.12.1.3 To protect natural storm water drainage systems and environmentally sensitive areas from risk of pollution by integrating them into trails, greenbelts and other recreational areas.

2.10.4.12.1.4 To identify the natural storm water drainage systems, wetlands, watercourses and swales on an overlay of the district.

2.10.4.12.1.5 To work with the community to promote understanding of the importance of natural and constructed drainage systems.

2.10.4.12.1.6 To consider a no net loss wetlands policy.
2.10.4.12.2 Policies

2.10.4.12.2.1 To provide for the implementation of storm management objectives in accordance with Policy 2.9.2 of the Municipal Planning Strategy and the corresponding requirements of the Subdivision Bylaw, and the Land Use Bylaw.

2.10.4.12.2.2 To designate specific natural water courses and portions of adjacent lands as Natural Environment where such systems serve as natural storm drainage and where disruption or alteration of the course could result in, or contribute to, increased flooding or erosion problems. The setback shall extend a minimum of 50 feet to either side of the watercourse as measured from the top of the banks of the watercourses.

2.10.4.12.2.3 Council, in co-operation with the Province, may establish an adequate annual maintenance program on constructed storm water systems.

2.10.4.12.2.4 Council may require developers to submit a comprehensive storm water plan before permits are issued for medium-density residential, commercial or industrial developments in areas with steep slopes, wet soils or in close proximity to the Environmental Open Space (O1) Zone.
2.10.4.13 Growth Centre Boundary

Council reviewed the Coldbrook Growth Centre boundary during the consideration of this secondary plan and decided against expansion at the time. Council intends to review the boundary again within a reasonable time period.

2.10.4.13.1 Policy

2.10.4.13.1.1 Council intends to review the Growth Centre boundary, and in particular the possible inclusion of adjacent Country Residential (R6) Zoned lands, within fifteen (15) years of the adoption of the Coldbrook Secondary Planning Strategy.
2.11 FUTURE GROWTH CENTRE EXPANSION AND NEW GROWTH CENTRES

Directing growth into designated Growth Centres will eventually lead to the need for future urban expansion, either through development boundary extension or the creation of new Growth Centres. To ensure the efficient and economical provision of municipal services Council must plan in advance for urban growth. Considering options for future expansion, general growth directions, and the timing of infrastructure extensions is necessary to ensure that the required municipal services and infrastructure will not become a financial burden on the Municipality and its citizens.

2.11.1 Growth Centre Expansion and New Growth Centre Designation Objectives

2.11.1.1 To establish criteria for evaluating potential new urban areas and directions for future urban expansion.

2.11.1.2 To indicate preferred expansion directions or new areas to be considered for future urban designation.

2.11.2 Urban Expansion Policies

2.11.2.1 Council shall take into account the following factors, in addition to those contained in the Rural part of this Strategy, when considering the expansion of Growth Centre boundaries or the designation of new Growth Centres:

a. the impact of urban expansion on resource development

b. urban planning goals and objectives expressed in this Strategy

c. financial impact on the Municipality and Villages for delivery of urban services

d. servicing feasibility and practicality

e. projected growth and development demand

f. the existing community development pattern

g. the street pattern, function and required extensions and improvements

h. land use compatibility

i. commercial and community facilities
2.11.2.2 **Agricultural Impact Assessment**

2.11.2.2.1 Council shall require an Agricultural Impact Assessment when considering the expansion of a Growth Centre boundary into the Agricultural District, under any of the following circumstances:

a. when more than 20 acres of land zoned A1 is proposed to be taken out of the Agricultural District

b. upon request from the Kings County Federation of Agriculture or the Nova Scotia Department of Agriculture

2.11.2.2.2 The Agricultural Impact Assessment shall address the following issues:

a. impact of the loss of the agricultural lands on the farming industry in Kings County

b. economic impact of the loss of agricultural land to the Kings County economy

c. the quantity and quality of soil lost from agriculture

d. possible impacts on adjacent farms

e. cultural and tourism impacts

2.11.2.2.3 The Agricultural Impact Assessment shall be completed by a qualified professional, such as a Planner, an Agrologist or an Agricultural Economist, who has a background in agricultural assessments. The costs of the Agricultural Impact Assessment shall be borne by the applicant. Municipal staff may seek outside confirmation or advice on the report to ensure quality and accuracy.
2.11.3 Coldbrook-Wolfville Urban Corridor Expansion

The Coldbrook-Wolfville Urban Corridor with a population of nearly 20,000 will create the greatest demand for continued growth and development. This urban conglomeration is projected to attract up to 70% of all future urban housing within the County. In planning for future corridor expansion, Council must consider its objective of minimizing the encroachment of urban development into prime agricultural land. This goal, therefore limits opportunity for major expansion north and east of the corridor as this would impinge into Agricultural Districts. While some future development boundary adjustments north and east may be considered, the main option for urban expansion in future may be to the south into the Country Residential and Forestry District. This would be in keeping with Council's commitment to the preservation of the agricultural land resources.

The areas south of Kentville and New Minas are designated Country Residential and Forestry respectively. A redesignation for urban development would require an amendment to this Strategy. Given the potential extent of urban expansion, an assessment of the potential impact and implications for the Municipality of either area being designated major urban growth should be undertaken. Prior to considering an amendment to this Strategy to allow expansion, this assessment should be completed to Council's satisfaction. In 1999, Council chose to recognize the established residential development in the immediate vicinity of Forsythe Road and Pine Street as a rural residential enclave. Rather than subjecting this neighbourhood to more intensive development, possible through urban development context and the associated infrastructure and development standards, it should be left as a rural residential option, with an appropriate planning designation on the Rural Future Land Use Map and Zoned accordingly.

2.11.4 Coldbrook-Wolfville Urban Corridor Expansion Policies

2.11.4.1 Council may consider the areas south of Kentville between the Town boundary and Highway # 101 and south of New Minas between Highway # 101 and the White Rock Road east of the Highbury School Road for future urban expansion of the Coldbrook-Wolfville Urban Corridor.

2.11.4.2 Prior to considering an amendment to provide for urban growth and development of either area described in Policy 2.11.4.1, Council shall require the preparation of planning, engineering and marketing studies as necessary to adequately address the urban expansion considerations stated in Policy 2.11.2.1 to its satisfaction.
2.11.5 Forsythe Road and Pine Street Area

2.11.5.1 Council intends to designate an area on the Future Land Use Map in the vicinity of Forsythe Road and Pine Street as a Country Residential District.

2.11.5.2 Council shall zone the lands referred to in Policy 2.11.5.1 as Country Residential District.

2.11.5.3 Development in this Country Residential District shall be in accordance with the policies of this Strategy contained in Section 3.4 of this Strategy Country Residential Districts.

2.11.6 General Growth Centre Expansion

At current development rates the Growth Centres have a sufficient supply of land to accommodate future growth needs for at least twenty years. (Refer to Part 7 Growth Centres Growth Performance Charts). The question of land availability, however, is most critical in Canning, Port Williams and Coldbrook where successful commercial farms occupy much of the internal serviceable land base. This factor may require Council to consider alternative growth expansion directions or strategies for inducing the conversion to urban development of farmland within the Growth Centres.

2.11.7 General Growth Centre Expansion Policy

2.11.7.1 Council shall consider the future expansion of Growth Centre development boundaries subject to Policy 2.11.2.1 and the availability of Growth Centre farmland for conversion to urban development.

2.11.8 New Growth Centres

Some rural residential areas and Hamlets located between or immediately adjacent to urban areas lie in the path of inevitable urban expansion. Where circumstances warrant, a new Growth Centre may be designated. Council will determine the timing of the designation and decide whether to expand an existing Growth Centre, or establish a new one.

In some Hamlets, public health may be threatened and may necessitate the provision of municipal central services. Depending on the implications on the agricultural resource base, the situation may present another opportunity for higher density urban development.

To date, Council has identified and acknowledged one Hamlet community with the above characteristics. In 1981, sewer services were extended to the
Hamlet of Greenwich. Council expected that pressure for residential development and a higher level of urban services would make Greenwich a reasonable candidate for Growth Centre status in future.

2.11.9 New Growth Centres Policies

2.11.9.1 Council may amend this Strategy to include serviced Hamlets or parts thereof as extensions to existing Growth Centres or as new Growth Centres.

2.11.9.2 Council may recognize Greenwich as a serviced Hamlet which will continue to have an intermixture of agricultural, residential and related uses.

2.11.9.3 Council may redesignate a serviced hamlet to a Growth Centre when there is an increased demand for urban development within the Community combined with the phasing out of agricultural activity.

2.11.9.4 Policies of Section 6.1 Hamlet shall apply to any serviced hamlet unless otherwise stated in this Strategy.

2.12 WATER RESOURCE PROTECTION AND MANAGEMENT

Nearly every household, school, daycare centre; every health care facility, home for special care, government office and business –especially the agriculture and food processing industry in Kings County– depends on groundwater as the primary source of water. Council recognizes that a safe and reliable water supply is not just important, but essential to public health and community stability. As the foundation of a viable social and economic base, the quality and abundance of water is the definitive indicator of sustainable development. Without an adequate supply today, and some measure of assurance for the future, all other development objectives become secondary.

The emergence of water resource interest groups such as the Friends of the Cornwallis River Society, and the Valley Horticultural Society -Water User group in the early and mid 1990’s and the subsequent formation of an umbrella organization, the Valley Watershed Stewardship Association in 2001, attest to the increasingly widespread public concern for the future of an essentially unmanaged water supply.

Through this section of the Municipal Planning Strategy, Council has opted to protect this vital resource, and by implication, the public investment in central water supply and distribution services. Council accepts that success will rely on a combined philosophy of education to promote citizen awareness (both private and corporate) of water supply issues, public acquisition of critical lands, land use bylaw regulations, and ministerial orders to protect well fields and recharge areas. However, because there is no single public entity to manage groundwater supplies and distribution, County Council must develop a planning approach that can be applied to an array of existing water supply and delivery systems, each with its own technical and administrative idiosyncrasies. Moreover, Council wishes to continue to encourage the Province in implementing a Nova Scotia Water Resource Management Strategy.

In general, water delivery systems fall into two categories: individual private wells (common to all forms of housing, public schools, health care facilities, businesses, agriculture, and other industries) and public well water systems. Almost half of all Kings County residents (including those in towns and villages) obtain water from private wells. The other half receives water from various independent central systems. County Council owns and operates the Greenwood Water Utility and another smaller system in Aylesford. The Village Commissions of Canning, Port Williams and New Minas respectively operate water utilities in those centres. The Town of Kentville (Stead Water Commission) serves that Town and adjoining County areas of North Kentville and a very limited area at the east end of Coldbrook. The Towns of Wolfville and Hantsport also operate groundwater-sourced utilities for their citizens. A limited number of water users share communal water systems.

In terms of water quality, the Province sets rigorous standards for monitoring and treatment of public water utilities. Owners of private wells are not subject to public regulation, and the onus is on those individuals to regularly submit samples for testing- for which bacteriological testing services are available through local
hospitals laboratories. Again, however, any treatment for Coliform bacteria (and other parameters which affect quality) is the responsibility of the property owner.

In addition to water quality and public health factors, hydrologic characteristics of aquifers are dynamic and changing from year to year and even season to season. Obviously, groundwater does not conform to planning or other legal boundaries. Nor does the process of groundwater recharge necessarily keep up with community growth and corresponding increases in water consumption by various—and often competing—users. Consequently, it is Council’s intention that land use policies compel the Municipality to use discretion in considering expansion of growth centre boundaries, and changes in zoning on sites, which could expose the groundwater supply to an increased risk of contamination or over-consumption. Likewise, Council intends to consider risks to groundwater contamination, when considering development proposals in proximity to groundwater supply areas. Where groundwater protection areas overlap municipal boundaries, County Council has endorsed the Town of Kentville’s water supply protection initiatives and looks forward to cooperating with other Town’s and neighbouring rural municipalities engaging in similar programs.

2.12.1 Goals For Managing Groundwater Supplies

- ensure an adequate supply of water for current and future community demand where central services are provided;

- protect the integrity of community well water supplies where groundwater is the primary source of community water;

- foster groundwater protection and water conservation practices among county residents, institutions and businesses dependent on public and private wells.

2.12.2 Objectives for Achieving Groundwater Supply Goals

- undertake aquifer assessment and wellhead protection studies, and implement recommendations through this Strategy, Secondary Planning Strategies, the Land Use Bylaw, other community planning documents, and programs;

- institute policies and regulations to implement wellfield protection methods;

- implement community awareness programs relating to both private well and community well water supplies;

- promote responsible groundwater management and conservation practices;
• act in partnership with other government agencies, and municipalities, village commissions, institutions, interest groups and industry to achieve sustainable use of groundwater resources;

• identify alternative water supply sources.

2.12.3 General Groundwater Supply and Management Policies

2.12.3.1 In addition to making general statements of intent respecting groundwater resources within the Municipality, Council shall undertake additional amendments to this Strategy, as necessary, to institute wellfield protection measures for specific groundwater supply areas within the Municipality.

2.12.3.2 Pursuant to policy 2.12.3.1 above, Council shall implement wellfield protection regulations through the General Provisions section of the Land Use Bylaw. Such Regulations in the Bylaw(s) will apply to all zones, and where more restrictive, shall override other zone regulations.

2.12.3.3 Council shall identify well protection areas on maps appended to the Land Use Bylaw. These maps shall officially recognize the existence of central water supply Wellheads, Wellfields, Well Capture and Recharge areas, or other relevant classifications as identified in either the New Minas Sector Plan, a Secondary Planning Strategy, or referenced in technical studies and documents prepared for public (Municipal or Village) and private water utilities in Kings County.

2.12.3.4 Council shall, in considering proposals to amend the Municipal Planning Strategy to accommodate a change in Growth Centre or Rural District boundary within a water supply protection or water resource management area, as identified on a relevant Land Use Bylaw map schedule, have regard to the following matters:

a. an assessment (submitted in a written report) by a qualified hydrogeologist or hydrogeological engineer, of the current yield of existing wells or wellfield, and ensure that development potential is contained within the sustainable operating capacity of the water supply system
b. an assessment (submitted in a written report) by a qualified hydrogeologist or hydrogeological engineer, of the risk of contamination of the groundwater supply or over-consumption inherent in changing from one land use designation to another; and

c. the policies of this Strategy including those for amending the Land Use Bylaw as contained in Part 6 of this Strategy; and

d. any relevant policies of the New Minas Sector Plan, or inter-municipal planning document(s)

2.12.4 Companion Policies: Groundwater Supply and Management, Canning Water Supply

The Canning Village Commission operates and manages a central water supply system which provides water to approximately 400 residences and business within the Village. The water supply is supported by three production wells and includes a 350,000 gallon (1.575 million litre) reservoir which sustain an average consumption demand of approximately 90,000 gallons (405,000 litres) per day.

In 2002 the Village commissioned the firms of Hiltz and Seamone Co. Ltd., Consulting Engineers and W.G. Shaw & Associates Ltd., Consulting Geoscientists to prepare a water resources management plan to assess the technical characteristics of the water supply, delineate the wellfield area which it utilizes and to provide directions for the protection and management of the wellfield area. This work supplemented and updated a number of technical analyses which have been undertaken over time with respect to the drilling and testing of the Village's wells.

The October 2002 Hiltz and Seamone and W. G. Shaw Water Resource Management Plan for the Village of Canning delineated a wellfield area which included wellhead, wellfield and wellfield recharge protection areas, confirmed that the Village's long-term demands were sustainable relative to the yield of the wellfield area and outlined a variety of land use control recommendations aimed at protecting the quality of the groundwater resource.

A planning exercise, specifically focused on land use and development issues concerning water quality protection, was undertaken to further refine the recommendations from the Management Plan and to transfer these recommendations into the municipal planning context.
The pattern and form of existing development within Canning presents some unique challenges with respect to protection of the water supply. A variety of existing commercial activities located on Main Street, which might be considered as high risk, are in very close proximity to the most productive well in the wellfield area - "Canning #3". Virtually all of the commercial development within the Village falls within the broader wellfield "influence" area.

It has also been noted that the Village boundary and the Municipal Planning Strategy's Growth Centre boundary are not contiguous and that the Strategy has allowed for agricultural designations and zoning within the Village limits. It is significant to note that a large portion of lands, located east of North Avenue, are zoned Agriculture A1, are actively farmed and are within the wellfield influence area. In the absence of appropriate management practices certain agricultural activities can present significant risks to groundwater quality.

In keeping with the interest in the provision of safe water, which is shared by the Canning Village Commission and Municipal Council, the purpose of this section is to provide for policies and land use regulation which are consistent with management recommendations contained in the Hiltz and Seamone Co. Ltd. and W. G. Shaw and Associates Ltd. Water Resource Management Plan for the Village of Canning.

The basic approach adopted through the following policies, as recommended in the Hiltz and Seamone/W.G. Shaw Associates Water Resource Management Plan for the Village of Canning, is to encourage land use and management practices which minimize potential risks of groundwater contamination from existing development and to prevent the potential for future contamination from specific types of new development.

Balancing the needs for groundwater protection, new growth and development of the Village and recognition of the investment made by existing property owners in existing development is extremely important to the overall success of the land use control measures. This Strategy clearly acknowledges the rights of existing development and land use activities currently within the wellfield influence area to continue to operate in their current form and scope of activity, even though some of the existing activities might otherwise not be permitted in light of the community's interest in protection of the groundwater.

Provision has been made to allow existing development within the wellfield area which, due to the potential contamination risk which it may pose, would otherwise not be allowed to be considered for expansion or redevelopment by means of a Development Agreement. Such
development will be evaluated in light of the actual risk a specific use and/or development proposal may present to groundwater contamination, the provisions which may be identified to mitigate against groundwater contamination and the general provisions for development agreements contained in this Strategy.

2.12.4.1 Further to and in support of policies contained in subsection 2.12.3 of this Strategy, Council accepts the technical recommendations for wellfield area protection contained in the Water Resource Management Plan for the Village of Canning (Hiltz and Seamone Co., Ltd., Consulting Engineers and W. G. Shaw and Associates Ltd., Consulting Geoscientists, October 18, 2002).

2.12.4.2 Council shall, in keeping with Policy 2.12.4.1 implement protective measures in the General Provisions section of the Land Use Bylaw, pursuant to the Municipal Government Act.

2.12.4.3 In addition to provisions contained in this section Council intends to work with the Canning Village Commission to explore mechanisms and administrative and management undertakings which support the protection of groundwater within the wellfield area but which are beyond the scope and authority of municipal planning legislation. These efforts may include but not be limited to public awareness and education programs, water conservation and consumption management and contingency planning for supply and distribution management. Specific administrative and management measures may also include restrictions on the application of road salt (and other de-icing products), the use and application of pesticides, herbicides and fertilizers, agricultural production and waste management, private well drilling and groundwater production, aggregate extraction and forestry development.

2.12.4.4 Council shall institute in the General Provisions section of the land Use Bylaw three categories of "zones" for groundwater supply protection as recommended in the Water Resource Management Plan for the Village of Canning which it shall identify on a Groundwater Resource Management Plan map(s) appended to the Land Use Bylaw. Such provisions shall include the following special zones and provisions:
Wellhead Protection Zone (Zone A)

The Wellhead Protection Zone consists of the immediate vicinity of all water production wells within the wellfield area and shall include all lands within a 250-foot (76.2 metre) radius of the wellhead. Development within this zone shall be restricted to single detached residential dwellings and uses which are directly related to the operation of the well and water transmission system.

Wellfield Protection Zone (Zone B)

The Wellfield Protection Zone consists of lands which provide the primary source of groundwater which supports and recharges the lands within the immediate vicinity of the production wells. This area is delineated by the length of time estimated for groundwater, and by association any contaminates, to travel through geological structures to the wellhead. A transmissivity rating of between 3 months and 1 year, as identified in the Water Resource Management Plan for the Village of Canning, has been utilized to define the physical limits of this zone. Within the Wellfield Protection Zone certain land uses, which by their nature present a significant risk to the groundwater will be prohibited including:

- Automotive and Auto Body Repair Shops
- Bulk Storage of Salt
- Commercial Livestock Operations
- Laundry and Dry Cleaning Establishments
- Manure Storage Facility
- Scrap Metal and Salvage Storage and/or Processing
- Service Stations
- Sewage Treatment or Sewage Disposal Facilities or Systems
- Storage and/or Distribution of Fertilizer, Pesticides, Herbicides, Chlorinated Organic Compounds or Solvents and any Other Toxic Materials
- Storage and/or Distribution of Petroleum Fuels or Solvents
- Uses Permitted Within the Agricultural Industrial (M3) Zone
- Uses Permitted Within the Heavy Industrial (M2) Zone
- Uses Permitted Within the Light Industrial (M1) Zone, Exception Fire Stations, Indoor Recreation Uses,
Existing Residential Uses and Domestic and Craft Related Rural Home Occupations

**Wellfield Recharge Zone (Zone C)**

The Wellfield Recharge Zone contains lands which provide and support the long-term recharge to the wellfield protection and wellhead areas. The limits of this zone, as identified in the Water Resource Management Plan for the Village of Canning, are delineated by a 1-year to 25 year transmissivity rating. Similar to the Wellfield Protection Zone, certain land uses, which by their nature present a significant risk to the groundwater, will be prohibited including:

- Automotive and Auto Body Repair Shops
- Bulk Storage of Petroleum Fuels in Excess of 10,000 Gallons (45,000 Litres)
- Bulk Storage of Petroleum Solvents in Excess of 200 Gallons (900 Litres)
- Bulk Storage of Salt in Excess of 100 Tonnes
- Commercial Livestock Operations
- Laundry and Dry Cleaning Establishments
- Manure Storage Facility
- Scrap Metal and Salvage Storage and/or Processing
- Service Stations
- Sewage Treatment or Sewage Disposal Facilities or Systems, Excluding Domestic Systems
- Storage of Chlorinated Organic Compounds in Excess of 200 Gallons (900 Litres)
- Storage of Pesticides and Herbicides in Excess of 200 Gallons (900 Litres)
- Uses Permitted Within the Agricultural Industrial (M3) Zone
- Uses Permitted Within the Heavy Industrial (M2) Zone
- Uses Permitted Within the Light Industrial Commercial (M1) Zone, Excepting Arenas, Fire Stations, Indoor Recreation Uses, Kennels, Outdoor Commercial Display, Existing Residential Uses and Domestic and Craft Related Rural Home Occupations

2.12.4.5 Council shall establish a hierarchy of land use restrictions in the General Provisions section of the Land Use Bylaw which shall correspond to the use provisions outlined for the three protection zones. Restrictions in the Land Use Bylaw
identified in Policy 2.12.4.4 will take effect in all land use zones, and where 'more stringent, these standards shall supersede or override the provisions of any zone or other General Provisions.

2.12.4.6 Existing uses within the Wellhead Protection (Zone A), Wellfield Protection (Zone B) and Wellfield Recharge (Zone C) which pursuant to Policy 2.12.4.4 have otherwise been identified as being prohibited shall be permitted to continue to operate in their current form and scope as provided for by the Land Use Bylaw and may be considered for expansion or redevelopment only by Development Agreement. In addition to provisions contained in Part 2.7, Urban Non-conforming Uses, Council in considering an application for approval of a Development Agreement shall ensure that the proposal does not increase the potential for contamination of groundwater.

2.12.4.7 Notwithstanding any other provisions contained in this Strategy, Council shall not consider applications to rezone to Light Industrial (M1 Zone), Heavy Industrial (M2 Zone) or Agricultural Industrial (M3 Zone) within the Water Supply Protection Area for the Village of Canning as delineated on the Canning Urban Zoning and Wellfield Protection Zones Map, Schedule 3g, of the Land Use Bylaw.

2.12.5 Companion Policies: Groundwater Supply and Management, Port Williams Water Supply

The Village of Port Williams is fortunate to have access to an abundant supply of groundwater which generally meets or exceeds drinking water quality guidelines. While a number of residential and commercial properties rely on private wells a majority of the residents of the community are provided drinking water by the Village’s Water Commission.

As part of the process of renewing current withdrawal approvals, and in response to changing Nova Scotia Environment’s regulatory requirements for public water supply operations coming forward from the Province of Nova Scotia’s 2002 Drinking Water Strategy, the Port Williams Water Commission has undertaken an assessment of both the water supply system and the wellfield area from which the Village’s water is withdrawn. Hiltz and Seamone Co. Ltd., consulting engineers together with W.G. Shaw and Associates Ltd., consulting geoscientists, have

The Village of Port Williams Water Supply Management Plan provides an assessment of the technical characteristics of the water supply, describes the local geology and hydrologic characteristics, utilizes computer modeling to delineate the area which supports the Village’s production wells and provides directions and recommendations for the protection and management of the wellfield area. The Hiltz and Seamone plan provides all the primary engineering assessment and recommendations upon which the following planning and land use control measures have been based.

The Village of Port Williams Water Supply Management Plan identifies and delineates a wellfield area which will provide a sustainable yield of high quality ground water necessary to support the growth and development of the community. Efforts have also been made, in the context of technical evaluations, to identify an area suitable for future production well development. The goals and purpose of both the Hiltz and Seamone technical assessment and these planning and land use control provisions is to promote an operational, management and land use control regime aimed at protecting the long term quality of ground water within the wellfield area.

The primary recommendations contained in the Village of Port Williams Water Supply Management Plan relate to identification of a number of “zones” within the wellfield which correspond to specific ranges of sensitivity to and risk of contamination, as well as the identification of a range of land use activities which due to their nature pose a risk of contamination within the wellfield area.

In reviewing the technical assessment of the wellfield area and undertaking a planning process to support and compliment the assessment, a number of general land use issues were identified. Commercial agriculture is an important component of both the economic and cultural fabric of the Port Williams community. An awareness does exist however that some agricultural land use practices do present challenges with respect to groundwater quality, in particular those relating to the use of pesticides and fertilizers.

The recent introduction of Environmental Farm Plans provides an opportunity for the operator to minimize potential negative impacts and risks of agricultural operations on groundwater within the wellfield area. The development and implementation of Environmental Farm Plans for agricultural operations within the wellfield area should take a very high priority for the operator and within the agricultural community.
The community is interested in a planning and land use control regime which balances the need to promote and manage growth and development, ensure the enhancement of the Village’s unique character and protect the quality of the natural environment.

It has also been identified that, except perhaps where significant risk to ground water contamination can be shown to be present, existing development within the larger wellfield area is accepted by the community and should be allowed to continue and expand provided measures are put in place so as to not increase any undue risk of groundwater contamination.

A majority of the Port Williams wellfield area is located outside of the Village’s Growth Centre boundary and is designated as Agriculture on the Municipal Planning Strategy’s Future Land Use Map. The southern portion of the wellfield area, in the vicinity of well Number 5, as well as an area identified for future well development, is located within the Growth Centre boundary. This area is subject to two different Future Land Use designations, Residential and Industrial, and contains a variety of low and medium density residential development.

The Village’s industrial park and a number of long standing industrial activities are located within the wellfield area. While industrial development should generally not be encouraged to locate within a water supply area the Strategy must recognize the existing situation and identify means to minimize risks associated with this type of activity. The primary concern with respect to future industrial development relates to “Heavy Industrial” uses and therefore rezoning of any lands within the wellfield area for Heavy Industrial (M2) use will not be permitted.

A majority of the wellfield area is designated and zoned for agricultural use. This designation is based on soils capability mapping and a fundamental policy focus within the Municipal Planning Strategy directed at protection of agricultural lands. The Strategy contains a number of provisions regulating certain aspects of commercial agricultural operations such as feedlots and livestock operations which, in addition to having potential negative impacts on adjacent land use, could pose a risk to groundwater resources. The Strategy’s provisions regulating agricultural development are, for the most part, consistent with measures aimed at protection of groundwater. Provisions allowing for the rezoning to Agricultural Industrial (M3) uses are however felt to be inconsistent with protection of the wellfield area and therefore such rezoning not be permitted within the wellfield area.

The Municipal Land Use Bylaw provides a direct means by which future development can be regulated to ensure that potential negative impacts
and risks to groundwater quality arising from certain types of activities are minimized. Certain operational and management issues are however beyond the scope of matters which a Land Use Bylaw may address. Therefore environmentally responsible operations and management practices have been recognized as a critical component to ensuring that all activities within the wellfield area minimize the risk of contamination and degradation of the groundwater resource. Public awareness and education, public ownership of critical areas within the wellfield, conservation measures and cooperation with residents, interest groups, industry and all levels of government are critical to the success of wellfield protection efforts.

2.12.5.1 Further to and in support of policies contained in subsection 2.12.3 of this Strategy, Council accepts the technical recommendations for wellfield area protection contained in the Village of Port Williams Water Resource Management Plan (Hiltz and Seamone Co. Ltd., Consulting Engineers and W. G. Shaw and Associates Ltd., Consulting Geoscientists, February 2003).

2.12.5.2 Council shall, in keeping with Policy 2.12.5.1 implement protective measures in the General Provisions section of the Land Use Bylaw, pursuant to the Municipal Government Act for the purposes of promoting protection of groundwater within the Port Williams Wellfield Area.

2.12.5.3 In addition to provisions contained in this section Council intends to work with the Port Williams Village Commission to explore legal mechanisms and administrative and management undertakings which support the protection of the groundwater within the wellfield area but which are beyond the scope and authority of municipal planning legislation. These efforts may include but not be limited to public awareness and education programs, water conservation and consumption management and contingency planning for supply and distribution management. Specific administrative and management measures may also include restrictions on the application of road salt (and other de-icing products), the use and application of pesticides, herbicides and fertilizers, agricultural production and waste management, private well drilling and groundwater production, aggregate extraction and forestry development.

2.12.5.4 Council shall institute in the General Provisions section of the Land Use Bylaw four categories of “zones” for
groundwater supply protection as recommended in the Village of Port Williams Water Resource Management Plan which it shall identify on the Port Williams Growth Centre Urban Zoning Map appended to the Land Use Bylaw. The Bylaw shall include the following special zones and provisions:

**Wellhead Protection Zone (Zone A)**

The Wellhead Protection Zone consists of the immediate vicinity of all water production wells within the wellfield area and shall include all lands within an approximate 76 meter (250 foot) radius of the wellhead. The Future Wellhead Zone has been applied to lands which, due to their hydrogeologic characteristics, have been identified as being suitable for future production wells. Development within this zone shall be restricted to single detached residential dwellings and uses, which are directly related to the operation of the well and water transmission system.

**Future Wellhead Area (Zone F)**

The Future Wellhead Zone has been applied to lands, which, due to their hydrogeologic characteristics, have been identified as being suitable for future production wells. Development within this zone shall be restricted to single detached residential dwellings and uses, which are directly related to the operation of the well and water transmission system.

**Wellfield Protection Zone (Zone B)**

The Wellfield Protection Zone consists of lands which provide the primary source of groundwater which supports and recharges the lands within the immediate vicinity of the production wells (wellhead areas). This area is delineated by the length of time estimated for groundwater, and by association any contaminates, to travel through geological structures to the wellhead. A transmissivity rating of between 3 months and 1 year, as identified in the Village of Port Williams Water Resource Management Plan, has been utilized to define the physical limits of this zone. Within the Wellfield Protection Zone certain land uses, which by their nature present a significant risk to the groundwater contamination will be prohibited including:
• Commercial Storage of Chlorinated Organic Compounds
• Commercial Storage of Pesticides and Herbicides
• Commercial Storage of Petroleum Fuels
• Commercial storage of Petroleum Solvents
• Commercial storage of Synthetic Fertilizers and Manure in excess of 908 kilograms (1 Tonne)
• Storage of Salt in excess of 908 Kilograms (1 Tonne)

**Wellfield Recharge Zone (Zone C)**

The Wellfield Recharge Zone contains lands which provide and support the long-term recharge to the wellfield protection and wellhead areas. The limits of this zone, as identified in the Village of Port Williams Water Resource Management Plan, are delineated by a 1-year to 25-year transmissivity rating. Similar to the Wellfield Protection Zone, certain land uses, which by their nature present a significant risk to the groundwater, will be prohibited including:

• Commercial storage of Chlorinated Organic Compounds in excess of 900 Litres (200 Gallons)
• Commercial storage of Pesticides and Herbicides in excess of 900 Litres (200 Gallons)
• Commercial storage of Petroleum Fuels in excess of 45,000 Litres (10,000 Gallons)
• Commercial storage of Petroleum Solvents in excess of 900 Litres (200 Gallons)
• Storage of Salt in excess of 90,800 Kilograms (100 Tonnes)

2.12.5.5 Council shall establish a hierarchy of land use restrictions in the General Provisions section of the Land Use Bylaw which shall correspond to the use provisions outlined for the four protection zones. Restrictions in the Land Use Bylaw identified in Policy 2.12.5.4 will take effect in all land use zones, and where more stringent, these standards shall supersede or override the provisions of any zone or other General Provisions.

2.12.5.6 Notwithstanding provisions contained in Policy 2.12.5.4 and related provisions of this Municipal Planning Strategy and the Land Use Bylaw for Kings County, within the Wellfield Protection Zone (Zone B) and the Wellfield
Recharge Zone (Zone C) the following uses shall be prohibited within each of the specified Zones:

2.12.5.6.1 Uses Prohibited Within the Wellfield Protection Zone (Zone B):

Abattoirs
Accessory Gas Bars
Aggregate Related Industries
Agricultural Equipment Service
Agricultural Processing Industries excluding fruit and vegetable processing
All uses with the Agricultural Industrial (M3) Zone
Auto Repair
Automobile Service
Bulk Chemical Storage
Bulk Fuel Storage
Bus Depots and Maintenance Facilities
Cemeteries
Cold Storage Facilities
Commercial Greenhouses
Crematoria
Dry Cleaners
Fertilizer Production, Mixing, Blending
Fish and Food Processing
Gas Bars
Heavy Equipment Maintenance
Heavy Equipment Service
Recycling Depots
Scrap Operations
Septic Disposal Service
Service Stations
Transport and Trucking
Waste Transfer Stations

2.12.5.6.2 Uses Prohibited in the Wellfield Recharge Zone (Zone C):

Abattoirs
Accessory Gas Bars
Aggregate Related Industries
Bulk Chemical Storage
Bulk Fuel Storage
Cemeteries
Dry Cleaners
Fertilizer Production, Mixing, Blending
Gas Bars
Recycling Depots
Scrap Operations
Septic Disposal Service
Service Stations
Waste Transfer Stations

2.12.5.7 Existing uses within the Wellhead Protection (Zone A), Wellfield Protection (Zone B), Wellfield Recharge (Zone C) and Future Wellhead Area (Zone F) which pursuant to Policy 2.12.5.4 and 2.12.5.6 have otherwise been identified as being prohibited and thereby classified as existing non-conforming uses, shall be permitted to continue to operate in their current form and scope as provided for by the Land Use Bylaw and may be considered for expansion, redevelopment or change in uses only by Development Agreement.

2.12.5.8 In addition to provisions contained in Part 2.7, Urban Non-conforming Uses, Council in considering an application for approval of a Development Agreement pursuant to Policy 2.12.5.7 shall ensure that the proposal does not increase the potential for contamination of groundwater and further that the proposal receive a favourable review by the Village Commissioners for Port Williams which may stipulate Village which may stipulate that an applicant undertake appropriate studies by a qualified expert to assess the risk of impact on the quality and quantity of groundwater and where appropriate prescribe design, construction and operational performance standards directed mitigating risk of contamination and degradation of the groundwater resource.

2.12.5.9 Council may consider Agri-Tourism Commercial uses pursuant to Policy 3.2.8.2 in the Wellfield Protection Zone and the Wellfield Recharge Zone as shown of the Port Williams Growth Centre Urban Zoning Map. Council shall ensure that the proposal will not increase the potential for contamination of groundwater and that the proposal receives a favourable review by the Village Commissioners for Port Williams which may stipulate Village that an applicant undertake appropriate studies by a qualified expert to assess the risk of impact on the quality and quantity of groundwater and where appropriate prescribe design, construction and operational performance standards directed
mitigating risk of contamination and degradation of the groundwater resource.

2.12.5.10 Notwithstanding any other provisions contained in this Strategy, Council shall not consider application to rezone to Heavy Industrial (M2 Zone) or Agricultural Industrial (M3 Zone) within the Water Supply Protection Area for the Village of Port Williams as delineated on the Port Williams Growth Centre Urban Zoning Map of the Land Use Bylaw.

2.12.5.11 Except as provided for in this Section, Council shall not entertain applications for development by agreement on lands within any of the four protection zones shown on the Port Williams Growth Centre Urban Zoning Map.

2.12.5.12 In considering an amendment to the Municipal Planning Strategy and/or the Port Williams Groundwater Supply and Management Companion Policies, Council shall not provide for development which may increase the potential for contamination or degradation of the groundwater resource and in considering any amendments to this Strategy Council shall receive a favourable review by the Village Commissioners for Port Williams which may stipulate Village which may stipulate that an applicant undertake appropriate studies by a qualified expert to assess the risk of impact on the quality and quantity of groundwater and where appropriate prescribe design, construction and operational performance standards directed mitigating risk of contamination and degradation of the groundwater resource.

2.12.6 Companion Policies: Groundwater Supply and Management in Forestry and Country Residential Districts South of New Minas

The Water Resource Management Plan for the Village of New Minas delineates a Groundwater Recharge Area (protective zone “D”) for its wells that extends beyond the Village (and hence Growth Centre) boundaries, into the Forestry and Country Residential Districts. Council has endorsed this initiative through this Municipal Planning Strategy by instituting complementary policies and land use regulations specific to this area.

2.12.6.1 In keeping with policies under subsection 2.12.3 of this Strategy as well as the New Minas Sector Plan, Council accepts the technical recommendations for well protection contained in the Village of New Minas Water Resources

2.12.6.2 Council shall, in keeping with Policy 2.12.6.1, implement protective measures in the General Provisions section of the Land Use Bylaw, pursuant to the Municipal Government Act. Such provisions shall include a Well Recharge Protection Zone (D).

2.12.6.3 The Well Recharge Protection Zone D includes the watersheds that feed the New Minas wells. This Zone is intended to exclude uses such as, but not limited to:

a. Aggregate Extraction Related Industry  
b. Bulk Storage of Petroleum Fuels Over 10,000 Gallons  
c. Bulk Storage of Salt, Fertilizer, Pest and Weed Control Products and all Chlorinated Solvents (>200 Gallons)  
d. Cemetery  
e. Commercial Livestock Operation and Manure Storage  
f. Composting Facilities  
g. Forestry Use  
h. Golf Course and Driving Range  
i. M3, M4, M6, M7 Zone Uses (Excepting Cold Storage)  
j. Organic Soil Mixing Operations  
k. Salvage Operation, Salvage Yard and Holding Yard  
l. Septic Tank Service  
m. Waste Transfer Stations  

2.12.6.4 Recharge Area Protection Zone D

Any uses from the above list that are already in existence shall become non-conforming. Expansion (or change in use) of such non-conforming uses, shall be eligible for consideration only by development agreement pursuant to Section 3.7.9 Rural Non-Conforming Uses policy of this Strategy.

Furthermore, rather than impose an absolute constraint on all of the above uses in Zone D, Council intends (where underlying zoning would otherwise permit) to allow the following uses, from the above list, as new developments by development agreement:

1. Golf Course and Driving Range  
2. Transportation and Trucking
3. Warehousing and Storage (Excluding Cold Storage)

2.12.6.5 In considering a development agreement enabled by policy 2.12.6.4 for new uses, Council shall be satisfied that the development meets the following conditions:

a. a favourable review by the New Minas Water Commission which may stipulate that the applicant undertake appropriate studies by a qualified independent groundwater expert to assess the risk of impacts on the quality and quantity of groundwater, and when appropriate, prescribe performance standards for both the site design and ongoing operational aspects of the development and an independent monitoring regime with regular reporting to the New Minas Water Commission to determine compliance with the terms of the agreement

b. conformance with Provincial guidelines and conditions attached as individual licenses required under the Provincial Environment Act and other applicable Provincial and Federal regulations

c. conformance with all other requirements of this Strategy

2.12.6.6 Council may require that any or all of the following information be submitted to the Municipality by the Developer with respect to any proposed development which is the subject of a Development Agreement under the Municipal Government Act namely:

a. information as to the physical and environmental characteristics of the proposed site including information regarding topography, contours, elevations, dimensions, natural drainage, soils, groundwater, existing watercourses, vegetative cover, size and location of the lands

b. information as to the proposed location, height, dimensions and use of all buildings or structures proposed to be built or erected on the lands

c. information on the type and amount of site clearing required, if any

d. information regarding proposed site drainage and servicing with water supply and sewage disposal
e. information on proposed access and egress to and from the lands and estimated traffic flows to be generated

f. information on the intended hours of operation

g. information on the architectural design, including renderings, scaled site plans, profiles, grade elevations and cross sections

h. information regarding the provision and maintenance of appropriate natural screens and landscaping

2.12.7 Companion Policies: Groundwater Supply and Management, Coldbrook and the Kentville Wellfield Area

In 1999 the Town of Kentville undertook to replace Magee Lake, located in the South Alton area, as the primary source of drinking water for the Town and other customers of the Kentville Water Commission. Professional engineering and hydrogeology evaluations, a test well drilling and a large scale water sampling program assisted in identification of a wellfield area capable of providing a high quality ground source supply capable of supporting the Town’s long term needs. While no longer serving as the primary source of water for the Town Magee Lake continues to serve as a secondary/backup source and lands within the Magee Lake watershed remain designated and regulated as Water Supply pursuant to provisions contained in this Strategy and the Land Use Bylaw.

The Kentville wellfield area was identified and delineated in a report, the Kentville West Wellfield Water Resource Management Plan (January 2002) prepared by Hiltz and Seamone Co. Ltd., Consulting Engineers, in association with W. G. Shaw and Associates Ltd., Consulting Geoscientists. The consultants analyzed test well yield data, investigated the local geology, hydrogeologic characteristics of the local aquifer, projected water demand, estimated aquifer recharge and developed a water budget to confirm sustainable yield estimates. Utilizing the data and computer models the study delineated the total area of contribution for the wellfield as well as various “zones” of sensitivity of lands within the wellfield. The study also provided a variety of recommendations concerning land use management and control as it would relate to protection of the groundwater within the identified wellfield area.

The Kentville West Wellfield Water Resource Management Plan has been adopted by the Kentville Town Council. While the decision to transfer from a surface supply to a ground source supply afforded the Town a number of benefits such as improved raw water quality and a source located primarily within the boundaries of the Town, the development of the
wellfield has also presented challenges. The most significant of these is perhaps that the wellfield, due to environmental and hydrogeologic necessity, has been located in an area with considerable existing commercial, residential and industrial development. The need to balance the rights of existing development with the need to protect the groundwater resource is and will be a primary challenge for planning and development in the wellfield area. The Town of Kentville has adopted amendments to the Town’s Municipal Planning Strategy and Land Use Bylaw to implement land use and development control recommendations of the Plan.

While approximately three quarters of the 24 square kilometer wellfield area is located within the Kentville Town boundary a portion of the area extends into Kings County in vicinity of the eastern portion of the community of Coldbrook. Most of the development within the Coldbrook’s Highway 1 commercial corridor, from the Highway 101 overpass/Wandlyn Inn to the Scotian Gold plant, is located within the wellfield area as are a number of existing residential neighbourhoods including Pinewood, Royal Estates and Cornwallis Crescent.

The Kentville West Wellfield Water Resource Management Plan identifies 4 different “zones” within the wellfield area, corresponding to areas of differing sensitivity to contamination and degradation by land use activities. Lands with the highest sensitivity are those located closest to the individual production wells, the “Wellhead Protection Zone, Zone A”. These areas have the shortest “time of travel” for a contaminant to enter the groundwater as a result of land use activities. The West Wellfield Water Resource Management Plan calls for a significant degree of land use control in these areas to ensure the long-term protection of the water supply. The Plan recommends incrementally reduced land use control measures for lands located increasingly further away from the wellheads, the Well Capture Protection Zone, Zone B, the Wellfield Protection Zone, Zone C and the Wellfield Recharge Zone, Zone D.

Lands located in the Coldbrook area which fall within the designated wellfield area are primarily contained within the Wellfield Protection Zone, Zone C and the Wellfield Recharge Zone, Zone D, with a vast majority of these lands falling within the Wellfield Recharge Zone. These zones apply to lands most removed from the wellheads with the greatest “time of travel” for a contaminant to the wellhead. While being significant to the protection and management regime envisioned in the Plan, lands within Zone C and Zone D are recommended to be subject to the least amount of specific development control provisions for groundwater protection.

A very small portion of lands, approximately 930 square meters (10,000 square feet) do fall within one of the Wellhead Protection Zones, Zone A. These lands are located on the north side of the railway right-of-way and are
zoned Country Residential R6. The lands are vacant, do not directly abut a local road and are in close proximity to wet lands and streams which flow into the Cornwallis River. The current zoning does not permit intensive development these lands and they are generally unsuitable for any type of development by virtue of their environmental constraints.

A small portion of lands, approximately 4 hectares (10 acres) are located within the Well Capture Zone, Zone B. These lands are located within the Coldbrook Village Park commercial development, approximately 2.4 hectares (6 acres) being zoned Commercial Comprehensive Development C6 and 4 acres being zoned Environmental Open Space O1 due to the presence of water features and wetlands. The Well Capture Zone is applied to lands, which directly support short to medium term groundwater production and have been characterized as having the potential to transmit contaminants to production wells within 2 week to 3 months of them entering the soil. As a result the Kentville West Wellfield Water Resource Management Plan calls for restrictions on specific types of uses within this area as a means of reducing the risk and potential for groundwater contamination.

The West Wellfield Water Resource Management Plan recommends that development control provisions be placed on certain activities, which due to the nature of the operation and/or the materials used, present a significant challenge to the protection of groundwater within the wellfield area. Included in this list of uses is the commercial storage of petroleum fuels and solvents, commercial storage of chlorinated solvents and the commercial storage or pesticides and herbicides.

The purpose of this section of the Strategy is to identify and implement land use control provisions consistent with the recommendations contained in the Kentville West Wellfield Water Resource Management Plan. This Strategy adopts the wellfield protection zoning for lands in the wellfield area located within the County as recommended by the Plan and implements land use control provisions by means of an overlay technique. Lands within the wellfield area are designated and zoned pursuant to all relevant policies of this Strategy, and the relevant land use and development control provisions for these zones are identified in the Land Use Bylaw. However where properties fall within the wellfield area an additional level, a series of “overlay” restrictions will apply and where applicable supersede other Bylaw provisions.

Long before the development of the wellfield a wide variety commercial and industrial type development had established itself in Coldbrook along Highway 1. Over time this development has evolved from serving primarily the local community to the current day where the Highway 1 commercial core now serves as the central focus to the Coldbrook Growth
Centre as well as a significant commercial presence within the New Minas/Kentville/Coldbrook urban context. It is the objective of this Strategy to balance the needs of existing and future development on lands within Coldbrook which fall within the Wellfield Area with the need to protect the groundwater resource.

Existing commercial uses within the Wellfield Protection Zones, which have been developed pursuant to and would otherwise be permitted according to the Bylaw but which are subject to regulation and/or prohibition within the overlay zone, will be able to continue to operate as an existing non-conforming uses. These uses will also be able to be considered for expansion or redeveloped by means of development agreement subject to the provisions of this Strategy.

2.12.7.1 Further to and in support of policies contained in Subsection 2.12.3 of this Strategy, Council accepts the technical recommendations for wellfield area protection contained in the Kentville West Wellfield Water Resource Management Plan (Hiltz and Seamone Co. Ltd., Consulting Engineers in association with W. G. Shaw and Associates Ltd., Consulting Geoscientists).

2.12.7.3 In addition to provisions contained in this section Council intends to work with the Town of Kentville and the Kentville Water Commission to explore legal mechanisms and administrative and management undertakings which support the protection of the groundwater within the wellfield area but which are beyond the scope and authority of municipal planning legislation. These efforts may include but not be limited to public awareness and education programs, water conservation and consumption management and contingency planning for supply and distribution management. Specific administrative and management measures may also include restrictions on the application of road salt (and other de-icing products), the use and application of pesticides, herbicides and fertilizers, agricultural production and waste management, private well drilling and groundwater production, aggregate extraction and forestry development.

2.12.7.4 Council shall institute in the General Provisions section of the Land Use Bylaw groundwater supply protection measures for that portion of the Kentville wellfield area located within the
County, as recommended in the Kentville West Wellfield Water Resource Management Plan. Lands subject to these provisions shall be identified on the Coldbrook Urban Zoning and Wellfield Protection Zoning Map appended as Schedule 5g of the Land Use Bylaw and shall include the following special zone and provisions:

**Wellhead Protection Zone (Zone A)**

The Wellhead Protection Zone includes those lands which contain or are immediately adjacent to the wellhead. The limits of this zone, as identified in the Kentville West Wellfield Water Resource Management Plan, are delineated by up to a 2-week time of travel for a contaminant to reach the wellhead through the groundwater system. These lands are the most sensitive lands within the wellfield and critical to the operation of the Kentville Water Commission and, therefore, the only uses permitted within this zone shall be:

- Existing Residential Uses
- Public Parkland
- Uses Relating to the Operation of the Kentville Water Commission

**Well Capture Zone (Zone B)**

The Well Capture Zone contains lands which provide and support the short and medium-term groundwater production at the wellheads. The limits of this zone, as identified in the Kentville West Wellfield Water Resource Management Plan, are delineated by a 2-week to 3-month time of travel for a contaminant to reach the wellhead through the groundwater system. Certain land uses, which by their nature present a significant risk to the groundwater contamination, will be prohibited within this zone including:

- Agricultural Uses
- Any Manufacturing, Industrial, Assembly, Processing, or Warehousing Operation
- Automotive Painting, Engine and Auto Body Repair Shops
- Automobile Scrap Yard
- Automobile Washing Establishments
- Bulk Chemical Storage
- Bulk Storage of Salt
• Bulk Storage, excluding sand and gravel, and supply depots
• Campgrounds
• Cement Plants
• Cemeteries
• Commercial Livestock Operations
• Commercial Nurseries
• Commercial Storage and/or Distribution of Chlorinated Solvents
• Commercial Storage and/or Distribution of Fertilizers
• Commercial Storage and/or Distribution of Pesticides and Herbicides
• Commercial Storage and/or Distribution of Petroleum
• Commercial Storage and/or Distribution of Petroleum Solvents
• Driving Ranges
• Dry Cleaners
• Gas Stations or Accessory Gas Bars
• Golf Courses
• Licensed Zoos
• Light Manufacturing, Fabrication, Welding, etc
• Open Storage of new goods and materials
• Power Utility Sub-stations
• Private Parks
• Recycling Depots
• Scrap Metal and Salvage Yards and/or Processing
• Transport and Trucking

**Wellfield Protection Zone (Zone C)**

The Wellfield Protection Zone contains lands which provide and support the short and medium-term groundwater recharge process. The limits of this zone, as identified in the Kentville West Wellfield Water Resource Management Plan, are delineated by a 3-month to 1-year time of travel rating. Certain land uses, which by their nature present a significant risk to the groundwater contamination, will be prohibited including:

• Automotive Painting, Engine and Auto Body Repair Shops
• Bulk Chemical Storage
• Bulk Storage of Salt
• Commercial Nurseries
• Commercial Storage and/or Distribution of Chlorinated Solvents
• Commercial Storage and/or Distribution of Fertilizers
• Commercial Storage and/or Distribution of Pesticides and Herbicides
• Commercial Storage and/or Distribution of Petroleum Fuel
• Commercial Storage and/or Distribution of Petroleum Solvents
• Dry Cleaners
• Gas Station or Accessory Gas Bars
• Scrap Metal and Salvage Yards and/or Processing

Wellfield Recharge Zone (Zone D)

The Wellfield Recharge Zone contains lands which provide and support the long-term recharge to the wellfield protection, well capture and wellhead areas. The limits of this zone, as identified in the Kentville West Wellfield Water Resource Management Plan are delineated by a 1-year to 25-year time of travel rating. Similar to the Well Capture and Wellfield Protection Zone certain land uses, which by their nature present an identified risk to groundwater contamination, will be prohibited including:

• Automotive Painting, Engine and Auto Body Repair Shops
• Bulk Storage of Salt, in excess of 100 tonnes
• Commercial Storage and/or Distribution of Chlorinated Solvents
• Commercial Storage and/or Distribution of Pesticides and Herbicides
• Commercial Storage and/or Distribution of Petroleum Fuel
• Commercial Storage and/or Distribution of Petroleum Solvents
• Dry Cleaners
• Gas stations or Accessory Gas Bars
• Scrap Metal and Salvage Yards and/or Processing

2.12.7.5 Council shall establish a hierarchy of land use restrictions in the General Provisions section of the Land Use Bylaw which shall correspond to the use provisions outlined for the Wellfield Protection and Wellfield Recharge Zones. Restrictions in the Land Use Bylaw identified in Policy
2.12.7.4 will take effect in all land use zones, and where more stringent, these standards shall supersede or override the provisions of any zone or other General Provisions.

2.12.7.6 Existing uses within the Wellfield Protection and Wellfield Recharge Zones, which pursuant to Policy 2.12.7.4 have otherwise been identified as being prohibited, shall be permitted to continue to operate in their current form and scope as provided for by the Land Use Bylaw and may be considered for expansion or redevelopment only by Development Agreement. In addition to provisions contained in Part 2.7, Urban Non-conforming Uses, Council in considering an application for approval of a Development Agreement shall ensure that the proposal does not increase the potential for contamination of groundwater.

2.12 Companion Policies: Groundwater Supply and Management, South Berwick and Area

In October 2002, the Berwick Town Council commissioned a Water Resource Management Study for the Town. The three-part study included preparation of base mapping, inventory and documentation of environmental conditions and existing land use and development patterns. The study program also included a well inventory and water sampling program, which was carded out over a 10 month period. The background documentation and sampling program data was utilized by consulting engineers and geoscience professionals to prepare a Water Supply Management Plan that was completed in April 2003.

In conjunction with the scientific and engineering analysis, the Town also undertook to draft amendments to the Berwick Municipal Planning Strategy and Land Use Bylaw to implement planning and development control measures aimed at protecting the quality of the ground water resource in the Berwick area. Recognizing that the quality of ground water in the Town is directly influenced by development adjacent to, but beyond the Town limits, the Berwick Town Council has requested that the Municipality adopt certain land use control provisions for lands adjacent to the Town. It is recognized that residents from the Town and the County both share a common interest in ensuring that the quality of the ground water resource in the Berwick area is protected.

The April 2003 Town of Berwick Water Supply Management Plan, prepared by Hiltz and Seamone Co. Ltd., Consulting Engineers and W.G. Shaw and Associates Ltd., Consulting Geoscientists, identified that the Town's current daily water demand ranges between 300,000 and 400,000 gallons. The consultants have estimated that this annual consumption
represents approximately fifteen (15%) percent of the annual groundwater recharge of approximately 1000 million gallons which occurs within the local bedrock aquifer.

The well sampling and water analysis component of the study program indicated that groundwater, primarily drawn from the area's sandstone bedrock aquifer, is fresh, moderately soft to moderately hard, slightly basic and contains trace amounts of a number of elements and minerals. The groundwater generally conforms to all minimum standards in the Canadian Drinking Water Guidelines as established by the Canadian Council for the Ministers of the Environment and as adopted by Nova Scotia Environment. The groundwater in the Berwick area was characterized in the Town of Berwick Water Resource Management Study. Phase 2: Water Quality Survey as being "very good".

In the absence of a municipally operated central water supply system all property owners in the Town, and surrounding area, are responsible for their own water supply. The Town of Berwick Water Supply Management Plan identified that prior to its closure in 2004 the Avon Foods Ltd. processing operation together with Larsen's Packing Ltd. utilized approximately the same volume of water on a daily basis as the rest of the Town users combined. The ability to access clean water in sustainable quantities is critical to the commercial viability of all businesses within the Town and the surrounding area. In the interest of groundwater resource management the Berwick Town Council in December 2004 adopted amendments to its own Municipal Planning Strategy and Land Use Bylaw to enact land use control policies and Bylaw provisions directed at controlling development activities for the purposes of groundwater resource protection.

Utilizing a widely recognized computer model, HST-3D, the Town of Berwick Water Supply Management Plan has identified a "Zone of Contribution" which generally supports domestic groundwater production for all wells within the Town of Berwick. This area contains approximately 15 square kilometres of land and extends roughly 4 kilometres in width both east-west and north-south from the primary developed areas within the Town. The lands within the Zone of Contribution also represent the limits of groundwater migration through the aquifer to wells within the Town over a time of travel of between one and twenty-five years.

The model has also been utilized to identify "Zones of Influence" for the commercial groundwater production wells utilized by Larsen's Packing Ltd. and the former Avon Foods Ltd. These areas include lands, which directly contribute to ongoing groundwater production for commercial
use, and which through groundwater migration, have an estimated time of travel to the wellheads of one year or less under pumping conditions.

The time of travel to a well as modeled in the groundwater migration estimates, in the case of both the Zones of Influence and Zone of Contribution, also represents the degree of risk to which a well may be exposed as a result of contamination. Risk of contamination increase with both the proximity to a well and with a reduced time of groundwater migration.

A majority of lands located within the County which fall within the Zones of Influence are either currently used for agricultural purposes (crop, pasture or orchard) or are vacant and undeveloped. With the exception of several parcels located at the eastern end of Berwick's Main Street these lands do not have direct public road frontage or related infrastructure. These lands are designated and zoned for agricultural use. Current provisions in the Strategy and Land Use By-law limit potential future development primarily to farm and farm related uses. These Agricultural Zone (Al) permitted uses generally do not represent a risk to contamination or degradation of the groundwater resources.

The Area of Contribution includes lands within the South Berwick Hamlet designation, fronting on Highway 1 between Bentley Road on the east and Taylor Road on the west. The Area of Contribution also includes lands north and south of Highway 1 between Bent Road on the east, Rainforth Road on the west, and south towards the Cleveland/Lawrence Road area. The Hamlet designation area contains a mix of residential, commercial and community facility uses as well as several industrial activities. The area outside of the Hamlet designation contains agricultural and rural residential uses, which have developed along the existing public road network. In addition to a substantial amount of vacant undeveloped land a variety of environmentally sensitive lands within this area, including watercourses, bogs and wetlands, play an important role in the local hydrologic regime.

The Hamlet designation policies are generally intended to reflect the character of a number of small communities within the County's rural areas. South Berwick has been identified as one of four Hamlets being significantly influenced by adjacent intensive urban-type development. The primary focus for future development within the Hamlet designation is for residential, local commercial and community facility uses. The Strategy does however provide for the recognition existing uses and the development of future commercial and industrial uses within the Hamlet designation by means of rezoning. While the rezoning provisions provide for a means to review development proposals a number of the permitted uses with the Hamlet Commercial and Hamlet Industrial zones have been
identified as being of concern to groundwater protection. In particular the development of gas stations, chemical, fertilizer or pesticide production and storage and dry cleaning uses do present risks to groundwater contamination which should be addressed. In addition a number of uses which utilize petroleum and chemical products in fabrication, service or maintenance processes also present a degree of risk to groundwater resources. Recognizing that development of these uses can take place with minimal risk of contamination provided that appropriate planning and environmental protection measures, the primary thrust of the policies in this section is to require certain uses to be considered by Development Agreement when located with the Zone of Influence or the Zone of Contribution.

In general the purpose of the policies and related Land Use Bylaw provisions contained in this section is to identify lands within the County which are included within the Zones of Influence and Zone of Contribution for groundwater production in the Town of Berwick and provide for land use control measures which limit the risk of groundwater contamination as a result of development.

2.12.8.1 Further to and in support of policies contained in this Strategy, Council accepts the technical information and recommendations for Groundwater Supply Area protection contained in the Town of Berwick Water Supply Management Plan (Hiltz and Seamone Co. Ltd., Consulting Engineers and W. G. Shaw and Associates Ltd., Consulting Geoscientists, April 2003).

2.12.8.2 Council shall, in keeping with Policy 2.12.8.1, implement protective measures in the General Provisions section of the Land Use Bylaw, pursuant to the Municipal Government Act for the purposes of promoting protection of groundwater within the South Berwick and Area Groundwater Supply Area.

2.12.8.3 In addition to provisions contained in this section Council intends to work with the Town of Berwick to explore legal mechanisms and administrative and management undertakings which support the protection of the groundwater within the supply area but which are beyond the scope and authority of municipal planning legislation. These efforts may include, but not be limited to, public awareness and education programs, water conservation and consumption management and contingency planning for supply and distribution management. Specific administrative and management measures may also include
restrictions on the application of road salt (and other de-icing products), the use and application of pesticides, herbicides and fertilizers, agricultural production and waste management, private well drilling and groundwater production, aggregate extraction and forestry development.

2.12.8.4 Council shall institute in the General Provisions section of the Land Use Bylaw two categories of "zones" for South Berwick and Area Groundwater Supply Area protection as identified and delineated in the Town of Berwick Water Supply Management Plan which shall be identified on the South Berwick Hamlet and Wellfield Protection Zones map, Schedule 16h of the Land Use Bylaw. The Bylaw shall include the following special zones and provisions:

**Water Supply Zone of Influence (Zone I)**

The Water Supply Zone of Influence consists of lands in the vicinity of the primary commercial production wells for Larsen's Packing Ltd. and the former Avon Food Ltd. This area is delineated by the length of time estimated for groundwater and by association any contaminants to travel through geological structures to the wellhead, with a time of travel rating up to 1 year, as identified in the Town of Berwick Water Supply Management Plan.

**Water Supply Zone of Contribution (Zone C)**

The Water Supply Zone of Contribution consists of lands which provide the primary source of groundwater that supports and recharges the wells within the Town of Berwick. This area is delineated by the length of time estimated for groundwater and by association any contaminants to travel through geological structures to the wellhead, with a time of travel rating of between 1 year to 25 years, as identified in the Town of Berwick Water Supply Management Plan.

2.12.8.5 Notwithstanding other provision of this Strategy it shall be the intention of Council to not consider rezoning lands within the Zone of Influence (Zone I) to the Agricultural Industrial (M3) Zone.

2.12.8.6 Notwithstanding other provisions of this Strategy within the Zone of Influence (Zone I) and Zone of Contribution (Zone C) the following uses shall be prohibited from development:
- Automotive Salvage Yards
- Commercial Bulk Storage of Petroleum Fuel, excluding Gasoline or Service Stations
- Commercial or Bulk Storage of Salt
- Commercial Storage of Petroleum Solvents
- Commercial Storage, Processing or Production of Pesticide, Herbicide or Fertilizer
- Dry Cleaning

2.12.8.7 Notwithstanding other provisions of this Strategy within the Zone of Influence (Zone I) and Zone of Contribution (Zone C) the following uses shall be permitted only by Development Agreement provided the use is permitted in the underlying zone or a zone the proposed location would otherwise be eligible to be rezoned to. In addition to other provisions contained in this Strategy, Council in considering an application for approval of a Development Agreement shall ensure that the proposal does not increase the potential for contamination of groundwater:

- All Uses within the Agricultural Industrial (M3) Zone with the exception of Fire Stations
- All Uses within the Hamlet Industrial (M5) Zone
- Gasoline and or Automotive Service Stations

2.12.8.8 Existing uses within the Zone of Influence (Zone I) and Zone of Contribution (Zone C), which pursuant to Policy 2.12.8.6 have otherwise been identified as being prohibited, shall be permitted to continue to operate in their current form and scope as provided for by the Land Use Bylaw and may be considered for expansion or redevelopment only by Development Agreement. In addition to provisions contained in Part 3.7.9, Rural Non-conforming Uses, Council in considering an application for approval of a Development Agreement shall ensure that the proposal does not increase the potential for contamination of groundwater.

3.1 RESOURCE AND RURAL DEVELOPMENT DISTRICTS

Of overriding importance in planning for the rural areas is the protection and enhancement of the County's natural resources. Council's rural policies are directed towards accommodating some rural and resort development without compromising the future capability of the County's natural resources or the integrity of community health.

To achieve Council's planning objectives, the rural area has been divided into the following five Rural Districts which have been identified based on natural resource capability and are shown on the County Future Land Use Map (Map 15):

AGRICULTURAL
FORESTRY
COUNTRY RESIDENTIAL
SHORELAND
HAMLET

With the county's economy having evolved around its agricultural land base, protection of the prime agricultural lands and encouragement of farming activity is the fundamental objective in establishing the Agricultural Districts designation. These primary resource districts encompass the majority of the rural area along the floor of the valley between the North and South Mountains.

The majority of lands on North and South Mountains have high capability for forest growth and production. The Forestry Districts designation is established and is applied to most of the land on the North and South Mountains and a few small areas in the valley. In areas of lesser soil capability for agriculture or forestry, rural residential and resort development opportunities are provided. The Shoreland Districts other than the Minas Shore and the Bay of Fundy coast are largely located on the plateau of the South Mountain.

This part of the Strategy contains Council's policies for the Resource and Rural Development districts of the County. Section 3.7 sets out general rural policies that apply to two or more of the Districts.

3.1.1 Rural Planning Objectives

3.1.1.1 To delineate rural land use districts on the basis of soil capability for resource activities.

3.1.1.2 To delineate rural residential and recreational resource areas on the basis of land use suitability.

3.1.1.3 To provide for residential, commercial, industrial and community facility development opportunities which are related to, and supportive of, the primary resource industries.
3.1.4  To delineate shoreland residential and resource areas on inland lakes on the basis of trophic state capacity and shoreland biophysical capability analysis.

### 3.1.2 Rural Districts Policies

3.1.2.1 Council shall establish the following District Designations to apply to lands in rural areas:

a. Agricultural Districts (A)

b. Forestry Districts (F)

c. Country Residential Districts (CR)

d. Shoreland Districts (S)

e. Hamlets (H)

These District designations will be applied based on the policies of this Strategy and will be shown on the Future Land Use Map which is incorporated as part of this Strategy as Map 15.

3.1.2.2 The following Sections 3.2 - 3.6 outline Council's policies for these Rural Districts. In addition, common development policies dealing with specific uses which apply to some or all the Rural Districts, are contained in Section 3.7.

3.2 AGRICULTURAL DISTRICTS

3.2.1 Agricultural District - Introduction

Municipal Council believes that prime farmland should be used for farming.

Kings County has the most abundant and diverse range of agricultural production in Nova Scotia. It is distinguished for its vegetable, fruit and cereal grain production. In addition, there are a large number of commercial livestock operations. The ability to cultivate crops is a result of unique conditions, including climate and soil type, and a long history of local investment in agricultural development.

The areas with favourable cultivation conditions in the County are limited. In addition, these same places are desirable for non-farm uses, typically housing, from expanding urban areas and the cumulative impact of single lot development. There is already a significant amount of non-farm development in and around prime agricultural lands. Such uses can have a negative impact on the County’s agricultural resource for a multitude of reasons, including:

• the absolute loss of land from agricultural production;

• the limits that are placed on agricultural production near to non-farm uses to avoid nuisance and health issues that may arise from cultivation practices such as the spraying of pesticides;

• the difficulties in cultivating small parcels of land in-between non-farm buildings;

• the disincentive of making investments in farmland when surrounding land is, or is speculated of being, developed for non-farm uses; and,

• the limits that may be placed on altering agricultural activities or innovating with new farming techniques due to the belief by non-farm landowners that surrounding farming practices should not change.

By examining trends, it is thought that, without intervention, there would be a significant amount of non-farm development on prime agricultural land. For this reason, Municipal Council has defined an Agricultural District where an expansion of farming activities is promoted and new non-farm uses are discouraged. The District is to be the ‘home’ for agricultural development with few limitations on farming activities. However, while Council believes that new non-farm uses should be limited, it also recognizes that there is already a significant amount of
such development. As such, to help avoid nuisance problems, Council has also prescribed provisions regarding the establishment of intensive farming activities such as commercial livestock uses.

Municipal Council recognizes that individual property owners may view its farmland preservation planning policies and regulations as a severe limitation on development. It also understands that the impetus to convert agricultural land to non-farm uses is often due to a desire to raise retirement or other short-term income. Yet the development of farmland for non-farm uses is irreversible and precludes farming activities for future generations. In recognizing this problem, Council believes that initiatives such as land banking programs are an important accompaniment to its farmland preservation planning policies and regulations.

3.2.2 Adopted Maps & Information

There are a number of maps, studies, and other documents that have been used to develop planning policies for the Municipality’s agricultural land. They provide information on such matters as soil classifications and agricultural land use. They are also references to be used in considering development proposals within the Agricultural District.

3.2.2.1 General Policies

3.2.2.1.1 It shall be the policy of Council to adopt:

a. the Generalized Soil Capability Map for Kings County (2001), for the purpose of identifying soil classifications in the County

b. the Active Agriculture Map (2008) prepared by the Kings County Community Development Services Department for the purposes of identifying pre 1999 active agricultural land in Kings County. This map is based on the 1999 Agricultural Land Identification Maps (1999) prepared by the Nova Scotia Department of Agriculture and Marketing and the Kings County Community Development Services Department.
3.2.3 Agricultural Goals and Objectives

Municipal Council has goals and objectives for the Agricultural District. The goals identify Council’s intention for the Agricultural District and the objectives define, in broad terms, how the goals are to be achieved.

Council’s goals reflect a longstanding notion that farmland should be used for farming. However, this is also tempered by the fact that there are a significant number of non-farm uses in the Agricultural District that have development rights by virtue of their existence. The challenge facing Council is to ensure that the amount, and type, of future non-farm development is limited and appropriate, to ensure that its impact on farming activities, present and future, will be minimized.

3.2.3.1 Goals

3.2.3.1.1 Council's goals shall be to:

a. protect and enhance the agricultural resource base; and

b. minimize and reduce conflicts between the agricultural industry and non-agricultural development

3.2.3.2 Objectives

3.2.3.2.1 Council's objectives shall be to:

a. facilitate the growth of the agricultural industry in the County

b. protect the prime agricultural areas from the intrusion of use that are incompatible with, or unnecessary to the future growth of, the agricultural sector

c. reduce the undue fragmentation of farmland which limits future expansion of agricultural activity; and

d. establish standards for rural uses including distance requirements between certain agricultural uses and incompatible uses and ensure proper waste disposal practices
3.2.4 Agricultural District

The Agricultural District, as shown on the Future Land Use Map, represents areas where there is a significant amount of land that is used, or has a high capability of being used, for common field crop production based on the Canada Land Inventory Capability Classification for Agriculture rating. It is within this District where the Goals and Objectives described above are to apply.

3.2.4.1 General Policies

3.2.4.1.1 It shall be the policy of Council to establish an Agricultural District over areas where there is a significant amount of land that is used, or has a high capability to be used, for agricultural development. This includes the following areas:

a. blocks of land on the ‘Valley Floor’, North Mountain and South Mountain. These are defined by physical and natural features such as roads and rivers, where more than 60 percent of the land is Class 2, 3, or active Class 4 agricultural capability soils as shown on Council’s adopted maps; and

b. lands in Gaspereau Valley, where more than 60 percent of the land is Class 2, 3, or active Class 4 agricultural capability soils as shown on Council’s adopted maps

3.2.4.1.2 After soil capability mapping was updated for the County in the early 1990’s, it became apparent that certain areas not currently within the Agricultural District containing ‘Cornwallis Soils’ would now be eligible for inclusion according to the criteria listed in 3.2.4.1.1. In fact, this issue was explored by Council in 1996 and again in the 2000/2001 review of agricultural policies. Ultimately, Council decided not to include these areas due to concerns over water availability for agriculture and the belief that including these areas after they had been zoned to permit development for some period of time would...
pose an undue hardship on affected landowners.

3.2.5 Agricultural Uses

The majority of the land in the Agricultural District is to be included in the Agricultural (A1) Zone where a full range of primary crop and livestock production activities are to be permitted with few limitations. However, in recognition of the potential for compatibility and environmental problems with established non-farm uses within and surrounding agricultural land, there are special conditions concerning future commercial livestock uses.

Kings County is acknowledged to have one of the highest densities of commercial livestock barns in Eastern Canada. The continued expansion of this industry faces a number of challenges, including the difficulty of siting new facilities among the significant number of houses in the Agricultural District as well as the availability of land upon which to spread manure. As the size and number of livestock barns has increased, the concern over the capacity of the land to accommodate new uses has been heightened. It is recognized that it is critical to understand the impact that manure disposal has on the environment, to plan accordingly for this practice, and to determine what might be suitable separation distances between livestock facilities and non-farm dwellings to lessen nuisance problems. In the interim, the Municipality has adopted basic separation and setback distance requirements.

3.2.5.1 General Policies

3.2.5.1.1 It shall be the policy of Council to establish an Agricultural (A1) Zone in the Agricultural District within which permitted uses shall include a broad range of agricultural uses, farm dwellings, and other uses enabled elsewhere in this Strategy.

3.2.5.2 Special Conditions – Commercial Livestock Use Policies

3.2.5.2.1 It shall be the policy of Council to permit commercial livestock uses in the Agricultural (A1) Zone provided that livestock barns, feedlots, and manure storage and treatment facilities are more than:

a. 1000 feet from a Residential or Institutional Zone within a Hamlet or a
Growth Centre, with the exception of the Grand Pre hamlet

b. 300 feet from a watercourse, well, or a dwelling on an adjacent property; and

c. 150 feet from a front lot line, 150 feet from a flankage lot line (for corner lots), and 200 feet from side and rear lot lines

3.2.5.2.2 It shall be the policy of Council to permit commercial livestock barns on properties that do not possess frontage on a Public Road.

3.2.5.2.3 It shall be the policy of Council to work with the Province of Nova Scotia to assist in the development of:

a. a Manure Disposal Plan Program that will develop appropriate standards and regulate the storage, transfer, and disposal of animal manure for livestock operations; and

b. appropriate definitions and siting standards for commercial livestock operations based upon their size and type

3.2.5.2.4 It shall be the policy of Council to require that, after January 1, 2003, new commercial livestock operations and expansions to existing livestock operations shall only be permitted where such operations have a Manure Disposal Plan, approved by the Province of Nova Scotia. The intent of this date is to provide enough time to establish a Manure Disposal Plan Program.

3.2.5.3 Special Conditions – Farm Dwelling Policies

Farm dwellings, tenement dwellings and bunkhouses may be developed as part of a farm operation – a bona fide farm.

3.2.5.3.1 It shall be the policy of Council to permit farm dwellings in the Agricultural (A1) Zone that
are directly related to a bona fide farm operation.

3.2.5.3.2 In considering proposals to establish new farm dwellings, it shall be the policy of Council that:

a. the Land Use Bylaw contain definitions and standards, including requirements that a bona fide farm be over 20 acres in size and producing crops or livestock for more than two years before an application for a farm dwelling be considered; and

b. the Development Officer may consult with government agencies and other regulatory bodies to assist in substantiating information provided by an applicant

3.2.5.3.3 In 2008 Council permitted new farmers or farmers who are moving from another jurisdiction to farm to qualify as a bona fide farmer. This policy is intended to apply to full-time, active farmers and proof shall be required to prove this status. Farm dwellings may be built by development agreement in these cases. The Development Agreement shall require the following:

a. a site plan showing the location of crops, barns, pastures, residential development associated with the farm operation, parking, access, site servicing and landscaping

b. in the case of a proposed livestock operation, a Manure Storage Plan shall be submitted

3.2.5.4 Special Conditions – Residential Setbacks From Commercial Livestock Operations

It is the intention of Council to ensure that farms within the Agricultural District are not restricted from operating commercial livestock operations by new non-farm residential development. Therefore, it is the policy of
Council to require larger setbacks for new residential dwellings from existing commercial livestock barns, in order to provide an opportunity for farmers to expand existing or commence new commercial livestock operations.

3.2.5.4.1 Permitted residential dwellings shall be a minimum of 600 feet from a commercial livestock operation.

3.2.6 Non-farm Residential Uses

Municipal Council has a goal of retaining farmland for farming and is concerned that the construction of new dwellings is resulting in the loss of too much prime farmland and is therefore creating potential compatibility issues with surrounding agricultural activities. However, it is recognized that, prior to the adoption of the Municipality’s policies, some lots may have been created for the anticipated construction of dwellings. In addition, in a few places in the Agricultural (A1) Zone, it may be possible to create new building lots without hindering farming activities.

3.2.6.1 General Policies

3.2.6.1.1 It shall be the policy of Council to recognize residential uses developed or issued a development permit prior to the policies under 3.2.6 coming into effect, as “existing uses”. This allows for such things as the reconstruction and expansion of dwellings and accessory uses, subject to the regulations contained in the Land Use Bylaw. As such, policy 3.2.6.1.2 does not apply to these situations.

3.2.6.1.2 It shall be the policy of Council to consider new non-farm residential uses in the Agricultural (A1) Zone, subject to the criteria contained in subsections 3.2.6.2 and 3.2.6.3.

3.2.6.1.3 All new non-farm dwellings shall require site plan approval, and are subject to the criteria in 3.2.6.3.2.
3.2.6.2 Existing Vacant Lot Policies

3.2.6.2.1 It shall be the policy of Council to permit the development of one non-farm dwelling per lot created prior to August 1, 1994, by site plan approval subject to the following criteria:

a. lots shall have frontage on a Public Road

3.2.6.3 New Lots

3.2.6.3.1 It shall be the policy of Council to permit the development of lots, created after August 1, 1994, for non-farm dwellings by site plan approval subject to the following criteria:

a. lots shall have frontage on a Public Road; and

b. the lands to be developed are comprised of 60% poor quality soils, as identified on the 2001 Generalized Soil Capability Map or as determined by an Agricultural Suitability Report; or

c. the lands to be developed have limited potential for agricultural production by virtue of there being houses on both sides of the land, within 400 feet of each other

3.2.6.3.2 Non-farm dwellings permitted in 3.2.6.2 and 3.2.6.3 are subject to site plan approval and must conform to the following:

a. the lot, or the portion of the lot, that is to be used for a residential use will be developed in such a way that the amount of arable land that will be lost to development is minimized. For example, the development of lands close to roads rather than in the middle of croplands is viewed as preferable. Exceptions will be made only where topographic or other site constraints dictate
b. the lot, or the portion of the lot, that is to be used for a residential use will have, where necessary, vegetative buffering between it and surrounding croplands to minimize the spread of fertilizer, pesticides and other sprays. This shall be a consideration even where there is a common ownership of the lot in question and surrounding lands

c. the dwelling shall be located as close to the front lot line and one of the side lot lines as is reasonable

3.2.6.4 Agricultural Suitability Report

Council shall permit the development of lots in the Agricultural District subject to the following:

a. a non-farm dwelling may be constructed by site plan approval if an Agricultural Suitability Report demonstrates to the satisfaction of the Development Officer that a minimum of 60% of the lot is not class 2, 3 or active class 4

b. the Development Officer may circulate the report to the Nova Scotia Department of Agriculture and the Kings County Federation of Agriculture for comment and input

c. the professional preparing the Agricultural Suitability Report must have a demonstrated expertise in the area of soil science, agricultural suitability and agriculture land assessments, such as an Agrologist. The Development Officer shall require supporting documentation showing educational history, work history and any other relevant information to demonstrate expertise

d. the Report shall include the following:

  i. a map detailing the current soil classification, according to the Generalized Soil Map adopted by the Municipality, and another map showing the findings of the professional regarding the agricultural capability on the parcel in question
ii. analysis of the Canada Land Inventory (CLI) criteria and other relevant factors such as, but not limited to those below, to demonstrate why the lot in question should not be considered class 2, 3 or 4 soils. The report must use accepted and scientifically defendable approaches:

- Slope
- Climate
- Soil Classification
- Land use history
- Soil test pits, if deemed necessary
- Stoniness
- Drainage and salinity
- Other issues as required
- Location of adjacent farming activities and type

e. in the opinion of the Development Officer, if the Report submitted by the professional is incomplete or inconclusive, the Development Officer may require the report to be reviewed by another professional, at the expense of the applicant

3.2.6.5 Special Case – Lyons Branch Road, Atlanta

Notwithstanding the policies in subsection 3.2.6.1, 3.2.6.2 and 3.2.6.3 the property described in this section shall be eligible for the development of one additional non-farm dwelling upon final subdivision approval.

3.2.6.5.1 Council shall consider the development of one additional non-farm dwelling at 108 Lyons Branch Road, Atlanta. The specific limits of the site correspond with the following metes and bounds description:

BEGINNING at a point on the northbound of Atlanta Street, a public highway, leading between the Village of Sheffield Mills and the Village of Centreville, where the same is intersected by the eastbound of lands of Jack Gerrits;
THENCE North Three Degrees Zero Zero Minutes East (N 3° 00' E) a distance of Two Thousand and Thirty Feet (2,030') to a point;

THENCE North Eighty-two Degrees Zero Zero Minutes West (N 82° 00' W) a distance of Five Hundred and Twenty-two Feet (522');

THENCE North Seven Degrees Zero Zero Minutes East (N 7° 00' E) along the eastbound of lands now or formerly of Leverett Webster a distance of Three Thousand Nine Hundred Feet (3,900'), more or less to the brow of the mountain;

THENCE Easterly along the brow of the mountain in the southerly bound of lands of the Estate of William Cotter and the southerly bound of lands of Glenn Ells a distance of Two Thousand and Fifty Feet (2,050'), more or less to a point on the westbound of other lands of Glenn Ells;

THENCE in a southerly direction along westbound of the said lands of Glenn Ells a distance of One Thousand Five Hundred and Fifty Feet (1,550') more or less to the spring;

THENCE in a southerly direction following the centreline of a brook to the north line of lands of John Gerrits;

THENCE South Thirty-two Degrees Twenty Minutes West (S 32° 20' W) a distance of One Hundred and Twenty-four Feet (124');

THENCE South Three Degrees Zero Zero Minutes East (S 3° 00' E) a distance or One Hundred and Fifty Feet (150');

THENCE North Eighty-three Degrees Ten Minutes West (N 83° 10' W) a distance of One Thousand and Eighty-seven Feet (1,087');

THENCE South Three Degrees Zero Zero Minutes West (S 3° 00' W) a distance of One
Thousand Eight Hundred and Sixty-eight Feet (1,868') more or less to the northbound of Atlanta Street;

THENCE South Eighty-five Degrees Three Minutes West (S 85° 3' W) along the northbound of said highway a distance of One Hundred and Fifty-seven Feet (157') to a point;

THENCE South Seventy-five Degrees Zero Zero Minutes West (S 75° 00' W) along the northbound of the said highway a distance of Three Hundred and Ninety-five Feet (395') to the place of BEGINNING.

### 3.2.7 Industrial Uses

There are a number of industrial uses that have traditionally occurred within the Agricultural District. These include rural home occupations, inshore fishery activities, forest clearing activities, and the on-site processing of farm produce, including peat and cranberries. It is appropriate to permit these uses as-of-right in the Agricultural District. Other more intensive industrial activities are considered to be suitable in the Agricultural District, provided they will not lead to a loss of CLI Class 2, 3, or active Class 4 lands or create land use problems that are described in Part 6 of this Strategy.

### 3.2.7.1 As-of-right Industrial Uses

3.2.7.1.1 It shall be the policy of Council to permit the following industrial uses as of right within the Agricultural District:

- a. any uses permitted in the Land Use Bylaw, such as rural home occupations
- b. inshore fishery and forestry uses
- c. industrial uses that primarily serve an on-site farm operation and its products, such as processing and packaging activities; and
- d. accessory uses to the above
3.2.7.2 Non-farm Industrial Uses

3.2.7.2.1 It shall be the policy of Council to establish an Agricultural Industrial (M3) Zone in the Agricultural District.

3.2.7.2.2 Permitted uses in the Agricultural Industrial (M3) Zone shall include businesses that are involved with the processing, grading, packaging, storage, transportation of goods such as farm produce, and composting operations.

3.2.7.2.3 It shall be the policy of Council to consider rezoning lands in the Agricultural District to the Agricultural Industrial (M3) Zone subject to the conditions in 3.2.14.

3.2.7.2.4 As an exception to 3.2.7.2.3, Council shall consider amendments to the Land Use Bylaw to permit composting operations on class 2,3 or active class 4 soils as identified on the 2001 Generalized Soil Capability and Agricultural Land Use Maps of this Strategy.

3.2.7.2.5 It shall be the policy of Council to continue to apply the Agricultural Industrial (M3) Zone to properties that were under this zone prior to the last Agricultural District Review.

3.2.7.3 Non-farm Industrial – Special Uses: Construction and Demolition Debris Disposal Sites

3.2.7.3.1 It shall be the policy of Council to consider proposals to establish construction and demolition debris disposal sites in the Agricultural District by development agreement, subject to the following:

a. the conditions in 3.2.14; and

b. the conditions in 3.7.12 and 3.7.13 (Rural Common Policies)
3.2.8 Commercial Uses

There are a number of commercial uses that have traditionally occurred within the Agricultural District. These include rural home occupations, wineries, and farm market outlets. It is appropriate to permit these uses as-of-right in the Agricultural (A1) Zone. Other more intensive commercial activities, such as agri-tourism uses, are considered to be suitable in the Agricultural District, provided they will not lead to a loss of agricultural land or create land use problems that are described in Part 6 of this Strategy.

3.2.8.1 As-of-right Commercial Uses

3.2.8.1.1 It shall be the policy of Council to permit the following commercial uses as of right within the Agricultural District:

a. any uses permitted in the Land Use Bylaw, such as rural home occupations

b. wineries, farm market outlets, and other similar uses that involve the sampling and sale of wines or other foods, provided that at least 60% of the produce or primary ingredients have been cultivated on-site

c. horseback riding; and

d. accessory uses to the above

3.2.8.2 Agri-tourism Commercial Uses

As its name implies, agri-tourism is the combination of agriculture with economic activity that promotes visits to farm areas. In addition, interpretation and education of agricultural activities are often components of agri-tourism that help to give visitors a complete farm visit ‘experience’. Such activities consist of businesses that are either specifically related to farming (e.g., farm markets, wineries) or complimentary to a farm visit experience (e.g., crafts, lodging, or food service). For properties within the Agricultural District that border the Minas Basin, uses listed in 3.2.8.2.1 that are related to the fishery as opposed to Agriculture will also be permitted.
In allowing for such activities, Council intends that businesses permitted under this policy be compatible with the surrounding rural landscape. As a result, signage and architectural design are matters that will be addressed in development agreements. In addition, Council intends that such uses will not adversely affect surrounding agricultural activities by causing compatibility concerns or occupying prime agricultural land.

3.2.8.2.1 It shall be the policy of Council to permit the following agri-tourism related commercial uses by development agreement, subject to the conditions in 3.2.8.2.2:

a. antique shops, antique restoration, craft shops, craft production, wood furniture production, gift shops, and farm markets

b. wineries, farm market outlets, and other similar uses that involve the sampling and sale of wines or other foods, that are not permitted pursuant to Policy 3.2.8.1.1(b) due to the amount of produce or foods sold which are from off the farm

c. lodging

d. restaurants; and,

e. accessory uses to the above

3.2.8.2.2 In considering a development agreement enabled under 3.2.8.2.1, Council shall be satisfied that the development, its uses and any associated structures:

a. will involve the conversion of existing buildings, building additions, or new buildings in yards that are not used, or could not be reasonably used, for the cultivation of crops

b. will not create compatibility problems with any adjacent farming operations and agricultural activities that may be
undertaken, such as spraying of pesticides and the spreading of manure

c. signage will only be constructed of wood or metal. No internally illuminated signage will be permitted

d. any new buildings or building additions will be sensitive to the surrounding rural architectural style. Preference will be given to traditional cladding materials such as wood or stone. Preference will also be given to traditional roof, door and window styles of the area; and,

e. can meet all the applicable policies of this Strategy, including those in Part 6

3.2.8.3 Non-farm Commercial Uses

3.2.8.3.1 It shall be the policy of Council to enable an Agricultural Commercial (C8) Zone in the Agricultural District.

3.2.8.3.2 Permitted uses in the Agricultural Commercial (C8) Zone shall include farm markets and agricultural parts, sales and service businesses.

3.2.8.3.3 The Rural Commercial (C9) Zone is established in 3.7.7 and 3.7.8 (Rural Common Policies) of the Strategy and shall be a zone that is enabled in the Agricultural District.

3.2.8.3.4 It shall be the policy of Council to consider rezoning lands in the Agricultural District to the Agricultural Commercial (C8) Zone and the Rural Commercial (C9) Zone subject to the conditions in 3.2.14.

3.2.8.3.5 It shall be the policy of Council to continue to apply the Agricultural Commercial (C8) Zone and the Rural Commercial (C9) Zone to properties that were under these zones prior to the last Agricultural District Review.
3.2.8.4 Expansions to Rural Home Occupation Uses

3.2.8.4.1 It shall be the policy of Council to consider proposals to expand Rural Home Occupations beyond the as-of-right allowances for such uses, by development agreement.

3.2.8.4.2 In considering a development agreement enabled by 3.2.8.4.1, Council shall be satisfied that the development:

a. is an intensification of a currently permitted rural home occupation use

b. will involve the conversion of existing buildings, building additions, or new buildings in yards that are not used, or could not be reasonably used, for the cultivation of crops

c. will not limit or interfere with adjacent agricultural activities; and

d. can meet all the applicable policies of this Strategy, including those in Part 6

3.2.9 Commercial Recreation Uses

Commercial recreation uses include activities such as golf courses, driving ranges, campgrounds, and amusement parks. Such activities are encouraged to locate within the County’s other rural districts due the amount farmland that may be displaced and the potential for compatibility problems with current or future agricultural operations. However, there are allowances for these uses in the Agricultural District provided they do not lead to a loss of CLI Class 2, 3, or active 4 lands or create land use problems that are described in Part 6 of this Strategy. However, there has been an exception made to this through an allowance for a golf course in Weston (see Policy 3.2.9.2).

3.2.9.1 General Policies

3.2.9.1.1 The Recreational Open Space (P2) Zone is established in 2.6 (Urban Reclations, Parks, Open Space and Natural Environment) and Policies under subsection 3.7.8 (Rural Commercial Policies) of the Strategy and shall
be a zone that is enabled in the Agricultural District.

3.2.9.1.2 It shall be the policy of Council to consider rezoning lands in the Agricultural District to the Recreational Open Space (P2) Zone subject to the conditions in 3.2.14 (Development Agreement and Rezoning Review).

3.2.9.1.3 As an alternative to 3.2.9.1.2, it shall be the policy of Council to consider commercial recreational uses that may have noise or other types of nuisances associated with them, such as racetracks, by development agreement subject to the conditions in 3.2.14 (Development Agreement and Rezoning Review).

3.2.9.2 Special Case: Weston Golf Course Policies

Council allows for the establishment of recreational commercial uses in the Agricultural District by development agreement. In providing for those options, however, Council determined that sites identified as class 2, 3 or active class 4 soils on the 1986 Generalized Soil Capability and Agricultural Land Use Maps of this Strategy, are unsuitable for such uses. Council does intend to make one exception to this policy in order to accommodate a golf course development started in the Weston area in 1998. Because it is an exceptional case, Council has prescribed a set of policies to control the location, size and nature of the proposed golf course development.

3.2.9.2.1 Council shall consider a golf course proposal in the Weston area on lands fronting on the south side of Highway # 221 in an area generally north of Brooklyn Street, west of Long Point Road and east of McLean Road. The specific limits of the site correspond with the following metes and bounds description:

Beginning at a point in the south boundary of Highway # 221 at the northeast corner of other lands of Lorna Fulton,
3.2-20

Thence S 19 28’ 29” E, 281.74’
Thence S 75 32’ 27” W, 473.85’
Thence S 11 35’ 46” E, 299.07’
Thence S 79 20’ 44” W, 14.90’
Thence S 79 20’ 43” W, 315.44’
Thence S 32 57’ 12” E, 1480.76’
Thence S 57 23’ 27” W, 71.34’
Thence S 17 56’ 45” W, 157.91’
Thence S 33 47’ 59” E, 267.32’
Thence S 47 24’ 12” E, 388.94’
Thence S 49 21’ 28” E, 101.45’
Thence S 13 12’ 56” E, 336.63’
Thence N 74 59’ 43” E, 292.63’
Thence N 72 02’ 06” E, 554.18’
Thence N 76 34’ 21” E, 168.05’
Thence N 73 03’ 26” E 393.22’
Thence N 73 25’ 26” E, 291.50’
Thence N 72 03’ 26” E, 479.17’
Thence N 14 21’ 34”W, 271.19
Thence N 14 07’ 14” W, 387.81
Thence N 14 35’ 07” W, 1029.44
Thence N 14 52’ 37” W, 791.58’
Thence N 15 02’ 48” W, 906.39’

Thence southwesterly along the southern boundary of Highway # 221 a distance of 2068’ more or less to the place of beginning. Containing 180.8 acres more or less.

To allow for the construction and subsequent use of these lands for a golf course, Council will require that the property owner enter into a development agreement with the Municipality. Furthermore, this policy is not intended to apply to any other site other than for those lands identified pursuant to this policy.

3.2.9.2.2 Pursuant to the provisions of policy 3.2.8.2.3 as a unique exception to the goals, objectives, and other provisions of the Agricultural District section of this Strategy, and notwithstanding the policies in 3.2.9 (Commercial Recreation Uses), Policies 3.7.8.4 and 3.7.8.5 (rezoning and development agreement policies), Council may enter into a
development agreement for a golf course upon land located in Weston, as identified in policy 3.2.8.2.1 of this Strategy, subject to the following conditions:

a. proposals shall be considered only for the land currently described by the metes and bounds description referred to in this subsection

b. in addition to meeting the general requirements of Part 6 (Implementation Section) of this Strategy for amendments to the Land Use Bylaw, and those specific to development agreements as set out in Subsection 6.3.3 (Conditions of Approval of Development Agreements) of this Strategy, proposals shall only be considered for uses in keeping with the following:

- 18 hole golf course;
- club house up to a maximum of 5,000 square feet ground area for a total building area of 15,000 square feet, comprising washrooms, locker-rooms, golf equipment sales and rental, and food and beverage service facilities;
- storage and maintenance buildings.

3.2.9.2.3 In considering entering a Development Agreement, Council shall be satisfied that the applicant has demonstrated:

a. that the site is suitable for the proposed use in terms of grades, soil and geological conditions; or location relative to watercourses, and wetlands such as swamps, bogs, marshes or fens

b. that the method of sewage disposal will be appropriate to serve the development permitted
c. that sufficient quantity and quality of water is available to serve the development without negative impact on existing surface and/or groundwater supplies

d. the adequacy of existing and proposed road networks within, leading to and adjacent to the site

e. the adequacy of buffering and setbacks between the golf course and accessory uses, and any abutting resource activities or residential uses

3.2.9.2.4 In order to satisfy the criteria in Policy 3.2.9.2.3, the applicant shall, where applicable be required to provide the following for review by Staff and the Planning Advisory Committee:

a. a groundwater assessment by a qualified engineer or hydrogeologist that confirms that the proposed use will not create well interference with established uses, and confirmation of water rights approvals (surface and/or ground) from Nova Scotia Environment to serve the entire development, including irrigation requirements

b. a report prepared by a qualified engineer outlining the proposed method of sewage disposal including a maintenance program with comments from the appropriate approval agency

c. a storm water management plan

d. site plans for inclusion in the Development Agreement indicating the location of buildings, roads, driveways, accesses, parking areas, vegetative buffers, waste storage, lighting and signage, fencing, location of waste water treatment system, storm water
management plans including detention ponds, berms, ditches, and culverts

e. a detailed description of the pest and weed management program including types and volumes of fertilizers, pesticide and herbicide application, and provisions to prevent contamination of watercourses and wetlands

f. any other information necessary to determine and ensure conformity of the proposed development with the policies of this Strategy

3.2.10 Community Facility and Institutional Uses

In this Strategy, Municipal Council makes a distinction between community facilities and institutional uses. Community facilities are generally uses that serve a community function to a local area, such as churches and community centres. Institutional uses are characterized as government uses such as schools that may serve a large population. Small community facilities are seen as appropriate uses in the Agricultural (A1) Zone, as-of-right. Larger community facilities, such as post offices and institutional uses are viewed as appropriate uses within the County’s Hamlets, Growth Centres and other Rural Districts. However, there has been an exception made to this policy through an allowance for a High School (see Policy 3.2.10.3).

3.2.10.1 Community Facility Uses

3.2.10.1.1 It shall be the policy of Council to permit community facilities uses that serve small local areas and which are only used from time-to-time, such as community centres, churches, local parks, and fire stations as-of-right.

3.2.10.1.2 It shall be the policy of Council to establish a 300 foot minimum separation distance requirement in the Land Use Bylaw for new uses described in 3.2.10.1.1, and adjacent commercial livestock barns.

3.2.10.1.3 It shall be the policy of Council to establish buffering and other similar requirements in the
Land Use Bylaw for a new community facility and any adjacent active agricultural lands.

3.2.10.2 Institutional Uses

3.2.10.2.1 It shall be the policy of Council to encourage institutional uses to be located outside of the Agricultural District and in accordance with other policies of this Municipal Planning Strategy.

3.2.10.3 Institutional Uses – Special Case: Horton High School Policies

The Nova Scotia Department of Education and Culture and the Annapolis Valley Regional School Board selected a consortium called ACCESS TECHNOLOGIES through a competitive tender process to build, own, finance and operate a new Horton District High School as a public/private partnership.

In 1997, a site was selected by a committee consisting of members of the Horton Steering Committee established by the School Board, Access Technologies and the Department of Education and Culture. The school will be a leading edge technology-rich school for 1,050 students. The committee found that the Greenwich interchange of the Highway # 101 is ideally located relative to the School District boundary as well as highly accessible and visible.

The Municipal Planning Strategy encourages Institutional Uses to locate in Growth Centres on lands that are subject to separation from intensive livestock operations and to reduce the impact on agricultural activities. The Horton Steering Committee has chosen a site in the Agricultural District where the priority for land use is agriculture. The particular site for the School is not currently reserved for agricultural uses, nor is it subject to the Agricultural (A1) Zone. The Site has previously been designated for a future resort development expansion pursuant to the Resort Comprehensive Development District policies contained in Subsection 4.4.14 of this Strategy. Redesignation of the site to Institutional on the Future Land Use map will clarify the intended future land use.
3.2.10.3.1 It shall be the policy of Council to designate lands west of the Old Orchard Inn located at the South-West corner of the Greenwich interchange of Highway #101 Institutional on the Future Land Use Map and zone the land Institutional (I1) Zone in the Land Use Bylaw.

3.2.11 Grand Pré Heritage Conservation District

In 1999, Council adopted a Heritage Conservation District Plan, Bylaw, and Design Guidelines pursuant to the Heritage Property Act, affecting lands in and around the community of Grand Pré. Some properties that are located in the Agricultural District around Grand Pré are included in the Heritage Conservation District and others are eligible to be included.

Policies specific to development in Grand Pré are set out in the Hamlet Historic Residential District section of this Strategy.

3.2.11.1 Policies

3.2.11.1.1 It is the policy of Council that when considering policies affecting lands around Grand Pré, to have regard to the goals and policies for Heritage Conservation as outlined in the Heritage Conservation District Plan.

3.2.12 Subdivision

Subdivision policies deter speculative land development and provide an opportunity for agriculture to have priority on lands lying beyond existing roads. The subdivision of land in the Agricultural District is limited to one additional lot per calendar year per parcel and such new lots must have road frontage on existing roads.

3.2.12.1 Policies

3.2.12.1.1 It shall be the policy of Council to restrict the subdivision of a parcel or lot of land located within the Agricultural District to one additional lot within a calendar year where the lot abuts a road listed by the Nova Scotia Department of Transportation and Infrastructure Renewal subject to the requirements of the Subdivision Bylaw and the Land Use Bylaw.
3.2.13 Resource Protection

Municipal Council is concerned about the detrimental impact that both farm and non-farm development may have on the quality and availability of resources such as water and topsoil. With respect to water quality, Council intends to establish policies concerning manure disposal associated with commercial livestock barns, in 3.2.5.2. In addition, Part 6 of this Strategy contains conditions concerning the impact on water supply and the potential for pollution that are to be addressed when rezonings and development agreements are evaluated.

Topsoil removal has been a longstanding concern in the Municipality. Municipal Council has established policies and regulations that prohibit the removal of topsoil in the Agricultural (A1) Zone due to its importance for cultivation. In other zones, restrictions have been enacted to ensure that topsoil removal is carried out in a reasonable manner.

3.2.13.1 Topsoil Removal Policies

3.2.13.1.1 It shall be the policy of Council to prohibit the removal of topsoil in the Agricultural (A1) Zone in keeping with 4.7 (Topsoil Removal) of the Strategy.

3.2.14 Development Agreement and Rezoning Review

In a variety of circumstances described in this section of the Strategy, Municipal Council will consider non-farm developments in the Agricultural District by rezoning or development agreement. However, these developments will only be favourably considered where they will not lead to a loss of CLI Class 2, 3, or active 4 lands, or create land use problems that are described in Part 6 of this Strategy.

3.2.14.1 Policies

3.2.14.1.1 In considering proposals enabled in policy and which refer to this Sub-section (3.2.14), Council shall be satisfied that a development:

a. will not be located on class 2 or 3 soils as identified on the 2001 Generalized Soil Capability Map of this Strategy

b. will not be located on active class 4 agricultural land as illustrated on the
3.2.15 Financial Impacts and Land Banking

Municipal Council recognizes that individual property owners may view its farmland preservation planning policies and regulations as a severe limitation on development. It also understands that the impetus to convert agricultural land to non-farm uses is often due to a desire to raise retirement or other short-term income. However, the development of farmland for non-farm uses is irreversible and precludes farming activities for future generations. In recognizing this problem, Council believes that initiatives such as land banking programs are an important accompaniment to its farmland preservation planning policies and regulations.

3.2.15.1 Policies

3.2.15.1.1 It shall be the policy of Council to work with stakeholders to:

a. examine the financial impact that agricultural land preservation policies and regulations have on property owners; and,

b. where warranted, to assist in the development of land banking or other financial incentive programs to help retain farmland for farming uses

3.2.16 Existing Zones not Enabled in the Agricultural District

There are a number of non-agricultural uses that were established prior to the adoption of the Kings County Municipal Development Plan (Municipal Planning Strategy) and Land Use Bylaw (1979) and assigned zones that are no longer enabled by the current Municipal Planning Strategy. Council intends to continue to maintain the existing zones on these properties.
3.2.16.1 Policy

3.2.16.1.1 It shall be the policy of Council to maintain the zones over any isolated non-agricultural uses that were assigned zones that are no longer enabled in this Municipal Planning Strategy, but which were established under the Kings County Municipal Development Plan (Municipal Planning Strategy) and Land Use Bylaw (1979).

3.2.17 Farming Outside the Agricultural District

Not all agriculture in Kings County takes place within the Agricultural District. Significant farming activity also takes place in the Forestry District, Country Residential District and even in certain Growth Centres and Hamlets. Municipal Council recognizes the contribution of this farming activity to agriculture within the Municipality. Council also recognizes that compatibility and preservation issues can arise from agriculture in areas where it does not have the protection afforded within the Agricultural District.

3.2.17.1 Policy

3.2.17.1.1 It shall be the policy of Council to recognize the high value of Cornwallis Soils lands and certain boglands for agriculture. Council shall seek to protect these lands for agriculture by means other than including them in the Agricultural District. These means may include encouraging the Province of Nova Scotia to use financial incentives such as land banking and the purchasing of development rights.

3.3 FORESTRY DISTRICTS

Seventy-one percent of Kings County is forested, primarily on the North and South Mountains. Approximately 60 percent of this land is in small private holdings, 27 percent in large private holdings (pulp companies) and the remainder is provincial Crown Land. However, these figures may change considerably as pulp and lumber companies are continuously purchasing more forested land as it becomes available.

Wildlife habitat and recreational opportunities are a valuable asset of forested land. The numerous lakes and vast expanse of forest in the County provides a habitat for a wide variety of wildlife common to the province. Outdoor recreational activities have also taken on greater significance with more participants involved in snowmobiling, cross country skiing, canoeing, hiking, and camping.

In response to the increase in recreation and leisure activity several private and public camping parks have established in the Forestry District. Cottage development and other seasonal uses have also established in the Forestry District around lakes on private roads. Council's policies for such development are set out in the Shoreland District section of this Strategy.

Not all lakes in the Forestry Districts have been designated for Shoreland development. The lakes with the highest potential for recreational opportunities and expected ability to sustain development due to their size were designated.

To encourage cottage development on lands around lakes intended for such development and reduce the potential for speculative lake shore development in the Forestry Districts subdivision shall be limited to one lot per year on lands around lakes in the Forestry District.

Much of the land in the forested area on the North and South Mountain is classed as having high capability soils for forestry on the Canada Land Inventory Maps. These are the most productive soil classes found in the province. This combined with the fact that pulp and lumber companies are continuously purchasing more forested land emphasizes the increasing importance of this resource. Council intends the Forestry Districts designation to include most of the forested area on the North and South Mountains.

Within the Forestry Districts, Council's policies place a dominant emphasis on resource production and associated industrial development. New permanent residential uses are permitted along existing public roads as a rural residential option. However, Council will not promote the Forestry District for residential development. Likewise, provisions for commercial, and community and recreation facilities are aimed at permitting a minimum level of basic conveniences for rural residents.

In the interests of public health minimum lot size requirements have been established to protect the groundwater resources from development impacts. These were established in consultation with the Nova Scotia Department of Health and Nova Scotia Environment.
Separation distances between residential uses and resource uses are intended to reduce the potential for conflict between such uses.

All forms of agricultural uses will be permitted in the Forestry Districts. Special policy provisions are included which are designed to protect existing agricultural operations from encroachment by non-resource related uses.

Community facilities which offer support services to residential areas will be encouraged to locate in urban areas or where concentrations of rural residential uses occur such as Hamlets to support the goal of preserving the resource base of the County. Consequently, community centres, public health clinics, and fire stations are intended to locate in Growth Centres, Hamlets and Country Residential Districts where they will be accessible to the greatest number of people.

Therefore, in the Forestry District where resource development is the priority, and residential uses considered secondary provision, Council shall only consider community facilities by amendment to the Land Use Bylaw.

### 3.3.1 Forestry Districts – Objectives

- **3.3.1.1** To designate high forest capability lands as Forestry Districts.

- **3.3.1.2** To establish provisions for forestry and agricultural uses as the first priority in the Forestry Districts.

- **3.3.1.3** To accommodate residential development at a limited density in limited locations.

- **3.3.1.4** To provide for a limited range of local convenience, commercial, industrial, recreational uses and community facilities.

- **3.3.1.5** To provide for a distance separation between incompatible uses.

- **3.3.1.6** To discourage urban and shoreland development intended for other Districts.

### 3.3.2 Forestry Districts - General Policies

- **3.3.2.1** Council shall establish a "Forestry Districts" (F) designation. This designation will be generally applied to lands primarily located on the North and South Mountains containing 60% or greater class 3, 4 and 5 capability soils for forestry according to the Canada Land Inventory Maps. Additional lands in the
Valley between the mountains may be designated Forestry Districts if they are not identified as prime agricultural areas.

3.3.2.2 Council intends to give precedence to uses related to forest harvesting and reforestation operations, forestry industries and related land uses, over all other permitted land uses in the Forestry Districts.

3.3.2.3 Council shall establish the Forestry (F1) Zone in the Land Use Bylaw. The majority of land in the Forestry Districts will be zoned F1. The following other zones may be permitted subject to a site specific amendment to the Land Use Bylaw in accordance with the relevant policies of this Strategy:

a. Rural Commercial (C9)

b. Resource Industrial (M4)

c. Resource Extraction (M7)

d. Salvage Yard Industrial (M6)

e. Community Facilities (CF)

f. Highway Commercial (C11)

g. Resort Comprehensive Development (C12)

h. Parkland (P1)

i. Recreational Open Space (P2)

j. Environmental Open Space (O1)

k. Water Supply (O2)

l. Transportation Utilities (T1)

m. Airport Height Restriction (T2) Overlay

3.3.2.4 The following uses will be permitted uses in the F1 Zone:

a. resource related uses including livestock

b. residential one and two unit dwellings and residential care facilities
c. seasonal dwellings

d. Accessory Residential Uses as defined in Section 3.7 of this Strategy

e. existing uses

f. parks, open space and non-profit camps

g. tourist commercial facilities for lodging, food services, and ancillary uses subject to the provisions of Section 4.4.9 of this Strategy and Section 10.1.5 of the Land Use Bylaw

3.3.2.5 The Land Use Bylaw may be amended to allow additional uses where such uses are consistent with the policies of this Strategy.

3.3.2.6 Council shall establish standards in the Land Use Bylaw to reduce possible conflicts between uses permitted in the F1 Zone. Such standards may include separation distances between uses, buffering and screening requirements and building setbacks.

3.3.2.7 Council shall permit the continuation of identified non-conforming uses within the Forestry Districts in compliance with the Rural Non-Conforming Use Policies, in Section 3.7 of this Strategy.

3.3.2.8 The following uses may be considered subject to a Development Agreement in accordance with the policies of this Strategy and the Municipal Government Act:

a. Day Care Facilities as provided for in Policy 3.7.2.4

b. Recreational Commercial uses as provided for in Policy 3.7.8.5

c. expansion of Non-Conforming Uses as provided for in Section 3.7

d. reuse of heritage properties as provided for in Subsection 4.4.4

e. tourist related commercial uses at Tourist Destination Areas as provided for in Section 4.4.8
f. tourist commercial facilities for lodging, food services, and ancillary uses subject to the provisions of Section 4.4.8 of this Strategy and Section 10.1.5 of the Land Use Bylaw

g. agri-tourism commercial uses as provided for in Subsection 3.3.3.4

3.3.3 Forestry Districts - Commercial Policies

3.3.3.1 Council intends to limit commercial development in the Forestry District. However, Council may consider amendments to the Land Use Bylaw to permit Rural or Convenience Commercial uses. Such amendments will be subject to the Rural Common Policies of Section 3.7. Tourist uses may be permitted by Development Agreement pursuant to the policies contained in Subsection 4.4.8 pertaining to Tourist Destination Points where applicable.

3.3.3.2 Council may permit Recreational Open Space, Recreational Commercial uses or Highway Commercial uses pursuant to the policies of Subsection 3.7.8.

3.3.3.3 Resort Comprehensive Development District policies of Subsection 4.4.14 of this Strategy also apply to lands designated Forestry Districts.

3.3.3.4 Council recognizes that agri-tourism commercial uses are a popular form of farm diversification. It shall be the policy of Council to permit the following agri-tourism related commercial uses by development agreement, subject to the conditions in 3.3.3.5, in the Forestry (F1) Zone:

a. antique shops, antique restoration, craft shops, craft production, wood furniture production, and gift shops;

b. farm museum; and

c. accessory uses to the above.

3.3.3.5 In considering a development agreement enabled under 3.3.3.4, Council shall be satisfied that the development, its uses, and any associated structures:

a. will not create compatibility problems with any adjacent farming operations and agricultural activities that may
be undertaken, such as spraying of pesticides and the spreading of manure;

b. signage will only be constructed of wood or metal. No internally illuminated signage will be permitted;

c. any new buildings or building additions will be sensitive to the surrounding rural architectural style. Preference will be given to traditional cladding materials such as wood or stone. Preference will also be given to traditional roof, door, and window styles of the area;

d. uses shall be associated with new or existing agricultural use permitted in the Forestry (F1) Zone; and

e. can meet all the applicable policies of this Strategy, including those in Part 6.

3.3.4 Forestry Districts - Industrial Policies

3.3.4.1 Council may consider proposals to rezone lands in the Forestry Districts to permit the development of agricultural, forestry, fishing and aggregate related industries. Amendments to the Land Use Bylaw to rezone lands to Resource Industrial (M4) shall be in accordance with the Common Rural Policies Section 3.7 of this Strategy.

3.3.4.2 In addition to considering the Rural Common Policies of Section 3.7, Council shall consider the following in amending the Land Use Bylaw to Resource Industrial (M4):

a. a minimum distance separation of 500 feet is maintained between lands being rezoned M4 and any residential use

b. a minimum 1,000 foot separation from land within a Growth Centre or Hamlet designated for residential, institutional, or open space uses

c. proposal can meet all applicable policies including the policies for amending the Land Use Bylaw contained in Part 6, of this Strategy

3.3.4.3 Council may consider proposals to rezone lands in the Forestry Districts for Resource Extraction use. Amendments to the Land Use Bylaw to rezone lands Resource Extraction
(M7) shall be in accordance with the policies contained in Part 5 and the policies for amending the Land Use Bylaw contained in Part 6 of this Strategy.

3.3.4.4 Council may consider proposals to rezone lands for Salvage Yard purposes. Amendments to the Land Use Bylaw to rezone lands Salvage Yard Industrial (M6) shall be in accordance with the Rural Common policies contained in Section 3.7 and the policies for amending the Land Use Bylaw contained in Part 6 of this Strategy.

3.3.4.5 Council may consider proposals to establish construction and demolition debris disposal sites by development agreement in accordance with the Rural Common Policies Subsection 3.7.12 of this Strategy.

3.3.4.6 Council may consider proposals for excavation company related industrial uses involving the transportation and storage of extracted materials and fleet maintenance, by way of a development agreement, subject to the conditions contained in Part 6 of this Strategy.

3.3.4.7 In satisfying the requirements in Policy 3.3.4.6, by addressing the conditions contained in Part 6, Council shall be satisfied that the development agreement has sufficient provisions addressing:

a. the amount and location of extracted materials to be stored

b. nuisance created by the processing of extracted materials

c. hours of operation, with restrictions or a prohibition on activities in the evenings and weekends where warranted

3.3.5 Forestry Districts – Subdivisions

3.3.5.1 Council shall limit subdivision of land for residential development to lands with frontage on an existing public road. The Land Use Bylaw shall include a minimum lot size for residential uses in the F1 Zone to ensure lots are of sufficient size to accommodate on site services and to maintain the low density rural character.
3.3.5.2 Council intends to restrict the subdivision of any lot within 1,000 feet of an inland lake in the Forestry District to one additional lot within a calendar year (see Subdivision Bylaw)

3.3.6 Forestry Districts - Community Facilities

3.3.6.1 Council intends to encourage Community Facilities to locate in Growth Centres and Hamlets. However, Council shall also establish provisions for application of the Community Facilities (CF) Zone established in Urban Policy 2.5.3.1 in the Forestry Districts. This zone will be used for proposals to locate facilities such as, but not limited to, community centres, fire stations and churches which may be considered subject to an amendment to the Land Use Bylaw.

3.3.6.2 In considering proposals to rezone lands to the Community Facility (CF) Zone in the Forestry District, Council shall be satisfied that the following conditions are met:

a. the lot is located on a rural collector road

b. the property is capable of meeting the minimum requirements of the CF Zone

c. the proposal can meet all other applicable policies of this Strategy, including those relating to residential uses in proximity to livestock operations, and policies for amending the Land Use Bylaw, contained in Part 6 of this Strategy

Lands on the fringe of Growth Centres or Hamlets will not be considered appropriate sites for Community Facilities. Council's intent is to provide opportunities for Community Facilities serving more than one Growth Centre or Hamlet or isolated pockets of development which cannot be served by Growth Centre or Hamlet facilities.

3.3.7 Agriculture and Livestock Operations

3.3.7.1 Council shall permit in the Forestry Districts all agricultural uses as provided for, and in accordance with, the Agricultural Districts Subsection 3.2.4 and Policies 3.2.5.1 to 3.2.5.3.
3.3.8  Forestry Districts - Parks and Open Space

3.3.8.1 Public parks will be permitted uses in the Forestry (F1) Zone. Notwithstanding, large parks may be zoned Parkland (P1) which was established in the Urban policies contained in Section 2.6.

3.3.8.2 Recreational Open Space and Recreational Commercial will require an amendment to the Land Use Bylaw or a Development Agreement in accordance with Rural Common Policies, Subsection 3.7.8.

3.3.8.3 Environmental Open Space and Water Supply areas may be zoned 01 or 02 respectively as provided for in the General Planning Policies dealing with the Natural Environment, Section 4.2.

3.3.9  Forestry Districts on the South Mountain

3.3.9.1 Development of lands adjacent to freshwater lakes in the watersheds of the South Mountain or tributary streams and water courses draining into such freshwater lakes, shall in addition to the requirements of the Forestry District Policies and applicable zones, be subject to additional requirements set out in the Shoreland District policies, Section 3.5 of this Strategy.

3.4 COUNTRY RESIDENTIAL DISTRICTS

In establishing Country Residential Districts the Strategy reflects two goals. One, is to provide opportunities for rural residential development as an alternative to serviced Growth Centres. The second goal is to accommodate non-residential resource development.

The mix of uses intended for Country Residential Districts may result in land use conflicts. Residents, for example, could expect to find agricultural, forestry and aggregate extraction related uses on adjacent lands. For example, sawmills and feedmills may locate within a Country Residential District. Processing industries associated with the primary resource activities are permitted as it is logical to locate such uses close to the resource base.

Country Residential Districts will be low in density and will not require or justify the installation or extension of public services (other than those which are normally provided in the rural areas). Although residential development is permitted in the Country Residential Districts, there are few restrictions placed on the resource related uses that may surround them.

Although residents seeking a rural lifestyle must be prepared to co-exist with traditional rural uses, some separation of uses is desirable. Therefore, the Country Residential District policies include minimum lot standards and require separation distances between existing residential uses and agricultural, forestry or aggregate processing industries.

Uses, such as Community or Commercial Facilities and public parks should not be expected, but will not be prohibited.

Although not protected to the extent of the Agricultural and Forestry resource capability, industrial minerals such as sand, gravel and aggregate reserves are finite and valuable components of economic development. Extraction of minerals is not within the County's jurisdiction under planning legislation. However, Council can control related uses such as processing plants. The policies provide for a special industrial zone that only permits extraction related uses. Use of the extraction Industrial Zone is intended to ensure proposals for future reuse of an extraction site is considered in relation to the policies of this Strategy and compatibility with surrounding uses.

Prior to permitting industrial uses in the Country Residential District, proponents may be required to satisfy Council that the well water needs of a proposed use will not create well interference with existing uses. A hydrogeological assessment of groundwater quality and prediction of the potential affect of the proposed use may be required to be undertaken by the applicant. While Council's goal is to optimize natural resource and secondary processing opportunities, it is not intended to undermine the quality of residential life or public health.
3.4.1 Country Residential Districts – Objectives

3.4.1.1 To designate areas with low resource capability and suitable for rural residential development, community facilities and local commercial conveniences.

3.4.1.2 To establish standards to reflect both on-site servicing capability of designated areas and retain the rural character.

3.4.1.3 To accommodate resource industries and support services.

3.4.1.4 To establish criteria to ensure adequate separation is maintained between established residential areas and industrial uses.

3.4.1.5 To maintain the visual quality of the rural landscape.

3.4.1.6 To accommodate secondary processing industries near the source of raw agricultural, timber or aggregate products.

3.4.1.7 To direct new secondary processing industries to situate away from established residential areas and community facilities.

3.4.2 Country Residential Districts - General Policies

3.4.2.1 Council shall establish a "Country Residential" (CR) District designation. This designation is intended to provide an alternative to urban residential development, but resource related uses will also be permitted. Land with medium or low resource value for agriculture or forestry will be designated Country Residential on the County Future Land Use Map. The designation will be based on the following:

a. Canada Land Inventory (C.L.I) soil capability for agriculture and forestry

b. existing land use pattern

c. C.L.I. land capability for wildlife and recreation

d. soil capability for on-site septic disposal systems

e. known or potential deposits for sand and gravel extraction

f. natural features and wildlife areas identified on the Natural Areas Information Map # 24
3.4.2.2 Council shall establish the Country Residential (R6) Zone in the Land Use Bylaw. Permitted uses in the R6 Zone shall include:

a. one and two unit residential uses

b. Residential Care Facilities as defined in Urban Policy 2.5.4.2

c. Accessory Residential Uses as defined in Section 3.7 of this Strategy

d. public parks

e. existing uses

f. resource uses

g. non-profit camps and seasonal dwellings

h. tourist commercial facilities for lodging, food services, and ancillary uses subject to the provisions of Section 4.4.9 of this Strategy and Section 10.1.5 of the Land Use Bylaw

3.4.2.3 The following uses may be permitted subject to conditions to ensure the rural character of the district is maintained and to address compatibility of uses:

a. livestock operations, kennels and zoos

b. farm market outlets

c. farm tenement and bunkhouse accommodations

d. Rural Accessory Residential Uses as defined in Subsection 3.7.2 of this Strategy

3.4.2.4 The Land Use Bylaw shall specify a minimum lot size of 50,000 square feet and a minimum road frontage of 200 feet. This requirement is intended to ensure:

a. lots will be of sufficient size to accommodate on-site septic systems and private wells

b. ensure a low density settlement pattern to protect privacy
c. reduce the possibility of negative impacts to the ground water reserves due to the cumulative effect of individually sited services

Notwithstanding the above, the bylaw shall specify a much greater minimum lot size for feed lots.

3.4.2.5 Permitted zones in the Country Residential Districts, in accordance with the relevant section of this Strategy are as follows:

a. Rural Commercial (C9)

b. Agricultural Industrial (M3)

c. Resource Industrial (M4)

d. Highway Commercial (C11)

e. Resource Extraction (M7)

f. Environmental Open Space (01)

g. Recreational Open Space (P2)

h. Resort Comprehensive Development (C12)

i. Salvage Yard Industrial (M6)

j. Community Facilities (CF)

3.4.2.6 The Land Use Bylaw may be amended to allow additional uses where such uses are consistent with the policies of this Strategy.

3.4.2.7 The following uses may be permitted subject to a Development Agreement in accordance with the policies of this Strategy and the provisions of the Municipal Government Act:

a. Day Care Facilities as provided for in Policy 3.7.2.4

b. Recreational Commercial uses as provided for in Policy 3.7.8.5
c. Expansion of Rural Non-Conforming uses as provided for in Subsection 3.7.10

d. Use of Heritage properties as provided for in Subsection 4.4.6

e. Tourist related commercial uses at Tourist Destination Areas as provided for in Subsection 4.4.8

f. Mobile Home Parks as provided for in Section 3.4.3

g. Tourist commercial facilities for lodging, food services and ancillary uses subject to the provisions of Section 4.4.8 of this Strategy and Section 10.1.5 of the Land Use Bylaw

h. Private and/or public institutional uses as provided for in Subsection 3.4.9

3.4.3 Country Residential Districts - Mobile Home Parks

3.4.3.1 Council may permit Mobile Home Parks in Country Residential Districts by Development Agreement under the provisions of the Municipal Government Act. In considering entering a development agreement, Council shall have regard to the following:

a. mobile home park development will be limited to those Country Residential Districts located adjacent to Growth Centres to ensure park residents have access to urban amenities such as educational, commercial and recreation facilities

b. yards, fences, walls or vegetative screening shall be provided between the mobile home park and the surrounding area to achieve an attractive development and reduce the impact of lighting and noise on surrounding uses. In particular, off street parking areas for storage and collection of refuse shall be screened from the view of surrounding areas and the travelling public

c. the site is suitable for on-site servicing as determined by the Nova Scotia Department of Health

d. any lot approved for mobile home parks must have a minimum lot area of two (2) acres
e. the proposed densities for a mobile home park shall not exceed six (6) mobile home units per gross acre

f. the site is capable of accommodating the development in accordance with the Mobile Home Parks Bylaw

g. the proposal can meet all other applicable policies of this Strategy including policies for approval of Development Agreements contained in Part 6 of this Strategy

3.4.4 Country Residential Districts - Commercial Development

3.4.4.1 As Council intends to provide for and encourage commercial uses primarily in the designated Growth Centres, opportunities in the Country Residential Districts will be limited. However, Council shall consider proposals for Rural Commercial uses or Highway Commercial uses subject to an amendment to the Land Use Bylaw. In considering applications, Council shall have regard to the policies in the Rural Common Policies of Section 3.7.

3.4.4.2 Tourist related uses may be permitted by Development Agreement subject to the policies in Subsection 4.4.8 pertaining to Tourist Destination Points.

3.4.5 Country Residential Districts – Subdivisions

3.4.5.1 It shall be the policy of Council to include provisions in the Subdivision Bylaw requiring subdividers to reserve rights-of-way to maintain future access to backlands and ensure the development of a comprehensive road network within Country Residential Districts, thus ensuring adequate accommodation of future resource and residential development.

3.4.6 Country Residential Districts - Industrial Development

3.4.6.1 In the Country Residential District, Council may consider proposals to rezone lands for resource industrial uses pursuant to the policies contained in the Rural Common Policies of Section 3.7 of this Strategy.

3.4.6.2 In addition to those common rural policies providing for resource industrial uses, the proposed site must satisfy the following criteria in the Country Residential Districts:
a. the subject site should be at least 2,000 feet from any residential lot shown on an approved or in process subdivision plan

b. the nearest residential use must be at least 2,000 feet from the site

In considering rezoning proposals, Council shall require a proponent to have prepared a groundwater assessment by a qualified hydrogeologist satisfying Council if recommended by and in consultation with Nova Scotia Environment and/or the Department of Health that confirms that the proposed use will not create well interference on existing uses. This requirement may be waived for industries which do not generate industrial waste such as liquid, chemical and solid residue or by-product of an industrial process.

3.4.6.3 Existing Salvage Yards shall be zoned Salvage Yard Industrial (M6). The establishment of new Salvage Yards shall be in accordance with the Rural Common policies in Subsection 3.7.6.

3.4.6.4 Council shall provide for industrial opportunities for land at 323 Cambridge Mountain Road, PID Nos. 55283121 (approx. 6.6 acres) and 55166409 (approx. 4.05 acres), currently occupied by Howard Little Excavating Limited, under the provisions of policy 3.4.16.

3.4.7 Country Residential Districts - Agriculture and Livestock Operations

3.4.7.1 In the Country Residential Districts Council shall permit all agricultural uses as provided for, and in accordance with, Subsection 3.2.4 and Policies 3.2.5.1 - 3.2.5.3.

3.4.8 Country Residential Districts - Parks and Open Space

3.4.8.1 Council shall provide for the development of parks in the Country Residential District. Parks will be permitted in the Country Residential (CR) Zone without the necessity of a Land Use Bylaw amendment.

3.4.8.2 Recreational Open Space or Recreational Commercial uses will require an amendment to the Land Use Bylaw or a Development Agreement as appropriate and in accordance with Rural Common Policies, Subsection 3.7.8.
3.4.8.3 Environmental Open Space and Water Supply areas may be zoned 01 or 02 respectively as provided for in The General Planning Policies of Section 4.2 dealing with the Natural Environment.

3.4.9 Country Residential Districts - Community Facilities and Institutional Uses

3.4.9.1 The Community Facilities (CF) Zone which was established in Part 2 of this Strategy is a permitted zone in the Country Residential District.

3.4.9.2 Council intends to encourage Community Facilities to locate in Growth Centres and Hamlets. However, Council shall also establish provisions for application of the Community Facilities (CF) Zone established in Urban Policy 2.5.3.1 in the Country Residential Districts. This zone will be used for proposals to locate facilities such as community centres, fire stations and churches which may be considered subject to an amendment to the Land Use Bylaw.

3.4.9.3 In considering proposals to rezone lands to the Community Facility (CF) Zone in the Country Residential District, Council shall be satisfied that the following conditions are met:

a. the lot is located on a rural collector road

b. the property is capable of meeting the minimum requirements of the CF Zone

c. the proposal can meet all other applicable policies of this Strategy, and policies for amending the Land Use Bylaw, contained in Part 6 of this Strategy

Lands on the fringe of Growth Centres or Hamlets will not be considered appropriate sites for Community Facilities. Council's intent is to provide opportunities for Community Facilities serving more than one Growth Centre or Hamlet or isolated pockets of development which cannot be served by Growth Centre or Hamlet facilities.

3.4.9.4 It shall be the policy of Council to consider the establishment of the following private and/or public institutional uses in the Country Residential District and Country Residential (R6) Zone by development agreement, subject to the policies of
this Strategy and the provisions of the *Municipal Government Act*:

a. addictions rehabilitation and counselling centre

### 3.4.9.5

In considering a development agreement enabled through Policy 3.4.9.4, Council shall have regard for the following criteria:

a. There is frontage or direct access to a rural or major collector road.

b. The privacy of adjacent dwellings will be maintained through the provision of natural or artificial buffering.

c. The architectural design and landscaping of the buildings will be compatible with the character of the residential neighbourhood.

d. The building does not interfere with the sunlight received by adjacent dwellings.

e. The building is located at a sufficient distance from the property line and/or adjacent dwellings, and the design is such so as not to interfere with the privacy of adjacent dwellings.

f. Central (municipal or community) water is required and sufficient to accommodate the proposal.

g. On-site sewer or central (municipal or community) sewer services are sufficient to meet the needs of the proposed use.

h. Signage for the proposed use shall be limited to a single sign not exceeding a maximum sign area of six (6) square feet.

i. The proposed use must, as a minimum, meet the lot size, lot coverage, frontage, parking and yard requirements of the Institutional (I1) Zone. In addition, parking areas shall be located to the side or rear of the building in clearly defined parking areas.

### 3.4.9.6

It shall be the policy of Council that the agreement referred to in Policy 3.4.9.4 shall be accompanied by a site plan,
prepared by a qualified person, showing the proposed site characteristics including landscaping, buffering and location of buildings, and that the development of land will be in accordance with the site plan. The conditions of the agreement may regulate any of the following and other conditions Council may deem necessary:

a. Landscaping including natural or artificial buffering to reduce potential conflict.

b. Architectural compatibility with adjacent residential uses in terms of design, scale and building materials.

c. Access, traffic circulation, and parking.

d. Maximum number of overnight participants.

e. Minimum size of lot.

f. Location, height, number of stories, area, and bulk of buildings and other structures.

g. Sign location.

h. Percentage of land that may be built upon, and the size of yards, courts and other open spaces.

i. The provision of services and utilities.

j. Hours of operation.

k. Any other similar matters which Council feels necessary to ensure the general compatibility of the use with adjacent residential uses.

3.4.10 Unique Country Residential Districts Areas - Habitant

Habitant has been designated Country Residential on the Future Land Use maps. Although it is not the intent to install services in Country Residential Districts, a central sewer system has been installed.

Habitant is essentially a strip of residential development between Canning and the Habitant Cemetery. When a central sewer system was installed in Canning, it was extended eastward along Highway # 221 to include Habitant to serve existing residential development. Although lands back from the road are farmed, most of the frontage is developed leaving several
building lots vacant. Because the residential uses are established and as the area is now serviced it has been designated Country Residential.

As central sewerage services are available and only a modest amount of infilling is possible, the lot size requirements may be reduced. However, to minimize further encroachment upon the agricultural uses, new residential development will be limited to infilling along the road frontage where sewer services are available.

3.4.11 Habitant Policies

3.4.11.1 Council intends to maintain the low rural density of lands serviced with central sewer along Highway # 221 and the Pereau Road in the Country Residential District known locally as Habitant. These lands are located between the Growth Centre of Canning along Highway # 221 to the Habitant cemetery and along the Pereau Road to a point approximately 430 feet west of the Pereau Branch Road. Council intends to allow infilling by reducing the lot size requirements along the serviced portion of Route # 221 and the Pereau Road.

3.4.12 Country Residential Districts on the South Mountain

3.4.12.1 Development of lands which are drained by tributary streams and water courses into freshwater lakes in the watersheds of the South Mountain shall in addition to the requirements of the Country Residential District Policies and applicable zones, be subject to additional requirements set out in the Shoreland District policies, Section 3.5 of this Strategy.

3.4.13 Country Residential Resort Districts

In 1996, a large residential, commercial and recreational resort proposal for lands on the north side of McNally Road near Morden was presented to Council. Council considered the project to be a unique opportunity for enhanced tourism opportunities within the County. It was found that the project could not be accommodated through conventional planning tools and techniques due to the proposed mix of uses and ownership arrangement. For this reason it was determined that the Comprehensive Development District concept as provided for in the Municipal Government Act offers the most flexibility to set out appropriate development standards.

The option to develop a resort under this policy would be considered for lands within the County’s Country Residential Districts. The resort
districts will be known as Country Residential Resort Districts (CRR). It is Council’s intent that the project presented in 1996 will be provided for at the outset. Future projects will require an amendment to this Strategy and will be considered on their own merits and new areas will only be designated if Council is satisfied it is in the best interest of the Municipality.

The general concept anticipated in the development of the following policies is to enable a different type of development arrangement wherein buildings are clustered with shared water and sewer service leaving a potential for large areas to be left undeveloped. It is proposed that this option be available as an alternative to the usual development standards which provide that each residential lot or unit have its own on-site sewage disposal system and well. Although off-site service arrangements are contemplated, it is intended that the overall density be low and in keeping with the density of the other rural areas.

In this way, the level of public service is not expected to change. The advantage to the developer or owner who proposes such a project is that with a cluster arrangement there may be considerable cost savings in construction. The advantage to the Municipality or the community as a whole is larger areas can be kept in a natural state preserving a rural atmosphere and potentially providing shared common open space for passive recreational uses.

It is not the intent that cluster developments be used to change the rural landscape by permitting large numbers of units to be located in one confined area. To prevent this, an upper limit on overall density is advisable to ensure the character of the rural landscape does not change too dramatically.

The Comprehensive Development Agreements under the following Subsections 3.4.14 to 3.4.15 shall specify measures to ensure the general low overall density character intended for the Country Residential District is maintained. The Agreements will also address water and sewer servicing arrangements and maintenance.

**3.4.14 Country Residential Resort - Objectives**

3.4.14.1 To provide an opportunity for a combination of residential, commercial and recreational uses as planned mixed use resort development projects.

3.4.14.2 To establish service levels and arrangements for resort developments.
3.4.14.3 To provide for unique land division arrangements to reflect the interdependence of the various uses with regard to services.

3.4.15 **Country Residential Resort - Policies**

3.4.15.1 Council shall establish a Country Residential Resort District (CRR) Designation. This District is intended to provide for resort developments that would typically involve residential development, including multi unit, together with related commercial and recreational uses in a planned community project.

3.4.15.2 Council shall establish a Country Residential Resort Comprehensive Development (R8) Zone that will provide for resort development subject to Comprehensive Development District Agreements.

3.4.15.3 Council shall designate a Country Residential Resort District on the North Mountain near Morden on the Future Land Use Map. An area within the District will be zoned R8 to provide for the first phase of a resort development and allow Council to consider entering into a Country Residential Resort Comprehensive Development Agreement. The initial area may be expanded subject to an amendment to the Land Use Bylaw.

3.4.15.4 Council may consider requests to establish future Country Residential Resort Districts subject to an amendment to the Future Land Use Map of this Strategy. Before considering a new district, however, Council shall be satisfied that the additional resorts are in the best interest of the Municipality. As a minimum, when considering proposals, Council shall have regard to the following:

a. the goals and objectives of the Municipal Planning Strategy

b. the impact of the land use change on the County’s resources and resource related activity

c. the potential for conflict with permitted or existing surrounding uses

d. the potential impact of high density development in areas not otherwise intended for high density development
e. the character of surrounding development and the impact of change on low density rural residential development

In all cases, Council shall require applicants to present a general proposal that is sufficiently developed to show an overall development concept and demonstrate how access, water and sewer service will be provided in order that Council can assess the merits of the proposal.

3.4.15.5 Council may provide for resort development within the R8 Zone subject to a Country Residential Resort Comprehensive Development Agreement. Before approving an Agreement Council shall be satisfied that the applicant has demonstrated:

a. that the proposal will not have a negative financial impact on the municipality

b. that the method of sewage disposal will be appropriate and adequate to serve the development density permitted

c. that sufficient quality and quantity of water is available to serve the development without negative impact on adjacent uses

d. that an adequate access to a public road is available and adequate for the development

e. that all proposed new roads, whether public or private and all access arrangements within the development, will be sufficient and adequate for the proposed density of development

f. that all road and driveway construction and maintenance standards are appropriate to ensure a high standard of development

g. that fire protection services and equipment are available and adequate to accommodate the development

h. that the site is suitable in terms of steepness of grades, soil and/or geological conditions

3.4.15.6 Where a Country Residential Resort Comprehensive Development Agreement allows for a subdivision, lot size and layout shall be such that all new lots will have continued
access to water and sewage disposal service as well as maintained public or private road access year round.

3.4.15.7 In order to satisfy the criteria in Policy 3.4.15.5, the applicant shall, where applicable, be required to provide the following for review by Staff and the Planning Advisory Committee:

a. a groundwater assessment by a qualified hydrogeologist that confirms that the proposed use will not create well interference on existing uses and confirmation that the ground water supply is adequate to serve the development

b. a report prepared by a qualified engineer outlining the proposed method of sewage disposal including a maintenance program with comments from the appropriate approval agency. The program shall identify the ownership and location of the system, the maintenance arrangements and responsibilities as well as outline the methods of monitoring the system’s performance to ensure the safety of the residents

c. a storm water management plan

d. elevation drawings illustrating the proposed height and character of any proposed buildings or structures

e. site plans for inclusion in the Comprehensive Development Agreement showing the proposed building locations, roads, driveways and parking areas as well as a general layout of proposed amenities

f. any other information necessary to determine and ensure the conformity of the proposed development with the policies for Country Residential Resort Districts

3.4.15.8 In considering a Country Residential Resort Comprehensive Development Agreement, Council shall have regard to the following, and where appropriate or permitted by the legislation, such matters will be specified in the Development Agreements.

a. where a proposal is for cluster development no less than 50% of the area covered by the Agreement shall remain in a natural or near natural state. The Agreement shall provide for either an upper limit of density that does not exceed 2 units per net acre or provide for 80% of the lot
to be left in a natural or near natural state. In no case shall the overall density exceed 4 units per net acre within the District

b. provision of adequate parking for commercial uses which will be open to the general public will be provided on-site

c. demonstration that suitable arrangements are made for the provision of water and sewer service and identification of the responsibilities of the Municipality and the property owners with regard to on-going maintenance

d. a maximum building height to ensure the buildings have minimal visual impact on the landscape

e. specification of a maximum number of units in a multiple unit residential building which in no case shall be greater than 12 units

f. arrangement of all private roads and driveways in an orderly manner to facilitate snow removal and ensure adequate access for emergency vehicles

g. design of any signs that are proposed to be permitted such that the visual impact is minimized

h. detailed explanation of the means of solid waste disposal to Council’s satisfaction

i. specification of standards for maintenance, landscaping and similar aspects of the development

j. provision of adequate building setbacks and vegetative buffers to provide for compatibility with adjacent uses

k. specification of hours of operation for commercial or recreational uses if considered advisable by Council

l. addressing of other matters generally dealt with in a Land Use Bylaw or a development agreement in accordance with the Municipal Government Act where deemed appropriate by Council
3.4.16 Industrial Uses at 323 Cambridge Mountain Road

For over ten years, an excavating company has been located at 323 Cambridge Mountain Road, south of the Cambridge Growth Centre and within the Country Residential District and Country Residential (CR) Zone. This land has been used for the storage and repair of trucks and heavy equipment, the storage of civil construction products (e.g. culverts and other pipes) and extracted materials, and several secondary uses such as a business office. These types of uses are classified as 'industrial' and are not permitted in the CR Zone. In addition, the land is not eligible to be rezoned due to the proximity of surrounding residential uses. However, the nature of the existing land uses and the uniqueness of the occupied land and its surroundings has led Municipal Council to establish special provisions to accommodate a limited industrial use of the property by development agreement.

3.4.16.1 Pursuant to the provisions of policy 3.4.16.2, as an override to the goals, objectives, and other provisions of the Country Residential Section, Council may enter into a development agreement for industrial uses typically associated with an excavating company upon land located at 323 Cambridge Mountain Road, PID Nos. 55283121 (approx. 6.6 acres) and 55166409 (approx. 4.05 acres), subject to the following conditions:

a. proposals shall be considered only for the land currently occupied by excavation company related industrial uses at 323 Cambridge Mountain Road

b. proposals shall only be considered for uses in keeping with the following land uses:

i. Principal land uses:

• fleet maintenance and storage of trucks and heavy equipment;

• storage of civil construction products (e.g. culverts and other pipes); and

• storage of extracted materials.

ii. Secondary land uses:

• washing and/or screening of extracted materials;
• business offices for administrative services;
• business offices for technical services such as drafting; and
• storage of vehicle fuel to a maximum of 10,000 litres.

3.4.16.2 In considering a development agreement proposal under the provisions of policy 3.4.16.1, Council shall be satisfied that the proposal does not significantly alter the land uses on the property as of April, 1999.

3.4.16.3 In considering an amendment to an existing development agreement, Council shall be satisfied that the proposal will not result in a significant change in the:

a. permitted uses
b. intensity of development, or
c. occupation of land

3.5 SHORELAND DISTRICTS

Lakes and coastlines are a natural resource which should be accessible to all residents. Although the Fundy coast offers a cool summer breeze, its rugged shoreline and the cold Fundy tides limit the scope of water recreational activities. Hence the freshwater lakes on the plateau of the South Mountain provide the greatest recreational potential.

Along the Fundy coast and the Minas Basin Council has designated additional seasonal residential areas as Shoreland Districts based on existing development trends. Erosion has reached serious proportions in some coastal Shoreland Districts, especially Kingsport and Evangeline Beach. In these cases only existing seasonal residential areas are designated in recognition of the high risks to development.

Similarly, Council designated the shorelines around many freshwater lakes as Shoreland Districts. The growing demand for seasonal residential development in Kings County is illustrated by the municipal records which show a consistent increase in seasonal residential development since 1963. Between 30 to 40 new lots are being created each year and this is expected to continue, in fact it is expected to increase. As this demand increases, public access to lakes and beach areas may be significantly reduced by the concentration of private development on waterfront. In addition to concerns of public access, the capacity of the inland lakes to sustain development must be addressed.

Along the Fundy coast and the Minas Basin additional cottage areas are designated Shoreland Districts based on existing development trends.

The current approach to shoreland management involves two essential steps. The first step is to identify the high capability recreation lands and designate portions to accommodate public and private development and access. The second step is to recognize the sustainable limits to use and to protect the integrity of the natural features, processes, and wildlife habitats which all contribute to the high capability. The Kings County Lakeshore Capacity Model, completed in 1995 provided Council with a planning tool designed for predicting development impacts on freshwater lakes.

Up to 1996, Shoreland Districts were established around the larger, more accessible lakes on the South Mountain. Council excluded smaller lakes from designation given their physical limitations for both seasonal residential development and recreational activities such as boating, swimming, and fishing. However, the lakeshore capacity model’s ability to predict development impact on lake water is dependent on factors related to land uses and resource activities in the entire watershed. We now know that development around upstream lakes and streams, as well as the natural landscape and human settlement contribute to lake water quality. To maintain water quality in those lakes already recognized for high recreation potential, planning efforts need to consider not only the direct impacts on the immediate lakes undergoing development, but the surrounding watershed too.
Prior to opening up additional undeveloped lands for seasonal residential development however, an assessment of the effects of further development should be undertaken. Matters to consider include the effect on existing development in terms of the social, visual, and natural character, lakeshore biophysical capacity, and effects on lake water quality as well as consideration of the maintenance of future public access to the lakes.

For the most part, in terms of residential use, Shoreland Districts are intended for seasonal residential development. However, Council has conceded to permit year round residential development whether on public or private roads. However, in keeping with the general goal of this Strategy to concentrate development in Growth Centres where services can be provided economically, services to remote areas such as the Shoreland Districts will be limited to basic garbage collection at central locations along public roads.

### 3.5.1 Shoreland District – Objectives

3.5.1.1 To adequately accommodate demand for seasonal residential and recreational development including campgrounds.

3.5.1.2 To ensure the availability of shoreland for the use and enjoyment of the general public.

3.5.1.3 To permit the development of commercial facilities primarily serving the seasonal population.

3.5.1.4 To allow for permanent development on public and private roads.

3.5.1.5 To minimize disturbance of environmentally sensitive natural features and habitats on inland lakes and coastal shoreland areas.

3.5.1.6 To protect the quality of lake water by establishing water quality objectives for individual lakes, and where necessary development criteria which result from lake trophic state carrying capacity studies.

3.5.1.7 Where lake trophic status is unknown or has reached adopted water quality objectives, to provide for alternative development approval mechanisms with criteria intended to significantly limit impacts on lake trophic status, maintain fish and wildlife habitat and shoreline aesthetics.
3.5.1.8 Increase awareness among developers, residents and other lake users of lake and shoreline ecology and to actively promote water quality protection measures.

3.5.1.9 Initiate a volunteer self-help water quality monitoring program for fresh water lakes on the South Mountain.

3.5.2 Shoreland District Policies

3.5.2.1 Council shall establish a “Shoreland District” (S) designation. This designation will apply to areas intended primarily for seasonal residential development. However, commercial and permanent residential uses may be permitted. Lands along the Fundy Coast and the Minas Basin where development already exists and lands around the freshwater lakes of the South Mountain may be designated as Shoreland Districts on the Rural Future Land Use map. Council may, by amendment to this Strategy, designate additional coastal or inland areas as Shoreland Districts in the future.

3.5.2.2 The full range of public services will not be available for development on private roads. It is Council’s intent that prospective new lot owners will be advised that services will be limited at the time any new lot is created, with an appropriate information note stamped on every approved plan of subdivision. Council will explore additional means of ensuring that residents along private roads are aware of the limited availability of services.

3.5.2.3 Council shall establish three zones in the Land Use Bylaw for application exclusively within the Shoreland Districts:

   a. Coastal Shoreland (CS) Zone
   b. Seasonal Residential (S1) Zone
   c. Future Shoreland (S2) Zone

3.5.2.4 In addition, Council may consider applications for rezoning to Rural Commercial (C9) subject to the policies of this section, the Rural Common policies of Section 3.7, and the policies for amending the Land Use Bylaw contained in Part 6 of this Strategy.
3.5.2.5 Within the Shoreland District designation, Council may consider zoning lands identified as wetlands according to the 1996 Province of Nova Scotia Department of Natural Resources digital 1:10,000 series Forest Cover Maps, Environmental Open Space (01) and where development of these lands may be hazardous to development. Council may consider zoning additional wetlands “01” in the future, by amendment to the Land Use Bylaw, consistent with the other policies of this Strategy.

3.5.3 Shoreland Districts - Coastal Shoreland Policies

3.5.3.1 Council shall zone lands within the Shoreland Districts shown on the Rural Future Land Use map along the Bay of Fundy and Minas Basin, as Coastal Shoreland. The Coastal Shoreland Zone will be delineated and labelled “CS” on the Kings County Rural Zoning Map - Schedule 1m.

Uses permitted in the Coastal Shoreland Zone shall include seasonal dwellings, campgrounds, parks, and recreation uses. These uses will be permitted on private roads. Permanent dwellings will also be permitted on private roads. Zone requirements pertaining to minimum lot size, frontage, yards, and parking are intended to ensure a degree of separation between uses, maintain the low density character of the coastal landscape, and to permit a minimum rural on-site septic system standard.

3.5.3.2 Lands fronting on Porters Point Road in Lower Canard may be considered for a site specific rezoning from Agricultural (A1) to Coastal Shoreland (CS) subject to the policies in Section 6.2.2.1 of the Municipal Planning Strategy and subject to all of the following conditions:

a. confirmation that the property is designated Shoreland on the Future Land Use Map – Map 15

b. confirmation by an independent engineer or other qualified professional of the adequacy of Porters Point Road to accommodate any additional traffic that may be caused by the rezoning request

c. the property meets the Land Use Bylaw requirements for road frontage on Porters Point Road
3.5.3.3 Council may provide for the development of commercial convenience uses and tourist oriented commercial uses being the uses permitted in the C9 Zone within Shoreland Districts along the coasts of the Bay of Fundy and Minas Basin, by rezoning. The Rural Common Policies of this Strategy contained in Section 3.7 and Section 4.4.8 Tourist Commercial Facilities of this Strategy, set out the specific range of uses intended and the criteria which must be met.

3.5.4 Shoreland Districts - Freshwater Lakes of the South Mountain

The lake trophic state or “Lakeshore Capacity” model developed for Kings County watersheds enables Council to estimate present water quality conditions and predict future changes in water quality that will occur for each dwelling built on the shore of a lake.

The trophic state model uses a measure of Chlorophyll $a$ concentration in the water body as the relative indicator of water quality. Chlorophyll $a$ can be directly attributed to, and is visible to the eye in the form of green algae and other aquatic plant growth. Algae and plant growth is also indicative of the presence of nutrients such as nitrogen and phosphorus. While nutrients end up in the water from natural sources in the water, air and overland runoff, all land uses contribute varying amounts of these additional nutrients to the water. However, it is the nutrient contributions stemming from human development which can contribute most significantly, and over which we can exert most control. Therefore, this component is the focus of lakeshore planning efforts.

As the “Carrying Capacity” report explains, the lakeshore capacity model enables the Municipality to assess the existing state of water quality and predict future changes based on residential development. This means that by an objective criteria readily applicable Council can determine the effect on water quality of additional proposed residential development, and in turn whether shoreline development warrants planning and control. This system requires that the Municipality adopt a specific water quality objective for each lake. This objective is expressed as a unit concentration of Chlorophyll $a$ (for example: 2.0 micrograms per Litre of water or 2.0 $\mu g/L$). If a given lake has a current Chlorophyll $a$ level of 1.8 $\mu g/L$, the model will enable the prediction of how many additional dwellings it would take to raise that lake’s Chlorophyll $a$ concentration by .2 $\mu g/L$ to make it 2.0 $\mu g/L$.

The report - Lake Carrying Capacities and Proposed Shoreline Development Policies, provides guidelines to assist Council in choosing water quality objectives. In keeping with that report, Council considered the following factors in establishing objectives for the Lake George to
Lumsden Pond system, one of the South Mountain watersheds, and will consider the same factors in setting objectives in additional watersheds:

- the need to protect water quality in any given lake;
- the need to be proactive in considering water impacts, so that property owners can avoid expensive remediation measures in the future;
- the public preference that perceptible water quality changes should stay within the normal range of year to year fluctuations in chlorophyll a;
- the need to maintain traditional and expected water uses, associated with specific lakes;
- the distribution of existing shoreland development;
- the distribution of approved, but undeveloped lots;
- the distribution of lands with good capability for development; and
- related land use bylaws.

Council will solicit input from the public in selecting specific values to use for each lake’s water quality objective. Once Council is satisfied that the selected water quality objectives meet the selection criteria, the model can be used to calculate the total number of dwellings which will be permitted on each lake in the watershed. Because the water in one lake flows into the lake downstream and so on, development limits on upstream lakes will impact directly on water quality objectives for every lake downstream. The impact is cumulative as water moves from the lake at the top end of the watershed to the lakes at the very bottom end of the watershed. In other words, in adopting water quality objectives, the higher the Chlorophyll a concentrations are set at the top of the watershed, the higher will be Chlorophyll a concentrations in downstream waters.

Upon adopting water quality objectives for each lake, the total number of dwellings permitted without exceeding the objectives is calculated from the model. The remaining undeveloped shoreline within the S1 Zone shall be eligible for subdivision and development up to the permitted number of building lots stated in the Land Use Bylaw for each lake. No further residential development within 350 feet of a lake or watercourse shall be permitted as-of-right once the maximum number of dwellings has been developed around each lake. Instead, any additional residential development within 350 feet from a lake or watercourse that has
exceeded its maximum development carrying capacity, must be developed by site-plan approval. Any residential development, which is not within 350 feet of a lake or watercourse, may continue to be developed under the standard zoning requirements.

Policies

3.5.4.1 It is Council’s intention to set the water quality objective for the eighteen lakes in the watershed beginning at Lake George and ending at Lumsden Pond at a maximum Chlorophyll a concentration of no more than 2.5 μg/L. Where according to the predicted value - water quality in those lakes is at or exceeds 2.5 μg/L, Council intends to limit development to either lands 350 feet back from the shoreline of the lake or watercourse, or by site plan as provided for in this Strategy. Council may set objectives for lake water quality at less than 2.5 μg/L where necessary to ensure some development opportunities on less developed lakes, which shall be set out in Schedule A of this Strategy. Council may make amendments to water quality objectives from time to time and set objectives for additional lakes by amending this Strategy in accordance with the policies of this section.

3.5.4.2 Created in 1995, the Kings County Lakeshore Capacity Model predicts the expected changes to water quality from new lakeshore development. The model links Chlorophyll a water quality objectives to the maximum number of dwellings around a lake that can be accommodated without negatively affecting water quality. Over time, additional information, refined lake science and new research may arise with which to improve upon the lakeshore capacity model. As a result, Council may, from time to time, review and update the model, water quality objectives, and the associated maximum residential carrying capacity for lakes in Kings County.

3.5.4.3 Council shall establish in the Land Use Bylaw the Seasonal Residential (S1) Zone and the Future Shoreland (S2) Zone. The standards for each zone shall reflect Council’s concern for public health, water quality and the maintenance of the natural character of the Shoreland Districts. The standards take the form of a two-tiered zoning system for the County’s freshwater lakes as follows:
a. In watersheds where Council has used the Kings County Lakeshore Capacity Model to determine the current trophic state of a lake or chain of lakes, Council shall adopt official water quality objectives for each lake. The water quality objectives will be used to assign each lake a maximum carrying capacity for as-of-right residential development in the Land Use Bylaw. Where Council has adopted official water quality objectives, shoreland areas shall be zoned Seasonal Residential (S1);

b. Council shall apply the Future Shoreland (S2) Zone to those watersheds where lake capacity (trophic status) has yet to be determined;

c. Hardwood Lake as the original study “control lake” will provide a baseline for measuring the accuracy of the Lakeshore Capacity Model and enabling refinements to enhance its predictive capability in the future. Therefore, Council shall set the water quality objective for Hardwood Lake at its current predicted Chlorophyll a concentration of 1.7 micrograms/Litre\(^1\). Council shall permanently zone the Hardwood Lake Shoreland District as Future Shoreland S2.

3.5.4.4 In order to determine the number of dwellings around each lake which are counted towards a lake’s assigned carrying capacity, Council shall include in the count all dwellings within the S1, S2 or O1 Zones around that lake.

3.5.4.5 For the protection of water quality on inland lakes, Council shall establish in the Land Use Bylaw S1 and S2 Zones, a minimum requirement of a 65 feet shoreline setback for primary buildings and structures. Measures to encourage the retention of natural vegetation within such setback areas, particularly the 65 ft. setback, are important to maintain water quality in the lakes. Vegetation within the 65 ft. setback would not be altered, consistent with passage, safety, and provision of views and ventilation to every extent possible. Likewise the soil mantle within the 65 ft. buffer should be disturbed as little as possible.

\(^1\) In this Strategy, where it appears, Chlorophyll a measured in micrograms per Litre implies a representative mean concentration of Chlorophyll a over a lake’s annual ice-free period.
3.5.4.6 Council shall establish the Seasonal Residential (S1) Zone in the Land Use Bylaw. The S1 Zone will allow for waterfront seasonal dwellings and waterfront single detached dwellings up to the maximum number specified in the Land Use Bylaw, as well as parks and recreation uses as-of-right. Council does not encourage permanent residential development on private roads. Therefore, year round residents of dwellings on private roads can not expect to receive the level of municipal services, snow clearing and road maintenance, nor access to emergency services such as, fire departments, police and ambulance services available to residents on public roads.

3.5.4.7 Council shall not permit any further as-of-right residential development within 350 feet of a lake or watercourse in the S1 Zone for lakes that have reached their assigned maximum carrying capacity specified in the Land Use Bylaw. Instead, any new residential development within 350 feet of a lake or watercourse must obtain site plan approval as described in Policy 3.5.7 of this Strategy. Residential development on lands that are not within 350 feet of a lake or watercourse may continue to be developed as-of-right according to the Land Use Bylaw requirements for the S1 Zone.

3.5.4.8 Council shall establish the Future Shoreland (S2) Zone in the Land Use Bylaw. In the Future Shoreland Zone, seasonal dwellings, single detached dwellings and passive parks and recreation uses shall be permitted. As stated in policy 3.5.5.1, Council does not encourage private road development for permanent residential use.

3.5.4.9 Council shall not permit any as-of-right residential development on new waterfront lots within the S2 Zone. Instead, any new residential development on new waterfront lots must obtain site plan approval as described in Policy 3.5.7 of this Strategy. New back-lots without waterfrontage may continue to be developed as-of-right according to the Land Use Bylaw requirements for the S2 Zone.

3.5.4.10 Council shall restrict the subdivision of lots, any part of which is within 350 feet of the shoreline, to one lot per area of land per calendar year.
3.5.5  Special Character Areas

Council believes that over time there is a risk that the natural attributes of the landscape which attract people to the lakes for recreation and as a residential alternative may be lost in the very process of development. Those natural attributes take the form of a diverse mixture of landscape features and wildlife which are found within these areas. The most ecologically diverse and most sensitive areas to disturbance are often found along the margins of the lakeshores and upland areas immediately around the lakes. But the visual character inherent in the natural shoreline itself has significant aesthetic value to humans as well as to providing the necessities of wildlife and water quality.

3.5.5.1  Notwithstanding policy 3.5.4.3 b. and c., Council shall classify lands which, through a combination of high visual and ecological features, constitute special character areas and zone them S2.

3.5.5.2  Initially Council shall recognize the special character of lands at the north end of Lake George and Hardwood Lake, the east side of Aylesford Lake in the vicinity of Fancy Cove, and both sides of the channel connecting Aylesford Lake and Loon Lake. These special character areas shall not be rezoned to any other zone with the exception of the O1 Zone.

3.5.5.3  Council may zone additional areas S2, within the Shoreland District as identified through specific studies which verify the unique biophysical character of the shoreline.

3.5.6  Independent Application of the Model to Shoreland District Watersheds

The Municipality is not in a financial position to undertake trophic state modeling for all the lakes in all the watersheds of the South Mountain. At the same time, it is not Council’s intention to prohibit waterfront development on those lakes for which no water quality objectives have been adopted. Consequently Council shall make provisions for applicants for two or more dwelling units and eligible commercial, resource development, recreational or institutional uses to commission independent consultants to apply the Kings County Lakeshore Capacity model to the appropriate watershed lakes.

3.5.6.1  In considering proposals for waterfront development on lakes which have not been modelled, applicants may be required to commission independent studies to apply the
Kings County Lakeshore Capacity Model to the subject watershed(s). Once Council reviews the model results to its satisfaction and completes public consultation steps to solicit input, Council may set water quality objectives for the lakes in the watershed. Adopting the water quality objectives would involve amending this Strategy and the Land Use Bylaw to incorporate the new objectives and the total number of waterfront dwellings permitted. Council may concurrently amend the zoning maps for the affected lakes to change the zoning from Future Shoreland (S2) to Seasonal Residential (S1).

3.5.6.2 Council may also require a biophysical assessment of the studied lake to identify ecologically sensitive areas, which may subsequently be identified as a special character area and Zoned S2 pursuant to policy 3.5.5 of this Strategy.

3.5.7 Site Plan Bylaw Alternatives

Council recognizes the attraction and demand for residential dwellings around Kings County’s lakes on the South Mountain plateau. However, Council also wishes to ensure that new lakefront development does not negatively impact lake water quality or the natural environment. In order to balance demand for residential development with water quality concerns, Policy 3.5.4.7 and 3.5.4.9 of this Strategy require certain residential development proposals to receive site plan approvals pursuant to the enabling policies specified in Part 6.8 of this Strategy.

Residential development in the S1 and S2 Zones that require site plan approval must meet the site plan requirements contained in the Land Use Bylaw. The site plan requirements shall be geared towards protecting water quality by restricting development and the clearing of vegetation within 65 feet of the shoreline.

3.5.8 Medium and Large Scale Development

Council recognizes that there are methods to accommodate proposals for multi-unit residential, commercial, institutional or resource development uses such as, but not limited to, resorts, marinas, campgrounds, summer camps, fish hatcheries, community centres and similar uses without jeopardizing water quality in the short term. Therefore, Council will provide for an alternative approach to development subject to a site analysis and binding development agreement conditions.

3.5.8.1 Within the S1 and S2 Zones Council may consider a variety of residential, commercial, recreational, institutional,
resource development or other medium and large scale permanent or seasonal residential development proposals by development agreement.

3.5.8.2 Proposals that pose a significant risk to water quality shall not be eligible for a development agreement. These land uses include composting facilities, waste disposal and storage, salvage yards, scrap yards, commercial livestock operations and any other industrial land uses deemed to pose an undue risk to lake water quality.

3.5.8.3 In considering development agreement proposals under policy 3.5.8.1 (above) Council shall be satisfied that the proposal:

a. will not create or contribute to erosion issues

b. any silt, nutrients or other contaminants flowing into a lake, tributary stream or wetland shall not exceed acceptable levels or negatively impact the natural ecosystem

c. can meet the waste and septic systems requirements of Nova Scotia Environment

d. will not negatively impact sensitive wildlife habitats shown on the Nova Scotia Department of Natural Resources Significant Habitat map

e. can meet the General Development Agreement Criteria contained in Section 6.3.3 of this Strategy

3.5.8.4 The development agreement may contain specific controls and requirements which are geared to preventing water and environmental contamination including:

a. minimum 65 ft setback from lakes and tributary streams and wetlands. The setback shall be greater for land uses considered more intense than residential land uses

b. The preservation of natural vegetation within the required setback from a water body

c. The regular maintenance of septic systems or other facilities which require continued maintenance to ensure proper functioning
d. Regulator monitoring of lake, stream or wetland water quality in the vicinity of the proposed development

3.5.8.5 In considering development agreements under Policy 3.5.8.1 Council may require the preparation of independent environmental reports. The applicant is expected to assume the expense of any required environmental reports. The reports shall demonstrate how the development will protect natural shoreline features and prevent impacts on water quality. Studies may include:

a. independent professional study on the effects of the proposal on the watershed system where it is reasonable to anticipate undue impacts could occur on wetlands, watercourses, fish and wildlife habitat and any other significant natural and cultural heritage features

b. a biophysical assessment of the site including reports and maps showing relevant natural features and proposed developments including, but not limited to, topology, hydrology, ecology, wildlife habitats, as well as existing and proposed development in the area

c. detailed site plan, maps and drawings

d. the independent application of the Lake Capacity Model to a lake that has not been studied and assigned a water quality objective

3.5.9 Shoreland Districts - Parks and Open Space Policies

3.5.9.1 Council considers seasonal and permanent residential uses in the Shoreland zones recreational in themselves by virtue of their proximity and access to water and the large lot sizes. Therefore, Council may focus on providing for a County park, recreational facilities and maximizing public access through various action programs. In doing so, Council shall play a leadership role in shoreland protection, by minimizing disruption of the shoreline wherever municipal public park and recreational facilities such as beaches and boat launches are provided. The General Planning Policies contained in Section 4.3 set out how land use policies complement and assist in carrying out recreation plans and programs.
3.5.10 Community Water Quality Monitoring – Policies

A key recommendation of the October 1995 Report on Lake Carrying Capacities and Proposed Shoreline Development Policies for the Municipality of the County of Kings, is that Council consider introducing a Chlorophyll $a$ – Secchi disk self-help program for all lakes where Council anticipates development pressure. The report explains that “each year’s sampling of each water body should include a sufficient number of sampling dates throughout the summer, and on larger lakes, a sufficient number of sampling locations, to ensure that the data collected are representative of the water body’s biological conditions. These efforts could be coordinated by the Municipality, in collaboration with Nova Scotia Environment, but eventually undertaken by cottager associations or other public or private non-profit interest groups.

In the summer of 1996, the Municipality of the County of Kings, and the Lake George and Aylesford Lake Property Owners Societies participated in a joint one-day United States and Canada wide Secchi disk transparency monitoring exercise. Nova Scotia Environment sponsored this program locally. In the previous year, the Kings County Wildlife Federation, on its own initiative, commissioned a limnologist with the Acadia Centre for Estuarine Research to sample additional lakes for water quality. That program involved sampling of several of the remaining lakes in the Lake George to Lumsden Pond watershed from Gaspereau to Black River Lake. Ultimately, a standardized program to collect long term water quality data will permit better calibration of the model for Kings County and will minimize the imprecision associated with year-to-year variation in biological conditions, and will allow long term trends to be more clearly identified.

3.5.10.1 Council shall coordinate with Nova Scotia Environment to formulate and initiate a Chlorophyll $a$ – Secchi disk self-help program.
3.5.11 The following chart is the Table of Water Quality Objectives for lakes from Lake George to Lumsden Pond.²

² In keeping with Municipal background reports adopted water quality objectives and development limits reflect an assumption that at least one third of all waterfront dwellings will eventually be occupied or used on a permanent full time basis.
³ Lake George 1997 predicted trophic status is $3.0 \mu g/l$ chlorophyll a average ice free concentration. It is Council’s intention to work with residents to improve water quality and reduce trophic status to $2.5 \mu g/l$.
⁴ Murphy Lake 1997 predicted trophic status is $2.7 \mu g/l$ chlorophyll a. Like Lake George, it is Council’s intention to work with residents to improve water quality and reduce trophic status to $2.5 \mu g/l$. 
3.5.12 Expansion of Non-conforming Structures – Residential

Cottage development around the County’s freshwater lakes took place decades before land use policies were in place. As a result, many dwellings are located on small lots and do not meet current setback requirements. It is increasingly common for these dwellings to be converted to year-round residences which has led to an increase in requests for expansions. Often expansion of these dwellings is greatly limited by the requirements of the Land Use Bylaw. Given the public interest in such development, Council will grant certain non-conforming residential structures special rights by allowing them to expand beyond the current zone requirements. Council will ensure that this form of development does not jeopardize lake water quality or impose undue impact on neighbouring properties. This development will be subject to a site analysis and binding development agreement requiring adequate buffering and proper site maintenance.

3.5.12.1 Within the S1 and S2 Zones, Council may consider the expansion of non-conforming residential structures by development agreement provided they meet the following criteria:

a. the residential structure was built prior to June 19, 1979 and thereby became non-conforming with the adoption of the Municipal Planning Strategy and Land Use Bylaw; and

b. the residential structure is located on a lot that is capable of supporting an approved on-site septic system and well.

3.5.12.2 In considering development agreement proposals under Subsection 3.5.12.1 (above) Council shall have regard for the following:

a. the expansion will not create or contribute to erosion or surface drainage issues or negatively impact the lake ecosystem;

b. neighbouring uses are adequately buffered and landscaping treatments are provided to reduce noise and visual impacts;

c. the expansion does not limit nor interfere with adjacent uses with regards to privacy or views of the lake;
d. adequate on-site parking can be provided;

e. the expansion will not negatively impact sensitive wildlife habitats as identified by the Nova Scotia Department of Natural Resources;

f. any subsequent subdivision shall not result in the reduction of area of the subject property for which the Development Agreement applies and shall be subject to an amendment to the agreement executed by a resolution of Council; and

g. the General Development Agreement Criteria contained in Section 6.3.3 of this Strategy can met.

3.5.12.3 While it is preferable for expansions to dwelling to conform to the zone requirements, where it can be shown that any negative impact on lake water quality or neighbouring use can be mitigated, Council may provide for the following:

a. The expansion may encroach on the required side yard, provided a minimum 10 foot side yard remains.

b. The expansion may encroach on the required front yard, provided a minimum 18 foot front yard remains.

c. The expansion may result in up to 50% lot coverage to a maximum lot coverage of 4,000 square feet.

d. The expansion shall not further encroach on the required shoreline setback.

e. The setbacks in Subsection a. and b. above may be further relaxed if it can be shown that there would be no negative impact on transportation routes, interference with snow removal or risk to human health and safety.

3.5.12.4 The development agreement will contain specific controls and requirements which are geared to preventing water and environmental contamination including:

a. The preservation of natural vegetation within the required setback from a water body and elsewhere on the property.
b. The planting of additional vegetation to stabilize soil and prevent erosion and surface runoff.

c. The regular maintenance of septic systems or other facilities which require continued maintenance to ensure proper functioning.

3.5.12.5 In considering development agreements under Policy 3.5.12.1 Council may require the preparation of independent environmental reports. The applicant is expected to assume the expense of any required environmental reports. The reports shall demonstrate how the development will prevent impacts on water quality. Studies may include:

a. independent professional study on the effects of the proposed expansion on the watershed system, taking into account the Kings County Lakeshore Capacity model.

b. a biophysical assessment of the site including reports and maps showing relevant natural features including, but not limited to topology, hydrology, and ecology.

3.6 HAMLETS

3.6.1 Hamlet Communities

Within Kings County's rural areas are a number of small unincorporated residential communities. Most are isolated settlements surrounded by Forestry or Agricultural Districts and some are situated along the coast. A few of these communities are located adjacent to the County's Towns and/or Growth Centres. Twenty of these rural communities were designated as Hamlets in the Municipal Planning documents in 1979.

Designated Hamlets are intended to provide housing opportunities for those associated with the resource industries. They are also intended to provide opportunities for commercial uses serving the residents in the immediate area as well as those in the surrounding rural areas.

Hamlets provide opportunities for people to stay within their own rural communities whether retired farmers or others with social ties but no direct involvement in the resource industries. As central sewerage services are not intended for Hamlets they are not expected or intended to generate significant growth.

In the 1990-92 Municipal Planning Strategy Review, one Hamlet was added, namely Wolfville Ridge, and one, Cambridge, was deleted and combined with part of the former Waterville - Cambridge Growth Centre and designated as a new Growth Centre. In 1999, parts of Grand Pré were designated as a Heritage Conservation District. To complement this designation, Grand Pré was established as a Hamlet Historic Residential District. A long-standing special policy area status of Grand Pré did not change, but the policies for heritage preservation, the servicing policies and the special tourist commercial policies were consolidated into a new hamlet sub-designation.

Beyond the basic rural setting and settlement pattern, there are considerable differences among the 21 Hamlets. Some are essentially resorts along the coast, others are unserviced residential or commercial extensions of designated serviced Growth Centres or Towns. Several are small clusters of 19th century homes centred around a general store and a church in the heart of intensive farming areas. Still others are simply at cross roads with a variety store and a few houses. Most have experienced very little growth, but some show signs of increasing development pressure.

3.6.2 Hamlet Designation

The Settlement Pattern varies greatly among the designated Hamlets. Some are dispersed and have few physical clues to visually identify the boundaries. They may be "communities" in a social sense without any
community centre, church, or general store. In some cases a cluster of uses, such as a general store, church and community centre, surrounded by residential uses provides the nucleus round which the Hamlet concept can be applied, and a boundary can be established delineating limits for future development.

The Municipal Planning Strategy recognizes Hamlets on the basis of each individual Hamlet's rural settlement pattern. Often boundaries were vague and were based on the road networks. Frequently the intersection of rural arterial roads and the presence of some residential development qualified a community for Hamlet designation. Where no visual clues existed, communities were designated to accommodate infill development between the outermost existing residential (non-resource related) uses.

As a consequence, some Hamlet boundaries have a linear form located along the length of a single road, allowing for development of single lots a short distance back (200 feet - 300 feet) from the road. However, most Hamlets have been defined using a combination of roads, property lines and natural features such as rivers, streams, steep slopes or soil capability as a guide.

Depending on the surrounding land uses and resource capability, objectives for reducing land use conflicts, on-site servicing capability for private septic systems and other environmental considerations, delineation of the Hamlets has aimed at accommodating a modest amount of residential infilling (with some limited commercial and industrial development opportunities). In effect, development limits are intended to contain predominantly single detached dwellings around commercial and community uses.

3.6.3 Function of Hamlets

Hamlets are intended to provide a focal point for the surrounding rural area, containing convenience services such as a service station, general store, community centres and churches. These uses will be encouraged to locate centrally in the community and developed to standards which enhance the rural character, and in turn the character of the regional landscape.

The Hamlet boundaries may not necessarily include the entire area where development has occurred, but rather serve to provide a limited area in which future development will be encouraged to cluster. Moreover the objective will be to strictly limit the size of Hamlets surrounded by agricultural uses in Agricultural Districts.

The Hamlets are intended to retain a rural character. Development should be low in density, dispersed within the Hamlet, and sensitive to the visual
character and identity of each settlement. All development is intended to locate on lots of a suitable size for on-site sewer and water facilities.

Within the Hamlet limits, considerable agricultural activity may exist adding to the rural character. With the exception of livestock operations, agricultural uses will be encouraged. Municipal services, except for street lighting, street paving, and sidewalks will not be provided.

### 3.6.4 Types of Hamlets

While recognition of their common characteristics is essential, planning for 21 different Hamlets must take into consideration the different features which distinguishes each.

**Hamlets in Coastal Settlements**

Morden, Harbourville and Halls Harbour and Kingsport have experienced considerable cottage development attracted by the coastal setting. To date only Kingsport, has established a significant amount of permanent residential development. Kingsport has not experienced any significant development activity, however, in the period 1988 - 1991. Nevertheless a central sewer system has been installed and this presents an attraction and opportunity for future Hamlet development in Kingsport. However, this shall be planned within the limitations posed by the existence of the surrounding agricultural land as well as the serious coastal erosion experienced in the existing Hamlet.

**Hamlets in Agricultural Settings**

Dotted east and west along the valley floor and within the centre of the prime Agricultural Districts are the six Hamlets of Somerset, Grafton, Woodville, Lakeville, Sheffield Mills and Pereau. The total number of residential dwellings in each of these communities range from 20 to 32. Four new dwellings were constructed in Woodville between 1986 to 1991. In the other Hamlets, development increased by only one or two new dwellings in the same period.

There does not appear to be a great deal of pressure to develop in these communities but the Hamlet boundaries encompass lands for expansion. There are some practical limitations to growth. For example, the existing land use mix includes active agricultural uses including livestock operations. These uses may limit immediate opportunities for development. Nevertheless, the objective to provide residential opportunities must be tempered by consideration of resource protection objectives when delineating Hamlet boundaries within the Agricultural Districts.
Like the six Hamlets in the main valley, Gaspereau is a rural community in an Agricultural District. Residential development activity has been slow, with the addition of only three new dwellings between 1976 and 1991.

Grand Pré is surrounded by prime agricultural land and is unique among the Hamlets. Grand Pré is an established rural settlement with a distinctive historical and cultural identity. Failure of on-site sewage systems that was largely attributed to heavy clay soils in the area led to a central sewage treatment service being installed in Grand Pré. Despite the availability of this service, it is intended that Grand Pré retain its rural and historical character and develop in a manner that retains the pastoral setting.

Hamlets in Other Areas

White Rock is isolated in the Gaspereau Valley within a Forestry District and at the edge of an Agricultural District, South Alton is similarly removed from the urban areas in a Forestry District.

Steam Mill and Millville likewise straddle some resource boundaries but in closer proximity to the Growth Centres of Centreville and Aylesford respectively.

Hamlets with Urban Influences

Four communities designated as Hamlets - Auburn, South Berwick, Greenwich and Avonport exhibit more urban characteristics, in some respects, than the other sixteen. Possessing a higher degree of urban character and by virtue of either their size, proximity to Growth Centres or both suggests a need for a refinement in future planning policies.

Among these communities, Auburn, Avonport and Greenwich, have public schools. Avonport is serviced with a central sewer system. Greenwich is partially serviced with a central sewer system along Highway # 1. South Berwick and Greenwich exhibit levels of commercialization generally beyond that expected or intended for Hamlets. Consequently, Council has opted to subdesignate specific areas within these communities based on the existing land use pattern and direct future commercial and industrial uses to locate near like uses. A core of existing commercial uses will form the basis for delineating Hamlet Commercial sub designations. A similar approach will be used for industrial purposes.

Wolfville Ridge, while classically rural in most respects, may experience additional pressure for development given its proximity to the Town of Wolfville and this may lead to demands for central services.
Hamlet Development Standards

Recognizing the variety of the settlement patterns and development pressure to be considered for each Hamlet, the rural public servicing policies aim to respond to basic concerns for the environment and public health, but in a manner which contributes to fostering quality rural residential environments.

As rural development is permitted with on-site services, Council intends to promote good development practices through public health education and environmental awareness education.

Hamlets Affected by Floodplain Zoning

Following a floodplain mapping review completed by Staff in March 2005, eight hamlet communities were identified as being affected by floodplain areas within their boundaries. In total, over one hundred properties were affected by the new floodplain mapping criteria and, therefore, were also impacted by the policies within Section 4.2.3 of this Planning Strategy.

The areas identified as floodplains in eight Hamlets were rezoned to the Environmental Open Space (O1) Zone, effectively making all existing structures within the zone legal non-conforming uses. At the same time, amendments were made to Policy 3.7.10 Rural Non-conforming Uses of the Municipal Planning Strategy to add flood-proofing and other conditions to the development agreement criteria for expansion of legal non-conforming uses in the O1 Zone, to ensure that an expansion of an existing structure would be protected from flooding and the potential for flooding would not be worsened for surrounding properties.

3.6.5 Hamlet – Objectives

3.6.5.1 To provide a residential, commercial and social focal point for the resource based sector of the Municipality containing convenience commercial services to the resource sector.

3.6.5.2 To provide limited rural residential development opportunities for; (a) people who originate within the rural area who are no longer engaged in, or exclusively engaged in, agriculture but wish to remain in the community; and (b) people seeking a rural environment.

3.6.5.3 To accommodate rural residential development through infilling vacant lands within Hamlet boundaries.
3.6.4 To maintain the character and visual quality of the rural landscape through controls on land use mix and density, and limits on the provision of municipal services.

3.6.5 To limit the development density to a level which will not require full Municipal services.

3.6.6 To recognize those Hamlets experiencing commercial development pressures, through formal land use sub-designations.

3.6.7 To accommodate light industrial uses associated with the resource industries.

3.6.8 To promote good septic system and well construction and maintenance practices.

3.6.9 To take measures to ensure the use of suitable and economic waste water management practices and systems.

3.6.10 To provide a framework for a tailored planning approach for those Hamlets that have developed a unique historic character that Council wishes to preserve or enhance.

### 3.6.6 Hamlets - General Policies

3.6.6.1 Council shall establish a Hamlet designation and designate the following 21 communities as Hamlets on County Future Land Use Map.

- Avonport
- Harbourville
- Somerset
- Auburn
- Lakeville
- South Alton
- Gaspereau
- Kingsport
- South Berwick
- Grand Pré
- Millville
- Steam Mill
- Greenwich
- Morden
- White Rock
- Grafton
- Pereau
- Woodville
- Halls Harbour
- Sheffield Mills
- Wolfville Ridge

Council shall adopt Future Land Use maps for each Hamlet as part of this Strategy.

3.6.6.2 The Hamlet Future Land Use maps shall delineate the boundaries of each Hamlet and are numbered Maps 16 - 23 and contained in Part 7. The reference map for Grand Pré is Map 16a. In defining the boundaries of Hamlets, Council shall have regard to the following:
a. agricultural capability of the subject lands and the surrounding area

b. the impact on resource development

c. the existing land use pattern and planning goals and objectives

d. the transportation network

e. natural features and processes

f. soil capability for on site sewage system

g. well water supplies

h. development trends

i. financial impact on the Municipality

j. land use compatibility

k. property boundaries

l. service boundaries where applicable

3.6.6.3 While most Hamlets will be designated Hamlet (H) on the Future Land Use Maps for the Hamlets, Council recognizes that some have evolved with a definite land use pattern and character. Accordingly, Council intends to establish the following sub-designations to provide for a refined planning approach where warranted.

a. Hamlet Residential (HR)

b. Hamlet Historic Residential (HH)

c. Hamlet Commercial (HC)

d. Hamlet Industrial (HM)

e. Hamlet Institutional (HI)

These sub-designations will be applied based on the existing development pattern for those Hamlets where a definite land
use pattern has evolved. In addition, the sub-designations will be used to reflect Council's intended development pattern.

3.6.6.4 Within the Hamlet designation, Council intends to zone lands based on the existing uses. Undeveloped land will be zoned residential and other uses may be permitted subject to the policies of this section. The following zones may be permitted within the Hamlet designation:

a. Hamlet Residential (R7)
b. Hamlet Historic Residential (R9)
c. Hamlet Commercial (C10)
d. Hamlet Industrial (M5)
e. Highway Commercial (C11)
f. Environmental Open Space (01)
g. Recreational Open Space (P2)
h. Community Facilities (CF)
i. Hamlet Residential Community Care (R11)

Existing schools will be zoned Institutional (I1) and existing Salvage Yards will be zoned Salvage Yard Industrial (M6). However, it is not intended that additional rezonings be permitted for these uses.

3.6.6.5 Council shall have regard to the criteria outlined in Policy 3.6.6.2 and the following in considering alterations to the boundaries of the Hamlets or in establishing new Hamlets:

a. the availability of vacant land within the existing boundaries
b. agricultural soil capability and the policies of Section 3.2
c. resource activity
d. proximity of livestock operations
e. soil capability for on-site services where applicable
f. servicing costs and availability where applicable

g. the goals, objectives and policies of this Strategy

3.6.6 Other than the addressing of health problems by the construction in 1996 and 1997 of a sanitary sewer system in Avonport, it is not the intent that Hamlets be provided with Municipal central water or sewage collection services. Therefore, the Land Use Bylaw will require lots to be of sufficient size to accommodate on-site services. Notwithstanding this provision, services may be provided. Council's policy with respect to services in Hamlets is contained in Subsection 3.6.13 and is also discussed in Section 2.11 dealing with new Growth Centres.

3.6.7 Council shall include provisions in the Subdivision Bylaw requiring subdividers to reserve rights of way to maintain future access to backlands within Hamlets to provide for future growth.

3.6.8 Council shall permit existing Farms and Livestock operations in existence prior to adoption of the initial Municipal Development Plan on June 19, 1979. In addition the Land Use Bylaw will provide for the replacement and reconstruction of buildings containing Livestock Operations permitted by this policy under the following circumstances:

a. the maximum floor area of the new structure not to exceed that of the original building

b. the location of the new structure does not further encroach on adjacent residential, park, institutional or community facility land uses

c. the permit for the replacement or reconstruction must be obtained within twelve months of the destruction of the original building

3.6.9 Where lands in any Hamlet are sub-designated to refine proposed land uses a rezoning will only be considered to uses permitted in the appropriate sub-designation, except rezoning to the O1 Zone may occur within lands designated Hamlet (H) or within any Hamlet sub-designation.
3.6.10 The following uses may be considered subject to a Development Agreement in accordance with the policies of this Strategy and the Municipal Government Act:

a. Day Care Facilities as provided for in Policy 3.7.2.4

b. Recreational Open Space uses as provided for in Policy 3.7.8.5

c. expansion of Rural Non-Conforming Uses as provided for in Subsection 3.7.10

d. reuse of registered heritage properties as outlined and provided for in Section 4.4

e. tourist related commercial uses at Tourist Destination Points as outlined and provided for in Section 4.4

f. expansion of certain existing industrial uses in hamlets beyond the initial zoned area as provided for in Policy 3.6.10.5

3.6.7 Hamlet Residential Policies

3.6.7.1 Council shall establish a Hamlet Residential (HR) sub-designation. This designation is intended to provide for the separation of uses and may be applied in Hamlets where a definite land use pattern has evolved. Rezoning to permit commercial or industrial uses will not be permitted in areas within Hamlets which have been sub-designated for residential uses without an amendment to this Strategy and will be in accordance with the Commercial and Industrial policies of subsections 3.6.9 and 3.6.10.

3.6.7.2 Council shall establish a Hamlet Residential (R7) Zone for application within designated Hamlets (H) and within the Hamlet Residential (HR) sub-designation. Permitted uses within the R7 Zone shall include, but may not be limited to:

a. single detached dwellings

b. two-unit dwellings

c. parks and playgrounds

d. existing multi-unit residential uses
BYLAW # 56 – COUNTY OF KINGS MUNICIPAL PLANNING STRATEGY

PART 3

SECTION 3.6

3.6.11

e. residential care facilities as defined in Urban Policy 2.5.4.2

f. agricultural uses except livestock operations unless in accordance with Policy 3.6.6.8 above

Existing uses in the R7 Zone which are not permitted will become non-conforming and subject to the provisions of the Municipal Government Act and the policies contained in Section 3.7 for Rural Non-Conforming Uses.

3.6.7.3 Council intends to permit the following additional uses and may include locational conditions and special site development standards to ensure they are developed in a manner compatible with the surrounding uses.

a. accessory residential uses as defined in Subsection 3.7.2

b. farm dwellings

c. churches

3.6.7.4 The Land Use Bylaw may be amended to allow additional uses where such uses are consistent with the policies of this Strategy.

3.6.7.5 Council shall encourage residential infilling within Hamlet boundaries.

3.6.7.6 Lot size requirements will be established in the Land Use Bylaw for the R7 Zone which are intended to ensure adequate lot size for on-site sewage disposal and water supplies and to maintain a low density to reduce the possibility of the need for central services due to cumulative effects of on-site services.

3.6.7.7 Where central sewerage services are available, Council may reduce the lot size requirements by including separate lot size standards in the Land Use Bylaw for serviced and unserviced lots.

3.6.7.8 Within areas designated Hamlet (H) or those specifically designated Hamlet Residential (HR), Council may permit the following by Development Agreement subject to the policies of this Strategy and the provisions of the Municipal Government Act:

3.6-11
3.6-12

a. a new multi-unit residential building of up to four units within a new building or by conversion

b. a new multi-unit residential building of up to eight units where municipal central sewerage service is available

c. Day Care Facilities pursuant to Policy 3.7.2.4

3.6.7.9 In considering development agreements for multi-unit residential uses in Hamlets, Council shall have regard to the following:

a. that the lot is approved for on-site servicing capability, as confirmed by the Nova Scotia Department of Health

b. architectural compatibility with surrounding residential uses, and in particular includes a:

i. pitched or mansard roof

ii. exterior cladding materials common to existing dwellings within the immediate surrounding areas

iii. wall to window ratio common to existing residential dwellings within the immediate surrounding areas

c. that adequate on-site parking be provided to the side or rear of the dwelling

d. provision of an adequate and suitably located landscaped amenity area sufficient for the leisure needs of the residents

e. the proposal can meet all pertinent policies of this Strategy including the criteria for development agreements contained in Part 6 of this Strategy

3.6.7.10 In considering Development Agreements for Day Care Facilities, Council shall have regard to the criteria outlined in Subsection 3.7.2.4 and the General provisions outlined in Part 6 of this Strategy.

Nova Scotia's population is aging and becoming more urbanized. With this aging population comes an increased need for a wider range of housing options and levels of support services. Many seniors are moving from rural areas into centres where there is a convergence of support
services. Often seniors have little choice but to move great distances to find the level of care that they require. These policies aim to allow for Kings County residents to stay in the area as they grow older. The concept of “aging in place” not only allows people to remain in their own community, but also contributes to the social, civic, and economic life of the community. It enables them to remain safely in their own community to enjoy the familiar social, cultural, and spiritual interactions that enrich their lives even though their health may be compromised.

As people age, their health may become compromised necessitating the provision of additional supports and services. These additional supports and services can come in many forms, from home care to simple assistance with a few everyday tasks. The policies of this Part speak to a continuum of care in what is widely known in the seniors housing industry as a Continuing Care Retirement Community that provides the necessary support services in response to changing needs. These policies allow for the siting of a long term care facility. They also allow for residential community care uses such as an assisted living facility or retirement living complex where individuals have a certain level of independence yet have access to medical staff on an as needed basis and have assistance with or access to services such as housekeeping, laundry and meal preparation. A care component is inherent in the residential community care use. Often there are accessory uses to the residential community care use where individuals are self-sufficient yet have access to amenities and organized activities that are designed for the residents. Such accessory uses may take the form of townhouses, semi-detached housing, 4 plexes, or multi-unit buildings with a greater number of units such as an apartment building.

The policies of this Part are premised on the belief that housing for our aging population should occur within the context of a residential neighbourhood, not in an area of isolated institutional zoning. Often housing of this nature is located in converted structures and/or on brownfield sites in urbanized areas. Landscaping, amenity areas, buffering, and yard requirements and the like are important to the successful integration of Hamlet Residential Community Care (R11) Zone uses with existing development in an effort to reduce land use conflict as well as providing a home that is designed to meets the needs of seniors.

3.6.7.11 It shall be the policy of Council to establish the Hamlet Residential Community Care (R11) Zone in the Land Use Bylaw within designated Hamlets (H) and within the Hamlet Residential (HR) sub-designation.
3.6.7.12 It shall be the policy of Council to establish the Hamlet Residential Community Care (R11) Zone within the following hamlets:

Greenwich

3.6.7.13 It shall be the policy of Council to permit long term care facilities and residential community care uses subject to locational and other requirements designed to minimize land use conflict with adjacent uses and encourage integration with the existing neighbourhood.

3.6.7.14 It shall be the policy of Council to permit residential uses permitted in the R7 Zone subject to the requirements of the R7 Zone.

3.6.7.15 Council shall include provisions in the Land Use Bylaw for the Hamlet Residential Community Care (R11) Zone addressing the following:

a. landscaping, amenity area, access, pedestrian ways, buffering & screening, and architectural compatibility

b. grouped structures on one lot

c. drainage and storm water through the submission of plans that meet standards specified by the Municipal Engineer

3.6.7.16 It shall be the policy of Council to encourage development that has regard for viewplanes and vistas, natural topography, internal traffic circulation designed to accommodate special needs such as drop off areas and lower curbing, integration of pedestrian walks with the Municipal parks system, accommodation of public transit, increased number of parking available for the physically challenged, a range of housing options, emergency vehicle access, and structure design and orientation that promotes integration and compatibility with existing residential uses.

3.6.7.17 It shall be the policy of Council to consider rezoning lands in the Hamlet Residential (HR) sub-designation to the Hamlet Residential Community Care (R11) Zone where:

a. there is direct access to a public road
b. community services are available

c. the road network is capable of accommodating increased traffic generation as determined by the authorities having jurisdiction over public roads within 1500 feet of the limits of the lot

d. public transit is available

e. centralized municipal water and sewer services are available and have capacity

f. the proposed site is capable of accommodating the requirements of the Land Use Bylaw for the R11 Zone and policies of this Section (3.6) and those for amending the Land Use Bylaw as contained in Part 6 of this Strategy

3.6.8 Hamlet Historic Residential Policies

3.6.8.1 Council shall establish a Hamlet Historic Residential (HH) sub-designation. This designation is intended to provide a planning framework for Hamlets that due to a unique history or development character warrant detailed and tailored planning policy.

Notwithstanding any land use policies in this Strategy pertaining to Hamlet Districts, Council shall not consider rezoning lands zoned Hamlet Historic Residential (R9), to any other zone without an amendment to this Strategy, except rezoning to the O1 Zone may occur within lands designated Hamlet Historic Residential (HH).

3.6.8.2 Council shall establish a Hamlet Residential (R9) Zone for application within designated Hamlet Historic Residential Districts. Permitted uses within the R9 Zone shall include, but may not be limited to:

a. One and two unit residential uses and multi-sectional modular homes

b. Public parks

c. Residential care facilities as defined in Urban Policy 2.5.4.2
d. Tourist commercial facilities for lodging, food services and ancillary uses subject to the provisions of subsection 4.4.8 of this Strategy and subsection 10.1.5 of the Land Use Bylaw

e. Rural accessory residential uses as described in subsection 3.7.2

f. Non-profit camps and seasonal dwellings

3.6.8.3 Council intends to permit the following additional uses and may include conditions and special site development standards to ensure they are developed in a manner compatible with the surrounding uses.

a. Livestock operations

b. Farm market outlets

c. Farm tenement and bunkhouse accommodations

3.6.8.4 The Land Use Bylaw may be amended to allow additional uses where such uses are consistent with the policies of this Strategy.

3.6.8.5 Lot size requirements that are intended to maintain a density that is in keeping with the established development character shall be established in the Land Use Bylaw for the R9 Zone.

3.6.8.6 Within areas designated Hamlet Historic Residential (HH), Council may permit the following by Development Agreement subject to the policies of this Strategy and the provisions of the Municipal Government Act:

a. tourist oriented commercial in Grand Pré pursuant to clause 3.6.8.7 b

b. reuse of Heritage Buildings pursuant to subsection 4.4.4

c. expansion of non-conforming uses pursuant to subsection 3.7.9

d. expansion of "existing" uses (other than those permitted uses listed specifically in 14.3.1 of the Land Use Bylaw, in existence prior to August 6, 1992) pursuant to subsection 3.7.9
3.6.7 Council shall recognize Grand Pré as a Hamlet Historic Residential District on the Future Land Use Map. Other Hamlet District policies notwithstanding, the following policies will apply to Grand Pré:

a. Council shall encourage development of historical sites and historical restoration projects that relate to the cultural heritage of Grand Pré

b. Council may permit tourist oriented commercial development by Development Agreement pursuant to the Municipal Government Act

In considering entering a Development Agreement, Council shall have regard to the following:

i. the development must be intended to serve primarily tourists visiting Grand Pré on a casual basis

ii. the development must relate to the cultural, historical or craftsman aspects of the community

iii. the development must be architecturally compatible with the historical and pastoral setting of the community in terms of design, scale, and building materials

iv. the proposal is consistent with all applicable policies including those respecting the entering of Development Agreements contained in part 6 of this Strategy

3.6.9 Hamlet Commercial Policies

3.6.9.1 Council shall establish a Hamlet Commercial (HC) sub-designation. This designation may be applied where commercial development exists in Hamlets where a definite land use pattern has evolved. The intention of this sub-designation is to discourage scattered or ribbon commercial development interspersed with other land uses and encourage a concentration of commercial uses in specified areas.
3.6.9.2 In Hamlets where lands are sub-designated Hamlet Commercial (HC), Council intends that these areas provide a convenience focus for local commercial uses and community facilities. Permitted zones within areas designated Hamlet Commercial (HC) will include the Hamlet Residential (R7) Zone.

However, as these areas are intended to be a focus for commercial uses and Community Facilities, Council does not intend to permit rezoning to Hamlet Residential (R7).

3.6.9.3 In Hamlets where no Hamlet Commercial sub-designation occurs commercial uses may be permitted, subject to location criteria and an amendment to the Land Use Bylaw in any areas within the Hamlet designation boundary. In Hamlets with lands sub-designated Hamlet Commercial (HC), a rezoning for Commercial uses will only be permitted within or adjacent to the Hamlet Commercial sub-designation without an amendment to this Strategy.

3.6.9.4 Council shall establish the Hamlet Commercial (C10) Zone in the Land Use Bylaw. Permitted uses in the C10 Zone will be limited to those providing basic conveniences and essential services to the surrounding rural residents, commercial uses serving and supporting resource industries and custom craft related uses. Community Facilities, Churches, Day Care Facilities and Parks will also be permitted in the C10 Zone.

3.6.9.5 Council shall reaffirm the Commercial Zone on lands previously zoned commercial in Hamlets by zoning them C10. The establishment of new Hamlet Commercial uses will require an amendment to the Land Use Bylaw. In considering proposals to rezone land in the general Hamlet designation and in or adjacent to areas sub-designated Hamlet Commercial, Council shall consider the following criteria:

a. the lot can meet the minimum requirements of the C10 Zone

b. the lot fronts on and has direct access to a Rural Collector Road unless located within an area subdesignated Hamlet Commercial

c. the proposed rezoning is in keeping with any applicable policy in this Strategy including those pertaining to Land
Use Bylaw amendments contained in Part 6 of this Strategy

Notwithstanding a. above, lots created prior to the coming into force of this policy may be considered for rezoning subject to c. However, lots smaller than 20,000 square feet will not be eligible for rezoning.

3.6.9.6 Council may permit highway oriented commercial uses, within Hamlets by rezoning to the Highway Commercial (C11) Zone established in Subsection 2.2.5. Lands eligible for rezoning must be in close proximity to an interchange of Highway # 101, and satisfy the criteria contained in the Rural Common Policies in Section 3.7 and Subsection 2.2.5 of this Strategy.

3.6.10 Hamlet Industrial Policies

3.6.10.1 Council shall establish a Hamlet Industrial (HM) sub-designation. This designation may be applied where industrial development has established in Hamlets where a definite land use pattern has evolved. Residential and Commercial Zones will not be permitted in the Hamlet Industrial sub-designation and such zones shall be subject to the policies of subsections 3.6.7 and 3.6.9.

3.6.10.2 Council shall establish a Hamlet Industrial (M5) Zone in the Land Use Bylaw. Permitted uses in the M5 Zone shall include, but not be limited to, warehousing, storage and handling associated with the resource industry, transport and trucking uses such as those that support the distribution of resource products, and accessory office uses.

3.6.10.3 Requirements for lot size, parking, buffering, road setbacks, fencing, signs and lighting will be incorporated into the Land Use Bylaw intended to ensure reasonable design and operational standards and separation to minimize conflicts with surrounding commercial or residential uses.

3.6.10.4 Council shall zone existing uses which fall within the permitted uses of the Hamlet Industrial Zone (M5). Additional Industrial uses may be considered within the Hamlet (H) designation or, where a Hamlet Industrial (HM) sub-designation occurs subject to a Land Use Bylaw amendment. In considering proposals to rezone land M5 for
new industrial uses, Council shall have regard to the following:

a. the proposed site is situated with frontage and direct access on a Rural Collector Road

b. the proposed use meets the minimum requirements of the Hamlet Industrial Zone

c. the subject lands are within or adjacent to lands sub-designated Hamlet Industrial (HM)

d. the proposal can meet all other applicable policies of this Strategy including those pertaining to Land Use Bylaw amendments contained in Part 6 of this Strategy

3.6.10.5 Council acknowledges that some existing industrial uses located within hamlets may not fall within a category of the permitted uses of the Hamlet Industrial (M5) Zone. In such situations, the existing industrial use shall be zoned Hamlet Industrial (M5). Council may provide for further development or expansion of such uses beyond the initial zoned area subject to a development agreement. In considering a development agreement, Council shall have regard to Section 6.3.

3.6.10.6 Council shall zone existing previously zoned Salvage Yards, Salvage Yards Industrial (M6). Future Salvage Yards will not be permitted in Hamlets.

3.6.10.7 Council may zone lands containing aggregate extraction related uses in accordance with the policies contained in Section 5.3 of this Strategy to limit the future reuse of the site.

3.6.11 Hamlet Institutional, Community and Residential Facilities

3.6.11.1 Council shall encourage all large institutional uses such as schools, hospitals and major government offices and public buildings to locate in the Growth Centres. However, Council recognizes that some schools are located in Hamlets. For these situations, Council shall establish a Hamlet-Institutional (HI) sub-designation. Council shall zone lands sub-designated Hamlet Institutional, (I1) which is a zone that is established in Subsection 2.5.2 of this Strategy.
3.6.11.2 Council generally intends to accommodate community facilities such as churches as-of-right in most zones, subject to special lot size and development requirements. Government offices, community centres, fire stations and other community facilities will be permitted in the Hamlet Commercial Zone and may be considered subject to an amendment to the Land Use Bylaw to CF. Existing Community Facilities shall be zoned CF.

3.6.11.3 In considering proposals to rezone lands to the Community Facility (CF) Zone in Hamlets, Council shall be satisfied that the following conditions are met:

a. the lot is located on and has direct access to a Rural Collector Road

b. the lot is capable of meeting the minimum requirements of the CF Zone

c. the proposal can meet all other applicable policies of this Strategy, including those for amendment the Land Use Bylaw, in Part 6 of this Strategy

3.6.11.4 Residential facilities such as residential care facilities housing up to eight residents are provided for through Hamlet Residential Policy 3.6.7.2 of this Strategy.

3.6.12 Hamlet Parks and Recreational Open Space Policies

3.6.12.1 Council shall provide for the development of rural community parks in Hamlets. Public parks will be permitted uses in all zones permitted in Hamlets.

3.6.12.2 Recreational Open Space uses as defined in Rural Commercial Policy 3.7.8.4 may be considered subject to a Land Use Bylaw Amendment.

3.6.13 Hamlet Servicing Policies

The circumstances facing established rural settlements like Wolfville Ridge suggest a need for improved community waste water management. While individual property owners are expected to maintain and ensure proper operation of their on-site sewage treatment facilities, the policies enable the Municipality to address environmental and public health concerns as appropriate. Nova Scotia Environment officials can provide advice and guidance to homeowners on the best methods to improve the problems.
3.6.13.1 In recognition of the variations in soil conditions which influence on-site septic system capability, Council has established a range of minimum lot sizes and frontages in the Land Use Bylaw. The variation in lot requirements is intended to reflect the soil conditions characteristic of each individual Hamlet. In the interests of both the environment and public health Nova Scotia Environment may specify larger lot dimensions than contained in the Land Use Bylaw for serviced lots for those requiring on site septic system approval.

3.6.13.2 Council shall limit public services in Hamlets to street lighting, street paving and sidewalks. These services will be provided only where necessary where conflicts between automobiles and pedestrian traffic present a safety hazard, or where the amount and density of development enable Council to recover the capital costs, pursuant to the Municipal Street Improvements and Street Lighting Bylaws.

3.6.13.3 Council may, as an exception to Policy 3.6.13.1 in Greenwich reduce the minimum lot size for residential development on lands serviced by a central sewage collection system.

3.6.13.4 As a serviced Hamlet within the Coldbrook-Wolfville Urban Corridor, Council anticipates that Greenwich will be subject to full scale urban development pressure. The future directions for Greenwich are outlined in the Urban Policies Section of this Strategy - Future Growth Centres contained in Section 2.11.

3.6.13.5 Council shall recognize Wolfville Ridge as a Hamlet requiring central sewerage services due to the cumulative effects on water quality and the environment of on-site septic system failure.

3.6.13.6 Notwithstanding the requirement for central sewerage services, Avonport and Wolfville Ridge shall be subject to all other policies for Hamlets, including provisions relating to density and infilling.

3.6.13.7 Notwithstanding Policy 3.6.13.2, where an extensive pollution problem is evident, Council shall consider the following course of action:

- through Nova Scotia Environment determine the extent and severity of the problem;
• install the most economical system to eliminate any existing contamination problem through conventional or alternative waste water management techniques; and,

• limit central services to the extent necessary to correct the problem.

3.6.13.8 The Municipality shall maintain a small local sewage collection and treatment system installed to overcome a pollution problem in Grand Pré.
3.7 RURAL COMMON POLICIES

The Rural Common Policies Section covers land use issues common to two or more Districts and provides for treatment of Rural Non-Conforming uses, Highway Commercial uses and Road Classifications. Since the implications for Home Occupations and other accessory residential uses are similar throughout the Rural Districts a single policy serves to provide for such uses. As well, uniform provisions for rural industrial uses including salvage yards, various rural commercial uses, and recreation uses, are sufficient to address site standards and locational aspects common to the Resource, Country Residential and Shoreland Districts.

Policies common to both the Rural and Urban areas of the County are contained in Part 5 of this Strategy.

3.7.1 Rural Residential Accessory Uses

Within the Rural areas of the Municipality, Council intends to allow for commercial operations as accessory to the main residential uses. Council believes that enabling self employment opportunities not only stimulates the local economy, it makes essential services and amenities available to surrounding, often isolated, rural residents. For those engaged in agricultural and forestry development, home occupations provide not only a second income but deliver important goods and support services to the local industry and community.

3.7.2 Rural Residential Accessory Uses Policies

3.7.2.1 Council shall provide for the establishment of the following uses as accessory to residential uses in the Rural Districts:

a. Rural Home Occupations

b. Bed and Breakfast Operations

c. Home Day Care

3.7.2.2 The Land Use Bylaw shall define and regulate uses permitted as accessory to residential uses and provide for them in all Rural and Hamlet zones that permit residential uses.

3.7.2.3 Council shall include provisions in the Land Use Bylaw to limit the extent of, provide for the needs of, and reduce the impact of Accessory Residential Uses on surrounding residences. Such provisions shall regulate the following:
a. the proportion of the subject dwelling, including accessory structures, which may be devoted to an accessory use

b. the provision of parking

c. the size and location of signs

d. prohibit outdoor storage and restrict outdoor display

e. structural alteration

f. the number of non resident employees

g. the types of permitted uses

h. other matters deemed necessary by Council and permitted by the Municipal Government Act

3.7.2.4 Council may permit Day Care Facilities providing care for more than (14) people in all Rural Zones that permit residential uses, except the Hamlet Commercial zone, by development agreement. Day Care facilities will be a permitted use in the Hamlet-Commercial Zone. In considering entering a Development Agreement Council shall have regard to the following matters:

a. the proposed use shall be located on land fronting on and having direct access to a Rural Collector road as defined in the Land Use Bylaw

b. water and sewer services are sufficient to accommodate the proposed use

c. signage for the proposed use shall be limited

d. a site plan is submitted showing the proposed development including the building, outdoor recreation area, parking and drop-off area, sign location, screening and landscaping

e. the proposal meets all the relevant policies of this Strategy, including general provisions for considering development agreements contained in Part 6 of this Strategy
3.7.3 **Rural Industrial**

Within the Forestry, and Country Residential Districts, Council will provide for resource industrial development. Permitted uses will relate to secondary processing, storage or handling of primary resources originating in the surrounding area, and also includes composting facilities which use substantial amounts of livestock waste. One exception to Council's intent to limit secondary industries to those directly connected with primary resource activities, is a provision for land uses involved in the disposal of construction and demolition debris. Council will create special provisions in this Strategy to permit construction and demolition debris sites, in the Forestry and Agricultural Districts.

Policies contained in this part of the Strategy guide how Council intends to provide for industrial uses in the Forestry and Country Residential Districts.

The Shoreland Districts are not intended to accommodate industrial development. Specific policies for industrial development in the Hamlets and in the Agricultural Districts are contained in the relevant sections of this Strategy.

3.7.4 **Rural Industrial Policies**

3.7.4.1 Council shall establish the Resource Industrial (M4) Zone in the Land Use Bylaw. Permitted uses in the M4 Zone shall include:

a. agricultural related industries

b. forestry related industries

c. mineral aggregate resource related industries

d. fishing related industries

e. equipment sales and service for the above uses

f. business and sales as accessory uses to any of the above

Additional uses may be permitted where such uses are consistent with the Policies of this Strategy.

3.7.4.2 The Land Use Bylaw shall contain provisions to reduce the impact of Resource Industrial Uses on adjacent and
surrounding uses and the travelling public by including standards such as:

a. the location of uses on the subject site

b. screening such as berms, vegetation and fences between any highway, residential area, or other non-resource use

c. other matters deemed advisable by Council and permitted by the Municipal Government Act

3.7.4.3 Council may consider rezoning to M4 by an amendment to the Land Use Bylaw to permit Rural Resource Industrial Uses in the following Rural designations:

a. Forestry Districts (F)

b. Country Residential Districts (CR)

Such zoning amendment will be subject to the policies of the relevant sections including those in Sections 3.3 and 3.4 and Part 6 of this Strategy.

3.7.4.4 Council may consider limiting Resource Extraction uses that require rezoning in accordance with the policies contained in Section 4.6 of this Strategy.

3.7.5 Rural Salvage Yard Industrial

Scrap metal operations, junk yards, auto wrecking and salvage operations and other various forms of related uses are of particular concern to Council.

Under the Nova Scotia Environment Act, a Salvage Yard is defined as premises where bodies or parts of automobiles or other vehicles or machinery materials or equipment of any kind are placed, stored, or kept. Many of these businesses, requiring the storage of broken down vehicles become unsightly and therefore can be incompatible with residential and other sensitive land uses. They also fall within the jurisdiction of the Gasoline and Salvage Yards Licensing Division, Board of Commissioners of Public Utilities.

Among other criteria such as minimum distances from public areas, the Board is most concerned with screening Salvage Yards from the view of the motoring public.
3.7.6 **Rural Salvage Yard Industrial Policies**

3.7.6.1 Council shall establish the Salvage Yard Industrial (M6) Zone in the Land Use Bylaw. Permitted uses shall be limited to salvage yards as defined in the Land Use Bylaw. Zone standards are intended to limit negative impacts on the environment, surrounding uses and the travelling public.

3.7.6.2 Those Salvage Yards specifically recognized in the Land Use Bylaw under the provisions of the Municipal Planning Strategy since June 19, 1979 shall be zoned M6.

3.7.6.3 Council may consider a rezoning to M6 to permit new salvage yards in any Rural District except Hamlets, Shoreland or Agricultural by amendment to the Land Use Bylaw. In considering proposals to rezone lands to M6, Council shall have regard to the following:

a. salvage yards shall not be permitted adjacent to, or within 500 feet radius of, public parks, schools, community facilities, public beaches or identified historic sites

b. salvage yards shall not be permitted within 500 feet of an approved or proposed lot shown on a tentative or final plan of subdivision to accommodate residential uses or those identified in a. above

c. if located within 500 feet of a residential property then vehicles collected for salvage purposes shall not be visible from any residential property

d. no new salvage yard shall be located with frontage on Highway No. 1

e. no salvage yard shall be located within the watershed of a community water supply area or any area protected under the policies of Section 4.2 of this Strategy

f. salvage yards shall be permitted to locate adjacent to similar heavy industrial uses such as builders or contractors yards and other clustered heavy industrial uses provided all other site and locational standards are satisfied

g. salvage yards shall be permitted to locate in abandoned pits and quarries provided all other site, environmental
and locational standards are satisfied but shall not be located on sites where excavation has exposed the ground water table, or ground water is otherwise considered vulnerable to contamination.

h. any salvage yard within 1,500 feet of the centreline of the travelled portion of a highway shall be screened from the travelling public by natural or planted vegetation, an earth berm, a solid fence, a building, or any other method of landscaping or combination of these.

i. the storage yard for salvage vehicles shall be set back a minimum distance from the front property line and a minimum distance from the rear and side property lines to permit proper buffering.

j. the storage yard for salvage vehicles shall be a minimum of 100 feet from any watercourse.

k. the comments of the Nova Scotia Department of Health and Nova Scotia Environment.

l. the proposal can meet all other applicable policies of this Strategy including those pertaining to Land Use Bylaw amendments contained in Part 6 of this Strategy.

In order to assess rezoning proposals, an Environmental Study may be required if deemed advisable by either the Nova Scotia Department of Health or the Department of Environment and Labour.

3.7.7 Rural Commercial

This Subsection contains the policies for rural convenience commercial, highway commercial and recreational commercial uses in the Forestry, Country Residential and Shoreland Districts. In addition, this Subsection contains the policies for the Farm Commercial (C13) Zone located in the Hamlet of Greenwich and the adjacent Agricultural District.

It is the intention to provide limited opportunities for convenience commercial uses serving the rural residents. To support the general objectives of this Strategy that firstly the Growth Centres, and secondly the Hamlets, accommodate the majority of the commercial needs, a practical separation distance from Growth Centres and Hamlets will be required for any new convenience commercial proposals.
Private recreational open space uses such as golf courses, driving ranges and campgrounds are distinguished from commercial recreation uses such as racing tracks and drive in theatres and separate policies have been established for these uses.

Similar to the Growth Centre policies for Highway Commercial Uses, provision is made for comparable development opportunities near the Highway #101 interchanges in rural areas except Agricultural or Shoreland Districts.

The Hamlet of Greenwich and the adjacent Agricultural District contain a number of farm markets that are frequently visited by surrounding residents and known as a farm market destination in Nova Scotia. Unique farm commercial policies are established for this area in order to enable the existing farm markets to expand and branch out into complementary uses.

### 3.7.8 Rural Commercial Policies

3.7.8.1 Council shall establish the Rural Commercial Zone (C9) in the Land Use Bylaw. Permitted uses in the C9 Zone shall be limited to convenience or general stores. Accessory Gas Bars and Residential uses may also be permitted.

Provisions of the Land Use Bylaw will ensure:

a. reasonable separation from adjacent residential uses is maintained

b. adequate on-site parking is available

c. commercial floor area does not exceed 2,000 square feet

3.7.8.2 Council shall zone to C9 existing Rural Commercial Uses. New rural convenience commercial uses may be considered subject to an amendment to the Land Use Bylaw. In considering an application to rezone lands to C9, Council shall have regard to the following:

a. the property fronts on a rural collector road

b. the property is located at least 2 miles from any Growth Centre

c. the subject lot is capable of meeting the lot requirements and development standards of the Land Use Bylaw
d. the proposal is in keeping with all other applicable policies including those pertaining to Land Use Bylaw amendments contained in Part 6 of this Strategy

e. for property in the Shoreland District, the proposal shall be in keeping with lake trophic state carrying capacities and biophysical shoreland development policies as approved by Council for specific freshwater lakes

3.7.8.3 A Highway Commercial (C11) Zone was provided for in Urban Policy 2.2.5.2. Council may provide for the establishment of highway commercial uses in the Country Residential, Forestry Districts or Hamlets adjacent to interchanges on Highway # 101 to permit highway commercial uses by an amendment to the Land Use Bylaw provided that:

a. access is gained by a road other than the limited access highway

b. the development complies with appropriate requirements of the Land Use Bylaw for signage, siting, buffering, parking, outdoor display and storage

c. properties will be abutting Highway # 101 or an access ramp

d. rezoning will only apply to sufficient land to accommodate the proposal

3.7.8.4 A Recreational Open Space (P2) Zone was created in Urban Section 2.6. Recreational open space uses, such as golf courses, driving ranges, campgrounds and similar uses, may be permitted in accordance with the policies contained in the relevant Rural District Sections.

Council does not intend to encourage a broad range of retail commercial development in Rural Districts. However, the concept of maintaining a limited number of camper trailers for demonstration and sales purposes on the site of a campground, for example, does not undermine the urban commercial or resource protection goals of the Municipal Planning Strategy. Consequently, in those rural Districts where lands are zoned P2, Council will consider permitting the display and sale of products, which are directly related and complementary to uses permitted in the Recreational
Open Space (P2) Zone pursuant to the following policy 3.7.8.5 of this sub-section.

3.7.8.5 Council intends to consider proposals to add outdoor display and retail sales in association with P2 Zone developments, which are directly related and complementary to uses permitted as of right, subject to the development agreement process. To be considered eligible to enter into a development agreement, therefore, Council shall require that:

a. sites are restricted to P2 Zoned lands in Hamlet, Forestry, Agricultural and Country Residential Districts

b. eligible uses are limited to retail sales and service of recreational vehicles such as tent and travel trailers, truck campers, motor homes and similar mobile accommodations, sailboats, canoes, bicycles, and motorized golf carts, but excluding power boats, all terrain vehicles, motorcycles and snow mobiles

c. eligible lot area shall be limited to a maximum of 10 percent of the total P2 Zoned lot area, to a maximum (including developments comprising two or more lots) area of 100,000 square feet

d. conditions set out in policy 3.7.8.6 pertaining to race tracks and theme park developments, in addition to:

e. criteria contained in Part 6.3 of this Strategy

3.7.8.6 Due to the unpredictable demand and potential land use conflict associated with Recreational Commercial uses, such as auto, stock car, motorcycle and go-cart tracks, theme parks, drive in theatres and similar or related facilities, it shall be the policy of Council to consider these uses by Development Agreement under the provisions of the Municipal Government Act. Council shall be satisfied that the proposal will not interfere or conflict with other land uses in proximity.

Sites in the Forestry, Agricultural or the Country Residential Districts may be eligible for consideration. Lands considered to have high capability soils for agriculture will not be eligible and such uses will be encouraged to wooded areas.

Council shall ensure that the proposal is in keeping with all applicable policies of this Strategy including those pertaining
to the entering of development agreements contained in Part 6 of this Strategy.

The conditions of the development agreement may regulate any of the following and other criteria Council may deem necessary:

a. landscaping and natural or artificial buffering

b. architectural compatibility with existing neighbouring structures and landscape in terms of design, scale and building materials

c. access, traffic circulation and parking

d. minimum size of lots and yard requirements

e. location, height, number of stories, and bulk of buildings and other structures

f. percentage of land that may be built upon, and the size of yards, courts, and other open spaces

g. the public display of advertisements including the nature, kind, size and description of any advertisement displayed

h. method of solid waste disposal, effluent disposal

i. hours of operation

3.7.8.7 Farm Commercial Uses Within and Adjacent to the Hamlet of Greenwich

3.7.8.7.1 Council shall establish the Farm Commercial (C13) Zone that shall be applied to existing farm markets and farm commercial land uses in the Hamlet of Greenwich and the adjacent Agricultural District. The C13 Zone shall permit commercial and industrial land uses that involve, support and/or complement agritourism and agricultural activities. Commercial or industrial uses not associated with agricultural uses, such as auto sales and general manufacturing, shall not be permitted. In order to assist in maintaining a rural character, Land Use Bylaw requirements shall
contain special requirements for signs, landscaping and green space.

3.7.8.7.2 The C13 Zone may permit restaurants, accommodations, lounges, retail and other similar uses, however, Land Use Bylaw requirements shall limit the size and scale of these uses in order to help ensure the uses are complementary to main agricultural related uses.

3.7.8.7.3 Council recognizes that some larger scale restaurants, accommodations, lounges, retail and other similar uses may be appropriate in the C13 Zone provided the intended use and visual characteristics are consistent with the rural character of the area. As a result, developers wishing to develop larger scale proposals than permitted in the C13 Zone, may seek a development agreement in accordance with Policy 3.2.8.2, Agri-tourism Commercial Uses.

3.7.8.7.4 In considering rezoning lands to the Farm Market Commercial (C13) Zone, Council shall consider the following conditions:

a. The proposal is located within the Hamlet of Greenwich and/or lands within the Agricultural District that is located between the Hamlet of Greenwich and the Town of Wolfville, north of Hwy 101 and south of the railway.

b. The area meets the requirements of the Farm Commercial (C13) Zone.

c. The proposal will not negatively impact any adjacent agricultural activities.

d. The proposal does not front onto Hwy No.1 or contribute to the development of a continuous commercial strip.

e. The proposal can meet all other applicable policies of this Strategy including those
3.7.9 Rural Non-Conforming Uses

The Strategy intends to manage land uses within the rural resource districts to complement and support the development of the primary resource activities. Some existing commercial and industrial uses located in these resource districts, do not comply with the policies of this Strategy and hence are not permitted.

Such uses would normally be allowed to continue legally as a non-conforming use by the Municipal Government Act. Since the intent of this Strategy is to guide subsequent future development and not to impose undue limitations on development activities of the past, Council has included this section on Expansion of Rural Non-Conforming Uses to provide greater flexibility for non-conforming uses than the Municipal Government Act provides.

Through these provisions Council will permit the continuation of existing commercial and industrial land uses which would not comply with this Strategy provided they do not conflict with adjacent primary resource activity. It is not the intent to broaden the opportunity for development considered inconsistent with policies for the resource districts. The intent is to provide a concession in recognition that they developed prior to the adoption of this Strategy or of amendments to the Strategy or Land Use Bylaw rather than encourage extensive development of the non-conforming uses in the existing locations. Subsequently, expansion potential will be limited by the policies of this section and reuse of the property must conform to the resource district policies.

Only land uses confirmed as existing prior to 1979 and new uses legally established after 1979 but made non-conforming due to subsequent Land Use Bylaw amendments will be eligible for consideration under the following expansion of Non-Conforming Uses provisions.

In addition to the above, within the Shoreland Districts around the County’s freshwater lakes Council will consider the expansion of residential structures that do not comply with the regulations of the Land Use Bylaw, but are considered non-conforming because they were constructed before the Land Use Bylaw came into effect.

In 2006, amendments were made to the Land Use Bylaw to rezone floodplain areas within eight Hamlet communities to the Environmental Open Space (O1) Zone, as explained further in Subsections 3.6.4 and 4.2.4.10 of this Strategy. When this occurred on March 2, 2006, any pertaining to Land Use Bylaw amendments contained in Part 6 of the Strategy.
existing structures automatically became legal non-conforming uses. Special conditions will apply to the expansion of legal non-conforming structures in the O1 Zone, because of the potential affects to neighbouring properties and risk of flood damage to existing structures in a floodplain.

3.7.10 Rural Non-Conforming Use – Policies

3.7.10.1 Council recognizes that the following land uses have legal non-conforming status and are subject to the relevant Sections of the Municipal Government Act:

a. uses in existence prior to June 19, 1979 which became non-conforming with the adoption of the Municipal Planning Strategy; and,

b. uses established since 1979 in conformity with the Land Use Bylaw, but made non-conforming as the result of subsequent Land Use Bylaw amendments, including the adoption of the amended Land Use Bylaw subsequent to the 1991/92 revision

A use will be considered non-conforming within the context of the Strategy where there is confirmation of a. or b. above as demonstrated through suitable records or documentation of the use, and a sworn affidavit provided by the applicant confirming that the subject use is non-conforming.

3.7.10.2 Within the Country Residential, Forestry, and Agricultural Districts as well as Hamlets, Council may provide for the expansion of a non-conforming use referred to in Policy 3.7.10.1 by Development Agreement pursuant to the Municipal Government Act. Additional criteria are listed in Policy 3.7.10.3 for the expansion of a non-conforming use in the Environmental Open Space (O1) Zone.

In considering the terms of a development agreement, Council shall have regard to the following:

a. the expansion is to a related use; that is, a new product, service, or additional line of business complementary to the original business

b. the expansion does not limit nor interfere with adjacent agricultural, forestry or non-resource uses
c. the expansion does not exceed or extend beyond the property lines that were in existence at the time the use became non-conforming (i.e. not on a consolidated lot or lot addition)

d. a subsequent plan of subdivision which involves the severance of land from a parcel containing a non-conforming use and bound by a Development Agreement shall be subject to an amendment to the agreement executed by a resolution of Council

e. the proposal can meet all other requirements of this Strategy, including Policies contained in Part 6 of this Strategy

3.7.10.3 In addition to the conditions outlined in Policy 3.7.10.2 above, for the expansion of non-conforming uses in the Environmental Open Space (O1) Zone, Council shall have regard to the following:

a. a report by a professional engineer stating that the structure will not interfere with the flow of water or displace water such that it creates a worse flooding situation for other properties may be requested by Municipal Staff

b. the structure and the associated utilities shall be designed and constructed in accordance with the accepted flood-proofing measures (as certified by a professional engineer) and entrances and exits from the building can be safely used without hindrance in the event of a flood

c. the proposed use of the facility and site will not involve any storage of potential pollutants such as fuels, chemicals, pesticides, manure, or any other substance with the potential to pollute surface or groundwater resources

d. the property owner submits a letter to Municipal Staff acknowledging they are aware they are developing in a floodplain or the development agreement shall contain a clause that acknowledges that the development is within a floodplain area and that the property owner is aware that the lands are susceptible to flooding
3.7.10.4 Notwithstanding the provisions of Clauses 3.7.10.2 and 3.7.10.3, an accessory structure no greater than 150 sq. ft. in size may be erected where there is a main structure existing as of March 2, 2006 in the Environmental Open Space (O1) Zone provided Clause 3.7.10.3 b., c. and d. can be met.

3.7.11 Shoreland District Development

3.7.11.1 Within the Shoreland Districts around the County’s freshwater lakes, Council may consider the expansion of non-conforming residential structures as described in Policy 3.5.12 of this Strategy.

3.7.12 Natural Environment District Development

3.7.12.1 Through policies contained in 4.2.1 Natural Environment General Policies, Council may consider proposals to expand existing commercial and industrial uses into the Natural Environment District.

3.7.13 Construction and Demolition Debris Disposal Sites

Solid waste management in Kings County—especially that category related to disposal sites—has traditionally been the exclusive domain of the Rural Municipality and three Towns. Both compostable organic material as well as construction and demolition debris were not accepted for disposal at the Kings County public landfill site beyond July 1, 1999. After that date, Valley Waste Resource Management1 according to its Strategy preferred to contract to individual private sector businesses operating under Provincial guidelines and licenses, to provide both services.

Council wishes to facilitate private sector opportunities in the waste management industry and intends to institute appropriate provisions in its Municipal Planning Policies and Land Use Bylaw. Council also recognizes that the transition from a publicly operated solid waste disposal system and the introduction of landfill restrictions on the disposal of compostable organic waste (from households, institutions and various industrial sources) requires some flexibility in order to select appropriate sites. Flexibility is also necessary to allow Council, the Valley Waste Resource Management and industry to adapt to changes in the handling of the waste stream, relative technology, and new Provincial

1 An independent public agency formed by the Rural Municipalities and towns within Kings and Annapolis Counties established in 1998 under provincial legislation.
and Federal laws. As a consequence, Council has adopted a two-fold objective to ensure reasonable allocation of land for waste management and related uses, while protecting the public interest in terms of land use compatibility.

3.7.14 Construction and Demolition Debris Disposal Sites Policies

3.7.14.1 Due to the uncertain and evolving nature of waste management regulations and practices, it shall be the policy of County Council to consider sites for construction and demolition debris disposal, by Development Agreement. Further, Council recognizes that the economic and technical viability of composting and construction and demolition debris disposal sites may depend on combining either or both of those uses with a related industry or business, either an existing one or a new use.

3.7.14.2 To be considered eligible to enter into a development agreement pursuant to policy 3.7.14.1 Council shall require:

a. a minimum separation distance of 500 feet is maintained between lands subject to development by agreement and any residential use

b. a minimum separation distance of 1,000 feet from land within a Growth Centre, Hamlet, Shoreland District or Country Residential District designated for residential, institutional or open space uses

3.7.14.3 Development agreement conditions will endeavour to ensure:

a. conformance with Provincial guidelines and conditions attached to individual licences required under the Provincial Environment Act and other applicable Provincial regulations

b. conformance with Valley Waste Resource Management Objectives

c. prevention of conflicts with other land uses within the immediate or adjacent Future Land Use District

d. protection of surface and groundwater quality

e. prevention of negative visual impacts on the landscape
f. rehabilitation of sites upon closure, abandonment or otherwise termination of a development agreement

g. conformance with all other requirements of this Strategy, including Policies contained in Part 6 of this Strategy

3.8  RURAL ROADS

3.8.1  Rural Road Classification Policy

Certain Public roads in the rural areas serve a regional function and carry traffic through hamlets or between the urban and rural communities. It is intended that these roads be distinguished for planning purposes.

3.8.1.1  Council shall establish for future planning and development purposes a rural road classification system to include on a County wide basis, the designation of Rural Collector Roads and Rural Local Roads, as follows:

a. Rural Collector Roads serving either a regional function or carrying traffic between communities and to the regional network. The following list comprises designated Rural Collector Roads. This designation applies to these Trunks and Routes where they are located outside Growth Centres only.

b. Rural Local Roads are those public roads intended primarily to provide access to land and carry traffic to Rural Collector Roads.
4.1 **GENERAL PLANNING POLICIES**

Certain Municipal Planning Strategy policies have general application to both the Urban Growth Centres and all Rural designations.

Policies respecting the Municipality's responsibility to have regard to the impact of land-use decisions on the environment and the limitations certain Environmental Hazards place on development are contained in the Natural Environment Section.

Policies for general application also include the Municipality's policies and programs with respect to tourism and heritage preservation.

Recreation, Parks and Open Space planning apply to both Rural and Urban Districts of the Municipality. Other planning policies include those respecting the Fishing Industry and Resource Extraction.

The following Sections have general application to the County as a whole:

- **NATURAL ENVIRONMENT** - Section 4.2
- **PARKS, RECREATION AND OPEN SPACE** - Section 4.3
- **HERITAGE AND CULTURAL PRESERVATION AND TOURISM DEVELOPMENT** - Section 4.4
- **FISHING INDUSTRY** - Section 4.5
- **RESOURCE EXTRACTION** - Section 4.6
- **TOPSOIL REMOVAL** - Section 4.7

4.2 **THE NATURAL ENVIRONMENT**

Natural Environment includes floodplains and wet areas, steep slopes, lands susceptible to subsidence or erosion and water supply areas. Since 1979 the Municipal Planning Strategy has recognized these areas as particularly sensitive to development. The Strategy also recognized significant wildlife habitats, but noted that the municipal jurisdiction is limited in addressing wildlife concerns.

There is a clear mandate, indeed responsibility, for the Municipality to prohibit and/or restrict land uses in areas which are potentially hazardous to development. Such areas include floodplains, and steep slopes. In addition, however, the general global trend toward protection of the environment was reflected in comments by Council and the public during the Strategy Review. Changes to the legislation and evolving provincial policy on wildlife suggests that the municipal mandate in the area of protecting the environment may be expanding.

4.2.1 **Natural Environment Objectives**

In recognition of the growing awareness of the impact of land use decisions on the natural environment, the following objectives have been established:

4.2.1.1 To direct development away from floodprone areas and other hazardous areas.

4.2.1.2 To have regard for known sensitive environments in all policy and bylaw change decisions and in entering Development Agreements.

4.2.1.3 To consult with, and support initiatives of, other levels of government and agencies in the protection of the environment.

4.2.1.4 To maintain the integrity of defined floodplains and avoid alterations to floodplains that might negatively affect areas beyond the floodplains.

4.2.2 **Natural Environment General Policies**

4.2.2.1 Council shall establish a Natural Environment (E) designation on the Future Land Use Maps. Council intends to apply this designation to lands identified in this section. Candidate areas shall include, but not be limited to, floodplains, sensitive environments, water supply areas, wetlands and unstable slopes. Lands so designated will be subject to the development restrictions outlined in this section.
4.2.2.2 Council shall identify significant natural environments and wildlife habitats on a Natural Areas information map in accordance with the policies of this section. Council shall adopt this information map as Map 24 of this Strategy.

4.2.2.3 In considering land use policy changes and Land Use Bylaw amendments, Council shall have regard to the policies of this section and may solicit the comments of other levels of government and interest groups.

4.2.2.4 Council may, where possible, support the initiatives of other levels of government and agencies in the protection of the environment.

4.2.3 Floodplains and Dykelands

The Province of Nova Scotia and the Federal government have been working together to produce accurate floodplain mapping for some areas of the province under the Flood Damage Reduction Program. However, the program has been costly and lengthy and the Annapolis Valley was not seen as a priority area in the provincial context. In 1976 the Department of Municipal Affairs recognized that, while development in the County had generally avoided the floodplain, pressure for development in the County's floodplains might occur and produced floodplain mapping based on the best available information, i.e., historical data, the height of the dykes as a guide to the potential flood elevation and soil information. The floodplain as indicated on the Future Land Use Map since it was adopted in 1979 was the best available indication of flood risk areas in the County, but may not include the entire extent of flood risk areas in the County.

Floodplain delineation is a fairly well defined process and the methodologies are very technical and detailed. However, the information necessary (e.g. streamflow records over a lengthy time interval, historical information regarding previous flooding including aerial photography, stream gauge records recording rate of flooding over a long term, data for the calculation of water flow velocities, as well as field surveys of high water marks and river cross sections) was not available in 1976. In addition, the County's rivers are strongly affected by tidal flows, which complicate floodplain calculations for mapping using traditional methods. It is, therefore, anticipated that the study necessary to determine whether any of the floodplain might be safely developed would be cost prohibitive for the Municipality to undertake on its own.

In the years since the first floodplain mapping was produced for the County, it became very clear that the general nature of the delineated lines created difficulties for map interpretation.
In 2003 and 2004, staff began to work on creating digital MPS and LUB maps for rural Kings County. It was quite apparent that the existing O1 designations would be impossible to accurately transpose to the new map. As a result, staff undertook an exercise to better delineate the flood prone areas identified in the 1976 study. To this end, all available data was researched and it was determined that the Floodplain would consist of:

- The area that falls below a line that approximates 2 metres above the mapped mean stream elevation. The Digital Elevation Model and the Nova Scotia Topographic Series of maps, both provided by the Nova Scotia Geomatics Centre, were used to determine the location of this line. Air photos, property maps, wetlands mapping and flood photos were used to confirm or, in some cases, adjust the location of the lines.

- The Marsh (Dykeland), as mapped by Nova Scotia Department of Agriculture and Fisheries and protected by the Agricultural Marshland Conservation Act, as passed by the Government of Nova Scotia on November 30, 2000. This Act replaced the Marshland Reclamation Act which was introduced in 1948.

Under the 2000 Act, the Provincial government must approve any development on incorporated dykeland, some of the best agricultural land in Nova Scotia. Since these areas are protected by dykes, there is always the potential for flooding from both fresh and salt water during extreme weather conditions.

The boundaries of the dykelands were surveyed when they were incorporated under the Marshland Reclamation Act. The boundaries are based on high water mark lines. The exact elevation may vary, depending on location. The elevations are generally about one to two feet below the construction elevation of the dykes.

The areas designated as Natural Environment include the floodplains of the Cornwallis, Habitant, Canard, Pereau, Annapolis and Gaspereau Rivers and include dykelands, as well as tidal and freshwater marshes.

Land uses which involve the building of structures or the altering of the topography in such a way as to effectively reduce the capacity or otherwise alter the dynamics of the existing floodplain will not be permitted.

Council does recognize the need to retain some flexibility for exceptional circumstances however. Occasionally, viable established businesses face physical constraints to growth posed by floodplains, wetlands, steep slopes or similar landscape and environmental features which may pose a hazard to most land uses. Council believes that in order to support the economic
viability of these existing businesses, provisions are necessary to enable some modest degree of expansion, as long as precautions are taken which respect the intent of the Natural Environment objectives in this Strategy.

It is recognized that the main function of the dykelands is for agricultural uses. Therefore, policies that prohibit the altering of land levels will not apply to recontouring of dykelands for agricultural purposes.

4.2.4 Floodplains and Dykelands – Policies

4.2.4.1 Council shall identify the following areas as floodplain:

- All dykeland as identified on the Nova Scotia Department of Agriculture and Marketing Marshland maps. Council acknowledges that, while the provincial Marsh bodies have granted variances to recognize existing development, it is Council’s intention for these lands to remain in the O1 zone.

- The floodplains of the Gaspereau, Cornwallis, Annapolis, Habitant, Canard and Pereau Rivers, as delineated by the floodplain study conducted by Municipal Staff and completed in March 2004. This study delineates a floodplain limit that follows a line located 2 metres above the mapped river elevation.

4.2.4.2 Council shall establish an "Environmental Open Space" (01) Zone to be applied to areas containing unique ecological or environmental features to be retained in their natural state. Permitted land uses will be limited to those which will not be detrimental to the environment by creating excessive flooding, erosion, or other detrimental consequences. Such lands include, but are not limited to, floodplains, dykelands, and tidal and freshwater marshes.

4.2.4.3 Council shall restrict uses in the Environmental Open Space (01) Zone to agricultural or open space uses provided that they require no permanent structures or installations with the exception of municipally operated public utilities.

4.2.4.4 Council shall consider carefully the implication of municipal actions which may lead to the development of roads, dykes and municipal services on the hydro dynamics of the floodplain, i.e. in general consideration of all land use proposals. Council shall refer such matters to an appropriate
provincial agency for its approval or recommendation when appropriate.

4.2.4.5 Council may request other levels of government to undertake floodplain mapping under the Flood Damage Reduction Program (F.D.R.P.). Council acknowledges that the former Federal Provincial agreement under the F.D.R.P. has expired and that only a maintenance agreement may replace the former program. It is therefore Council's intention to request floodplain mapping under the program for parts of the County's floodplains. Considered for partial study are those parts of the floodplain within Growth Centres, particularly dykelands.

4.2.4.6 Council shall prohibit the altering of land levels, except for re-contouring for agricultural uses or, for municipal passive recreational uses in designated Natural Environment areas of the Municipality by a general provision in the Land Use Bylaw for the 01 Zone.

4.2.4.7 Except as provided in Policy 2.6.6.5, lands zoned (01) shall not be rezoned to a use permitted in adjacent areas without an amendment to this Strategy. In considering such amendments Council shall solicit and consider the advice of Nova Scotia Environment and Service Nova Scotia and Municipal Relations and any other agency with an interest or responsibility for such areas.

4.2.4.8 Notwithstanding Policy 4.2.4.7, Council may permit existing commercial or industrial uses in a commercial or industrial zone immediately adjacent to an 01 Zone to expand into the Natural Environment District subject to a Development Agreement pursuant to the Municipal Government Act. Council intends this provision to apply to uses already in existence on June 19, 1979. In considering a development agreement Council shall have regard to the following:

- a. that adequate floodproofing measures as determined by an independent assessment of a qualified hydrologist or professional engineer at the developer's expense are undertaken for any buildings

- b. that the type of development is consistent with the existing use and that the minimum standards for such developments are no less than those required by the zone unless necessary for reasons of safety
c. the environmental protection of watercourses with respect to proper storm drainage

d. no use is permitted which involves the bulk storage of chemicals or petroleum products, including fertilizers, pesticides, kerosene alcohol, gasoline, oil and natural gas

e. parking of commercial vehicles overnight is prohibited whenever such vehicles are loaded with any cargo regulated under the Dangerous Goods Management Regulations made under Section 84 of the Environment Act, S.N.S. 1994-95, c.1. The presence of unacceptable cargoes shall be determined by labels on the materials on placards on the transport unit as required by Federal Regulations under the Transportation of Dangerous Goods Act

f. expansion into the Natural Environment District is limited to an additional maximum of 2 acres in area

g. the proposal can meet all other requirements of this Strategy, including Policies contained in Part 6 of this Strategy

4.2.4.9 Further to Policy 4.2.4.8 where a development site is situated within an identified floodplain, in order to minimize the effects upon natural stormwater flows, it shall be the intention of Council to monitor the placement and stabilization of fill necessary for the floodproofing of structures or access ramps permitted within the Natural Environment District.

4.2.5 Water Supply Areas

The Towns of Kentville and Wolfville surface water supply areas are located in the Forestry District and have been subject to protection and development restrictions since the adoption of the Strategy in 1979. Land uses in these areas, and any similar areas identified by the Nova Scotia Department of Health or Nova Scotia Environment in the future, should be controlled and protected.

4.2.6 Water Supply Area – Policies

4.2.6.1 Council recognizes the water supply areas for the Towns of Kentville and Wolfville which are identified and endorsed by provincial government departments. Land uses in these areas will be restricted to ensure the protection of the water quality.
4.2.6.2 Council shall establish the Water Supply (02) Zone in the Land Use Bylaw for application to the lands identified in Policy 4.2.6.1. Permitted uses in the 02 Zone will be limited to the following:

a. uses which do not jeopardize the water quality as determined by the Nova Scotia Department of Health and Nova Scotia Environment

b. uses existing prior to June 19, 1979

c. agricultural activities subject to a. above and excluding livestock operations

d. forestry activities subject to a. above

4.2.7 Wetlands and Steep Slopes

Steep slopes and lands susceptible to subsidence or erosion present hazards to development. Swamps, marshes and other wetlands are areas where land is poorly drained and is completely or partly covered by freshwater for part of the year or year round. Wetlands are often drained for agricultural purposes or filled in to accommodate development.

Wetlands are recognized as significant wildlife habitats. However, apart from their value to a variety of wildlife, they are also important for water storage, ground water replenishment, water flow regulation, and in filtering pollutants. As water storage areas, wetlands can also serve to accommodate water that might otherwise flow onto urban or resource lands during heavy storms.

As well as the natural water purification process, wetlands perform an important ground water recharge function in maintaining ground water quality. The cumulative effect of filling and draining dozens of wetlands may over time have a significant and irreversible impact on ground water quality and on an area's ability to accommodate flooding. Lands susceptible to subsidence or erosion present hazards to development.

The Municipality does not have any mandate to control the drainage of wetlands for agricultural purposes. However, pursuant to the Municipal Government Act, this Strategy may include policies for the protection and development of swamps, marshes and other environmentally sensitive areas. Therefore, in recognition of the important function of wetlands, especially in areas where there is a dependence on private wells and septic systems, the Land Use Bylaw may ensure that development of, or in the
vicinity of, wetlands does not involve any alteration of land levels or filling that would significantly affect the surface drainage and wetland systems.

### 4.2.8 Wetlands and Steep Slopes – Policies

4.2.8.1 Council intends to identify those areas which may present a hazard to development such as steep slopes (more than 20%), lands susceptible to subsidence or erosion, wet lands, swamps, marshes and other environmentally sensitive areas. Lands so identified shall be designated Natural Environment on the Future Land Use Maps and zoned Environmental Open Space (O1) on the Land Use Bylaw Schedules.

As the altering of land levels in these areas may have a negative environmental impact beyond the site, Policy 4.2.4.6 shall apply to lands identified under this policy.

### 4.2.9 Wildlife Habitats, Sensitive Environments and Unique Areas

In 1979 the Municipal Planning Strategy recognized the lack of municipal mandate to protect and conserve wildlife habitats and acknowledged that this responsibility rests with the Wildlife Section of the Nova Scotia Department of Natural Resources. Since that time it has been municipal policy to support the provincial government in its efforts to protect and conserve areas that have been identified as significant wildlife habitats within the County boundaries.

While the Municipality does not have any specific powers to address wildlife protection, it is responsible for controlling land uses under the *Municipal Government Act*. In consultation with the Nova Scotia Department of Natural Resources a map indicating particularly valuable habitats for wildlife resources has been prepared and included in this Strategy as an information map titled Natural Areas (Map 24).

**Wildlife Management Units** are land or water areas found to be important for the preservation of a particular species or a variety of wildlife species in which a federal or provincial management program is underway or intended. In Kings County, the management units include both waterfowl and fish. The waterfowl locations are concentrated in the salt marshes along the shore of the Minas Basin at the mouth of the Cornwallis and Habitant Rivers. Management of the small black bass in Gaspereau Lake represents the fish component of the program. Parts of the Evangeline Beach area have been designated as significant habitat areas for Shorebird migration.

**Unique or wilderness areas** are comprised of fresh and salt water marshes, bird nesting areas, and wilderness lakes. The most valuable freshwater
marshes are located near Aylesford, Sheffield Mills, Steam Mill and along the Cornwallis River. Marshes are the most productive land based ecosystems in the world, maintaining diversity and contributing to the stability of the natural environment, minimizing erosion and flooding and maintaining a high water table and fertility in the headwater areas.

In the Agricultural District portions of marshes are being drained for their agricultural capability thus increasing the wildlife value of the remaining marshlands.

An eagle nesting area located near Little River Lake is identified and acknowledges the County as a habitat for this endangered species. Eagle nesting is now on the increase in Nova Scotia. The Nova Scotia Department of Natural Resources has identified and is monitoring a few additional nests.

The Federal Bird Sanctuary located in the west end of Kentville and north of Kentville in the County provides spring migratory, breeding and rearing, and late summer and fall concentration habitats for waterfowl and other bird species, fish, reptiles and mammals. The Federal Government has decided to discontinue the designation and Kentville and the County may co-operate to continue the preservation of this important habitat.

Special Places (I.B.P. Areas)

Under the United Nations International Biological Program (I.B.P.) the Kentville Ravine, which is partly located in New Minas, and Cape Split were identified as important samples of ecosystems which should be preserved for biological research. The I.B.P. program was established to identify unique ecological sites, preserve samples of the world's ecosystems, maintain biological and genetic diversity, measure manmade changes in ecosystems, and to preserve unique areas for educational and demonstration purposes.

The Kentville Ravine which is in public ownership is designated Environmental Open Space and this designation shall remain. On the other hand, Cape Split is in private ownership and shall remain designated "Forestry District" at this time.

The Provincial Special Places Protection Act (1980) provides for the preservation, regulation and study of archaeological and historical remains and palaeontological and ecological sites. In view of Cape Split and the Kentville Ravine's I.B.P. designation, they are considered candidate sites for special place designation under the legislation. If designated, these areas would be protected by law through a program administered by the Nova Scotia Museum with assistance from the Nova Scotia Department of Natural Resources.
Wildlife Strategy

In 1991 the provincial government announced its intention that the Wildlife Advisory Council will develop a wildlife management strategy for Nova Scotia. This announcement followed the new wildlife policy for Canada which was adopted in 1990 by Canada's First Ministers at the Wildlife Ministers' Council of Canada. A major objective of developing a Wildlife Strategy is to expand the scope of wildlife policy to improve wildlife conservation. The wildlife policy promotes consultation with wildlife agencies by all organizations whose decisions may impact on wildlife population or habitat.

The Municipality can support these initiatives by considering the impact of land use decisions on natural areas such as when considering expansions to Growth Centre boundaries, land use changes and policy directions particularly in, or near, areas identified on the Natural Areas Information Map.

4.2.10 Wildlife Habitats, Sensitive Environments and Unique Areas – Policies

4.2.10.1 Council intends to support the provincial government in its efforts to protect and conserve wildlife habitats in Kings County. Such support may include consultation with the Department of Natural Resources or other agencies prior to considering land use or policy changes in the vicinity of, or which might impact on, any area indicated as significant to a single or a variety of wildlife and plants or a specific species on the Natural Areas Information Map # 24.

4.2.10.2 Council shall encourage the Nova Scotia Department of Natural Resources to continue the monitoring, identification, and protection of wildlife within Kings County.

4.2.10.3 Council shall encourage the Nova Scotia Museum to evaluate the areas of Cape Split and the Kentville Ravine for designation under the Special Places Protection Act.

4.2.10.4 Council shall encourage the Nova Scotia Museum and the Nova Scotia Department of Natural Resources to survey, identify and evaluate additional unique sites for eligibility for Special Place designation within the County.

4.2.10.5 Council intends to cooperate with the Federal and Provincial government in the identification of valuable wilderness areas. In this regard Council may identify these areas on the Future Land Use Map.

4.2-10
4.2.11 Watercourses

4.2.11.1 Council, through provisions in the Land Use Bylaw and in entering Development Agreements, shall provide watercourse protection by requiring setbacks from watercourses. The restriction of development in sensitive watercourse environments is aimed at reducing hazards to development due to erosion and slope failure in addition to protecting the environment.

4.2.12 Lake Water and Ground Water Quality

4.2.12.1 Council recognizes there may be limits to the capacity of lakes to sustain development and recreation activities. Moreover, the cumulative effects of development may impact groundwater quality. Accordingly, Council may establish a Lake Area or Water Supply Area Advisory Committee to advise Council specifically on lakeshore development proposals and rezoning proposals.

4.2.12.2 For fresh water lakes, Advisory Committees formed by Council shall have regard for any lake trophic state carrying capacity studies and biophysical shoreline analyses for specific lakes that have been approved by Council.

4.2.12.3 For property in the Shoreland District, the proposal shall be in keeping with lake trophic state carrying capacities and biophysical shoreland development policies as approved by Council for specific freshwater lakes.

4.2.13 Coastal Erosion

4.2.13.1 Council recognizes the potential for damage to structures in coastal areas due to coastal erosion. To address this issue new development will be discouraged in areas where damage due to erosion is evident or expected.

4.2-12
4.3 PARKS, RECREATION AND OPEN SPACE

Parks and open space and the development of recreational opportunities yield physical, social and economic benefits to the community. The Municipality of Kings has taken advantage of Municipal Government Act provisions that enable the municipality to acquire a parkland dedication or a cash-in-lieu equivalent when land is subdivided under the terms of the Subdivision Bylaw.

To guide the acquisition and management of lands and the use of monies obtained under the subdivision bylaw, Council adopted the "Parks and Recreation Open Space Study" in 1984. This document has been used to guide the administration of the parkland dedication provisions of the Subdivision Bylaw.

4.3.1 Parks, Recreation and Open Space

Parks, recreation and open space areas are generally divided into six categories:

Urban Neighbourhood Parks offering landscaped areas, play equipment, benches and occasionally hard surfaced multi purpose courts serving 250 - 500 residents in the Growth Centre neighbourhoods. They are expected to be at least a half acre and accessible by pedestrians and have frontage on a local or collector street.

Rural Neighbourhood Parks offering similar facilities to the urban neighbourhood parks serving a smaller population (generally 100 residences) in the Country Residential Districts.

Urban Community Parks are expected to be a minimum of 5 acres and located within Growth Centres and provide opportunities for both organized and passive recreation activities. Such parks will constitute a focal point for athletic and recreational activities and will have frontage on a residential Major Collector Road, be accessible by auto, public transit (where applicable) and bicycle, and have adequate parking space available.

Rural Community Parks should be of sufficient size to accommodate the needs of residents living in Hamlets or crossroad communities that are not easily accessible to urban community parks. Those parks are not intended to provide the same concentration of facilities as urban parks.

County Parks are intended to serve all County residents and tourists; to provide large wooded areas which may include a full range of recreational/leisure uses in association with water based recreational opportunities or unique wilderness area. Eligible areas may also include small sites in proximity to unique areas, tourist destination points or heritage sites.
4.3.2 Heritage Sites and Natural Areas

It is intended that Natural Environment open space areas will remain in their natural state although some may become part of the passive recreation open space resources to be used for educational outings or provide linkage between parks and other recreation or open space areas. Heritage sites may provide a focus for park areas.

Upon completion of the Parks and Recreation Open Space Study Council recognized the opportunity for water based activities on some of the 86 inland lakes within the County and adopted the Water-Based Recreation Study in 1986.

4.3.3 Water-based Recreational Areas

The 1986 Water-Based Recreation Study recommends that only lakes in excess of 100 acres be considered for encouraging public access for water-based recreation with the exception of smaller lakes close to the Growth Centres. It is intended that preference be given to providing municipal open space for water based recreation activities on lakes with active cottage development.

The Study targets the following lakes for consideration of municipal investment:

Aylesford Lake - long range development plan to be implemented
Loon Lake - possible canoe route and boat launch
Black Duck Lake - ensure public access is maintained if cottage development continues
Tupper Lake - maintain boat access point
Mack Lake - possible municipal boat access

4.3.4 Recreation Strategy

The two study documents mentioned above continue to provide the framework of Council’s goals with respect to the provision of recreation opportunities.

In 1990, a third document, the Recreation Strategy was adopted by Council. The Strategy outlines the responsibility of the Municipality's Department of Community Development Services, in meeting the goals of the
Municipality and sets out objectives with respect to leisure activities and makes specific recommendations regarding:

- liaison and cooperation with citizen groups
- liaison and cooperation with other government departments and agencies
- targets groups to ensure wide participation in programs and accessibility for all residents
- promotion and information
- service delivery

The Study concludes with recommendations that a review be undertaken and specific strategies and targets be developed to implement the Parks and Recreation Open Space and the Water-Based Recreation studies.

New study areas include an examination of potential recreational opportunities along the Fundy Coast as well as the Minas Basin.

Further, lakeshore capacity studies commissioned by Council shall take into account existing municipal open space for water and wetland based recreation activities as well as making provision for future public uses in long range development plans.

4.3.5 Parks, Recreation and Open Space Objectives

4.3.5.1 To provide for recreation opportunities, parks and open space by acquiring lands under the provisions of the Municipal Government Act in accordance with the Subdivision Bylaw.

4.3.5.2 To provide direction for site acquisitions.

4.3.5.3 To achieve an integrated parks and open space system that provides opportunities for a variety of leisure activities to both rural and urban residents as well as tourists.

4.3.5.4 To indicate the roles and responsibilities of the various Municipal departments in achieving the overall objectives.

4.3.5.5 To ensure that the public has access to water-based recreational activities.

4.3.5.6 To indicate future study areas.
4.3.6 Parks, Recreation and Open Space Policies

4.3.6.1 Council intends to provide for the development of parks including urban and rural community and neighbourhood parks as well as County parks and trail systems. Recreation facilities may be located within the park areas.

4.3.6.2 The Department of Community Development Services shall liaise with residents, community groups and other government departments promoting the Recreation Services in the Municipality.

4.3.6.3 Council intends that the Municipality's Department of Community Development Services be responsible for co-ordinating the site selection process, the development of parks and the delivery of leisure services under the guidance of the following studies:

a. the Parks and Recreation Open Space Study, dated 1984

b. the Water-based Recreation Study, dated 1986

c. the Recreation Strategy, dated 1990

The department shall provide advice on these matters to Council through the Committee of the Whole.

4.3.6.4 Council shall require, through the Subdivision Bylaw a subdivider to convey to the Municipality for park, playground, or other public purposes up to five percent of the area being subdivided in the final plan. Alternatively Council may accept in lieu of the land requirements a sum of money equal to five percent (5%) of the assessed value of the proposed lots, or combination of land and money.

Council may waive or reduce the requirements of this policy where:

a. only one new lot is created by the same owner in the same calendar year; or

b. buildings legally exist on the created lots; or

c. the lots created are to change the size and shape of existing lots and the new lots would be of insufficient size to permit further development for residential purposes.
4.3.6.5 Council recognizes community and neighbourhood parks as being an integral part of the developed areas of the Municipality and shall permit their development in residential zones.

4.3.6.6 Council has established a hierarchy of parks as follows:

**Urban Community**

a. generally intended to serve a Growth Centre and the surrounding rural area, include parking facilities and be located on a designated Major Collector street. Types of uses may include the full range of recreation facilities for both active and passive leisure uses. These parks are generally intended to be at least five acres

**Urban Neighbourhood**

b. generally intended to serve a neighbourhood population of approximately 250 - 500 in Growth Centres, between .5 - 2 acres in size, be accessible for pedestrians from the surrounding community and be located on local or collector streets. Types of uses may include tot lots, playgrounds and/or landscaping with benches

**Rural Community**

c. generally intended to serve the rural community and may be located in Hamlets or crossroad communities that are not accessible to urban facilities. These facilities will generally be similar to urban community parks, but of a smaller scale generally 2 - 5 acres

**Rural Neighbourhood**

d. generally intended for the Country Residential areas, serve at least 100 dwellings, between .5 - 2 acres and provide for a range of activities similar to the urban neighbourhood parks

**County Parks**

e. generally intended to serve all County residents and tourists; to provide large wooded areas which may provide for a full range of recreational/leisure uses and may be developed in association with water-based
recreation opportunities, camping areas, heritage sites, or tourist destination points. May also include small areas in proximity to heritage sites or tourist destination points.

4.3.6.7 Council intends that each Growth Centre have a minimum of one Urban Community park to serve the Growth Centre and the surrounding rural area. The function of this park shall be to provide facilities for physically active pursuits as well as open areas for passive recreational activities.

4.3.6.8 Council intends that Urban Neighbourhood parks should be provided in residential neighbourhoods within the Growth Centres.

4.3.6.9 Council intends that Hamlets should play an important role in meeting the open space needs of rural residents where these needs cannot be met by urban parks.

4.3.6.10 Where rural needs cannot be met in a Hamlet or Growth Centre, Rural Community parks may be located in the rural districts at crossroad communities.

4.3.6.11 Rural Neighbourhood parks may be provided within Country Residential Districts when the growth potential for the area indicates an open space facility is required.

4.3.6.12 Sites for water based recreation opportunities may be acquired within the Municipality to provide residents and tourists with the opportunity to pursue water related leisure activities. Such sites may be acquired at locations which will provide for the needs of the County residents generally, but will have minimum conflict with cottage development.

4.3.6.13 Potential salt water beach areas, canoe routes and hiking trails may be investigated and documented, possibly in cooperation with other government agencies, for consideration of future recreation pursuits of residents and visitors to Kings County.

4.3.6.14 Environmental open space areas, tourist and/or heritage sites and wildlife areas may become part of the open space system for recreation subject to the policies of Natural Environment and Heritage Preservation and Tourism Development Sections of this Strategy.
4.3.6.15 Council shall provide for the development of parks and open space pursuant to the policies in the Urban and Rural parts of this Strategy. A Parks and Open Space designation will be established for the Growth Centres. However, Parks and Open Space areas in the Rural District will not be specifically designated on the Future Land Use Map.

4.4 HERITAGE AND CULTURAL PRESERVATION AND TOURISM DEVELOPMENT

It is fortunate that physical evidence of the many centuries of human heritage can still be found in Kings County. This evidence is reflected in the rural landscape, particularly the reclaimed tidal marshes (the dykelands) which illustrate the beginning of farming activity in Nova Scotia. In addition, many sites and buildings are significant to the history of the peoples of Kings County from the Micmacs, through the times of the Acadians, followed by the New England Planters, and the United Empire Loyalists settlement and development to the present day.

Clearly the presence of heritage sites and buildings and the scenic qualities of the countryside are an asset to the community for its own pleasure and identity as well as a strong attraction to visitors. The aesthetic qualities of the resource areas and the significance of some sites to Nova Scotians, indeed Canadians, suggests that Tourism Development and Historic Preservation must go hand in hand to ensure that the development of the tourism industry is sensitive to the fragile resource upon which it is largely based.

Kings County's natural Heritage provides additional points of interest to tourists and enhances the scenic quality of the County. Such areas include Blomidon Provincial Park, natural areas such as Cape Split and the Kentville Ravine, the Look Off, Cape Blomidon, the fundy coastline, the Minas Basin and the Gaspereau Valley. The significance of these features to both residents and visitors should be recognized in the Strategy and consideration should be given to the preservation of these areas and scenic routes through the County.

Long traditions such as the Apple Blossom festival and new traditions such as the Kings County Airport Fly-in are attracting larger audiences annually. Support for these activities, and the many other community events spread throughout the season will continue.

Council recognizes that adaptive reuse of heritage resources is vital to their continued preservation Policies for the development of unique historic places possessing heritage value involving the provision for uses not normally permitted in a zone and allowing alternate subdivision and lot standards are contained in Section 5.2.

4.4.1 Heritage and Cultural Preservation and Tourism Development Objectives

4.4.1.1 To protect and enhance the County's natural, built, and cultural heritage.

4.4.1.2 To recognize and plan for the protection and enhancement of unique heritage districts, scenic routes and points of interest.
4.4.1.3 To support the protection, preservation and restoration of significant historic buildings and sites.

4.4.1.4 To provide opportunities for expanded tourism development and encourage tourist-related commercial uses.

4.4.2 Heritage and Cultural Preservation and Tourism Development

4.4.2.1 Council intends to encourage a greater liaison with the Nova Scotia Department of Tourism, Culture and Heritage to establish objectives for tourist development.

4.4.2.2 Council intends to cooperate with other levels of government and local groups in establishing additional heritage sites, scenic or historic travelways.

4.4.2.3 Council intends to support the development of off-season activities and events to encourage greater use of tourist facilities.

4.4.2.4 Council shall encourage development projects to revitalize or recreate traditional and cultural activities such as crafts and early farming methods of particular interest to tourists. In the interest of promoting such projects within the farm community, Farm Museums are a permitted use in the Agricultural Districts as per Section 3.2.

4.4.2.5 Council intends to promote tourist attractions, events and activities to benefit the tourist industry in Kings County.

4.4.2.6 Council intends to provide for the establishment of Tourist Destination Points and consider tourism related land uses in such areas.

4.4.3 Reuse of Heritage Buildings

In 1986, the Municipal Planning Strategy recognized that certain buildings within the Municipality are of historical significance and their preservation is in the public interest. While every possible means shall be explored to allow a building to be used for a use normally permitted within the district in which the property is located, it is recognized that alternative development may be considered to provide an opportunity to preserve an historic building. Such alternative developments may include medium density residential uses, private or public museums and other public uses,
institutional uses and tourist commercial uses which enhance the cultural or historic heritage of the County.

4.4.4 Heritage Buildings - Reuse Policies

4.4.4.1 Council may consider proposals for the development of buildings of historical significance in a manner which would not normally be permitted within the district in which the property is located subject to the proponent entering a Development Agreement with Council under the relevant policies of this Strategy and the provisions of the Municipal Government Act. Eligible uses include medium density residential, institutional and tourist commercial.

In considering entering a Development Agreement, Council shall have regard to the following:

a. the building proposed to be developed is recognized as being of historical significance and as such is registered as a Municipal Heritage Property or a Provincial Heritage Property or a heritage building located within a Heritage Conservation District. Proposals for Development Agreements will generally be referred to the appropriate Heritage Advisory Committee for their input

b. where the proposal is for a tourist commercial use the activity should be appropriate to the historical significance of the building in terms of compatibility with the features of the building which make it historically significant

c. the architectural design in terms of building materials, exterior treatment, roof lines, bulk and scale and the landscaping features of the proposal shall be compatible with the historical significance of the building

d. the privacy of adjacent residential uses can be protected where required through the provision of natural or artificial buffering

e. the proposal does not adversely impact upon adjacent uses by reason of such matters as traffic generation, parking, outdoor display and storage, noise, and hours of operation
f. the proposal must be provided with adequate on-site or central servicing to prevent adverse impact on public health and the environment

g. the proposal is in keeping with all applicable policies of this Strategy including those respecting Development Agreements contained in Part 6 of this Strategy

4.4.4.2 The application for an agreement referred to in Policy 4.4.4.1 shall be accompanied by a site plan showing the proposed site characteristics including landscaping, buffering and location of buildings, and that the development of the property will be in accordance with the site plan. The conditions of the development agreement may regulate matters listed in Policy 6.3.3.1 and any of the following:

a. architectural compatibility with the historical significance of the building in terms of design, scale and building materials and the external appearance of structures

b. the public display of advertisements including the nature, kind, size and description of any advertisement displayed

c. fences and walks

d. the period of time for which temporary development may be permitted.

4.4.4.3 In considering proposals under this Subsection 4.4.4, Council may make provision in the Development Agreement for the construction of a new accessory residential structure under the following conditions:

a. additional accommodation is necessary for, and the new structure is proposed to be used as a residence which would be accessory to commercial uses that are conducted within a Heritage Property

b. the new residence will be compatible with and not detract from the character of the Heritage Property in terms of external design and the scale of the new building

c. Council shall consider and be satisfied that to permit the additional residence would not conflict with any other applicable policy of this Strategy, particularly those related to the protection of agricultural resources and
activities. In this regard particular consideration will be given to the following:

i. compatibility - the additional residence will have little or no negative impact on adjacent land uses that would create a conflict

ii. the site can accommodate an adequate on-site sewage disposal system to accommodate the existing and the proposed additional use

iii. protection of agricultural resources in the Agricultural District - any approved site will have limited agricultural potential due to the site characteristics such as the following:

- the lot size is insufficient or unsuitable for agricultural uses due to lot size or existing uses on the site
- topographical or other features of the subject site and adjacent land such as steep slopes, watercourses, road patterns or the existence of drainage ditches which create isolated parcels that makes the site unsuitable for productive agricultural purposes

iv. the addition of a new structure will not further impact or conflict with the protection of agricultural land to any greater extent than that caused by the development and reuse of the Heritage Property as provided by Section 4.4.4

d. the Development Agreement may specify a minimum lot size if recommended by the Nova Scotia Department of Health to accommodate (an) on-site system(s)

4.4.5 Historic Properties, Sites and Settings

Some buildings and sites have been designated and registered as heritage properties or sites by the Canadian or the Nova Scotia governments. Prescott House and Grand Pre Historic Park are designated and open to the public. The opportunity also exists for the County to become involved in the registration and preservation of heritage properties and/or streetscapes under the Provincial Heritage Property Act.
Interest in municipal involvement in the preservation of heritage resources has been expressed during the review of the Strategy especially from Canning and Grand Pre. As well, the provincial government has consulted with organizations in Grand Pre regarding change to the legislation to enable the designation of Heritage Conservation Districts. Legislation to provide for the designation of Heritage Conservation Districts was adopted by the Province in 1991.

The Municipality may use the provisions of the *Heritage Property Act* and the *Municipal Government Act* to protect and enhance the County's natural, historical and cultural heritage. To provide for municipal registration of heritage properties Council, by bylaw, establishes the program and a Heritage Advisory Committee (H.A.C.) under the *Heritage Property Act*. To provide for the protection of heritage areas a Heritage Conservation District overlay Designation has been created. In 1992, Grand Pré was identified as an area to be studied for future heritage conservation and given a Heritage Conservation District overlay designation. The study was concluded in 1997 and the overlay designation was subsequently replaced in Grand Pré with a new Hamlet Historic Residential District and corresponding zone in 1999.

### 4.4.6 Historic Properties, Sites and Settings – Policies

4.4.6.1 Council shall encourage proposals for historical restoration projects and the preservation of sites of historical significance.

4.4.6.2 Council shall establish a heritage program and process pursuant to the provisions of the *Heritage Property Act*. The purpose of this program is to identify and designate buildings, streetscapes, and areas of historic architectural or cultural value to provide for their preservation, protection and rehabilitation and encourage their continued recognition and use.

4.4.6.3 Council shall, by bylaw pursuant to the *Heritage Property Act*, establish a Heritage Advisory Committee (H.A.C.) and a municipal registry of heritage properties. The Heritage Advisory Committee shall consist of at least two elected members of Council and shall advise and provide recommendations to Council respecting:

a. the addition or deletion of buildings, streetscapes and areas in the municipal registry of heritage properties

b. any application for permission to substantially alter or demolish listed heritage property
c. the preparation, amendment, revision or repeal of a conservation plan and conservation bylaw

d. the administration of heritage conservation districts pursuant to the provisions of the Heritage Property Act

e. any application for a certificate that is required by the Heritage Property Act or the conservation plan and conservation bylaw to go to a public hearing

f. any other actions of the Municipality which may affect listed heritage properties such as land use changes for Council's consideration in the vicinity of a listed heritage property

4.4.6.4 Council shall establish a Heritage Conservation District Overlay designation for application to areas of historical significance. Such designation shall be indicated by the symbol "(hcd)" on the Future Land Use Maps.

In 1992, this temporary overlay designation was given to Grand Pré to identify it as a community that warranted further study regarding its heritage. The same year, a study was initiated that provided the basis for the Plan and Bylaw (with Design Guidelines) for the Grand Pré Heritage Conservation District. In 1999, Council adopted the Plan and Bylaw, and the temporary symbol (hcd) was removed and replaced by a new Hamlet Historic Residential District, corresponding with a newly created Hamlet Historic Residential (R9) Zone.

Council may in future apply this Heritage Conservation District Overlay designation to any other areas within the County that warrant further study with regard to their heritage or historical significance.

4.4.7 Heritage Trails, Scenic Travelways and Tourist Destination Areas

In 1979, the Strategy noted that the then Department of Tourism promoted the establishment of Tourist Destination Areas (T.D.A.). This concept is no longer being promoted by the Province. The Nova Scotia Department of Tourism, Culture and Heritage now promotes scenic travelways such as the Evangeline and Glooscap Trails which pass through the County. The Municipality can support this initiative by paying special attention to the upkeep of properties along these travelways through the enforcement of its bylaws and by restricting certain uses; also, by encouraging uses such as bed and breakfasts, country inns, tea rooms and craft stores along these
routes at specific points where development already exists. Tourism uses may also be considered at scenic, heritage or other interesting destination areas in the County such as at the Look-Off. However, to ensure there is no negative impact on resource activities or the scenic quality of the landscape, special attention should be given to such development.

4.4.8 Heritage Trails, Scenic Travelways, Tourist Destination Areas and Tourist Commercial Facilities (Lodging and Food Services)

4.4.8.1 Council recognizes the Province's designation and promotion of the Glooscap and Evangeline Trails and intends to support the provincial initiative by encouraging tourist related businesses in communities on the Glooscap and Evangeline Trail routes.

4.4.8.2 Council shall have regard to the aesthetic qualities of land use activities along the rural sections of these trails which are promoted by the Nova Scotia Department of Tourism, Culture and Heritage. In this regard, when considering changes in policy or zoning, certain development standards may be applied which provide for screening uses from view from the highway.

4.4.8.3 Council intends to establish "Tourist Destination Areas" at places in the County which offer unique panoramic or other unique features or close to a significant heritage site, structure or setting.

4.4.8.4 Council will permit "as of right", small scale proposals for developments for tourist commercial facilities for lodging, food services, and ancillary uses, in the Forestry, Country Residential, Hamlet Historic Residential, and Shoreland Districts, subject to the provisions of this Section and Section 10.1.5 of the Land Use Bylaw, except in Shoreland Districts on the South Mountain, where proposals for Tourist Commercial facilities for lodging, food services and ancillary uses may be considered by Development Agreement only according to the policies under subsection 3.5.7 of this Strategy.

In providing for small scale tourist commercial facilities for lodging and food services as of right, it is Council's intent to ensure that this type of development be well separated and well buffered from surrounding residential properties in order to minimize the potential nuisance created by a commercial
use. Driveway access to these facilities shall also be regulated.

"Small scale proposals" for tourist commercial facilities for lodging shall mean the following:

a. no more than five (5) tourist cabins, with total floor space of all cabins being less than 5000 square feet; or

b. an inn, lodge, or resort (as defined in the Land Use Bylaw), with no more than 10 guest rooms, with total floor space of the building less than 5000 square feet; or

c. a combination inn, lodge, or resort with tourist cabins, with floor space of all buildings less than 5000 square feet, and total number of guest rooms in all buildings no more than 10

Small scale proposals shall not include:

a. a tourist commercial food service facility which caters to the general public, that is, members of the public which are not overnight guests

4.4.8.5 Proposals for larger scale tourist commercial facilities for lodging, food services, and ancillary uses or proposals for small scale tourist commercial facilities for lodging, food services, and ancillary uses which do not fulfill the requirements of the Land Use Bylaw Section 10.1.5 II (Provisions for Tourist Commercial Uses Permitted as of Right) in the Forestry, Country Residential, Hamlet Historic Residential and Shoreland Districts and all such proposals in the Shoreland Districts in the South Mountain, including facilities for food service which cater to the general public, (i.e., a full service restaurant) shall be considered by Development Agreement, in accordance with the provisions below:

a. the facilities must be constructed in a manner which are architecturally compatible with other buildings in the surrounding area, and feature a pitched roof, natural, wood, stone, or brick cladding materials

b. the site facilities must be adequately buffered and well separated from surrounding residential dwellings, (other than a residential dwelling occupied by the operator), with
a significant vegetative buffer, or other significant visual buffer, to mitigate noise, light, and other visual impacts

c. proposed site alteration, grading and landscaping must be sympathetic to the natural landscape and any significant natural features on the site, including significant woodland areas, watercourses and wetland areas, and steep slopes

d. the site must be capable of accommodating on-site sewage disposal systems and must also not pose any threat to the ground water supply, in terms of water quality or water quantity, for surrounding properties

4.4.8.6 The Tourist Destination Areas shall be established by Amendment to this Strategy and shown on the Future Land Use Maps by an appropriate symbol. In considering designating Tourist Destination Areas Council shall have regard to the Goals, Objectives and Policies of this Strategy.

4.4.8.6.1 The following area is designated as a Tourist Destination Area:

a. the Oaklawn Farm Zoo and surrounding area. This Tourist Destination Area shall include all properties fronting onto Ward Road, between the boundary of the hamlet of Millville to the east, and Palmer Road to the west. The general location is noted by a shaded circle containing the letters TDA1 on Map 15, the Future Land Use Map

b. Halls Harbour. This Tourist Destination Area shall include all properties within the Hamlet of Halls Harbour. The general location is shown by the letters (TDA2) on Map 23 within this Strategy

4.4.8.7 Council may consider proposals for tourist related commercial uses in areas designated as Tourist Destination Areas subject to the owner entering a Development Agreement with Council under the provisions of the Municipal Government Act.

In considering a Development Agreement, Council shall have regard to the following:
a. the range of uses is limited to those oriented to Tourists and may include, but not be limited to, food, lodging, arts, museums and crafts

b. uses must be housed in structures which are architecturally compatible with the surrounding landscape and specifically involve pitched or similar roof design, natural, wood, stone or brick exterior cladding materials

c. the proposal must be relatively limited in scale so as not to substantially alter the landscape or result in strip commercial development

d. proposed landscaping must be sensitive to the site characteristics and surrounding area

e. the site must be suitable for the proposed use in terms of steepness of grades, soil and geological conditions; or location relative to watercourses, marshes, swamps and bogs

f. the site must be capable of accommodating on site sewage disposal system and water supply where central services are not available

g. the proposal must meet all other pertinent policies of this Strategy, including those applicable to Development Agreements in Part 6

4.4.8.8 For the Halls Harbour Tourist Destination Area (TDA2), Council shall also have regard to the following in considering a development agreement:

a. lot coverage shall not exceed 50%.

b. parking is not permitted in front yards.

c. off-street parking requirements may be met off-site where:

- a parking lot available to the general public which has sufficient capacity to accommodate parking from the proposed development is within 500 feet of the subject property, or
4.4-12

- the developer can demonstrate that sufficient off-street parking has been secured for use by the development which is within 500 feet of the subject property

d. signs shall be made of metal or wood. No internally illuminated signage is permitted.

4.4.9 Tourism Promotion and Directional Signs

Signs are strictly controlled for the purposes of safety to motorists and to ensure the scenic rural character is maintained. Businesses which depend on the tourism industry, however, have expressed concern about the inability to obtain off-site signs and have requested Council to reconsider the restrictive nature of the sign policy. In response to these requests, but with the view of maintaining the goal of the Municipality which is to ensure the rural character is preserved, the Municipality requested the Nova Scotia Department of Transportation and Infrastructure Renewal and the Department of Tourism, Culture and Heritage to work with the Municipality to establish a pilot standardized directional signage program to permit businesses to obtain signs to direct the travelling public to their businesses.

A lack of response from the provincial departments led to the Municipality amending the Land Use Bylaw to allow businesses in the rural areas to post off-site standardized directional signs.

4.4.10 Tourism Promotion and Directional Signs Policy

4.4.10.1 Council shall establish a standardized directional sign program for businesses in Kings County and will continue to encourage the Nova Scotia Department of Transportation and Infrastructure Renewal and the Department of Tourism, Culture and Heritage to provide assistance.

4.4.11 Tourism and the Municipal Airport

Over time the Kings County Municipal Airport is likely to increase in importance as an entry point for visitors. The opportunity this would present in areas close to the Municipal Airport in Waterville should not be lost. It may be possible to create a gateway for visitors and encourage a mix of commercial uses that includes services to visitors. As a minimum, care should be taken to ensure that development occurs in a way that is sensitive to its location. The area in proximity to the Airport provides a first impression to visitors arriving by air.
4.4.12 Tourism and the Municipal Airport Policy

4.4.12.1 Council shall encourage uses compatible with airport activities in the vicinity of the airport. Further, businesses serving the airport, including tourism related uses will be encouraged.

4.4.13 Resort Comprehensive Development District (RCDD)

The Old Orchard Inn is ideally located relative to the region's highways, tourist attractions, towns and villages. It is also the principal conference and tourist accommodation facility in Kings County. The Inn's large conference facilities attract an increased number of visitors and tourists to the region and likely encourages them to extend the duration of their visit. For these reasons, it plays a central role in the region's tourism industry.

The Old Orchard Inn has operated since 1972. Subsequent Plan amendments such as the adoption of new soils maps have prevented its expansion because it is located on class 2/3 and active class 4 soils. Notwithstanding this fact and sections 3.3 of this Strategy, it is Council's intent to designate land owned or leased by the Old Orchard Inn as a Resort Comprehensive Development District. Council will consider permitting resort development to occur by Development Agreement.

4.4.14 Resort Comprehensive Development District Policies

4.4.14.1 Council shall establish a Resort Comprehensive Development District (C12) Zone in the Land Use Bylaw. The primary use of this land shall be for recreational, conference and tourism accommodation uses.

4.4.14.2 The Resort Comprehensive Development District Zone shall apply to lands at the southwest corners of the Greenwich interchange of Highway # 101.

4.4.14.3 Council may consider proposals for tourist related commercial uses in the C12 Zone by a Development Agreement under the relevant provisions of the Municipal Government Act.

In considering entering a Development Agreement, Council shall have regard to the following:

a. the area is suitable for the proposed use in terms of steepness of grade, soil and geological conditions; or
location relative to watercourses, marshes, swamps or bogs

b. the adequacy of storm drainage and the effect of any proposed drainage plan upon adjacent uses and watercourses

c. the adequacy of existing and proposed road networks within, leading to and adjacent to the site

d. the adequacy of buffering and setbacks between resort development and any abutting resource activities or residential uses

e. considerations for amending the Land Use Bylaw contained in Part 6 of this Strategy

4.4.14.4 The Development Agreement referred to in 4.4.14.3 may include the following:

a. site plans showing the proposed site characteristics including circulation parking, access/egress points, services, buildings, landscaping, buffering and lot lines

b. construction practices which are required to minimize negative environmental impacts due to the altering of land levels; or the excavation or filling in of land

c. proposed timing of each phase of the development

d. any other matter deemed advisable by Council and permitted by the Municipal Government Act and the criteria for Development Agreements contained in Part 6 of this Strategy

4.4-15
4.5 THE FISHING INDUSTRY

Unlike the remainder of the province, fishing plays a very small role in the economy of Kings County, accounting for only 0.2% of provincial catches resulting in only 0.2% of the total value. (Nova Scotia Department of Industry, Trade and Technology, Annapolis Valley Region Statistical Profile, 1988)

Surface fish such as herring, mackerel, and salmon and esturial species such as smelts and alewives comprise the bulk of landings with lobster being the main ground fish caught.

4.5.1 The Fishing Industry Policy

4.5.1.1 Council shall encourage and support necessary improvements to maintain or increase the value of the fishing industry in the County.
4.6 RESOURCE EXTRACTION

Significant reserves of sand, gravel and other aggregate minerals underlie Kings County. The Municipality has no direct authority under the Municipal Government Act over extraction of these minerals, and can only control related land uses and future land uses after the extraction operation has ceased. Depending on the physical condition of abandoned pits and quarries, and the results of any reclamation efforts, sites may be suited to a wide, or narrow, range of post-extraction uses. Sites may lend themselves to subsequent industrial, residential, recreational or commercial uses.

Extraction operations can occur in areas designated for any land use. Related land uses are essentially industrial in nature but it is not always desirable to zone extraction sites Industrial because future industrial uses, not in keeping with the policies of the Municipal Planning Strategy, may occur. Therefore, creating a land use zone to limit post extraction uses to a very narrow range offers Council the greatest degree of control over future land uses to ensure future uses are in keeping with Council's Municipal Planning Strategy objectives.

4.6.1 Resource Extraction Policies

4.6.1.1 Where existing aggregate resource extraction operations occur in any District, Council may wish to reserve a decision on the most suitable use of the land in the future. In order to recognize and limit the extraction operation to those related to the removal of sand, gravel and rock, Council shall establish the Resource Extraction (M7) Zone, in the Land Use Bylaw. Permitted uses shall include those strictly incidental to the extraction of aggregates.

4.6.1.2 Requirements of the M7 Zone are intended to ensure buffering of accessory uses from adjacent uses.

4.6.1.3 In circumstances where optimum future land use suitability of an extraction site is undetermined, Council shall zone existing operations Resource Extraction (M7).

4.6.1.4 When considering proposals for rezoning lands to allow for uses incidental to extraction operations such as concrete batching, asphalt manufacturing and outdoor storage, Council shall require the following criteria to be satisfied:

a. the site to contain the incidental uses is at least 1000 feet from the nearest residential lot or any designated Residential District

b. the site meets all requirements of the Land Use Bylaw for the Resource Extraction (M7) Zone
c. the proposed rezoning satisfies all relevant policies of this Strategy including the policies in Section 6.2 respecting Amendments to the Land Use Bylaw

4.6.2 Special Case – Bond Road Sand Pit Operation

On December 20, 2004 the Minister of Environment and Labour approved a sand pit operation proposed by Twin Mountain Construction Ltd. for a site located on the Bond Road in Waterville, PID Nos 55168868 and 55370829. Provincial approval was issued following the completion of a comprehensive environmental assessment of the site. In addition to operating an extractive pit operation, Twin Mountain Construction Ltd. also wishes to operate a soil mixing operation that will involve the importation, storage and mixing of other soil and aggregate as well as organic materials for the purpose of producing a commercial topsoil product. Council believes that the soil mixing operation, which falls within municipal jurisdiction, would be compatible with the pit operation and would not significantly increase the overall impact on the surrounding area.

4.6.2.1 It shall be the policy of Council to consider a topsoil and aggregate mixing operation in conjunction with a provincially approved sand pit operation on lands located on the Bond Road in Waterville. The specific limits of the site correspond with the following metes and bounds description:

"HOME FARM"

ALL that lot of land situated at Waterville, in the County of Kings and Province of Nova Scotia, more particularly bounded and described as follows:

COMMENCING at Nova Scotia Control Monument Number 7661;

THENCE South 84° 22' 57" East a distance of 411.68 feet to a survey marker set on the east sideline of the Bond Road;

THENCE South 17° 27' 48" East along the east sideline of the Bond Road a distance of 318.23 feet to a survey marker set at the southwest corner of Lot 1-97, being lands conveyed to Norma Tweedie and Alex Milne by Deed recorded in the Registry of Deeds for the County of Kings in Book 1110 at Page 821, and shown on a survey plan on
file in the Registry of Deeds for the County of Kings as Plan No. P-10709, and being the point of BEGINNING;

THENCE North 72° 51' 25" East along the south sideline of Lot 1-97 a distance of 244.15 feet to a survey marker;

THENCE North 17° 27' 48" West along the east sideline of Lot 1-97 a distance of 318.23 feet to a survey marker;

THENCE North 72° 51' 25" East along the south sideline of Lot 2-97 reserved by Norma Milne and Murray Tweedie a distance of 230.53 feet to a survey marker set in the west sideline of Lot N-T;

THENCE South 15° 28' 15" East along the west sideline of Lot N-T, being lands conveyed by Murray Tweedie and Norma Tweedie to Pleasant Valley Enterprises Limited a distance of 533.71 feet to a survey marker;

THENCE North 76° 11' 33" East along the south sideline of Lot N-T a distance of 330.79 feet to a survey marker;

THENCE in a southerly direction along the west sideline of lands now or formerly of A.D. Rafuse and Sons a distance of 600.00 feet more or less to their southwest corner;

THENCE in an easterly direction along the south sideline of lands now or formerly of A.D. Rafuse & Sons a distance of 800 feet more or less to the west sideline of lands now or formerly of Reginald Swinamer;

THENCE in a southerly direction along the west sideline of lands now or formerly of Reginald Swinamer a distance of 400 feet more or less to Swinamer’s southwest corner;

THENCE in a westerly direction along the north sideline of the Watts Farm a distance of 1060 feet more or less to the northeast corner of lands conveyed by the Nova Scotia Farm Loan Board and Murray and Norma Tweedy to A B S Poultry Limited by deed recorded in the Registry of Deeds in Book 482 at Page 192;

THENCE westerly along the north sideline of lands now or formerly of A B S Poultry Limited a distance of 345 feet more or less to the south east corner of lands now or formerly of Chester Walsh;

THENCE in a northerly direction along the east sideline of lands now or formerly of Chester Walsh a distance of 21 ½
rods more or less to the northeast corner of lands now or formerly of Chester Walsh;

THENCE in a westerly direction along the north sideline of lands now or formerly of Chester Walsh a distance of 12 rods to the east sideline of the Bond Road;

THENCE in a northerly direction along the east sideline of the Bond Road a distance of 1,200 ± feet to the point of BEGINNING. CONTAINING 25 acres more or less.

BEING AND INTENDED TO BE the residue of Lot 1, being the Kenneth Taylor "Home Farm" conveyed by the Nova Scotia Farm Loan Board to Murray H. Tweedie and Norma Tweedie, now Norma Milne, by Deed dated August 26, 1991 and recorded in the Registry of Deeds for the County of Kings in Book 873 at Page 93.

SUBJECT HOWEVER to an easement to Nova Scotia Power Inc. for an electrical transmission line. See Plan P-10,709.

"WATTS FARM"

ALL that lot of land situated at Waterville in the County of Kings and Province of Nova Scotia, more particularly bounded and described as follows:

BEGINNING at a survey marker set 541.6 feet more or less east of the east sideline of the Bond Road at the northeast corner of lands conveyed by the Nova Scotia Farm Loan Board and Murray and Norma Tweedy to A B S Poultry Limited by deed recorded in the Registry of Deeds in book 482 at Page 192;

THENCE in an easterly direction along the south sideline of the property known as the "Kenneth Taylor Home Farm" a distance of 1060 feet more or less to the southwest corner of lands now or formerly of Reginald Swinamer;

THENCE in an easterly direction along the south sideline of lands now or formerly of Reginald Swinamer a distance of 400 feet more or less to a survey marker set in the northwest corner of Lot 3-97, being an 8.26 acre lot reserved by Murray Tweedie and Norma Milne as shown on a survey plan on file in the Registry of Deeds as Plan No. P-1O,772;
THENCE South 14° 11' 05" East along the west sideline of Lot 3-97 a distance of 1025.75 feet to a survey marker set in the north sideline of lands conveyed by Murray Tweedie and Norma Tweedie to Prospect Industrial Equipment Sales and Rentals Limited being Lot l-M.T., as shown on a survey plan on file in the Registry of Deeds as Plan No. P-lO,037;

THENCE South 41° 51' 35" West a distance of 578 feet more less to a survey marker set in the northwest corner of Lot l-M.T.;

THENCE South 14° 07' 05" East along the west sideline of Lot l-M.T. a distance of 1,000 feet more or less to lands now or formerly of Darrell Geddes;

THENCE in a westerly direction along the north sideline of lands now or formerly of Darrell Geddes a distance of 900 feet more or less to the southwest corner of Lot N.T.-l, being lands conveyed by Murray and Norma Tweedie to Kellie Corkum;

THENCE North 11° 04' 40" West along the east sideline of Lot N.T.-l a distance of 506.90 feet to a survey marker;

THENCE North 80° 49' 27" West along Lot N.T.-l a distance of 308.95 feet to a survey marker;

THENCE North 05° 13' 25" West along the east sideline of Lot M.T.-l a distance of 165.83 feet to a survey marker set in the southeast corner of lands conveyed by Murray Tweedie and Norma Tweedie to Eugene Blackburn, as shown on a survey plan on file in the Registry of Deeds for the County of Kings as Plan No. P-2313;

THENCE North 11° 24' East (magnetic) along the east sideline of lands conveyed to Eugene Blackburn a distance of 285.2 to a survey marker set in the northwest corner of said lands;

THENCE North 82° 09' West (magnetic) along the north sideline of lands conveyed to Eugene Blackburn a distance of 355.0 feet more or less to the east sideline of the Bond Road;

THENCE in a northerly direction along the east sideline of the Bond Road a distance of 850 feet more or less to the southwest corner of lands now or formerly of A B S Poultry Limited;
THENCE easterly at right angles to the road in the course of South 71° 45' East 551.6 feet to a survey marker set in the southeast corner of lands now or formerly of A B S Poultry Limited;

THENCE North 17° 18' East 500.0 feet along the east sideline of lands now or formerly of A B S Poultry Limited to the point of BEGINNING.

CONTAINING 90 acres more or less.

BEING AND INTENDED TO BE the residue of lot 2, being the "Watts Farm" conveyed by the Nova Scotia Farm Loan Board to Murray H. Tweedy and Norma Tweedy, now Norma Milne, by deed dated August 26, 1991 and recorded in the Registry of Deeds in Book 873 at Page 93.

To allow the use of the property for a topsoil and aggregate mixing operation, Council will require that the property owner enter into a development agreement with the Municipality. Furthermore, this policy is not intended to apply to any other site other than those lands identified pursuant to this policy.

4.6.2.2 In considering a development agreement pursuant to Policy 4.6.2.1, Council shall have regard to the following conditions:

a. that the topsoil and aggregate mixing operation shall only be permitted in conjunction with the provincially approved pit operation;

b. that all activities related to topsoil and aggregate mixing shall comply with the Terms and Conditions for Environmental Assessment Approved, dated December 20, 2004, including but not limited to hours of operation, noise and dust control measures and operational setback and buffer zones; and

c. that topsoil and aggregate mixing activities will be subject to review by the Community Liaison Committee.

4.7 TOPSOIL REMOVAL

The removal of topsoil for commercial sale from Kings County lands has been a long-standing concern facing Municipal Council. This practice is viewed as being extremely detrimental in the Agricultural District, where topsoil removal can severely limit future cultivation. In other zones, complete topsoil removal can create a multitude of problems, including erosion and sedimentation of watercourses. As such, Municipal Council has enacted policies and regulations that prohibit the removal of topsoil for commercial purposes in the Agricultural (A1) Zone and limits its removal in other Zones in the County.

4.7.1 Topsoil Removal Policies

4.7.1.1 It shall be the policy of Council to prohibit the removal of topsoil for commercial sale in the Agricultural (A1) Zone, other than removal that is incidental to sod farming, the sale of plants by nurseries and greenhouses, peat moss extraction and excavation associated with the construction of buildings and infrastructure such as roads.

4.7.1.2 It shall be the policy of Council to regulate the removal of topsoil for commercial sale in all zones outside the Agricultural (A1) Zone, other than removal that is incidental to sod farming, the sale of plants by nurseries and greenhouses, peat moss extraction, and excavation associated with the construction of buildings and infrastructure such as roads, by requiring that:

a. a minimum of 4 inches of topsoil is retained

b. measures are enacted to ensure that retained topsoil is protected from degradation, such as erosion, by planting crops or other means; and,

c. topsoil removal is only undertaken in Summer and Autumn seasons

5.1 DEVELOPMENT REGULATORY POLICIES

5.1.1 Outdoor Lighting Objective

5.1.1.1 To prevent conflicts between adjacent uses resulting from indiscriminate placement of outdoor lighting, particularly flood lights.

5.1.2 Outdoor Lighting Policy

5.1.2.1 Council shall require that all illuminated signs or outdoor lighting be so placed to direct the illumination away from adjoining properties and streets. This requirement will be included in the general provisions section of the Land Use Bylaw and addressed when entering development agreements under the provisions of this Municipal Planning Strategy and the Municipal Government Act.

5.1.3 Swimming Pools Objective

5.1.3.1 To provide a degree of safety from accidents related to swimming pools.

5.1.4 Swimming Pools Policy

5.1.4.1 Regulations shall to the extent possible be included in the Land Use Bylaw pertaining to the location of swimming pools on a lot and the construction of a fence around a swimming pool. Further regulations for swimming pools shall be included in a Swimming Pool Bylaw to ensure that such pools are properly located and sufficiently protected to ensure the safety of neighbourhood residents, particularly small children.

5.1.5 Advertising Signs Objectives

Sign types are as varied as the information they advertise. For example, signs can vary in size, shape, style, material (wood, metal, plastic, etc.), type (ground, canopy, roof, projecting, etc.), site location and zone where they are to be situated. Given the variety and extent of sign usage in the County, the matter of sign control is a "high profile" planning issue requiring a comprehensive set of guidelines.

5.1.5.1 To control signs to ensure an acceptable standard of safety, compatibility and aesthetics is maintained in the County.
5.1.5.2 To respond to the needs of businesses without compromising 5.1.5.1.

5.1.6 Advertising Signs Policy

5.1.6.1 Council shall include provisions in the Land Use Bylaw to regulate the use of signs. Sign regulations, including limits on the number, type, size and location, are intended to ensure safety and aesthetic quality.

5.1.6.2 An off-site tourism promotion and directional sign program is provided for in Policy 4.4.10.1.

5.1.6.3 Council recognizes that businesses facing unexpected disasters, such as fires, natural disasters or other unexpected events, may have a legitimate need to erect a sign in a way that is not normally permitted. Therefore, Council shall include provisions in the Land Use Bylaw that enable businesses facing unexpected disasters to erect temporary off-site signs. Appropriate controls on the location, size and duration of the exception shall ensure an acceptable standard of safety and aesthetics.

5.1.7 Subdivision Policy - 2 houses on a single lot

5.1.7.1 Where two dwellings in existence on a single lot prior to March, 1978 occur, Council shall provide in the Subdivision Bylaw, for subdivision of such lots which do not meet the area or frontage requirements of the zones set out in the Land Use Bylaw.

5.1.8 Parking and Access Policy

5.1.8.1 Provisions shall be included in the Land Use Bylaw which shall set out provisions for off-street parking involving four or more vehicles, location of driveways, and standards regarding their design.

5.2 REUSE OF UNIQUE STRUCTURES AND UNIQUE SITE CHARACTERISTICS AND DEVELOPMENT OF UNIQUE HISTORIC PLACES

5.2.1 Unique Structures

Within both Urban and Rural Districts of the Municipality, certain parcels of land with buildings constructed for commercial or industrial purposes in the past have characteristics which considerably limit their development potential for uses permitted in the assigned land use designation or district. Further, because the former use of the lands did not exist during a period of six months before the adoption of the Municipal Planning Strategy, these parcels could not be classified as legal non-conforming uses. In such situations, Council may permit alternative use of the site and/or unique structure under the Municipal Government Act by Development Agreement.

5.2.2 Unique Site Characteristics

Certain parcels of land may exhibit features which considerably limit their development potential for uses normally permitted in the assigned land use designation and zone due to previous development. In these situations also, Council may permit alternative use of the site under the Municipal Government Act by Development Agreement.

5.2.3 Unique Structures and Unique Site Characteristics Policies

5.2.3.1 Council makes provision for the reuse of existing non-permitted structures subject to a development agreement pursuant to the provisions of the Municipal Government Act pursuant to policy 5.2.3.3.

5.2.3.2 Council may provide for uses not normally permitted in the assigned zone where unique site characteristics significantly limit their potential for development permitted in the zone subject to a Development Agreement pursuant to the provisions of the Municipal Government Act pursuant to policy 5.2.3.3.

5.2.3.3 As provided for in Policies 5.2.3.1 or 5.2.3.2 above, application may be made for a Development Agreement to permit a specific use including any proposed expansion of existing buildings and additional structures and Council shall have regard to the following criteria:

a. the parcel has site or structural limitations from the previous commercial or industrial use which limit the development potential for uses intended for the
designated district or have other unique features which limit the potential for uses normally permitted

b. the site has unique features that may be due to location, physiographic characteristics or site alterations resulting from previous development

c. the previous use has ceased to exist

d. the use shall not exceed or extend beyond the property lines at the time the use became not permitted

e. the proposed use will not adversely affect adjacent land uses

f. satisfactory demonstration of on-site sewage servicing capability for the proposed use

g. satisfactory demonstration of solid waste disposal provisions

h. satisfactory demonstration that the proposed use will not create well interference with an existing well on existing surrounding uses as determined by a hydrogeological assessment of ground water potential

i. the proposal is in keeping with the other pertinent policies of this Strategy, including those applicable to Development Agreements contained in Part 6

5.2.4 Development of Unique Historic Places Policies

For the purposes of this section, a historic place is a structure, building, group of buildings, district, landscape, archaeological or other place that is recognized, either formally or informally, for its heritage value. Heritage value is the aesthetic, historic, scientific, cultural, social, or spiritual importance or significance for past, present or future generations. The heritage value of a historic place is embodied in its character-defining materials, forms, location, spatial configurations, uses and cultural associations.

Historic places can range from an old pioneer cemetery, a home designed by a renowned architect, a designated heritage property to a significant archaeological site. Often these historic places are seen as tourist attractions. It is the intention of this policy to allow for accessory and associated uses in developing the historic place under Policy 5.2.4.1.
Such uses include, but are not limited to, gift shops, museums, parking lots, signage, accommodations (e.g. cabins, camping, B & B establishments), canteens, restaurants, other attractions, entertainment areas, walking trails, interpretive panels, and picnic tables. A site is considered to include the actual attraction (e.g. waterfalls, heritage property) and adjacent lots having accessory and associated uses.

5.2.4.1 Council may provide for uses not normally permitted in the zone where a site is considered by Council to be a historic place subject to a Development Agreement pursuant to the provisions of the Municipal Government Act pursuant to policy 5.2.4.3.

Historic places are unique and significant places. Subdivision can be difficult as these sites are often not easily accessible, do not have a frontage on a public road, or cannot meet the yard requirements of the zone. To compound matters, ownership and insurance issues often necessitate the creation of separate lots at historic places. The intention of policy 5.2.4.2 is to allow for acceptable alternative standards through Development Agreement.

5.2.4.2 It shall be the policy of Council to allow for the development of historic places on a site through alternate lot and subdivision standards subject to a development agreement.

5.2.4.3 As provided for in Policies 5.2.4.1 or 5.5.4.2 above, application may be made for a Development Agreement to permit a specific use or uses on a site that is considered by Council to be a historic place and Council shall have regard for the following criteria:

a. that an assessment be required containing justification for the recognition of the historic place in terms of the heritage value

b. for larger scale proposals, satisfactory demonstration that the proposed use will not create interference with an existing well on existing surrounding uses as determined by a hydrogeological assessment of ground water potential

c. the proposal is in keeping with the other pertinent policies of this Strategy, including those applicable to Development Agreements contained in Part 6

5.3 SITING OF COMMUNICATION FACILITIES

The Municipality, with increasing frequency, has been approached with requests to locate telecommunication towers and antennas. The purpose of this Policy is to establish general guidelines for the siting of telecommunication facilities. These Policies are intended to provide guidance and direction to staff when dealing with siting telecommunication facilities. The ultimate approving authority of such telecommunication facilities lies with the governing federal body, which may or may not choose to accept Council’s recommendation.

A small proportion of telecommunication facilities are exempted from the licensing requirements of the federal government. In 2007, Council approved amendments to put in place some controls for locating these structures to mitigate the impacts to adjacent property owners and in areas where it is imperative to preserve the landscape and retain view planes and vistas.

5.3.1 Siting Objectives

i. to manage the location of telecommunication facilities in the Municipality

ii. to protect residential areas and land uses from potential adverse impacts of telecommunication facilities

iii. to encourage the protection of Agricultural lands

iv. to encourage the protection of those areas important to tourism in the County of Kings

v. to minimize adverse visual impacts of towers through careful design, siting, landscape screening, and innovative camouflaging techniques

vi. to accommodate any increased requirement to serve the telecommunication needs of municipal residents and businesses

vii. to promote and encourage co-location on existing and new towers as an option rather than construction of additional single-antenna towers, and to reduce the number of such structures needed in the future

viii. to consider public health and safety to the extent permitted and

ix. to avoid potential physical damage to adjacent properties through sound engineering practices and the proper siting of antenna/tower support structures
5.3.2 Siting Policies

All new significant telecommunication facilities, changes to existing facilities deemed significant and all new broadcast undertakings that require a license from Industry Canada shall notify the Municipality in writing and make application.

The Municipality will not normally consider an application for a telecommunication facility if it is proposed to be located within 2 times its height of an existing residential dwelling unit, school or hospital.

To meet the objectives established in this Strategy and to protect those areas considered important to tourism, small-scale towers and antennas not regulated in this section will be controlled through regulations in the General Provisions for All Zones in the Land Use Bylaw.

5.3.2.1 Information Required

To apply to erect a telecommunication facility, including significant alterations or additions to existing telecommunication facilities, the applicant shall submit the following information to Planning Staff:

i. a scaled site plan clearly indicating the location, type and height of the proposed telecommunication facility, on-site land uses and zoning, adjacent land uses and zoning, adjacent roadways, proposed means of access, setbacks from property lines, elevation drawings of the proposed tower and any other structures, topography, parking, and other information deemed by Municipal Staff to be necessary

ii. a statement of potential impacts on the surrounding environment (a copy of the Environmental Attestation to Industry Canada)

iii. the setback distance between the proposed telecommunication facility and the nearest residential unit, public open space, school or hospital

---

1 Any structure greater than 12.2 metres (40 feet) in height or any building mounted structures greater than 3 metres or 25% of the building height.

2 Any increase greater than 3 metres in height (including co-location).
iv. letter from the property owner stating that they are aware of the application and have consented to the proposed location of a telecommunication facility on their property or building

v. to minimize adverse visual impacts associated with the proliferation of towers, co-location of telecommunication facilities on existing or new towers is encouraged - as follows:

a. the Municipality may deny an application to construct new telecommunication facilities if the applicant has not shown by substantial evidence that a diligent effort has been made to mount the facilities on an existing structure or tower

b. to reduce the number of antenna support structures in the future, the Municipality may require evidence that a diligent effort has been made to invite other telecommunication service providers to co-locate

vi. submit an application fee (non-refundable) and advertising deposit similar to the standard rezoning fees as established by the Municipality

Note: (Any information of an engineering nature that the applicant submits, whether civil, mechanical or electrical, shall be certified by a professional engineer licensed to practice in Nova Scotia).

5.3.2.2 Public Consultation

Once a completed application has been received:

i. a public meeting date shall be established by staff in consultation with the Chair of the Planning Advisory Committee

ii. a notice will be distributed to those property owners within 300 metres (1000 feet) of the property where the proposed telecommunication facility is to be located

iii. a sign, which is visible to the travelling public, shall be erected by the applicant on the proposed site a minimum of two weeks prior to the public meeting and shall include the meeting details and contact
information for both the applicant and the Municipality

iv. a notice of the public meeting will be published in a local paper a minimum of two weeks prior to the meeting

v. at the meeting the proponent will explain the application and hear the concerns expressed by the public

vi. following the meeting the applicant must submit to Municipal Staff, in writing, the concerns expressed by the public and how the applicant intends to address these concerns

vii. Staff will prepare a report with recommendations for consideration of the Planning Advisory Committee

viii. Council shall consider PAC’s recommendation and either support or not support the application

5.3.2.3 Site Requirements

Once a site has met the approval of Council the following requirements shall be met:

i. Security Fencing

Telecommunication facilities at ground level shall be enclosed by security fencing not less than six feet in height and shall also be equipped with an appropriate anti-climbing device or other appropriate deterrent.

ii. Landscaping

The following requirements shall govern the landscaping surrounding towers:

a. telecommunication facilities shall be landscaped with a buffer of plant materials that effectively screens the view of the tower compound from property used for residences or planned residences. The standard buffer shall consist of a landscaped strip at least four feet wide outside the security fencing

b. in locations where the visual impact of the telecommunication facility would be minimal, the landscaping requirement may be reduced
c. existing mature tree growth and natural landforms on the site shall be preserved to the maximum extent possible. In some cases, such as telecommunication facilities sited on large, wooded lots, natural growth around the property perimeter may be sufficient buffer

5.3.3 Removal of Abandoned Antennas and Towers

Any antenna or tower and associated equipment that is not operated for a continuous period of six months shall be considered abandoned, and the owner of such antenna or tower is encouraged to remove such from the premises pursuant to Chapter 18, Section 344 of the Municipal Government Act, S.N.S., 1998.

5.3.4 Exemptions

The following uses shall be exempt from Policy 5.3.2 and shall be permitted in all zones:

i. antennas and related equipment that are being stored, shipped, or displayed for sale

ii. wireless radio utilized for temporary emergency communications in the event of a disaster

iii. satellite dish antennas less than 2 metres in diameter, including direct to home satellite services when used as a secondary use of the property

iv. a. routine maintenance or repair of a telecommunication facility, excluding structural work that changes the height or dimensions of a tower,. Provided that compliance with the standards of this policy is maintained

b. temporary service related adjustments for a period of time not to exceed 30 days and

c. co-location on an existing tower provided that compliance with the standards of this policy is maintained

5.4 SITING OF SMALL-SCALE WIND TURBINES

Small-scale wind turbines allow residents to develop and consume on-site energy in an environmentally sustainable fashion. Within Nova Scotia, the County has excellent wind power producing capability. Small-scale wind turbines vary in size, use and rated output capacity, offering the opportunity for on-site energy production and potential energy cost savings. Turbines are compatible with a number of land uses in different zones. Given the potential of small-scale wind turbines in the County, Council will accommodate small-scale wind turbines while ensuring land use compatibility.

The Municipality worked with the Dalhousie School of Planning, where students were tasked with researching and exploring issues related to small-scale wind turbines. The students provide a report entitled “Small-Scale Wind Turbines: Policy Perspectives and Recommendations for the Municipality of the County of Kings”. This report, which includes research and interviews with stakeholders, forms the basis for the following policies and enabling Land Use Bylaw provisions.

5.4.1 Small-Scale Wind Turbine Objectives

5.4.1.1 To prevent conflicts with neighbouring uses resulting from indiscriminate placement of small-scale wind turbines.

5.4.1.2 To maintain consistency with and support the urban and rural goals of the Strategy.

5.4.1.3 To control small-scale wind turbines to ensure an acceptable standard of safety and compatibility.

5.4.1.4 To respond to the needs of residents and businesses by providing opportunity for on-site wind power generation.

5.4.2 Small-Scale Wind Turbine Policy

5.4.2.1 Council shall include provisions in the Land Use Bylaw to regulate the use of small-scale wind turbines. Small-scale wind turbine regulations, including limits on the number, type, size, rated output capacity and location, are intended to ensure safety and mitigate conflict with neighbouring uses.

5.4.2.2 Council shall include provisions in the Land Use Bylaw requiring the notification of neighbours within a 500 foot radius upon issuance of a development permit for a small-scale wind turbine.
5.4.2.3 Council may undertake a study to assess optimal locations for siting wind turbines in Kings County. This study would assist in siting wind turbines in areas best suited and most viable for wind generation.

5.4.2.4 Council shall reassess the small-scale wind turbine policies within 5 years of adoption of the original wind turbine policies. At that time Council shall examine the number of small scale wind turbines sited, the impact on the landscape and on tourism, incidents of bird and bat kills and any other issues that Council deems necessary.
6.1 MUNICIPAL PLANNING STRATEGY (MPS)

6.1.1 Council's Policy Framework and Further Considerations

6.1.1.1 The Municipal Planning Strategy for the County of Kings is the prime policy document providing the framework by which the future growth and development of the County shall be encouraged, controlled, and co-ordinated. The policies of the Strategy will be implemented through the powers of Council as provided by the Nova Scotia Municipal Government Act and other statutes as may apply.

6.1.1.2 In addition to employing specific implementation measures it shall be the policy of Council to maintain a program of ongoing planning through its Planning Advisory Committee (PAC). Such a program shall include, but shall not be restricted to the preparation of Secondary Planning Strategies for the Growth Centres, programs of public information and participation, and further studies respecting such matters as recreation, transportation, extractive resources, lakeshore capacity, shoreland management, forestry and any others which Council deems suitable.

6.1.1.3 In order that decisions may be based on expert advice beyond that which the Municipality is able to supply, Council intends to solicit comments from other government agencies and may circulate applications for amendments to this Strategy, the Land Use Bylaw and/or Subdivision applications to appropriate provincial government agencies for their information, advice, comment or approval as may be required.

6.1.2 Municipal Planning Strategy Amendments

6.1.2.1 This document and all associated maps and guidelines constitute the official Municipal Planning Strategy of the Municipality of the County of Kings. An amendment to this Strategy shall be required:

a. where any policy intent is to be changed

b. where detailed Secondary Planning Strategies are to be incorporated into this Strategy

c. at the request of the Minister of Service Nova Scotia and Municipal Relations
6.1.2.2 Strategy amendments shall require the approval of the Minister of Service Nova Scotia and Municipal Relations and shall be carried out in accordance with the provisions of the Municipal Government Act.

6.1.3 Actions Not Requiring a Strategy Amendment

6.1.3.1 The Future Land Use Maps show a graphic representation of the intended Future Land Use District designations. The boundaries of the District will be more accurately refined on the Land Use Bylaw schedules which show the zones that implement these policies. Council may consider minor zone boundary adjustments and/or rounding out of zone boundaries without the necessity of a Strategy Amendment.

6.1.3.2 Lands contiguous to a District may be considered for a rezoning to a zone permitted within that Designation without an amendment to this Strategy provided all other policies of this Strategy are met.

6.1.4 Strategy Review

6.1.4.1 In accordance with the provisions of the Municipal Government Act, this Strategy may be revised when either the Minister of Service Nova Scotia and Municipal Relations or the Council deems it necessary, but in any case shall be reviewed not later than five years from its coming into force or from the last review.

6.2 LAND USE BYLAW (LUB)

6.2.1 Zoning Policies

6.2.1.1 The principal mechanism by which land use policies are implemented is the Land Use Bylaw. The Land Use Bylaw will set out zones, permitted uses and development standards and in so doing shall reflect the policies of the Municipal Planning Strategy, pursuant to the provisions of the Municipal Government Act.

6.2.1.2 It is not intended that all land shall be pre-zoned at the outset in the manner indicated on the Future Land Use Maps. In order that Council may maintain a comparatively high degree of control and is able to monitor future development, a number of areas will be zoned to reflect the existing land use and appropriately rezoned in compliance with the Strategy upon application.

Categories of uses not to be pre-zoned include:

- Agricultural Commercial
- Agricultural Industrial
- Community Facilities
- Hamlet Commercial
- Hamlet Industrial
- Heavy Industrial
- Highway Commercial
- Institutional
- Neighbourhood Commercial
- Permanent Shoreland Residential
- Recreational Commercial
- Recreational Open Space
- Residential Facilities
- Residential High Density
- Resource Extraction
- Resource Industrial
- Rural Commercial
- Salvage Yard Industrial
- Shopping Centre Commercial

6.2.1.3 The Land Use Bylaw shall apply to the entire Municipality of the County of Kings with the exception of those lands affected by the New Minas Sector Plan.
The New Minas policies were not part of the 1990/92 review. This policy shall apply until such time as the New Minas Sector Plan is reviewed and updated.

6.2.2 Amendment to the Land Use Bylaw

6.2.2.1 In considering amendments to the Land Use Bylaw, in addition to all other criteria as set out in various policies of this Strategy, Council shall be satisfied:

a. the proposed rezoning is in keeping with the intent of this Strategy and can meet the requirements of all other Municipal Bylaws and regulations

b. the proposed rezoning is not premature or inappropriate by reason of:

   i. the financial capability of the Municipality to absorb any costs relating to the development of the subject site

   ii. the impact on, or feasibility and costs of, sewerage and water services if central services are to be provided, or adequacy of physical site conditions for private on-site sewer and water systems

   iii. the potential for creating, or contributing to, a pollution problem including contamination of watercourses

   iv. the adequacy of storm drainage and the effect on adjacent uses

   v. the adequacy and proximity of school, recreation, and any other community facilities

   vi. the adequacy of street or road networks in, adjacent to, or leading to the subject site

   vii. the potential for the contamination of a watercourse due to erosion or sedimentation

   viii. creating extensive intervening parcels of vacant land between the existing developed lands and the proposed site, or a scattered or ribbon development pattern as opposed to compact development
ix. traffic generation, access to and egress from the subject site, and parking

x. incompatibility with adjacent uses and the existing development form of the surrounding area

xi. the potential for overcrowding on lakeshores or the reduction of water quality.

xii. the potential for contamination of, or interference with a designated groundwater supply protection area

c. the proposed site is suitable for development in terms of steepness of grades, soil and geological conditions, location of watercourses, marshes, swamps, or bogs and proximity of highway ramps, railway rights-of-way and other similar factors that may pose a hazard to development

6.3 DEVELOPMENT AGREEMENTS

6.3.1 Discharging of Development Agreements

6.3.1.1 Under the 1979 Municipal Planning Strategy the Council has effected considerable specific site planning by way of Development Agreements. Council intends to reduce the number of situations where Development Agreements are used. It follows that a number of Development Agreements now in place will be rendered redundant. Council intends to make an effort to discharge unnecessary Development Agreements.

6.3.1.2 Where Council has agreed, by resolution, to enter a Development Agreement and the applicant has not signed the agreement within six months and no appeal has been lodged, Council may rescind its resolution to enter the agreement. A subsequent agreement would have to be negotiated.

6.3.2 Application of Policies for Development Agreements

6.3.2.1 The following uses shall only be considered subject to the entering into of a Development Agreement according to the provisions of the Municipal Government Act:

- Expansion of Rural Non-Conforming Uses (Subsection 3.7.10)

- Expansion of "existing uses" in Grand Pré, where existing uses are other than those permitted uses listed specifically in 14.3 of the Land Use Bylaw (pursuant to subsection 3.7.9)

- Expansion of Urban Non-Conforming Uses (Subsection 2.7.2)

- Re-use of non-permitted structures and sites with unique post-development characteristics (Subsection 5.2.3)

- Day Care Facilities for more than 14 people in Residential Districts (Subsection 2.5.5)

- Re-use of Heritage Buildings registered under the Heritage Property Act (Subsection 4.4.4)
• Tourist Commercial Facilities for Lodging, Food Services and Ancillary Uses (Subsection 4.4.8)

• Tourist Commercial uses in Grand-Pre Hamlet Historic Residential District (Policies 3.6.8.6 and 3.6.8.7)

• Recreational - Commercial uses (Policy 3.7.8.6)

• Commercial uses at Tourist Destination Areas (Subsection 4.4.8)

• Mobile Home Parks in Rural Districts

• Multi-unit residential development in Hamlets

• Rural Day Care Facilities for more than 14 people in Rural Districts (Policy 3.7.2.4)

• Expansion of certain existing hamlet industrial uses beyond their initial zoned area (Policy 3.6.10.5)

• Construction and demolition debris disposal sites in the Forestry and Agricultural Districts (Subsection 3.7.13)

• Continuation and limited expansion of excavation company related industrial uses at 323 Cambridge Mountain Road, PID Nos. 5528312 (approx. 6.6 acres) and 55166409 (approx. 4.05 acres) (Policy Subsection 3.4.16)

• Excavation company related industrial uses involving the transportation and storage of extracted materials and fleet maintenance in the Forestry (F1) Zone

• Completion of a golf course in the Weston area on lands fronting on the south side of Highway # 221 in an area generally north of Brooklyn Street, west of Long Point Road, and east of McLean Road. The specific limits of the site are set out in policy 3.2.14.1 of this Strategy.

• Agri-tourism Commercial uses in the Agricultural District (Policy 3.2.8.2) and Forestry District (Policy 3.3.3.4)

• Expansion or redevelopment of existing non-conforming uses within the Wellhead Protection, Wellfield Protection
or Wellfield Recharge Zones as identified on the Canning Groundwater Resource Management Map, Appendix "E" of the Land Use Bylaw (Policy 2.12.5.6)

- The development of complementary uses on P2 Zoned lands by development agreement, pursuant to Policy 3.7.8.5 of this Strategy

- Expansion or redevelopment of existing non-conforming uses within the Wellhead Protection, Wellfield Protection, Wellfield Recharge or Future Wellhead Area Zones as identified on the Port Williams Growth Centre Urban Zoning Map – Appendix 10g of the Land Use Bylaw (Policy 2.12.5.4 and 2.12.5.6)

- Development of a restaurant or lounge on the properties described as PID # 55022305 and PID # 55445399 generally located on Terrys Creek Road in Port Williams (Policy 2.3.5)

- A topsoil and aggregate mixing operation in conjunction with a provincially approved sand pit operation on the lands of Twin Mountain Construction Ltd. in Waterville, PID Nos. 55168868 and 55370829, pursuant to Policy 4.6.2

- Expansion or redevelopment of existing non-conforming uses within the Wellfield Protection and Wellfield Recharge Zone as identified on the Coldbrook Urban Zoning and Wellfield Protection Zoning Map, Schedule 5g, of the Land Use Bylaw

- Development of Gasoline and Automotive Service Stations; all uses in the Agricultural Industrial (M3) Zone except Fire Stations; and all uses in the Hamlet Industrial (M5) Zone within the South Berwick and Area Groundwater Supply Area Zone of Influence (Zone I) and Zone of Contribution (Zone C) as provided for in Municipal Planning Strategy Policy 2.12.8.7 and identified on the South Berwick Hamlet and Wellfield Protection Zones Map, Schedule 16h of the Land Use Bylaw

- Expansion or redevelopment of existing non-conforming uses within the Zone of Influence (Zone I) and Zone of Contribution (Zone C) as identified on the
South Berwick Hamlet and Wellfield Protection Zones Map, Schedule 16h of the Land Use Bylaw

- Multiple unit residential dwellings in Residential Districts within the Growth Centre of Coldbrook (Subsection 2.4.9)

- Development of Unique Historic Places (Subsection 5.2.4)

- Farm dwellings for bona fide farmers subject to Policy 3.2.5.3.3

- Agri-tourism Commercial uses within the Wellfield Protection Zone (Zone B) and Wellfield Recharge Zone (Zone C) as shown in Appendix 10g – Port Williams Growth Centre Urban Zoning (Policy 2.12.5.9)

- Medium or large scale residential, commercial, recreational, institutional, or resource development within the S1 and S2 Zones in the Shoreland District (Policy 3.5.8.1)

- Expansion of existing commercial or industrial uses in a commercial or industrial zone immediately adjacent to an O1 Zone into the Natural Environment District (Policy 4.2.4.8)

- Expansion of non-conforming residential structures in the Shoreland District (Subsection 3.5.12.1)

6.3.2.2 The following Comprehensive Development Districts are established in which all development is subject to a Development Agreement:

- Commercial Comprehensive Development District Uses (Subsection 2.2.6)

- Resort Comprehensive Development District Uses (Subsection 4.4.14)

- Country Residential Resort Uses in Country Residential Resort Districts (Subsection 3.4.15)
• Residential Comprehensive Development District Uses
  (Subsection 2.4.12)

6.3.3 \textbf{Conditions of Approval of Development Agreements}

6.3.3.1 A Development Agreement shall not require an amendment
to the Land Use Bylaw but shall be binding upon the property
until the agreement or part thereof is discharged by the
Municipality. In considering Development Agreements under
the \textit{Municipal Government Act}, in addition to all other criteria
as set out in various policies of this Strategy, Council shall be
satisfied:

a. that the proposal is in keeping with the intent of the
   Municipal Planning Strategy

b. that the proposal is not premature or inappropriate by
   reason of:

i. the financial capability of the Municipality to
   absorb any costs related to the development of the
   subject site

ii. the adequacy of municipal sewer and water services
    if services are to be provided. Alternatively, the
    adequacy of the physical site conditions for private
    on-site sewer and water systems

iii. the potential for creating, or contributing to, a
    pollution problem including the contamination of
    watercourses or the creation of erosion or
    sedimentation during construction

iv. the adequacy of storm drainage and the effect of
    same on adjacent uses

v. the adequacy of street or road networks in, adjacent
   to, and leading to, the development

vi. the adequacy, capacity and proximity of schools,
    recreation and other community facilities

vii. adequacy of municipal fire protection services and
    equipment
viii. creating extensive intervening parcels of vacant land between the existing developed lands and the proposed site, or a scattered or ribbon development pattern as opposed to compact development

ix. the suitability of the proposed site in terms of steepness of grades, soil and/or geological conditions, and the relative location of watercourses, marshes, swamps or bogs

x. traffic generation, access to and egress from the site, and parking

xi. compatibility with adjacent uses

c. the Development Agreement may specify that controls are placed on the proposed development so as to reduce conflict with any adjacent or nearby land uses by reason of:

i. the type of use

ii. the location and positioning of outlets for air, water and noise within the context of the Land Use Bylaw.

iii. the height, bulk and lot coverage of any proposed buildings or structures

iv. traffic generation

v. access to and egress from the site and the distance of these from street intersections

vi. availability, accessibility of on-site parking

vii. outdoor storage and/or display

viii. signs and lighting

ix. the hours of operation

x. maintenance of the development

xi. buffering, landscaping, screening and access control
xii. the suitability of the proposed site in terms of steepness of grades, soil and/or geological conditions, and the relative location of watercourses, marshes, swamps, or bogs

xiii. the terms of the agreement provide for the discharge of the agreement or parts thereof upon the successful fulfillment of its terms

xiv. appropriate phasing and stage by stage control

d. performance bonding or security shall be included in the agreement if deemed necessary by Council to ensure that components of the development such as, but not limited to, road construction or maintenance, landscaping or the development of amenity areas, are completed in a timely manner

6.3.4 Required Information for Applications for Entering a Development Agreement

6.3.4.1 Council may require that any or all of the following information be submitted to the Municipality by the Developer with respect to any proposed development which is to be the subject of a Development Agreement under the Municipal Government Act namely:

a. information as to the physical and environmental characteristics of the proposed site including information regarding topography, contours, elevations, dimensions, natural drainage, soils, existing watercourses, vegetative cover, size and location of the lands

b. information as to the proposed location, height, dimensions and use of all buildings or structures proposed to be built or erected on the lands

c. information on the type and amount of site clearing required, if any

d. information regarding proposed site drainage and servicing with water supply and sewage disposal

e. information on proposed access and egress to and from the lands and estimated traffic flows to be generated
f. information on the intended hours of operation

g. information on the architectural design, including renderings, scaled site plans, profiles, grade elevations and cross sections

h. information regarding the provision and maintenance of appropriate natural screens and landscaping.

6.3.4.2 It shall be the intention of Council that Staff of the Municipality's Department of Community Development Services be responsible for negotiations with the proponents of Development Agreements to secure draft written agreements for consideration by Council.

Draft agreements shall be reviewed by the Municipal Solicitor before Council will consider entering the agreement. Council shall have it registered at the Registry of Deeds. The Development Officer, in concert with the Building Inspector, shall be responsible for monitoring of development subject to a Development Agreement and shall inform Council in writing of any deficiencies on the part of the developer to meet the terms and conditions of the agreement. Council shall be responsible for decisions about the enforcement of any and all terms and conditions of any Development Agreement as provided for in the Municipal Government Act.

6.4 OTHER MUNICIPAL BYLAWS

6.4.1 Subdivision Bylaw

The subdivision of land in the County is presently regulated by "The Subdivision Bylaw for the Municipality of the County of Kings" enacted and approved in 1991 and as may be subsequently amended. Through the Subdivision Bylaw Council has adopted stringent requirements to regulate such things as the construction and installation of services and requirements for the subdivider to install services and construct roads to the satisfaction of the Nova Scotia Department of Transportation and Infrastructure Renewal.

6.4.1.1 It is Council's intention that the Municipality's Subdivision Bylaw reflects and will continue to reflect the intent and policies of this Strategy. The Subdivision Bylaw includes:

a. standards for the installation of services

b. requirements for the subdivider to install services and construct roads to specified standards

c. requirements for dedication of open space or cash-in-lieu

d. other requirements in accordance with the permissive content provisions of the Municipal Government Act

6.4.2 Mobile Home Parks Bylaw

6.4.2.1 It shall be the policy of Council to administer the regulations as set out in the Municipal Mobile Home Parks Bylaw.

6.4.3 Building Bylaw

6.4.3.1 It shall be the policy of Council to administer the regulations as set out in the National Building Code and adopted as the Municipal Building Bylaw and the regulations pursuant to the Provincial Building Code Act.

6.4.4 Dangerous and Unsightly Premises

6.4.4.1 It shall be the policy of Council to administer the regulations as set out in the Dangerous and Unsightly Premises provisions of the Municipal Government Act.
6.4.5 Street Lighting Bylaw

6.4.5.1 It shall be the policy of Council to require that all street lighting provided be charged to the users within the service limits by an area rate chargeable to each benefitted property in the community in accordance with the Street Lighting Bylaw.

6.4.6 Street Improvement Bylaw

6.4.6.1 It shall be the policy of Council to accept the responsibility for requesting that the Nova Scotia Department of Transportation and Infrastructure Renewal undertake street paving in Growth Centres and Hamlets where abutting property owners indicate approval of such action and the Municipality is prepared to allow for financing the property owners share of the cost over a five year period, in accordance with the Street Improvement Bylaw.

6.4.7 Heritage Property Bylaw

6.4.8 Grand Pré Heritage Conservation District Bylaw

6.5 DEVELOPMENT OFFICER

6.5.1 Development Officer Responsibility

6.5.1.1 In accordance with the Municipal Government Act, the Development Officer, appointed by Council, shall administer the Land Use Bylaw, Development Agreements and all subdivision controls and shall grant development permits and approvals of plans of subdivision.
6.6 CAPITAL PROGRAM

In addition to controlling private development, Council may undertake programs of its own to encourage development in certain areas, to enhance, improve, or protect the environment of the Municipality, or to provide a greater range of social, recreational, or cultural facilities and activities. It is one purpose of this Strategy to aid in establishing such programs.

6.6.1 Capital Program Policy

6.6.1.1 It shall be the intention of Council to incorporate policies and provisions of this Strategy into the Capital Budget and the five year Capital Program of the Municipality to the greatest extent possible, with the goal of eventual integration of land use planning, capital programming and budgeting.
6.7 EXISTING DEVELOPMENT

6.7.1 Definition of Existing Development

6.7.1.1 Where this document refers to existing development it shall be considered as development and uses existing on the date of adoption of this Municipal Planning Strategy. Some policies apply to uses existing at the adoption of the initial Municipal Planning Strategy (June 19, 1979) and this is specified where applicable.
6.8 GENERAL PROVISIONS FOR SITE PLANS

6.8.1 Application of Policies for Site Plans

6.8.1.1 The Municipal Government Act permits development by site plan approval in cases where additional controls are warranted on the development of the site but where there are no operational issues that are normally covered by a development agreement. Council may permit site plan approvals in the Land Use Bylaw.

6.8.1.2 The following uses shall only be considered subject to site plan approval according to the provisions of 6.8.2 of the Municipal Planning Strategy.

   a. Small-scale towers not regulated by the policies in Section 5.3 proposed within designated Tourist Destination Areas (TDAs) or registered historic sites1.

   b. Mini homes, single detached dwellings, or seasonal dwellings within the Seasonal Residential (S1) Zone on lakes where the carrying capacity has been exceeded, as provided for in Policy 3.5.4.7.

   c. Mini homes, single detached dwellings, or seasonal dwellings within the Future Shoreland (S2) Zone on lots created after October 25, 2007 as provided for in Policy 3.5.4.9.

   d. Non-farm dwellings in the Agricultural (A1) Zone as provided for in Policy 3.2.6.2 and 3.2.6.3.

6.8.2 Conditions of Approval for Site Plans

6.8.2.1 A site plan shall not require an amendment to the Land Use Bylaw but shall be binding upon the property until the site plan is discharged by the Municipality.

6.8.2.2 The Site Plan may deal with the following:

   a. the location of the structures on the lot

---

1 A registered historic site is a building, property, streetscape or other site that has been formally registered as an historic site by the Municipal, Provincial or Federal government.
b. the location of off-site loading and parking facilities

c. the location, number and width of driveway accesses to the streets

d. the type, location and height of walls, fences, hedges, trees, shrubs, ground cover or other landscaping elements necessary to protect and minimize the land-use impacts on adjoining lands

e. the retention of existing vegetation

f. the location of walkways, including the type of surfacing material, and all other means of pedestrian access

g. the type and location of outdoor lighting

h. the location of facilities for the storage of solid waste

i. the location of easements

j. the grading or alteration in elevation or contour of the land and provision for the management and surface water

k. the type, location, number and size of signs or sign structures

l. the provisions for the maintenance of any of the items referred to above

6.8.3 **Required Information for Applications for Site Plan Approval**

6.8.3.1 Council, through its Development Officer, may require that any or all of the following information be submitted to the Municipality by the Developer with respect to any proposed development which is to be the subject of a Site Plan under the *Municipal Government Act* namely:

a. information as to the physical and environmental characteristics of the proposed site including information regarding topography, contours, elevations, dimensions, natural drainage, soils, existing watercourses, vegetative cover, size and location of the lands
b. information as to the proposed location, height, dimensions and use of all buildings or structures proposed to be built or erected on the lands

c. information on the site and amount of site clearing, grading and fill, if required

d. information regarding proposed site drainage and servicing with water supply and sewage disposal

e. information on proposed access and egress to and from the lands and estimated traffic flows to be generated

f. information regarding the provision of landscaping and other natural features.

g. the type, location, number and size of signs or structures

h. provision for the maintenance of any of the items referred to in this subsection

i. the type and location of outdoor lighting

6.8.4 Registering and Discharging of Site Plan

6.8.4.1 Site plans will be registered in the Land Information Office at the applicant’s expense.

6.8.4.2 Site plans will be discharged upon resolution of Council.

6.8.4.3 Once discharged by Council, a copy of the resolution as stated in 6.8.4.2 will be registered at the Kings County Land Registration Office.

1. **INTRODUCTION**

The Kings County Region is located in the western part of the Province of Nova Scotia bounded on the north by the Bay of Fundy and Minas Channel, on the east by the County of West Hants, on the south by Hants and Lunenburg Counties and on the west by Annapolis County. The population of Kings County is approximately 64,314, and this includes the population for the Towns of Berwick which is 2,282, Kentville at 5,535 and Wolfville at 4,085. Wolfville which is also home to Acadia University, each year witnesses an increase in its population to approximately 7,000 as a result of student enrolment.

A Municipal Council of twelve members governs the Municipality of the County of Kings. The Warden, elected by the Council, is the head of the Council. The Municipal Office is located at 87 Cornwallis Street in the Town of Kentville. The Chief Administrative Officer heads the administration of this municipal government. The Towns of Berwick, Kentville and Wolfville are governed by Town Councils, and these are each comprised of a mayor and six elected councillors. Their Chief Administrative Officer also heads the administration of these towns. The Town of Berwick’s Municipal Office is located at 236 Commercial Street, Berwick. Kentville’s Town Hall is located at 354 Main Street, Kentville and Wolfville’s Municipal Office is located at 359 Main Street, Wolfville.

The Royal Canadian Mounted Police carry out policing duties within all of Kings County with the exception of the Town of Kentville, which has its own Municipal Police Department. The Royal Canadian Mounted Police have four detachment offices and these are located at Kingston, Berwick, New Minas and Wolfville.

The County of Kings is served by the following volunteer departments:

- Aylesford Fire Department
- Berwick Fire Department
- Canning Fire Department
- Greenwich Fire Department
- Kentville Fire Department
- Kingston Fire Department
- Halls Harbour Fire Department
- New Minas Fire Department
- Port Williams Fire Department
- Waterville and District Fire Department
- Wolfville Fire Department

Fire departments from Hantsport and Springfield provide fire protection to areas of Kings County, which borders their municipalities. These departments as well as CFB Greenwood, Michelin North America (Canada) Inc. and New Ross are part of a sixteen fire department mutual aid agreement and are staffed by volunteers.

**Health facilities** include the Valley Regional Hospital in Kentville, Western Kings Memorial Health Centre in Berwick, Eastern Kings Memorial Health Centre in Wolfville, Kings Regional Rehabilitation Centre in Waterville and a health facility at 14 Wing Greenwood. Provincial ambulance service is available.
Vehicular traffic utilizes mainly Highway 101, which runs from Halifax to Yarmouth and also Highway 1. Acadian Lines operates a daily bus service from Halifax to Yarmouth. Kings Transit Authority operates a daily public service from Wolfville to Greenwood.

Air traffic utilizes the Waterville Municipal Airport located in Cambridge, and substantial air traffic utilizes 14 Wing Greenwood.

Rail traffic The Windsor & Hantsport Railway Company Ltd. operates a rail line from Hants County on the eastern end of Kings County to approximately five kilometres west of the town of Wolfville.

Harbour facilities are available at Harbourville, Halls Harbour, Scott’s Bay and Delhaven to provide mainly for the fishing industry around the Minas Basin and Bay of Fundy. There are also small wharfs along these shores, one of which is located in the Town of Wolfville.
2. AIM OF THE KINGS REGIONAL EMERGENCY READINESS PLAN

The aim of the Kings Regional Emergency Readiness Plan is to prescribe the organization and Management required to protect life, property and the environment in the event of an actual emergency affecting Kings County.

2.1 DEFINITIONS AND SCOPE

For the purpose of this plan, an emergency is defined as:

"An abnormal event, or threat of an event, of a severity and magnitude that may result in death, injury, property damage and/or environmental damage and will require a coordinated response beyond the routine procedures, resources, and/or authority of Kings County and its elected officials, employees and volunteer fire fighters".

The scope includes the actions of the Kings Regional Emergency Management Organization in response to an emergency affecting the Kings Region. It also includes guidelines for the development of departmental plans.

2.2 DEFINITIONS

The following definitions apply in this Plan.

**Exercises** - scheduled events, which provide a realistic setting for practising emergency response and evaluating emergency plans, procedures and resources.

**Hazardous Materials** - substances which, if accidentally released, may result in serious harm to life, property, or the environment. These substances are listed in the Transportation of Dangerous Goods Schedule XII and the Major Industrial Accident Council of Canada list of Hazardous Substances.

**Hazard** - a situation with the potential for human injury or death, damage to property, damage to the environment, or some combination of these.

**Responders** - persons responsible for actions during an emergency. Actions are generally intended to reduce risk, minimize losses and damage, and relieve suffering. Responders include employees or agents of Kings County, and employees or volunteers from other governments, the private sector, or community organizations.

**Emergency Network** - all persons and organizations that may reasonably be expected to be involved in emergency operations with Kings County. Involvement may include, but is not limited to: exchange of information, coordination of policies, plans, and procedures, and participation in training and exercise programs.
2.3 PLANNING BASIS

The Plan is an all hazards plan and has been prepared as a guide for all personnel responsible for the direction and co-ordination of the emergency services in the event of a local emergency.

Legislation

The Plan is primarily based on the Nova Scotia Emergency Management Act (1990) and the Kings Regional Emergency Management By-Laws, which are to provide for a prompt and coordinated response to an emergency.

Hazards

The plan is based on the vulnerability to hazards in each of the following categories:

(1) natural hazards: those related to naturally occurring elements and conditions including, but not limited to, floods, severe weather, and forest fires;

(2) technological hazards: those related to the use of technology including, but not limited to transportation accidents, hazardous materials accidents, structural failures, and essential services failures; and

(3) civil hazards: those related to acts of civil disorder intended to disrupt community services or activities.

Resources

The demand for resources (personnel, facilities, supplies, and equipment) varies during an emergency, depending on the situation. In the event of an accident or disaster, with few exceptions, the Kings Region has appropriate and sufficient resources to mount an initial response. In the event of a catastrophe or a protracted response to a lesser event, additional resources will be required from the private sector and other levels of government.
3. RESPONSIBILITIES AND FUNCTIONS

3.1 KINGS REGIONAL EMERGENCY MANAGEMENT ADVISORY COMMITTEE
The Kings Regional Emergency Management Advisory Committee is responsible for advising Council(s) of any developments during a state of local emergency. This Committee is to carry out any other duties as directed by the respective Council(s).

3.2 KINGS REGIONAL EMERGENCY MANAGEMENT COORDINATOR
The Kings Regional Emergency Management Coordinator (REMC) is responsible for the coordination of the Regional Emergency Operations Centre and the emergency services to be provided.

3.3 KINGS REGIONAL EMERGENCY MANAGEMENT ALTERNATE COORDINATOR
The Kings Regional Emergency Management Alternate Coordinator will carry out the duties of the Kings Regional Emergency Management Coordinator in his absence. The Kings Regional Emergency Management Coordinator or the Kings Regional Emergency Management Alternate Coordinator will be advised of any local emergency, which might require the activation of the Kings Regional Emergency Plan.

3.4 KINGS REGIONAL EMERGENCY MANAGEMENT PLANNING COMMITTEE
(a) income assistance;
(b) law enforcement;
(c) fire control services;
(d) engineering services;
(e) health services;
(f) community services;
(g) transportation;
(h) communications;
(i) public information;
(j) utilities;
(k) financial services; and
(l) legal services.

The Kings Regional Emergency Management Planning Committee will assemble at the Regional Emergency Operation Centre (EOC), located at 87 Cornwallis St., Kentville or at the Alternate Operation Centres as directed. These centers are located at 465 Main Street, Kentville and 359 Main Street, Wolfville (see Section 8.3 and 8.4).

3.5 KINGS REGIONAL EMERGENCY OPERATIONS CENTRE
The function of the Kings Regional Emergency Operations Centre is to provide a facility where the co-ordination of all activities required to achieve the aim of the plan can be carried out. This shall be done through the process of joint decision-making and sharing of information.

The Kings Regional Emergency Management Planning Committee will staff the Kings Regional Operations Centre. The Planning Committee directs the activities of the emergency services and advises the Kings Regional Emergency Management Advisory Committee on the overall management of the emergency.
4. ACTIVATION OF KINGS REGIONAL EMERGENCY READINESS PLAN

On receipt of information about an actual or potential emergency, all agencies involved shall react as per their standard operating procedures and then promptly decide whether the situation will require activation of the Kings Regional Municipal Emergency Readiness Plan. If it has been determined that due to the overall situation the Emergency Readiness Plan should be activated then the following procedures shall take place.

4.1 The determining agency will notify their emergency dispatch centre and inform them that the Emergency Readiness Plan should be activated.

4.2 The emergency dispatch center will notify the Kings Regional Emergency Management Coordinator of the emergency, who will then contact the Kings Regional Emergency Management Alternate Coordinator. The CAO and the appropriate staff for the affected area will be immediately apprised of the situation.

4.3 The Kings Regional Emergency Management Coordinator will assess the need to activate the Emergency Plan. **If activation is required, the Kings Regional Emergency Management Coordinator will recommend the appropriate activation level to the Chief Administrative Officer.**

**Note:** The Kings Regional Emergency Management Coordinator may confer with other members of the Planning Committee. However, unnecessary delay must be prevented.

This recommendation should be provided within 30 minutes, or as soon as possible thereafter, of the initial report to the emergency dispatch center. If activation is not required, the Regional Emergency Management Coordinator will log the information and will notify the CAO at the earliest opportunity.

When activation has been approved, the Planning Committee, the Advisory Committee members and the Emergency Operations Centre support staff shall be notified as per the Call-Out procedures. All persons should be contacted within 30 minutes of the approval to activate the Plan. They should be present at the EOC within one hour of the approval to activate the Plan.

```
5. ACTIVATION LEVELS OF THE KINGS REGIONAL EMERGENCY READINESS PLAN

Activation levels define the degree to which the Emergency Readiness Plan is activated. The CAO has the authority to upgrade the activation level on the recommendation of the Regional Emergency Management Coordinator. The Advisory Committee has the authority to downgrade the activation level. There are three (3) levels of activation for the Emergency Readiness Plan.

They are:

(a) Standby mode
(b) Active mode
(c) Recovery mode

In **standby mode**, only some departments or individuals in the Kings Regional Emergency Management Organization are alerted and kept informed on the progress of the emergency. This normally happens when the abnormal situation has only limited consequences and emergency services are in control of the situation. Emergency services would not require additional procedures, resources, and/or authority.

In **active mode**, the Master Emergency Plan alert procedure is implemented immediately. Department/service emergency plans are activated as required. The general public and members of the Kings Regional Emergency Network are also notified.

In **recovery mode**, the Kings Regional Emergency Management Organization is in transition between emergency and normal operations.
6. **ON SITE OPERATIONS**

Until the Kings Regional Emergency Management Plan is activated, all directions and requests for resources are handled according to routine departmental procedures. When the Emergency Readiness Plan is activated, the EOC Manager ensures that an Emergency Site Manager (ESM) is in place. If there are multiple sites, the EOC Manager will also ensure that there is an ESM for each site. The selection of the ESM(s) is based on recommendations from Department Heads, who are part of the Planning Committee.

The priority emergency actions for the on-site group are:

(a) isolate the site (establish inner and outer perimeters) to prevent further casualties (control access/egress in the area);
(b) take prompt action to protect the population immediately adjacent to the emergency site;
(c) take safe actions to conduct life-saving and rescue operations;
(d) take safe actions to control the hazard; and/or
(e) take safe actions to mitigate the emergency.

The ESM directs all emergency operations (except federal or provincial mandated operations) within the outer perimeter (except on federal property, provincial facilities/roadways, or First Nations lands). The ESM provides regular situation reports to EOC Manager by way of his agency representative, at the Emergency Control Operation Centre. Where possible, the ESM will adhere to the following procedures in sending requests to the EOC Manager.

The ESM coordinates on-site Municipal operations with persons responsible for federal/provincial/First Nations mandates, properties, facilities, and roadways.

The ESM may recommend Management or response actions for areas outside the outer perimeter (e.g. evacuation recommendation) to the EOC Manager. However, the ESM has no authority for any actions in that regard.

Members of the Emergency Planning Committee activate department emergency centres, as required; review information about the emergency; share information with other committee members; make sure their information is recorded and displayed in the EOC; and recommend emergency Management to the EOC Manager. The Kings Regional Emergency Management Planning Committee members implement approved recommendations by issuing instructions to department emergency managers. Department emergency managers determine how things will be done and issue further instructions to emergency responders. Department emergency managers report results to their Planning Committee members.
The Kings Regional Emergency Management Advisory Committee meets in a room adjacent to the Emergency Management Planning Committee room. At least one member of the Emergency Management Advisory Committee is available in that room at all times while the Master Emergency Plan is activated. The EOC Manager makes recommendations on the following, to the committee, for approval: policy matters, declaration; renewal or termination of a state of local emergency; or execution of the state of local emergency power.

The Kings Regional Emergency Management Advisory Committee releases information to the media by way of formal media announcements and/or media conferences. While the Master Emergency Plan is activated, the Kings Region has a single media spokesperson, who, whenever possible, is a member of the Kings Regional Emergency Management Advisory Committee or the Kings Regional Planning Committee. All announcements and media conferences are prepared/coordinated by the member of the Kings Regional Emergency Management Planning Committee who is responsible for public information. That individual attends all briefings of the Kings Regional Emergency Management Advisory Committee and reviews the committee’s log on a regular basis. All media announcements and media conference strategies are approved in advance by the EOC Manager (especially evacuation warnings). The announcements and strategies are also coordinated with other members of the emergency network. If the Provincial Government declares a state of emergency, the announcements must be coordinated with that provincial body.

Finally, the Kings Regional Emergency Management Advisory Committee briefs Council on developments during a local state of emergency. Council meets at a location other than the EOC for their briefings.

RECORD KEEPING

Detailed information about the following items is recorded during an emergency:
(a) receipt of information about an actual or potential emergency;
(b) activation of Master Emergency Plan;
(c) notification of the general public and other emergency organizations;
(d) Kings Regional Emergency Management Advisory Committee operations (single log);
(e) Kings Regional Emergency Management Planning Committee operations (individual logs), Emergency site operations;
(f) health and safety assessments;
(g) public inquiries;
(h) media announcements;
(i) declaration/renewal/termination of a state of local emergency;
(j) orders issued by the Kings Region under state of local emergency;
(k) requests for assistance;
(l) acquisition of materials/services;
(m) warnings/orders issued to the Kings Region;
(n) all expenditures.

Detailed information includes:

(a) time of the event;
(b) information received/sent;
(c) decisions taken;
(d) instructions received/sent;
(e) actions planned/implemented.

In addition, a central registry of the names, tasks, hours worked, operating locations, and injuries of every person who responds to the emergency under the authority of the Kings Regional Emergency Management Organization is maintained.
7. **DEACTIVATION OF THE KINGS REGIONAL EMERGENCY MANAGEMENT PLAN**

Members of the Kings Regional Emergency Management Planning Committee consider and recommend to the EOC Manager, as appropriate, a deactivation of department/service plans they are responsible for. The EMS(s) considers and recommends to the EOC Manager, as appropriate, deactivation of the on-site emergency operations group. The Kings Regional Emergency Management Planning Committee discusses and recommends, as appropriate, changing the activation level of the Kings Regional Emergency Management Plan (and the EOC). The Kings Regional Emergency Management Advisory Committee authorizes downgrading the activation level from active mode to standby or recovery. In every instance, reasonable notification of deactivation change is given to the Emergency Operations Centre, on-site and off-site emergency operations groups, the emergency network, and the general public.

**RECOVERY**

The aim of the recovery plan is to return the Kings Region to a normal state. A recovery plan has three components: social, physical and environmental recovery.

Social recovery includes, but is not limited to, critical incident stress programming and medical follow-up.

Physical and environmental recovery generally includes: resumption of public services; infrastructure repair and reconstruction; residential repair and reconstruction; and business repair and reconstruction. The scope of the recovery plan includes, but is not limited to, the following:

(a) establishment and operation of a recovery committee;
(b) impact/damage assessment;
(c) sources of assistance (including financial and technical assistance);
(d) issues (including legislative, regulatory, policy, safety, emergency mitigation, political, and economic issues);
(e) recommendations;
(f) implementation strategy (including a budget and schedule).

**POST-EMERGENCY EVALUATION**

Following the emergency an evaluation of the emergency response will be made by members of the Kings Regional Planning Committee in concert with elected officials, staff and emergency resource personnel.
8. ACTIVATION OF KINGS REGIONAL EMERGENCY OPERATIONS CENTRE

PURPOSE:
To establish an operational procedure when activation of the Emergency Operations Centre has been established.

FUNCTION:
The function of the Emergency Operations Centre (EOC) is to co-ordinate all activities required to achieve the aim of the Plan. This shall be accomplished through the process of joint decision making and sharing of information.

FORWARD:
The Emergency Operations Centre will be staffed by the Kings Regional Emergency Management Coordinator, Alternate Coordinator, the Kings Regional Emergency Management Planning Committee and the Kings Regional Emergency Operations Centre Support Staff.

PROCEDURES:
On receipt of information, to activate the Kings Regional Emergency Readiness Plan, all planning committee, advisory committee and support staff members shall report to the Council Chambers, located in the Municipal Building, 87 Cornwallis Street, Kentville. If the Emergency Operations Centre in the Municipal building has been affected by an emergency and is inoperable, then an alternate site will be used. This site could be located at the EOC located at 354 Main Street, Kentville or 359 Main Street, Wolfville. (Section 8.2.1 and 8.3)

The Kings Regional Advisory Committee will assemble in the boardroom located in the executive office area and will provide support to the Planning Committee without becoming involved in the technical details of departmental activities.

The Kings Regional Planning Committee, consisting of all the chiefs of services, will assemble in the Emergency Operations Centre and will be responsible to direct the overall response and advise the Advisory Committee on the overall management of the emergency.

The Kings Regional Support staff shall be notified by their respective/department counterparts or the Planning Committee, and report to the EOC. Once at the EOC they will be responsible to ensure that their counterpart has the necessary equipment to carry out their responsibilities.

The Kings Regional Public Information Officer shall be responsible to set up an area away from the EOC and Advisory Committee room for the purpose of meeting with the media.

EMERGENCY SITE MANAGEMENT DOCTRINE
Canadian Emergency Preparedness College
A briefing meeting will be held as members of the Planning Committee, Advisory Committee, and the Public Information Officer, are assembled in the EOC. This meeting is in accordance with the Reporting Procedures and is used to bring everyone up to date on the situation. This meeting will be held in the Councilor’s Lounge located in the Council Chambers. Briefing meetings will be held on a regular basis throughout the emergency and will be scheduled by the EOC Manager.

**WHO IS IN CHARGE:**
The EOC facility and the EOC Control group are often managed by the CAO or another designated senior municipal administrator. The Kings Regional Emergency Management Coordinator generally reports to and supports the Manager of the EOC. Similarly, the Site Manager manages the emergency site and leads the Site Team. Each response agency and organization is managed/commanded by its own senior representative (i.e. the Agency Site Control Officer). For example, the Senior Fire Officer at the Site is a member of the Site Team and is also the Fireground Commander. This individual’s role is to fight the fire and neither the Site Manager nor the Team should interfere with that function. However, they must be able to provide input when it comes to coordinating their activities and resources with those of the Fire Services at the Site. When an Agency Site Control Officer is assigned to the role of Site Manager, he or she must relinquish the Agency role and assume fully the Agency-neutral role of Site Manager.

**Emergency Site Management Doctrine**

Canadian Emergency Preparedness College
8.2 KINGS REGIONAL EMERGENCY MANAGEMENT ALTERNATE OPERATION CENTRE

Kentville Emergency Operations Centre (EOC)

The Town of Kentville Emergency Operation Centre (EOC) is located at the Town Hall. Access is through the back door ramp upstairs. Once you have entered the building you can reach the Council Chambers by either using the stairs or by using the elevator. Proceed over the ramp and the Council Chambers is located on your left hand side. The Town Hall is located at 354 Main Street, Kentville, NS B4N 1K6. The Kentville Emergency Operation Centre is a back up to the Kings County Regional Emergency Operation Centre.

The Emergency Management Planning Committee who will act as the Emergency Control Response Group (ECRG) will staff the Emergency Operation Centre. The Emergency Operation Centre Manager will manage the Kentville Emergency Operation Centre (EOC) Facility and the activities of the Kings County Regional Emergency Operation Centre (ECRC). The Emergency Management Coordinator will support the Emergency Operation Centre Manager in the operation of the Emergency Operation Centre. All persons should be contacted within 30 minutes of the approval to activate the Plan. Personnel requested for the operation of the Emergency Operation Centre should be present at the Emergency Operation Centre within one hour of the approval to activate the Plan.
8.2.1 KINGS REGIONAL EMERGENCY MANAGEMENT ALTERNATE OPERATION CENTRE

Kentville Emergency Operations Centre (EOC) - Layout
8.3 KINGS REGIONAL EMERGENCY MANAGEMENT ALTERNATE OPERATION CENTRE

Wolfville Emergency Operations Centre (EOC)

The Town of Wolfville EOC is located at the Town Hall Council Chambers, 359 Main Street. This EOC has a back up facility, which is located on the main floor of Wheelock Hall, Acadia University.

The EOC will be staffed by the Emergency Management Planning Committee, who will act as the Emergency Control Response Group (ECRG). The EOC facility and the activities of the ECRG will be managed by the EOC Manager. The Emergency Management Co-ordinator will support the EOC Manager in the operation of the EOC. All persons should be contacted within 30 minutes of the approval to activate the Plan. Personnel required for the operation of the EOC should be present at the EOC within one hour of the approval to activate the Plan.

EOC Layout:
9. KINGS REGIONAL EMERGENCY CENTRE REPORTING PROCEDURE

9.1 KINGS REGIONAL EMERGENCY MANAGEMENT ADVISORY COMMITTEE

RESPONSIBILITIES:

- Activate the Emergency Management Organization’s emergency alert system;
- Reports to the Emergency Operations Centre;
- Co-ordinates the acquisition of emergency response equipment;
- Represents his/her municipality and liaises with EMO Nova Scotia;
- Ensures support for the Emergency Operations Control Group is provided;
- Ensures the municipal police/RCMP are dispatched and act at the Emergency Site Management command post;
- Locates lists of resources, advisors and provincial or federal emergency response agencies, as stated in the municipal emergency plan;
- Recommends the activation of mutual aid, when required, to the EOC Manager;
- Ensures a prompt, co-ordinated response of required volunteer organizations (may be assisted by other personnel);
- Activates the response of specialist response teams, as required;
- Ensures an operations log is maintained during an emergency, recording all activity and personnel involved;
- Conducts the emergency debriefing;
- Prepares the emergency operations final status report to present to council;
- Advises the Mayor, Warden or designated official acting as Chief Administrative Officer, during the emergency.

EMERGENCY SITE MANAGEMENT DOCTRINE
Canadian Emergency Preparedness College
9.2 KINGS REGIONAL EMERGENCY OPERATIONS CENTRE MANAGER

RESPONSIBILITIES:

- Activate the Regional Emergency Operations Control Group emergency alerting System in whole or in part;

- Upon warning of an emergency or disaster activate the emergency plan in whole or in part;

- Advise and continuously update the Chairperson of the Advisory Committee regarding the current emergency situation;

- Assume the responsibilities as the Regional Emergency Operations Centre Manager;

- Sanction an Emergency Site Manager(s);

- Coordinate the municipal response as per the emergency plan;

- Cooperate with other municipal departments, adjacent municipalities and other applicable bodies;

- Approve the activation of mutual aid when required;

- Determine if Municipal resources are adequate or if additional resources are needed;

- Recommend, when required, that assistance be requested from the Provincial Emergency Management Organization;

- Take such action as is necessary to minimize the effects of an emergency or disaster on the Kings Region and its inhabitants;

- Advise the Chairperson of the Kings Regional Advisory Committee, or their alternate, or Council, of any necessary actions that should be taken that are not covered in the emergency plan;

- Maintain a log of all actions taken;

- During normal times when not activated, must ensure regular cleaning and maintenance of the facility it carried out;

- Begin long-range planning.

Remember:  Success depends on information
Insist on:  Frequent briefings from Staff Officers -
Frequent situation reports from the site

EMERGENCY SITE MANAGEMENT DOCTRINE
Canadian Emergency Preparedness College
9.3 DUTY OFFICER

RESPONSIBILITIES:

- Reports to the EOC when notified of its activation;
- Collect, collate, summarize, display and circulate information concerning emergency operations on a master event status board;
- Ensure all work station telephones during Sitreps and that Emergency messages are received and copied;
- Messages are received and copied;
- Secure EOC and arrange to have access limited to EOC personnel;
- Reports to the EOC Manager and assists the Operations Officer, as required.

EMERGENCY SITE MANAGEMENT DOCTRINE
Canadian Emergency Preparedness College
9.4 **KINGS REGIONAL EMO COORDINATOR**

**RESPONSIBILITIES:**

- Contact Provincial EMO;
- Report to the EOC when notified of its activation;
- Report to and support the EOC Manager;
- Activate the Emergency Management Organization’s emergency alert system;
- Provide emergency response equipment;
- Act as Liaison with the responding Agencies and provide linkage between the EOC and Site;
- Make arrangements to support the Emergency Operations Control Group;
- Provide lists of resources, advisors and provincial or federal emergency response agencies;
- Recommend to the EOC Manager the activation of mutual aid when required;
- Act as the EOC Operations Officer;
- Alert and coordinate the response of volunteer organizations;
- Coordinate the response of radiological response teams;
- Maintain a log of all actions taken;
- Begin long-range planning.
9.5 KINGS REGIONAL ALTERNATE EMO COORDINATOR

RESPONSIBILITIES:

- Report to the EOC when notified of its activation;
- Report to and assist the EOC Manager;
- Assist the Emergency Management Coordinator in carrying out his duties;
- Act as the EOC Duty Officer;
- Begin long-range planning.
9.6 OPERATIONS OFFICER

RESPONSIBILITIES:

- Report to the EOC when notified of its activation;
- Alerts and coordinates volunteer organizations’ services;
- Support the Emergency Operations Centre;
- Provide lists of resources, advisors and provincial/federal emergency response agencies;
- Keeps abreast of EOC personnel stress and the need to alert health services for debriefings;
- Alert photographer(s) and/or videographer(s) to photograph aspects of the disaster, for study and training purposes;
- Maintains the operational map;
- Logs and tracks messages in and out through the telecommunications center;
- Monitors, logs and forwards to appropriate addresses, all facsimiles in/out;
- Reports to the EOC Manager and assists the Duty Officer and departmental representatives, as required;
- Coordinates shift change and relief schedule for EOC personnel; coordinates runners and/or messengers, as necessary;
- Maintain a log of all actions taken.
9.7 TELECOMMUNICATIONS OFFICER

RESPONSIBILITIES:

- Report to the EOC when notified of its activation;
- Activate the telecommunications alert system;
- Coordinates all EOC telecommunication requirements, i.e. phones, radios, facsimile;
- Ensure adequate back-up telecommunications are provided;
- Coordinate radio frequencies used;
- Supervise the Emergency Operations Centre, Message Control Centre;
- Establish static and mobile telecommunications posts as required;
- Provide liaison with Kings County Amateur Radio Club;
- Provide or request mutual aid when required;
- Ensure that logs are maintained of all actions taken, including all IN and OUT messages;
- Begin long-range planning.
9.8 HUMAN RESOURCES

RESPONSIBILITIES:

- Report to the EOC when notified of its activation;
- Activate the department’s emergency plan and alert system;
- Coordinate supply and demand of human resources;
- Select the most appropriate site(s) for the registration of human resources;
- Maintain records of human resources and administrative detail that may involve financial liability;
- Ensure that identification cards are issued for feeding and other purposes;
- Arrange for transportation of human resources;
- Obtain assistance, if necessary, from Human Resources Development Canada;
- Advise the EOC Manager on all matters of Human Resources planning;
- Maintain a log of all actions taken;
- Begin long-range planning.
9.9 PUBLIC INFORMATION OFFICER

RESPONSIBILITIES:

- Report to the EOC when notified of its activation;
- Activate the department’s emergency communications plan and alert system;
- Prepare self-help information for rapid distribution;
- Keep the public informed of significant developments occurring during the emergency or disaster;
- Establish communication requirements;
- Arrange for media facilities at the pre-designated Media Centre;
- Provide public information support at the emergency site(s), if required;
- Gather, process and disseminate information from the emergency services;
- Maintain a log of all actions taken;
- Begin long-range planning.
9.10 FIRE CHIEF

RESPONSIBILITIES:

- Report to the EOC when notified of its activation;
- Activate the department’s emergency plan and alert system;
- Coordinate firefighting operations;
- Coordinate search and rescue operations;
- Recommend to the EOC Manager, the activation of the Mutual Fire Aid System, if required;
- Ensure that dangerous goods support agencies are contacted, if necessary;
- Maintain a log of all actions taken;
- Begin long-range planning.
9.11 POLICE CHIEF – DETACHMENT COMMANDER

RESPONSIBILITIES:

- Report to the EOC when notified of its activation;
- Activate the department’s emergency plan and alert system;
- Establish inner and outer perimeters at the emergency or disaster site(s);
- Control and if necessary, disperse crowds within the emergency or disaster site(s);
- Control traffic to facilitate the movement of emergency vehicles;
- Conduct the evacuation of buildings or residential areas authorized by the Emergency Operations Control Group;
- Ensure the protection of lives, public and private property;
- Provide security and prevent looting of evacuated areas;
- Provide river, storm and tornado watch;
- Provide assistance and support to the Coroner;
- Provide assistance in search and rescue operations;
- Recommend to the EOC Manager, the activation of mutual aid, if required;
- Act as liaison with Local Police Departments/Detachments;
- Act as liaison with Valley Search and Rescue;
- Act as liaison with the Humane Society, when animal control is required;
- Maintain a log of all actions taken;
- Begin long-range planning.

RESPONSIBILITIES OF VALLEY SEARCH AND RESCUE

- Report to the EOC when notified of its activation, if required;
- Activate the organization’s emergency plan and alert system;
- Check operation status of your organization;
- Report operational status to the EOC Manager and receive briefing on the emergency requirements;
- Check with your staff members for any immediate or perceived future manpower requirements;
- Report to the Telecommunications Officer any immediate or perceived future needs regarding communications;
- Answer the immediate needs of the Emergency;
- Maintain a log of all actions taken;
- Begin long-range planning.

EMERGENCY OPERATIONS CENTRE MANAGEMENT
Canadian Emergency Preparedness College
9.12 DIRECTOR PUBLIC WORKS AND UTILITIES

RESPONSIBILITIES:

• Report to the EOC, when notified of its activation;
• Activate the department’s emergency plan and alert system;
• Provide municipal equipment and personnel, as required;
• Provide a list of equipment, supplies, construction companies, private contractors and engineer resources;
• Coordinate the response of Public Works and Utilities, Nova Scotia Power Corporation and MT&T Communications;
• Disconnect any services (utilities) that represent a hazard;
• Provide assistance in cleanup operations and repair of damage where there is a municipal responsibility;
• Advise the Emergency Operations Control Group when sustained damages to buildings exceeds safe limits;
• Provide alternate supplies of water, when required;
• Provide barricades and flashers;
• Provide assistance in search and rescue operations;
• Restore essential services;
• Recommend to the EOC Manager, the activation of mutual aid, if required;
• Act as a liaison with Nova Scotia Power and MT&T Communications;
• Maintain a log of all actions taken;
• Begin long-range planning.
9.13 DIRECTOR OF EMERGENCY SOCIAL SERVICES

RESPONSIBILITIES:

- Report to the EOC when notified of its activation;
- Activate the service’s emergency plan and alert system;
- Coordinate the response of Social Services and if used, volunteer organizations directly involved with Social Services;
- Ensure and coordinate provisions for the following:
  1. emergency feeding
  2. emergency lodging
  3. emergency clothing
  4. emergency registration and inquiry
  5. personal services
- Establish telecommunications requirements;
- Recommend to the EOC Manager, the activation of mutual aid, if required;
- Coordinate the response of volunteer organizations directly involved with Emergency Social Services (St. John Ambulance, Salvation Army, etc.);
- Maintain a log of all actions taken;
- Begin long-range planning.

RESPONSIBILITIES-ST. JOHN AMBULANCE/SALVATION ARMY/ETC.: 

- Report to the EOC when notified of its activation;
- Activate the department’s emergency plan and alert system;
- Check operational status of your organization;
- Report operational status to the EOC Manager and receive briefing on the emergency requirements;
- Check with staff members for any immediate or perceived future manpower requirements;
- Report to the Telecommunications Officer any immediate or perceived future needs regarding communications;
- Answer immediate needs of the emergency;
- Maintain a log of all actions taken;
- Begin long-range planning.
9.14 MEDICAL OFFICER OF HEALTH

RESPONSIBILITIES:

- Report to the EOC when notified of its activation;
- Activate the department’s emergency plan and alert system;
- Provide information on any health hazards for dissemination by the Public Information Officer;
- Provide for mass immunization, if required;
- Oversee water quality checks;
- Provide authority for evacuation of buildings or residential areas for health reasons;
- Coordinate first aid, casualty collection posts, distribution of casualties, real or improvised ambulances and health personnel;
- Provide for life saving surgery and hospitalization for the seriously injured;
- Provide for continuous medical care on an austere basis;
- Provide for emergency medical treatment for the injured not requiring hospitalization;
- Provide lists of wholesale distributors of pharmaceutical or surgical supplies, hospitals, clinics, clinical laboratories, special care facilities and health personnel;
- Recommend to the EOC Manager the activation of mutual aid, if required;
- Act as liaison with federal and provincial health departments;
- Maintain a log of all actions taken;
- Begin long-range planning.
9.15 DIRECTOR PURCHASING AND STORES

RESPONSIBILITIES:

- Report to the EOC, when notified, if necessary;
- Activate the department’s emergency plan and alert system;
- Coordinate purchase and supply requirements;
- Provide an inventory of local stores, supplies and their locations;
- Provide lists of suppliers;
- Maintain records of all purchases and a log of all actions taken;
- Begin long-range planning.
9.16 KINGS COUNTY AMATEUR RADIO CLUB

RESPONSIBILITIES:

• Report to the EOC when notified of its activation;
• Activate the Club’s emergency plan and alert system;
• Act as liaison with local emergency planning officials to determine their telecommunications needs;
• Act as liaison with regional and provincial amateur emergency telecommunications Coordinators;
• Provide lists of amateur radio operators and their telecommunications resources;
• Alert and coordinate, through regional and provincial amateur telecommunications coordinators, the possible deployment for assistance of additional amateur radio operators and resources according to the requirements of the Telecommunications Officer;
• Ensure that volunteer amateur radio operators are properly registered so that Workers’ Compensation coverage is provided during an emergency or disaster;
• Maintain a log of all actions taken;
• Begin long-range planning.
9.17 KINGS EMERGENCY HEALTH SERVICES

RESPONSIBILITIES:

- Report to the EOC when notified of its activation;
- Activate the department’s emergency plan and alert system;
- Check operational status of your department;
- Report operational status to the EOC Manager and receive briefing on the emergency requirements;
- Check with staff members for any immediate or perceived future manpower requirements;
- Report to the Telecommunications Officer any immediate or perceived future needs regarding communications;
- Answer immediate needs of the emergency;
- Maintain a log of all actions taken;
- Begin long-range planning.
9.18 C.F.B. GREENWOOD – 14 WING/CAMP ALDERSHOT

RESPONSIBILITIES:

- Report to the EOC when notified of its activation;
- Activate the department’s emergency plan and alert system;
- Check operational status of your organization;
- Report operation status to the EOC Manager and receive briefing on the emergency requirements;
- Check with other staff members for any immediate or perceived future manpower requirements;
- Report to the Telecommunications Officer and immediate or perceived future needs regarding communications;
- Answer immediate needs of the emergency;
- Maintain a log of all actions taken;
- Begin long-range planning.

(Note: Request for military assistance to be made through the Provincial EMO office as per the aid to civil power provisions).
9.19 SAFETY OFFICER

RESPONSIBILITIES:

- Report to the EOC, when notified, if necessary;
- Provide assistance and direction on safety issues;
- Establish contact with Emergency Site Commander;
- Act as liaison with all Emergency Departments relating to safety;
- Maintain a log of all actions taken;
- Begin long-range planning.
9.20 Scribe

RESPONSIBILITIES:

- Report to the EOC, when notified of its activation;
- Record EOC logs and post;
- Record minutes of EOC briefings and debriefings.
10. THE EMERGENCY SITE: LAYOUT, ROLES AND PROCESS

The principles and components of site layout

One of the greatest tools of effective site control and management is an effective site layout. Each emergency site requires a unique site layout, as does each disaster, even those affecting the same site. However, the principles affecting site layout are similar and bear attention. However, all site layouts are guided by similar principles.

There are a number of key factors, which could have significant impact on the site layout and the overall response effort. These are listed below and should be viewed both on their own merit and in the context of the impact the disaster will have on each.

- Terrain type (e.g., rugged, mountainous, marshy, sandy).
- Lay of the land (e.g., closed-in versus open).
- Environmental constraints (i.e., weather, season).
- Accessibility to the site and access routes.
- Land ownership and jurisdiction.
- Communications needs and available resources.
- Space requirements and availability.
- Available structural resources (i.e., buildings, warehouses, shelters).
- Safety (i.e., from the elements, disaster agents).
- Availability and proximity to water, power and sanitation resources/services.

Emergency sites may contain unique components, which reflect the nature of the disaster, the resource capacity of the municipality, or the topography of the site. However, generally speaking, most emergency sites have similar components. These are listed below (refer to Figure 6).

**Inner perimeter** with designated and secured entry/exit points.

**Outer perimeter** with designated and secured entry/exit points.

**Traffic control points.** These include well-marked primary and alternate in/out routes. They also include specific points along these routes where traffic can be controlled and security Management implemented as appropriate.

**Site command post.** This command post is often accompanied by Agency/Department posts. It should be located centrally as close as possible to the primary area of the inner perimeter. It should also be easily identifiable (i.e., flagged) and connected to as many communication media as possible. Given sufficient space, it should include all agency Site Control Officers. It is also referred to as **ESM Command Centre (ESMCC)**

**Command Post** (CP) for each of the major response agencies.
Triage area. If necessary, this is an area where the injuries are categorized for the purpose of treatment and transportation to health care facilities. It needs to be close to the inner perimeter yet secure from danger. It should also be large enough to accommodate various responders and injured persons, and be near in/out transportation route(s). This area may include the treatment area.

Treatment area. When required, this area should be established in a safe zone outside the inner perimeter. It should be well marked and be close to the in/out transportation route(s). When the treatment process is expected to last a long time, or when weather dictates it, the Site Team may wish to establish large tent(s) within which to conduct the treatment. To avoid congestion, ambulances must be dispatched to the treatment area from the staging area.

Casualty Collecting Area. The area from which the casualties are taken away to the various health care facilities for treatment.

Staging area. Located within the outer perimeter, or some times just outside of it, the staging area contains all resources dispatched to the site but yet unused. The area must have in/out routes and its entry points secured. It should be near the rest and feeding areas. It is managed by the Staging Area Coordinator (and, where available, Staging Officers). It must be in close communications with the Site Command Post.

Parking area(s). These areas are intended to reduce traffic congestion within the site. They may be used to keep response vehicles, which may not be required for lengthy period of time. Response agencies may be assigned their own specific parking lot/sector and tasked with the management of its use and the security of its content.

Temporary morgue. This will not be required in all disaster situations. However, when required it should be established within the outer perimeter away from the rest of site operations to secure it from interference. When established, it requires round-the-clock access control and may require counseling/clergy staff nearby to assist the bereaved. (A separate facility/tent may be established near the temporary morgue for that purpose.) The temporary morgue should also have a property office to preserve the belongings of the deceased and coordinate their release as appropriate.

Logistics area. This area is designed for vehicle repair, equipment servicing, fueling, distribution/allocation of equipment, and the storage of dangerous goods. It should be near the main access routes and within the outer perimeter. Moreover, the area should be near the Rehab. Sector but must be both upwind and far enough from it to reduce the presence of noise and fumes in the Rehab. Sector.

Rehab. Sector (or rest and feeding area). This area is particularly important for operations which last for lengthy periods. It needs to be near access route(s) but should be located in a less busy (i.e., quiet and isolated) area of the site.
**Decontamination Area.** This is a relatively small area which, when required, should be located just outside the Inner Perimeter as near as possible to the hot zone. It should be available to decontaminate both responders as well as casualties being evacuated from the hot zone.

**Media center or access point.** Wherever possible, members of the Media should be allowed controlled access to the site and key site personnel (e.g., Site Manager, Agency Site Control Officers). The Media center may be a tent or other structure where Media representatives are briefed verbally, provided news updates, or gather for site tours. It should be easily identifiable, near access routes, and away from the key site operations.

**Helibase.** When required, and depending on the topography of the site, the helibase should be located near the Site Command Post. The helibase operations may require fuel supplies and lighting.

**Volunteer coordination point.** This area should be established at a key entry point through the outer perimeter. It should contain a facility (e.g., tent) in which to carry out volunteer registration and briefing, ideally located near the rest and feeding area.

**Entry points.** The site should have two entry points; one for emergency response personnel and equipment, the other for volunteers, the media and visitors. The access through these points must be controlled.

**Exit points.** There should be a primary and an alternate exit points. Both should be controlled and, ideally, at opposite ends/sides of the site.

Many factors should be considered when designing of ‘laying out’ the emergency site. As noted above, there are no precise formats or one single workable layout. However, the layout of any site has a direct bearing on the flow of communications among the agencies operating within it. The communication flow will be influenced by the following considerations:

- Related functions and agencies should be co-located and grouped into operational task groups.
- Major response organizations/agencies (e.g., Fire, Police) should be isolated and given functional lead role (see Section below). (That role needs to be identified to all key organizations at the site.)
- The various components should be positioned in the site along the major transportation routes.
- All command posts (CPs), but especially the Site Command Post, must be easily identifiable (e.g., flagged, strobe lit, brightly colored), readily accessible, and within view of the major action.
- The layout and its transportation pattern must allow for the smooth in/out flow of personnel and resources.
- The layout of the site and the location of all functional areas must be communicated to all agencies at the site.
Key roles and functions

The Emergency Site Management system integrates the various roles and functions of response organizations and their key personnel. In doing so, it provides a number of benefits. Key among them is the ability to effectively:

- Provide for the safety of emergency personnel and the general public.
- Remove and treat injured or threatened patients.
- Protect and conserve property.
- Perform recovery and reconstruction tasks.

The activities by members of response organizations at the emergency site may be divided into five categories:

- Tasks in support of the Strategic (e.g., site management) roles.
- Command Post functions.
- Control point operations.
- Tactical activities.
- Tasks in support of the main operation.

Site Manager. Appointed by the EOC Control Group, the Site Manager is responsible for the management of the site until its closure. The Site Manager must:

- Establish the inner and outer perimeters.
- Designate the location of the Site Command Post.
- Lay out the site and all its components.
- Manage the flow of information through the Site Command Post to members of the Site Team and the EOC Control Group.
- Coordinate key response activities (i.e., those activities/operations which would affect more than one agency or the overall outcome of the response effort at the site).
- Communicate with the Media.

Staging area coordinator. The person occupying this role may be appointed by the Site Manager to perform the following functions:

- Establish and lay out the staging area.
- Establish the flow pattern for vehicle movement.
- Account, at any given point, for the resources within the staging area.
- Maintain contact with the Site Manager or Site Team.
- Maintain contact with the Logistics Area to facilitate repairs or fueling as appropriate.
- Deploy resources requested by the Site Manager or Site Team.
- Alert the Site Manager of resources, which may be discharged from the staging area.
- When directed by the Site Manager, discharge unnecessary recourse.
**Liaison officer (LO).** This person is designated by the Site Manager to help coordinate key functions in and around the Site Command Post. The LO should perform the following functions:

- Assist with the lay out of the site.
- Maintain the event log.
- Assist with the flow of information within the Site Team.
- Undertake responsibility for specific tasks assigned by the Site Manager.
- Act as alternate Site Manager (if so directed).

**Agency Site Control Officers** (e.g., the senior representatives of each of the key response agencies at the site). These individuals need to:

- Assist, as appropriate, the Site Manager with site layout.
- Co-locate, as appropriate/directed, their command post with the Site Command Post.
- Command/control their agency’s response effort at the site.
- Share appropriate information with the other members of the Site Team.
- Coordinate activities which may impact other agencies with the appropriate agency-representative.
- Be available to communicate with the Media, as appropriate. (This will be performed in support of the Emergency Public Information Officer, and in keeping with the concept of a single spokesperson for the region.)

More specifically, each of the major response agencies has a set of accepted ‘traditional’ roles. These are listed below by agency.

**Police.** Often, the roles assigned to the Police Services are the protection of life and property, as well as the control of traffic and crowd. Security of the site and the control of traffic within it should be a Police responsibility.

The Police Services have also been called out to conduct investigations (e.g., criminal or in case of fatalities), care for the dead, provide perimeter security, assist with or conduct an evacuation, and help maintain a record of events. They also have valuable communication equipment and a trained personnel pool, which could be employed in a variety of roles at the Site Command Post.

**Fire.** The Fire Services are usually tasked with the suppression of fire, containment of dangerous goods, decontamination, search and rescue, as well as the provision of basic health care. They may also be involved in the evacuation of the site and the protection of site personnel (i.e., ensuring against structural collapse). Like the Police Services, they too have valuable communication equipment and trained personnel who could be employed in and around the Site Command Post.
Emergency Medical Services (EMS). The primary role of the EMS is to provide medical services (i.e., triage and treatment) and to transport the wounded to health care facilities as appropriate. If trained to do so, some members may be involved in structural rescue in support of the Fire Services. EMS personnel must also coordinate with the Site Manager the location of and resources for patient triage, casualty collecting area, and patient care or transportation.

Public Works. The primary role of Public Works departments/agencies is to provide the resources needed by the primary responders to perform their tasks effectively and safely. Services provided may include establishment of barriers, closure of transportation routes, provision of other needed resources (e.g., lighting or shoring equipment, heavy equipment), or the movement of resources. These individuals may work hand-in-hand with utility company personnel and transportation agencies.

Transportation. The primary task of transportation personnel is to move people from one location to another. This may involve the evacuation of people from the danger zone; the transportation of responders or volunteers to the site; or, in cases of mass casualties, to evacuate the wounded.

‘Assistant’. Each of the above mentioned positions, including that of the Site Managers are likely to have one or more people designated as ‘Assistant’ and tasked with various supportive duties. The details of their actual duties must be designated by the person to whom they report.

Others. Disaster sites are likely to involve a myriad of response agencies/organizations and representatives of many jurisdictions. Their primary role is to support the Site Manager and the Site Team. To that end they are to bring their expertise and specialized resources (if any) and must be willing to cooperate with the Site Manager to meet the needs and priorities established for the site. Failure to do so will only jeopardize the success of the overall effort.

Site operations: Tips for success

Emergency sites are, by necessity, the focus of all disaster response efforts. Nearly always, they are established in or around the area where the disaster inflicted its greatest damage. And, because of the inherent risks to life, limb, property and the environment, disaster response at the site must be quick, comprehensive and well managed.

The following are key lessons relating to successful operations at emergency sites regardless of their nature:

- Quickly establish and brief the Site Team.
- If a Site Manager is not appointed, establish one on an interim basis.
- Re-locate all agency command posts to the Site Command Post, or, in its absence, a central location near the inner perimeter.
• Establish inter-agency communications (i.e., the process through which vital information is shared in a timely manner).
• Pool knowledge regarding the event, its consequence and the response effort.
• Anticipate required actions and resources.
• Adapt the response organization and its procedures to the changing circumstances.
• Be proactive in requesting resources or information. (For example, request area lights BEFOR it starts to get dark, or order food BEFOR shift changes.)
• Coordinate agency operations which may have a bearing on the operation of other response agency (ies) or the overall operation at the site.
• Establish a single Media representative (e.g., individual or group) for the operation.
